Core Curriculum

In order to provide a solid foundation for students' education and to make transfer between colleges and universities as smooth and seamless as possible, each state-supported institution of higher education in Texas has adopted a core curriculum. Through the Texas Core Curriculum, students gain knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for learning.

1. Critical Thinking Skills to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
2. Communication Skills to include effective development, interpretation and expression of ideas through written, oral, and visual communication.
3. Empirical and Quantitative Skills to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
4. Teamwork to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
5. Social Responsibility to include intercultural competency, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.
6. Personal Responsibility to include the ability to connect choices, actions, and consequences to ethical decision-making.
7. Components of the core curriculum can be transferred in a block from Tarrant County College to another Texas public college or university to be substituted for the corresponding core curriculum of the receiving institution.

TCC designates core curriculum courses completed by a student on the official transcript. If a student satisfies all component areas, the statement "Texas Core Curriculum Completed (Month/Year)" will appear on the transcript. Students who transfer without completing the core curriculum receive academic credit for each of the courses they successfully completed in the TCC core curriculum.

The Associate of Arts, Associate of Arts in Teaching, Associate of Science, and Associate of Science in Engineering degrees include courses drawn from the core curriculum. A student concurrently enrolled at more than one institution of higher education should follow the core curriculum requirements in effect for the institution at which the student is classified as degree-seeking.

Tarrant County College has established the 42-semester-credit hour core curriculum listed below.

COMMUNICATION (CODE 010) - 6 HOURS

Composition

One three-credit-hour course

- ENGL1301 Composition I - Composition I

Speech and Communication Skills

One three-credit-hour course

- SPCH1311 Intro to Speech Communication- Introduction to Speech Communication
- SPCH1315 Public Speaking - Public Speaking
- SPCH1321 Business and Professional Comm - Business and Professional Communication

MATHEMATICS (CODE 020) - 3 HOURS

One three-credit-hour course

- MATH1314 College Algebra - College Algebra
- MATH1316 Plane Trigonometry - Plane Trigonometry
- MATH1324 Math Business/Social Sciences - Mathematics for Business and Social Sciences
- MATH1325 Calculus-Business/Soc Science - Calculus for Business and Social Sciences
- MATH1332 Contemporary Math - Quant Reas- Contemporary Mathematics (Quantitative Reasoning)
- MATH1342 Elementary Statistical Methods - Elementary Statistical Methods
- MATH2412 Pre-Calculus Math- Pre-Calculus Math
- MATH2413 Calculus I- Calculus I

LIFE AND PHYSICAL SCIENCES (CODE 030) - 6 HOURS *

Two four-credit-hour laboratory science courses

- BIOL1406 Biol Scien Maj I (Lec/Lab) - Biology for Science Majors I (Lecture + Lab)
- BIOL1407 Biol Science Maj II (Lec/Lab) - Biology for Science Majors II (Lecture + Lab)
- BIOL1408 Biol Non-Sci Maj I (Lec/Lab) - Biology for Non-Science Majors I (Lecture + Lab)
- BIOL1409 Biol Non-Sci Maj II (Lec/Lab) - Biology for Non-Science Majors II (Lecture + Lab)
- BIOL2401 Anatomy & Physiology I - Anatomy and Physiology I (Lecture + Lab)
- BIOL2402 Anatomy & Physiology II - Anatomy and Physiology II (Lecture + Lab)
- BIOL2406 Environmental Biol (Lec/Lab) - Environmental Biology (Lecture + Lab)
- BIOL2421 Microbiology Sci Maj (lec/lab) - Microbiology for Science Majors (Lecture + Lab)
- CHEM1405 Intro Chemistry I (Lec/Lab) - Introductory Chemistry I (Lecture + Lab)
- CHEM1411 General Chemistry I (Lec/Lab) - General Chemistry I (Lecture + Lab)
- CHEM1412 General Chemistry II - General Chemistry II (Lecture + Lab)
- CHEM2423 Organic Chemistry I (Lec/Lab) - Organic Chemistry I (Lecture + Lab)
- CHEM2425 Organic Chem II (Lec+Lab) - Organic Chemistry II (Lecture + Lab)
- GEOL1401 Earth Sc Non-Sci Mj (Lec/Lab) - Earth Science for Non-Science Majors I (Lecture + Lab)
- GEOL1402 Earth Sci Non-Sc II (Lec/Lab) - Earth Science for Non-Science Majors II (Lecture + Lab)
- GEOL1403 Physical Geology (Lec/Lab) - Physical Geology (Lecture + Lab)
- GEOL1404 Historical Geology (Lec/Lab) - Historical Geology (Lecture + Lab)
- GEOL1405 Enviro Science (lec/lab) - Environmental Science (Lecture + Lab)
- GEOL1445 Oceanography (Lec/Lab)- Oceanography (Lecture + Lab)
- GEOL1447 Meteorology (Lec/Lab)- Meteorology (Lecture + Lab)
- PHYS 1401 - College Physics I (Lecture + Lab)
- PHYS1402 College Physics II (Lec/Lab)- College Physics II (Lecture + Lab)
- PHYS1403 Stars and Galaxies (Lec/Lab)- Stars and Galaxies (Lecture + Lab)
- PHYS1404 Solar System (Lec/Lab) - Solar System (Lecture + Lab)
- PHYS1415 Physical Science I (Lec/Lab) - Physical Science I (Lecture + Lab)
- PHYS2425 University Physic I (Lec/Lab) - University Physics I (Lecture + Lab)
- PHYS2426 University Phys II (Lec/Lab) - University Physics II (Lecture + Lab)

LANGUAGE, CULTURE AND PHILOSOPHY (CODE 040) - 3 HOURS

One three-credit-hour course

- ENGL2322 British Literature I - British Literature I
- ENGL2323 British Literature II - British Literature II
- ENGL2327 American Literature I - American Literature I
- ENGL2328 American Literature II - American Literature II
- ENGL2332 World Literature I - World Literature I
- ENGL2333 World Literature II - World Literature II
- HIST2311 Western Civilization I - Western Civilization I
- HIST2312 Western Civilization II - Western Civilization II
- HIST2321 World Civilizations I - World Civilizations I
- HIST2322 World Civilizations II - World Civilizations II
- HUMA1301 Introduction to Humanities I - Introduction to Humanities I
- PHIL1301 Introduction to Philosophy - Introduction to Philosophy
- PHIL1304 Intro to World Religions - Introduction to World Religions
- PHIL2306 Introduction to Ethics - Introduction to Ethics
- PHIL2316 Classical Philosophy - Classical Philosophy
- SPAN2311 Intermediate Spanish I - Intermediate Spanish I
- SPAN2312 Intermediate Spanish II - Intermediate Spanish II

CREATIVE ARTS (CODE 050) - 3 HOURS

One three-credit-hour course

- ARTS1301 Art Appreciation - Art Appreciation
- ARTS1303 Art Hist I (Prehist - 14 cnt) - Art History I (Prehistoric to the 14th century)
- COMM2366 Film Appreciation - Film Appreciation
- DANC2303 Dance Appreciation - Dance Appreciation
- DRAM1310 Theater Appreciation - Theater Appreciation
- COMM2366 Film Appreciation - Film Appreciation
- HUMA1315 Fine Arts Appreciation - Fine Arts Appreciation
- MUSI1306 Music Appreciation - Music Appreciation
- MUSI1307 Music Literature - Music Literature
- MUSI1310 American Music - American Music

AMERICAN HISTORY (CODE 060) - 6 HOURS

Two three-credit-hour courses

Choose one from the following:

- HIST1301 United States History I - United States History I + **or**
- HIST2327 Mexican-American History I - Mexican American History I

  Choose one from the following:
- HIST1302 US History II Honors - United States History II **or**
- HIST2328 Mexican-American History II - Mexican American History II **or**
- HIST2301 Texas History - Texas History

GOVERNMENT AND POLITICAL SCIENCE (CODE 070) - 6 HOURS

Two three-credit-hour courses

- GOVT2305 Federal Government - Federal Government (Federal Constitution & Topics)
- GOVT2306 Texas Government - Texas Government (Texas Constitution & Topics)

SOCIAL AND BEHAVIORAL SCIENCE (CODE 080) - 3 HOURS

One three-credit-hour course

- ANTH2346 General Anthropology - General Anthropology
- ECON2301 Principles of Macroeconomics - Principles of Macroeconomics
- ECON2302 Principles of Microeconomics - Principles of Microeconomics
- GEOG1301 Physical Geography - Physical Geography
- GEOG1302 Human Geography - Human Geography
- GEOG1303 World Regional Geography - World Regional Geography
- PSYC2301 General Psychology - General Psychology
- SOCI1301 Introduction to Sociology - Introduction to Sociology

COMPONENT AREA OPTION (CODE 090) - 6 HOURS

Composition

One three-credit-hour course

Choose one from the following:

- ENGL1302 Composition II - Composition II + **or**
- ENGL2311 Technical & Business Writing - Technical and Business Writing.

Health and Wellness

One one-credit-hour course

- KINE1164 Intro Physcl Fitness/Wellness - Introduction to Physical Fitness and Wellness

Overflow (Extra) Hours *

Two semester-credit-hours

The two overflow (extra) semester-credit-hours are met by completing the Life and Physical Sciences requirement.

TOTAL SEMESTER HOURS: 42

** Taking two four-credit-hour laboratory science courses allows a student to earn eight semester-credit-hours; six of which are counted to meet the Life and Physical Sciences requirement. The other two semester-credit-hours are considered overflow (extra) hours and are used to complement the Component Area Option (Code 090) requirement.*

Fall 2026

FALL 16-WEEK SESSION	
August 10, 2026	Admission Deadline for First-Time-in-College Applicants
August 13, 2026	Registration for Fall 16- Week Session Ends- Midnights
August 16, 2026	Last Day for 100% Refund for Fall 16-Week Session
August 17, 2026	Audit Registration for Fall 16-Week Session
September 1, 2026	Official Day of Record (Census Date) for Fall 16-Week Session
September 4, 2026	Last Day for 70% Tuition Refund for Fall 16-Week Session
September 14, 2026	Last Day 25% Tuition Refund for Fall 16-Week Session
November 19, 2026	Last Day to Drop a Class for Fall 16-Week Session
December 9, 2026	Final Exams and Classes End for Fall 16-Week Session
December 14, 2026	All Grades Due for Fall 16-Week Session

FALL 1ST 8-WEEK SESSION	
August 10, 2026	Admission Deadline for First-Time-in-College
August 13, 2026	Registration Ends for Fall 1st 8-Week Session - Midnight
August 16, 2026	Last Day for 100% Tuition Refund for Fall 1st 8-Week Session
August 17, 2026	Audit Registration for Fall 1st 8-Week Session
August 17, 2026	Classes begin for Fall 1st 8-Week Session
August 24, 2026	Official Day of Record (Census Date) for Fall 1st 8-Week Session
August 26, 2026	Last Day for 70% Tuition Refund for Fall 1st 8-Week Session
August 28, 2026	Last Day for 25% Tuition Refund for Fall 1st 8-Week Session
October 1, 2026	Last Day to Drop a Class for Fall 1st 8-Week Session
October 9, 2026	Final Exam and Classes End for Fall 1st 8-Week Session
October 12, 2026	All Grades Due for Fall 1st 8-Week Session

FALL 15-WEEK WEEKEND SESSION	
August 14, 2026	Admission Deadline for First-Time-in-College Applicants
August 17, 2026	Registration Ends for Fall 15-Week Weekend Session - Midnight
August 20, 2026	Last Day for 100% Refund for Fall 15-Week Weekend Session
August 21, 2026	Audit Registration for Fall 15-Week Weekend Session
August 21, 2026	Classes Begin for Fall 15-Week Weekend Session
September 4, 2026	Official Day of Record (Census Date) for Fall 15-Week Weekend Session
September 3, 2026	Last day for 70% Tuition Refund for Fall 15-Week Weekend Session
September 9, 2026	Last Day for 25% Tuition Refund for Fall 15-Week Weekend Session
September 5, 2026	Last Day to Drop a Class for Fall 15-Week Weekend Session
December 6, 2026	Final Exams and Classes End for Fall 15-Week Weekend Session
December 7, 2026	All Grades Due for Fall 15-Week Weekend Session

FALL 14-WEEK WEEKEND SESSION	
August 21, 2026	Admission Deadline for First-Time-in-College Applicants
August 24, 2026	Registration Ends for Fall 14-Week Weekend Session - Midnight
August 27, 2026	Last Day for 100% Tuition Refund for Fall 14-Week Weekend Session
August 28, 2026	Audit Registration for Fall 14-Week Weekend Session
August 28, 2026	Classes Begin for Fall 14-Week Weekend Session
September 11, 2026	Official Day of Record (Census Date) for Fall 14-Week Weekend Session
September 10, 2026	Last Day for 70% Tuition Refund for Fall 14-Week Weekend Session
September 14, 2026	Last Day for 25% Tuition Refund for Fall 14-Week Weekend Session
November 12, 2026	Last Day to Drop a Class for Fall 14-Week Weekend Session
December 6, 2026	Final Exams and Classes End for Fall 14-Week Weekend Session
December 7, 2026	All Grades Due for Fall 14-Week Weekend Session

FALL 1ST 7-WEEK WEEKEND SESSION

Dual Enrollment

Dual Credit

The Dual Credit Program at Tarrant County College (TCC) offers motivated high school students a powerful opportunity to earn both high school and college credit simultaneously. Courses may be taken at the student's high school or on a TCC campus, giving students early exposure to college-level academics in a supportive environment.

One of the key goals of TCC's Dual Credit initiative is to help students earn at least 15 college credit hours that count toward a certificate or degree pathway.

Dual Credit students follow the course offerings stipulated by the Tarrant County College course crosswalk established in collaboration with high school partners. The course crosswalks outline the approved coursework between institutions and establish protocols for reviewing courses offered for dual enrollment.

For more information about Dual Credit, visit the Dual Enrollment office at any of the TCC campuses.

Dual Credit

Dual Enrollment

Early College High School (ECHS)

Early College High School (ECHS) is a specialized program that provides high school students with a rigorous academic experience blending high school and college coursework. Participating in an ECHS, students can earn a high school diploma while simultaneously working toward a postsecondary credential—such as a certificate, associate degree, or up to 60 college credit hours applicable toward a baccalaureate degree.

ECHS campuses are typically located on or near college campuses, offering students direct access to college resources and a collegiate environment. In addition, ECHS campuses are open-enrollment high schools that are especially beneficial for students who may be underrepresented in higher education, providing a structured pathway to academic achievement and college success.

ECHS students follow the course offerings stipulated by the Tarrant County College course crosswalk in collaboration with high school partners. The course crosswalks outline the approved coursework between institutions and establish protocols for reviewing courses offered for dual enrollment.

For more information about ECHS, visit the Dual Enrollment office at any of the TCC campuses.

Dual Credit

Dual Enrollment

Pathways in Technology Early College High Schools (PTECH)

PTECH models are innovative, open-enrollment high school models designed to provide students—particularly those least likely to pursue college—with the opportunity to earn a high school diploma and a postsecondary credential and/or associate degree.

PTECH students engage in college-level coursework focused on Career and Technical Education (CTE), earning college credit hours that support workforce readiness.

The hallmark of the PTECH model is its career-centered approach, which integrates work-based learning experiences to prepare students for high-demand fields.

PTECH students follow the course offerings stipulated by the Tarrant County College course crosswalk in collaboration with high school partners. The course crosswalks outline the approved coursework between institutions and establish protocols for reviewing courses offered for dual enrollment.

Note: While many PTECH courses align with degree plans, some courses may not be eligible for transfer to specific institutions or degree programs. Students are encouraged to consult with academic advisors to ensure their coursework supports their long-term educational goals.

For more information about PTECH, visit the Dual Enrollment office at any of the TCC campuses.

Dual Credit

Dual Enrollment for Homeschool Students

Homeschooled students are eligible to participate in Tarrant County College's Dual Enrollment program, earning both high school and college credit. Students are encouraged to work toward at least 15 college credit hours to build a strong foundation for a certificate or degree.

To get started, homeschool students should make an appointment with their local Coordinator of Educational Partnerships and Career Advisor.

Dual Credit

Dual Enrollment Tuition

Effective Fall 2023, Tarrant County College (TCC) shall not charge tuition for eligible courses taken by high school students enrolled in a Dual Credit, Early College High School (ECHS), or Pathways in Technology Early College High School (P-TECH) program with a formal partnership agreement.

Eligible courses must appear in the program's Memorandum of Understanding (MOU) and in the approved Tarrant County College course crosswalk.

The expectation that students will work toward completing 15 or more college credit hours, a certificate, or an associate degree supports dual enrollment tuition.

Transfer of Credit

Transcript Evaluation

Students working toward a Tarrant County College (TCC) associate degree or certificate of completion will have prior transcripts automatically evaluated once all transcripts are on file. Students who have indicated they are not degree-seeking will not have automatic transcript evaluation but can change their intent by contacting an Admissions and Registrar Office. Transfer credit for students receiving federal financial aid and/or VA benefits must be evaluated; students cannot receive these types of aid for courses they have previously completed.

Students transferring to TCC can expect that approved academic courses earned at any Texas public institution will be accepted in transfer as long as a passing grade was earned and TCC has an equivalent course. Elective credit may be awarded when TCC does not offer an equivalent course in content or credit hours. Students who dispute a transfer credit evaluation decision made by TCC should contact the District Admissions and Records Office to request a review of the coursework involved.

Students planning to transfer TCC coursework to another college or university are advised to contact the transfer institution to determine its transfer policy. TCC has established transfer agreements with area colleges and universities. Campus Transfer Centers maintain transfer information provided by area institutions and help students with transfer planning.

Transfer to a College/University

Students attending Tarrant County College before transferring to a senior college or university will have the best experience in transferring credits if these steps are followed:

- Consider participating in one of the dual admission partnerships TCC participates in.
- Select a major field of study and a senior college or university that offers a bachelor's degree in that field.
- Review the selected institution's college catalog and identify the freshman and sophomore courses suggested.
- Understand that there may be limits on the number of TCC credit hours that can transfer to a senior institution.
- See a TCC career advisor or Transfer Center for help in selecting the TCC courses that correspond to the requirements of the senior college.
- Complete the TCC courses with a grade point average of at least 2.0 and a passing grade in each course intended to transfer (some senior institutions require a "C" grade or better for each course to transfer).
- Apply for admission to the senior college no later than the last semester at TCC.
- Request an official transcript be sent to the transfer institution at time of application and when all TCC final grades and credentials are posted to the TCC transcript.

Prior Learning Assessment

Prior Learning Assessment (PLA) is a process for assessing learning gained outside a traditional post-secondary academic environment. PLA includes learning acquired through standardized exams, military service and training, work experience, professional certifications and licenses, and non-credit courses. PLA evaluates what a student already knows at the college level derived from these experiences.

A student must meet the following requirements to be eligible for PLA credit:

- Complete at least one full semester (fall, spring, summer) at Tarrant County College, and

- Be enrolled at Tarrant County College during the semester credit is awarded; and
- Have successfully completed (grade of "C" or better) six semester credit hours at Tarrant County College prior to posting PLA credit.

Credit awarded through PLA does not satisfy the residency requirement toward graduation. The successful completion of any PLA will result in a grade of credit (CR) on the student's official record or transcript, which does not affect a student's grade point average.

A PLA fee of $25 per course is assessed to award credit. There is no PLA fee associated with Advanced Placement (AP), International Baccalaureate (IB) Diploma, military-related credit, or CE to UG cross-listed courses. Fees are charged in accordance with schedules set by TCC policy and/or commercial testing agencies.

Tarrant County College accepts the following methods for validating prior learning and awarding credit:

1. Standardized Exams
    - Advanced Placement (AP) - Students who took rigorous college-level work while in high school may receive credit if they have successfully completed the AP course exam with a score of "3" or higher.
    - College-Level Examination Program (CLEP) - Students who exhibit mastery of a college subject through a CLEP exam may receive credit.
    - International Baccalaureate Diploma - Students who have received the International Baccalaureate (IB) diploma may be eligible to receive up to 24 hours of transfer credit for courses completed with a minimum grade of four (4).
2. Credit-by-Examination/Experience (CBE)
    - Students who believe they already possess the knowledge and/or skills taught in certain courses or programs offered by the College may challenge these through credit-by-examination/experience. A request to challenge a course for credit may be based on achievement in the subject, non-traditional education, appropriate work, and/or other learning experiences. Credit-by-examination/experience is not available for all courses offered by TCC.
3. Professional Certifications and Licenses
    - Students who possess a current professional certification or license may request credit for eligible courses associated with the declared or intended program of study.
4. Continuing Education to Undergraduate (CE to UG)
    - Students may be eligible to earn academic (UG) credit for non-credit continuing education (CE) cross-listed courses taken at Tarrant County College.
5. Military Service/Training
    - Students may receive credit for military service who have a) graduated from a public or private high school accredited by a generally recognized accrediting organization, a Department of Defense high school, or earned a High School Equivalency diploma; and b) were honorably discharged after serving at least two years of service in the Armed Forces or were honorably discharged because of a disability.

To request credit, the military/veteran should submit a Joint Services Transcript (JST) to TCC for evaluation.

Admission to TCC

Tarrant County College (TCC) is an open-admission institution. This means any person can be admitted, regardless of their educational background. We do not require standardized tests such as the SAT or ACT, and there is no application fee.

However, foreign nationals who wish to study at TCC under the F-1 visa program have additional requirements which must be met before TCC can issue the federal document they need to apply for this visa. Learn about applying to TCC as an F-1 visa student.

TCC does not discriminate on the basis of race, color, national origin, religion, sex, sexual orientation, gender identity or expression, age, disability, genetic information or veteran status in its application and admission processes, educational (including vocational) programs and activities, facilities, or employment policies, procedures and processes.

Students are encouraged to apply for admission using the online application through the TCC website. Applications may also be completed in person at any campus Admissions and Registrar Office.

Admission to Tarrant County College (TCC) does not guarantee acceptance into specific Selective Admission Programs. Students should consult the catalog, website, program brochure, program coordinator, campus Admissions and Registrar Office, or the Advising and Student Success Center for additional information concerning specialized program requirements.

Through its program of courses in developmental English and English as a Second Language, TCC seeks to ensure that a deficiency in English language skills will not be an obstacle to success in any educational program.

Tarrant County College reserves the right to refuse enrollment to any applicant/student who does not comply with College policy or procedures, or whose enrollment would be incompatible with the aims and objectives of the College, or whose presence on campus, in the judgment of the College, would not be in the best interest of the student or the College.

Admission Requirements for New Applicants

First-Time-in-College (FTIC) students will be required to submit the admissions application at least 7 calendar days prior to the start of the desired session to be considered for admission for that session.

1. **High School Graduate**. Graduates of accredited high schools who have not attended any regionally accredited college or university after graduation from high school will be admitted upon completion of an Admissions Application. TCC defines an accredited high school as a Texas high school authorized through the Texas Education Agency, the Texas Private School Accreditation Commission, the Southern Association of Colleges and Schools, or if located in a state other than Texas, that state's comparable agencies and/or regional accrediting association.
    - Applicants under the age of 22 must comply with state law concerning meningitis vaccination before registration will be allowed.
    - An official high school transcript or copy of a high school diploma should be submitted at the time of admission or within the first term of enrollment.
2. **Home School Graduate.** Graduates of home school will be admitted upon completion of an Admissions Application. TCC defines a home school as a school where the parent or guardian has been directly involved in the instructional process.
    - Applicants under the age of 22 must comply with state law concerning meningitis vaccination before registration will be allowed.
    - A transcript of high school work may be submitted at the time of admission or within the first term of enrollment.
3. **High School Equivalency.** An individual who has passed the General Education Development (GED) test or any other approved High School Equivalency credential will be admitted upon completion of an Admissions Application.
    - Applicants under the age of 22 must comply with state law concerning meningitis vaccination before registration will be allowed.
4. **College Transfer.** Transfer students who have attended another college or university prior to applying to TCC will be admitted upon completion of an Admissions Application.
    - Applicants under the age of 22 must comply with state law concerning meningitis vaccination before registration will be allowed.
    - These applicants are encouraged to provide official copies of all regionally-accredited transcripts before enrolling. Students who have attended a non-regionally accredited institution are encouraged to talk to an advisor about possible transfer credit.
    - Students receiving any type of financial assistance may be required to submit prior transcripts.
5. **Readmission.** Students who previously enrolled for undergraduate credit at TCC but have been away for 12 or more months do NOT need to reapply for admission - they should use the "Student Reactivation" link in the current student portal.

Special Admissions Processing:

1. **Dual Credit or Early College High School** – High school students who meet academic requirements may enroll in college courses prior to completion of their high school work. These students should start by completing the Admissions Application.
    - Dual Credit: Dual credit programs are college courses offered by TCC but taught in the high school classroom or on a TCC campus. Credits may satisfy both high school and college requirements. Students interested in taking these courses should seek assistance from their high school counselor.
    - Early College High School: These students are selected by participating school districts and should follow instructions provided by their school district about admission and registration.
      More information about dual enrollment admission is available on the TCC website and at each campus Admissions and Registrar Office. Need-based scholarships may be available for dual credit students who meet specific criteria. Information about scholarships is available at each campus Student Financial Aid Services Office.
2. **High School Graduation from a Non-Accredited High School** – Graduates from a non-accredited high school (schools not accredited as defined in item 1 or 2 above) may be admitted upon completion of an Admission Application.
3. **Individual Approval** – Students 18 years of age or older who are no longer in high school may be admitted by Individual Approval. Testing in basic skills and an advisor visit may be required. More information is available at each campus Admissions and Registrar Office.
4. **Specialized Admission Programs** – Students seeking admission to any specialized admission program must first be admitted to the College but may be required to submit additional specific documentation prior to consideration for admission by that program.

Determination of Residency

The state of Texas requires each student to be classified as a resident or nonresident of Texas (for tuition purposes) at the time of initial enrollment and after any break of enrollment for more than 12 months.

The student is responsible for registering under the proper residency classification. Any question concerning the right to classification as a resident of Texas or of Tarrant County should be clarified prior to enrollment at Tarrant County College.

Students needing additional information about residency determination should review Residency — TCC or contact a campus Admissions and Registrar Office. State requirements for residency may be found at My Texas Future: Adult & K12 Learner Resources for Schools & Careers or Texas Residency - Texas Higher Education Coordinating Board.

Appeal of Residency Determination

Students who have been classified as Out-of-County or Out-of-State may appeal that determination by first completing a new Residency Questionnaire and discussing their concerns with the campus Admissions and Registrar Office.

Reclassification of Residency Status

Students who have been classified as Out-of-County should request reclassification by the Admissions and Registrar Office if they establish residence in Tarrant County; proof of residence at a Tarrant County address (not a post office box) must be provided. Students who have been classified as Out-of-State should request reclassification by the campus Admissions and Registrar Office when their circumstances change in such a way as to meet state requirements. A Residency Questionnaire must be completed and submitted with the necessary documentation.

Bacterial Meningitis

The 82nd Texas Legislature approved Senate Bill 1107, which requires all new to TCC students under the age of 22 to submit evidence of being immunized against meningococcal meningitis. The meningitis vaccination (MCV4) requirement applies to:

- All first-time freshmen
- All new transfer students
- All returning TCC students who have experienced a break in TCC enrollment of at least one fall or spring term
- New and returning continuing education students enrolled in programs that require at least 360 contact hours for completion

A Meningitis Vaccination (MV) record administered within the five-year period immediately preceding and at least 10 days prior to the first semester enrolled or re-enrolled must be faxed, mailed, submitted through the current student portal, or submitted to the campus Admissions and Registrar Office. Acceptable documentation includes:

- Certification from a physician or clinic that the student has been vaccinated during the specified period.
- An immunization record from a state or local health authority or an official record received from school officials.
- A completed, signed, and dated copy of TCC's Bacterial Meningitis Vaccination Verification Form.

The following students are not required to submit an MV:

- Students who are 22 years of age or older
- Students taking only Distance Learning courses
- Continuing education students enrolled in a course or program that requires less than 360 contact hours for completion or in corporate training
- Students enrolled in a dual credit course taught at a public or private K-12 facility not located on a TCC campus
- Students with a signed affidavit or certificate from a physician that states the vaccination would be injurious to the health of the student
- Students who sign an affidavit stating that the student declines the MV for reasons of conscience, including a religious belief (valid for two years)
- TCC students incarcerated in a Texas prison

More information is available online at Texas Education Code Sec. 51.9192.

Continuing Students

Students who were enrolled at any TCC campus at any time during the last calendar year are eligible to register for the next future term UNLESS:

- they have an outstanding debt to TCC; or
- they have been placed on academic suspension/dismissal; or
- they have not yet complied with the state's law regarding meningitis vaccination; or
- they have been notified by the College about additional requirements or conditions.

Students returning to TCC after an absence of more than one year will be prompted to update demographic and academic information via a Reactivation Link in the current student portal prior to registration for classes and should contact the campus Admissions and Registrar Office or District Admissions and Records Office if they have lived outside Texas and/or out of Tarrant County since last enrolled. Students whose residency status has changed are responsible for additional tuition charges.

Admission to TCC

International Admissions

Non-Citizens with (or Seeking) a Visa

Non-U.S. citizen applicants holding any temporary visa category issued by the United States Citizenship and Immigration Services (USCIS) other than an F1 visa should file a regular application for admission. Some of these individuals may be eligible to pay in-state tuition per the Texas Higher Educational Coordinating Board.

Those interested in studying at TCC under the F-1 student visa program should complete the following steps:

1. Complete the International Student Application (start with the online ApplyTCC application, then contact the International Student Admissions and Compliance Office).
2. Provide transcripts: First-time college applicants must submit proof of completion of a United States (U.S.) high school diploma or equivalent if this education was completed outside of the United States. Transfer students must submit official transcripts from any U.S. institution they previously attended. For any type of non-U.S. high school credential, TCC accepts evaluations completed by an accepted agency. A list of acceptable evaluation services is available on request from the International Student Admissions and Compliance Office. An overall grade point average of at least 2.0 is required for students transferring from a college or university within the United States.
3. Applicants must demonstrate English language proficiency, either through completed US college coursework or by testing. Two tests are accepted:
    - Test of English as a Foreign Language (TOEFL) - A score of 71 or better is required.
    - International English Language Testing System (IELTS) - An overall band score of 5.5 or better is required.
4. Provide an original financial statement documenting adequate funds to cover expenses plus a bank endorsement of the availability of such funds. Amounts, instructions, and a form are provided by International Student Admissions and Compliance. Financial information must be current. All financial documents must be no more than six months old.
5. Provide a copy of current passport.

An F-1 visa student must maintain full-time status each fall and spring term. A student enrolled for 12 or more hours of 16-week courses during the fall or spring term is considered a full-time student. F1 students can utilize only one online class toward full-time status. F1 students who start in a summer term must maintain full-time status for the starting term as well as each fall and spring term thereafter.

Non-Citizens without a Visa

Non-U.S. citizens seeking TCC admission who do not hold a valid visa of any category are not required to meet international admission requirements.

1. Documented Immigrants - Permanent Residents and others with legal status to live, work and/or study in the U.S. must provide their card or proof of final approval for their status.
2. Undocumented Immigrants - Immigrants who do not have an I-551/I-151 or other USCIS approval may be eligible for enrollment on the same basis as documented students. More information is available at the campus Admissions and Registrar Office.

Admission to TCC

Right to an Academic Fresh Start

Under the provisions of the Texas Education Code, Section 51.931, a Texas resident applying for admission/reactivation to the College is entitled to have all TCC academic coursework that was earned 10 or more years prior to the requested enrollment date ignored for enrollment purposes and GPA computation. The applicant must complete the Right to an Academic Fresh Start Declaration Form with the campus Admissions and Registrar Office or the District Admissions and District Admissions and Records Office prior to registration, confirming the decision to enroll under the Academic Fresh Start statute.

Admission to TCC

Selective Admission Programs

Program costs and/or availability of facilities make it necessary for some programs to require specialized admission procedures in addition to those outlined above for general enrollment at the College. These procedures are designed to ensure fairness to each applicant in a limited enrollment program. Criteria for admission to these programs are listed with the respective program curricula.

- AAS.Anesthesia Technology
- AAS.Aviation Maintenance Technology Airframe
- CRT.Aviation Maintenance Technology Airframe
- AAS.Aviation Maintenance Technology Powerplant
- CRT.Aviation Maintenance Technology Powerplant
- CRT.Basic Firefighter Certification
- CRT.Basic Peace Officer Certification
- CRT.Central Sterile Processing
- CRT.Commercial Pilot
- CAT.Computed Tomography Advanced
- AAS.Dental Hygiene
- AAS.Diagnostic Medical Sonography
- AAS.Nutrition and Dietetics
- CRT.Dietary Manager
- AAS.Emergency Medical Services
- CRT.Emergency Medical Technician
- AAS.Health Information Technology
- CAT.Magnetic Resonance Imaging Technology Advanced
- CRT.Medical Assistant
- AAS.Nuclear Medicine Technology
- AAS.Nursing
- CRT.Paramedic Program
- AAS.Physical Therapist Assistant
- AAS.Professional Pilot
- AAS.Radiologic Technology
- CRT.Registered Dental Assistant
- AAS.Respiratory Care
- AAS.Sign Language Interpreting
- AAS.Surgical Technology
- CAT.Vascular Interventional Radiography
- CRT.Vocational Nursing

Admission to TCC

Transcript Requirements

Each transfer applicant should arrange for an official transcript to be sent to TCC from each accredited institution previously attended for credit coursework. Transcripts should be submitted prior to initial enrollment or as soon as possible during the first TCC term.

Credit for courses in which a passing grade has been earned may be transferred to Tarrant County College from colleges and universities accredited through one of the comprehensive accrediting associations. Elective credit may be awarded if TCC does not have an equivalent course in content or credit hours. The transcripts of degree-seeking TCC students will be automatically evaluated, usually within 2-4 weeks after submission of all transcripts.

Students who have attended an international college or university are not required to have their coursework evaluated. Credit for foreign coursework is very limited. Students are encouraged to discuss their goals with an advisor before paying for a foreign coursework evaluation.

Students concurrently attending TCC and any other college or university should submit an updated transcript from that institution at the end of each term of concurrent enrollment. In addition, all official transcripts must be on file before students may qualify for most financial aid programs, veterans' educational benefits, and other College services such as transcript evaluation and degree planning. Transcripts and other academic credentials provided to TCC will not be returned to the student.

Students who have gained proficiency through completion of coursework at a non-accredited institution or through other educational experiences should review options available through Prior Learning Assessment.

Registration

Current students who have completed admissions and onboarding requirements are eligible to register for classes. Registration services are available online and in-person. Registration assistance is provided on each campus through the Admissions and Registrar Office and the Student Success and Advising Centers.

MyTCCTrack is the online self-service student portal for accessing most student services. These online student services include options for students to view, plan, and register for classes.

Priority Registration

Priority registration is a week-long early registration period reserved for continuing TCC students.

Priority registration is offered for the Fall and Spring terms. Students enrolled in the Fall term are eligible for priority in the following Spring term; students enrolled in the Spring term are eligible for priority in the following Fall. Students who were not enrolled in the term immediately before the upcoming term are not eligible for priority registration.

A priority registration date and time is assigned to students, including parents of dependent children, based on the number of TCC hours a student has earned including developmental coursework and prior learning assessment credits. No priority registration is offered for the Summer term.

Registration opens for students who are not eligible for priority registration the Monday following the last day of priority registration. Registration for all sessions ends four days prior to the start of classes for that session.

Registration

Access to Online Services

Access to registration and all other online services is secured by each student's user ID and self-assigned Tarrant County College password. Registration and other services are available through the current student portal.

Registration

First-Time-in-College (FTIC) Students

First-Time-in-College (FTIC) students are students who have never attended a college or university. Students enrolled in a dual-credit program in high school and then graduated are still considered FTIC students when enrolled full-time at TCC. Admission steps for FTIC students are found on the TCC website.

Registration

Tuition Waivers and Exemptions

In addition to established financial aid programs, the state of Texas and Tarrant County College offer a number of opportunities that reduce or eliminate tuition.

Waivers allow certain students to pay the in-state (Texas resident) tuition rate even when their classification is non-resident or out-of-county Texas resident.

Exemptions cover all tuition and, in some cases, fees. The exemption will not cover the cost of digital materials. For most tuition exemptions, students must be eligible for Texas tuition rates. All exemption programs are authorized by the State of Texas, which also dictates their conditions. Most recipients are subject to the college's Satisfactory Academic Progress (SAP) requirement.

Students must submit required documentation to the Admissions and Registrar Office. Tuition must be paid by the established deadline if documentation or approval of an exemption or waiver is pending. Overpayments will be refunded only if documentation and approval are completed by the state-defined Official Day of Record unless otherwise noted. Students should contact the campus Admissions and Registrar Office for additional information. State exemption and waiver program information may be found at Texas Higher Education Coordinating Board - Exemptions and Waivers.

Registration

Auditing a Course

Students who have been admitted to the College may audit courses on a space-available basis. Audit registration may be requested only on the first day of any session, by contacting the appropriate campus Admissions and Registrar office. No college credit is awarded for audited courses. The cost for auditing courses is the same as registration for credit. Senior citizens (persons 65 years of age or older) may use the state-authorized tuition waiver to audit up to six credit hours of coursework in a term.

Audit students must meet the same prerequisites to enroll in a course as a credit student. However, they are not required to take examinations and no grades are assigned. Audit students are required to conform to the same conduct in the classroom and on campus as credit students.

Students already registered for credit may not change from credit to audit status during audit registration or at any time during the session. Students registered for audit may not change their enrollment to credit status during or following audit registration.

Texas Success Initiative (TSI)

Texas House Bill 286 created the Texas Success Initiative (TSI) to ensure that all new-to-college students are provided (1) assessment of their readiness for freshman-level academic coursework, (2) advisement and educational support necessary to assist students who are not ready to enroll in academic coursework, and (3) evaluation to determine when they are ready to enroll in college-level coursework.

The TSI was updated effective January 11, 2021. The Texas Success Initiative Assessment 2.0 (TSIA2) was revised and takes the place of the prior TSI Assessment. The Reading and Writing sections were combined into one English Language Arts Reading (ELAR) section. The TSIA2 Mathematics section remained a standalone assessment.

TSIA2 measures mathematics, reading, and writing skills to determine a student's readiness to enroll in entry-level freshman courses. Students are required to test and to be advised based on the results of their TSIA2 scores. Students will not be denied admission to Tarrant County College (TCC) based on TSIA2 or other college placement scores. Testing must be completed prior to enrolling in classes.

The required TSIA2 test is administered at the TCC Testing Centers on each campus. Testing appointments may be required, and a fee may be assessed. Test scores are usually available immediately following testing. Career advisors will assist students with score interpretation.

Students must complete a pre-assessment activity (PAA) prior to taking the TSIA2 Test.

Students should contact the campus Testing Services for additional information.

Free TSIA2 workshops may be offered by the campus tutoring centers to review test topics and provide practice for students retaking sections of the TSI Assessment. Students are encouraged to attend a TSIA2 Workshop and to retest.

Texas Success Initiative (TSI)

Testing Requirements for Restricted Courses

All TSI-liable students will be required to submit appropriate test scores before enrolling in college-level Mathematics, English, and/or Reading and Writing restricted courses. Successful completion of prerequisite courses may substitute for placement test scores. Testing requirements for specific courses are outlined in the course descriptions.

Texas Success Initiative (TSI)

Texas Success Initiative (TSI) Requirements for Career and Technical Education (CTE) Programs

All students enrolled in an associate degree program, or a Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). However, since students are not required to have achieved college readiness in order to graduate from high school, students enrolled in certain Level 2 certificate programs and associate of applied science (AAS) programs may or may not have the option to choose either a college-level mathematics or science course to meet degree or certificate requirements. If a non-mathematics option is chosen by the student, TCC's faculty content experts may determine that a student does not need to attain the mathematics college-readiness designation. The minimum levels of readiness are demonstrated through successful completion of those lower level or program-specific career-technical education courses.

More information about TSI requirements is available in the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Texas Success Initiative (TSI)

TSI Waivers and Exemptions

All students taking college-level courses must satisfy Texas Success Initiative Assessment 2.0 (TSIA2) requirements unless they qualify for a TSI waiver or exemption.

TSI Waivers and Exemptions apply only to TSIA2 requirements. Official documentation of eligibility for an exemption or waiver is required. Students should contact the campus Admissions and Registrar Office for additional information about TSIA2 requirements and restrictions, and to determine the specific documentation required.

Students who qualify for a TSI exemption are not required to test for TSI purposes and may not enroll in developmental coursework and/or interventions in the corresponding area of exemption and do not need to develop and follow an Academic Success Plan. All prerequisites for enrollment in specific courses must be met.

Waivers:

1. **Certificate Waiver** – Students pursuing a one-year certificate of completion of no more than 42 semester hours are exempt from all parts of TSIA2 testing and may enroll in any course required for that certificate. There may be courses in the certificate program that require placement testing.
2. **Casual Student Waiver** – Students who are not seeking a degree or certificate from a Texas public institution of higher education may qualify; enrollment may be restricted.
3. **English Language Learners Waiver** – Students who are not native speakers of English may request a waiver from TSIA2 testing to develop their academic English skills. Students will take an English Placement test instead to determine correct placement in ESOL courses. Students using this waiver will be required to take the TSIA2 after they attempt 15 credit hours of ESOL.
4. A student who has successfully completed college preparatory courses is eligible to receive a waiver for a period of 24 months from the date of high school graduation. Successful completion of College Prep English/Language Arts allows for a waiver for Reading and Writing. Successful completion of College Prep Math allows for a waiver for Math.

All TSI waivers must be renewed each term, and all course prerequisites must be met.

Exemptions:

- **Score Exempt** – Students who achieved certain scores on the ACT, SAT, GED, HiSET, or STAAR EOC test may be fully or partially exempt.
- **Degree Exempt** – Students who have earned an associate or higher degree from a regionally accredited post-secondary institution or from a recognized international institution.
- **Military Exempt** – Students serving on active duty as a member of the armed forces of the United States, the Texas National Guard, or serving as a member of a reserve component of the armed forces of the United States.
- **Veteran Exempt** – Students who were honorably discharged, retired, or released from active duty as a member of the armed forces of the United States, the Texas National Guard, or serving as a member of a reserve component of the armed forces of the United States on or after August 1, 1990.
- **Course Exempt** – Students who have completed a restricted course from a regionally accredited college or university earning a grade of "C" or higher are exempt in the curricular area of that course.
- **Texas College Bridge (TCB) Exempt** – successful completion of the TCB course provides a TSI exemption in that content area effective for 24 months following the student's high school graduation (Texas Education Code 51.338).
- **Public Safety Officer and Employee Exempt** - Beginning Fall 2025, TSI exemptions are granted to certain Emergency Medical Services (EMS), fire personnel, and peace officers. Students should submit an employment letter to verify they qualify. Qualifications are listed below.
  EMS exemptions apply to students who are employed as Emergency Medical Services personnel and work for a political subdivision in Texas, including:
    - Emergency care attendants
    - Emergency medical technicians
    - Advanced emergency medical technicians
    - Emergency medical technicians-paramedics
    - Licensed paramedics

    Political subdivisions of Texas are county governments and other units of local government who provide basic services, including education, public safety, ambulances, water and electric utilities, and public transit. Employees of private companies are not eligible.

  Fire protection exemptions apply to students who are permanent, full-time employees of a local government who are designated as:
    - Fire and arson investigators
    - Aircraft rescue and fire protection personnel
    - Full-time fire department employees engaged in fire suppression, inspection, investigation, marine firefighting, or aircraft rescue and firefighting
    - Personnel involved in fire training, education, administration, or other duties related to fire prevention and suppression
      Fire department employees in administrative or clerical support roles, part time positions, and volunteer positions are not eligible.

  Peace Officer exemptions apply to students who are elected, appointed, or employed to serve as peace officers, including:
    - Sheriffs
    - Deputies
    - Constables
    - Municipal police officers

Peace officers must hold a permanent peace officer license. Private investigators and private security officers are not eligible.

- **Private or Out-of-State Transfer** – Students who transfer from a regionally accredited college or university and have earned a grade of "C" or higher in specific courses are exempt in the related TSI component. An official transcript must be submitted.

To be considered exempt for TSI Math, the student must have completed the equivalent to one of these courses with a grade of C or better:

MATH 1314 - College Algebra
MATH 1316 - Plane Trigonometry
MATH 1324 - Mathematics for Business and Social Sciences

MATH 1325 - Calculus for Business and Social Sciences
MATH 1350 - Mathematics for Teachers I
MATH 1351 - Mathematics for Teachers II
MATH 2305 - Discrete Mathematics
MATH 2318 - Linear Algebra
MATH 2320 - Differential Equations
MATH 2412 - Pre-Calculus Math
MATH 2413 - Calculus I
MATH 2414 - Calculus II
MATH 2415 - Calculus III

To be considered exempt on the Non-Algebraic Pathway for TSI Math, the student must have completed the equivalent to one of these courses with a grade of "C" or better:

MATH 1332 - Contemporary Mathematics (Quantitative Reasoning)
MATH 1342 - Elementary Statistical Methods

To be considered exempt for TSI English Language Arts and Reading (ELAR; also known as Integrated Reading and Writing), the student must have completed the equivalent to one of these courses with a grade of C or better:

ENGL 1301 - Composition I
ENGL 1302 - Composition II
ENGL 2322 - British Literature I
ENGL 2323 - British Literature II
ENGL 2327 - American Literature I
ENGL 2328 - American Literature II
ENGL 2332 - World Literature I
ENGL 2333 - World Literature II
GOVT 2305 - Federal Government (Federal Constitution & Topics)
GOVT 2306 - Texas Government (Texas Constitution & Topics)
HIST 1301 - United States History I
HIST 1302 - United States History II
PHIL 1301 - Introduction to Philosophy
PSYC 2301 - General Psychology
SOCI 1301 - Introduction to Sociology

Exemptions are permanent and do not need to be renewed each semester.

Texas Success Initiative (TSI)

Developmental Studies

Tarrant County College (TCC) considers the provision of a comprehensive program of developmental studies to be an integral part of its mission. Mandatory placement testing in the basic skills of mathematics, writing, and reading identifies students who are performing below college level. A range of options in each of the areas allows students to address and correct their deficiencies.

Students who score below specified levels of the TSIA2 will be required to enroll in developmental studies until they complete their program's required credit course or they achieve TSIA2 complete status via coursework or passing a TSIA2 retest in the same skill area.

A First-Time-in-College (FTIC) student assessed as needing additional help in any developmental skill area is required to be continuously enrolled in at least one required developmental program course or non-course based option until all program requirements are complete.

All students must have an Academic Success Plan by the end of their first term. More information about the Academic Success Plan is available at the campus Student Success and Advising Centers.

TCC students in developmental studies must register for a course or a non-course based option co-requisite course. A non-course based option (NCBO) is an educational intervention that uses learning approaches to prepare the student for college-level work. A co-requisite course refers to a developmental course paired with a credit transfer course.

The co-requisite model is an instructional strategy whereby a student is enrolled simultaneously in a developmental education course and/or intervention and a gateway course within the same semester. This allows a student sooner entry into and completion of their credit course requirements. The developmental component of the co-requisite provides support for the successful completion of the college-level credit course.

Developmental courses and NCBOs do not transfer as college credit to other colleges and universities, do not count as credit toward graduation requirements, and are not included in the calculation of the grade point average.

Students achieve TSI met status with successful completion in the college-level credit course and in developmental courses and NCBOs.

The following are non-course based options (NCBO):

- INRW 0114 Non-course Based Reading/Writing
- MATH 0132 - Coreq Contemporary Math
- MATH 0142 - Coreq Elementary Statistics
- MATH 0214 - Coreq College Algebra
- MATH 0224 - Coreq Math Business/Social Sciences

Placement in developmental courses is based on TSIA2 scores and, in some instances, on scores on other departmental tests. Additional information about state mandates is available at any campus Student Success and Advising Center.

The following courses are developmental:

- ESOL 0301 ESOL Oral Communication 1
- ESOL 0302 ESOL Oral Communication 2 f
- ESOL 0303 ESOL Oral Communication 3
- ESOL 0304 Grammar for Non-native Speakers 1
- ESOL 0305 Grammar for Non-native Speakers 2
- ESOL 0306 Grammar for Non-native Speakers 3
- ESOL 0307 ESOL Reading and Vocabulary 1
- ESOL 0308 ESOL Reading and Vocabulary 2
- ESOL 0309 ESOL Reading and Vocabulary 3
- ESOL 0310 Writing for Non-native Speakers 1
- ESOL 0311 Writing for Non-native Speakers 2
- ESOL 0312 Writing for Non-native Speakers 3
- INRW 0399 - Integrated Reading and Writing II
- STSC 0111 - Transition to College Success

Developmental Studies and corequisite models do not apply to Dual Enrollment (Dual Credit and ECHS/PTECH CCRSM Schools). Refer to the Dual Credit webpage.

Students achieve TSI met status with successful completion in the college-level credit course and in developmental courses and NCBOs.

Adult Education Courses

Adult education courses (MATH 0190 and INRW 0090) are designed for students who are assessed and need additional review or foundational material to increase success in developmental or college-level courses. Courses will follow the attendance policies and curricula are aligned with developmental education courses. Successful completion of an adult education course allows students to enroll in credit courses via co-requisite sections as described in the TSIA placement chart.

This is an Adult Education course and cannot be used to fulfill degree requirements or to qualify for federal aid, including VA educational benefits.

Texas Success Initiative (TSI)

Attendance in Developmental Courses

Students taking developmental Mathematics and/or Integrated Reading and Writing courses are required to attend class and to keep up with course assignments. Since attendance and participation are essential to student success, the following guidelines apply:

- A student in an on-campus course who misses 15 percent of the class meetings and is not successfully performing in the course may be withdrawn at the discretion of the instructor.

Texas Success Initiative (TSI)

English for Speakers of Other Languages (ESOL)

ESOL waivers apply to English Language Learners requesting to waive their Texas Success Initiative Assessment 2.0 (TSIA2). Students that apply for this waiver must be in agreement with the following guidelines set by the Texas Higher Education Coordinating Board (THECB).

1. Student is a non-native speaker of English who wishes to remediate before taking the TSIA2;
2. Student understands that he/she can take ESOL courses only while remediating; if a student elects to take the TSIA2 for mathematics and passes, he/she may enroll in math courses for which he/she is eligible;
3. Student understands that he/she must take the TSIA2 before he/she completes the 15th hour of ESOL developmental education;
4. Student will need to take the placement test in order to register for the correct level of ESOL.

For additional information regarding ESOL refer to the TCC website.

Texas Success Initiative (TSI)

Student Transition to College Success Course

Tarrant County College is committed to supporting students in meeting their educational goals by requiring a learning skills course (STSC0111 Transition to College Success) for students who are TSI-liable in at least one content area.

Transition to College Success is a non-degree credit, one-hour course. It is intended to be taken during a student's first term in college. TSI-liable students who do not register for STSC0111 Transition to College Success in their first term will have a hold placed on their registration for future terms.

Texas Success Initiative (TSI)

TSI Assessment 2.0 (TSIA2) Completion Requirements

A status of TSIA2 Compliant or Exempt in Mathematics and Integrated Reading/Writing is required to receive most degrees and some certificates of completion. To achieve this status, a non-exempt student must meet one of the following requirements for each skill area:

Mathematics

- Meet the TSIA2 with a College Readiness Classification (CRC) score of "950-990" **or**
- Meet the TSIA2 with a CRC score of "910-949" and a diagnostic level of "6" **or**
- Earn a grade of "C" or higher in one of the following entry-level college Math courses:

	11733 - Missing course	MATH1324 Math Business/Social Sciences	MATH1332 Contemporary Math - Quant Reas	MATH1342 Elementary Statistical Methods

- Students who are TSI met needing to take MATH 2412 (Pre-Calculus) or higher must have the required pre-requisite completed with a "C" or better or may choose to take the ALEKS PPL math placement exam. Contact assigned Career Advisor to discuss ALEKS PPL option and receive ALEKS PPL test referral. Only TSI Math Met students are eligible to take the ALEKS PPL exam.
- Students with a professionally diagnosed mathematics disability may contact Student Accessibility Resources on campus to discuss alternatives available for completion of the mathematics requirement.

Integrated Reading/Writing

- Meet the TSIA2 with a CRC score of "945-990" and an essay score of "5-8" **or**
- Meet the TSIA2 with a CRC score of "910-944" and diagnostic level of "5-6" and an essay score of "5-8" **or**
- Earn a grade of "C" or higher in one of the following courses:

	ENGL1301 Composition I	PSYC2301 General Psychology	SOCI1301 Introduction to Sociology

English for Speakers of Other Languages (ESOL)

- Meet the TSIA2 with a CRC score of "945-990" and an essay score of "5-8" **or**
- Meet the TSIA2 with a CRC score of "910-944" and diagnostic level score of "5-6" and an essay score of "5-8"

In addition, to the requirements above:

1. Students who passed a state-approved assessment test in any skill area and were enrolled in a regionally accredited college or university prior to August 26, 2013, are TSIA2 complete in the corresponding area.
2. Students transferring from a regionally accredited college or university who have completed one or more of the above-designated courses with a grade of "C" or higher will be considered TSI-satisfied in that curricular area. An official transcript from the transfer institution is required.
3. Students who earn a successful score in the NCBO co-requisite course and fail the college-level course do not obtain a TSIA Met status. They must repeat the course or obtain a college-ready score on the TSIA2.
4. Students whose previous Texas public college or university determined that they have met Minimum Passing Standards in Reading, Writing, and/or Math are met in the curricular area(s) indicated but must develop and pursue an Academic Success Plan in any remaining area(s).

Texas Success Initiative (TSI)

TSIA2 Placement Score Charts

Refer to the TSIA2 placement charts to see the TSIA2 College Readiness Classification CRC) placement scores.

For more information, students should consult the campus Student Success and Advising Center.

English Language Learners (ELLs) who need more time to refine their academic English skills may use the TSI Waiver. It limits students to ESOL and no other credit courses.

- Will be required to take the TSIA before they complete the 15th hour of ESOL.
- May take the Michigan English Placement Test (MEPT) to assess appropriate ESOL placement.
- TSI Waiver temporarily exempts students from TSI, Student Success course, and New Trailblazer Orientation.

Note: Dual enrollment students cannot participate in Developmental Studies, including co-requisite course models.

Contact the English Language Learning Program on your campus for more information.

Dual enrollment students cannot participate in Developmental Studies, including co-requisite course models.

Tuition and Fees

The Business Services office on each campus handles all payments for tuition, prior term balances, and miscellaneous fees and fines. Courses not paid by the payment due date will be dropped. Review options for payment.

Specific tuition and fee information, by degree and certificate, is available. Course learning materials may vary.

Students are responsible for declaring proper residency status through the Admissions and Registrar Office.

Tuition and Fees

Tuition Categories

The state of Texas has established legal guidelines to determine whether students are Legal Residents for Tuition Purposes. Residency status is determined at the time of application for admission to the College and can be updated when students meet and document a change of status. Assistance regarding residency classification is available at each campus Admissions and Registrar office. For additional information on rules and regulations determining residence status go to the Texas Higher Education Coordinating Board website.

Each student is assigned to one of three tuition categories:

- Legal resident of Tarrant County status is assigned to those who have lived in Texas under circumstances specified in Rules and Regulations, and who are residents of Tarrant County.
- Legal resident of another Texas County status is assigned to those who qualify for In-State status, but who do not reside in Tarrant County.
- Legal resident of other state/non-resident status is assigned to those who do not qualify for In-State status.

Tuition and Fees

Tuition

All tuition is subject to change without notice. Registration is not complete until payment has been made in full, third-party sponsorship is submitted, or a payment plan has been completed. Until all financial obligations to the College have been satisfied, students may not re-register or receive official transcripts or diplomas.

Effective for the **Spring 2024 through Fall 2024 terms**, undergraduate tuition rates at Tarrant County College will be as follows:

Residency Status for Tuition Purposes	**Per Semester Hour**
Legal resident of Tarrant County for tuition purposes	$69
Legal resident of any other Texas county for tuition purposes	$131
Legal resident of another state for tuition purposes	$310
Non-resident alien for tuition purposes	$310
Additional tuition charges for courses attempted three or more times (Third Attempt Rule effective starting Fall 2013)	$60

Effective for the **Spring 2025 term registrations**, undergraduate tuition rates at Tarrant County College will be as follows:

Residency Status for Tuition Purposes	**Per Semester Hour**
Legal resident of Tarrant County for tuition purposes	$74
Legal resident of any other Texas county for tuition purposes	$136
Legal resident of another state for tuition purposes	$315
Non-resident alien for tuition purposes	$315
Additional tuition charges for courses attempted three or more times (Third Attempt Rule effective starting Fall 2013)	$60

Tuition and Fees

Other TCC Charges/Fees*

In addition to tuition, students enrolled at TCC may be required to pay one or more of the following charges as applicable:

Academics	Charge
Course audit	Tuition rate
Other program charges/certifications	As assessed
Special program fees/deposits	As assessed
Special program background checks/drug screenings	As assessed
Special trips (field trips/national or international)	As assessed
TCC Plus (Digital Materials)/textbook rentals	As assessed
Identification (ID) and Permits	**Fees**
Parking permit	$0
Replacement parking permit	$5
Replacement Student ID (EasyRide pass)	$10
Fines and Fees	**Fees**
Copy Center fee	As assessed
Library fines	As assessed
Online outbound eTranscript request Online outbound Print and Mail Transcript request	$2.10 $4.60
Overnight outbound transcript request	$25 - $30
Parking fines	As assessed
Payment plan enrollment fee	$25
Replacement diplomas	$20
Returned payments (checks, ACH, debit/credit card transactions)	$25
Short-term loan fee	As assessed
Testing	**Fees**
TSI Assessment test	$29
TSI Assessment retest fee	$10 per section; $29 for all sections
Other testing	As assessed
Prior Learning Assessment (PLA)	$25 per course
***All charges are subject to change at any given time.**	

Continuing Education courses (CE): Refer to the Continuing Education Catalog for specific tuition information. Tuition for CE courses will be based on anticipated costs.

Tuition and Fees

Bookstore Charges

Bookstore Charges/Purchases Using Bookstore Credit Balance

Students with Anticipated Financial Aid are allowed to make purchases for books, supplies, and other educationally related goods at the TCC bookstore using their Bookstore Credit Balance during the Bookstore Credit Timeframe(s). Allowed purchases include course books/materials (excluding TCC Plus), required uniforms, school/course supplies, backpacks and electronics.

The Bookstore Credit Balance is based on Anticipated Financial Aid minus the term balance. Anticipated Financial Aid is defined as the amount of eligibility, based on the initial financial aid offer, enrollment intensity (actual number of hours), and the start date of each class. For classes that start after the first day of the term, this will appear 10 days before the class start date.

Students using the Bookstore Credit Balance for books, supplies, and other educationally related goods, are authorizing TCC to apply their financial aid disbursement towards the Bookstore Charges within their student account.

Any refunds for Bookstore Charges/Purchases using the Bookstore Credit Balance will be credited to the student's account, in accordance with the bookstore's refund policy, within 24-48 business hours. If this creates a refund balance on their account, the refund will follow the College's normal refund schedule.

The conditions concerning the Bookstore Charges/Purchases Using Bookstore Credit Balance can be found on the TCC website.

Tuition and Fees

Student Account Center

The Student Account Center is a student financial system designed to help students better manage their student account activity. Some of the features include payments by Automated Clearing House (ACH) or debit/credit card, payment plan enrollments, storing payment methods, or assigning authorized users. Students may access the Student Account Center by logging into their student account through MyTCCTrack and selecting the Student Account Center/Pay Now Helpful link. Please refer to the TCC website for the most updated information.

Tuition and Fees

Payment Methods

For the convenience of the student, several payment methods are available:

1. In person at a campus Business Services Office:

1. Cash
2. Major credit/debit cards: A photo id card is required for credit/debit card payments processed. Cardholder must be present.
3. Check: A driver's license is required for check payments. TCC will not accept checks as a form of payment for prior term balances or as a method of payment for previously returned items.
4. Third-Party Sponsors: If tuition is to be paid by an agency or company, a voucher from the agency or company must be submitted to the Business Services office in accordance with the payment deadline indicated below. By submitting a voucher, the third-party sponsor agrees to pay all tuition. This includes any non-refundable tuition. If a third-party sponsor has not paid the student's tuition, per the voucher, by the end of the next term/quarter, the unpaid tuition will be moved to the student's account. The student will be responsible for the unpaid balance, which may be sent to a third-party collection agency.
5. Texas Higher Education Coordinating Board Prepaid Tuition Programs: Required documentation for these programs should be submitted to the campus Business Services office in accordance with the payment deadline indicated below.

2. Online through the Student Account Center:

1. Major credit/debit cards
2. Automated Clearing House (ACH) or Electronic Check
3. Payment Plan: All payment plan options are in line with the provisions of Section 54.0007 of the Texas Education Code.
    1. Students can view and enroll by logging into MyTCCTrack and selecting Student Account Center.
    2. A $25 non-refundable enrollment fee is charged per plan for each term/quarter.
    3. A $25 Returned Item fee will be assessed per instance.

** Payment methods may be restricted due to Returned Payments, delinquent payment plans, or outstanding balances.*

Per Texas Education Code 54.007(2)(d): A STUDENT WHO FAILS TO MAKE FULL PAYMENT OF TUITION AND MANDATORY FEES, INCLUDING ANY INCIDENTAL FEES, BY THE DUE DATE, MAY BE PROHIBITED FROM REGISTERING FOR CLASSES UNTIL FULL PAYMENT IS MADE. A STUDENT WHO FAILS TO MAKE FULL PAYMENT PRIOR TO THE END OF THE SEMESTER OR TERM MAY BE DENIED CREDIT FOR THE WORK DONE THAT SEMESTER OR TERM. It is the student's responsibility to be aware of the tuition payment schedule for each term. The following table illustrates the Undergraduate tuition payment schedule by term. Payment schedules are subject to change. For the latest information, please visit the TCC website.

Courses with an earlier start date than the 16-week Fall/Spring term or the 1st 5-week session of the Summer term may have an earlier payment deadline than listed above. Financial Aid students are responsible for the payment of Maymester and Wintermester tuition. Reimbursement will come at a later date depending on financial aid eligibility.

Failure to pay tuition or to make payment arrangements by the deadline may result in students being dropped from their courses. Students should not assume that a course will be automatically dropped for nonpayment. Students are responsible for dropping any course they do not wish to be enrolled in.

Returned Payments

A Returned Payment (Chargeback) is the result of a dishonored or disputed check, ACH, or credit/debit card transaction. Returned Payments must be paid within 10 days of the return notification. Students will be notified by TCC email and/or US mail. If the Returned Payment balance and $25 Returned Payment fee are not paid within 10 days or by the current term census date (whichever comes first), the student **may** be dropped from all current term courses and blocked from future registrations. **Returned Payments may result in restrictions on payments by check, ACH, and credit/debit card, as well as loss of payment plan privileges.**

NOTICE: DELINQUENT INSTALLMENT CONTRACTS, UNPAID RETURNED PAYMENTS, OUTSTANDING MISCELLANEOUS CHARGES, AND FINANCIAL AID ADJUSTMENTS WILL BE SENT TO A THIRD-PARTY AGENCY FOR COLLECTION. THE STUDENT MAY BE RESPONSIBLE FOR ANY COLLECTION AGENCY FEES INCURRED FROM THE ADDITIONAL COLLECTION EFFORTS. A student who fails to make full payment prior to the end of the semester or term/quarter will be prohibited from registering for future classes until full payment is made. Failure to make full payment prior to the end of the term/quarter may result in transcript denial.

Formal Means of Communication

TCC Business Services will send notices to the student's myTCC email as the formal means of communication.

Tuition and Fees

Refund Policy

Students officially dropping and/or withdrawing, or dropped at the discretion of the instructor, during a regular 16-week session are eligible for a refund of tuition according to the following schedule.

Prior to the first calendar class day*	100%
During the first 15 calendar class days*	70%
During the 16th through 20th calendar class days*	25%
After the 20th calendar class day*	None

** For courses that meet on what the college considers a regular schedule, class days refer to the number of calendar days the institution normally meets for classes, not the days a particular course meets.*
*(**Example**: Term session is 1/16 – 5/10 and classes meet Tues/Thurs, beginning 1/17. The first "class day" is 1/16.)*

Students officially dropping and/or withdrawing, or dropped at the discretion of the instructor, from a regular five-week summer session are eligible for a refund of tuition and fees according to the following schedule.

Prior to the first calendar class day*	100%
During the first five calendar class days*	70%
During the sixth calendar class day*	25%
After the sixth calendar class day*	None

** For courses that meet on what the college considers a regular schedule, class days refer to the number of calendar days the institution normally meets for classes, not the days a particular course meets.*
*(**Example**: Term session is 1/16 – 5/10 and classes meet Tues/Thurs, beginning 1/17. The first "class day" is 1/16.)*

PLEASE NOTE

For non-regular semester-length courses, students should contact the campus Business Services office for refund schedules.

The following table illustrates how refunds would be determined for non-regular length courses.

Length of Class – Term in Weeks	Last day for 70% refund	Last day for 25% refund
2 or less	2	n/a
3	3	4
4	4	5
5	5	6
6	5	7
7	7	9
8	8	10
9	9	11
10	9	12
11	10	14
12	12	15
13	13	16
14	13	17
15	14	19

Refund of tuition is subject to change by legislative and/or TCC Board of Trustees action without notice.

- Based on the Refund Schedule, credit balances are automatically reflected on the student's account upon withdrawal or course cancellation.
- Refunds will be made to the debit/credit card used for payment if the refund is processed within 180 days of the original date of payment.
- Refunds for cash, check, ACH, debit/credit after 180 days of the original payment, will be processed using the student's preferred refund method selected with the contracted third-party refunding company. Please refer to the Refund Selection section below for further information. Students ages 15 years and under, or 55 years or older, will receive a refund by check.
- A refund may take up to six weeks to process.
- IMPORTANT NOTE: Financial Aid students withdrawing before the 60 percent refund point in the term may be required to repay funds unearned due to requirements for the return of Title IV funds.
- Refunds are calculated/based on invoiced amounts, not payments made.
- STUDENTS WHO HAVE OPTED FOR THE INSTALLMENT PAYMENT PLAN AND ARE DROPPING CLASSES AND/OR WITHDRAWING ARE RESPONSIBLE FOR THE FULL PAYMENT OF THE PROMISSORY NOTE. **REFUNDS WILL BE APPLIED TO ANY BALANCE DUE ON THE NOTE.**
- Students must be cautioned that there will be at least a 30 percent penalty for partial and/or complete withdrawals after the session begins.
- Students may request a review of their refund eligibility through the end of the next long semester for which the refund is requested, as shown on the chart below. Students who meet the Tuition Refund Request Guidelines may complete and submit the Tuition Refund Request Form found on the TCC website.

Term Requesting:	Submit By:
Fall	End of Next Spring Term
Summer	End of Next Fall Term
Spring	End of Next Fall Term

Financial Aid Refunds

A financial aid refund is the credit balance issued to a student of any remaining amount after their term balance is fully funded.

Students can expect to receive financial aid refunds after the class census date, if they have attended their classes. Details on purchasing books, supplies, and other educationally related goods are included in the Bookstore Charges/ Purchases Using Bookstore Credit Balance section, and conditions for receiving financial aid refunds are located on the TCC website.

Refund Selection

Students between the ages of 16-54, who are eligible for financial aid or have registered for classes, will receive a refund selection kit from our contracted third-party refunding company. In addition to the refund selection kit, students will receive an email containing a personal code. Students are provided with instructions on choosing their preferred refund method for future financial aid or course refunds. If a refund selection kit is not received, visit the Refunds webpage for additional information.

Tuition and Fees

Financial Responsibility Agreement

The Financial Responsibility Agreement (FRA) provides relevant information about the College's official financial policies and what is considered the responsibility of the student. Students will be asked to acknowledge the document every 120 days of accessing the online system. Students are encouraged to read the document to stay informed on the College's policies concerning areas such as tuition payment, past due balances, third party collections, refunds, Telephone Consumer Protection Act (TCPA), Family Educational Rights and Privacy Act (FERPA), and dual credit. Students may access the Financial Responsibility Agreement found in MyTCCTrack at any time.

Tuition and Fees

Tuition Agreement

Dallas College Students: A reciprocal tuition agreement allows a Dallas County resident to pay the Tarrant County resident tuition rate provided the individual is enrolled in a degree program not offered at Dallas College.

Tuition and Fees

Lost and Found

Lost and Found is located at each campus Business Services office. A Districtwide retention schedule is followed for the disposal of unclaimed items.

Tuition and Fees

Notary Services

Business Services offices provide notary services. Notaries will follow Chapter 87 of the Texas Administrative Code.

Student Financial Aid Services

TCC awards more than $118.9 million each year in financial aid.

Student Financial Aid Services

Introduction

There are many financial aid programs for students taking credit courses at TCC, including grants, scholarships, college work-study, and loans. The application used to determine eligibility for most financial aid programs is the Free Application for Federal Student Aid (FAFSA).

FAFSA applications are normally available in October. Students are encouraged to apply for financial aid as soon as possible after the availability date since funds for programs are limited and application delays are sometimes incurred because of data verification regulations. A student may apply electronically at https://studentaid.gov.

A priority funding deadline of March 1 has been established for supplemental grant funding that is available. All required applications must be submitted at least three weeks prior to the beginning of a registration period for funds to be available prior to classes beginning. If this is not the case, the student must be prepared to pay with personal funds.

Student Financial Aid Services

General Eligibility Requirements

Students applying for federal and state funds must meet certain eligibility requirements. To receive aid, the following general eligibility requirements must be met:

- Enroll, or be accepted for enrollment, in an associate degree or eligible credit certificate program (at least three hours of enrollment for most programs).
    - Financial Aid is only available for classes that are required for your eligible active academic program.
    - Note: Summer transient students (university students attending TCC for the summer only) are not eligible for aid at TCC because they are not pursuing a degree or certificate from TCC.
- Maintain satisfactory academic progress (SAP), including at least a 2.0 cumulative GPA, completing 67 percent of courses, and completing the academic program within 150 percent of the published program length. Students should contact Student Financial Aid Services for a complete copy of the SAP.
- Be either a U.S. citizen or an eligible non-citizen.
- Do not owe a refund on a federal loan or be in default on a federal educational loan.
- Have a high school diploma or high school equivalency.
- Have a valid Social Security Number.
- Not be incarcerated in a federal or state prison unless enrolled in an approved Prison Education Program (PEP).
- For most programs, demonstrate need as determined by the FAFSA.

Student Financial Aid Services

Required Applications

In addition to meeting the general eligibility requirements, approximately 30 percent of applicants are selected for a review in a process called verification. Students selected for verification will be required to submit a 2024 or 2025 IRS Tax Return Transcript (including parents' form if applicable) and an institutional verification form (IVF).

Approximately one to two weeks after receiving the FAFSA results and any other required documents, Student Financial Aid Services will email students an award offer notice detailing their eligibility for aid. The award offer will include details on award types, award amounts, and disbursement procedures. Award recipients may view their awards online at MyTCCTrack Financial Aid.

Student Financial Aid Services

Student Financial Aid Services Notices

Financial aid eligibility will be re-evaluated when enrollment changes occur through the official date of record of the latest course to start in a term. Students who drop hours during this time may have to repay part of their aid. Students who withdraw from ALL classes prior to the 60 percent point of a session may have to repay funds to TCC and the federal government. In addition, any student who does not begin attendance in a class will become ineligible for financial aid for the class. Students should consult with Student Financial Aid Services prior to making a change in course load.

Students are advised that all Student Financial Aid Services' communications are sent to the student's myTCC email account. Email should be checked regularly for communications from Student Financial Aid Services.

Campus Student Financial Aid Services may also be consulted for information about scholarship programs.

Student Financial Aid Services

Stars of Tomorrow Program

The Tarrant County College "Stars of Tomorrow" Program provides financial awards that more than cover the cost of tuition at TCC for Tarrant County high school graduates who are in the top half of their class and whose families meet specified income thresholds. Students in public and private schools as well as those who are home-schooled and meet the program's criteria are eligible. Funding for the program is a "package" comprised of state and federal financial aid and income from the earnings of an endowment derived from the leasing of mineral rights and other private sources. Complete eligibility requirements and application instructions are available on the TCC website.

Student Financial Aid Services

Contact Information

More information on financial aid programs at TCC is available online on the TCC website, through email at financial.aid@tccd.edu, or from campus Student Financial Aid Services. In compliance with the Higher Education Amendments of 1976, student consumer information is available on request from Student Financial Aid Services.

Student Financial Aid Services

Veterans' Educational Benefits

All persons who will be using educational assistance from the Department of Veterans Affairs (VA) while enrolled at TCC should complete a VA Certification Request in the current student portal as soon as initial admission requirements are met. Questions regarding eligibility and certification of VA educational benefits should be directed to the Admissions and Registrar Office. The Admissions and Registrar Office can answer questions about these benefits; the District Admissions and Records Office will certify enrollment to the VA and monitor degree plans and academic progress. Veterans can apply for a determination of eligibility for VA educational programs by accessing the VA website. Veterans/spouses/dependents receiving veterans benefits are responsible for complying with VA regulations.

Certification of VA benefits will be processed when all required documents are provided. Most VA benefits are paid based on enrollment (full-time, three-quarter-time, or at least half-time). The VA and TCC consider 12 hours to be full time during the fall and spring 16-week sessions and four hours to be full time during each summer session. Veterans receiving Post 9/11 GI Bill (Chapter 33) benefits must be enrolled for at least 51 percent of what is considered full-time to receive a monthly housing allowance. Chapter 33 veterans enrolling in 100 percent distance learning classes will receive only 50 percent of the housing allowance.

Veterans must complete and submit a request form for VA benefits each term. Students physically unable to complete the form online may contact their Admissions and Registrar Office for assistance. The request serves as the veteran's authorization to submit an enrollment certification to the VA. Each TCC campus has a veterans center where staff can provide guidance on these benefits.

Archived Student Handbook

Click on the links below to view archived Student Handbooks. (*link will open as a PDF file in a new window*)

- 2025-2026 Student Handbook (Archived)

Academic Standing

Academic Standing

Academic standing is based on a student's Grade Point Average (GPA) and determines the student's eligibility for many benefits including whether the student may continue to be enrolled in the College. It is the student's responsibility to determine and understand their academic status (good, probation, suspension, or dismissal) by checking their standing.

Good Standing – A student is in Good Standing by maintaining a cumulative GPA of 2.0 or higher.

Academic Probation – A student who fails to maintain a cumulative GPA of 2.0 or higher is placed on Academic Probation. The student may continue to enroll while on probation as long as a 2.0 semester GPA is earned.

Academic Suspension I – A student on academic probation who becomes ineligible to re-enroll is suspended from the College for not less than one long semester (the next fall or spring semester, including summer). As an option, the student may request an Academic Recovery Plan that allows the student to re-enroll with no more than seven credit hours, frequent sessions with a Senior Career Advisor, and the development of an action plan. After a student has served the first suspension, the student may continue to re-enroll by maintaining a semester GPA of 2.0 or higher. A student returning following Suspension I must consult with a Senior Career Advisor and remain on Suspension I until their cumulative GPA reaches 2.0 or higher.

Academic Suspension II – A student who does not meet the required standard for a second time and incurs a second academic suspension will be suspended for a period of one long semester (the next fall or spring semester; cannot enroll in summer sessions). A student returning from Suspension II must consult with a Senior Career Advisor to obtain permission for readmission.

Conditions of re-admission may include special requirements or restrictions. After advising, the student may be readmitted and have records reactivated by the campus Admissions and Registrar Office but remains on Suspension II until their cumulative GPA improves to 2.0.

Academic Dismissal – A student readmitted after the second suspension must maintain a semester GPA of 2.0 or higher or be placed on academic dismissal. A student on academic dismissal must remain out of TCC for a minimum of one calendar year (12 months). At the end of the initial dismissal period, the student can petition for readmission. Conditions of readmission may include special requirements and/or restrictions.

A student returning from academic dismissal must a) schedule an appointment with the campus Vice President for Academic Affairs (VPAA) or VPAA's designee for readmission approval, b) consult with a Senior Career Advisor for the development of an Academic Recovery Plan, and c) visit the campus Admissions and Registrar Office for reactivation.

Transfer to TCC Following Suspension at Another College/University: A student who has been placed on academic suspension or dismissal by another college or university must meet the same criteria as TCC students. Depending on the circumstances of the suspension, the Senior Career Advisor, Admissions and Registrar Office, or Vice President for Academic Affairs or designee may require an interview and/or may direct the applicant for additional review through campus channels. Conditions of admission may include special requirements and/or restrictions.

Academic Standing

Attendance Policy

Regular and punctual class attendance is expected at Tarrant County College. Student absences will be recorded from the first day the class meets. In case of absence, the student is responsible for contacting the instructor.

Students absent on official College business are entitled to make up coursework missed. In all other cases, the instructor will determine whether the student will be permitted to make up work and will decide on the time and nature of the makeup. The student is responsible for any work missed regardless of the cause of the absence. The student must discuss such work with the instructor and should do so immediately on returning to school. Communication between the student and instructor is most important, and it is the student's responsibility to initiate such communication. Students forfeit the opportunity to make up assignments if they do not appear at the prearranged time or meet the prescribed deadline for makeup work.

Students who stop attending class for any reason should officially withdraw from the class through the current student portal. Failure to officially withdraw may result in a failing grade for the course.

Class attendance and participation are essential to student success. The following attendance guidelines apply:

- A student in an on-campus course missing a cumulative of 15 percent of the class meetings **and** not keeping up with the course assignments may be dropped **at the discretion of the instructor.**
- A student in an online course is required to successfully complete the online course orientation **and** actively participate in the course as described in the Instructor's Course Requirements (ICRs). A student not meeting these requirements may be dropped **at the discretion of the instructor.**

Refer to Attendance in Developmental Courses for additional information.

Academic Standing

Classification of Students

A student who has earned fewer than 30 semester hours of college credit is classified as a freshman. A student who has earned 30 or more semester hours of credit is classified as a sophomore.

Academic Standing

Course Credit (Semester Credit Hour)

The semester credit hour is the unit of credit at Tarrant County College and is generally defined as the amount of credit given for one classroom hour per week for a given term length. Courses requiring laboratory and many special-purpose courses may require additional contact hours per credit hour.

Academic Standing

Course Load

A student enrolled for 12 or more semester hours during the fall or spring term is considered a full-time student. Special sessions of less than term length comprise a proportionate share of full-time or part-time enrollment. Students enrolled in a special session should consult the campus Admissions and Registrar to determine how special sessions might affect their enrollment status.

The normal course load for the fall or spring semester shall be 15 semester hours. Course loads in excess of 18 semester hours or six academic courses shall require approval by the Vice President for Academic Affairs or VPAA's designee. The maximum course load shall be no more than 24 semester hours.

The normal course load for a summer session shall be six semester hours for each session (summer 1 or summer 2) or 12 semester hours for a full summer semester. The maximum course load for a summer session shall be seven semester hours for each session (summer 1 or summer 2) or 14 semester hours for a full summer semester.

A Maymester is considered part of the summer semester, and the maximum course load for a Maymester shall be three semester hours. Course loads in excess of seven semester hours per session or 14 semester hours per summer semester, excluding Maymester hours or 17 semester hours per summer semester including Maymester hours, shall require approval by the Vice President for Academic Affairs or the VPAA's designee.

The Wintermester is considered part of the spring term.

The College reserves the right to limit the course load of a student.

Students who are employed or who plan to seek employment are cautioned to carefully consider the amount of college work they attempt in relation to the number of hours they are employed each week. Consideration should also be given to the student and community activities in which they participate. Students who overload themselves in these areas are likely to have scholastic difficulties. A good rule to remember is two hours of preparation outside of class are necessary for each hour of class time.

Academic Standing

Deans' List

The Deans' List includes those students who have completed 12 or more college-level semester hours of work for the term with a grade point average of 3.5 or higher. The Honors List includes those students who have completed 12 or more college-level semester hours for the term and with a grade point average of 3.0 to 3.49. The Merit List includes students who have completed fewer than 12 college-level semester hours in each of two consecutive terms, whose enrollment totals no fewer than 18 hours for the two terms, and whose grade point average for the two terms is 3.5 or higher.

Academic Standing

Drops or Withdrawals

A student may withdraw from a course or from the College until the last day to drop as noted in the Academic Calendar. Courses dropped on/or before the Official Day of Record (census date) do not earn any grade and do not appear on the student's transcript. Courses dropped after the Official Day of Record will receive a grade of "W" and will appear on the student's transcript. A student whose first college enrollment occurred in Fall 2007 or later may not drop more than six courses during their cumulative enrollment at any Texas public college or university.

A student enrolled in special session courses (i.e. eight-week courses, late start courses, mini-terms, summer sessions, etc.) should be advised of the withdrawal deadline by the instructor or contact the campus Admissions and Registrar Office.

A student may withdraw from courses prior to the last day to drop through the current student portal, or by contacting the campus Admissions and Registrar Office in person during business hours. Withdrawing from classes may affect a student's Financial Aid status. A student who withdraws is responsible for verifying the drop processing was completed by viewing the unofficial transcript or student schedule. Until a student is officially withdrawn, the student remains on the class roll and may receive a grade of "F" for the course.

A student unable to withdraw in person or electronically may mail, email, or fax a letter to the campus Admissions and Registrar Office specifying the class or classes for which withdrawal is requested. The letter must include the student's name, ID number, date, and class information along with the student's signature. If mailed, the request for withdrawal must be postmarked on or before the last day to drop a class, or if faxed, the date shown on the fax confirmation must be on or before the last day to drop a class. Email requests must come from the student's TCC email account.

Academic Standing

Six Drop Limit Regulation

Section 51.907 of the Texas Education Code, enacted by the State of Texas, Spring 2007, applies to students who enroll in a Texas public institution of higher education as a first-time freshman in Fall 2007 or later.

The College may not permit a student to drop more than six courses, including those taken at another Texas public institution of higher education. All courses dropped after the Official Day of Record are included in the six-course limit unless (1) the student withdraws from all courses or (2) the drop is authorized by the Vice President of Student Affairs as an approved Drop Exception. The official day of record for an undergraduate regular term course is the 12th class day (census date). Refer to the Academic Calendar for all census dates, including other than regular terms.

Drop Exceptions can be approved by the Vice President of Student Affairs if the student documents one of the following:

1. The student, a member of the student's family, or a person of equally important relationship to the student experiences a serious illness or other debilitating condition;
2. The student becomes responsible for the care of a sick, injured, or needy person;
3. There is a death in the student's family or of a non-family member of equally important relationship;
4. The student or a member of the student's family, or a person of equally important relationship to the student, is called to active duty service as a member of the Texas National Guard or the Armed Forces of the United States;
5. There is a documented change of the student's work schedule that is beyond the student's control.
6. The course is dropped while the student is still in high school.

After a student drops a course, they may request a Drop Exception Request in the current student portal. Requests can be submitted no later than 30 days after the end of the term.

Enrollment and drop activities of students affected by this legislation will be monitored. Those who drop six or more courses without an approved Drop Exception will incur registration restrictions and will need to consult a career advisor before dropping future courses during all subsequent terms and may incur other enrollment limitations or requirements.

TCC students liable under this legislation who plan to attend another Texas public college or university should determine that institution's policies and penalties for dropping courses and for approving Drop Exceptions.

Academic Standing

Final Assessments

TCC publishes a schedule for final assessments each term. A student who must be absent from a final assessment activity should petition the faculty member to request permission and approval with final review by the Academic Dean to reschedule the assessment. A student absent without permission from a final assessment activity will be graded zero on the assessment.

Other assessments will be scheduled during the course of the term at the discretion of the instructor. Makeup of a test other than the final assessment will be at the discretion of the instructor if a student is absent on the day of the test.

Academic Standing

Grades and Grade Points

The grading system used at Tarrant County College is as follows:

A (excellent)
B (good)
C (average)
D (passing)*
F (failure)
I (incomplete)
W (approved withdrawal)
CR (credit)
NC (noncredit)
AU (audit)
WA (audit withdrawal)

** Grade of "D" is not transferable to other institutions. In addition, a grade of "D" is not considered passing in developmental courses.*

The grade point average (GPA) is found by dividing the total number of grade points by the total number of semester hours attempted. Grades of CR, NC, W, I, AU, or WA or grades earned for work in developmental courses do not affect the grade point average.

A: 4 points per semester hour
B: 3 points per semester hour
C: 2 points per semester hour
D: 1 point per semester hour
F: 0 points per semester hour

Academic Standing

Grade Review and Change of Grade

Students may petition for review of a grade within 30 calendar days after the first class day of the next long session by following these procedures:

1. The student must inform the instructor in writing of the reason for review of grade request using the Grade Review Form. Upon completion of review, the instructor will provide feedback to the student in writing. The process of the review of grade must be completed within 30 calendar days after receipt by the instructor of the written appeal.
2. If the student is dissatisfied with the outcome of the review with the faculty member, the student may request a secondary review by the Divisional Dean as an appeal using the Grade Appeal Form. The Divisional Dean will then examine the records and submit his/her recommendations through administrative channels to the campus Vice President for Academic Affairs who will make the final decision regarding the grade. The Divisional Dean will notify the student.
3. If the decision in either process is to change the grade, the Divisional Dean will submit a completed "Change of Grade Request" form.
4. If the instructor is no longer employed, the department chairperson will then examine the instructor's records, make a recommendation, and send the recommendation through the proper channels to the campus Vice President for Academic Affairs who will notify the student of the final decision.

Academic Standing

Incomplete Grades

The conditional grade of Incomplete ("I") may be given to a student prior to the end of the term, only with the approval of the Instructor, the Department Chair or Coordinator, the Division Dean, and the Vice President for Academic Affairs.

To be eligible for an Incomplete, a student must be passing the course at the time the Incomplete request is made, have a record of regular attendance, and timely submission of assignments in the course throughout the term.

Requests for Incompletes are only prior to the administering of final assessments for the term and the assignment of the final grade in the course. Emergency circumstances that will be considered for an Incomplete must be unforeseen and unavoidable such as (1) serious illness/injury, (2) a natural disaster, (3) a death in the immediate family, or (4) military deployment. Students must provide documentation of the circumstance with their request.

The instructor will determine the due date for completion of the remaining work. The deadline for completion of work for courses that are scheduled within the fall semester must be no later than the end of the spring semester. For summer and spring semesters, the deadline must be no later than the end of the fall semester.

The student must complete all course requirements prior to the deadline established by the instructor. If a Change of Grade is not submitted by the last day of the next long semester, the "I" will automatically convert to an "F."

Academic Standing

Repeating a Course

Only courses specifically designated in this catalog as repeatable for credit may be taken more than two times.

All courses that receive assigned grades appear as part of the student's permanent academic record. When courses are repeated, both grades are included in the GPA for courses taken and repeated prior to fall 1996; only the latest grade is included in the GPA when a course was repeated between fall 1996 and summer 2003. Effective with the fall 2003 semester, when a course is repeated, only the highest grade earned is used to calculate the student's cumulative grade point average.

Academic Standing

Schedule of Classes

The Schedules of Classes for both credit and non-credit are available on the TCC website. The College reserves the right to add, change or cancel any course section as necessary.

Academic Standing

Terms and Special Sessions

Tarrant County College provides all credit coursework in semester units (semester credit hours). The standard fall and spring terms include 16 weeks of instruction. In addition, each term usually includes two sessions of eight weeks each, a session of 12 weeks, and a Weekend College session of 13 to 16 weeks. A Maymester is held before summer classes and a Wintermester before the beginning of spring classes.

The summer term includes two regular sessions of five weeks each and a variety of other sessions varying from three weeks to 10 weeks. State regulations currently limit the amount of credit that may be earned during summer sessions.

Withdrawal dates, refund dates, and other calendar events for each session are included in the TCC master calendar. Dates for sessions are individually assigned. Students whose course enrollment determines eligibility for financial aid benefits, veterans' educational benefits, insurance coverage, tuition reimbursement, or any other entitlement should check with their benefits program to determine the effect of session enrollment. Students may not withdraw from any course after the withdrawal date for the session.

Detailed information about session offerings is included in the schedule of classes on the TCC website. Students should check with the department office of the course involved or with the campus Admissions and Registrar Office for additional information about particular session offerings.

Academic Standing

Transcript of TCC Student Record

The transcript of college work is an official copy of the student's permanent record bearing the College seal and designated signature. A student may request a transcript online through the current student portal (PDF or mailed copies) or they may pick up transcripts in person at the campus Admissions and Registrar Office. Any outstanding debts to the College must be paid to the Business Services Office before the student's record will be released.

If students desire official transcripts of work completed at other institutions, they must request those transcripts from the original institutions.

Academic Standing

Transfer Dispute Resolution

The Texas Higher Education Coordinating Board (THECB) intends that approved academic coursework transfer between Texas public institutions, provided that (1) courses are within the approved transfer curriculum of the declared major field and (2) published transfer policies are met. Texas public institutions are required to notify students if approved academic coursework earned at another institution will not transfer.

If an academic course or any course with a Texas Common Course Number is not accepted in transfer by another Texas public college or university, students can request that TCC submit a Transfer Dispute Form to the receiving institution. Most TCC courses transfer to other Texas public institutions of higher education, and Core Curriculum and Field of Study courses are guaranteed to transfer to fulfill the core or field element designated. This assumes the course has at least a "C" grade outcome, though some institutions will also accept grades of "D". A student who feels their TCC course work did not transfer as expected can request that TCC investigate. A request can be made by emailing DT.records@tccd.edu. If TCC cannot identify an appropriate reason for a course not transferring, it will file a dispute notice with the receiving institution and/or the Texas Higher Education Coordinating Board.

Graduation

A student should contact the campus Advising and Student Success Center with any questions about the academic plan and/or graduation requirements.

Date(s) and times(s) of commencement exercises are announced on the TCC website.

A completed Commencement Interest Form (submitted in the current student portal) is required of all students participating in the annual commencement ceremony. All graduating students are encouraged to submit the form regardless of intent to participate in the ceremony to ensure the desired name is printed on the diploma and the correct address is on file for mailing the diploma. Students submit the form during the semester they will complete their final degree or certificate requirements.

Tarrant County College (TCC) reserves the right to post degrees and/or certificates for current or former students who have met completion requirements but have not formally initiated the graduation process. Degrees and certificates are posted at the end of the term in which they are earned (in August, December and May), even if the final course is in a session ending before the term ends.

Graduation

Requirements for Graduation

A student may graduate by completing the catalog degree or certificate requirements in effect at the time of first enrollment at TCC, or those listed in a later Catalog, provided the requirements are met not later than five years from the date of the Catalog selected, the degree or certificate program and requisite courses are still being offered, and mandates of regulating agencies are satisfied.

General Requirements for an **Associate Degree**:

1. A minimum of 25 percent of the semester credit hours required for the degree must be earned in residence at TCC.
2. A minimum cumulative grade point average of 2.0 is required for all TCC courses.
3. A minimum grade point average of 2.0 is required for all courses required by the academic program.
4. All requirements of the degree must be satisfactorily completed.
5. All financial obligations to the College must be met.
6. Students applying to receive a subsequent two-year degree must complete an additional 15 hours in residence, in coursework not applied to the first degree.

General Requirements for a **Certificate of Completion**:

1. A minimum of 25 percent of the semester credit hours required for the certificate must be earned in residence at TCC.
2. A minimum grade point average of 2.0 is required for all courses presented for graduation.
3. All requirements of the certificate must be satisfactorily completed.
4. All financial obligations to the College must be met.

Graduation

Graduation Honors

Associate Degrees

Graduation honors are awarded to students completing the Associate of Arts (AA), the Associate of Arts in Teaching (AAT), the Associate of Science (AS), or the Associate of Applied Science (AAS) Degree with a superior cumulative grade point average (GPA). The following classifications of honors will be recognized on the student's transcript.

Designation	Cumulative GPA
Highest Honors	4.00
High Honors	3.75 to 3.99
Honors	3.50 to 3.74

The GPA computation to determine honors includes only completed TCC courses, not including developmental coursework, and includes all coursework during the term of completion. AA, AS, AAT, and AAS degree recipients must complete at least 30 semester hours in residence at TCC to qualify for honors.

Certificates of Completion

Graduation with Distinction is awarded to students earning a Certificate of Completion with a GPA of 3.5 or higher. This honors designation will appear on the student's transcript.

The GPA computation to determine Graduation with Distinction includes only completed TCC courses, not including developmental coursework, and includes all coursework during the term of completion. Certificate recipients must complete at least 15 semester hours in residence at TCC to qualify for Graduation with Distinction.

Graduation

Graduate Guarantee Program

Transfer Guarantee

Tarrant County College guarantees to its Associate of Arts students who have met the requirements for the degree that course credits will transfer to other public-supported Texas colleges or universities provided the following conditions are met:

1. Transferability means acceptance of credit toward a specific major and degree at a specific institution. Institutions may choose to transfer in some courses as elective credit if the TCC course does not exactly match the university course; students should plan TCC enrollments using course crosswalks published by the senior institutions.
2. Core Curriculum courses and the block of core curriculum is guaranteed by the State of Texas to transfer, component for component.
3. Limitations on the number of credits accepted in transfer, grades required, relevant grade point average, and duration of transferability apply as stated in the general undergraduate catalog of the receiving institution.
4. Only college-level courses with Lower Division Academic Course Guide Manual (ACGM) approved course rubrics are included in this guarantee.

If all the above conditions are met and courses are not accepted by a receiving institution in transfer, the student must notify the District Admissions and Records Office by emailing transcript.eval@tccd.edu the notice of transfer credit denial to initiate the Transfer Dispute Resolution process.

If course denial is not resolved, TCC will allow the student to take tuition-free alternate courses, semester hour for semester hour, which are acceptable to the receiving institution within a one-year period from granting of a degree at TCC. The graduate is responsible for payment of any fees, books, or other course-related expenses associated with the alternate course or courses.

Guarantee for Job Competency

If a recipient of an Associate of Applied Science Degree or Certificate of Completion is judged by an employer to be lacking in technical skills identified as exit competencies for a specific degree program, the graduate will be provided up to 12 tuition-free credit hours of additional skills training by TCC under the conditions of the guarantee policy. Special conditions which apply to the guarantee include the following:

1. The graduate must have earned the Associate of Applied Science Degree or Certificate of Completion in a technical, vocational, or occupational program identified in the College Catalog.
2. The graduate must have completed requirements for the Associate of Applied Science Degree or Certificate of Completion with the TCC district, with a minimum 75 percent of credits earned at TCC, and must have completed the degree or certificate within a five-year time span.
3. Graduates must be employed full-time in an area directly related to the area of program concentration as certified by the appropriate dean or other administrator.
4. Employment must commence within six months of graduation.
5. The employer must certify in writing that the employee is lacking entry-level skills identified by TCC as program completion requirements and must specify the areas of deficiency within 90 days of the graduate's initial employment.
6. The employer, graduate, campus Vice President for Academic Affairs, and appropriate faculty member will develop a written educational plan for retraining.
7. Retraining will be limited to 12 credit hours related to the identified skill deficiency and to those classes regularly scheduled during the period covered by the retraining plan.
8. All retraining must be completed within a calendar year from the time the educational plan is agreed upon.
9. The graduate and/or employer is responsible for the cost of books, insurance, uniforms, fees, and other course-related expenses.
10. The guarantee does not imply that the graduate will pass any licensing or qualifying examination for a particular career.

Activation of the "Graduate Guarantee Program" may be initiated by the graduate by contacting the appropriate dean or other administrator within 90 days of the graduate's initial employment.

General Regulations

Administrative Withdrawal

The College reserves the right to withdraw a student from class if, in the judgment of College officials, such withdrawal is in the best interest of the student or the student body at large.

Change of Address

Students who change their home address or mailing address are expected to notify the College of this change immediately using the current student portal or by contacting the campus Admissions and Registrar Office. Documentation may be required if the change would lower the tuition rate.

Official Communications

A request that a student report to an administrative or faculty office may be made by letter, email, or telephone. Failure to comply with such a request may result in disciplinary action. Each student is responsible for monitoring their myTCC email account for official communications.

Communications to the entire student body are considered properly delivered when they are sent to the student's myTCC email account, posted on the current student portal and/or TCC website. Each student is responsible for regularly checking their myTCC email and these websites.

Religious Holy Days

In accordance with state law, TCC allows an excused absence to students for the observance of a "religious holy day," defined as a holy day observed by a religion whose places of worship are exempt from property taxation under Section 11.20, Tax Code.

Students shall be excused from attending classes or other required activities, including exams, during the time needed for travel for the purpose of the observance of a religious holy day. The law mandates that students be required to complete assignments or exams missed during the absence within a reasonable time.

Student Conduct and Discipline

Tarrant County College has established rules and regulations for student conduct and behavior. These items may be found in the Student Handbook, which is available on the TCC website. Failure to abide by all rules and regulations may be grounds for disciplinary action.

The Vice President for Student Affairs is responsible for enforcing campus student discipline as outlined in the Student Handbook and makes recommendations to the President regarding student violations of College Regulations and adherence to the District's disciplinary procedures. These procedures will assure prompt and appropriate action, as well as provide due process in accordance with the guidelines stipulated by the Texas Higher Education Coordinating Board.

Use of Legal Name

Students are required to provide their full legal name to the College. Students' permanent records, including official transcripts, are required to identify students by their full legal name. Students may record a "preferred name."

Use of Student Number

A student number is required to identify students' permanent records. The automated student information system assigns a random number, called the Colleague ID, to every student. The Colleague ID is used for all internal printed materials and provides additional protection to students' privacy. Students are urged to become familiar with their Colleague ID and to use it when communicating with College offices.

Students are requested to provide their Social Security number to the College for maintenance of their student records. This number allows the College to meet federal and state reporting requirements, enables communication with financial aid providers and service agencies, allows reporting to IRS regarding eligibility for the American Opportunity Tax Credit and Lifetime Learning Credit, and substantially eases transfer of information between the College and other colleges and universities. Students who do not provide their Social Security number risk loss of tax benefits and may encounter delays when transferring from or to other institutions. The College makes every effort to protect students' Social Security numbers from inappropriate disclosure. Questions about College use of the Social Security Number should be forwarded to the District Admissions and Records Office or the campus Admissions and Registrar Office.

Campus Carry

Effective August 1, 2017, the Campus Carry law (Senate Bill 11) allows those licensed individuals to carry a concealed handgun in buildings on public community college campuses, except in locations the College establishes as prohibited. Prohibited areas include but are not limited to Theater and Performance Halls, Health Services, Testing Services, Counseling Services, Physical Education, Early College High School Programs, Child Care Facilities, and the TCC Police Department. Under the new law, openly carrying handguns is not allowed on college campuses. For more specific TCC regulations, go to the TCC website. For emergency information, go to the TCC website.

Official Notices

Tarrant County College (TCC) provides the following information in response to federal or state mandates or as a service to the College community. Additional information about these and other important topics is available on the TCC Website.

Official Notices

Access to Student Records

The Family Educational Rights and Privacy Act of 1974 (PL93-380), commonly referred to as FERPA, provides that all records pertaining to a student that are maintained by the College must be open to inspection by the student and may not be made available to any other person without the written authorization of the student. FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. A "student" is defined as a person who has registered and paid for one or more Undergraduate (UG) or Continuing Education (CE) courses and who remains enrolled through the official date of record for that term.

The act also allows the release of "directory information" defined by each institution but limited to information that might have traditionally been published in a directory of students.

TCC directory information includes:

1. Name
2. Current address
3. Telephone number(s)
4. Program of study (major)
5. Dates of attendance
6. Full-time or part-time enrollment status
7. Degrees and awards received and dates granted
8. Previous educational institution(s) attended
9. Eligibility and participation in officially recognized activities

NOTE: Email addresses are not considered directory information at TCC.

At the time of application to TCC, students are informed of their right to withhold the release of directory information. Such requests are made to any campus Admissions and Registrar Office or the District Admissions and Records Office. Likewise, a student may request that TCC stop withholding release of directory information at any time. NOTE: employers often seek to verify enrollment or credentials earned; a student who opts to have release of directory information withheld may experience a delay in the release of such information, which can impact an offer of employment.

Without consent of the student, FERPA permits the release of student information to the following:

1. To officials at an institution in which the student seeks to enroll;
2. To comply with a court order or subpoena;
3. To other officials at TCC who have legitimate educational interest in specific student information, with only the minimum justified information being provided;
4. In connection with a health or safety emergency, if necessary, to protect the student and others;
5. To parents of a student who is a dependent for income tax purposes;
6. To parents of a student younger than 21 years of age if the disclosure concerns discipline for violation of the campus drug and alcohol policy;
7. In strict compliance with the requirements of FERPA or other applicable law.

Otherwise, non-directory information is never released to any outside party without the student's official authorization. These non-directory items include but are not limited to:

1. Grade point average (GPA)
2. Academic standing
3. Grades or transcripts

TCC allows students to declare that certain individuals be able to act on their behalf in some respects. Students can complete a FERPA waiver by working with any campus Admissions and Registrar Office. These waivers are valid for a period of one year and can be renewed; the waiver can also be canceled at any time.

Questions concerning FERPA may be directed to the campus Admissions and Registrar Office or the District Admissions and Records Office. For more information, refer to TCC website.

Official Notices

The American Opportunity Credit

Students may be eligible to claim an American Opportunity Credit (AOC) against their federal income taxes. The AOC may be claimed for the qualified tuition and related expenses of students enrolled at least half time for the first four years post-secondary education when enrolled in a program leading to a degree, certificate or other recognized educational credential. Eligible tuition and fees are determined by the IRS and will be offset by any grants, scholarships or refunds received. More information is available at www.irs.gov.

Official Notices

Lifetime Learning Credit

Students may be eligible to claim a Lifetime Learning Credit against their federal income taxes. The Lifetime Learning Credit may be claimed for the qualified tuition and related expenses of students enrolled in eligible educational institutions.

If a student is claiming an American Opportunity Credit, none of that student's expenses for that year may be applied toward the Lifetime Learning Credit. More information is available at www.irs.gov.

Official Notices

IRS Form 1098-T

In January of each year, an IRS Form 1098-T is made available to all students with payments made during the previous calendar year that are limited to the amount of tuition and other related educational expenses billed for the tax year. This form is informational only and should not be considered as tax opinion or advice. As a requirement of the Taxpayer ACT of 1997, it serves to alert students that they may be eligible for federal income tax education credits. Receipt of the Form 1098-T does not indicate eligibility for the tax credit. TCC highly recommends that the student seek assistance from a tax advisor when determining their eligibility for an income tax education credit. Refer to the TCC website for the latest updates concerning the IRS Form 1098-T.

To determine the amount of qualified tuition and fees paid, and the amount of scholarships and grants received, a taxpayer should use their own financial records. Due to IRS regulations, TCC must include a student's Taxpayer Identification Number (TIN) (i.e. social security number) on the Form 1098-T for tax purposes. If the student did not provide this number when their application was submitted, the student may update their TIN by submitting a Record Change Request through their campus Admissions and Registrar Office. The Form 1098-T will be submitted to the IRS for a student even if they have not provided the College with their TIN. For more information concerning the tax identification number, visit the IRS website. Continuing Education tuition is not included on the IRS Form 1098-T.

Students are encouraged to consent to the electronic format to receive immediate access when the Form 1098-T is available to students. TCC will send one mass mailing in January to students who have not selected the electronic format by the deadline. After the mass mailing in January, all students will obtain their Form 1098-T online through the TCC website. For further questions, call the 1098T hotline number at (817) 515-1098. Due to privacy laws, TCC can only release limited information by phone to the student.

Official Notices

Selective Service

Almost all males 18 through 25 years of age living in the United States must register with the Selective Service. Almost all non-citizens also are required to register, including illegal aliens, legal permanent residents, and refugees. If a male non-citizen takes up residence in the United States prior to his 26th birthday, he must register. Additional information can be found on the TCC website.

Official Notices

Solomon Amendment

The Solomon Amendment allows military recruiters to request certain recruiting information from institutions about students. Most of the recruiting information data is considered directory information under FERPA or data that would normally be collected by the institution. The 1995/1996 National Defense Authorization Act and the 1997 Omnibus Consolidated Appropriations Act gave branches of the military access to student information including student's name, address, telephone number, age or date of birth, class, and major. The Solomon Amendment requires institutions to cooperate and comply with requests from military recruiters for student information.

Official Notices

Student Right to Know - Crime Statistics

The Campus Annual Security Report can be viewed on the TCC website. A printed copy of this report is available on request from any campus police department.

Official Notices

Student Right to Know - Graduation Statistics

Federal law requires that all institutions of higher education disclose graduation rates to students, applicants, and potential students. Graduation rates for TCC can be provided upon request to the District Office of Institutional Research.

Official Notices

Students Subject to Additional Tuition and Fees

At this time, Tarrant County College does not require additional charges for any categories of excess hours. TCC is required by law to inform students that charges may be instituted by TCC and/or may be incurred when attending other Texas colleges and universities.

Additional Charges for Students with Excessive Semester Credit Hours

Texas legislation allows state colleges and universities to charge additional tuition and/or fees for students who enter a Texas public higher education institution beginning in fall 1999 and who exceed by more than 45 hours the semester credit hours required for the degree. For undergraduate students initially enrolling fall 2006 or later, the limit is 30 semester credit hours above the number of hours required for the degree. The legislation exempts technical and workforce education courses. At this time, TCC is not charging additional tuition for excessive hours.

Additional Charges for Students Who Exceed 27 Developmental Semester Credit Hours

Texas legislation allows state colleges and universities to charge additional tuition and/or fees for students who exceed 27 semester credit hours in developmental courses. The 27-hour limit does not include any courses in English for Speakers of Other Languages (ESOL) that are taken prior to the students' initial entrance test (i.e., TASP, THEA, TSI Assessment, Compass, MAPS, and ASSET). It does not include any courses in study or thinking skills. At this time, TCC is not charging additional tuition for excess developmental hours.

Additional Charges for Repeated Courses

The Texas Legislature eliminated funding to higher education for courses that are attempted three or more times. An attempted course is defined as any course in which a grade is earned on the transcript, including repeated courses and courses dropped with a grade of "W." Tracking of enrollments is the responsibility of TCC and will begin with enrollments in the Fall 2002 semester. State regulation allows an institution of higher education to charge a higher tuition rate to a student whose hours can no longer be submitted for state funding. Therefore, in order to compensate for this loss of state funding, students attempting a course for the third or more time will be assessed an additional tuition charge of $60 per credit hour for each repeated course. Effective with the Fall 2016 term, students receiving a tuition waiver or exemption will be responsible for paying any additional charges when attempting a course three or more times. The fee is subject to change each year upon action of the Texas Higher Education Coordinating Board.

Effective with the Fall 2013 term, TCC will charge a higher tuition rate for the following repeated courses:

- Same or substantially similar course content
- Attempted more than twice
- Graded and/or courses dropped after census (A, B, C, D, F, I, W, and in some instances, NC or CR)

Courses exempted from state funding limitations include:

- Audit
- Developmental education
- Continuing education
- Repeatable for credit
- Effective for Spring 2018, courses approved through the drop exception process (Drop 6 Rule).
- Required courses for degree during final semester before graduation. *(Students should complete the Third Attempt Rule Exemption Form and submit the form to a campus Admissions and Registrar Office. The exemption applies for only one semester.)*

Official Notices

Texas Tuition Rebate Program

Section 54.0065 of the Texas Education Code provides that some students may earn a rebate up to $1,000 if they meet the following:

1. They have enrolled for the first time in an institution of higher education in the fall 1997 term or later;
2. They are requesting a rebate for work related to a first baccalaureate (bachelor's) degree received from a Texas public university (not a community college degree);
3. They have been a resident of Texas, have attempted all coursework at a Texas public institution of higher education and have been entitled to pay resident tuition at all times while pursuing the degree; and
4. They have attempted no more than three hours in excess of the minimum number of semester hours required to complete the degree under the catalog under which they were graduated. Hours attempted include transfer credits, course credit earned exclusively by examination, courses that are dropped after the official census date, for-credit developmental courses, optional internship and cooperative education courses, and repeated courses. Courses dropped for reasons that are determined by the institution to be totally beyond the control of the student shall not be counted.

- Apply for Graduation

Total Semester Hours
60

Core Curriculum Incomplete
Completion of this associate degree does not satisfy all of the Texas Core Curriculum requirements at Tarrant County College (TCC).

Additional coursework will be necessary to be considered "Core complete" for transfer to another Texas public institution. Consult with your Career Advisor to identify the additional coursework required.

To be Core complete, take KINE 1164, and select a course from each of the following Core Curriculum components: Social and Behavioral Science, Life and Physical Sciences, Language, Culture and Philosophy, and Speech and Communication Skills.

Articulation Agreement
Per Texas Administrative Code 19 Tex. Admin. Code § 2.53, a college that has a signed articulation agreement with a General Academic Teaching Institution to transfer a specified curriculum may offer a specialized AA or AS (but not AAT) degree program that incorporates that curriculum.

Refer to the TCC Common Transfer Schools for more information about the articulation agreement(s) associated with this program.

Program Requirements

Simple Requisites

Subplan

Senate Bill 148 of the 75th Texas Legislature (1997) mandated Field of Study curricula. The Field of Study curricula, along with core curricula, are intended to facilitate the transferability of courses among Texas public colleges and universities. All public four-year institutions are required to accept Coordinating Board-approved Field of Study courses in fulfillment of lower-division requirements for bachelor's degrees in majors that correspond to the Field of Study.

Field of Study Requirements
Type
Completion Requirement

Designated Core Courses - 3 Semester Credit Hours

Complete ALL of the following Courses:

- MATH 1314 - College Algebra

Discipline Foundation Courses - 12 Semester Credit Hours

Complete ALL of the following Courses:

- EDUC 1301 - Introduction to The Teaching Profession
- EDUC 2301 - Introduction to Special Populations
- MATH 1350 - Mathematics for Teachers I
- MATH 1351 - Mathematics for Teachers II

Directed Electives - 6 Semester Credit Hours

The list below includes the directed electives offered by TCC that will be accepted by the general academic teaching institution for students transferring. A student planning to transfer should review the accepted directed electives of the intended transfer college or university to verify transferability.

Complete at least 2 of the following courses:

- ARTS 1301 - Art Appreciation
- BIOL 1408 - Biology for Non-Science Maj I (Lec/Lab)
- ECON 2301 - Principles of Macroeconomics
- ENGL 1302 - Composition II
- GEOG 1303 - World Regional Geography
- GEOL 1401 - Earth Science for Non-Sci Maj (Lec/Lab)
- GEOL 1403 - Physical Geology (Lecture + Lab)
- HIST 1301 - United States History I
- HIST 1302 - United States History II
- HIST 2301 - Texas History
- MUSI 1306 - Music Appreciation
- TECA 1303 - Families, School and Community
- TECA 1311 - Educating Young Children
- TECA 1354 - Child Growth and Development

Total Semester Hours
21

Directed Electives Submitted by General Academic Institutions - Education (EC-6)

The following institutions will accept *any Academic Course Guide Manual (ACGM) course* for fulfilling the directed electives requirement (6 SCH) for the **EC-6** Education Field of Study.

LAMAR UNIVERSITY
PRAIRIE VIEW A&M UNIVERSITY
STEPHEN F. AUSTIN STATE UNIVERSITY
SUL ROSS STATE UNIVERSITY
SUL ROSS STATE UNIVERSITY - RIO GRANDE
TEXAS A&M UNIVERSITY - TEXARKANA

Prerequisites
Type
Completion Requirement

The following courses must be completed prior to applying for admission into the Anesthesia Technology Program.

Complete ALL of the following Courses:
- BIOL 2401 - Anatomy and Physiology I (Lecture/Lab)
- BIOL 2402 - Anatomy/Physiology II (Lecture + Lab)
- CHEM 1406 - Intr Chemistry I-Allied Hlth (Lec/Lab)
- ENGL 1301 - Composition I
- PSYC 2301 - General Psychology

First Year
Type
Completion Requirement

Term I

- Meet with your Career Advisor

Complete ALL of the following Courses:
- HPRS 1206 - Essentials of Medical Terminology
- ANES 1371 - Principles of Anesthesia Technology
- ANES 1372 - Introduction to Anesthesia Technology
- PHIL 2306 - Introduction to Ethics

Term II

- Meet with your Career Advisor

Complete ALL of the following Courses:
- ANES 1370 - Anesthesia (Basic) Pharmacology
- ANES 1373 - Anesthesia Technology Fundamentals I
- ANES 1474 - Anesthesia Technology Instrumentation I

Term III

- Meet with your Career Advisor

Complete ALL of the following Courses:
- ANES 1375 - Anesthesia Technology Clinic Exp I

Second Year
Type
Completion Requirement

Term IV

- Meet with your Career Advisor

Complete ALL of the following Courses:
- ANES 2373 - Anesthesia Technology Fundamentals II
- ANES 2474 - Anesthesia Technology Instrumentation II
- ANES 2375 - Anesthesia Tech Clinic Experience II

Term V

- Meet with your Career Advisor

Complete ALL of the following Courses:
- ANES 2476 - Anesthesia Clinical Seminar & Review
- ANES 2475 - Anesthesia Tech Clinic Experience III

- Apply for Graduation

Total Semester Hours
60

***Selective Admission Criteria*:**

All applicants to the Anesthesia Technology Program are required to attend an information session before the application deadline.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *Currently have Minimum GPA of 2.5*
- *IELTS 6.5 minimum score or TOEFL iBT test 83 minimum score for ESL students*

Prior to application, students with international college credits must contact International Student Admissions and Compliance 817-515-1570 to verify those courses that will transfer to TCCD.

Once admitted to the program students must maintain a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative in order to remain in the program.

Required immunizations must be completed prior to the beginning of classes. For additional information refer to the TCC website.

After satisfactory completion of the above curriculum, the student is eligible to take the national examination to become certified as a Certified Anesthesia Technologist with the ASATT.

The Tarrant County College Anesthesia Technology program is applying for accreditation by the Commission on Accreditation of Allied Health Programs (CAAHEP), 25400 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

While this suggested course of study satisfies the requirements of most senior institutions, it is the student's responsibility to identify his or her transfer institution to determine specific requirements for the freshman and sophomore years.

Completion of the Associate of Science in Engineering degree does not complete State of Texas requirements for Core Curriculum.

First Year
Type
Completion Requirement

Term I

- Meet with your Career Advisor

Complete ALL of the following Courses:

- MATH 2413 - Calculus I
- ENGL 1301 - Composition I
- ENGR 1201 - Introduction to Engineering
- ECON 2301 - Principles of Macroeconomics
- SPCH 1311 - Introduction to Speech Communication
  OR SPCH 1321 - Business and Professional Communication

Term II

- Meet with your Career Advisor

Complete ALL of the following Courses:

- MATH 2414 - Calculus II
- PHYS 2425 - University Physics I (Lecture + Lab)
- ENGL 1302 - Composition II
  OR ENGL 2311 - Technical and Business Writing
- COSC 1436 - Programming Fundamentals I
  OR COSC 1420 - "C" Programming

COSC 1420 *is strongly recommended for* ***Electrical Engineering*** *majors.*

Second Year
Type
Completion Requirement

Term III

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- MATH 2415 - Calculus III
- PHYS 2426 - Univerisity Physics II (Lecture + Lab)
- GOVT 2305 - Federal Govrnment (Federal Const & Top)
- HIST 1301 - United States History I

AND

Students should select courses that best match the degree requirements at the four-year engineering school of choice

Complete ANY of the following Course Sets:

- Engineering Elective (3 Semester Credit Hours)

Civil Engineering *and* ***Mechanical Engineering*** *majors need to take* ***ENGR 2301****.*

Electrical Engineering *majors need to take* ***ENGR 2305****.*

General Engineering *majors need to take* ***ENGR 2301*** *or* ***ENGR 2305****.*

Term IV

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- CHEM 1411 - General Chemistry I (Lecture + Lab)

AND

Students should select courses that best match the degree requirements at the four-year engineering school of choice

Complete ALL of the following Course Sets:

- Engineering Elective (3 Semester Credit Hours)
- Engineering Elective (3 Semester Credit Hours)
- Engineering Elective (3 Semester Credit Hours)

Civil Engineering and **Industrial Engineering** majors need to take **ENGR 1304**.

Mechanical Engineering majors need to take **ENGR 2302**.

- Apply for Graduation

Total Semester Hours
60

Below are the Restricted Electives. Students *should select the courses that best match the degree requirements at the four-year engineering school of choice:*

	ENGR 1304	ENGR 2301	ENGR 2302	ENGR 2305	ENGR 2308	ENGR 2332	MATH 2318	MATH 2320*	ENGL 2311	GOVT 2306	HIST 1302
Civil Engineering majors	Required	Required	X			X		X		X	X

Program Requirements

Simple Requisites

Subplan

A collegiate degree related to the baccalaureate degree providing curricula in university parallel and pre-professional areas to students with a major in a science or a related discipline.

General Requirements for an Associate Degree:

1. A minimum of 25 percent of the semester credit hours required for the degree must be earned in residence at TCC.
2. A minimum cumulative grade point average of 2.0 is required for all TCC courses.
3. A minimum grade point average of 2.0 is required for all courses presented for graduation.
4. All requirements of the degree must be satisfactorily completed.
5. All financial obligations to the College must be met.
6. Students applying to receive a subsequent two-year degree must complete an additional 15 hours in residence.

- General Requirement for Graduation
- College Readiness
- Transfer

AIRP 2239 - Commercial Flight	AIRP 2271 - Commercial Flight, Helicopter
AIRP 2236 - Certified Flight Instructor-Flight	AIRP 2272 - Certified Flight Instructor–Helicopter

Selective Admission Criteria:

All flight courses are subject to FAA rules and regulations (CFR Title 14). Possession of a current FAA medical certificate is required for all flight courses. All AIRP courses must be passed with a grade of "B" or higher.

All applicants to the Professional Pilot Program are required to attend an information session and the program orientation prior to the application deadline and registration. Complete details regarding the Professional Pilot program can be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Hold an FAA Class 2 Medical Certificate*
- *Have a current driver's license or passport*

Prior to application, students with international college credits must contact International Student Admissions and Compliance 817-515-1570.

TCC aviation programs are regulated by the Federal Aviation Administration. Once admitted into the program, students must obtain a minimum grade of "B" in all technical courses and meet mandatory attendance requirements.

Students should be aware that employment in aviation-related fields may be subject to alcohol and drug screenings, as well as criminal background checks.

In addition, the following are program requirements:

- *Students must attend a mandatory scheduled orientation session prior to enrollment.*
- *Students must be released by the department to register for any AIRP course.*
- *Students must maintain a minimum balance in their student flight account to remain eligible for flight status.*

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

39

Airplane Specialty Track	Helicopter Specialty Track
AIRP 1215 - Private Flight	AIRP 1270 - Private Flight, Helicopter
AIRP 2250 - Instrument Flight	AIRP 2270 - Instrument Flight, Helicopter
AIRP 1255 - Intermediate Flight	AIRP 1271 - Intermediate Flight, Helicopter
AIRP 2239 - Commercial Flight	AIRP 2271 - Commercial Flight, Helicopter

Selective Admission Criteria:

All applicants to the Professional Pilot Program are required to attend an information session and the program orientation prior to the application deadline and registration. Complete details regarding the Professional Pilot program admissions process may be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Hold an FAA Class 2 Medical Certificate*
- *Have a current driver's license or passport*

Prior to application, students with international college credits must contact International Student Admissions and Compliance at 817-515-1570.

TCC aviation programs are regulated by the Federal Aviation Administration. Once admitted into the program, students must obtain a minimum grade of "B" in all technical courses and meet mandatory attendance requirements.

Students should be aware that employment in aviation-related fields may be subject to alcohol and drug screenings, as well as criminal background checks.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Completion Requirement

Term IV

- Meet with your Career Advisor

Complete ALL of the following Courses:
- AERM 2171 - Oral and Practical Exams, General
- AERM 2172 - Oral and Practical Exams, Airframe

- Apply for Graduation

Total Semester Hours
45

Selective Admission Criteria:

All applicants to the Aviation Maintenance Technology Program are required to attend an information session and the program orientation prior to the application deadline and registration. Complete details regarding the Aviation Maintenance Technology program can be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*

Prior to application, students with international college credits must contact International Student Admissions and Compliance 817-515-1570.

TCC aviation programs are regulated by the Federal Aviation Administration. Once admitted into the program, students must obtain a minimum grade of "C" in all technical courses and meet mandatory attendance requirements.

Students should be aware that employment in aviation related fields may be subject to alcohol and drug screenings as well as criminal background checks.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Selective Admission Criteria:

Consent of the Academy Coordinator is required for enrollment. Once admitted to the program, students must complete and earn a minimum grade of C in each course. The endorsement of eligibility for the State Peace Officer Licensing Exam will only be issued to a student who has completed each course with a minimum grade of "C" during that specific academy.

Enrollment is based on space availability for those who meet admission criteria.

Admission Criteria:

1. *Students must have a personal interview with an academy coordinator.*
2. *Students must complete the police academy application (available at the Criminal Justice Training Center).*
3. *Students must meet minimum licensing requirements as established by the Texas Commission on Law Enforcement (TCOLE).*

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Selective Admission Criteria:

A selection committee reviews applications and selects those applicants who best meet the following criteria (listed in random order):

The applicant must:

1. *Complete the application to the College (TCC) and meet the admission requirements for the institution.*
2. *Submit to the secretary of the selection committee for Health Sciences:*
   - *Completed application for admission to the Dental Hygiene Program;*
   - *Provide official high school or college transcripts (High school, if completed fewer than 12 semester hours of college, or College, if completed, or will complete by the deadline date, 12 or more semester hours of college. Official transcripts are required from each college you have attended, including TCC.*
3. *Schedule a time to take the Health Education System, Inc. (HESI) Admissions Exam; and*
4. *Complete the TOEFL iBT® test if English is not your first language.*

Additional Application Information:

- *Applicants will only be able to apply three times to the dental hygiene program.*
- *Grade point average (GPA) of all high school or undergraduate college classes, or GED scores if high school/college are not applicable.*
- *Bonus points are awarded for college-level general education and science courses required for the program, for which a grade of "C" or higher was earned.*
  ***NOTE:** Science courses must have been completed within five years of the semester containing the program deadline date. Only the highest grade from the first two (2) attempts on any science course will be considered for admission. The exception to this rule will be a science course that is required to be taken more than twice because it is older than five (5) years. Any course withdrawals will be considered one of the two attempts.*
- *All prerequisite science courses must be completed within five (5) years of the submission of the application to the Dental Hygiene Program. Any sciences older than five (5) years will need to be re-taken.*
- *Bonus points proportionate to the number of semester hours from a regionally accredited college or university for which a grade of "C" or higher was made up to a maximum of 120 semester hours.*
- *Bonus point for a bachelor's degree from a regionally accredited college or university.*
- *Bonus points for observation experience in a dental care setting or for employment experience as a dental assistant.*

Students who are selected for admission must undergo screening for substances of abuse and a criminal background check. All offers for admission to the Dental Hygiene Program are provisional until satisfactory results are received for these two evaluations.

International students must contact International Student Admissions and Compliance at 817-515-1570 and also the EMS & Dental Hygiene Office at 817-515-6435.

Only the criteria listed are evaluated and considered for the purpose of selection and admission to this program. No specific minimum grade point average or test score, or a set minimum number of courses, must be completed for admission. Selection is based on how each applicant compares with others in the applicant pool. In general, the higher the grades, the more competitive the applicant will be for the positions available. Once admitted to the program, students must complete and earn a minimum grade of 'C' in each specialized course.

Most/all of the specialized courses are taught only during the daytime.

After successful completion of the above curriculum, the student is eligible to take the necessary examinations to become a registered dental hygienist through the Texas State Board of Dental Examiners, Central Regional Dental Testing Services, or Western Regional Examining Board, and the National Exam for Dental Hygienists through the American Dental Association.

The program is accredited by the American Dental Association Commission on Dental Accreditation (CODA), 211 E. Chicago Avenue, Chicago, Illinois 60611-2678.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

60

Petition Criteria:

- *The following courses DITA 1301, FDNS 1309, FDNS 1346, and FDNS 1447 must be completed within the last 3 years with a "B" or better to petition for Practicum Courses FDNS 1168, FDNS 2168, and FDNS 2169. See course prerequisites for specific requirements.*

Students may petition for a practicum during the semester in which they meet the requirements. However, students will not be enrolled in the practicum until the course grade is published on the student's transcript.

Practicum Petition Approval Criteria:

Program Coordinators review the petitions and approve students based on prerequisite grade requirements and the submission of required background checks, drug screens, health documents, and other required forms. There is no minimum GPA requirement.

Program Completion Requirements:

- *DITA 1301, FDNS 1309, FDNS 1346, and FDNS 1447 with a "B" or better, and all other DITA, FDNS, HECO, and IFWA courses with a "C" or better to graduate from the Nutrition and Dietetics Program.*
- *FDNS 1346 and FDNS 1447 must be completed within five years from graduation.*
- *All students must complete a minimum of 450 supervised practice hours (over three practicum courses) and receive a satisfactory practicum evaluation to complete the DT program.*
- *Students not enrolled in dietetics courses for two consecutive semesters will be removed from the program.*
- *Students who meet all program completion requirements will be eligible to sit for the national NDTR (Nutrition Dietetic Technician, Registered) credentialing examination.*

Additional Requirements:

Students petitioning to a practicum must undergo and receive a clear criminal background check and negative substance abuse screening. In addition, students are required to meet physical requirements and Nutrition and Dietetics Program immunization requirements and provide proof of CPR for healthcare provider, ServSafe Manager Certification, and a valid Texas driver's license prior to starting practicum rotation.

See the Nutrition and Dietetics Program TCC website for additional information.

The TCC Nutrition and Dietetics Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs

Total Semester Hours
65

Selective Admission Criteria:

All applicants to the Diagnostic Medical Sonography Program are required to attend an information session before the application deadline.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *Currently have a minimum GPA of 2.5*
- *Successfully complete the Ultrasound Student Assessment (USA) Exam through Pegasus Lectures. This exam can only be taken once per application period.*
  - *Instructions for this process can be found on the TCC website and https://pegasuslectures.com/usa_program.php.*
- *IELTS 6.5 minimum score or TOEFL iBT test 83 as a minimum score for ESL students*

For additional information, refer to the TCC website.

Prior to application, students with international college credits must contact International Student Admissions and Compliance at 817-515-1570 to verify those courses that will transfer to TCC.

Once admitted to the program, students must maintain a minimum grade of "C" (78%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative prior to and for the duration of the program. Additional drug screening and criminal background checks may be required within the program. Required immunizations must be completed prior to the beginning of classes.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Second Year
Type
Completion Requirement

Term IV

- Meet with your Career Advisor

Complete ALL of the following Courses:

- EMSP 2162 - Clinical - EMT Paramedic
- EMSP 2305 - EMS Operations
- EMSP 2430 - Special Populations

Term V

- Meet with your Career Advisor

Complete ALL of the following Courses:

- EMSP 2243 - Assessment Based Management
- EMSP 2267 - Practicum - EMT Paramedic

- Apply for Graduation

Total Semester Hours
60

Selective Admission Criteria:

A selection committee reviews the applications and selects those applicants who best meet the following criteria (listed in random order):

- *Grade point average (GPA) taken from high school or college transcripts, as applicable.*
- *GED scores if high school/college is not applicable.*
- *Bonus points for college general education courses required for the program, for which a grade of "C" or better was earned.*
- *Bonus points for college science courses required for the program and the GPA of those courses.*
- *Priority preference will be given to applicants who have completed Anatomy and Physiology I and II.*

Applicants must hold a current Texas EMT certificate. May be earned by taking EMSP 1160 and EMSP 1501.

Only the criteria listed are evaluated and considered for the purpose of selection and admission to the Paramedic Program. No specific minimum grade point average or minimum number of courses must be completed for admission. Selection is based on how each applicant compares with others in the applicant pool. In general, the higher the grades, the more competitive the applicant will be for the positions available.

Students must undergo screening for substance abuse and a criminal background check in order to remain enrolled in the program. Details are provided at an orientation meeting prior to the beginning of classes.

Students must complete and earn a grade of "C" or better in each specialized course.

The Tarrant County College Emergency Medical Services Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

Commission on Accreditation of Allied Health Education Programs, 1361 Park Street, Clearwater, FL 33756 Phone: 727-210-2350 www.caahep.org

To contact CoAEMSP: 8301 Lakeview Parkway, Suite 111-312, Rowlett, TX 75088 Phone: 214-703-8445 FAX: 214-703-8992 www.coaemsp.org

After successful completion of this program, the student will be eligible to take the examination for certification as a Paramedic by the National Registry of EMTs and apply for certification by the Texas Department of State Health Services.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Complete ALL of the following Courses:
- ENGL 1301 - Composition I
- COSC 1301 - Introduction to Computing

AND

Complete one course from each option below

Complete ALL of the following Course Sets:
- Government and Political Science (3 Semester Credit Hours)
- Creative Arts or Language, Culture and Philosophy (3 Semester Credit Hours)

Term II
- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- EMSP 1501 - Emergency Medical Technician
- EMSP 1160 - Clinical-Emergency Medical Technology

- Apply for Graduation

Total Semester Hours
18

*The completion of **EMSP 1501** and **EMSP 1160** does not assure admission into the Emergency Medical Services AAS or Paramedic Program.*

Selective Admission Criteria:

Students must undergo screening for substance abuse and a criminal background check in order to remain enrolled in this program. Details are provided at an orientation meeting prior to the beginning of classes. Failure to attend published orientation meetings for EMSP 1501 and EMSP 1160 negates eligibility for the Emergency Medical Technician program.

Students must earn a grade of "C" or higher in both courses to receive an EMT certificate in this program. Satisfactory completion of EMSP 1501 and EMSP 1160 qualifies the student to take the examination for certification as an Emergency Medical Technician by the National Registry of EMTs and apply for certification by the Texas Department of State Health Services.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

The courses listed above are taught in an academy format (daytime - Monday through Friday from 8 a.m. to 5 p.m. and nighttime - Monday and Thursday from 6 p.m. to 10 p.m., and Saturday 8 a.m. to 5 p.m.) and have specialized admission requirements. Consent of the academy coordinator is required for enrollment. Once admitted to the program, students must complete and earn a minimum grade of "C" in each course. Final endorsement of eligibility for the State Firefighter Licensing Exam will only be issued to a student who has completed each course (with a minimum grade of "C") during that specific academy.

Enrollment is based on space availability for those who meet admission criteria.

Selective Admission Criteria:

1. *Students must contact the Fire Academy for academy dates and application deadlines.*
2. *Prior to enrolling, students must provide evidence of EMT Certification.*
3. *Students must take the physical abilities test.*
4. *Students must complete the Fire Academy application (available at the Fire Academy).*
5. *Students must have a personal interview with the Academy Coordinator.*

** This requirement may be waived by the Division Dean.*

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

- HITT 2149 - RHIT Competency Review
- HITT 2339 - Health Info Organization and Supervision

- Apply for Graduation

Total Semester Hours
60

Selective Admission Criteria:

All applicants to the Health Information Technology Program are required to attend an information session before the application deadline. Complete details of the Health Information Technology program admissions process can be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *Currently have a minimum GPA of 2.5*
- *Successfully complete the HESI A2 Entrance Exam with a minimum score of 70 in each section*
- *IELTS 6.5 minimum score or TOEFL iBT test 83 with a minimum score for ESL students*

Prior to applying, students with international college credits must contact the International Student Admissions and Compliance office at 817-515-1570 to verify which courses will transfer to TCC.

Once admitted to the program, students must complete and earn a minimum grade of "C" (75%) in all courses found on the program's degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check prior to the start of the program. Required immunizations must be completed prior to the beginning of classes.

After satisfactory completion of the above curriculum, the student is eligible to take the national examination to become certified as a Registered Health Information Technologist (RHIT). Graduates may also choose to sit for several medical coding certification exams.

The Tarrant County College Health Information Technology Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), 233 N. Michigan Avenue, 21st Floor, Chicago, Illinois 60601-5800. Phone: 312-233-1100.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Term I

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- CETT 1409 - DC-AC Circuits
- HART 1401 - Basic Electricity for HVAC
- INMT 1305 - Introduction to Industrial Mainentance
- RBTC 1401 - Programmable Logic Controllers

AND

Complete one course from the option below

Complete ALL of the following Course Sets:
- Mathematics (3 Semester Credit Hours)

Term II

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- HART 2431 - Advanced Electricity for HVAC
- HYDR 1345 - Hydraulics and Pneumatics
- WLDG 1312 - Intro to Flux Cored Arc Welding (FCAW)
- RBTC 1351 - Robotic Mechanisms

Second Year
Type
Completion Requirement

Term III

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- HART 1403 - Air Conditioning Control Principles
- ELMT 2337 - Electronic-Troubleshooting/Serv/Repair
- WLDG 1417 - Introduction to Layout and Fabrication
- INMT 2345 - Industrial Troubleshooting (Inactive)
- ENGL 1301 - Composition I

Term IV

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- SPCH 1321 - Business and Professional Communication
- GOVT 2305 - Federal Govrnment (Federal Const & Top)
- INMT 2380 - Coop Educ Industrial/Manufacturing Tech

AND

Complete one course from the option below

Complete ALL of the following Course Sets:
- Creative Arts or Language, Culture and Philosophy (3 Semester Credit Hours)

- Apply for Graduation

Total Semester Hours
60

First Year
Type
Completion Requirement

Term I

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- COSC 1301 - Introduction to Computing
  OR BCIS 1305 - Business Computer Applications
- CPMT 1403 - Introduction to Computer Technology
- ITNW 1309 - Fundamentals of Cloud Computing
- ENGL 1301 - Composition I

AND

Complete one course from the option below

Complete ALL of the following Course Sets:

- Math Elective - Information Technology (3 Semester Credit Hours)

Term II

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- COSC 1436 - Programming Fundamentals I
- ITNW 1425 - Fundamentals of Networking Technologies

AND

Complete one course from each option below

Complete ALL of the following Course Sets:

- Social and Behavioral Science (3 Semester Credit Hours)
- Creative Arts or Language, Culture and Philosophy (3 Semester Credit Hours)

Term III

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Course

Complete ALL of the following Courses:

- ITSY 1300 - Fundamentals of Information Security

Second Year
Type
Completion Requirement

Term IV

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- ITSE 2417 - Java Programming
- COSC 1437 - Programming Fundamentals II
- ITSE 1479 - Introduction to Scripting Languages
  OR ITSE 1430 - Introduction to C# Programming

AND

Complete one course from the option below

Complete ALL of the following Course Sets:

- Speech and Communication Skills (3 Semester Credit Hours)

Term V

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- COSC 2436 - Programming Fundamentals III
- ITSE 2409 - Database Programming
- ITSE 1450 - System Analysis and Design

- Apply for Graduation

Program Information:

The Nursing Home Administration course is offered in five three-semester-hour courses and is designed to provide the didactic requirements of the Texas Department of Aging and Disability Services (DADS). It is also intended to assist the participant in preparing for the state licensure examination. DADS requirements for individuals to sit for the licensure exam are:

1. *Bachelor's degree*
2. *Completion of 15 academic credit hours in long term care administration*
3. *Completion of a 1,000-hour internship in an approved facility*

Internship courses are for those students who are unable to obtain their own required internship experiences in an approved facility.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Total Semester Hours
40

Selective Admission Criteria:

All applicants to the Medical Assistant Program are required to attend an information session before the application deadline. Complete details of the Medical Assistant program admissions process may be found on the TCC website.

Applicant Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *IELTS 6.5 minimum score or TOEFL iBT test with 83 as a minimum score for ESL students*

Prior to application, students with international college credits must contact the International Student Admissions and Compliance office at 817-515-1570 to verify those courses that will transfer to TCC.

Once admitted to the program, students must maintain a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative in order to remain in the program.

Required immunizations must be completed prior to the beginning of clinical rotations.

After successful completion of the above curriculum, the student is eligible to take the certification examination to become a Certified Medical Assistant.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Selective Admission Criteria:

All applicants to the Nuclear Medicine Technology Program are required to attend an information session before the application deadline. For additional information, refer to the TCC website.

Application Criteria:

- *Hold a TCCD student Colleague number*
- *Must meet with the CTE advisor*
- *Currently have a minimum GPA of 2.5*
- *Successfully complete the HESI A2 entrance exam with a minimum score of 70 in each section, IELTS 6.5 minimum score, or TOEFL iBT test 83 minimum score for ESL Students*

Prior to application, students with international college credits must contact International Student Admissions and Compliance at 817-515-1570 to verify those courses that will transfer to TCCD. Once admitted to the program, students must maintain a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative in order to remain in the program. Required immunizations must be completed prior to the beginning of classes.

After satisfactory completion of the above curriculum, the student is eligible to take the national examination to become certified as a Registered Nuclear Medicine Technologist (NM) with the A.R.R.T. and/or the N.M.T.C.B.

The Tarrant County College Nuclear Medicine Technology program is accredited by the Joint Review Committee on Educational Programs, 2000 N. Danforth Rd, Suite 130 #203, Edmond, OK, 73003, Tel: 405-285-0546, Fax: 405-285-0579, Email: jrcnmt@coxinet.net.

Credit-By-Examination may be earned for RNSG 1413, RNSG 1360, and RNSG 1105 by LVNs, Military Medics, and Paramedics. Summer entry. Complete details of the Fast Track Option are provided on the TCC website. The Fast Track Option course sequence in the first term may vary for the spring entry.

Fall/Spring entry generic.

All semesters are consecutive.

Students are strongly urged to complete all general education requirements prior to entering the program.

Testing fees are assessed for all nursing theory courses.

Selective Admission Criteria:

Requirements for Applicants:

- *All Biology courses (BIOL 2401, BIOL 2402, and BIOL 2420) must have been completed prior to application to the Nursing Program.*
- *Completion of all courses required for the program with a grade of "C" or better.*
- *Completion of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) is required if their native/first language is not English.*

Admission Criteria:

- *A grade of C or better on the required courses: BIOL 2401, BIOL 2402, and BIOL 2420.*
- *HESI A2 (75% or higher on Reading, Vocabulary, Grammar, Anatomy & Physiology, and Math) score on a standardized admission test.*

Complete details of the nursing admissions process can be found on the TCC website.

Additional Requirements for Transfer Student Applicants:

- *Admission to Tarrant County College*
- *Letter of good standing from the dean or director of the previously attended nursing program*
- *Copy of official transcript(s)*
- *Completion of tests for the clinical component of the program (DFWHC Orientation, HIPAA, TCC Nursing Student Handbook Examination, Dosage Calculation Examination) with passing scores*

Some transfer students may be required to audit RNSG 1105 - Nursing Skills I.

Requirements for Students Admitted to the Nursing Program:

- *Negative drug screen*
- *Background checks*
- *Proof of medical insurance*
- *Current healthcare provider CPR course (approved by the American Heart Association)*
- *Social Security card*
- *Participation in Nursing Program Orientation*
- *Current immunizations for the duration of the program*
- *Completion of all courses required for the program with a grade of "C" or better*
- *Completion of English Proficiency, if required*

Applicants with a history of criminal charges, mental illness, or chemical dependency must request a Declaratory Order from the Texas Board of Nursing to determine eligibility for licensure prior to admission to the Nursing Program.

Any student admitted to the Nursing Program must meet the legal requirements for licensure by the Texas Board of Nursing. Upon successful completion of the program, the student is eligible to take the National Council Licensing Examination (NCLEX) for registered nurses.

The TCC Nursing Program is approved by the Texas Board of Nursing, https://www.bon.texas.gov, and accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326, www.acenursing.org.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Completion Requirement

General Education Courses

Fulfill ALL of the following requirements:

The following general education course must be completed prior to applying to the LVN program

Complete ALL of the following Courses:
- BIOL 2401 - Anatomy and Physiology I (Lecture/Lab)

AND

The following general education course must be completed prior to the second semester of the LVN program

Complete ALL of the following Courses:
- PSYC 2301 - General Psychology

Students are strongly urged to complete this course prior to entering the program.

First Year
Type
Completion Requirement

Term I

- Meet with your Career Advisor

Complete ALL of the following Courses:
- VNSG 1304 - Foundations of Nursing
- VNSG 1323 - Basic Nursing Skills
- VNSG 1360 - Clinical-Licenses Practical/Voc Nurse
- VNSG 1116 - Nutrition

Term II

- Meet with your Career Advisor

Complete ALL of the following Courses:
- VNSG 1429 - Medical-Surgical Nursing I
- VNSG 1461 - Clinical-Licensed Practical/Vocational
- VNSG 1331 - Pharmacology
- VNSG 1301 - Mental Health and Mental Illness

Term III

- Meet with your Career Advisor

Complete ALL of the following Courses:
- VNSG 1432 - Medical-Surgical Nursing II
- VNSG 1234 - Pediatrics
- VNSG 1230 - Maternal-Neonatal Nursing
- VNSG 1219 - Leadership and Professional Development
- VNSG 1462 - Clinical-Licensed Practical/Vocational

- Apply for Graduation

Total Semester Hours
45

Credit Examination may be earned for VNSG 1360 by CNAs. Complete details of the CNA to LVN option are provided on the TCC website.

Special Admission Criteria:

Requirements for Applicants:

- *The Biology class (BIOL 2401) must have been completed prior to application to the VN Program.*
- *Completion of all courses required for the program with a grade of C or better.*
- *Completion of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) is required if their native/first language is not English.*

For complete details regarding the VN program, refer to the TCC website.

Admission Criteria:

- *A grade of C or better on the required course: BIOL 2401.*
- *HESI A2 (75% or higher on Reading, Vocabulary, Grammar, Anatomy and Physiology, and Math) score on a standardized admission test.*

Additional Requirements for Transfer Student Applicants:

- *Admission to Tarrant County College.*
- *Letter of good standing from the Dean or Director of the previously attended nursing program.*
- *Copy of official transcript(s).*
- *Completion of tests for the clinical component of the program (DFWHC Orientation, HIPAA, TCC Nursing Student Handbook Examination, Dosage Calculation Examination) with passing scores.*

Admitted to the VN Nursing Program:

- *Negative drug screen*
- *Background checks*
- *Proof of medical insurance*
- *Current healthcare provider CPR course (approved by the American Heart Association)*
- *Social Security card*
- *Participation in a VN Program Orientation*
- *Current immunizations for the duration of the program*

- *Completion of all courses required for the program with a grade of C or better*
- *Completion of English Proficiency, if required*

Applicants with a history of criminal charges, mental illness, or chemical dependency must request a Declaratory Order from the Texas Board of Nursing to determine eligibility for licensure prior to admission to the Vocational Nursing Program.

Any student admitted to the Vocational Nursing Program must meet the legal requirements for licensure by the Texas Board of Nursing. Upon successful completion of the program, the student is eligible to take the National Council Licensing Examination (NCLEX).

CNA to VN Option:

The CNA to VN Option is a program for certified nursing assistants.

Eligible requirements for the option include:

- *Acceptance into the VN program*
- *Current certification as a CNA*

Credit-by-Exam:

Credit for the following courses can be earned through the credit-by-exam process:

- *VNSG 1360 - Clinical-Licensed Practical/Vocational Nurse Training*

- PTHA 2360 - Clinical - Physical Therapist Asstant

Spring Term

- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- PTHA 2239 - Professional Issues
- PTHA 2361 - Clinical - Physical Therapist Asstant
- PTHA 2363 - Clinical - Physical Therapist Assistant

AND

Complete one course from the option below

Complete ALL of the following Course Sets:
- Creative Arts or Language, Culture and Philosophy (3 Semester Credit Hours)

- Apply for Graduation

Total Semester Hours
66

Selective Admission Criteria:

All applicants to the Physical Therapist Assistant Program are required to attend an information session before the application deadline. Complete details of the Physical Therapist Assistant program admission process may be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *Currently have a minimum GPA of 2.5*
- *Successfully complete the HESI A2 Entrance Exam with a minimum score of 70 in each section*
- *IELTS 6.5 minimum score or TOEFL iBT test with 83 as the minimum score for ESL students*

This program is a selective admission offering.

Prior to application, students with international college credits must contact International Student Admissions and Compliance at 817-515-1570 to verify those courses that will transfer to TCCD.

Once admitted to the program, students must complete and earn a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and a criminal background check prior to the start of the program, both of which must report negative in order to remain in the program. Required immunizations must be completed prior to the beginning of classes.

After successful completion of the above curriculum, the student is eligible to take the national examination to become certified as a Registered Physical Therapy Assistant (PTA).

The program is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE), Department of Accreditation, APTA, 1111 N. Fairfax Street, Alexandria, Virginia 22314.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

- Apply for Graduation

Total Semester Hours
66

Selective Admission Criteria:

All applicants to the Respiratory Care Program are required to attend an information session before the application deadline. Complete details of the Respiratory Care program admissions process may be found on the TCC website.

Application Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *Currently have a minimum GPA of 2.5*
- *Successfully complete the HESI A2 Entrance Exam with a minimum score of 70 in each section*
- *IELTS 6.5 minimum score or TOEFL iBT test with 83 as a minimum score for ESL students*

Prior to application, students with international college credits must contact International Student Admissions and Compliance at 817-515-1570.

Once admitted to the program, students must maintain a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative in order to remain in the program. Required immunizations must be completed prior to the beginning of classes.

After successful completion of the above curriculum, the student meets the academic requirements to take the necessary examinations to become a registered Respiratory Therapist through the National Board for Respiratory Care and the Texas Department of State Health Services.

The program is accredited by the Commission on Accreditation for Respiratory Care (CoARC), 1248 Harwood Road, Bedford, Texas 76021-4244.

Professional Licensure Disclosure:

The respiratory care program at Tarrant County College (TCC) meets the licensure requirements in all states except Alaska. Licensure requirements have not been determined in Alaska because licensure is not currently regulated. Use the link below to find information on the state or U.S. territory in which you intend to be licensed in order to identify whether TCC's Respiratory Care program meets, does not meet, or if it has not been determined if it meets the educational requirements for licensure. If TCC's program has not determined if it meets the educational requirements for licensure in the state in question, it may satisfy all or a portion of the academic requirements. If that is the case, we recommend contacting the licensing agency directly before beginning the program.

A list of state agencies and contact information can be found at this link: https://www.aarc.org/advocacy/state-society-resources/state-licensure-contacts/

For more information, please contact Don Holt, donald.holt@tccd.edu.

Complete ALL of the following Courses:
- SLNG 2431 - Interpreting III
- SLNG 1350 - Sign-to-Voice
- SLNG 2288 - Internship-Sign Language Interpretation

AND

Complete one course from the option below

Complete ALL of the following Course Sets:
- Mathematics or Life and Physical Sciences (3 Semester Credit Hours)

Term V
- Meet with your Career Advisor

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:
- SLNG 2436 - Interpreting IV
- SLNG 2267 - Practicum II
- SLNG 2303 - Transliterating

AND

Complete one course from the option below

Complete ALL of the following Course Sets:
- Creative Arts or Language, Culture and Philosophy (3 Semester Credit Hours)

- Apply for Graduation

Total Semester Hours
65

Selective Admission Criteria:

A selection committee reviews applications and selects applicants who best meet the following criteria:

- *Prior to admission to Interpreting II, students must have successfully completed ASL I, II, III, and IV, as well as Composition I, with a GPA of 3.0.*
- *Students must demonstrate language fluency and proficiency in both English and American Sign Language.*
- *Recommendations by American Sign Language instructors and/or Deaf Community members will be required.*

Students who are selected for admission into interpreting specialized courses must complete and earn a minimum grade of "C" for each specialized course and Composition I.

After satisfactory completion of specialized courses in the Sign Language Interpreting Program, the student is prepared to take the state basic certification exam administered by the Board of Evaluators of Interpreters for the Deaf

Students seeking certification through the Board of Evaluators of Interpreters for the Deaf must meet the following requirements set forth by the Texas Department of Assistive and Rehabilitative Services:

1) Pass a criminal background check.
2) Complete 30 hours of college credit to take the Test of English Proficiency; and
3) Complete a minimum of 60 hours of college credit to take the Basic performance test.

Texas Success Initiative (TSI) Requirement for Career and Technical Education (CTE) Programs
All students enrolled in an Associate of Applied Science (AAS) or Level 2 certificate program must meet the requirements of the Texas Success Initiative (TSI). Additional TSI information can be found on Texas Success Initiative (TSI) and the Texas Success Initiative - Texas Higher Education Coordinating Board website.

Licensing Notice: (HB 1508)
This program prepares a student for an occupational license. However, the student may not be eligible for licensing if they have a prior criminal history. For more details, see House Bill 1508 Licensing Requirements.

Term II

- Meet with your Career Advisor

Complete ALL of the following Courses:
- HPRS 1561 - Clinical-Health Services/Allied Health

- Apply for Graduation

Total Semester Hours
16

Selective Admission Criteria:

All applicants to the Central Sterile Processing Program are required to attend an information session before the application deadline. Complete details of the Central Sterile Processing program admissions process may be found on the TCC website.

Applicant Criteria:

- *Hold a TCCD Student Colleague Number*
- *Must meet with the CTE advisor*
- *IELTS 6.5 minimum score or TOEFL iBT test with 83 as a minimum score for ESL students*

Prior to application, students with international college credits must contact the International Student Admissions and Compliance office at 817-515-1570 to verify those courses that will transfer to TCCD.

Once admitted to the program, students must maintain a minimum grade of "C" (75%) in all courses found within the degree plan.

Students who are selected for admission must perform and pass a drug screening and criminal background check, both of which must report negative in order to remain in the program. Required immunizations must be completed prior to the beginning of clinical rotations.

After successful completion of the above curriculum, the student is eligible to take the certification examination to become a Certified Central Sterile Processor.

- SRGT 2230 - Professional Readiness
- ENGL 1301 - Composition I

- Apply for Graduation

Total Semester Hours
60

Selective Admission Criteria:

This program is a selective admission offering. Application information may be found on the TCC website.

- *All applicants to the Surgical Technology Program must attend an information session before the application deadline.*
- *Students who are selected for admission must undergo screening for substances of abuse and a criminal background check prior to the start of clinical rotations.*
- *International students must contact the International Student Admissions and Compliance office at 817-515-1570.*
- *Once admitted to the program, students must complete and earn a minimum grade of C in each specialized course. Most/all of the specialized courses are taught only during the day.*
- *After successful completion of the above curriculum, the student is eligible to take the certification examination to become a Certified Surgical Technologist through the Association of Surgical Technologists.*

The Tarrant County College Surgical Technology Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756. Phone 727-210-2350.

End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of trade terminology (1a, 1b, 2c).
2. Demonstrate an understanding of employment opportunities (1a, 1b, 2c).
3. Demonstrate an understanding of accepted salary range and benefits in the refinishing industry (1a, 1b, 2c).
4. Demonstrate an understanding of original equipment manufacturer (OEM) trends and innovations (1a, 1b, 2c).
5. Demonstrate an understanding of Occupational Safety and Health Act (OSHA) regulations by:
    a. explaining paint shop safety;
    b. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive refinish shop by:
    a. identifying hazardous waste;
    b. explaining accepted hazardous waste disposal procedures;
    c. explaining relevant EPA regulations.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform basic metal straightening procedures; utilize basic body shop hand tools and plastic filler application techniques; and apply personal and environmental safety practices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of collision shop organization by
    a. demonstrating proper use and maintenance of hand tools, power tools, and compressed air systems (1a, 1b, 1c, 2a, 2e).
2. Demonstrate an understanding of frame and unitized vehicles by
    a. describing frame and unitized construction and components (1a, 1b, 1c, 2a, 2e);
    b. performing scratch, nick, ding, and rust repairs (1b, 1c, 2a, 2e);
    c. demonstrating the ability to mix and apply various types of body fillers (1b, 1c, 2a, 2e).
3. Demonstrate an understanding of automobile sheet metal characteristics by
    a. defining physical changes of high strength steel (1a, 1b, 1c, 2a, 2e);
    b. defining different types of sheet metal damage (1a, 1b, 1c, 2a, 2e);
    c. identifying types of mild and high strength steel (1b, 1c, 2a, 2e);
    d. demonstrating sheet metal straightening techniques (1b, 1c, 2a, 2e).
4. Demonstrate an understanding of original equipment manufacturer (OEM) trends and innovations (1b, 1c, 2a, 2e).
5. Demonstrate an understanding of Occupational Safety and Health Act (OSHA) regulations by
    a. explaining shop safety (1b, 1c, 2a, 2e);
    b. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive repair shop by
    a. identifying hazardous waste (1b, 1c, 2a, 2e);
    b. explaining accepted hazardous waste disposal procedures (1b, 1c, 2a, 2e);
    c. explaining relevant EPA regulations (1b, 1c, 2a, 2e).

    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive repair shop by
    a. identifying hazardous waste (1b, 1c, 2a, 2e);
    b. explaining accepted hazardous waste disposal procedures (1b, 1c, 2a, 2e);
    c. explaining relevant EPA regulations (1b, 1c, 2a, 2e).

ABDR 1555 - Non-Structural Metal Repair

General

Course Rubric	Course Number	Course Title
ABDR	1555	Non-Structural Metal Repair
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
5	3	6

Course Classification
Workforce Education Course Manual (WECM)

Description
(5-3-6) Demonstrate sheet metal repair skills using mechanical and hydraulic equipment. Emphasis on attachment devices used to straighten and align exterior body panels. Required Prerequisite: ABDR 1519

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

take abdr-1519;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ABDR 1519

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform rough-out contours of damaged panels; perform metal repair procedure; apply personal and environmental safety practices; and demonstrate use of hand and power tools.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of corrosion problems by
    a. defining common corrosion factors (1a, 1b, 1c, 2a, 2e);
    b. outlining corrosion treatment procedures (1a, 1b, 1c, 2a, 2e);
    c. applying anticorrosion materials including seam sealers, splatter guard, and undercoating (1a, 1b, 1c, 2a, 2e).
2. Demonstrate an understanding of nonstructural components by
    a. removing damaged nonstructural components (1b, 1c, 2a, 2e);
    b. replacing nonstructural components (1b, 1c, 2a, 2e);
    c. aligning nonstructural components (1b, 1c, 2a, 2e).
3. Demonstrate an understanding of servicing nonstructural component parts by
    a. demonstrating installation and adjustment of door window glass (1a, 1b, 1c, 2a, 2e);
    b. explaining windshield removing procedures (1a, 1b, 1c, 2a, 2e);
    c. installing moldings and body accessories including bumpers, lights, grills, and ground effects (1a, 1b, 1c, 2a, 2e).
4. Demonstrate an understanding of automotive plastics by
    a. repairing different types of automotive plastics (1a, 1b, 1c, 2a, 2e);
    b. performing plastic identification and minor adhesive repair techniques (1b, 1c, 2a, 2e);
    c. performing fiberglass and sheet molded compound (SMC) repairs (1b, 1c, 2a, 2e).
5. Demonstrate an understanding of Occupational Safety and Health Act (OSHA) regulations by
    a. explaining shop safety (1b, 1c, 2a, 2e);
    b. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive repair shop by
    a. identifying hazardous waste (1b, 1c, 2a, 2e);
    b. explaining hazardous waste disposal procedures (1b, 1c, 2a, 2e);
    c. explaining relevant EPA regulations (1b, 1c, 2a, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ABDR 2437

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify mechanical or electrical system damage; repair, replace, and/or service damaged mechanical or electrical components.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of power train components of a vehicle by
    a. demonstrating the ability to define, inspect, and repair or replace power train components (1a, 1b, 1c, 2a, 2c, 2e);
    b. demonstrating the ability to define, inspect, and repair or replace suspension and steering system components (1a, 1b, 1c, 2a, 2c, 2e);
    c. defining steering problems camber, caster, toe, scrub radius, and turning radius (1a, 1b, 1c, 2a, 2c, 2e).
2. Demonstrate an understanding of mechanical components other than power train by
    a. demonstrating the ability to define, inspect, and repair or replace cooling system components (1a, 1b, 1c, 2a, 2e);
    b. demonstrating the ability to define, inspect, and repair or replace air conditioning components (1a, 1b, 1c, 2a, 2e);
    c. demonstrating the ability to define, inspect, and repair or replace brake system components (1a, 1b, 1c, 2a, 2e);
    d. demonstrating the ability to define, inspect, and repair or replace emission system components (1a, 1b, 1c, 2a, 2e);
    e. demonstrating the ability to define, inspect, and repair or replace exhaust system components (1a, 1b, 1c, 2a, 2e).
3. Demonstrate an understanding of electrical components of a vehicle by
    a. demonstrating the ability to define, inspect, and repair or replace electrical components (1a, 1b, 1c, 2a, 2e);
    b. interpreting electrical diagrams (1a, 1b, 1c, 2a, 2e).
4. Demonstrate awareness of the restraint system of a vehicle by
    a. defining components of a restraint system (1a, 1b, 1c, 2a, 2e);
    b. demonstrating the ability to inspect and replace components of a restraint system (1a, 1b, 1c, 2a, 2e).
5. Demonstrate an understanding of Occupational Safety and Health Act (OSHA) regulations by
    a. explaining shop safety (1b, 1c, 2a, 2e);
    b. explaining the practices necessary to insure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive repair shop by
    a. identifying hazardous waste (1a, 1b, 2a, 2c, 2e);
    b. explaining accepted hazardous waste disposal procedures (1a, 1b, 2a, 2c, 2e);
    c. explaining relevant EPA regulations (1a, 1b, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze structural damage using proper equipment; perform structural repairs; and correct primary and secondary damage through the use of properly applied pulling and anchoring techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of vehicle damage analysis by
    a. explaining components of an estimate (1a, 1b, 1c, 2a, 2e);
    b. writing an estimate of damage repair (1a, 1b, 1c, 2a, 2e);
    c. analyzing damage using measuring techniques (1a, 1b, 1c, 2a, 2c, 2e);
    d. applying measuring techniques in vehicle repair (1a, 1b, 1c, 2a, 2c, 2e).
2. Demonstrate an understanding of structural components by
    a. removing damaged structural components (1b, 1c, 2a, 2c, 2e);
    b. distinguishing sectioning procedures on structural components (1b, 1c, 2a, 2c, 2e).
3. Demonstrate an understanding of straightening procedures by
    a. demonstrating proper tie down techniques on frame vehicles and unitized vehicles (1a, 1b, 1c, 2a, 2e);
    b. demonstrating proper pulling techniques on frame and unitized vehicles (1b, 1c, 2a, 2c, 2e).
4. Demonstrate an understanding of corrosion protection by
    a. demonstrating proper anticorrosion techniques on structural components (1b, 1c, 2a, 2e).
5. Demonstrate an understanding of Occupational Safety and Health Act (OSHA) regulations by
    a. explaining shop safety (1b, 1c, 2a, 2e);
    b. explaining the practices necessary to insure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);

c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

6. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive repair shop by

a. identifying hazardous waste (1a, 1b, 2c, 2e);

b. explaining accepted hazardous waste disposal procedures (1a, 1b, 2c, 2e);

c. explaining relevant EPA regulations (1a, 1b, 2c, 2e).

Required Prerequisite(s): ABDR 1558

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Mix and spray multi-stage paint systems; analyze paint problems and their prevention and solutions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of color matching, analyzing color, and adjusting color by

a. defining color match, paint texture, gloss, and metamerism (1a, 1b, 1c, 2a, 2e);

b. defining hue, value, and chroma (1a, 1b, 1c, 2a, 2e);

c. developing color recognition skills (1a, 1b, 1c, 2a, 2e);

d. analyzing paint formulas (1a, 1b, 1c, 2a, 2c, 2e);

e. demonstrating tinting procedures (1a, 1b, 1c, 2a, 2e);

f. demonstrating adjusting color with gun adjustment (1a, 1b, 1c, 2a, 2e).

2. Demonstrate an understanding of proper refinishing procedures by

a. selecting the proper refinishing system (1a, 1b, 1c, 2a, 2e);

b. describing a complete and sectional panel repair (1a, 1b, 1c, 2a, 2e);

c. demonstrating panel and spot spraying (blending) techniques (1a, 1b, 1c, 2a, 2e);

d. demonstrating brush touchup (1a, 1b, 1c, 2a, 2e);

e. describing natural break lines (1a, 1b, 1c, 2a, 2e);

f. describing reverse masking (1a, 1b, 1c, 2a, 2e);

g. explaining two gun method of blending paint (1a, 1b, 1c, 2a, 2e).

3. Demonstrate an understanding of OSHA regulations by

a. explaining paint shop safety (1b, 1c, 2a, 2e);

b. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);

c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

4. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive refinish shop by

a. identifying hazardous waste (1a, 1b, 2c, 2e);

b. explaining accepted hazardous waste disposal procedures (1a, 1b, 2c, 2e);

c. explaining relevant EPA regulations (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Refinish plastics, fiberglass, aluminum, and galvanized panels; and perform lay out design and spray custom graphics.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of refinishing interior plastics by
    a. identifying interior trim codes (1a, 1b, 1c, 2a, 2e);
    b. demonstrating the ability to prepare and refinish interior plastics (1a, 1b, 1c, 2a, 2e);
    c. demonstrating the ability to formulate, describe, and mix semigloss paints using flattening compounds (1a, 1b, 1c, 2a, 2e);
    d. adjusting spray for interior finishes (1a, 1b, 1c, 2a, 2c, 2e).
2. Demonstrate an understanding of repair or replacement of flexible plastic parts by
    a. demonstrating the ability to identify plastic and determine proper repair procedure (1a, 1b, 1c, 2a, 2c, 2e);
    b. demonstrating the ability to adjust spray gun and apply adhesion promoters and essential primers (1a, 1b, 1c, 2a, 2e);
    c. demonstrating the ability to select and apply proper repair products (1a, 1b, 1c, 2a, 2c, 2e).
3. Demonstrate an understanding of spraying vinyl plastics and repairing automotive vinyl tops by
    a. demonstrating the ability to explain and perform proper vinyl cleaning procedures (1a, 1b, 1c, 2a, 2e);
    b. demonstrating vinyl repair procedures (1a, 1b, 1c, 2a, 2e);
    c. adjusting spray gun for vinyl finishes (1a, 1b, 1c, 2a, 2e);
    d. performing automotive vinyl refinishing procedure (1a, 1b, 1c, 2a, 2c, 2e);
    e. explaining vinyl top replacement (1a, 1b, 1c, 2a, 2e).
4. Demonstrate an understanding of proper refinishing of anticorrosion panels and aluminum panels (1a, 1b, 1c, 2a, 2e).
5. Demonstrate an understanding of adjusting spray gun and application of splatter finishes (1a, 1b, 1c, 2a, 2e).
6. Demonstrate an understanding of OSHA regulations by
    a. explaining paint shop safety (1b, 1c, 2a, 2e);
    b. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    c. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
7. Demonstrate an understanding of EPA regulations governing emissions and hazardous waste disposal from an automotive refinish shop by
    a. identifying hazardous waste (1a, 1b, 2a, 2c);
    b. explaining accepted hazardous waste disposal procedures (1a, 1b, 2a, 2c);
    c. explaining relevant EPA regulations (1a, 1b, 2a, 2c).

Academic Course Guide Manual (ACGM)

Description
(3-3-0) This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations. Students will examine the procedures and systems to accumulate, analyze, measure, and record financial transactions. Students will use recorded financial information to prepare a balance sheet, income statement, statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of operations and financial position to users of financial information who are external to the company. Students will study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for purposes of making decisions about the company. Students will be exposed to International Financial Reporting Standards (IFRS). Recommended Corequisite: MATH-1324

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-1) A study of analyzing, classifying, and recording business transactions in a manual and computerized environment. Emphasis on understanding the complete accounting cycle and preparing financial statements, bank reconciliations, and payroll. For non-accounting majors.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define accounting terminology; analyze and record business transactions in a manual and computerized environment; complete the accounting cycle; prepare financial statements; apply accounting concepts related to cash and payroll; prepare bank reconciliations; and correct accounting errors.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. The student will demonstrate an understanding of accounting concepts and procedures, recording of business transactions, and the beginning of the accounting cycle by
    a. demonstrating the ability to define, list, and record transactions in the basic accounting equation (1a, 1b);
    b. expanding the basic accounting equation (1a, 1b);
    c. preparing an income statement, statement of owner's equity, and a balance sheet (1a, 2a, 2b, 2c);
    d. demonstrating the ability to organize a chart of accounts, record transactions, prepare trial balance sheet, and prepare financial statements from a trial balance (2a, 2b, 2c, 2d, 2e);
    e. demonstrating the ability to journalize, post, and prepare a trial balance (2a, 2b, 2c, 2d, 2e).
2. The student will perform worksheet transactions involved in completing the accounting cycle by
    a. demonstrating the ability to perform adjustments and prepare adjusted trial balance on the worksheet (1a, 1b);
    b. completing income statement and balance sheet (1a, 1b);
    c. preparing financial statements from worksheet (2b, 2c, 2d, 2e);
    d. demonstrating the ability to journalize and post adjusting entries and post-closing entries (2b, 2c, 2d, 2e);
    e. preparing a post-closing trial balance (2b, 2c, 2d, 2e);
    f. completing a two month comprehensive practice set including all concepts of the accounting cycle studied (1b, 2c, 2d).
3. The student will demonstrate an understanding of banking procedures and the payroll process by
    a. demonstrating the ability to deposit, write, and endorse checks for checking account and reconcile a bank statement (1c, 2b);
    b. demonstrating the ability to establish and replenish a petty cash fund (1c, 2b);
    c. demonstrating the ability to calculate gross pay, employee payroll tax deductions, and employer taxes, and to complete payroll register (1a, 1c, 2c, 2d, 2e).
4. The student will complete specialized worksheet transactions for a merchandise company by
    a. preparing a schedule of accounts receivable (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. preparing a schedule of accounts payable (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. preparing a worksheet for a merchandise company (1a, 1b, 1c, 2a, 2d, 2e);
    d. preparing financial statements, record adjusting, and closing entries (1a, 1b, 1c, 2a, 2d, 2e);
    e. preparing post-closing trial balance and complete reversing entries (1a, 1b, 1c, 2a, 2d, 2e).

10
A Requirement block where all subrequirements are required

Take ACCT-2301;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s) or Corequisite(s): ACCT 2301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize an application software to perform accounting tasks; maintain records; prepare reports; analyze reports for a business entity; complete a comprehensive project; and explain the components of general ledger software.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of accounting theories and concepts involving creating a company using the general ledger package by
    a. managing a chart of accounts for a service and merchandising company, including preparation and maintenance (1a, 1b, 2a, 2c, 2d);
    b. preparing appropriate information for processing customer, vendor, and inventory information (1a, 1b, 2a, 2c, 2d);
    c. journalizing transactions using the rules of debits and credits (1a, 1b, 2a, 2c, 2d);
    d. managing company files, including backup and restoring (1a, 1b, 2a, 2c, 2d);
    e. managing adjusting entries, including identification and journalizing (1a, 1b, 2a, 2c, 2d).
2. Demonstrate an understanding of accounting theories and concepts involving banking activities by
    a. preparing checks utilizing the general ledger package (1a, 1b, 2a, 2c, 2d);
    b. preparing a bank reconciliation (1a, 1b, 2a, 2c, 2d);
    c. journalizing transactions affecting cash (1a, 1b, 2a, 2c, 2d).
3. Demonstrate an understanding of accounting theories and concepts involving sales to customers by
    a. recording cash and credit sales to customers (1a, 1b, 2a, 2c, 2d);
    b. preparing the necessary information to maintain customer subsidiary ledgers (1a, 1b, 2a, 2c, 2d);
    c. preparing and maintaining the necessary information to report customer data and/or analysis (1a, 1b, 2a, 2c, 2d);
    d. recording receipts from customers on their accounts (1a, 1b, 2a, 2c, 2d);
    e. preparing the appropriate reports for analyzing accounts receivable (1a, 1b, 2a, 2c, 2d).
4. Demonstrate an understanding of accounting theories and concepts involving vendors, purchases, and inventory by
    a. managing information necessary to process the vendor subsidiary ledger, including preparation and maintenance (1a, 1b, 2a, 2c, 2d);
    b. creating purchase orders (1a, 1b, 2a, 2c, 2d);
    c. managing information necessary to process the inventory subsidiary ledger, including preparation and maintenance (1a, 1b, 2a, 2c, 2d);
    d. recording receipt of merchandise order using purchase orders (1a, 1b, 2a,

2c, 2d);

e. recording receipt of bills from vendors (1a, 1b, 2a, 2c, 2d);

f. paying vendor bills (1a, 1b, 2a, 2c, 2d);

g. preparing physical inventory records (1a, 1b, 2a, 2c, 2d);

h. recording sales tax (1a, 1b, 2a, 2c, 2d);

i. paying sales tax (1a, 1b, 2a, 2c, 2d);

j. preparing the appropriate reports for accounts payable (1a, 1b, 2a, 2c, 2d).

5. Demonstrate an understanding of accounting theories and concepts involving employees and payroll by

a. managing appropriate employee records for processing of payroll, including preparation and maintenance of records and appropriate recognition of withholding allowances, Federal and State withholdings, and any other employee authorized withholdings (1a, 1b, 2a, 2c, 2d);

b. entering the appropriate hours for hourly employees (1a, 1b, 2a, 2c, 2d);

c. processing overtime pay appropriately (1a, 1b, 2a, 2c, 2d);

d. preparing Federal 941 (1a, 1b, 2a, 2c, 2d);

e. preparing W-2's (1a, 1b, 2a, 2c, 2d);

f. preparing the appropriate reports for payroll (1a, 1b, 2a, 2c, 2d).

6. Demonstrate an understanding of accounting theories and concepts involving reporting using the general ledger package by

a. preparing a balance sheet (1a, 1b, 2a, 2c, 2d);

b. preparing an income statement (1a, 1b, 2a, 2c, 2d);

c. preparing a statement of cash flows (1a, 1b, 2a, 2c, 2d);

d. preparing a trial balance (1a, 1b, 2a, 2c, 2d);

e. printing journals (1a, 1b, 2a, 2c, 2d).

7. Demonstrate an understanding of fundamental concepts and applications of the software package by

a. completing a comprehensive project or practice set, using appropriate general ledger techniques and methods, that includes either a written or oral presentation to demonstrate understanding of the course learning outcomes (1a, 1b, 2a, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize spreadsheet and/or database software for accounting and management applications; and complete a comprehensive project.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of fundamental concepts involving spreadsheets by

a. identifying the components of the spreadsheet (1a, 1b, 2a, 2c, 2d);

b. navigating between cells, columns, rows, and worksheets (1a, 1b, 2a, 2c, 2d);

c. entering data into a spreadsheet (1a, 1b, 2a, 2c, 2d);

d. arranging data on a spreadsheet (1a, 1b, 2a, 2c, 2d);

e. modifying data presented in a spreadsheet (1a, 1b, 2a, 2c, 2d).

2. Demonstrate an understanding of fundamental concepts involving financial data reporting by

a. manipulating columns, rows, cells, and cell ranges (1a, 1b, 2a, 2c, 2d);

b. constructing formulas using absolute and relative values (1a, 1b, 2a, 2c, 2d);

c. creating complex formulas (1a, 1b, 2a, 2c, 2d);

d. comprehending the syntax of analytical functions (1a, 1b, 2a, 2c, 2d);

e. applying analytical functions to financial data (1a, 1b, 2a, 2c, 2d);

f. analyzing spreadsheets to ensure accuracy (1a, 1b, 2a, 2c, 2d).

3. Demonstrate an understanding of techniques involving advanced analytical functions by

a. preparing logical functions (1a, 1b, 2a, 2c, 2d);

b. evaluating single and multiple conditions (1a, 1b, 2a, 2c, 2d);

c. identifying the elements of lookup tables (1a, 1b, 2a, 2c, 2d).

4. Demonstrate an understanding of fundamental concepts involving analytical charts by

a. comparing chart types (1a, 1b, 2a, 2c, 2d);

b. analyzing data from appropriate charts and tables and identifying chart elements (1a, 1b, 2a, 2c, 2d);

c. modifying chart data (1a, 1b, 2a, 2c, 2d).

5. Demonstrate an understanding of tables, pivot tables, and pivot charts by

a. creating a structured spreadsheet (1a, 1b, 2a, 2c, 2d);

b. manipulating records in a table (1a, 1b, 2a, 2c, 2d);

c. creating a pivot table and chart (1a, 1b, 2a, 2c, 2d);

d. modifying a pivot table and chart (1a, 1b, 2a, 2c, 2d).

6. Demonstrate an understanding of software product integration by
    a. linking worksheets or workbooks (1a, 1b, 2a, 2c, 2d);
    b. summarizing data from linked worksheets (1a, 1b, 2a, 2c, 2d);
    c. open text files (1a, 1b, 2a, 2c, 2d);
    d. exporting data from various software products (access, internet, or text files) (1a, 1b, 2a, 2c, 2d);
    e. importing data from various software products (access, internet, or text files) (1a, 1b, 2a, 2c, 2d).

7. Demonstrate an understanding of fundamental concepts involving spreadsheet techniques by
    a. completing a comprehensive project or analysis of a financial concept that includes either a written or oral presentation to demonstrate understanding of the course learning outcomes (1a, 1b, 2a, 2c, 2d).

8. Initiate a professional portfolio by
    a. producing an initial work sample including course comprehensive project (1a, 1b, 1c, 2a, 2e);
    b. developing an error free resume (1a, 1b, 1c, 2a, 2e).

(SELECTED CRSES): Take 3 of the following courses...

Requirements
Required Corequisite(s): ACCT 2301 or ACNT 1303

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate employee payroll and employer-related taxes; prepare related tax forms; and manage payroll records required to reflect current laws and regulations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of federal and state laws and regulations affecting payroll and business tax accounting by
    a. identifying federal and state laws and regulations affecting payroll and business tax accounting (1a, 1b, 2c);
    b. utilizing federal and state laws and regulations in computing payroll (1a, 1b, 2a, 2c, 2d);
    c. identifying personnel records and reporting forms required by federal and state law (1a, 1b, 2a, 2c, 2d);
    d. completing personnel records required by federal and state law (1a, 1b, 2a, 2c, 2d);
    e. preparing federal and state reporting forms required by federal and state law (1a, 1b, 2a, 2c, 2d).

2. Demonstrate an understanding of computing earnings by
    a. computing wages and salaries utilizing various methods of compensating employees (1a, 1b, 2a, 2c);
    b. identifying records used for timekeeping (1a, 1b, 2a, 2c);
    c. computing employee work hours in compliance with federal and state law (1a, 1b, 2c).

3. Demonstrate an understanding of social security taxes by
    a. computing social security taxes in compliance with federal law (1a, 1b, 2c);
    b. preparing Federal Form 941 (1a, 1b, 2a, 2c);
    c. explaining the penalties for failure to comply with federal law relating to social security taxes (1a, 1b, 2c).

4. Demonstrate an understanding of federal and state laws relating to income tax withholding by
    a. identifying compensation that is subject to income tax withholding (1a, 1b, 2c);
    b. calculating federal and state income tax to be withheld in compliance with applicable law (1a, 1b, 2a, 2c);
    c. preparing and maintaining information for compliance with applicable law (1a, 1b, 2a, 2c);
    d. maintaining information for compliance with applicable law (1a, 1b, 2a, 2c);
    e. preparing W-2's (1a, 1b, 2a, 2c).

5. Demonstrate an understanding of federal and state unemployment compensation taxes by
    a. identifying compensation that is subject to unemployment taxes (1a, 1b, 2c);
    b. calculating unemployment taxes to be withheld in compliance with applicable law (1a, 1b, 2a, 2c);
    c. preparing necessary reporting forms for federal and state unemployment taxes (1a, 1b, 2a, 2c).
6. Demonstrate an understanding of accounting theories and concepts involving analyzing and journalizing payroll transactions by
    a. preparing journal entries to properly record payroll transaction (1a, 1b, 2a, 2c);
    b. preparing and maintaining employees' earnings records (1a, 1b, 2a, 2c);
    c. preparing proper accruals relating to payroll (1a, 1b, 2a, 2c).
7. Demonstrate an understanding of fundamental concepts and applications of payroll accounting by
    a. completing a comprehensive project or practice set using appropriate techniques and methods and including either a written or oral presentation (1a, 1b, 2a, 2c).

Requirements
Required Prerequisite(s): ACCT 2302

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify objectives of financial accounting; define generally accepted accounting principles; prepare and analyze financial statements; and analyze complex transactions affecting asset accounts.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of financial accounting and accounting standards by
    a. identifying the major financial statements and other means of financial reporting (1a, 1b, 2c);
    b. identifying and describing the objectives of financial reporting (1a, 1b, 2c);
    c. explaining the meaning of Generally Accepted Accounting Principles (GAAP) (1a, 1b, 2c);
    d. identifying the basic elements of financial statements (1a, 1b, 2c);
    e. describing the basic assumptions and principles of accounting and the constraints on reporting accounting information (1a, 1b, 2c).
2. Complete the sequential steps and procedures in the accounting cycle under Generally Accepted Accounting Principles by
    a. identifying steps in the accounting cycle (1a, 1b, 2c);
    b. journalizing financial transactions using the rules of double entry accounting (1a, 1b, 2c);
    c. recording transaction in journals, posing to ledger accounts, and preparing a trial balance (1a, 1b, 2c);
    d. explaining the need for preparing adjusting entries (1a, 1b, 2c);
    e. journalizing adjusting entries (1a, 1b, 2c);
    f. preparing financial statements from the adjusted trial balance (1a, 1b, 2c);
    g. preparing closing entries (1a, 1b, 2c).
3. Demonstrate an understanding of accounting theories and concepts involving the receivables by
    a. defining receivables and identifying the different types of receivables (1a, 1b, 2c);
    b. explaining the accounting issues related to recognition of receivables (1a, 1b, 2c);
    c. explaining the accounting issues related to valuation of receivables (1a, 1b, 2c);
    d. describing how to report receivables (1a, 1b, 2c).
4. Demonstrate an understanding of accounting theories and concepts involving inventory by
    a. identifying the major classifications of inventory (1a, 1b, 2c);
    b. comparing the cost flow assumptions used to account for inventories (1a, 1b, 2c);
    c. computing cost of goods sold and ending inventory using each of the cost flow methods (1a, 1b, 2c);
    d. applying the lower of cost or market rule (1a, 1b, 2c);
    e. explaining how to report inventory (1a, 1b, 2c).
5. Demonstrate an understanding of accounting theories and concepts involving property, plant, and equipment assets by
    a. describing property, plant, equipment, and costs to include in initial valuation (1a, 1b, 2c);
    b. describing the accounting treatment for costs subsequent to acquisition (1a, 1b, 2c);
    c. explaining the concept of depreciation (1a, 1b, 2c);
    d. identifying the factors involved in the depreciation process (1a, 1b, 2c);
    e. computing depreciation using the different depreciation methods (1a, 1b, 2c);
    f. describing the accounting treatment for the disposal of property, plant, and equipment (1a, 1b, 2c);
    g. explaining how to report property, plant, and equipment (1a, 1b, 2c).
6. Demonstrate an understanding of accounting theories and concepts involving intangible assets by
    a. describing the characteristics of intangible assets (1a, 1b, 2c);
    b. identifying the costs to include in the initial valuation of intangible assets (1a, 1b, 2c);
    c. explaining the procedures of amortizing intangible assets (1a, 1b, 2c);
    d. explaining the conceptual issues related to goodwill (1a, 1b, 2c);
    e. describing the accounting procedures for goodwill (1a, 1b, 2c);
    f. explaining the accounting issues related to impairment of goodwill (1a, 1b, 2c);
    g. explaining how to report intangible assets (1a, 1b, 2c).
7. Demonstrate an understanding of accounting theories and concepts involving liabilities by
    a. describing the nature, type, and valuation of current liabilities (1a, 1b, 2c);
    b. identifying the various types of bond issues (1a, 1b, 2c);
    c. describing the accounting valuation of bonds at the date of issuance (1a, 1b, 2c);
    d. describing the accounting procedures for the extinguishment of debt (1a, 1b, 2c);
    e. identifying the criteria used to account for and disclose gain and loss contingencies (1a, 1b, 2c);
    f. explaining how to report liabilities and contingencies (1a, 1b, 2c).
8. Demonstrate an understanding of accounting theories and concepts involving stockholders' equity by
    a. identifying the components of stockholders' equity (1a, 1b, 2c);
    b. explaining the accounting and reporting for preferred stock (1a, 1b, 2c);
    c. explaining the accounting for the various forms of dividend distributions (1a, 1b, 2c);
    d. explaining how to report stockholders' equity (1a, 1b, 2c).
9. Demonstrate an understanding of the accounting theories and concepts involving investments by
    a. identifying the categories of debt securities and describing the accounting and reporting treatment of each category (1a, 1b, 2c);
    b. understanding the procedures for discount and premium amortization on bond investments (1a, 1b, 2c);
    c. identifying the categories of equity securities (1a, 1b, 2c);
    d. describing the accounting and reporting treatment for each category of equity securities (1a, 1b, 2c);
    e. explaining the equity method of accounting and comparing it to the fair value method for equity securities (1a, 1b, 2c);
    f. explaining how to report investments (1a, 1b, 2c).
10. Demonstrate an understanding of the significance of professional judgment and ethical conduct by
    a. discussing the impact of ethical behavior on the financial statements (1a, 1b, 2c);
    b. discussing the impact of unethical behavior on the financial statements (1a, 1b, 2c).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ACCT 2302

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply cost accounting concepts in manufacturing and service environments; and prepare report analysis for management decision making.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Use an appropriate accounting vocabulary by
    a. defining key cost accounting terms (1a, 1b, 2c);
    b. explaining the differences in cost behaviors (1a, 1b, 2c);
    c. identifying the component parts of the value chain of business functions (1a, 1b, 2c).
2. Identify the component parts of the financial statements for a manufacturer by
    a. differentiating between product costs and period costs (1a, 1b, 2a, 2c);
    b. identifying the three product cost elements (1a, 1b, 2c);
    c. preparing schedules of costs of goods manufactured and cost of goods sold in good form (1a, 1b, 2a, 2c);
    d. explaining the differences between financial statements of manufacturers and of merchandisers (1a, 1b, 2a, 2c);
    e. preparing variable costing and absorption costing financial statement (1a, 1b, 2a, 2c).
3. Demonstrate an understanding of process costing, job costing, and activity based costing by
    a. describing the physical flow of product costs in a cost system (1a, 1b, 2a, 2c);
    b. calculating product costs using process costing, job costing, and activity based costing (1a, 1b, 2a, 2c);
    c. computing equivalent units of production using both weighted average and first in, first out methods (1a, 1b, 2a, 2c);
    d. describing the accounting process for normal spoilage, abnormal spoilage, reworked units, and scrap (1a, 1b, 2a, 2c);
    e. preparing a production cost report with or without spoilage under both weighted average and first in, first out methods (1a, 1b, 2a, 2c).
4. Demonstrate an understanding of accounting theories and concepts involving standard costing by
    a. discussing the benefits and limitations of standard costing (1a, 1b, 2c);
    b. calculating variances applicable to a standard cost system (1a, 1b, 2a, 2c);
    c. identifying potential factors that may have a positive or negative effect on the variances (1a, 1b, 2a, 2c).
5. Allocate joint costs, service department costs, and common costs by
    a. explaining accounting procedures for joint products and byproducts (1a, 1b, 2a, 2c);
    b. allocating service department costs using the direct, step, and/or reciprocal methods (1a, 1b, 2a, 2c);
    c. allocating common costs (1a, 1b, 2a, 2c).

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A study of accounting information systems and related subsystems, including data collection, security, retrieval, manipulation, filtering, and sorting of data. This course provides basic knowledge of how accounting information systems (AIS) function in today's business environment. Other topics include the accounting cycle, general ledger, internal controls, ethics, data analytics, and emerging technologies. Required Prerequisites: ACCT-2302 ACNT-1311 ACNT-1313 BCIS-1305

16512

Course Rubric
ACNT

Course Number
2373

Course Title
Small Business Accounting

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Course will address advanced topics in small business accounting with an emphasis on the use of software and project-based learning. Students will review accounts payable processing, accounts receivable processing, payroll processing, prepare bank reconciliations, credit card reconciliations and other accounting tasks, such as preparing adjusting entries, financial statements, and closing entries. Required Pre-Requisites: ACNT-1311, ACNT-1313, ACNT-1329, ACCT-2302

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Required Pre-Requisite(s): ACNT-1311, ACNT-1313, ACNT-1329, ACCT-2302

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will:

1. Demonstrate accounts payable, accounts receivable and payroll processing. (C2, C5, C6, C8, C19, F1, F9)
2. Prepare a bank reconciliation for consecutive months. (C2, C5, C6, C8, C19, F1, F9)
3. Prepare credit card reconciliations. (C2, C5, C6, C8, C19, F1, F9)
4. Prepare, examine, or analyze accounting transactions, financial statements, tax returns, or other financial reports to assess accuracy, completeness, and conformance to reporting and procedural standards. (C2, C5, C6, C8, C19, F1, F9)
5. Demonstrate the use of the general journal, general ledger, special journals and subsidiary ledgers. (C2, C5, C6, C8, C19, F1, F9)
6. Use appropriate technology to solve real-world accounting and business problems. (C2, C5, C6, C7, C8, C18, C19; F8, F9, F12)
7. Demonstrate practical experience working with accounting information through project-based learning including both individual and team settings. (C2, C6, C7, C8, C9, C18, C19, F3, F4, F9, F10, F12)

AERM 1101 - Introduction to Aviation

General

Course Key

Course Rubric	Course Number	Course Title
AERM	1101	Introduction to Aviation
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
1	1	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0). An overview of aviation maintenance including the history of aviation, the mechanic's roles and duties, and nomenclature of aircraft and safety.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify important events and people in aviation; identify aircraft components; identify safety procedures; and list the responsibilities of an airframe and powerplant technician.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an awareness of aviation history by
    a. discussing mankind's historical interest in flight (1a, 1b);
    b. describing early aircraft designs (lighter than air/heavier than air) (1a, 1b);
    c. listing at least four pioneers in aviation history (must include Charles Taylor) (1a, 1b);
    d. identifying the driving forces that provided rapid advancement in aircraft design and performance (1a, 1b);
    e. describing aviation (aerospace) contributions to society (1a, 1b).
2. Demonstrate an understanding of basic aircraft aerodynamics by
    a. identifying exterior aircraft components (1a, 1b);
    b. explaining the basic science of flight (the physics of flight) (1a, 1b).
3. Demonstrate an understanding of the process of becoming a Federal Aviation Administration (FAA) Certificated Airframe and Powerplant rated, Aircraft Maintenance Technician (A&P) by
    a. discussing the aircraft maintenance technician's role, responsibilities, and opportunities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining the FAA required process to become an A&P (1a, 1b, 2a, 2c, 2e).
4. Demonstrate an understanding of the importance of safety awareness and safety practices within the aviation (aerospace) industry by
    a. identifying safety practices to be observed when in close proximity to operating aircraft on ramps, taxiways, or runways (1b, 2c, 2e);
    b. identifying shop (hangar) safety practices (general shop safety practices);
    c. identifying safety practices to be observed when working with aircraft in a shop environment (1b, 2c, 2e);
    d. identifying maintenance practices that reduce or eliminate damage to aircraft during maintenance activities (1b, 2c, 2e).

AERM 1141 - Wood, Fabric, and Finishes

General

Course Key
11012

Course Rubric	Course Number	Course Title
AERM	1141	Wood, Fabric, and Finishes
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
1	1	1

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-1). A course in the use and care of various covering materials, finishes, and wood structures including approved methods and procedures. Safety also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Service and repair wood structures; identify wood defects; inspect wood structures; select and apply fabric and fiberglass covering materials; inspect, test, and repair fabric and fiberglass; apply trim, letters, and touch-up paint; identify, select, and apply aircraft finishing materials; inspect finishes and identify defects; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe aircraft wood structures and aircraft fabric covering by
    a. identifying defects in wood samples (1a, 1b, 2c);
    b. identifying different kinds of woods used in aircraft structures (1a, 1b, 2c);
    c. explaining/discussing the inspection of aircraft wood structures (1a, 1b, 2c).
2. Describe the service and repair of aircraft wood structures by
    a. discussing the suitability of substitute materials (1a, 1b, 2c);
    b. describing the kinds of glues and gluing techniques (1a, 1b, 2c);
    c. reading drawings pertaining to repair of aircraft wood structures (1a, 1b, 2c);
    d. identifying protective finishes (1a, 1b, 2c).
3. Demonstrate the ability to select and apply aircraft fabric by
    a. identifying fabrics and seams (1a, 1b, 2c);
    b. describing methods of applying fabric (1a, 1b, 2c);
    c. applying fabric materials (1a, 1b, 2c).
4. Demonstrate the ability to inspect, test, and repair fabric and fiberglass aircraft coverings by
    a. inspecting a fabric covered aircraft structure (1a, 1b, 2c);
    b. identifying areas most susceptible to deterioration (1a, 1b, 2c);
    c. performing a fabric strength test (1a, 1b, 2c);
    d. making a strength test report (1a, 1b, 2c);
    e. discussing the inspection of fiberglass covering (1a, 1b, 2c).
5. Describe trim, lettering, and touch-up paint by
    a. describing the application of registration numbers (1a, 1b, 2c);
    b. describing the application of trim designs and touch-up paint (1a, 1b, 2c).
6. Identify and select aircraft finishing materials by
    a. examining labeling and physical characteristics of samples (1a, 1b, 2c);
    b. identifying finishing materials and thinners (1a, 1b, 2c);
    c. distinguishing between lacquer and enamel (1a, 1b, 2c).
7. Apply finishing materials and inspect finishes for defects by
    a. preparing surfaces for application of finishes (1a, 1b, 2c);
    b. applying finishing materials (1a, 1b, 2c);
    c. inspecting finishes (1a, 1b, 2c);
    d. identifying defects (1a, 1b, 2c).

AERM 1153 - Aircraft Welding

General

Course Key
11013

Course Rubric
AERM

Course Number
1153

Course Title
Aircraft Welding

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
1

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-1). Skill development in repair procedures for steel, magnesium, brass, and aluminum materials. Includes the selection and application of appropriate methods of welding, brazing, and soldering. Fundamentals of safety procedures also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Weld magnesium and titanium; solder stainless steel; fabricate tubular structures; solder, braze, gas weld, and arc weld steel; weld aluminum and stainless steel; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of aircraft welding theory and demonstrate the use of welding equipment by
    a. describing welding safety requirements (1a, 1b, 2c);
    b. describing the theory and process of gas welding (1a, 1b, 2c);
    c. describing the theory and process of arc welding (1a, 1b, 2c);
    d. welding using gas welding equipment (1a, 1b, 2c, 2e);
    e. welding using arc welding equipment (1a, 1b, 2c, 2e);
    f. performing soldering and brazing on steel (1a, 1b, 2c, 2e);
    g. describing silver soldering of stainless steel (1a, 1b, 2c);
    h. describing welding and inspection of stainless steel and aluminum (1a, 1b, 2c);
    i. describing welding of magnesium and titanium (1a, 1b, 2c).

AERM 1205 - Weight and Balance

Required Prerequisite(s) or Corequisite(s): AERM 1208

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Weigh aircraft, perform weight-and-balance check, and record data and information derived from the weight-and-balance check.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of weight and balance as they relate to safety of flight by
    a. identifying terms and definitions used in aircraft weight and balance (1a, 1b, 2c);
    b. explaining the importance of weight and balance control in aircraft (1a, 1b);
    c. explaining the consequence of failure to control weight and balance in aircraft (1a, 1b).
2. Locate aircraft weight and balance reference data by
    a. locating weight and balance data in a given aircraft's maintenance manual (1a, 2c);
    b. locating weight and balance data in a given aircraft's weight and balance records (1a, 2c);
    c. locating weight and balance data in an aircraft's Type Certificate Data Sheet (1a, 2c);
    d. locating data on installed equipment in an aircraft (1a, 2c);
    e. locating data on weight of installed equipment in an aircraft (1a, 2c).
3. Apply computation data to solve weight and balance problems by
    a. solving simple weight and balance calculation problems (1a, 1b, 2c);
    b. solving for most forward and aft loaded center of gravity calculation problems (1a, 1b, 2c);
    c. solving for new empty weight center of gravity (EWCG) with newly installed or removed equipment (1a, 1b, 2c);
    d. solving for ballast installation or removal (1a, 1b, 2c);
    e. solving weight and balance changes in a helicopter application (1a, 1b, 2c).
4. Determine an aircraft's empty weight center of gravity (EWCG) through an aircraft weighing activity by
    a. gathering all needed reference data for weighing the aircraft (1a, 1b, 1c, 2a, 2b);
    b. placing the aircraft in its empty weight configuration (1a, 1b, 1c, 2b);
    c. placing the aircraft on weighing scales (1a, 1b, 1c, 2a, 2b);
    d. leveling and weighing the aircraft (1a, 1b, 1c, 2a, 2b);
    e. removing the aircraft from the weighing scales and securing the aircraft (1a, 1b, 1c, 2a, 2b);
    f. calculating the empty weight center of gravity of the aircraft (1a, 1b, 1c, 2a, 2b);
    g. preparing a complete maintenance/weight and balance record entry per 14 CFR, Part 43.9 (1a, 1b, 2c).

AERM 1208 - Federal Aviation Regulations

General

Course Key
265

Course Rubric
AERM

Course Number
1208

Course Title
Federal Aviation Regulations

Semester Credit Hours
2

Lecture Hours
1

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-3). A course in the use and understanding of Federal Aviation Administration (FAA) and aircraft manufacturers' publications, forms, and records; and the exercise of mechanic privileges within prescribed limitations. Regulations and research on CD ROM.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Write descriptions of work performed including aircraft discrepancies corrective actions using typical aircraft maintenance records and required maintenance forms, records, and inspection reports. Apply information contained in Federal Aviation Administration (FAA) and manufacturers' aircraft maintenance specifications, data sheets, manuals, and publications and related Federal Aviation Regulations, Airworthiness Directives, and Advisory material. Analyze technical data and exercise mechanic privileges within the prescribed limitations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an ability to read, comprehend, and apply information contained in Federal Aviation Administration (FAA) and manufacturer's aircraft maintenance specifications, data sheets, manuals, publications and related FAA, Airworthiness Directives and Advisory Materials by
    a. locating reference data, when provided with specific aircraft or aircraft component manufacturer's technical information (1a, 1b, 2c);
    b. researching specific aircraft manufacturer's service manual to determine the aircraft's control surface travel (1a, 1b, 2c);
    c. researching specific aircraft manufacturer's parts manuals to determine the correct part, assembly or component for a given repair (1a, 1b, 2c);
    d. applying information found in FAA Aircraft Specifications (Aircraft Specifications and Type Certificate Data Sheets) (1a, 1b, 2c);
    e. identifying and explaining FAA regulations governing Airworthiness Certificates (1a, 1b, 2c);
    f. selecting and using FAA Technical Standard Orders (1a, 1b, 2c);
    g. selecting and using FAA Airworthiness Directives (1a, 1b, 2c);
    h. applying technical data to solve maintenance problems (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of aircraft mechanic privileges within the limitations prescribed by 14 CFR, Part 65 by
    a. listing aircraft mechanic privileges as specified in Part 65 (1a, 1b, 2c);
    b. listing aircraft mechanic limitations as specified in Part 65 (1a, 1b, 2c);
    c. demonstrating an understanding of the legal and ethical responsibilities of an aircraft mechanic (1a, 1b, 1c, 2c).
3. Make aircraft maintenance record entries in accordance with 14 CFR, Part 43 by
    a. preparing a 100 hour inspection record entry (1a, 1b, 2c);
    b. preparing a 100 hour inspection discrepancy list (1a, 1b, 2c);
    c. preparing a major/minor repair maintenance record entry (1a, 1b, 2c);
    d. preparing an aircraft record entry for the inspection and compliance with an FAA Airworthiness Directive (1a, 1b, 2c).
4. Demonstrate an understanding of the terms and definitions associated with aircraft maintenance record entries by
    a. defining the term time in service (1a, 1b, 2c);
    b. explaining the application of time in service as it relates to aircraft maintenance record entries (1a, 1b, 2c).
5. Use aircraft maintenance record forms and inspection guides by
    a. preparing an FAA Form 337 for a major repair and/or major alteration (1a, 1b, 2c);
    b. identifying inspection checklist (inspection guides) for 100 hour inspections (1a, 1b, 2c);
    c. compiling a list of all required aircraft forms (1a, 1b, 2c).

AERM 1243 - Instruments & Navigation/Communication

General

Course Key
298

Course Rubric
AERM

Course Number
1243

Course Title
Instruments and Navigation/Communication

Semester Credit Hours
2

Lecture Hours
1

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-2) A study of aircraft instruments and electronic flight instrument systems including testing and installing instruments; inspecting, checking, and troubleshooting navigation and communication systems; and inspecting and repairing antennas and electronic equipment installations. Computer applications.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, check, troubleshoot, and repair flight instrument systems; install and test instruments; and inspect, check, and troubleshoot aircraft navigation and communication systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of handling and installation of aircraft instrument, communication and navigation systems by
    a. describing handling and storing of aircraft instruments (1a, 1b, 2c, 2e);
    b. describing the installation procedures for aircraft instruments (1a, 1b, 2c, 2e);
    c. installing aircraft instruments (1a, 1b, 2c, 2e);
    d. performing a static pressure system leak test on an aircraft system (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of the procedures used to inspect, troubleshoot, and repair an aircraft instrument, communication, and navigation systems by
    a. inspecting an aircraft instrument system (1a, 1b, 2c, 2e);
    b. performing an operational check of an aircraft instrument system (1a, 1b, 2c, 2e);
    c. troubleshooting an aircraft instrument system (1a, 1b, 2c, 2e);
    d. repairing an aircraft instrument system (1a, 1b, 2c, 2e).
3. Demonstrate an understanding of the operating principles of autopilots and approach control systems by
    a. describing the inspection of an autopilot system (1a, 1b, 2c);
    b. describing the performance of a functional check of an autopilot system (1a, 1b, 2c);
    c. describing troubleshooting procedures for an autopilot system (1a, 1b, 2c);
    d. describing autopilot servos (1a, 1b, 2c);
    e. describing approach control systems (1a, 1b, 2c).
4. Demonstrate an understanding of aircraft electronic systems and related communication and navigation systems by
    a. describing the inspection of communication and navigation systems (1a, 1b, 2c);
    b. describing the performance of functional checks of communication and navigation systems (1a, 1b, 2c);
    c. describing troubleshooting procedures for communication and navigation system (1a, 1b, 2c);
    d. describing passenger address and interphone systems (1a, 1b, 2c);
    e. describing specialized navigation systems including VOR, ILS, Loran, Radar Beacon, Transponders, Flight Management Computers, and GPWS systems (1a, 1b, 2c).
5. Demonstrate the ability to inspect, install, and repair aircraft antennas and electronic equipment by
    a. inspecting an aircraft antenna (1a, 1b, 2c, 2e);
    b. repairing or replacing an aircraft antenna (1a, 1b, 2c, 2e);
    c. repairing or replacing related electronic equipment associated with communication and navigation systems (1a, 1b, 2c, 2e).

AERM 1254 - Aircraft Composites

General

Course Key
314

Course Rubric
AERM

Course Number
1254

Course Title
Aircraft Composites

Semester Credit Hours
2

Lecture Hours
1

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-2). Comprehensive concepts of the inspection and repair of composite, fabric, core, and laminated structural materials including doors, windows, bonded structures, and interior furnishings. Safety procedures to include the handling and storage of composite materials will also be addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select, install, and remove special fasteners for bonded and composite structures; inspect bonded structures; inspect, test, and repair fiberglass, plastics, honeycombs, composite, and laminated primary and secondary structures; inspect, check, service, and repair windows, doors, and interior furnishings; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the development and use of composite materials in aircraft construction and repair by
    a. explaining composite history (1a, 1b);
    b. describing composite materials (1a, 1b);
    c. describing the different types of composite structures/laminates (1a, 1b);
    d. describing the different uses of composite materials in aircraft construction (1a, 1b, 2c).
2. Identify safety procedures for working with composite materials by
    a. listing safety requirements for handling, using, and storing composite materials (1a, 1b, 2c);
    b. listing safety procedures for handling, cutting, drilling, grinding, and sanding tools (1a, 1b, 2c, 2e);
    c. listing safety procedures for handling uncured and cured fabrics (1a, 1b, 2c, 2e).
3. Demonstrate the ability to identify and select composite materials by
    a. listing composite repair materials (1a, 1b);
    b. selecting composite repair materials for various composite structures (1a, 1b, 2c, 2e).
4. Identify composite repair tools and equipment by
    a. identifying hand tools used in the repair of composite structures (1a, 1b, 2c, 2e);
    b. identifying shop equipment used in the repair of composite structures (1a, 1b, 2c, 2e).
5. Describe composite curing systems by
    a. explaining vacuum bagging (1a, 1b);
    b. explaining hot bonding (1a, 1b);
    c. explaining cure cycle (1a, 1b).
6. Demonstrate an understanding of the process for inspection of bonded structures by
    a. inspecting/testing composite laminated primary and secondary structures (1a, 1b, 2c, 2e);
    b. identifying different types of composite structure damage (1a, 1b, 2c);
    c. identifying classes of composite structure damage, including lightning strikes and prevention of lightning strikes (1a, 1b, 2c, 2e).
7. Repair composite and laminated primary and secondary structures by
    a. removing and inspecting fiberglass, plastics, honeycomb, composite, and laminated primary and secondary structures (1a, 1b, 2c, 2e);
    b. testing and repairing fiberglass, plastics, honeycomb, composite, and laminated primary and secondary structures (1a, 1b, 2c, 2e).

AERM 1303 - Shop Practices

General

Course Key
317

Course Rubric
AERM

Course Number
1303

Course Title
Shop Practices

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). An introduction to shop safety, the correct use of hand tools, equipment, and precision measurement, identification of aircraft hardware, and the fabrication of fluid lines and tubing. Emphasis on procedures for testing, heat treating, and inspection of aircraft structures.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform basic shop safety, shop operations, and precision measurement procedures; identify and select nondestructive testing methods; perform nondestructive testing and heat treating procedures; identify and select aircraft hardware and materials; fabricate and install fluid lines and fittings; and inspect welds.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the use of general hand tools, shop tools and tools used for precision measurements by
    a. identifying general mechanics' tools (1a, 1b, 2c, 2e);
    b. identifying shop tools (1a, 1b, 2c, 2e);
    c. explaining the care of hand and shop tools (1a, 1b, 2c, 2e);
    d. demonstrating the use of hand and shop tools (1a, 1b, 2c, 2e);
    e. explaining the care, use, and storage of precision measurement tools (1a, 1b, 2c, 2e);
    f. demonstrating the use of precision measurement tools (1a, 1b, 2c, 2e).
2. Demonstrate the ability to fabricate and install rigid fluid lines and fittings by
    a. making bends in rigid tubing in accordance with accepted industry practices (1a, 1b, 2c, 2e);
    b. forming a bead on a rigid tube (1a, 1b, 2c, 2e);
    c. forming a flare on a rigid tube (1a, 1b, 2c, 2e);
    d. identifying defects in rigid tubing (1a, 1b, 2c, 2e);
    e. installing a section of rigid tubing in a system (1a, 1b, 2c, 2e);
    f. performing an operational check of the system after installation (1a, 1b, 2c, 2e).
3. Demonstrate the ability to fabricate and install a flexible hose assembly by
    a. identifying and selecting flexible hose materials (1a, 1b, 2c);
    b. selecting flexible hose end fittings from stock (1a, 1b, 2c);
    c. fabricating a flexible hose to specification (1a, 1b, 2c, 2e);
    d. installing a flexible hose assembly in a system (1a, 1b, 2c, 2e);
    e. performing an operational check of the system after installation (1a, 1b, 2c, 2e).
4. Demonstrate the ability to identify and select aircraft bolts and nuts for specific applications by
    a. determining the required bolt length, diameter, shank, and head style for specific applications (1a, 1b, 2c);
    b. installing aircraft bolts with appropriate washer and nut combinations (1a, 1b, 2c, 2e);
    c. installing torque and safety installed bolts and nuts in accordance with specifications (1a, 1b, 2c, 2e).
5. Demonstrate the ability to select metallic aircraft structural materials by
    a. identifying samples of various family groups of aluminum alloy (1a, 1b, 2c);
    b. selecting appropriate aluminum alloys for specified aircraft applications (1a, 1b, 2c);
    c. identifying steel alloys (1a, 1b, 2c);
    d. identifying SAE code markings (1a, 1b, 2c);
    e. interpreting SAE coding from various samples (1a, 1b, 2c).
6. Demonstrate the ability to identify and select aircraft rivets by
    a. identifying rivets by physical characteristics (head style and application) (1a, 1b, 2c);
    b. identifying rivets by alloy (1a, 1b, 2c);
    c. identifying rivets by dimensions (1a, 1b, 2c);
    d. identifying rivets by type letter, designating strength characteristics, when appropriate (1a, 1b, 2c).
7. Determine the suitability of materials for aircraft firewalls and exhaust shrouds by

a. using pertinent technical reference information to illustrate the suitability of materials for firewalls and exhaust shrouds (1a, 1b, 2c);

b. identifying samples of materials suitable for use in aircraft firewalls and exhaust shrouds (1a, 1b, 2c).

8. Demonstrate the ability to identify aircraft control cable by

a. identifying example aircraft cables as to type (I or II) (1a, 1b, 2c);

b. identifying the number of strands, in an example cable (1a, 1b, 2c);

c. identifying the number of wires per strand, in an example cable (1a, 1b, 2c);

d. identifying the material from which an example cable is made (Composition A or Composition B) (1a, 1b, 2c, 2e);

e. identifying whether the cable is preformed or non-preformed cable (MILDTL-83420M or later) (1a, 1b, 2c, 2e).

9. Demonstrate an understanding of basic heat treating processes by

a. discussing the effects of heat treatment (1a, 1b, 2c);

b. identifying aluminum alloy code designation or heat treatability (1a, 1b, 2c);

c. discussing the heat treatment processes and strain relieving (1a, 1b, 2c);

d. discussing annealing copper and steel parts (1a, 1b, 2c).

10. Demonstrate an understanding of nondestructive testing by

a. identifying different types of nondestructive testing methods (1a, 1b, 2c);

b. selecting appropriate nondestructive testing for given materials, parts, or products (1a, 1b, 2c).

11. Demonstrate the ability to perform nondestructive testing procedures by

a. using the dye penetrant inspection method to locate a defect (1a, 1b, 2c, 2e);

b. using the magnetic particle inspection method to locate a defect (1a, 1b, 2c, 2e);

c. using the eddy current inspection method to locate a defect (1a, 1b, 2c, 2e);

d. using the ultrasonic inspection method to locate a defect (1a, 1b, 2c, 2e).

12. Demonstrate the ability to perform checks and inspections on welded assemblies by

a. verifying that proper operations were used to make welds in sample assemblies (1a, 1b, 2c, 2e);

b. inspecting welded assemblies for failed welds (cracks and/or blow holes) (1a, 1b, 2c, 2e).

AERM 1310 - Ground Operations

General

Course Key
322

Course Rubric
AERM

Course Number
1310

Course Title
Ground Operations

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). An introductory course in fuels, servicing methods, safety procedures, aircraft movement, securing and operations of aircraft, external power equipment, aircraft cleaning, and corrosion control.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Start, ground operate, move, service, and secure aircraft;
identify typical ground operation hazards and safety; identify and select fuels and cleaning materials; inspect, identify, remove, and treat aircraft corrosion; and perform aircraft cleaning.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Recognize aircraft fuels by

a. differentiating aircraft fuel by its octane rating (1a, 1b, 2c);

b. differentiating aviation gasoline from jet fuel (1a, 1b, 2c);

c. identifying fuel samples taken from an aircraft fuel system (1a, 1b, 2c);

d. verifying that a sample fuel meets the minimum required octane rating for a specific aircraft (1a, 1b, 2c).

2. Perform aircraft ground operation duties by

a. performing aircraft fueling operations (1a, 1b, 2c, 2e);

b. starting an aircraft engine (1a, 1b, 2c, 2e);

c. operating an aircraft engine within its normal operating range (1a, 1b, 2c, 2e);

d. shutting down an operating aircraft engine in accordance with normal engine shutdown procedures (1a, 1b, 2c, 2e);

e. connecting an auxiliary electrical power unit to an aircraft (1a, 1b, 2c, 2e);

f. operating an auxiliary electrical power unit (1a, 1b, 2c, 2e);

g. listing proper fire extinguishing procedures for an aircraft induction system fire (1a, 1b, 2c);

h. directing the ground movement of an aircraft (1a, 1b, 2c, 2e);

i. preparing an aircraft for outside storage (1a, 1b, 2c, 2e);

j. listing safety and hazard concerns during aircraft ground operations (1a, 1b, 2c).

3. Demonstrate an understanding of aircraft cleaning by

a. identifying/selecting aircraft cleaning materials for various aircraft surfaces and parts (1a, 1b, 2c);

b. explaining the procedures for cleaning/washing an aircraft (1a, 1b, 2c);

c. cleaning the exterior of an aircraft (1a, 1b, 2c, 2e);

d. cleaning aircraft windows and rubber products found on aircraft (1a, 1b, 2c, 2e).

4. Differentiate types of corrosion that are found in and on aircraft by

a. identifying types of corrosion (1a, 1b, 2c);

b. identifying areas on aircraft that are prone to corrosion (1a, 1b, 2c);

c. describing methods of preventing and/or controlling corrosion (1a, 1b, 2c);

d. removing corrosion using approved methods (1a, 1b, 2c, 2e);

e. applying protective coating using approved methods (1a, 1b, 2c, 2e).

AERM 1314 - Basic Electricity

328

Course Rubric	Course Number	Course Title
AERM	1314	Basic Electricity

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). A study of aircraft electrical systems and their requirements including the use of ammeter, voltmeter, and ohmmeter; series and parallel circuits; inductance and capacitance; magnetism; converting alternating current (AC) to direct current (DC); controlling devices; maintenance and servicing of aircraft batteries; and reading and interpreting aircraft electrical diagrams to include solid state devices and logic functions. Fundamentals of safety also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate and measure capacitance, inductance, electrical power, voltage, current, resistance, and continuity; determine the relationship of voltage, current, and resistance in electrical circuits; interpret aircraft electrical circuit diagrams including solid states devices and logic functions; inspect and service batteries; and perform safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic physics of electricity by
    a. explaining properties of matter (1a, 1b, 2c);
    b. describing the structure of the atom (1a, 1b, 2c);
    c. stating electron movement (1a, 1b, 2c);
    d. explaining static electricity (1a, 1b, 2c);
    e. describing the principles of magnetism (1a, 1b, 2c).
2. Determine the relationship of voltage, current, and resistance in electrical circuits using Ohm's Law by
    a. solving voltage problems in a given electrical circuit (1a, 1b, 2c, 2e);
    b. solving current problems in a given electrical circuit (1a, 1b, 2c, 2e);
    c. solving resistance problems in a given electrical circuit (1a, 1b, 2c, 2e).
3. Demonstrate the ability to use an electrical meter to determine electrical values in an electrical circuit by
    a. measuring current in a given electrical circuit (1a, 1b, 2c, 2e);
    b. measuring resistance in a given electrical circuit (1a, 1b, 2c, 2e);
    c. measuring continuity in a given electrical circuit (1a, 1b, 2c, 2e).
4. Demonstrate the ability to calculate and measure electrical power in an electrical circuit by
    a. calculating the electrical power (watts) produced in a given electrical circuit (1a, 1b, 2c);
    b. using a meter (wattmeter) to measure the electrical power produced in a given electrical circuit (1a, 1b, 2c, 2e).
5. Demonstrate the ability to read and interpret electrical circuit diagrams by
    a. identifying electrical components on wiring schematics and diagrams (1a, 1b, 2c);
    b. identifying solid state devices on wiring schematics and diagrams (1a, 1b, 2c);
    c. identifying logic functions by using wiring schematics and diagrams (1a, 1b, 2c).
6. Demonstrate the ability to select aircraft electrical cable based on factors affecting resistance by
    a. solving at least one problem for proper electrical cable size based on voltage drop (1a, 1b, 2c);
    b. solving at least one problem for proper electrical cable size based on the need to prevent overheating of the cable (1a, 1b, 2c, 2e).
7. Demonstrate an understanding of the construction, use, servicing, and inspection of aircraft lead acid batteries by
    a. describing the construction of an aircraft lead acid battery (1a, 1b, 2c);
    b. explaining the normal operation of an aircraft lead acid battery (1a, 1b, 2c);
    c. describing routine servicing of an aircraft lead acid battery (1a, 1b, 2c);
    d. inspecting and servicing an aircraft lead acid battery (1a, 1b, 2c, 2e).
8. Demonstrate an understanding of the construction, use, servicing, and inspection of aircraft nickel cadmium batteries by
    a. describing the construction of an aircraft nickel cadmium battery (1a, 1b, 2c);
    b. explaining the normal operation of an aircraft nickel cadmium battery (1a, 1b, 2c);
    c. explaining routine servicing, testing, and analyzing of an aircraft nickel cadmium battery (1a, 1b, 2c);
    d. inspecting and servicing an aircraft nickel cadmium battery (1a, 1b, 2c, 2e).
9. Demonstrate a fundamental understanding of alternating current (AC) circuits by
    a. defining AC resistive, capacitive, and resonant circuits (1a, 1b, 2c);
    b. describing transformer functions in AC circuits (1a, 1b, 2c);
    c. calculating inductance in a given AC circuit (1a, 1b, 2c);
    d. measuring inductance in a given AC circuit (1a, 1b, 2c, 2e);
    e. calculating resistance in a given AC circuit (1a, 1b, 2c);
    f. calculating capacitance in a given AC circuit (1a, 1b, 2c);
    g. measuring capacitance in a given AC circuit (1a, 1b, 2c, 2e).

AERM 1315 - Aviation Science

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). Fundamentals of mathematics, physics, and drawings as they apply to aircraft principles and operations as required by the Federal Aviation Administration (FAA) for airframe and powerplant mechanics.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Extract roots and raise numbers to a given power; calculate areas and volumes of various geometrical shapes; solve ratio, proportion, and percentage problems; and perform algebraic operations. Apply the principles of simple machines, sound, fluid, and heat dynamics; basic aerodynamics; aircraft structures; and theory of flight. Interpret aircraft drawings, symbols, and system schematics; draw sketches of repairs and alterations; and interpret blueprint information, graphs, and charts.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to perform arithmetic and algebraic operations involving addition, subtraction, multiplication, and division of positive and negative numbers, with problems including fractions and decimals in the solution by
    a. labeling algebraically dimensions with a plus or minus sign (1a);
    b. solving problems involving addition, subtraction, multiplication, and division of signed numbers (1a).
2. Demonstrate the ability to solve ratio, proportion, and percentage problems by
    a. converting fractional numbers to decimal equivalents (1a);
    b. converting decimals to fractional equivalents (1a);
    c. determining ratios and percentages of number combinations (1a);
    d. computing the compression ratio for an engine cylinder/piston combination (1a).
3. Demonstrate the ability to extract roots and raise numbers to a given power by
    a. computing the square root of a number (1a);
    b. raising a number to a given power (1a).
4. Demonstrate the ability to determine areas and volumes of various geometrical shapes by
    a. determining the area and/or volume of different geometrical shapes (1a);
    b. computing total wing area of different wings (1a);
    c. computing the volume of various baggage compartments and storage tanks (1a);
    d. computing piston displacement of a given engine (1a).
5. Demonstrate a basic understanding of physics by
    a. demonstrating knowledge of Boyle's and Charles's laws dealing with confined gases (1a, 1b, 2c);
    b. demonstrating knowledge of Pascal's law dealing with confined liquids (1a, 1b, 2c);
    c. demonstrating knowledge of Archimedes' principle of buoyancy and Bernoulli's principle of fluid flow through a venture (1a, 1b, 2c);
    d. solving given problems that demonstrate the relationship between pressure, temperature, and humidity (1a, 1b, 2c);
    e. explaining the relationship between temperature and heat (1a, 1b, 2c);
    f. indicating examples of temperature and heat as applied to an aircraft (1a, 1b, 2c);
    g. identifying methods of heat transfer (1a, 1b, 2c);
    h. explaining sound, the speed of sound, and the effects of sound on the human ear (1a, 1b, 2c);
    i. explaining centrifugal/centripetal force (1a, 1b, 2c);
    j. answering questions dealing with work, force, time, distance, and power as they relate to aircraft utility systems and engine performance (1a, 1b, 2c).
6. Demonstrate understanding of the principles of basic aerodynamics, aircraft structures, and the theory of flight by
    a. describing the basic aerodynamic concepts as they apply to aircraft (1a, 1b, 2c);
    b. listing the types of structures found in aircraft construction and manufacturing (1a, 1b, 2c);
    c. describing the theory of flight as it applies to aircraft (1a, 1b, 2c).
7. Demonstrate an understanding of and the ability to use aircraft drawings, to include technician prepared sketches and/or drawings by
    a. recognizing and identifying each kind of line as it appears on an aircraft drawing (1a, 1b, 2c);
    b. interpreting meanings of the lines on an aircraft drawing as they relate to surfaces and details of parts represented by the drawing (1a, 1b, 2c);
    c. locating and interpreting dimensions appearing on aircraft drawings to include the application of limits and tolerances pertaining to a dimension (1a, 1b, 2c);
    d. recognizing the symbols and interpreting information pertaining to identification and location of components with a system depicted on an aircraft drawing (1a, 1b, 2c);
    e. making a sketch or drawing of a major repair or alteration to an aircraft structure (1a, 1b, 2c).
8. Demonstrate an understanding and the ability to use aircraft blueprints, aircraft graphs, and charts by
    a. interpreting information from a given blueprint or diagram (1a, 1b, 2c);
    b. interpreting and applying data obtained from aircraft charts and graphs (1a, 1b, 2c).

AERM 1340 - Aircraft Propellers

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). Fundamentals of propeller design, function and construction. Skill development in inspection, servicing, and repair of fixed-pitch, constant-speed, and feathering propellers and governing systems. Instruction in removal, balancing, installation of propellers and safety procedures are also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, check, service, and repair propeller synchronizing systems, ice control systems, fixed-pitch, constant-speed, and feathering propellers and propeller governing systems; identify and select propeller lubricants; balance propellers; repair propeller control system components; install, troubleshoot, and remove propellers; repair aluminum alloy propeller blades; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of aircraft propeller theory and operation by
    a. identifying/explaining the forces that act on an operating propeller (1a, 1b, 2c, 2e);
    b. explaining the advantages associated with the use of a fixed-pitch propeller (1a, 1b, 2c, 2e);
    c. explaining the disadvantages associated with the use of a fixed-pitch propeller (1a, 1b, 2c, 2e);
    d. explaining the advantages associated with the use of a ground adjustable propeller (1a, 1b, 2c, 2e);
    e. explaining the advantages associated with the use of a variable-pitch (constant speed) propeller (1a, 1b, 2c, 2e);
    f. explaining the disadvantages associated with the use of a variable-pitch (constant speed) propeller (1a, 1b, 2c, 2e);
    g. describing the operation and control of hydromatic propellers (1a, 1b, 2c, 2e);
    h. describing the operation of variable-pitch (constant speed) propellers (1a, 1b, 2c, 2e);
    i. describing the operation and control of a counterweight variable-pitch (constant speed) propeller (1a, 1b, 2c, 2e);
    j. describing the operation and control of a non-counterweight variable-pitch (constant speed) propeller (1a, 1b, 2c, 2e);
    k. describing the operation and control of a propeller use with a turbine powerplant (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of aircraft propeller terms and component nomenclature by
    a. identifying fixed-pitch propeller sections and surfaces (1a, 1b, 2c, 2e);
    b. identifying variable-pitch (constant speed) propeller component parts (1a, 1b, 2c, 2e).
3. Interpret airplane/engine/propeller technical information by
    a. locating static limit information for fixed-pitch propellers (1a, 1b, 2c, 2e);
    b. interpreting static limit information for fixed-pitch propellers (1a, 1b, 2c, 2e);
    c. interpreting information associated with static RPM limits for airplane/engine/propeller combinations (1a, 1b, 2c, 2e);
    d. identifying critical range vibrations for an airplane/engine/propeller combination (1a, 1b, 2c, 2e);
    e. explaining the reason for the use of propeller information placards (1a, 1b, 2c, 2e).
4. Demonstrate an understanding of propeller governor components and principles of operation by
    a. describing the action of a propeller governor (1a, 1b, 2c, 2e);
    b. describing the forces which control propeller pitch (1a, 1b, 2c, 2e);
    c. performing operations necessary to match propeller governor rotation to a specific engine (1a, 1b, 2c, 2e);
    d. matching and mounting a propeller governor on an aircraft engine (1a, 1b, 2c, 2e).
5. Perform propeller and propeller system functional checks by
    a. checking the operation of a full feathering, constant speed propeller (1a, 1b, 2c, 2e);
    b. checking the track of a propeller (1a, 1b, 2c, 2e);
    c. measuring propeller blade pitch angles (1a, 1b, 2c, 2e);
    d. adjusting and rigging a propeller governor externally (1a, 1b, 2c, 2e).
6. Perform installation and removal of aircraft propellers by
    a. removing and installing a propeller on a tapered shaft (1a, 1b, 2c, 2e);
    b. removing and installing a propeller on a splined shaft (1a, 1b, 2c, 2e).
7. Perform minor repairs to aluminum propeller blades by
    a. using manufacturers' inspection and repair procedures to identify limits for repair (1a, 1b, 2c, 2e);
    b. determining if damage is repairable and meets the return to service standard (1a, 1b, 2c, 2e);
    c. smoothing nicks, cuts, and scratches in the leading and trailing edges of metal propeller blades (1a, 1b, 2c, 2e).
8. Identify and select propeller lubricants by
    a. locating lubrication information for various propellers (1a, 1b, 2c, 2e);
    b. listing the required lubricants specified in the information (1a, 1b, 2c, 2e);
    c. listing special procedures that must be considered in lubricating different models of propellers (1a, 1b, 2c, 2e).
9. Demonstrate an understanding of the inspection, service, and repair of propeller synchronizing and propeller ice control systems by
    a. identifying components of a propeller anti-icing system (1a, 1b, 2c, 2e);
    b. describing the operation of a propeller anti-icing system (1a, 1b, 2c, 2e);
    c. locating reference information for a propeller synchronizing system (1a, 1b, 2c, 2e);
    d. describing the operation of a propeller synchronizing system (1a, 1b, 2c, 2e).
10. Demonstrate an understanding of the procedures used to balance propellers by
    a. locating information for balancing fixed-pitch and variable-pitch propellers (1a, 1b, 2c, 2e);
    b. describing the procedures for balancing fixed pitch and variable pitch propellers (1a, 1b, 2c, 2e).

AERM 1344 - Aircraft Reciprocating Engines

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). Reciprocating engines, their development, operating principles, and theory. Includes engine instruments, lubrication, and exhaust systems. Also addresses fundamentals of safety.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the components of a reciprocating engine; inspect, troubleshoot, check, service, and repair engine instrument systems; inspect, service, and repair lubrication and exhaust systems; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of reciprocating engine theory, engine types/classification, advantages, and disadvantages by
    a. explaining reciprocating engine (internal combustion) principles (1a, 1b, 2c);
    b. explaining the term horsepower as it relates to aircraft reciprocating engines, including takeoff power, rated (METO) power, and maximum power (1a, 1b, 2c);
    c. explaining mechanical and thermal efficiency associated with reciprocating engines (1a, 1b, 2c);
    d. explaining weight to power ratio considerations in aircraft reciprocating engines (1a, 1b, 2c);
    e. discussing aircraft reciprocating engine reliability and economy of operation (1a, 1b, 2c);
    f. listing aircraft reciprocating engines by types/classification using cylinder arrangement, cubic inch displacement, number of strokes per cycle, and cooling (1a, 1b, 2c);
    g. giving examples of both advantages and disadvantages associated with aircraft reciprocating engines (1a, 1b, 2c).
2. Demonstrate knowledge of reciprocating engine component parts and reciprocating engine systems by
    a. identifying aircraft reciprocating engine systems (1a, 1b, 2c);
    b. explaining how each engine system supports engine operations (1a, 1b, 2c);
    c. identifying component parts of engine systems (1a, 1b, 2c);
    d. identifying nose and power cases of aircraft reciprocating engines (1a, 1b, 2c);
    e. describing loads placed on nose and power cases of aircraft reciprocating engines (1a, 1b, 2c);
    f. identifying (from a group of assemblies provided) a crankshaft and rod assembly that incorporates a dynamic dampener (1a, 1b, 2c);
    g. explaining the purpose of a dynamic dampener (1a, 1b, 2c);
    h. identifying an articulating rod in a master rod assembly (1a, 1b, 2c);
    i. describing the functions of each principal part of a crankshaft assembly (1a, 1b, 2c).
3. Demonstrate knowledge of propeller reduction systems by
    a. describing the reasons for reducing propeller speeds (1a, 1b, 2c);
    b. indicating on a drawing, or on a cutaway propeller reduction gear box trainer, the direction of rotation of each of the gears in a reduction system (1a, 1b, 2c).
4. Demonstrate an understanding of volumetric efficiency by
    a. describing factors affecting volumetric efficiency (1a, 1b, 2c);
    b. describing the purpose of valve overlap (1a, 1b, 2c);
    c. explaining how valve overlap affects engine performance (1a, 1b, 2c);
    d. interpreting a manufacturer's instructions for timing the valves of an engine (1a, 1b, 2c).
5. Demonstrate the ability to locate and use engine firing order information located in engine maintenance manuals or on engine data plates by
    a. explaining the principles that determine the firing order for a given engine (1a, 1b, 2c);
    b. rotating the engine crankshaft, observing the valve rocker arm action, and identifying each cylinder in the order in which it will fire (1a, 1b, 2c).
6. Demonstrate an understanding of the types of bearings used in aircraft reciprocating engines and their serviceability by
    a. identifying, from a display of bearings, each type of bearing that is used in an aircraft reciprocating engine (1a, 1b, 2c);
    b. describing at least one probable location where each bearing would be used within the engine (1a, 1b, 2c);
    c. demonstrating the cleaning procedure and process for each bearing (1a, 1b, 2c);
    d. inspecting each type of bearing (1a, 1b, 2c);
    e. judging whether the bearing is of return to service quality (1a, 1b, 2c).
7. Demonstrate an understanding of the operation of engine accessory drives by
    a. interpreting accessory drive information from the engine maintenance manual for a given engine (1a, 1b, 2c);
    b. drawing or placing arrows on a diagram to illustrate the direction and speed of a given engine's accessory drive gears (1a, 1b, 2c).
8. Demonstrate an ability to use technical data for the selection of approved engine lubricating oil by
    a. referring to regulatory and technical data for a given engine (1a, 1b, 2c);
    b. determining the approved grade (weight) of engine lubricating oil, based on stated environmental conditions (1a, 1b, 2c);
    c. stating the condition/purpose for the use of ashless dispersant oil, and straight mineral oil (1a, 1b, 2c).
9. Demonstrate an understanding of aircraft reciprocating engine lubrication systems and their operation by
    a. describing a typical aircraft reciprocating engine lubrication system (1a, 1b, 2c);
    b. identifying components of an aircraft reciprocating engine lubrication system (1a, 1b, 2c);
    c. describing the operation of an aircraft reciprocating engine lubrication system (1a, 1b, 2c);
    d. troubleshooting lubrication system problems described or introduced by the instructor (1a, 1b, 2c, 2e);
    e. interpreting FAA regulations pertaining to aircraft reciprocating engine lubrication systems (1a, 1b, 2c).
10. Demonstrate the ability to maintain an aircraft reciprocating engine exhaust system by
    a. inspecting an exhaust manifold and exhaust system on a given engine (1a, 1b, 2c);
    b. preparing a written record of condition of the exhaust system (1a, 1b, 2c);
    c. interpreting exhaust system information from the maintenance and repair manual provided by the manufacturer of the exhaust system (1a, 1b, 2c);
    d. describing the permitted repairs for the exhaust system (1a, 1b, 2c);
    e. repairing joints in an exhaust system (1a, 1b, 2c, 2e);
    f. removing, replacing, and adjusting an exhaust system (1a, 1b, 2c, 2e).
11. Recognize aircraft reciprocating engine exhaust systems components, the materials from which they are manufactured, and repair information for those components by
    a. identifying exhaust system components by name (1a, 1b, 2c);
    b. using reference information as a means of determining the materials used in the fabrication of the component (1a, 1b, 2c);
    c. interpreting approved or acceptable information describing the repair of various exhaust system components (1a, 1b, 2c).
12. Demonstrate an understanding of electrical and mechanical engine temperature, pressure, and RPM indicating systems and the ability to maintain those systems by
    a. explaining the purpose of engine temperature indicating systems (1a, 1b, 2c);
    b. identifying component parts to a temperature indicating system (1a, 1b, 2c);
    c. measuring the resistance of thermocouple leads (1a, 1b, 2c, 2e);
    d. determining the causes of erratic indications and inverse readings in thermocouple temperature indicating systems (1a, 1b, 2c, 2e);
    e. determining the cause of an off scale reading in a ratio/meter temperature indicator (1a, 1b, 2c, 2e);
    f. explaining the purpose of a manifold pressure indicating system (1a, 1b, 2c);
    g. explaining the operating principles of a manifold pressure indicating system (1a, 1b, 2c);
    h. identifying the component parts of a manifold pressure indicating system (1a, 1b, 2c);
    i. troubleshooting problems in a manifold pressure indicating system described or introduced by the instructor (1a, 1b, 2c, 2e);
    j. installing and checking the operation of an engine tachometer system (1a, 1b, 2c, 2e);
    k. determining the cause of tachometer system failure after the instructor has introduced a malfunction (1a, 1b, 2c, 2e);
    l. repairing a tachometer system (1a, 1b, 2c, 2e).
13. Demonstrate an understanding of mechanical and electrical fuel flow indicating systems for aircraft reciprocating engines by
    a. drawing a diagram of both a mechanical and an electrical fuel flow indicating system (1a, 1b, 2c);
    b. identifying on each diagram the major parts of each system (1a, 1b, 2c);
    c. explaining the basic principles of troubleshooting, servicing, and repair of each system (1a, 1b, 2c).

AERM 1345 - Airframe Electrical Systems

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take AERM-1314;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): AERM 1314

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Repair and inspect aircraft electrical systems components; crimp and splice wiring to manufacturers' specifications; repair pins and sockets of aircraft connectors; install, check, and service airframe electrical wiring, controls, switches, indicators, and protective devices; inspect, check, troubleshoot, service, and repair alternating and direct current electrical systems; inspect, check, and troubleshoot constant speed and integrated speed drive generators; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of and the ability to install, inspect, check and service airframe electrical wiring by
    a. selecting wire of proper gauge for the assigned installation (1a, 1b, 2c);
    b. installing aircraft electrical switches and wiring system components (1a, 1b, 2c);
    c. securing wire by clamps and tying (1a, 1b, 2c);
    d. connecting aircraft electrical components to power supplies through suitable switches and protective devices (1a, 1b, 2c, 2e);
    e. checking each circuit for proper operation (1a, 1b, 2c, 2e);
    f. inspecting electrical terminals and recording acceptability of each with reasons for rejection of unacceptable terminals (1a, 1b, 2c, 2e);
    g. preparing and installing wiring through a conduit and connecting wire cables to terminals at each end (1a, 1b, 2c, 2e);
    h. connecting reset guards on guarded switches and installing breakaway type (safety) wire on the guarded switches (1a, 1b, 2c, 2e);
    i. selecting samples of high tension electrical wire (1a, 1b, 2c, 2e);
    j. describing high tension electrical wire, including its characteristics (1a, 1b, 2c);
    k. selecting samples of low tension electrical wire (1a, 1b, 2c);
    l. describing low tension electrical wire, including its characteristics (1a, 1b, 2c);
    m. selecting samples of thermocouple leads (1a, 1b, 2c);
    n. describing thermocouple wire, including its characteristics (1a, 1b, 2c).
2. Demonstrate the ability to install and check aircraft electrical system components by
    a. installing soldered and crimped terminal and splices on aircraft wire (1a, 1b, 2c, 2e);
    b. checking pins and sockets in connectors for damage (1a, 1b, 2c, 2e);
    c. removing and installing a pin and socket in a connector (1a, 1b, 2c, 2e);
    d. listing the probable causes for switch chatter in solenoid switches and relays (1a, 1b, 2c);
    e. inspecting the installation and checking the circuits of an anti-collision and position light installation (1a, 1b, 2c, 2e);
    f. inspecting and checking the installation and operation of landing lights (1a, 1b, 2c, 2e);
    g. replacing a pre-focused landing light lamp on an aircraft or mockup (1a, 1b, 2c, 2e);
    h. inspecting, checking, and repairing a taxi light installation by replacing a lamp (1a, 1b, 2c, 2e);
    i. inspecting, checking, and making lamp or light assembly replacements for two different types of cockpit or instrument lighting installations (1a, 1b, 2c, 2e);
    j. replacing an inoperative overhead or panel type cockpit lighting fixture (1a, 1b, 2c, 2e);
    k. repairing an instrument light circuit in which the instructor has introduced an open connection (1a, 1b, 2c, 2e);
    l. inspecting electrical equipment installations on shelves or racks, or security of lock-in (1a, 1b, 2c, 2e);
    m. inspecting for integrity of shock mounting (1a, 1b, 2c, 2e);
    n. inspecting for clearance from other equipment (1a, 1b, 2c, 2e);
    o. checking plugin connectors for proper mating and adequate engagement (1a, 1b, 2c, 2e);
    p. determining that all requirements for cooling or ventilation are met (1a, 1b, 2c, 2e);
    q. locating and listing the reference page numbers of the replacement procedure for given aircraft electrical system components (1a, 1b, 2c, 2e);
    r. listing the part numbers of replacement parts and any additional mounting hardware, seals, or gaskets required for replacement of the part (1a, 1b, 2c, 2e).
3. Demonstrate an understanding of and the ability to inspect, check, troubleshoot, service, and repair alternating current (AC) and direct current (DC) aircraft electrical systems by
    a. describing how voltage and current are controlled in DC generator or alternator systems (1a, 1b, 2c);
    b. explaining how equalization of electrical load is accomplished in an aircraft electrical system that utilizes two DC generators or alternators (1a, 1b, 2c);
    c. reading and recording voltage and output for each generator or alternator in an operating system (1a, 1b, 2c, 2e);
    d. adjusting voltage regulators in an operating system (1a, 1b, 2c, 2e);
    e. adjusting load equalization in an operating system (1a, 1b, 2c, 2e);
    f. flashing a generator field (1a, 1b, 2c, 2e);
    g. checking the operation of the reverse current cutout relays (1a, 1b, 2c, 2e);
    h. locating and correcting an open or short circuit malfunction introduced by the instructor (1a, 1b, 2c, 2e);
    i. discussing the methods of providing AC electrical power in an aircraft that has only a DC electrical system (1a, 1b, 2c);
    j. discussing the characteristics and advantages of AC aircraft electrical systems (1a, 1b, 2c);
    k. identifying components and operating elements of a 208/114 Volt AC aircraft electrical system (1a, 1b, 2c);
    l. discussing the inspection, checking, and troubleshooting of constant speed integrated speed drive generators (1a, 1b, 2c).

AERM 1347 - Airframe Auxiliary Systems

General

Course Key

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, check, troubleshoot, service, and repair heating, cooling, air conditioning, oxygen, and pressurization systems and air cycle machines; inspect, check, troubleshoot, service, and repair airframe ice and rain control systems; inspect, check, and service smoke and carbon monoxide detection systems; and inspect, check, troubleshoot, service, and repair aircraft fire detection and extinguishing systems; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of airframe ice and rain control systems and the ability to perform routine inspection, service, and repair of these systems by
    a. discussing the principles of installation of airframe ice and rain control systems (1a, 1b, 2c);
    b. discussing the operation and checking of deicing and/or anti-icing systems (1a, 1b, 2c);
    c. locating in reference data, for an assigned deicing and/or anti-icing system, the procedures for inspection, checking, and repair of the system (1a, 1b, 2c);
    d. checking the operation of an electrically operated pitot static or static vent anti-icing system (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of smoke and carbon monoxide detection systems and the ability to perform routine inspection, service, and repair of these systems by
    a. discussing the principles of operation of smoke and carbon monoxide detectors (1a, 1b, 2c);
    b. discussing the use of reference data for the inspection, checking, and servicing of smoke and carbon monoxide detection systems (1a, 1b, 2c).
3. Demonstrate an understanding of fire detection systems and the ability to perform routine inspection, service, and repair of these systems by
    a. describing the method of operation of a thermal switch fire detector system (1a, 1b, 2c);
    b. describing the method of operation of a thermocouple fire detector system (1a, 1b, 2c);
    c. describing the method of operation of a continuous loop fire detector system (1a, 1b, 2c);
    d. using a mockup to trace the circuit of a fire detection system (1a, 1b, 2c, 2e);
    e. activating a fire detection system alarm by heat applied to the detector (1a, 1b, 2c, 2e);
    f. locating a malfunction introduced into the fire detection system mockup by the instructor (1a, 1b, 2c, 2e);
    g. correcting malfunctions introduced into the fire detection system mockup by the instructor (1a, 1b, 2c, 2e).
4. Demonstrate an understanding of fire extinguishing systems and the ability to perform routine inspection, service, and repair of these systems by
    a. labeling on a block diagram each major component of a built in fire extinguishing system (1a, 1b, 2c, 2e);
    b. identifying each major component with its unit name, location in the aircraft, and its function (1a, 1b, 2c, 2e);
    c. drawing a simplified diagram of the electrical control circuit identifying components (1a, 1b, 2c);
    d. listing the functions of each component (1a, 1b, 2c);
    e. checking the pressure of the fire extinguishing agent in a fire extinguisher container (1a, 1b, 2c, 2e);
    f. listing possible causes for a fire extinguisher system failure to operate (1a, 1b, 2c).
5. Demonstrate an understanding of cabin atmosphere control systems and the ability to perform routine inspection, service, and repair of these systems by
    a. checking the oxygen system for leakage (1a, 1b, 2c, 2e);
    b. checking the oxygen bottle(s) for pressure (1a, 1b, 2c, 2e);
    c. checking oxygen system pressure (1a, 1b, 2c, 2e);
    d. inspecting oxygen masks for contamination (1a, 1b, 2c, 2e);
    e. discussing the use of reference data for operational checks, inspections, troubleshooting, service, and repair of combustion heaters and exhaust type exchangers (1a, 1b, 2c);
    f. discussing the use of reference data for operational checks, inspections, troubleshooting, service, and repair of aircraft vapor cycle and air cycle cooling systems (1a, 1b, 2c, 2e);
    g. discussing the use of reference data for operational checks, inspections, troubleshooting, service, and repair of cabin pressurization systems (1a, 1b, 2c).
6. Demonstrate an understanding of speed and configuration warning systems and the ability to perform routine inspections, service, and repair of these systems by
    a. describing speed and configuration warning systems (1a, 1b, 2c);
    b. explaining speed and configuration warning systems principles of operation (1a, 1b, 2c);
    c. inspecting, checking, and servicing a speed and configuration warning system (1a, 1b, 2c, 2e).
7. Demonstrate an understanding of electrical brake control systems and the ability to perform routine inspections, service, and repair of these systems by
    a. describing electrical brake control systems (1a, 1b, 2c);
    b. explaining electrical brake control systems principles of operation (1a, 1b, 2c);
    c. inspecting, checking, and servicing an electrical brake control system (1a, 1b, 2c, 2e).
8. Demonstrate an understanding of antiskid systems and the ability to perform routine inspections, service and repair of these systems by
    a. describing aircraft antiskid systems (1a, 1b, 2c);
    b. explaining aircraft antiskid systems principles of operation (1a, 1b, 2c);
    c. inspecting and checking an aircraft antiskid system (1a, 1b, 2c, 2e).
9. Demonstrate an understanding of landing gear position indicating and warning systems and the ability to perform routine inspections, service, and repair of these systems by
    a. checking the operation of the position indicating and warning lights (1a, 1b, 2c, 2e);
    b. inspecting the components of the position indicating and warning system (1a, 1b, 2c, 2e);
    c. troubleshooting and repairing different malfunctions introduced by the instructor (1a, 1b, 2c, 2e).

AERM 1349 - Hydraulic, Pneumatic, and Fuel Systems

Course Rubric	Course Number	Course Title
AERM	1349	Hydraulic, Pneumatic and Fuel Systems

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). Skill development in inspecting, servicing, and maintaining aircraft fluid systems including hydraulics, pneumatics, and fuel. Application of basic concepts through detailed maintenance procedures. Fundamentals of safety procedures also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, check, service, troubleshoot, and repair aircraft fuel and management systems; inspect and repair fuel quantity-indicating systems; inspect, check, service, troubleshoot, and repair hydraulic and pneumatic systems; identify and select hydraulic fluids; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify and select hydraulic fluids by
    a. selecting sample hydraulic fluids by color, odor, and specification number (1a, 1b, 2c, 2e);
    b. selecting hydraulic fluid that will be used to service a given hydraulic system when shown the hydraulic system placard or reservoir data plate (1a, 1b, 2c, 2e);
    c. describing the characteristics of each type of hydraulic fluid (1a, 1b, 2c).
2. Demonstrate the ability to repair hydraulic and pneumatic power system components by
    a. interpreting reference data information that is used to identify parts and materials used to maintain a hydraulic or pneumatic power system (1a, 1b, 2c);
    b. selecting seals for use, using reference data, in ester, petroleum, and vegetable based hydraulic fluids (1a, 1b, 2c);
    c. installing seals in one unit in accordance with the procedures specified in the reference data (1a, 1b, 2c, 2e);
    d. performing an operational test of the unit following assembly (1a, 1b, 2c, 2e);
    e. identifying a hydraulic selector valve (1a, 1b, 2c);
    f. removing the selector valve from the system (1a, 1b, 2c, 2e);
    g. cleaning, inspecting, and reinstalling the selector valve (1a, 1b, 2c, 2e);
    h. checking the hydraulic system for proper operation following the replacement of the selector valve (1a, 1b, 2c, 2e);
    i. identifying a pressure regulator in a hydraulic system (1a, 1b, 2c, 2e);
    j. removing the regulator valve from the system (1a, 1b, 2c, 2e);
    k. cleaning, inspecting, and reinstalling the regulator valve (1a, 1b, 2c, 2e);
    l. checking the hydraulic system for proper operation following the replacement of the regulator valve (1a, 1b, 2c, 2e);
    m. adjusting the hydraulic pressure of the system (1a, 1b, 2c, 2e);
    n. interpreting information about aircraft pneumatic power systems (1a, 1b, 2c);
    o. describing the operation of aircraft pneumatic power systems (1a, 1b, 2c).
3. Demonstrate the ability to inspect, check, service, troubleshoot, and repair hydraulic and pneumatic power systems by
    a. solving hydraulic problems (force/area/pressure) when one of the factors is unknown or values have been changed (1a, 1b, 2c);
    b. explaining the hydraulic principles involved in the solution of the problem (1a, 1b, 2c);
    c. interpreting hydraulic system reference information (1a, 1b, 2c);
    d. diagramming a basic hydraulic system (1a, 1b, 2c);
    e. explaining the relationship, purpose, and function of each component in a hydraulic system (1a, 1b, 2c);
    f. comparing constant pressure and open center types of hydraulic systems (1a, 1b, 2c);
    g. identifying and comparing the components and means of system pressure regulation for each type of system (1a, 1b, 2c, 2e);
    h. inspecting and servicing the hydraulic reservoir with fluid and checking the filter for contamination (1a, 1b, 2c, 2e);
    i. identifying constant and variable displacement hydraulic pumps (1a, 1b, 2c);
    j. describing the operation of constant and variable displacement pumps (1a, 1b, 2c);
    k. inspecting a hydraulic pump drive shaft (1a, 1b, 2c);
    l. removing and installing a pump on the accessory drive pad (1a, 1b, 2c, 2e);
    m. checking the installed pump for proper operation of the system (1a, 1b, 2c, 2e);
    n. removing an accumulator from a hydraulic system (1a, 1b, 2c, 2e);
    o. inspecting the removed accumulator (1a, 1b, 2c, 2e);
    p. installing the accumulator and charging the accumulator with air or nitrogen (1a, 1b, 2c, 2e);
    q. checking the operation of the system (1a, 1b, 2c, 2e);
    r. inspecting the high pressure air valve assemblies and replacing as needed (1a, 1b, 2c, 2e);
    s. comparing the operating characteristics of an operating system with reference information (1a, 1b, 2c, 2e);
    t. detecting low, high, or fluctuating pressures (1a, 1b, 2c, 2e);
    u. describing the probable cause for the observed malfunction (1a, 1b, 2c, 2e);
    v. making necessary adjustments to restore the system to operating tolerances (1a, 1b, 2c, 2e).
4. Demonstrate the ability to inspect, check, service, troubleshoot, and repair aircraft fuel systems and components by
    a. locating and interpreting information from manufacturer's service and repair instructions for inspection, service, and repair of aircraft fuel systems;
    b. describing fuel tank installation (1a, 1b, 2c);
    c. describing fuel tank servicing precautions (1a, 1b, 2c);
    d. inspecting fuel selector valves and pumps (1a, 1b, 2c, 2e);
    e. checking for proper operation of selector valves and pumps (1a, 1b, 2c, 2e);
    f. troubleshooting and repairing fuel selector valves and pumps (1a, 1b, 2c, 2e);
    g. inspecting and troubleshooting fuel quantity indication systems (1a, 1b, 2c, 2e);
    h. listing possible malfunctions of fuel quantity indication systems (1a, 1b, 2c, 2e);
    i. describing the repair that would be undertaken to correct the malfunction (1a, 1b, 2c);
    j. describing the inspection, checking, servicing, and repair of pressure fueling systems (1a, 1b, 2c);
    k. describing the inspection, checking, servicing, and repair of fuel dump systems (1a, 1b, 2c);
    l. performing a fuel transfer and refueling (1a, 1b, 2c).
5. Demonstrate the ability to inspect, check, service, troubleshoot, and repair fuel pressure and temperature warning systems by
    a. operating a fuel system and adjusting the pressure or temperature, and sensing devices (1a, 1b, 2c, 2e);
    b. interpreting service information to identify the cause of an instructor introduced fault in the system (1a, 1b, 2c, 2e);
    c. repairing the system as directed in the service manual (1a, 1b, 2c, 2e).

AERM 1350 - Landing Gear Systems

General

Course Key

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, service, and repair landing gear, retraction systems, shock struts, brakes, wheels, tires, and steering systems; inspect, check, and service speed and configuration warning systems, electric brake controls, and antiskid systems; inspect, check, troubleshoot, and service landing gear position indicating and warning systems; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to use aircraft manufacturer's instructions to safely raise an aircraft off the hangar floor and return it to the surface without damage or injury to the aircraft, equipment, or student by
    a. utilizing appropriate aircraft jacks and aircraft manufacturer's instructions to jack (raise) an entire aircraft off the ground and return it to the surface (1a, 1b, 2c, 2e);
    b. utilizing appropriate aircraft jacks and aircraft manufacturer's instructions to jack (raise) one wheel off the ground and return it to the surface (1a, 1b, 2c, 2e).
2. Demonstrate the ability to use aircraft manufacturer's instructions to inspect and service aircraft wheels and tire/tube assemblies by
    a. explaining the safety precautions related to wheel and tire servicing (1a, 1b, 2c);
    b. raising an aircraft wheel from the hangar floor (jacking one wheel) (1a, 1b, 2c, 2e);
    c. removing the raised wheel assembly from the aircraft's axle (1a, 1b, 2c, 2e);
    d. demounting the tire from a wheel (1a, 1b, 2c, 2e);
    e. cleaning and inspecting the tire and tube when tube type tire is utilized (1a, 1b, 2c, 2e);
    f. cleaning and inspecting the wheel assembly (1a, 1b, 2c, 2e);
    g. cleaning and inspecting the wheel bearings (1a, 1b, 2c, 2e);
    h. lubricating (re-packing) the wheel bearings (1a, 1b, 2c, 2e);
    i. reinstalling the tire and tube on the wheel assembly (1a, 1b, 2c, 2e);
    j. reinstalling the wheel bearings in the wheel assembly (1a, 1b, 2c, 2e);
    k. reinstalling the wheel assembly on the axle (1a, 1b, 2c, 2e);
    l. adjusting the wheel bearing play (1a, 1b, 2c, 2e);
    m. describing the procedure to be followed when storing tires and other rubber aircraft products (1a, 1b, 2c).
3. Demonstrate the ability to use aircraft manufacturer's instructions to inspect and service mechanical and hydraulic type aircraft brake assemblies by
    a. identifying the components of an aircraft brake system and using reference information to service and operate the system (1a, 1b, 2c);
    b. describing the operation of mechanical and hydraulic aircraft brakes (1a, 1b, 2c);
    c. disassembling an aircraft wheel brake assembly (1a, 1b, 2c);
    d. identifying each component part of the wheel brake assembly (1a, 1b, 2c);
    e. reassembling the wheel brake unit (1a, 1b, 2c);
    f. replacing an actuating cylinder in a wheel brake assembly (1a, 1b, 2c);
    g. servicing, checking, and adjusting clearance on a shoe type, multiple disc or single disc type brake (1a, 1b, 2c);
    h. disassembling a brake master cylinder (1a, 1b, 2c, 2e);
    i. inspecting the component parts of the master cylinder (1a, 1b, 2c, 2e);
    j. replacing seals (as required) in the master cylinder (1a, 1b, 2c, 2e);
    k. reassembling and making an operational check of the master cylinder (1a, 1b, 2c, 2e);
    l. bleeding air out of the hydraulic brake system and performing a functional test on the system after replacement or repair of component parts (1a, 1b, 2c, 2e).
4. Demonstrate the ability to use aircraft manufacturer's instructions to inspect, check, service, and repair aircraft landing gear retraction systems, shock struts, and steering systems by
    a. describing the operation of aircraft oleo shock struts (1a, 1b, 2c);
    b. identifying the component parts of an oleo shock strut (1a, 1b, 2c);
    c. explaining the purpose of a shock strut (1a, 1b, 2c);
    d. disassembling a shock strut (1a, 1b, 2c, 2e);
    e. inspecting the component parts of the shock strut (1a, 1b, 2c, 2e);
    f. installing new seals and reassembling the shock strut (1a, 1b, 2c, 2e);
    g. servicing the strut with fluid and air (nitrogen) (1a, 1b, 2c, 2e).
5. Demonstrate the ability to use aircraft manufacturer's instructions to operate inspect, service, and adjust retractable landing gear by
    a. placing a retractable gear aircraft on jacks and raising the aircraft from the hangar floor (1a, 1b, 2c, 2e);
    b. operating the retractable landing gear (1a, 1b, 2c, 2e);
    c. observing and inspecting the landing gear as it retracts and extends for proper operation (1a, 1b, 2c, 2e);
    d. operating or checking the emergency extension system (1a, 1b, 2c, 2e);
    e. adjusting the landing gear component parts for proper operation as needed (1a, 1b, 2c, 2e);
    f. lowering the aircraft to the hangar floor (1a, 1b, 2c, 2e).
6. Demonstrate the ability to use aircraft manufacturer's instructions to check landing gear alignment by
    a. measuring and recording the caster, camber, toe in and toe out of the landing gear (1a, 1b, 2c, 2e);
    b. judging whether the landing gear is acceptable for return to service (1a, 1b, 2c, 2e);
    c. recommending a method to return the gear alignment to acceptable limits if the alignment is determined to be unacceptable (unairworthy) (1a, 1b, 2c, 2e).
7. Demonstrate the ability to use aircraft manufacturer's instructions to inspect, adjust, and service both nose and tail wheel steering and damping mechanisms by
    a. inspecting nose wheel steering cylinders or steering rods (push/pull tubes) for nose wheel (tricycle gear) aircraft (1a, 1b, 2c, 2e);
    b. inspecting shimmy dampers on nose wheel aircraft (1a, 1b, 2c, 2e);
    c. repairing or servicing repairable shimmy dampers on nose wheel aircraft (1a, 1b, 2c, 2e);
    d. inspecting anti-shimmy devices on tail wheel (conventional landing gear) aircraft (1a, 1b, 2c, 2e);
    e. inspecting coil spring shock units (typically built into tail wheel control cables or connections) (1a, 1b, 2c, 2e).

AERM 1351 - Aircraft Turbine Engine Theory

General

Course Key
366

Course Rubric	Course Number	Course Title
AERM	1351	Aircraft Turbine Engine Theory

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). General principles of theory, history, and servicing of turbine engines to include lubrication, instrumentation, auxiliary power units, and exhaust systems. Fundamentals of safety procedures are also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe turbine engine operation; identify and select lubricants; inspect, service, troubleshoot, and repair turbine engine ignition systems and components, electrical and pneumatic starting systems, engine lubrication system components and systems, unducted systems and components, and turbine-driven auxiliary power units; inspect and repair engine exhaust system components; and inspect, service, troubleshoot, and repair engine thrust reverser systems and related components, electrical and mechanical fluid rate of flow- indicating systems, engine temperature, pressure, and rpm-indicating systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of aircraft turbine engine theory by
    a. making a line drawing or sketch of a turbine engine (1a, 1b, 2c);
    b. labeling the sections of the turbine engine (1a, 1b, 2c);
    c. illustrating the application of Newton's second and third laws of motion (1a, 1b, 2c);
    d. explaining the Brayton cycle (1a, 1b, 2c);
    e. explaining the principles of turbine engine operation (1a, 1b, 2c);
2. Demonstrate an understanding of the characteristics of different turbine compressors by
    a. identifying the different types of compressors (1a, 1b, 2c);
    b. labeling sketches of turbine compressors (1a, 1b, 2c);
    c. explaining the air flow characteristics of each type of compressor (1a, 1b, 2c);
    d. identifying compressor surge and cause for performance loss (1a, 1b, 2c);
3. Demonstrate an understanding of the airflow in diffusers by
    a. locating the diffuser on a turbine engine (1a, 1b, 2c);
    b. explaining the relationship of the diffuser to the engine (1a, 1b, 2c);
4. Demonstrate an understanding of the types and characteristics of combustion chambers by
    a. identifying various types of combustion chambers (1a, 1b, 2c);
    b. explaining the operating characteristics of each type (1a, 1b, 2c);
    c. explaining the airflow and flame paths through each type of combustion chamber (1a, 1b, 2c);
5. Demonstrate an understanding of impulse and reaction blades and thrust reversers by
    a. identifying each type of turbine blade (1a, 1b, 2c);
    b. illustrating, using line drawings or sketches, the characteristics of each type of blade (1a, 1b, 2c);
    c. labeling a drawing of a reverser (1a, 1b, 2c);
    d. describing the gas flow around the exhaust cone of a turbine engine (1a, 1b, 2c);
6. Demonstrate an understanding of fan or bypass turbine engines characteristics by
    a. identifying major components of a fan or bypass turbine engines (1a, 1b, 2c);
    b. explaining air flow in a fan or bypass turbine engines (1a, 1b, 2c);
    c. discussing inspection and troubleshooting of unducted fan systems and components (1a, 1b, 2c);
7. Demonstrate the ability to inspect, check, service, troubleshoot, and repair turbine engine fuel metering systems by
    a. describing the types of fuel control systems used on gas turbine engines (1a, 1b, 2c);
    b. describing the operation of a typical fuel control (1a, 1b, 2c);
    c. interpreting information from the service manual and diagram a fuel control system (1a, 1b, 2c);
    d. identifying major components of a fuel control system (1a, 1b, 2c);
8. Demonstrate the ability to inspect, check, service, troubleshoot, and repair turbine engine lubrication systems by
    a. interpreting information from the service manual and diagramming the oil and scavenging system of a turbine engine (1a, 1b, 2c);
    b. describing the lubrication of a turbine engine system (1a, 1b, 2c);
    c. identifying components of a turbine engine oil scavenging system (1a, 1b, 2c);
    d. troubleshooting turbine engine lubrication system problems (1a, 1b, 2c, 2e);
    e. interpreting FAA regulations pertaining to turbine engine oil systems (1a, 1b, 2c);
9. Demonstrate an understanding of the inspection, checking, servicing, troubleshooting and repair of turbine engine ignition systems and components by
    a. describing the types of ignition systems used on gas turbine engines (1a, 1b, 2c);
    b. describing the operation of each type of ignition system used on gas turbine engines (1a, 1b, 2c);
    c. identifying major components of each type of ignition system used on gas turbine engines (1a, 1b, 2c);
10. Demonstrate an understanding of the principles of operation of turbine engine electrical and pneumatic starting systems by
    a. describing the operating principles for the electrical starting systems used on gas turbine engines (1a, 1b, 2c);
    b. describing the operating principles for pneumatic starting systems used on gas turbine engines (1a, 1b, 2c);
11. Demonstrate the ability to inspect, check, service, troubleshoot, and repair electrical and mechanical engine temperature, pressure, and rpm indicating systems on turbine engines by
    a. describing the operating principles of temperature indicating systems for aircraft engine instrumentation (1a, 1b, 2c);
    b. describing the installation practices for temperature indicating systems for aircraft engine instrumentation (1a, 1b, 2c);
    c. explaining the purpose of engine pressure indicating systems for aircraft engine instrumentation (1a, 1b, 2c);
    d. describing the operating principles of engine pressure indicating systems for aircraft engine instrumentation (1a, 1b, 2c);
    e. describing troubleshooting of engine pressure indicating systems for aircraft engine instrumentation (1a, 1b, 2c);
    f. inspecting, checking, troubleshooting, and repairing engine tachometer systems for aircraft engine instrumentation (1a, 1b, 2c, 2e);
12. Demonstrate an understanding of electrical and mechanical fluid rate of flow indicating systems by
    a. describing electrical and mechanical fluid rate of flow indicating systems (1a, 1b, 2c);
    b. inspecting, checking, troubleshooting, and repairing electrical and mechanical fluid rate of flow indicating systems (1a, 1b, 2c, 2e);

AERM 1357 - Fuel Metering and Induction Systems

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). Skill development in fuel metering and induction systems used on reciprocating and turbine engines including fuel metering systems, carburetors, induction systems, heat exchangers, and cooling systems. Fundamentals of safety procedures will also be addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect, check, service, troubleshoot, and repair engine fuel systems and components, turbine engine fuel metering systems and components, electronic engine fuel controls, fuel metering systems and components, reciprocating and turbine engine fuel metering systems, engine ice and rain control systems, heat exchangers, superchargers, turbine engine airflow and temperature control systems, carburetor air intake and induction manifolds, and engine cooling system and components; overhaul carburetors; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to inspect, check, service, troubleshoot, and repair engine fuel systems by
    a. locating information from reference publications (1a, 1b, 2c);
    b. interpreting information from reference publications (1a, 1b, 2c);
    c. describing how FAA regulations govern the strainers, lines, vents, expansion space, and sumps of specific fuel systems (1a, 1b, 2c);
    d. inspecting, checking, servicing, and repairing an engine fuel system (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of engine fuel system components by
    a. locating service information for fuel pumps (1a, 1b, 2c);
    b. interpreting service information for fuel pumps (1a, 1b, 2c);
    c. identifying the parts of fuel pumps (1a, 1b, 2c, 2e);
    d. describing the operation of fuel pumps with rotation vs. flow (1a, 1b, 2c).
3. Demonstrate an understanding of the purpose of auxiliary and fuel boost pumps and the ability to remove and reinstall pumps by
    a. explaining the purpose of auxiliary and fuel boost pumps (1a, 1b, 2c);
    b. describing the operation of various types of pumps (1a, 1b, 2c);
    c. removing and reinstalling an auxiliary or boost pump in the fuel system (1a, 1b, 2c, 2e).
4. Demonstrate the ability to inspect, check, service, troubleshoot, and repair reciprocating engine fuel metering systems by
    a. describing the operation of a carburetor (1a, 1b, 2c);
    b. explaining the effect of variations in temperature, pressure, and humidity on operation of the engine (1a, 1b, 2c);
    c. locating service information (1a, 1b, 2c);
    d. interpreting service information (1a, 1b, 2c);
    e. labeling a sketch of a carburetor, identifying components and systems (1a, 1b, 2c);
    f. describing the operation of each carburetor system (1a, 1b, 2c);
    g. identifying passageways of the carburetor (1a, 1b, 2c, 2e);
    h. tracing the flow of fuel and air (1a, 1b, 2c, 2e);
    i. describing how the fuel air mixture is metered into the engine (1a, 1b, 2c, 2e);
    j. locating service information for filter screens in a fuel metering unit (1a, 1b, 2c);
    k. interpreting service information for filter screen inspection and service (1a, 1b, 2c);
    l. identifying, removing, cleaning, and reinstalling the filter screens in a fuel metering unit (1a, 1b, 2c, 2e).
5. Demonstrate an understanding of the inspection and servicing of float type carburetors and fuel metering system components by
    a. locating service information for a given carburetor (1a, 1b, 2c);
    b. interpreting information from the service information (1a, 1b, 2c);
    c. identifying the venturi in one specific carburetor (1a, 1b, 2c, 2e);
    d. identifying the venturi by size or part number (1a, 1b, 2c, 2e);
    e. describing the function of a venturi in a carburetor (1a, 1b, 2c);
    f. disassembling the carburetor to the degree necessary to identify the air bleed (1a, 1b, 2c, 2e);
    g. describing the operation of the air bleed (1a, 1b, 2c, 2e);
    h. removing the metering jet from the carburetor (1a, 1b, 2c, 2e);
    i. measuring the size of the metering jet (1a, 1b, 2c, 2e);
    j. reinstalling the metering jet (1a, 1b, 2c, 2e);
    k. explaining the purpose of the metering jet (1a, 1b, 2c);
    l. inspecting the floats (1a, 1b, 2c, 2e);
    m. describing the repair of carburetor floats (1a, 1b, 2c);
    n. inspecting the needle and seat assemblies (1a, 1b, 2c, 2e);
    o. determining if the needle and seat assemblies are serviceable (1a, 1b, 2c, 2e);
    p. reinstalling the needle and seat (1a, 1b, 2c, 2e);
    q. adjusting the float level (1a, 1b, 2c, 2e);
    r. identifying the acceleration system in a float type carburetor (1a, 1b, 2c, 2e);
    s. describing the operation of acceleration systems (1a, 1b, 2c).
6. Demonstrate an understanding of the inspection and servicing of pressure type carburetors and direct fuel injection systems by
    a. explaining fuel and airflow through pressure carburetors (1a, 1b, 2c);
    b. identifying a pressure type carburetor (1a, 1b, 2c, 2e);
    c. identifying a direct fuel injection system (1a, 1b, 2c, 2e);
    d. describing the operation of a pressure type carburetor (1a, 1b, 2c);
    e. describing the operation of a direct fuel injection system (1a, 1b, 2c);
    f. comparing the advantages and limitations of both systems (1a, 1b, 2c);
    g. explaining the function of vapor separators and vapor vents (1a, 1b, 2c);
    h. identifying the components and operation of the vapor separator/vent system (1a, 1b, 2c, 2e);
    i. identifying the mixture control components in the pressure carburetor (1a, 1b, 2c, 2e);
    j. describing the operation of the mixture control system (1a, 1b, 2c);
    k. identifying the power enrichment systems (1a, 1b, 2c, 2e);
    l. describing the operation of the power enrichment system in a pressure type carburetor (1a, 1b, 2c);
    m. identifying impact tubes in a pressure carburetor (1a, 1b, 2c, 2e);
    n. explaining the relationship of the impact tubes to the pressure regulator and automatic mixture control unit of the pressure carburetor (1a, 1b, 2c);
    o. explaining the effect of clogged impact tubes on the operation of an engine (1a, 1b, 2c);
    p. explaining the effect of a ruptured fuel or air diaphragm on the operation of an engine (1a, 1b, 2c);
    q. identifying the main discharge nozzle of a pressure carburetor (1a, 1b, 2c, 2e);
    r. describing the operation of the main discharge nozzle (1a, 1b, 2c);
    s. describing possible malfunctions of the main discharge system (1a, 1b, 2c);
    t. locating service information regarding the inspection, checking, and servicing of water injection systems (1a, 1b, 2c);
    u. comparing continuous flow fuel injection and direct cylinder injection systems (1a, 1b, 2c).
7. Demonstrate the ability to inspect, check, service, and repair engine ice and rain control systems by
    a. describing the formation of ice in the induction systems of reciprocating engines (1a, 1b, 2c);
    b. labeling line drawings to illustrate the most common location for the buildup of ice in the induction system (1a, 1b, 2c, 2e);
    c. inspecting, checking, and servicing the heater muff, connecting the duct to the heater box and shutter (1a, 1b, 2c, 2e);
    d. describing the repairs that are approved or acceptable (1a, 1b, 2c);
    e. verifying that the shutter of the heat box has full travel (1a, 1b, 2c, 2e);
    f. explaining the effects of carburetor heat (1a, 1b, 2c).
8. Demonstrate the ability to inspect, check, service, and repair carburetor air intake and induction manifolds by
    a. operating an aircraft engine as a means of recognizing normal operation (1a, 1b, 2c, 2e);
    b. operating the engine after the instructor has introduced a partial obstruction into the air intake duct (1a, 1b, 2c, 2e);
    c. recording the symptoms associated with air intake duct restrictions (1a, 1b, 2c, 2e);
    d. inspecting, checking, servicing, and repairing the system to correct the obstruction in the intake duct (1a, 1b, 2c, 2e);
    e. removing induction screens or filters (1a, 1b, 2c, 2e);
    f. inspecting, servicing, and reinstalling the screen or filter into the engine air intake (1a, 1b, 2c, 2e);
    g. describing the rigging of an alternate intake door (alternate air source) (1a, 1b, 2c).
9. Demonstrate an understanding of the inspection, checking, servicing, troubleshooting, and repair of heat exchangers and superchargers by
    a. describing the inspection of heat exchangers (1a, 1b, 2c);
    b. describing the methods of repair (1a, 1b, 2c);
    c. describing the inspection of turbo superchargers and turbo compound engines (1a, 1b, 2c);
    d. describing the operation of turbo superchargers and turbo compound engines (1a, 1b, 2c);
    e. describing the inspection and repair of superchargers (1a, 1b, 2c);
    f. labeling drawings of the intake manifold systems of supercharged engines and identifying the approximate pressures and temperatures that will exist at various positions in the systems while operating (1a, 1b, 2c).

10. Demonstrate the ability to inspect, check, service, troubleshoot, and repair engine cooling systems by
    a. inspecting, checking, and servicing the cooling system of a completely cowled and baffled engine (1a, 1b, 2c, 2e);
    b. describing the effects of excessive heat, cowl flaps, baffles, augmentors, and fuel/air ratios (1a, 1b, 2c);
    c. identifying sample baffles that are repairable (1a, 1b, 2c, 2e);
    d. stop-drilling and making riveted repairs to baffles (1a, 1b, 2c, 2e);
    e. identifying baffles requiring welded repairs (1a, 1b, 2c, 2e);
    f. making recommendations for repair of baffling (1a, 1b, 2c, 2e);
    g. describing the limits and repairs to cylinder cooling fins in accordance with manufacturer's specifications (1a, 1b, 2c).

AERM 1452 - Aircraft Sheet Metal

General

Course Key
380

Course Rubric
AERM

Course Number
1452

Course Title
Aircraft Sheet Metal

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
7

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-7). Skill development in inspection and repair of sheet metal structures including forming, lay out, and bending of sheet metal and identification, selection, and installation of rivets and fasteners. Fundamentals of safety procedures also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select, install, and remove special fasteners for metallic structures; inspect and repair sheet metal structures; install conventional rivets; form, lay out, and bend sheet metal; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify conventional aircraft rivets by
    a. identifying aircraft rivets by head style (1a, 1b, 2c);
    b. identifying aircraft rivets by alloy (1a, 1b, 2c);
    c. identifying aircraft rivets by size (1a, 1b, 2c);
    d. identifying factors that determine the use of specific types of rivets in aircraft (1a, 1b, 2c).

2. Demonstrate the ability to perform riveting to FAA and industry standards by
    a. identifying improperly installed or damaged rivets (1a, 1b, 2c, 2e);
    b. removing improperly installed or damaged rivets in accordance with FAA and industry standards (1a, 1b, 2c, 2e);
    c. replacing improperly installed or damaged rivets in accordance with FAA and industry standards (1a, 1b, 2c, 2e);
    d. fabricating various repairs on aluminum structures in accordance with FAA and industry standards (1a, 1b, 2c, 2e).

3. Demonstrate the ability to form, layout and bend sheet metal by
    a. making a joggle using aluminum alloy sheet (1a, 1b, 2c, 2e);
    b. making a sketch of a repair showing a layout (1a, 1b, 2c);
    c. preparing a layout for a bend in aircraft sheet metal (1a, 1b, 2c);
    d. laying out and making bends in sheet metal (1a, 1b, 2c, 2e);
    e. forming an aluminum part (1a, 1b, 2c, 2e).

4. Demonstrate the ability to inspect and repair sheet metal and aircraft structural units by
    a. identifying scratches repairable by burnishing and repair (1a, 1b, 2c, 2e);
    b. selecting and using different numbered and lettered drills (1a, 1b, 2c, 2e);
    c. countersinking holes for flush rivets and flush screws (1a, 1b, 2c, 2e);
    d. determining the next largest size rivet and required hole size (1a, 1b, 2c, 2e);
    e. reaming a hole to the proper diameter (1a, 1b, 2c, 2e);
    f. determining the type of corrosion protection required for assembly of different (dissimilar) aircraft metals (1a, 1b, 2c);
    g. listing the type of coating to be applied to dissimilar metals (1a, 1b, 2c);
    h. describing loads in fuselage and wing structures (1a, 1b, 2c);
    i. describing types of overload failures (1a, 1b, 2c);
    j. inspecting the skin, rivets, and structural members of an aircraft for evidence of damage (1a, 1b, 2c, 2e);
    k. identifying any popped or sheared rivets (1a, 1b, 2c, 2e);
    l. identifying wrinkled or distorted skin (1a, 1b, 2c, 2e);
    m. identifying misaligned or cracked structural members (1a, 1b, 2c, 2e);
    n. identifying any other evidences of overload (1a, 1b, 2c, 2e);
    o. performing minor repairs of real or introduced damage to aircraft skin, stringers, or other structures selected by the instructor (1a, 1b, 2c, 2e).

5. Demonstrate an ability to inspect, check, service, and repair aircraft transparent enclosures (windows), doors, and interior furnishings by
    a. listing types of transparent aircraft enclosure materials (1a, 1b, 2c);
    b. distinguishing characteristics of each type of transparent aircraft enclosure (1a, 1b, 2c);
    c. cleaning plastic windows (1a, 1b, 2c, 2e);
    d. removing shallow scratches and surface crazing from transparent plastic enclosures (1a, 1b, 2c, 2e);
    e. protecting plastic enclosure material during handling, repair, and storage (1a, 1b, 2c, 2e);

f. securing plastic enclosures in aircraft structures (1a, 1b, 2c, 2e);

g. inspecting and checking pressure door seals, windows, seat recline mechanisms, and safety belt installations (1a, 1b, 2c, 2e).

6. Demonstrate the ability to select, install, and remove special fasteners for metallic bonded and composite structures by

a. listing precautions necessary for proper fit when installing special hi shear and pull type rivets (1a, 1b, 2c);

b. listing the stresses that such rivets are designed to resist (1a, 1b, 2c);

c. listing the applications and limitations for the use of special rivets and fasteners in aircraft repair (1a, 1b, 2c);

d. identifying different special rivets and fasteners used in aircraft repair (1a, 1b, 2c);

e. selecting, installing, and removing special fasteners in metallic, bonded, and composite structures (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Maintain powerplant electrical systems and components; maintain powerplant ignition, starting, and fire protection systems; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to install, check, and service engine electrical wiring, controls, switches, indicators, and protective devices by

a. discussing the types, purpose, applicability and operation of electrical fuses, circuit breakers, and switches used in powerplant electrical systems (1a, 1b, 2c);

b. discussing the selection and installation of aircraft electrical switches and wiring engine electrical components (1a, 1b, 2c);

c. discussing the installation requirements and characteristics for aircraft electrical wiring systems and junction boxes (1a, 1b, 2c);

d. discussing the use of quick disconnect electrical connectors and characteristics of high and low tension electrical wire (1a, 1b, 2c);

e. installing and wiring solenoid operated switches, determining causes and effects of solenoid switch chatter (1a, 1b, 2c, 2e);

f. determining the current required for an engine electrical component (1a, 1b, 2c, 2e);

g. using an AWG chart to select wire of adequate size for the correct voltage drop (1a, 1b, 2c, 2e);

h. installing a suitable switch to energize a component (1a, 1b, 2c, 2e).

2. Demonstrate the ability to repair engine electrical system components by

a. locating procedures for repair of faults identified by the instructor (1a, 1b, 2c, 2e);

b. listing replacement parts (1a, 1b, 2c, 2e);

c. listing all reference pages (1a, 1b, 2c, 2e);

d. listing the part number and nomenclature (1a, 1b, 2c, 2e);

e. reading and recording voltage and output current for each direct current (DC) generator on an operating dual generator aircraft or training aid (1a, 1b, 2c, 2e);

f. adjusting the voltage regulators (1a, 1b, 2c, 2e);

g. adjusting load equalization (1a, 1b, 2c, 2e);

h. flashing a generator field (1a, 1b, 2c, 2e);

i. checking the operation of the reverse current cutout relays (1a, 1b, 2c, 2e);

j. calculating the approximate total continuous load on the aircraft electrical system (all components operating which are designated for continuous operation) (1a, 1b, 2c);

k. determining the maximum permissible continuous electrical load which may be imposed on the aircraft generating system (1a, 1b, 2c);

l. disassembling, inspecting, assembling, and testing a starter (1a, 1b, 2c, 2e);

m. drawing an exploded view of the starter (1a, 1b, 2c, 2e);

n. labeling all component parts (1a, 1b, 2c, 2e).

3. Demonstrate the ability to install, check, service, troubleshoot, and repair engine fire detection and extinguishing systems by

a. testing the operation of an engine fire detection system (1a, 1b, 2c, 2e);

b. checking continuity of the circuit (1a, 1b, 2c, 2e);

c. checking individual fire detectors (1a, 1b, 2c, 2e);

d. locating and correcting a malfunction introduced by the instructor (1a, 1b, 2c, 2e);

e. inspecting all components of the fire extinguishing system (1a, 1b, 2c, 2e);

f. checking for correct operation of the system with the container removed (1a, 1b, 2c, 2e);

g. checking for proper arming and firewall shutdown (1a, 1b, 2c, 2e);

h. checking pressure of the container (1a, 1b, 2c, 2e);

i. listing three possible causes for failure of an engine fire extinguisher system to operate (1a, 1b, 2c).

4. Demonstrate the ability to disassemble, inspect component parts, service, repair, reassemble, and operationally check a magneto and impulse coupling by

a. disassembling a magneto (1a, 1b, 2c, 2e);

b. cleaning all parts (1a, 1b, 2c, 2e);

c. identifying the components (1a, 1b, 2c, 2e);

d. describing the materials and design features of the magneto (1a, 1b, 2c, 2e);

e. testing each of the coils for opens and shorts (1a, 1b, 2c, 2e);

f. testing the condensers and recording the results (1a, 1b, 2c, 2e);

g. comparing the results with the condenser specifications (1a, 1b, 2c, 2e);

h. determining if the condenser meets specifications (1a, 1b, 2c, 2e);

i. reassembling the magneto (1a, 1b, 2c, 2e);

j. maintaining internal timing (1a, 1b, 2c, 2e);

k. verifying E gap position (1a, 1b, 2c, 2e);

l. inspecting the breaker assemblies (1a, 1b, 2c, 2e);

m. selecting a serviceable assembly (1a, 1b, 2c, 2e);

n. installing a breaker assembly in the magneto (1a, 1b, 2c, 2e);

o. adjusting the breaker assembly (1a, 1b, 2c, 2e);

p. completing final assembly of the magneto (1a, 1b, 2c, 2e);

q. disassembling the impulse coupling (1a, 1b, 2c, 2e);

r. cleaning the coupling (1a, 1b, 2c, 2e);

s. inspecting the coupling (1a, 1b, 2c, 2e);

t. reassembling the coupling and installing on the magneto (1a, 1b, 2c, 2e);

u. placing the magneto on a test bench and verifying proper operation (1a, 1b, 2c, 2e).

5. Demonstrate the ability to inspect, service, troubleshoot, and repair reciprocating engine ignition system components by

a. operating and testing a magneto on a test bench (1a, 1b, 2c, 2e);

b. identifying faults in the magneto if present (1a, 1b, 2c, 2e);

c. installing magnetos on an aircraft engine (1a, 1b, 2c, 2e);

d. timing magnetos to the engine (1a, 1b, 2c, 2e);

e. inspecting and using test equipment as a means of determining the serviceability of ignition wiring (1a, 1b, 2c, 2e);

f. inspecting an engine's ignition switch circuitry (1a, 1b, 2c, 2e);

g. checking the operation of the ignition switch by operating the engine (1a, 1b, 2c, 2e);

h. troubleshooting for faults that may be present in the ignition switch circuitry (1a, 1b, 2c, 2e);

i. correcting any faults that are found (1a, 1b, 2c, 2e);

j. identifying a shorted ignition lead through the use of an ignition harness tester (1a, 1b, 2c, 2e);

k. installing a magneto equipped with a booster system on a test bench (1a, 1b, 2c, 2e);

l. operating the magneto and booster system (1a, 1b, 2c, 2e);

m. repairing instructor introduced faults in the booster system (1a, 1b, 2c, 2e);

n. locating spark plug reference information (1a, 1b, 2c);

o. selecting spark plugs that meet specifications, and are approved for a given engine (1a, 1b, 2c);

p. removing spark plugs from an engine (1a, 1b, 2c, 2e);

q. inspecting, reconditioning, and testing the spark plugs (1a, 1b, 2c, 2e);

r. reinstalling the spark plugs in the engine (1a, 1b, 2c, 2e);

s. performing an operation test of the engine (1a, 1b, 2c, 2e).

AERM 2171 - Oral and Practical Exams, General

Course Key
15574

Course Rubric
AERM

Course Number
2171

Course Title
Oral and Practical Exams, General

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
0

Course Classification
Technical Local Need

Description
(1-1-0) The oral and practical exams are required for the FAA Mechanic certificate. The exams are scheduled individually with a Designated Mechanic Examiner to meet the requirements for the general portion of the Airframe and/or Powerplant rating. Required Pre-requisite: AERM-1205, AERM-1208, AERM-1303, AERM-1310, AERM-1314, AERM-1315

View Course Availability on MyTCCTrack

Type
Prerequisite

10
A Requirement block where all subrequirements are required

#Take AERM-1205 AERM-1208 AERM-1303 AERM-1310 AERM-1314 AERM-1315;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): AERM 1205, AERM 1208, AERM 1303, AERM 1310, AERM 1314, AERM 1315

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate, through an oral examination, knowledge of the subjects identified by Federal Regulation (CFR, Title14, Part 147) as General by

a. responding correctly verbally to a minimum of 70% of the General oral exam questions (1a, 1b, 2a, 2c, 2e).

2. Demonstrate knowledge, through a practical examination, of the subjects identified by Federal Regulation (CFR, Title14, Part 147) as General by

a. performing General practical projects with a minimum of 70% accuracy (1a, 1b, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform airframe conformity and airworthiness inspections; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to perform airframe conformity and airworthiness inspections required by 14 CFR, Part 91.409, and in accordance with 14 CFR, Part 43.11 and 43.15 by:
    a. identifying and reviewing all documents that will be used to determine conformity (1a, 1b, 2c);
    b. identifying and reviewing all Airworthiness Directives (AD's) that are applicable to the airframe, airframe components, and airframe systems being inspected (1a, 1b, 2c);
    c. identifying, gathering, and preparing all tools and equipment that will be required for the 100 Hour Inspection (1a, 1b, 2c, 2e);
    d. preparing the airframe for inspection (cleaning and opening inspection panels) (1a, 1b, 2c, 2e);
    e. performing the 100 Hour Inspection in accordance with 14 CFR, Part 43.15 (1a, 1b, 2c, 2e);
    f. providing two example maintenance record entries for the 100 Hour Inspection in accordance with 14 CFR, Part 43.11: One entry indicating an airworthy condition; the second entry indicating a completed inspection, with a non-airworthy determination because of discrepancies and non-airworthy items (1a, 1b, 2c, 2e).
2. Review the subjects covered in all AERM General and Airframe courses by:
    a. completing both written and practical projects assigned by the instructor that will review AERM General and Airframe courses (1a, 1b, 2c);
    b. completing practice exams that are designed to prepare the student to successfully pass the General and Airframe FAA written exams (1a, 1b, 2c).

AERM 2233 - Assembly and Rigging

General

Course Key
396

Course Rubric
AERM

Course Number
2233

Course Title
Assembly and Rigging

Semester Credit Hours
2

Lecture Hours
1

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-2). A comprehensive study of the assembly and rigging of fixed and rotary-wing aircraft including structural alignment, balancing and rigging of control systems, and assembly of aircraft components. Fundamentals of safety procedures are also addressed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Rig rotary-wing and fixed-wing aircraft; check alignment of structures; assemble aircraft components including flight control surfaces; balance, rig, and inspect movable primary and secondary flight control surfaces; jack aircraft; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the theory, principles, and physics of flight by:
    a. defining the term aerodynamics (1a, 1b, 2c);
    b. defining the term atmosphere (1a, 1b, 2c);
    c. discussing atmospheric pressure (1a, 1b, 2c);
    d. discussing air density (1a, 1b, 2c);
    e. discussing humidity (1a, 1b, 2c);
    f. stating Bernoulli's Principle (1a, 1b, 2c);
    g. explaining Bernoulli's Principle (1a, 1b, 2c);
    h. discussing the related terms motion, velocity, and acceleration;
    i. stating Newton's Laws of Motion (1a, 1b, 2c);
    j. explaining Newton's Laws of Motion (1a, 1b, 2c);
    k. discussing the relationships among the atmosphere, the aircraft, and the forces acting on the aircraft in flight (1a, 1b, 2c);
2. Demonstrate an understanding of terms related to fixed-wing aircraft theory of flight by:
    a. describing airfoils and their shapes (1a, 1b, 2c);
    b. defining the term axes of an aircraft (1a, 1b, 2c);
    c. defining the term angle of attack (1a, 1b, 2c);
    d. defining the term angle of incidence (1a, 1b, 2c);
    e. defining the term center of gravity (1a, 1b, 2c);
    f. defining the term stability (1a, 1b, 2c);
3. Demonstrate an understanding of the nomenclature of fixed-wing aircraft flight controls by:
    a. identifying primary control surfaces (1a, 1b, 2c);
    b. identifying secondary control surfaces (1a, 1b, 2c);
    c. identifying auxiliary control surfaces (1a, 1b, 2c);
4. Demonstrate an understanding of the operation of fixed-wing flight controls by:
    a. explaining the use and operation of primary flight controls (1a, 1b, 2c);
    b. explaining the use and operation of secondary flight controls (1a, 1b, 2c);
    c. explaining the use and operation of auxiliary flight controls (1a, 1b, 2c);
5. Demonstrate the ability to rig fixed-wing flight controls by:
    a. locating the aircraft specifications for a given aircraft (1a, 1b, 2c);
    b. reviewing the specifications for flight control travel data (1a, 1b, 2c);
    c. locating the aircraft maintenance/service instructions (1a, 1b, 2c);
    d. reviewing the maintenance/service instructions for control system rigging (control surface travel) and cable tension (1a, 1b, 2c, 2e);
    e. adjusting (rigging) a specific flight control (assigned by the instructor) in accordance with the aircraft specifications and maintenance/service manual (1a, 1b, 2c, 2e);
6. Demonstrate an understanding of terms related to rotary-wing aircraft theory of flight by:
    a. describing the forces acting on a helicopter in flight and on the ground (1a, 1b, 2c);
    b. describing the term torque as it applies to helicopter rotor systems (1a, 1b, 2c);
    c. describing the term anti-torque rotor (1a, 1b, 2c);

d. defining gyroscopic precession in a rotor system (1a, 1b, 2c);

e. explaining how torque is overcome in a helicopter (1a, 1b, 2c);

f. describing dissymmetry of lift (1a, 1b, 2c);

g. explaining how dissymmetry of lift is overcome in a helicopter (1a, 1b, 2c, 2e);

h. describing rotor blade flapping (1a, 1b, 2c);

i. describing rotor coning (1a, 1b, 2c);

j. describing ground effect (1a, 1b, 2c);

k. explaining autorotation (1a, 1b, 2c);

l. identifying the axes of flight (1a, 1b, 2c);

m. identifying the flight controls used in helicopter operation (1a, 1b, 2c);

n. explaining the flight controls used in helicopter operation (1a, 1b, 2c);

7. Perform a symmetry check on an aircraft by:

a. locating the assembly and symmetry check section of the maintenance/service information for a given aircraft (1a, 1b, 2c, 2e);

b. determining from the maintenance/service information the alignment checks that are to be made (1a, 1b, 2c, 2e);

c. placing the aircraft in the state or condition described in the instructions (1a, 1b, 2c, 2e);

d. making all measurements called out in the instructions and recording all measurements (1a, 1b, 2c, 2e);

e. determining from the measurements if the aircraft symmetry is within the required specifications (1a, 1b, 2c);

8. Demonstrate the ability to inspect and balance a primary and secondary flight control surface by:

a. locating the flight control section of the maintenance/service information for a given aircraft (1a, 1b, 2c, 2e);

b. determining any damage limits permitted for flight controls on the aircraft (1a, 1b, 2c, 2e);

c. inspecting a primary flight control surface that is assigned by the instructor (1a, 1b, 2c, 2e);

d. determining if any damage or wear exists on the primary flight control (1a, 1b, 2c, 2e);

e. determining if the primary flight control is in an airworthy condition (1a, 1b, 2c, 2e);

f. inspecting a secondary flight control surface that is assigned by the instructor (1a, 1b, 2c, 2e);

g. determining if any damage or wear exists on the secondary flight control (1a, 1b, 2c, 2e);

h. determining if the secondary flight control is in an airworthy condition (1a, 1b, 2c, 2e);

i. removing a primary flight control surface that is assigned by the instructor (1a, 1b, 2c, 2e);

j. performing a balance test on the primary flight control (1a, 1b, 2c, 2e);

k. rebalancing the flight control if it is determined to be out of balance limits, or rebalancing a mockup/training aid to demonstrate ability (1a, 1b, 2c, 2e);

l. removing a secondary flight control surface (1a, 1b, 2c, 2e);

m. performing a balance test on the secondary flight control (1a, 1b, 2c, 2e);

n. reinstalling the secondary flight control surface (1a, 1b, 2c, 2e);

o. confirming or adjusting the secondary flight control surface travel (1a, 1b, 2c, 2e);

9. Demonstrate the ability to assemble aircraft components, including flight control surfaces by:

a. removing and installing an aircraft flight control pulley in accordance with the maintenance/service instructions for that activity (1a, 1b, 2c, 2e);

b. inspecting an aircraft cable for proper condition and tension in accordance with the maintenance/service instructions for that activity (1a, 1b, 2c, 2e);

c. removing and installing a flight control surface in accordance with the maintenance/service instructions for that activity (1a, 1b, 2c, 2e);

AERM 2252 - Aircraft Powerplant Inspection

Required Prerequisite(s): Consult the Department Chairperson

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform powerplant conformity and airworthiness inspections; demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to perform conformity and airworthiness inspections on aircraft engines and engine accessories as required by 14 CFR, Part 91.409 (One Hundred Hour), and in accordance with 14 CFR, Part 43.11 and 43.15 by:

a. identifying and reviewing all documents that will be used to determine conformity (1a, 1b, 2c);

b. identifying and reviewing all Airworthiness Directives (AD's) that are applicable to the engine and engine accessories being inspected (1a, 1b, 2c);

c. identifying, gathering, and preparing all tools and equipment that will be required for the One Hundred Hour inspection (1a, 1b, 2c, 2e);

d. preparing the engine and engine accessories for inspection (open and remove cowling, covers, spinner, etc.) (1a, 1b, 2c, 2e);

e. performing the One Hundred Hour inspection in accordance with 14 CFR, Part 43.15 (1a, 1b, 2c, 2e);

f. providing two example maintenance record entries for the One Hundred Hour inspection in accordance with 14 CFR, Part 43.11, one entry indicating an airworthy condition and the second entry indicating a completed inspection with a non-airworthy determination because of discrepancies and non-airworthy items (1a, 1b, 2c, 2e).

2. Demonstrate an understanding of the subjects covered in all AERM Powerplant courses by:

a. completing both written and practical projects assigned by the instructor that will review AERM Powerplant courses (1a, 1b, 2c);

b. completing practice exams that are designed to prepare the student to successfully pass the Powerplant FAA written exams (1a, 1b, 2c);

AERM 2351 - Aircraft Turbine Engine Overhaul

(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): AERM 1351

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Overhaul turbine engines; inspect, check, and repair turbine engines; remove, install, and troubleshoot turbine engines; and demonstrate procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to inspect, check, service, repair, and overhaul turbine engine and turbine engine installations by:
    a. locating information on overhauling turbine engines (1a, 1b, 2c);
    b. performing a hot section inspection (1a, 1b, 2c, 2e);
    c. removing a combustion case and liner from an engine (1a, 1b, 2c, 2e);
    d. installing a combustion case and liner into an engine (1a, 1b, 2c, 2e);
    e. locating information contained in the engine maintenance/service instructions for disassembling an engine compressor section (1a, 1b, 2c);
    f. listing the procedures, tools, and safety precautions to be observed when disassembling an engine compressor section (1a, 1b, 2c, 2e);
    g. removing some portion of a compressor section as assigned by the instructor (1a, 1b, 2c, 2e);
    h. reinstalling the compressor section without damage to the engine or components (1a, 1b, 2c, 2e);
    i. identifying a combustion chamber hot spot (1a, 1b, 2c, 2e);
    j. explaining the two causes of hot spots in the outer combustion casting (1a, 1b, 2c);
    k. explaining how the alignment and spray pattern of a fuel nozzle is checked;
    l. identifying damaged turbine blades (1a, 1b, 2c);
2. Demonstrate the ability to troubleshoot, remove, and install a turbine engine by:
    a. describing resolution of maintenance problems through a troubleshooting process (1a, 1b, 2c);
    b. removing a turbine engine from a maintenance stand or mockup (1a, 1b, 2c, 2e);
    c. reinstalling a turbine engine onto a maintenance stand or mockup (1a, 1b, 2c, 2e);
3. Demonstrate the ability to inspect, check, service, troubleshoot, and repair turbine engine fuel metering systems by:
    a. describing the operation of the fuel control unit of a turbine engine from idle speed range through full power (1a, 1b, 2c);
    b. demonstrating the procedure for adjusting the fuel control unit on a mockup or simulated engine (1a, 1b, 2c, 2e);
4. Demonstrate the ability to troubleshoot and adjust turbine engine fuel metering systems and electronic engine fuel controls by:
    a. removing a fuel nozzle from a turbine engine (1a, 1b, 2c, 2e);
    b. reinstalling a fuel nozzle in a turbine engine without damaging the nozzle or components (1a, 1b, 2c, 2e);
    c. explaining the fuel flow through the nozzle (1a, 1b, 2c);
5. Demonstrate the ability to identify and select lubricants (engine lubricating oil) by:
    a. recognizing the containers for lubricants (1a, 1b, 2c, 2e);
    b. identifying types of lubricant (1a, 1b, 2c, 2e);
    c. locating service information specifying the type of lubricant recommended for a specified engine (1a, 1b, 2c, 2e);
    d. explaining the general precautions to be observed when adding or changing engine lubricating oil (1a, 1b, 2c);
6. Demonstrate the ability to inspect, check, service, troubleshoot, and repair engine lubrication systems by:
    a. draining oil, cleaning and inspecting screens, reinstalling all safety drain plugs, and refilling the system with lubricating oil (1a, 1b, 2c, 2e);
    b. explaining the reasons for changing the oil at specified intervals (1a, 1b, 2c);
    c. explaining the significance of metallic particles found in screens and filters (1a, 1b, 2c);
7. Demonstrate the ability to repair and service lubrication system components by:
    a. repairing and servicing instructor selected lubrication components (1a, 1b, 2c, 2e);
    b. adjusting the oil pressure of a turbine engine (1a, 1b, 2c, 2e);
8. Demonstrate the ability to inspect, check, service, troubleshoot, and repair turbine engine ignition systems and components by:
    a. listing methods for troubleshooting an inoperative ignition system (1a, 1b, 2c, 2e);
    b. using information to service and repair a turbine engine ignition system or component (1a, 1b, 2c, 2e);
9. Demonstrate the ability to inspect, service, troubleshoot, and repair turbine engine electrical starting systems by:
    a. inspecting an electrical starting system (1a, 1b, 2c, 2e);
    b. troubleshooting a real or instructor introduced problem in an electrical starting system (1a, 1b, 2c, 2e);
    c. repairing and servicing an electrical starting system (1a, 1b, 2c, 2e);
10. Demonstrate a basic understanding of the inspection, checking, repair, and troubleshooting of turbine driven auxiliary power units, thrust reverser systems and related components, and airflow and temperature control systems on turbine engines by:
    a. discussing auxiliary power units (1a, 1b, 2c);
    b. discussing thrust reverser systems (1a, 1b, 2c);
    c. discussing airflow and temperature control systems (1a, 1b, 2c);

AERM 2359 - Advanced Composite Repair

General

Course Key
14774

Course Rubric
AERM

Course Number
2359

Course Title
Advanced Composite Repair

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) An advanced study and practical application of composite repair, processes, and tooling. Includes complex repair and manufacturing techniques. Required Prerequisites: AERM-1254, AERM-1303, AERM-1315, PLTC-1271, and PLTC-1303

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take AERM-1254 AERM-1303 AERM-1315 PLTC-1303(6323) PLTC-1271;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): AERM 1254, AERM 1303, AERM 1315, PLTC 1271, and PLTC 1303

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify fiber and resin science combinations related to advanced composite repair and manufacturing; perform methodologies in fabrication of repair and manufacturing tooling; re-create the geometry of damaged contoured surfaces; perform methods of alternative heat sources for curing; and analyze the relationship between the cure temperature and the placement of thermocouples in order to determine the integrity of repair.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Interpret composite repair data (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of safe composite working practices (1a, 1b, 1c, 2a).
3. Perform an inspection of a composite article for damage (1a, 1b, 1c, 2c, 2e).
4. Identify the materials and their configurations in a damaged composite article (1a, 1b, 2c, 2e).
5. Fabricate repair tooling to recreate the geometry of a damaged surface (1a, 1b, 2a, 2c, 2e).
6. Demonstrate composite bonded repair techniques by:
    a. removing damaged materials (1a, 1b, 2c, 2e);
    b. describing the procedure for removing moisture in a composite article (1a, 1b, 2c);
    c. preparing a surface for bonding (1a, 1b, 2c, 2e);
    d. fabricating repair materials (1a, 1b, 2c, 2e);
    e. bonding replacement materials (1a, 1b, 2c, 2e);
7. Demonstrate composite laminate and/or sandwich structure repair techniques by:
    a. removing damaged ply materials (1a, 1b, 2c, 2e);
    b. removing damaged core materials (1a, 1b, 2c, 2e);
    c. describing the procedure for removing moisture in a composite article (1a, 1b, 2c);
    d. fabricating repair materials (1a, 1b, 2c, 2e);
    e. preparing a surface for bonding (1a, 1b, 2c, 2e);
    f. bonding replacement core materials (1a, 1b, 2c, 2d, 2e);
    g. bonding replacement ply materials (1a, 1b, 2c, 2d, 2e);
8. Perform a composite hot bonded repair by:
    a. installing thermocouples on a composite article prior to bonding (1a, 1b, 2c, 2e);
    b. configuring a heat source and a heat controller for composite bonding (1a, 1b, 2c, 2e);
    c. curing a composite article with heat (1a, 1b, 2c, 2d, 2e);
9. Perform an inspection of a completed composite repair (1a, 1b, 1c, 2c, 2e).

AERM 2547 - Aircraft Reciprocating Engine Overhaul

Recommended Prerequisite(s): AERM 1344

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Inspect and repair a radial engine; overhaul reciprocating engines; inspect, check, service, and repair reciprocating engines and engine installations; install, troubleshoot, and remove reciprocating engines; and demonstrate safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to overhaul a reciprocating engine by:
    a. recognizing all hazardous conditions and arranging the engine in the work station for an engine overhaul (1a, 1b, 2c, 2e);
    b. locating, reviewing, and itemizing all Airworthiness Directives (ADs) and manufacturers' service bulletins applicable to the engine assigned (1a, 1b, 2c, 2e);
    c. disassembling an engine with the use of appropriate maintenance/service information or a furnished job plan (1a, 1b, 2c, 2e);
    d. tagging, cleaning, and storing all engine parts for inspection or repair (1a, 1b, 2c, 2e);
    e. cleaning, visually inspecting, and identifying defects in specimen crankcase assemblies (1a, 1b, 2c, 2e);
    f. listing probable defects (1a, 1b, 2c, 2e);
    g. checking a crankshaft run out (1a, 1b, 2c, 2e);
    h. measuring rod and main bearing journals (1a, 1b, 2c, 2e);
    i. determining whether the crankshaft meets dimensional tolerance (1a, 1b, 2c, 2e);
    j. identifying serviceable bearings by means of visual and dimensional inspection (1a, 1b, 2c, 2e);
    k. identifying failed or failing bearings within a displayed group of bearings (1a, 1b, 2c, 2e);
    l. identifying where each displayed bearing is located in the engine (1a, 1b, 2c, 2e);
    m. describing how these failed or failing bearings could be detected in an operating engine (1a, 1b, 2c, 2e);
    n. identifying probable failed engine parts from a list of metals that may be found in an oil screen during an engine inspection (1a, 1b, 2c, 2e);
    o. describing the probable cause for the types of failure identified (1a, 1b, 2c, 2e);
    p. inspecting and determining the serviceability of a cylinder (1a, 1b, 2c, 2e);
    q. inspecting the exhaust and intake valve assemblies (1a, 1b, 2c, 2e);
    r. re-facing and reseating exhaust and intake valves (1a, 1b, 2c, 2e);
    s. describing the replacement of valve guides and valve seats (1a, 1b, 2c);
    t. identifying the components of the valve system (valve train) (1a, 1b, 2c, 2e);
    u. inspecting dimensionally the components of the valve system (1a, 1b, 2c, 2e);
    v. disassembling, assembling, and testing zero-lash lifters (1a, 1b, 2c, 2e);
    w. identifying various types of pistons and pin retainers (1a, 1b, 2c, 2e);
    x. removing and reinstalling at least one type of retainer (1a, 1b, 2c, 2e);
    y. inspecting the oil pump (1a, 1b, 2c, 2e);
    z. repairing any damage found in the oil pump (1a, 1b, 2c, 2e);
    aa. inspecting the oil pressure relief valve and oil passages (1a, 1b, 2c, 2e);

2. Demonstrate the ability to reassemble a reciprocating engine by:
    a. reassembling the crankshaft, cam shaft, and crankcase halves (1a, 1b, 2c, 2e);
    b. torqueing all bolts (1a, 1b, 2c, 2e);
    c. checking the valve timing (1a, 1b, 2c, 2e);
    d. describing the construction features of a piston, rings, and cylinder assembly (1a, 1b, 2c);
    e. inspecting each piston, rings, and cylinder assembly (1a, 1b, 2c, 2e);
    f. fitting the pins and rings to the piston (1a, 1b, 2c, 2e);
    g. installing the piston assembly into the cylinder (1a, 1b, 2c, 2e);
    h. attaching and torqueing the cylinder assembly to the crankcase (1a, 1b, 2c, 2e);
    i. adjusting the valve clearances and making valve checks on engines equipped with solid and/or hydraulic lifters (1a, 1b, 2c, 2e);
    j. explaining the relationship between hot and cold clearances (1a, 1b, 2c);
    k. computing the speed of the cam in relation to crankshaft speed when given the number of cam lobes (1a, 1b, 2c);
    l. timing the valves on a radial engine in accordance with the manufacturer's instructions (1a, 1b, 2c, 2e);
    m. explaining the effects of excessive and insufficient valve clearance (1a, 1b, 2c);
    n. re-assembling the engine accessory section, induction system, and accessories if furnished (1a, 1b, 2c, 2e);

3. Demonstrate the ability to remove reciprocating engines from an aircraft and to reinstall the engine onto the aircraft by:
    a. locating the airframe manufacturer's information on removal of the engine (1a, 1b, 2c, 2e);
    b. following the manufacturer's instructions to make the engine ready for removal (1a, 1b, 2c, 2e);
    c. securing the aircraft, supporting the aircraft tail if the aircraft may tip backward when the engine is removed (1a, 1b, 2c, 2e);
    d. attaching a hoist to the engine in accordance with the manufacturer's instructions (1a, 1b, 2c, 2e);
    e. removing the engine from its engine mount (1a, 1b, 2c, 2e);
    f. installing engine on a work or test stand (1a, 1b, 2c, 2e);
    g. identifying dynamic engine mounts (1a, 1b, 2c, 2e);
    h. reinstalling the engine on the aircraft utilizing the same procedures in reverse order that were used to remove the engine (1a, 1b, 2c, 2e);

4. Demonstrate the ability to prepare an engine for run-up after overhaul by:
    a. removing, inspecting, and installing a propeller on the propeller shaft of the engine (1a, 1b, 2c, 2e);
    b. explaining the effects of propeller unbalance on engine operation (1a, 1b, 2c);
    c. explaining critical vibration range in a given engine propeller combination (1a, 1b, 2c);
    d. recognizing propeller unbalance and critical vibration range of propellers;
    e. installing and timing the magnetos to the engine (1a, 1b, 2c);
    f. inspecting and operationally checking the engine control system on the engine or a mock-up and correcting minor defects (1a, 1b, 2c, 2e);
    g. rigging the system if needed (1a, 1b, 2c, 2e);
    h. selecting the proper lubricants for the engine or a specified engine (1a, 1b, 2c, 2e);
    i. describing the need to pre-oil an engine after overhaul and prior to initial run-in of the engine (1a, 1b, 2c);
    j. pre-oiling the engine (1a, 1b, 2c, 2e);

5. Demonstrate the ability to perform an after-overhaul engine run-in and adjustments to bring the engine into airworthy standards and discuss engine operations in general by:
    a. utilizing the correct procedures while starting a newly overhauled engine (1a, 1b, 2c, 2e);
    b. describing the effects and recognizing the symptoms associated with backfire, after-fire, and kickback (1a, 1b, 2c);
    c. explaining the importance of various throttle/mixture positions while starting the engine (1a, 1b, 2c);
    d. performing an ignition check (1a, 1b, 2c, 2e);
    e. describing how to detect a cold cylinder (1a, 1b, 2c);
    f. describing three probable causes for this condition (1a, 1b, 2c);
    g. performing a compression check on the engine (1a, 1b, 2c, 2e);
    h. describing the probable cause of low compression (1a, 1b, 2c);
    i. describing a sequence to isolate a low compression problem (1a, 1b, 2c);
    j. adjusting both the idle speed and mixture to the limits and tolerance prescribed by the manufacturer (1a, 1b, 2c, 2e);
    k. recording the operating oil temperature and pressure (1a, 1b, 2c, 2e);
    l. adjusting the oil pressure to conform to the engine manufacturer's specifications (1a, 1b, 2c, 2e);
    m. describing how to establish take off, climb, and cruise power settings (1a, 1b, 2c);
    n. describing the factors to be considered during prolonged high power operation (1a, 1b, 2c);
    o. showing correct operational sequences for increasing and reducing power output, and controlling RPM (operations with a constant speed propeller) (1a, 1b, 2c);
    p. explaining how master rod bearing loads are affected by increasing manifold pressure (1a, 1b, 2c);
    q. recognizing symptoms that indicate operational distress associated with oil pressure, detonation, exhaust back pressure, leaking primers, or carburetor icing (1a, 1b, 2c);
    r. discussing the inspection and repair of radial engines (1a, 1b, 2c);

AERO 1291 - AET Airframe/Component Strutral Design

    l. identifying where each displayed bearing is located in the engine (1a, 1b, 2c, 2e);
    m. describing how these failed or failing bearings could be detected in an operating engine (1a, 1b, 2c, 2e);
    n. identifying probable failed engine parts from a list of metals that may be found in an oil screen during an engine inspection (1a, 1b, 2c, 2e);
    o. describing the probable cause for the types of failure identified (1a, 1b, 2c, 2e);
    p. inspecting and determining the serviceability of a cylinder (1a, 1b, 2c, 2e);
    q. inspecting the exhaust and intake valve assemblies (1a, 1b, 2c, 2e);
    r. re-facing and reseating exhaust and intake valves (1a, 1b, 2c, 2e);
    s. describing the replacement of valve guides and valve seats (1a, 1b, 2c);
    t. identifying the components of the valve system (valve train) (1a, 1b, 2c, 2e);
    u. inspecting dimensionally the components of the valve system (1a, 1b, 2c, 2e);
    v. disassembling, assembling, and testing zero-lash lifters (1a, 1b, 2c, 2e);
    w. identifying various types of pistons and pin retainers (1a, 1b, 2c, 2e);
    x. removing and reinstalling at least one type of retainer (1a, 1b, 2c, 2e);
    y. inspecting the oil pump (1a, 1b, 2c, 2e);
    z. repairing any damage found in the oil pump (1a, 1b, 2c, 2e);
    aa. inspecting the oil pressure relief valve and oil passages (1a, 1b, 2c, 2e);

2. Demonstrate the ability to reassemble a reciprocating engine by:
    a. reassembling the crankshaft, cam shaft, and crankcase halves (1a, 1b, 2c, 2e);
    b. torqueing all bolts (1a, 1b, 2c, 2e);
    c. checking the valve timing (1a, 1b, 2c, 2e);
    d. describing the construction features of a piston, rings, and cylinder assembly (1a, 1b, 2c);
    e. inspecting each piston, rings, and cylinder assembly (1a, 1b, 2c, 2e);
    f. fitting the pins and rings to the piston (1a, 1b, 2c, 2e);
    g. installing the piston assembly into the cylinder (1a, 1b, 2c, 2e);
    h. attaching and torqueing the cylinder assembly to the crankcase (1a, 1b, 2c, 2e);
    i. adjusting the valve clearances and making valve checks on engines equipped with solid and/or hydraulic lifters (1a, 1b, 2c, 2e);
    j. explaining the relationship between hot and cold clearances (1a, 1b, 2c);
    k. computing the speed of the cam in relation to crankshaft speed when given the number of cam lobes (1a, 1b, 2c);
    l. timing the valves on a radial engine in accordance with the manufacturer's instructions (1a, 1b, 2c, 2e);
    m. explaining the effects of excessive and insufficient valve clearance (1a, 1b, 2c);
    n. re-assembling the engine accessory section, induction system, and accessories if furnished (1a, 1b, 2c, 2e);

3. Demonstrate the ability to remove reciprocating engines from an aircraft and to reinstall the engine onto the aircraft by:
    a. locating the airframe manufacturer's information on removal of the engine (1a, 1b, 2c, 2e);
    b. following the manufacturer's instructions to make the engine ready for removal (1a, 1b, 2c, 2e);
    c. securing the aircraft, supporting the aircraft tail if the aircraft may tip backward when the engine is removed (1a, 1b, 2c, 2e);
    d. attaching a hoist to the engine in accordance with the manufacturer's instructions (1a, 1b, 2c, 2e);
    e. removing the engine from its engine mount (1a, 1b, 2c, 2e);
    f. installing engine on a work or test stand (1a, 1b, 2c, 2e);
    g. identifying dynamic engine mounts (1a, 1b, 2c, 2e);
    h. reinstalling the engine on the aircraft utilizing the same procedures in reverse order that were used to remove the engine (1a, 1b, 2c, 2e);

4. Demonstrate the ability to prepare an engine for run-up after overhaul by:
    a. removing, inspecting, and installing a propeller on the propeller shaft of the engine (1a, 1b, 2c, 2e);
    b. explaining the effects of propeller unbalance on engine operation (1a, 1b, 2c);
    c. explaining critical vibration range in a given engine propeller combination (1a, 1b, 2c);
    d. recognizing propeller unbalance and critical vibration range of propellers;
    e. installing and timing the magnetos to the engine (1a, 1b, 2c);
    f. inspecting and operationally checking the engine control system on the engine or a mock-up and correcting minor defects (1a, 1b, 2c, 2e);
    g. rigging the system if needed (1a, 1b, 2c, 2e);
    h. selecting the proper lubricants for the engine or a specified engine (1a, 1b, 2c, 2e);
    i. describing the need to pre-oil an engine after overhaul and prior to initial run-in of the engine (1a, 1b, 2c);
    j. pre-oiling the engine (1a, 1b, 2c, 2e);

5. Demonstrate the ability to perform an after-overhaul engine run-in and adjustments to bring the engine into airworthy standards and discuss engine operations in general by:
    a. utilizing the correct procedures while starting a newly overhauled engine (1a, 1b, 2c, 2e);
    b. describing the effects and recognizing the symptoms associated with backfire, after-fire, and kickback (1a, 1b, 2c);
    c. explaining the importance of various throttle/mixture positions while starting the engine (1a, 1b, 2c);
    d. performing an ignition check (1a, 1b, 2c, 2e);
    e. describing how to detect a cold cylinder (1a, 1b, 2c);
    f. describing three probable causes for this condition (1a, 1b, 2c);
    g. performing a compression check on the engine (1a, 1b, 2c, 2e);
    h. describing the probable cause of low compression (1a, 1b, 2c);
    i. describing a sequence to isolate a low compression problem (1a, 1b, 2c);
    j. adjusting both the idle speed and mixture to the limits and tolerance prescribed by the manufacturer (1a, 1b, 2c, 2e);
    k. recording the operating oil temperature and pressure (1a, 1b, 2c, 2e);
    l. adjusting the oil pressure to conform to the engine manufacturer's specifications (1a, 1b, 2c, 2e);
    m. describing how to establish take off, climb, and cruise power settings (1a, 1b, 2c);
    n. describing the factors to be considered during prolonged high power operation (1a, 1b, 2c);
    o. showing correct operational sequences for increasing and reducing power output, and controlling RPM (operations with a constant speed propeller) (1a, 1b, 2c);
    p. explaining how master rod bearing loads are affected by increasing manifold pressure (1a, 1b, 2c);
    q. recognizing symptoms that indicate operational distress associated with oil pressure, detonation, exhaust back pressure, leaking primers, or carburetor icing (1a, 1b, 2c);
    r. discussing the inspection and repair of radial engines (1a, 1b, 2c);

AGCR 1304 - Intro to Sustainable Agriculture

General

Course Key
16476

Course Rubric
AGCR

Course Number
1304

Course Title
Introduction to Sustainable Agriculture

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) An introduction to the concept of sustainable agriculture, and examine the impact from social, economic, technological, and environmental perspectives. Integration of crop and livestock management, conservation practices, organic practices, and farming techniques to increase agricultural production, efficiency, and profitability.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the principles and strategies of sustainable agriculture, evaluate best sustainable practices for basic soil, crop, watershed, and livestock management; analyze strategies to increase profitability and efficiency; and identify sustainable farming systems and associated careers.

Upon successful completion of this course, students will:

1. Describe the historical context of sustainable agriculture by
   a. explaining the significance of sustainable agriculture from both domestic and global perspectives. (1a)
   b. distinguishing the characteristics of sustainable practices in agriculture production. (1b)
   c. explaining past and current challenges to sustainability in agriculture systems. (1b)
2. Demonstrate an understanding of agriculture systems by
   a. listing and describing differences between small and large scale farms (1a)
   b. listing the pros and cons of monocrop vs diversification in farming systems. (1a)
   c. explaining the real-world challenges of farmers in society(2d).
3. Demonstrate an understanding of sustainable agriculture practices by
   a. Listing and describing soil and water conservation practices (1a).
   b. Listing and describing diversified farming systems that integrate crops and livestock (1a).
   c. Listing and describing organic farming practices and their relationship to sustainable agriculture (1a).
   d. Listing and describing new technologies and their impacts on agricultural production (1a)
4. Demonstrate an understanding of the core principles of sustainability in agriculture by:
   a. Explaining environmental concerns in agriculture (1b, 2d)
   b. Explaining social concerns in agriculture (2d)
   c. Explaining economic concerns in agriculture (2a, 2d)
   d. Explaining technological concerns in agriculture (2d)
5. Demonstrate an understanding of innovative agriculture practices by
   a. Evaluating the history of innovative farmers and farming practices (1a, 1b)
   b. Evaluating current and emerging innovations in farming practices (1a, 2a)
   c. Determining possible solutions for the future of agriculture sustainability (1b, 2d).

AGCR 2418 - Soil Science

General

Course Key
9332

Course Rubric
AGCR

Course Number
2418

Course Title
Soil Science

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Introduction to the physical, chemical, and biological properties of soils. Topics include the relationship between crops and soils, conservation of soil and water resources, and the economic use of fertilizer.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain principles of soil formation and classification; interpret soil physical, chemical, and biological properties; utilize the principles of soil and water conservation; interpret soil nutrient analysis.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply basic chemical functions by:
   a. identifying chemical symbols of elements important to soils (1b);
   b. listing the valence/oxidation number of chemicals (1b);
   c. using the metric system to perform basic measurements (2c);
   d. calculating molar and normal solutions (1a);
   e. calculating parts per million (1a);
   f. using logarithms to calculate pH of solutions (1a);
   g. identifying cations, anions, and radicals (1b);
   h. calculating equivalents and milliequivalents (1a);
2. Demonstrate an understanding of physical and chemical properties of soils by:
   a. applying soil terminology (2c);
   b. explaining soil formation (2c, 2d);
   c. describing soil horizons (2c, 2d);
   d. describing soil texture and structure (2c, 2d);
   e. describing bulk density and particle density (2c, 2d);
   f. explaining soil organic matter and soil life (2c, 2d);
   g. describing soil colloids (2c, 2d);
   h. explaining soil moisture and soil/plant water relations (2c, 2d);
   i. explaining soil reaction and pH (2c, 2d);
   j. explaining soluble salts, cation exchange capacity, and base saturation (2c, 2d);
   k. explaining soil fertility (2c, 2d);
   l. explaining soil and soil water conservation (2c, 2d);
3. Perform basic soil tests by:
   a. identifying and interpreting the properties of a soil using a soil survey (1b, 2c, 2b);
   b. determining soil color (1b, 2c, 2b);
   c. calculating soil texture (1b, 2c, 2b);
   d. calculating soil bulk and particle densities (1b, 2c, 2b);
   e. calculating soil pore space (1b, 2c, 2b);
   f. calculating soil organic matter content (1b, 2c, 2b);
   g. calculating soil moisture properties (1b, 2c, 2b);
   h. measuring and interpreting soil pH and soluble salts (1b, 2c, 2b);
   i. performing and interpreting soil fertility tests (1b, 2c, 2b);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain flight maneuvers and procedures; demonstrate private pilot flight maneuvers; perform cross-country flight; and meet the guidelines of the Federal Aviation Administration Airman Certification Standards for Private Pilot.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in required flight maneuvers and procedures by:
    a. manipulating the flight controls of the aircraft to meet the Federal Aviation Administration Practical Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);
    b. preparing accurate and detailed flight plans and navigation logs (1a, 1b, 1c, 2a, 2c, 2e);
    c. performing solo local and solo cross county flights (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. manipulating the flight controls of an aircraft at night (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. applying safe operating practices (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. solving inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. applying applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);
    h. operating an aircraft safely in the National Airspace System (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Complete flight plans for cross country flights; demonstrate the use of flight computers; and explain airspace classification as it pertains to the National Airspace System.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the National Airspace System by:
    a. explaining why the National Airspace System is needed (1a, 1b, 2c);
    b. explaining the two categories of airspace (1a, 1b, 2c);
    c. describing Class A, B, C, D, E, G, Other, and Special Use Airspace (1a, 1b, 2c);
    d. identifying the different airspaces on a sectional chart (1a, 1b, 2c);
    e. discussing entry and equipment requirements for each airspace (1a, 1b, 2c);
    f. distinguishing basic VFR weather minimums for each airspace (1a, 1b, 2c);
2. Demonstrate use of flight computers (E6/B) by:
    a. computing pressure altitude (1a, 1b, 2c, 2d, 2e);
    b. computing density altitude (1a, 1b, 2c, 2d, 2e);
    c. computing wind correction angle (1a, 1b, 2c, 2d, 2e);
    d. computing fuel consumption and endurance (1a, 1b, 2c, 2d, 2e);
    e. computing ground speed (1a, 1b, 2c, 2d, 2e);
    f. computing time and distance (1a, 1b, 2c, 2d, 2e);
3. Demonstrate knowledge of Aviation Sectional and Terminal Charts as well as the Airport Facility Directory by:
    a. interpreting the meaning of chart symbol (1a, 1b, 2c);
    b. explaining the appropriate use of navigation charts (1a, 1b, 2c);
    c. determining accurate information for airport services (1a, 1b, 2c);
4. Complete flight plans for cross country flights by:
    a. planning, creating, and filing an FAA flight plan (1a, 1b, 1c, 2a, 2c, 2d);
    b. formulating accurate navigation log (1a, 1b, 1c, 2a, 2c, 2d);
    c. applying appropriate FAA regulations and recommendations (1a, 1b, 1c);

AIRP 1307 - Aviation Meteorology

General

11747

Course Rubric	Course Number	Course Title
AIRP	1307	Aviation Meteorology

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Coverage of meteorological phenomena affecting aircraft flight. Topics include basic concepts of aviation meteorology in the study of temperature, pressure, moisture, stability, clouds, air masses, fronts, thunderstorms, icing, and fog. Also includes analysis and use of weather data for flight planning.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the basic atmospheric processes that produce weather in the atmosphere; identify the weather hazards that pilots will encounter associated with flight; utilize multiple methods to receive and analyze weather data; and explain the use of meteorological information to conduct safe flight.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of weather theory by:
    a. describing atmospheric composition, properties, and structure (1a, 1b, 2c);
    b. describing the relationship between atmospheric energy and temperature (1a, 1b, 2c);
    c. explaining how pressure, density, and altitude effect atmospheric conditions (1a, 1b, 2c);
    d. explaining what causes wind and the geographic and atmospheric forces that affect its movement (1a, 1b, 2c);
    e. summarizing vertical motion and atmospheric stability (1a, 1b, 2c);
    f. summarizing atmospheric moisture and its effect on clouds and precipitation (1a, 1b, 2c);
    g. describing atmospheric circulation and its relationship with air masses, fronts, and cyclones (1a, 1b, 2c);
    h. explaining the life cycle of thunderstorms (1a, 1b, 2c);
2. Demonstrate an understanding of weather hazards by:
    a. explaining causes of wind shear and the danger this hazard poses to aircraft (1a, 1b, 2c);
    b. explaining causes and types of turbulence (1a, 1b, 2c);
    c. describing the different types of icing and how to best avoid icing encounters (1a, 1b, 2c);
    d. describing instrument meteorological conditions and their associated hazards (1a, 1b, 2c);
    e. giving examples and explaining less common weather hazards such as volcanic eruptions, space weather hazards, cold climate flying, and stratospheric ozone (1a, 1b, 2c);
3. Demonstrate an understanding of aviation weather services by:
    a. explaining and accurately interpreting each weather chart or forecast as it pertains to its time of issue, valid time/period, usefulness, and pertinent information (1a, 1b, 1c, 2c, 2e);
    b. selecting and accurately interpreting the appropriate weather chart/forecast for flight planning purposes (1a, 1b, 1c, 2c, 2e);
    c. describing the various weather service outlets and how to obtain weather information from these sources (1a, 1b, 1c, 2c, 2e);
    d. describing the process of making a go or no go decision (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss the development of civil and military aviation from balloons to space flight; and recall the historical legislation affecting aviation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Analyze the development of civil and military aviation from balloons to space flight; and discuss the historical legislation affecting aviation.
2. Demonstrate knowledge of the development of civil and military aviation from balloons to space flight by:
    a. discussing key events, inventors, and developments that molded the aviation/aerospace industry into what it is today (1a, 1b, 2c);
    b. identifying a variety of aircraft types, categories, and manufacturers (1a, 1b, 2c);
    c. describing the function and role of a variety of jobs other than pilot within the aviation/aerospace industry (1a, 1b, 2c);

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Ground school for the Federal Aviation Administration Private Pilot Certificate, providing the student with the necessary aeronautical knowledge that can be used for Private Pilot Certification. Topics include principles of flight, radio procedures, weather, navigation, aerodynamics, and Federal Aviation Administration regulations.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Display the skills necessary for air navigation; explain the aerodynamic factors involved in the operation of aircraft; and meet aeronautical knowledge areas required for the Federal Aviation Administration Private Pilot Practical Test; demonstrate proficiency in knowledge required by the Federal Aviation Administration for the Private Pilot Written Test.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of applicable Federal Aviation Regulations by:
    a. locating applicable regulations and critical information related to a private pilot in the FAR/AIM and FAA advisory circulars (1a, 1b, 2c);
    b. describing private pilot privileges and limitations (1a, 1b, 2c);
    c. recalling and applying appropriate flight operation privileges and limitations (1a, 1b, 2c);
    d. describing accident reporting requirements of the NTSB (1a, 1b, 2c);
    e. describing FAA medical certificates and pilot certificate category and class (1a, 1b, 2c);
    f. identifying aircraft and pilot certificate categories, classes, and types (1a, 1b, 2c);
2. Demonstrate an understanding of air navigation by:
    a. explaining and identifying symbols/markings on aeronautical charts (1a, 1b, 2c);
    b. identifying and describing Class A, B, C, D, E, and G airspace as well as Special Use and Other Airspace in the National Airspace System (1a, 1b, 2c);
    c. distinguishing between variation/deviation and pilotage/dead reckoning (1a, 1b, 2c);
    d. computing time, speed, and distance, plus other basic calculations using an E6/B flight calculator (1a, 1b, 2c, 2d, 2e);
    e. preparing a thorough and accurate flight plan and navigation log using aeronautical charts, plotters, FAA publications, E6/B calculator, and Airplane Operating Handbook (1a, 1b, 1c, 2a, 2c, 2d);
    f. explaining how radio navigation (VOR, GPS, NDB) systems operate and their usefulness in air navigation (1a, 1b, 2c, 2d, 2e);
    g. describing lost procedures and flight diversions (1a, 1b, 2c);
    h. distinguishing hazardous areas and applying proper collision avoidance procedures (1a, 1b, 2c);
    i. describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 2c);
    j. demonstrating effective radio communication procedures (1a, 1b, 2c, 2d, 2e);
    k. identifying and describing different ATC services available to pilots, radio procedures, and sources of flight information (1a, 1b, 2c, 2d, 2e);
3. Demonstrate an understanding of aerodynamics by:
    a. naming and identifying the different components of an aircraft (1a, 1b, 2c);
    b. naming and identifying primary and secondary flight controls systems (1a, 1b, 2c);
    c. explaining the structure of the atmosphere (1a, 1b, 2c);
    d. describing the different theories in the production of lift (1a, 1b, 2c);
    e. describing the four forces of flight (1a, 1b, 2c);
    f. explaining how changes to lift, thrust, drag, and weight affect the aerodynamic principles of an aircraft (1a, 1b, 2c);
    g. summarizing aircraft stability and its effects on aerodynamic principles (1a, 1b, 2c);
    h. explaining how and why an aircraft stalls and spins as well as proper recovery techniques (1a, 1b, 2c);
    i. explaining recognition and avoidance procedures for wake turbulence (1a, 1b, 2c);
    j. describing the effects of density altitude on takeoff and climb performance (1a, 1b, 2c);
    k. computing weight and balance (1a, 1b, 2c);
4. Demonstrate an understanding of aviation weather by:
    a. identifying critical weather situations from the ground and in flight (1a, 1b, 2c);
    b. describing weather theories pertaining to air masses, fronts, atmospheric stability, wind, currents, and thunderstorms (1a, 1b, 2c);
    c. explaining Coriolis force and its effect on our atmosphere (1a, 1b, 2c);
    d. identifying wind shear and describing how to avoid it (1a, 1b, 2c);

e. explaining the procurement and use of aeronautical weather reports and forecasts (1a, 1b, 1c, 2c, 2e);

5. Demonstrate an understanding of Preflight action by:
    a. identifying and decoding appropriate NOTAMs (1a, 1b, 1c, 2c, 2e);
    b. comprehending current and forecasted weather reports and conditions (1a, 1b, 1c, 2c, 2e);
    c. identifying known ATC delays (1a, 1b, 2c);
    d. determining runway lengths at departure and arrival airports (1a, 1b, 2c);
    e. identifying appropriate alternate airports (1a, 1b, 2c);
    f. calculating fuel requirements as outlined in the FARs (1a, 1b, 2c, 2e);
    g. calculating takeoff and landing distances (1a, 1b, 2c, 2e);

6. Demonstrate an understanding of aircraft powerplants, systems, and instruments by:
    a. identifying the make, model, and size of the engine in the aircraft being flown (1a, 1b, 2c, 2d, 2e);
    b. describing the operation of a four stroke engine (1a, 1b, 2c, 2d, 2e);
    c. identifying and describing how the electrical system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    d. identifying and describing how the fuel system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    e. identifying and describing how the anti-ice and/or de-ice system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    f. identifying and describing how the ignition system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    g. identifying and describing how the pneumatic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    h. identifying and describing how the hydraulic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    i. identifying and describing how the pitot static system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    j. identifying and describing the operating principles of the altimeter, airspeed indicator, attitude indicator, heading indicator, vertical speed indicator, and turn indicator (1a, 1b, 2c, 2d, 2e);

7. Demonstrate an understanding of flight physiology by:
    a. determining fitness for flight (1a, 1b, 2c);
    b. explaining the physiological effects of flying at high altitudes (1a, 1b, 2c);
    c. explaining the signs, symptoms, and appropriate action for hypoxia, hyperventilation, and carbon monoxide poisoning in flight (1a, 1b, 1c, 2c);
    d. describing illusions in flight and how to overcome their effects (1a, 1b, 1c, 2c);
    e. summarizing the physiology of vision in flight for day and night operations (1a, 1b, 2c);
    f. analyzing human factors in aviation and describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 1c, 2c);

AIRP 1341 - Advanced Air Navigation

General

Course Key
9562

Course Rubric	Course Number	Course Title
AIRP	1341	Advanced Air Navigation

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Skill development in advanced airplane systems and performance including radio navigation and cross-country flight planning. Includes an introduction to instrument flight operations and navigation.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Determine aircraft performance factors based on aircraft charts and graphs; explain radio navigational theory; perform cross-country planning using all available information; and evaluate navigational charts for both visual flight rules and instrument flight rules navigation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of radio navigation theory by:
    a. explaining and describing how a VOR works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    b. explaining and describing how an NDB works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    c. explaining and describing how a DME works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    d. explaining and describing how RNAV/GPS works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    e. explaining and describing how and ILS works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    f. explaining and describing the differences between a Simplified Directional Facility and a Localizer Type Directional Air and their use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

2. Demonstrate an understanding of the Air Traffic Control system and procedures for instrument flight operations by:
    a. describing aircraft navigation and communication equipment (1a, 1b, 2c, 2d, 2e);
    b. applying proper communication procedures and phraseology (1c, 2b, 2c, 2d);
    c. describing the different communication facilities and their role in the U.S. Air Traffic Control system (1a, 1b, 2c, 2d, 2e);
    d. describing and explaining ATC departure, approach, and hold clearances (1a, 1b, 2c, 2d, 2e);
    e. describing and explaining required reporting points and other reporting expectations (1a, 1b, 2c, 2d, 2e);
    f. explaining the use of radar and its importance to instrument flight rules (1a, 1b, 2c, 2d, 2e);
    g. explaining holding procedures (1b, 1c, 2b, 2c, 2d);
    h. explaining procedures for lost communication scenarios (1b, 1c, 2b, 2c, 2d, 2e);

3. Demonstrate knowledge of Aviation sectional and terminal Charts, low/high enroute charts, instrument approach plates, SIDs and STARs, as well as the Airport Facility Directory by:
    a. explaining and identifying symbols/markings on aeronautical charts (1a, 1b, 2c);
    b. identifying and describing Class A, B, C, D, E, and G Airspace as well as Special Use and Other Airspace in the National Airspace System (1a, 1b, 2c);
    c. distinguishing between variation/deviation and pilotage/dead reckoning (1a, 1b, 2c);
    d. explaining the appropriate use of navigation charts (1a, 1b, 2c);
    e. explaining and identifying symbols/markings on low and high en-route charts (1a, 1b, 2c);
    f. explaining and identifying symbols/markings on instrument approach charts (1a, 1b, 2c);
    g. explaining and giving an accurate approach briefing (1a, 1b, 2c);
    h. describing Standard Instrument Departure Procedures (1a, 1b, 2c);
    i. describing Standard Terminal Arrival Routes (1a, 1b, 2c);
    j. determining accurate information for airport services (1a, 1b, 2c);

4. Complete flight plans for IFR cross country flights by:
    a. preparing a thorough and accurate flight plan and navigation log using aeronautical charts, plotters, FAA publications, E6/B Calculator and Airplane Operating Handbook (1a, 1b, 1c, 2a, 2c, 2d);
    b. computing time, speed, and distance plus other basic calculations using an E6/B flight calculator (1a, 1b, 2a, 2c, 2d, 2e);
    c. applying appropriate FAA regulations and recommendations (1a, 1b, 1c);
    d. describing route planning with consideration to MEAs, MOCAs, MORAs, etc. (1a, 1b, 1c, 2a, 2c, 2d);
    e. describing lost communications procedures and flight diversions (1b, 1c, 2b, 2c, 2d, 2e);
    f. describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 2c);
    g. demonstrating effective radio communication procedures (1a, 1b, 2c, 2d, 2e);
    h. identifying and describing different ATC services, weather information, and in flight information available to pilots (1a, 1b, 2c, 2d, 2e);

AIRP 1343 - Aerodynamics

General

Course Key
9563

Course Rubric	Course Number	Course Title
AIRP	1343	Aerodynamics

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Study of the physical laws of flight. Topics include physical terms and the four forces of flight. Aircraft design, stability control, and high-speed flight characteristics are also included.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the four forces of flight and aircraft design concepts; and explain aircraft stability and control factors in all flight regimes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of aircraft structure by:
    a. naming and identifying the major components of an aircraft (1a, 1b, 2c);
    b. naming and identifying the subcomponents of an aircraft (1a, 1b, 2c);
2. Demonstrate an understanding of aircraft flight control systems by:
    a. naming and identifying primary flight controls systems (1a, 1b, 2c);
    b. naming and identifying secondary flight controls systems (1a, 1b, 2c);
3. Demonstrate an understanding of the principles of flight by:
    a. explaining the structure of the atmosphere (1a, 1b, 2c);
    b. calculating pressure and density altitude (1a, 1b, 2c);
    c. relating the effects of nonstandard temperature and pressure to aircraft performance (1a, 1b, 2c);
    d. describing the different theories in the production of lift (1a, 1b, 2c);
4. Demonstrate an understanding of the aerodynamics of flight by:
    a. describing the four forces of flight (1a, 1b, 2c);
    b. explaining how changes to lift, thrust, drag, and weight affect the aerodynamic principles of an aircraft (1a, 1b, 2c);
    c. explaining how wingtip vortices are created and the dangers associated with them (1a, 1b, 2c);
    d. describing ground effect and the dangers associated with it (1a, 1b, 2c);
    e. explaining how and why an aircraft stalls and spins as well as proper recovery techniques (1a, 1b, 2c);
    f. explaining recognition and avoidance procedures for wake turbulence (1a, 1b, 2c);
    g. describing the effects of density altitude on takeoff and climb performance (1a, 1b, 2c, 2d, 2e);
    h. computing weight and balance (1a, 1b, 2c, 2d, 2e);
5. Demonstrate an understanding of aircraft design characteristic by:
    a. describing the 3 axes of an aircraft (1a, 1b, 2c);
    b. explaining aircraft static and dynamic stability and their effects on aerodynamic principles (1a, 1b, 2c);
    c. explaining load factor (1a, 1b, 2c, 2d, 2e);
6. Demonstrate an understanding of high speed aerodynamics by:
    a. explaining subsonic versus supersonic air flow (1a, 1b, 2c);
    b. describing Mach buffet and critical Mach number (1a, 1b, 2c);
    c. explaining coffin corner (1a, 1b, 2c);
    d. explaining high speed flight controls and wing design (1a, 1b, 2c);

AIRP 1345 - Aviation Safety

General

Course Key
11746

Course Rubric	Course Number	Course Title
AIRP	1345	Aviation Safety

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of the fundamentals essential to the safety of flight. A survey of the aviation industry including decision-making factors, accident reporting, accident investigation, air traffic systems, aircraft technologies, and accident case studies.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss and outline risk mitigation and accident prevention through the discussion of case studies; outline the development of early federal legislation that changed the aviation industry; describe possible aviation hazards; explain the National Airspace System and procedures; describe how data is collected and assessed by the federal agencies; evaluate the risk factors related to flight operations; and summarize safety inspection programs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of early federal legislation that changed aviation history by:
    a. identifying reasons for federal oversight and regulation (1a, 1b, 2c);
    b. describing the federal rule-making process (1a, 1b, 2c);
    c. describing how data is collected and assessed by the Federal Aviation Administration (1a, 1b, 2c);
2. Demonstrate an understanding of risk factors associated with flight operations and situational awareness of possible aviation hazards by:
    a. recalling and analyzing risk factors associated with specific aviation accidents/incidents (1a, 1b, 1c, 2a, 2b, 2c);
    b. analyzing specific aviation accidents/incidents that were the result of pilots losing situational awareness and why this occurred (1a, 1b, 1c, 2a, 2b, 2c);
    c. examining how to avoid previous aviation disasters through crash investigations (1a, 1b, 1c, 2a, 2b, 2c);
    d. comprehending the importance of situational awareness in avoiding aviation hazards (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
3. Explain the United States airspace system and procedures by:
    a. explaining and identifying symbols/markings on aeronautical charts (1a, 1b, 2c);
    b. identifying and describing Class A, B, C, D, E, and G Airspace as well as Special Use and Other Airspace in the National Airspace System (1a, 1b, 2c);
    c. explaining how radio navigation (VOR, GPS, NDB) systems operate and their usefulness in air navigation (1a, 1b, 2c, 2d, 2e);
    d. demonstrating effective radio communication procedures (1a, 1b, 2c, 2d, 2e);
    e. identifying and describing different ATC services available to pilots, radio procedures, and sources of flight information (1a, 1b, 2c, 2d, 2e);
4. Summarize safety inspection programs and concerns by:
    a. explaining and identifying the impact safety inspections programs have had on the aviation industry (1a, 1b, 2c);
    b. comprehending how to develop safety inspection programs at small and large air carriers (1a, 1b, 2c);
    c. identifying areas of concern with next generation aircraft (1a, 1b, 2c);

AIRP 1347 - Human Factors in Aviation

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Instruction in flight physiology, the decision-making process, pilot health maintenance, psychological aspects of flight, human behavior as related to the aircraft flight deck, and aeromedical information of significance to flight crews.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe various aspects of flight physiology; analyze the pilot decision-making process; identify aeromedical factors hazardous to the pilot; and explain basic health maintenance factors.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe various aspects of flight physiology; analyze the pilot decision making process; identify aeromedical factors hazardous to the pilot; and explain basic health maintenance factors (1a, 1b, 1c, 2a, 2b, 2c).
2. Demonstrate an understanding of flight physiology by:
    a. explaining spatial disorientation (1a, 1b, 2c);
    b. describing procedures for overcoming spatial disorientation (1a, 1b, 1c, 2c);
    c. determining fitness for flight (1a, 1b, 2c);
    d. explaining the physiological effects of flying at high altitudes (1a, 1b, 2c);
    e. explaining the signs, symptoms, and appropriate action for hypoxia, hyperventilation, and carbon monoxide poisoning in flight (1a, 1b, 1c, 2c);
    f. describing illusions in flight and how to overcome their effects (1a, 1b, 1c, 2c);
    g. summarizing the physiology of vision in flight for day and night operations (1a, 1b, 2c);
    h. explaining fatigue and its associated dangers (1a, 1b, 2c);
    i. summarizing the importance of proper rest, diet, and professional discipline (1a, 1b, 2c);
    j. explaining the hazardous effects of drugs and alcohol (1a, 1b, 2c);
3. Demonstrate an understanding of aeromedical factors hazardous to the pilot by:
    a. listing and explaining which aeromedical factors are hazardous to the pilot (1a, 1b, 1c, 2a, 2b, 2c);
    b. recalling and analyzing specific aviation accidents/incidents that were the result of pilots not recognizing hazardous aeromedical factors (1a, 1b, 1c, 2a, 2b, 2c);
    c. examining how to avoid previous aviation disasters through crash investigations (1a, 1b, 1c, 2a, 2b, 2c);
    d. comprehending the importance of crew resource management (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. employing desired professional characteristics appropriate for an air carrier flight deck (1c, 2a, 2b, 2c);
4. Demonstrate an understanding of the pilot decision making process by:
    a. demonstrating an understanding of crew resource management (1a, 1b, 1c, 2a, 2b, 2c);
    b. explaining crew communication and coordination (1a, 1b, 1c, 2a, 2b, 2c);
    c. describing human factors leading to accidents or incidents (1a, 1b, 1c, 2a, 2b, 2c);
    d. analyzing human factors in aviation and describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 1c, 2a, 2b, 2c);
    e. describing checklist usage (1a, 1b, 1c, 2a, 2b, 2c);
    f. describing safe and efficient operation of the aircraft (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain Federal Aviation Administration regulations for Instrument Flight; read and interpret instrument publications; describe the operation of navigation systems; describe the aircraft flight instruments operation; and explain the air traffic control (ATC) procedures and flight physiology related to instrument flight.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of flight physiology by:
    a. explaining spatial disorientation (1a, 1b, 2c);
    b. describing procedures for overcoming spatial disorientation (1a, 1b, 1c, 2c);
    c. determining fitness for flight (1a, 1b, 2c);
    d. explaining the physiological effects of flying at high altitudes (1a, 1b, 2c);
    e. explaining the signs, symptoms, and appropriate action for hypoxia, hyperventilation, and carbon monoxide poisoning in flight (1a, 1b, 1c, 2c);
    f. describing illusions in flight and how to overcome their effects (1a, 1b, 1c, 2c);
    g. summarizing the physiology of vision in flight for day and night operations (1a, 1b, 2c);
2. Demonstrate an understanding of attitude instrument flying by:
    a. describing and applying the control and performance method (1a, 1b, 2c);
    b. describing and applying the primary and supporting method (1a, 1b, 2c);
    c. describing the different scanning techniques (1a, 1b, 2c);
    d. describing and applying rules of thumb (1a, 1b, 2c);
    e. explaining common errors in attitude instrument flying (1a, 1b, 2c);
    f. explaining unusual attitude recovery (1a, 1b, 2c);
    g. explaining compass turns and timed turns (1a, 1b, 2c);
3. Demonstrate an understanding of applicable Federal Aviation Regulations and information in the Aeronautical Information Manual by:
    a. locating and explaining applicable regulations and critical information related to an Instrument Rating in the FAR/AIM and FAA advisory circulars (1a, 1b, 2c);
    b. describing Instrument Rating privileges and limitations (1a, 1b, 2c);
    c. recalling and applying appropriate flight operation privileges and limitations (1a, 1b, 2c);
4. Demonstrate an understanding of aircraft powerplants, systems, and instruments by:
    a. identifying the make, model, and size of the engine in the aircraft being flown (1a, 1b, 2c, 2d, 2e);
    b. identifying and describing how the electrical system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    c. identifying and describing how the fuel system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    d. identifying and describing how the anti-ice and/or de-ice system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    e. identifying and describing how the ignition system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);
    f. identifying and describing how the pneumatic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

g. identifying and describing how the hydraulic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

h. identifying and describing how the pitot static system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

i. identifying and describing the operating principles of the altimeter, airspeed indicator, attitude indicator, heading indicator, vertical speed indicator, and turn indicator (1a, 1b, 2c, 2d, 2e);

5. Demonstrate an understanding of the Air Traffic Control system and procedures for instrument flight operations by:

a. describing aircraft navigation and communication equipment (1a, 1b, 2c, 2d, 2e);

b. applying proper communication procedures and phraseology (1c, 2b, 2c, 2d);

c. describing the different communication facilities and their role in the U.S. Air Traffic Control system (1a, 1b, 2c, 2d, 2e);

d. describing and explaining ATC departure, approach, and hold clearances (1a, 1b, 2c, 2d);

e. describing and explaining required reporting points and other reporting expectations (1a, 1b, 2c);

f. explaining the use of radar and its importance to instrument flight rules (1a, 1b, 2c, 2d, 2e);

g. explaining holding procedures (1b, 1c, 2b, 2c, 2d);

h. explaining procedures for lost communication scenarios (1b, 1c, 2b, 2c, 2d);

6. Demonstrate an understanding of IFR Navigation and approaches by use of navigation systems by:

a. explaining and describing how a VOR works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

b. explaining and describing how an NDB works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

c. explaining and describing how a DME works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

d. explaining and describing how RNAV/GPS works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

e. explaining and describing how an ILS works and its use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

f. explaining and describing the differences between a Simplified Directional Facility and a Localizer Type Directional Air and their use in IFR navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);

7. Demonstrate knowledge of IFR low/high en-route charts, instrument approach plates, SIDs, and STARs, as well as the Airport Facility Directory by:

a. explaining the appropriate use of navigation charts (1a, 1b, 2c);

b. explaining and identifying symbols/markings on low and high en-route charts (1a, 1b, 2c);

c. explaining and identifying symbols/markings on instrument approach charts (1a, 1b, 2c);

d. explaining and giving an accurate approach briefing (1a, 1b, 2c);

e. describing Standard Instrument Departure Procedures (1a, 1b, 2c);

f. explaining and identifying symbols/markings on Standard Instrument Departure charts (1a, 1b, 2c);

g. describing Standard Terminal Arrival Routes (1a, 1b, 2c);

h. explaining and identifying symbols/markings on Standard Terminal Arrival Route charts (1a, 1b, 2c);

i. determining accurate information for airport services (1a, 1b, 2c);

8. Demonstrate an understanding of aviation weather and weather services by:

a. identifying critical weather situations from the ground and in flight (1a, 1b, 2c);

b. describing weather theories pertaining to air masses, fronts, atmospheric stability, wind and currents, icing, turbulence, and thunderstorms (1a, 1b, 2c);

c. identifying windshear and explaining windshear avoidance (1a, 1b, 2c);

d. explaining the procurement and use of aviation weather reports and forecasts, the elements of forecasting weather trends on the basis of that information, and personal observation of weather conditions (1a, 1b, 1c, 2c, 2e);

9. Demonstrate an understanding of crew resource management by:

a. explaining crew communication and coordination (1a, 1b, 1c, 2a, 2b, 2c);

b. describing human factors leading to accidents or incidents (1a, 1b, 1c, 2a, 2b, 2c);

c. analyzing human factors in aviation and describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 1c, 2a, 2b, 2c);

d. describing checklist usage (1a, 1b, 1c, 2a, 2b, 2c);

e. describing safe and efficient operation of the aircraft under instrument flight rules and conditions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Instruct multiengine maneuvers both on the ground and in flight; apply fundamentals of instruction while in flight; meet the guidelines of the Federal Aviation Administration Airman Certification Standards for Flight Instructor Multiengine.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in required flight maneuvers, procedures, and knowledge areas as outlined in the FAA approved Certified Flight Instructor – Multiengine Training Course Outline by:

a. manipulating the flight controls of the aircraft from the right seat of a multiengine aircraft to meet the Federal Aviation Administration Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);

b. demonstrating knowledge of common student errors and FAA practical test standards for every flight maneuver and required knowledge area of a practical exam (1a, 1b, 1c, 2a, 2c, 2e);

c. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing cross county flying and planning (1a, 1b, 1c, 2a, 2c, 2e);

d. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student for solo local and solo cross county flights (1a, 1b, 1c, 2a, 2c, 2d, 2e);

e. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student for manipulation of the flight controls of an aircraft at night (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply safe operating practices (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

g. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to transitioning to aircraft with more than one engine (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

h. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to solve inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

i. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);

j. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to operate an aircraft safely, smoothly, and accurately in the National Airspace System (1a, 1b, 1c, 2c);

AIRP 2151 - Multiengine Flight

General

Course Key
15480

Course Rubric
AIRP

Course Number
2151

Course Title
Multiengine Flight

Semester Credit Hours
1

Lecture Hours
0

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-3) Preparation for the multiengine class rating which will be added to a current pilot certificate. Includes explanation and demonstration of all required Federal Aviation Administration normal and emergency operations and procedures. Preparation for the Federal Aviation Administration Airman Certification Standards for Multiengine Add-On.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain and demonstrate normal and emergency multiengine maneuvers, procedures, and performance calculations; discuss multiengine aerodynamics; meet aeronautical knowledge areas required for the Federal Aviation Administration Multiengine Practical Test.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in required flight maneuvers and procedures as outlined in the FAA approved multiengine add-on training course outline by:
    a. manipulating the flight controls of a multiengine aircraft to meet the Federal Aviation Administration Practical Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);
    b. manipulating the flight controls of a multiengine aircraft in actual or simulated IMC conditions (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. discussing factors affecting VMC (1a, 1b, 1c, 2a, 2c, 2e);
    d. explaining and discussing critical engine (1a, 1b, 1c, 2a, 2c, 2e);
    e. demonstrating proficiency in single engine operations to include precision instrument approaches (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. applying safe operating practices during normal and emergency situations (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. solving inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. applying applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);
    i. operating an aircraft safely, smoothly and accurately in the National Airspace System (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate commercial level competencies; apply the fundamentals of instruction; analyze and correct maneuvers of student pilots in flight; meet the guidelines of the Federal Aviation Administration Airman Certification Standards for Certified Flight Instructor.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in required flight maneuvers, procedures, and knowledge areas as outlined in the FAA-approved Certified Flight Instructor training course outline by
    a. manipulating the flight controls of the aircraft from the right seat to meet the FAA Practical Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);
    b. demonstrating knowledge of common student errors and FAA practical test standards for every flight maneuver and required knowledge area of a practical exam (1a, 1b, 1c, 2a, 2c, 2e);
    c. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing cross country flying and planning (1a, 1b, 1c, 2a, 2c, 2e);
    d. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student for solo local and solo cross country flights (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student for manipulation of the flight controls of an aircraft at night (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply safe operating practices (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to solve inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);
    i. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to operate an aircraft safely, smoothly, and accurately in the National Airspace System (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain flight maneuvers and procedures; demonstrate specific flight maneuvers; demonstrate cross-country flight procedures; meet the guidelines of the Federal Aviation Administration Airman Certification Standards for Commercial Pilot Certificate.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain flight maneuvers and procedures; demonstrate specific flight maneuvers; demonstrate cross country flight procedures; and meet the guidelines of the Federal Aviation Administration Commercial Pilot Practical Test Standards.
2. Demonstrate proficiency in required flight maneuvers and procedures as outlined in the FAA approved Commercial Pilot Training Course Outline by
    a. manipulating the flight controls of the aircraft to meet the Federal Aviation Administration Practical Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);
    b. preparing accurate and detailed flight plans and navigation logs (1a, 1b, 1c, 2a, 2c, 2e);
    c. performing solo local and solo cross county flights (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. manipulating the flight controls of an aircraft at night (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. applying safe operating practices (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. solving inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. applying applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);
    h. operating an aircraft safely, smoothly, and accurately in the National Airspace System (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate instrument and commercial competencies; apply the fundamentals of instruction while in instrument flight; analyze and correct instrument maneuvers of student pilots in flight; meet the guidelines of the Federal Aviation Administration Airman Certification Standards for Certified Flight Instructor–Instrument.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in required flight maneuvers, procedures, and knowledge areas as outlined in the FAA approved Certified Flight Instructor–Instrument training course outline by
    a. manipulating the flight controls of the aircraft from the right seat to meet the FAA Practical Test Standards for the required flight maneuvers as outlined in the Federal Aviation Regulations (1a, 1b, 1c, 2a, 2c, 2e);
    b. demonstrating knowledge of common student errors and FAA practical test standards for every flight maneuver and required knowledge area of a practical exam (1a, 1b, 1c, 2a, 2c, 2e);
    c. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to perform required preflight preparations and procedures for instrument flight (1a, 1b, 1c, 2a, 2c);
    d. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to comply with air traffic control clearances and procedures (1a, 1b, 1c, 2a, 2c);
    e. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to manipulate the flight controls of an aircraft in instrument meteorological conditions by reference to the instruments and navigation systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to fly holds, precision and non-precision instrument approaches (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to fly a cross country flight under instrument flight rules (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    h. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply safe operating practices and proven rules of thumb (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    i. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to solve inflight emergencies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to apply applicable FAA Regulations (1a, 1b, 1c, 2a, 2c);
    k. performing approved teaching methods and demonstrating knowledge of common student errors as they relate to preparing a student to perform required post-flight procedures (1a, 1b, 1c, 2a, 2c);

Workforce Education Course Manual (WECM)

Description
(3-3-0) Study of the theory, operation, and application of pneumatic, hydraulic, electrical, fuel, environmental, protection, and warning systems. Emphasis on subsystems and control systems.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Summarize the operation of hydraulic, pneumatic, electrical, and fuel systems; explain the operation of aircraft protection and warning systems; and explain aircraft flight control, instrumentation, and navigation systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the operation of hydraulic, pneumatic, electrical, and fuel systems; explain the operation of aircraft protection and warning systems; and explain aircraft flight control, instrumentation, and navigation systems (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of electronic air navigation equipment by
    a. explaining how radio navigation (VOR, GPS, NDB) systems operate and their usefulness in air navigation (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of aircraft power plants, systems and instruments by
    a. describing the operation of a reciprocating engine (1a, 1b, 2c, 2d, 2e);
    b. describing the operation of a turbo charged or super charged engine (1a, 1b, 2c, 2d, 2e);
    c. describing the operation of a typical aircraft electrical system (1a, 1b, 2c, 2d, 2e);
    d. describing the operation of the primary controls surfaces, flaps, leading edge devices, and spoilers (1a, 1b, 2c, 2d, 2e);
    e. describing the operation of aircraft fuel systems (1a, 1b, 2c, 2d, 2e);
    f. describing the operation of aircraft anti-ice and/or de-ice system (1a, 1b, 2c, 2d, 2e);
    g. describing how the ignition system works (1a, 1b, 2c, 2d, 2e);
    h. describing how the landing gear system works (1a, 1b, 2c, 2d, 2e);
    i. describing how the pneumatic system works and the instruments it powers (1a, 1b, 2c, 2d, 2e);
    j. describing how the hydraulic system works (1a, 1b, 2c, 2d, 2e);
    k. describing how the constant speed propeller works (1a, 1b, 2c, 2d, 2e);
    l. describing how the pitot static system works and the instruments it powers (1a, 1b, 2c, 2d, 2e);
    m. describing the operating principles of the altimeter, airspeed indicator, attitude indicator, heading indicator, vertical speed indicator, and turn indicator (1a, 1b, 2c, 2d, 2e);
    n. describing the operating principles of EFIS and ICAS (1a, 1b, 2c, 2d, 2e);
    o. describing how autopilot works (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of electronic navigation and approaches by use of navigation systems by
    a. explaining and describing how a VOR works and its use in navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    b. explaining and describing how a NDB works and its use in navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    c. explaining and describing how a DME works and its use in navigation and instrument approaches (1a, 1b, 2c, 2d, 2e);
    d. explaining and describing how RNAV/GPS works and its use in navigation and instrument approaches (1a, 1b, 2c, 2d, 2e).

Description
(3-3-0) A study of advanced aviation topics used for Federal Aviation Administration certification at the commercial pilot level. Preparation for the Federal Aviation Administration Airman Certification Standards for Commercial Pilot Certificate.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate advanced aircraft performance; describe systems for complex aircraft; explain the Federal Aviation Regulations that apply to commercial flight operations; and analyze advanced airplane operations; identify aeronautical knowledge areas required for the Federal Aviation Administration Commercial Pilot Practical Test; demonstrate proficiency in knowledge required by the Federal Aviation Administration for the Commercial Pilot Written Test.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Calculate advanced aircraft performance; describe systems for complex aircraft; explain the Federal Aviation Regulations that apply to commercial flight operations; and analyze advanced airplane operations.
2. Demonstrate an understanding of applicable Federal Aviation Regulations by
    a. locating applicable regulations and critical information related to a Commercial Pilot in the FAR/AIM and FAA advisory circulars (1a, 1b, 2c);
    b. describing commercial pilot privileges and limitations (1a, 1b, 2c);
    c. recalling and applying appropriate flight operation privileges and limitations (1a, 1b, 2c);
    d. describing accident reporting requirements of the NTSB (1a, 1b, 2c);
    e. describing FAA medical certificates and pilot certificate category and class (1a, 1b, 2c);
    f. identifying aircraft and pilot certificate categories, classes, and types (1a, 1b, 2c);
3. Demonstrate an understanding of air navigation by
    a. explaining and identifying symbols/markings on aeronautical charts (1a, 1b, 2c);
    b. identifying and describing Class A, B, C, D, E, and G Airspace as well as Special Use and Other Airspace in the National Airspace System (1a, 1b, 2c);
    c. distinguishing between variation/deviation and pilotage/dead reckoning (1a, 1b, 2c);
    d. computing time, speed, and distance plus other basic calculations using an E6/B flight calculator (1a, 1b, 2c, 2d, 2e);
    e. preparing a thorough and accurate flight plan and navigation log using aeronautical charts, plotters, FAA publications, E6/B calculator, and Airplane Operating Handbook (1a, 1b, 1c, 2a, 2c, 2d);
    f. explaining how radio navigation (VOR, GPS, NDB) systems operate and their usefulness in air navigation (1a, 1b, 2c, 2d, 2e);
    g. describing lost procedures and flight diversions (1a, 1b, 2c);
    h. distinguishing hazardous areas and applying proper collision avoidance procedures (1a, 1b, 2c);
    i. describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 2c);
    j. demonstrating effective radio communication procedures (1a, 1b, 2c, 2d, 2e);
    k. identifying and describing different ATC services available to pilots, radio procedures, and sources of flight information (1a, 1b, 2c, 2d, 2e);
4. Demonstrate an understanding of aerodynamics by
    a. naming and identifying the different components of an aircraft (1a, 1b, 2c);
    b. naming and identifying primary and secondary flight controls systems (1a, 1b, 2c);
    c. explaining the structure of the atmosphere (1a, 1b, 2c);
    d. describing the different theories in the production of lift (1a, 1b, 2c);
    e. describing the four forces of flight (1a, 1b, 2c);
    f. explaining how changes to lift, thrust, drag, and weight affect the aerodynamic principles of an aircraft (1a, 1b, 2c);
    g. summarizing aircraft stability and its effects on aerodynamic principles (1a, 1b, 2c);
    h. explaining how and why an aircraft stalls and spins as well as proper recovery techniques (1a, 1b, 2c);
    i. explaining recognition and avoidance procedures for wake turbulence (1a, 1b, 2c);
    j. describing the effects of density altitude on takeoff and climb performance (1a, 1b, 2c);
    k. computing weight and balance (1a, 1b, 2c);
5. Demonstrate an understanding of aviation weather by
    a. identifying critical weather situations from the ground and in flight (1a, 1b, 2c);
    b. describing weather theories pertaining to air masses, fronts, atmospheric stability, wind and currents, and thunderstorms (1a, 1b, 2c);
    c. explaining Coriolis force and its effect on our atmosphere (1a, 1b, 2c);

d. identifying wind shear and describing how to avoid it (1a, 1b, 2c);

e. explaining the procurement and use of aeronautical weather reports and forecasts (1a, 1b, 1c, 2c, 2e);

6. Demonstrate an understanding of Pre-Flight Action by

a. identifying and decoding appropriate NOTAMs (1a, 1b, 1c, 2c, 2e);

b. comprehending current and forecasted weather reports and conditions (1a, 1b, 1c, 2c, 2e);

c. identifying known ATC delays (1a, 1b, 2c);

d. determining runway lengths at departure and arrival airports (1a, 1b, 2c);

e. identifying appropriate alternate airports (1a, 1b, 2c);

f. calculating fuel requirements as outlined in the FARs (1a, 1b, 2c, 2e);

g. calculating takeoff and landing distances as well as other aircraft performance data related to commercial flying (1a, 1b, 2c, 2e);

7. Demonstrate an understanding of complex/advanced aircraft power plants, systems, and instruments by

a. identifying the make, model and size of the engine in the aircraft being flown (1a, 1b, 2c, 2d, 2e);

b. describing the operation of a reciprocating engine (1a, 1b, 2c, 2d, 2e);

c. describing the operation of a turbocharged or supercharged engine (1a, 1b, 2c, 2d, 2e);

d. identifying and describing how the electrical system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

e. identifying and describing how the flaps, leading edge devices, and spoilers (if applicable) work on his/her aircraft (1a, 1b, 2c, 2d, 2e);

f. identifying and describing how primary flight control surfaces work on his/her aircraft (1a, 1b, 2c, 2d, 2e);

g. identifying and describing how the fuel system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

h. identifying and describing how the anti-ice and/or de-ice system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

i. identifying and describing how the ignition system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

j. identifying and describing how the landing gear system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

k. identifying and describing how the pneumatic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

l. identifying and describing how the hydraulic system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

m. describing how the constant speed propeller works (1a, 1b, 2c, 2d, 2e);

n. identifying and describing how the pitot static system works in his/her aircraft (1a, 1b, 2c, 2d, 2e);

o. identifying and describing the operating principles of the altimeter, airspeed indicator, attitude indicator, heading indicator, vertical speed indicator, and turn indicator (1a, 1b, 2c, 2d, 2e);

8. Demonstrate an understanding of flight physiology by

a. determining fitness for flight (1a, 1b, 2c);

b. explaining the physiological effects of flying at high altitudes (1a, 1b, 2c);

c. explaining the signs, symptoms, and appropriate action for hypoxia, hyperventilation, and carbon monoxide poisoning in flight (1a, 1b, 1c, 2c);

d. describing illusions in flight and how to overcome their effects (1a, 1b, 1c, 2c);

e. summarizing the physiology of vision in flight for day and night operations (1a, 1b, 2c);

f. analyzing human factors in aviation and describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 1c, 2c);

9569

Course Rubric	Course Number	Course Title
AIRP	2349	Instructor Ground School

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Skill development in the fundamentals of teaching and learning in an aviation-oriented environment. Introduction to the techniques of instruction and analysis of flight maneuvers. Preparation for the Federal Aviation Administration Airman Certification Standards for Certified Flight Instructor.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the fundamentals of instruction through lesson presentations; meet aeronautical knowledge areas required for the Federal Aviation Administration Certified Flight Instructor Practical Test; demonstrate proficiency in knowledge required by the Federal Aviation Administration for the Certified Flight Instructor Written Test.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the fundamentals of instruction by

a. developing appropriate lesson plans for FAA-required knowledge areas and flight maneuvers (1a, 1b, 1c, 2a, 2c);

b. describing human behavior related to needs, motivations, learning, defense mechanisms, and emotional reactions (1a, 1b, 1c, 2c);

c. describing the learning process to include but not limited to learning theory, perceptions, insight, characteristics of learning, and evaluation versus critique (1a, 1b, 1c, 2c);

d. demonstrating effective communication (1a, 1b, 1c, 2c);

e. describing the teaching process (1a, 1b, 1c, 2c);

f. explaining instructor responsibilities and professionalism (1a, 1b, 1c, 2c);

g. explaining techniques of flight instruction (1a, 1b, 1c, 2c);

h. identifying ways to manage risk (1a, 1b, 1c, 2c);

2. Demonstrate an understanding of applicable Federal Aviation Regulations and how to teach them to student and FAA certified pilots by

a. locating applicable regulations and critical information related to a Certified Flight Instructor in the FAR/AIM and FAA advisory circulars (1a, 1b, 2c);

b. describing Certified Flight Instructor privileges and limitations (1a, 1b, 2c);

c. recalling and applying appropriate flight operation privileges and limitations (1a, 1b, 2c);

d. describing accident reporting requirements of the NTSB (1a, 1b, 2c);

e. describing FAA medical certificates and pilot certificate category and class (1a, 1b, 2c);

f. identifying aircraft and pilot certificate categories, classes, and types (1a, 1b, 2c);

g. describing required endorsements and practical experience for all FAA ratings and certificates (1a, 1b, 2c);

3. Demonstrate an understanding of air navigation and how to teach it to student and FAA certified pilots by

a. explaining and identifying symbols/markings on aeronautical charts (1a, 1b, 2c);

b. identifying and describing Class A, B, C, D, E, and G Airspace as well as Special Use and Other Airspace in the National Airspace System (1a, 1b, 2c);

c. distinguishing between variation/deviation and pilotage/dead reckoning (1a, 1b, 2c);

d. computing time, speed, and distance plus other basic calculations using an E6/B flight calculator (1a, 1b, 2c, 2d, 2e);

e. preparing a thorough and accurate flight plan and navigation log using aeronautical charts, plotters, FAA publications, E6/B calculator, and Airplane Operating Handbook (1a, 1b, 1c, 2a, 2c, 2d);

f. explaining how radio navigation (VOR, GPS, NDB) systems operate and their usefulness in air navigation (1a, 1b, 2c, 2d, 2e);

g. describing lost procedures and flight diversions (1a, 1b, 2c);

h. distinguishing hazardous areas and applying proper collision avoidance procedures (1a, 1b, 2c);

i. describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 2c);

j. demonstrating effective radio communication procedures (1a, 1b, 2c, 2d, 2e);

k. identifying and describing different ATC services available to pilots, radio procedures, and sources of flight information (1a, 1b, 2c, 2d, 2e);

4. Demonstrate an understanding of aerodynamics and how to teach it to student and FAA certified pilots by

a. naming and identifying the different components of an aircraft (1a, 1b, 2c);

b. naming and identifying primary and secondary flight control systems (1a, 1b, 2c);

c. explaining the structure of the atmosphere (1a, 1b, 2c);

d. describing the different theories in the production of lift (1a, 1b, 2c);

e. describing the four forces of flight (1a, 1b, 2c);

f. explaining how changes to lift, thrust, drag, and weight affect the aerodynamic principles of an aircraft (1a, 1b, 2c);

g. summarizing aircraft stability and its effects on aerodynamic principles (1a, 1b, 2c);

h. explaining how and why an aircraft stalls and spins as well as proper recovery techniques (1a, 1b, 2c);

i. explaining recognition and avoidance procedures for wake turbulence (1a, 1b, 2c);

j. describing the effects of density altitude on takeoff and climb performance (1a, 1b, 2c);

k. computing weight and balance (1a, 1b, 2c);

5. Demonstrate an understanding of aviation weather and how to teach it to student and FAA certified pilots by

a. identifying critical weather situations from the ground and in flight (1a, 1b, 2c);

b. describing weather theories pertaining to air masses, fronts, atmospheric stability, wind and currents, and thunderstorms (1a, 1b, 2c);

c. explaining Coriolis force and its effect on our atmosphere (1a, 1b, 2c);

d. identifying wind shear and describing how to avoid it (1a, 1b, 2c);

e. explaining the procurement and use of aeronautical weather reports and forecasts (1a, 1b, 1c, 2c, 2e);

6. Demonstrate an understanding of pre-flight action and how to teach it to student and FAA certified pilots by

a. identifying and decoding appropriate NOTAMs (1a, 1b, 1c, 2c, 2e);

b. comprehending current and forecasted weather reports and conditions (1a, 1b, 1c, 2c, 2e);

c. identifying known ATC delays (1a, 1b, 2c);

d. determining runway lengths at departure and arrival airports (1a, 1b, 2c);

e. identifying appropriate alternate airports (1a, 1b, 2c);

f. calculating fuel requirements as outlined in the FARs (1a, 1b, 2c, 2e);

g. calculating takeoff and landing distances as well as other aircraft performance data related to commercial flying (1a, 1b, 2c, 2e);

7. Demonstrate an understanding of complex/advanced aircraft power plants, systems, and instruments and how to teach them to student and FAA certified pilots by

a. identifying the make, model, and size of the engine in the aircraft being flown (1a, 1b, 2c, 2d, 2e);

b. describing the operation of a reciprocating engine (1a, 1b, 2c, 2d, 2e);

c. describing the operation of a turbocharged or supercharged engine (1a, 1b, 2c, 2d, 2e);

d. identifying and describing how the electrical system works in the aircraft (1a, 1b, 2c, 2d, 2e);

e. identifying and describing how the flaps, leading edge devices, and spoilers (if applicable) work on the aircraft (1a, 1b, 2c, 2d, 2e);

f. identifying and describing how primary flight control surfaces work on the aircraft (1a, 1b, 2c, 2d, 2e);

g. identifying and describing how the fuel system works in the aircraft (1a, 1b, 2c, 2d, 2e);

h. identifying and describing how the anti-ice and/or de-ice system works in the aircraft (1a, 1b, 2c, 2d, 2e);

i. identifying and describing how the ignition system works in the aircraft (1a, 1b, 2c, 2d, 2e);

j. identifying and describing how the landing gear system works in the aircraft (1a, 1b, 2c, 2d, 2e);

k. identifying and describing how the pneumatic system works in the aircraft (1a, 1b, 2c, 2d, 2e);

l. identifying and describing how the hydraulic system works in the aircraft (1a, 1b, 2c, 2d, 2e);

m. describing how the constant speed propeller works (1a, 1b, 2c, 2d, 2e);

n. identifying and describing how the pitot static system works in the aircraft (1a, 1b, 2c, 2d, 2e);

o. identifying and describing the operating principles of the altimeter, airspeed indicator, attitude indicator, heading indicator, vertical speed indicator, and turn indicator (1a, 1b, 2c, 2d, 2e);

8. Demonstrate an understanding of flight physiology and how to teach it to student and FAA certified pilots by

a. determining fitness for flight (1a, 1b, 2c);

b. explaining the physiological effects of flying at high altitudes (1a, 1b, 2c);

c. explaining the signs, symptoms, and appropriate action for hypoxia, hyperventilation, and carbon monoxide poisoning in flight (1a, 1b, 1c, 2c);

d. describing illusions in flight and how to overcome their effects (1a, 1b, 1c, 2c);

e. summarizing the physiology of vision in flight for day and night operations (1a, 1b, 2c);

f. analyzing human factors in aviation and describing aeronautical decision making principles and the importance of exercising good judgment (1a, 1b, 1c, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the regulations applicable to the aircraft dispatcher; compute weight and balance for advanced aircraft; and solve aircraft performance problems; and demonstrate proficiency in knowledge required by the Federal Aviation Administration for the Aircraft Dispatcher Written Test and for the Federal Aviation Administration Aircraft Dispatcher Practical Test.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of FAA Regulations.
2. Prepare Navigation plans for commercial Aircraft
3. Demonstrate an understanding of Aerodynamics
4. Prepare for flights using appropriate Performance charts and data
5. Demonstrate an understanding of Weather Charts
6. Prepare for flights using appropriate Airport Operation procedures
7. Demonstrate an understanding of Emergencies
8. Demonstrate an understanding of Weather
9. Prepare for flights using appropriate Weight and Balance

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Perform the duties of pilot in command and/or second in command by

a. assessing the conditions of the aircraft and environment to verify legally safe for flight (1b, 1c, 2a, 2c, 2d, 2e);

b. explaining steps used to safely navigate an aircraft from departure to destination (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. combining knowledge and skill previously gain to successfully make professional pilot go/no go decisions before and during flight (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. discussing safety measures taken to mitigate risk before and during flight (1b, 1c, 2a, 2c, 2d, 2e);

e. determining the best course of action throughout a flight using proper aeronautical decision making (1a, 1b, 1c, 2a, 2b, 2c, 2e);

f. demonstrating appropriate ATC communication throughout a flight to ascertain proper request and compliance (1a, 1c, 2a, 2b);

g. making practical use of appropriate navigation aids throughout flight (1a, 1b, 1c, 2a, 2c, 2d);

h. determining best course of action should varying emergency conditions exist (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

i. assisting the Pilot in Command/Second in Command (if appropriate) with duties to successfully complete the flight (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

j. abiding by all federal, state, and local laws/procedures relating to flight operations (1a, 1b, 1c, 2a, 2c, 2d);

Description
(3-3-0) Introduction to the theory and concepts in the proper use and safe practice of delivery and storage of anesthesia medications which includes: Stocking of the drug cart and assisting anesthesia care provider in the preparation of medications. Prerequisite: Acceptance into the Anesthesia Technology Program

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge in the differentiation of various categories of anesthetic and adjunct medications; apply theoretical knowledge and concepts of the proper use and administration of anesthetic and adjunct medications; and apply theoretical knowledge and concepts in the appropriate storage of anesthesia medications.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe safe and effective methods to order, categorize, and store medications in the anesthesia environment (1a, 1c, 2e).
2. Use effective communication skills when interacting with anesthesia providers in assisting with the administration of medications (2b, 2c).
3. Perform proper psychomotor skills in assisting anesthesia providers in the handling and use of anesthesia and adjunct medications (2c, 2e).
4. Differentiate between the various types of intravenous medications (2c).
5. Compare and contrast the side effects of the inhalational agents (2c).
6. Differentiate between the various types of intravenous fluids and blood products (2c).
7. Describe the proper labeling of anesthetic medications (2c, 2e).

Description
(3-3-0) This course introduces the theoretical and practical aspects of the physical sciences. The dependence of medical diagnostics and the analogous relationship to the human body to the sciences are emphasized. Topics include flow, pressure, resistance, electronic circuit analysis and Ohm's Law. Introduction to the theory and concepts of the use and function of anesthesia supplies and equipment used for various surgical procedures to include cases in: General, regional, and conscious sedation. Prerequisite: Acceptance into the Anesthesia Technology Program

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge to demonstrate competency in the use and care of anesthesia equipment; and communicate concepts and theoretical knowledge as it applies to maintenance of the anesthesia work area in the surgical environment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Prepare anesthesia equipment for proper disposal, cleaning, and sterilization requirement (1a, 1c, 2d, 2e).
2. Demonstrate psychomotor skills in the preparation of equipment for a variety of surgical cases and procedures in anesthesia (2e).
3. Use adequate communication skills when interacting with anesthesia care providers (2b, 2c).
4. Differentiate between the various types of airway equipment used in the difficult airway cart (2c, 2d, 2e).
5. Differentiate between the various types of anesthesia (2c, 2d).
6. Compare and contrast the various patient anatomical positions for surgical cases (2b, 2c).
7. Differentiate between the proper cleaning and sterilization of anesthesia equipment (2c, 2e).
8. Discuss the ASA guidelines for the anesthesia gas machine checkout (2c, 2d, 2e).

Description
(3-3-0) This course provides an introduction to distinctive areas of anesthesia technology and the role of the technologist. An overview of typical surgical procedures and instrumentation and surgical department orientation are covered as well as medical terminology, blood-borne pathogens and non-patient related emergencies. Prerequisite: Acceptance into the Anesthesia Technology Program

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge and concepts of anesthesia technology at the fundamental level for patients in the surgical environment; and communicate theoretical knowledge and concepts of the anesthesia technologist's role, at the fundamental level, in the care of the surgical patient;

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply concepts and principles of the function and job performance of the anesthesia technologist (2b, 2c, 2e).
2. Compare professional anesthesiology roles including the scope of practice and function of each anesthesia care provider (2b, 2c, 2d).
3. Apply anesthesiology process and critical thinking to the care of the surgical patient at the foundational level (2b, 2c, 2d, 2e).
4. Develop individualized anesthesia care plan at the foundational level (2b, 2c, 2d, 2e).
5. Provide safe, effective support of the anesthesia provider in the care of the surgical patient (1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge of anesthesia equipment needed for a variety of surgical cases; summarize the proper basic anesthesia set-up for a variety of surgical cases; and communicate concepts and theoretical knowledge of functioning as an anesthesia technologist in the surgical environment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the techniques used for basic anesthesia set-up, and daily anesthesia machine check (2a, 2c, 2d, 2e).
2. Perform psychomotor skills in the selection of proper anesthesia equipment for surgical cases (2e).
3. Differentiate between the various medications used in the anesthesia drug cart (2c, 2d, 2e).
4. Compare and contrast the various sterilization and cleaning procedures used to clean anesthesia equipment (2c, 2d, 2e).
5. Discuss the types of noninvasive and invasive monitoring modalities used in patient care (2b, 2c).
6. Describe the necessary equipment used in the function of the anesthesia gas machine (2b, 2e).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain concepts from biological sciences in the function and use of advanced anesthesia equipment (1b, 1c, 2e).
2. Demonstrate appropriate psychomotor skills in the preparation of advanced anesthesia equipment (2c, 2d, 2e).
3. Describe regulatory compliance requirements for adherence to policies regarding anesthesia equipment (2c, 2d, 2e).
4. Apply didactic knowledge of use of appropriate airway equipment in simulation exercises (2c, 2d, 3e).

ANES 2373 - Anesthesia Technology Fundamentals II

ANES

Course Number
2373

Course Title
Anesthesia Technology Fundamentals II

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Technical Local Need

Description
(3-2-2) The concepts of Anesthesia Technology Fundamentals I will be expanded upon. Focus will be on the various types of surgical procedures, including emergency situation management and how the role of the anesthesia technologist varies in each. Patient transport, monitoring and positioning will be stressed. Required Prerequisites: ANES-1373 and ANES-1375

Required Prerequisite(s): ANES 1373 and ANES 1375

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge to demonstrate competency in the use and care of anesthesia equipment; and communicate concepts and theoretical knowledge as it applies to maintenance of the anesthesia work area in the surgical environment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Prepare anesthesia equipment for proper disposal, cleaning, and sterilization requirement (2c, 2d, 2e).
2. Demonstrate psychomotor skills in the preparation of equipment for a variety of surgical cases and procedures in anesthesia (2c, 2d, 2e).
3. Use adequate communication skills when interacting with anesthesia care providers (2c, 2d).
4. Differentiate between the various types of airway equipment used in the difficult airway cart (2c, 2d, 2e).
5. Differentiate between the various types of anesthesia (2c, 2d).
6. Compare and contrast the various patient anatomical positions for surgical cases (2c, 2d).
7. Differentiate between the proper cleaning and sterilization of anesthesia equipment (2c, 2d, 2e).
8. Discuss the ASA guidelines for the anesthesia gas machine checkout (2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge of anesthesia technology at the advanced level for all types of surgical cases; and apply concepts and theoretical knowledge of the role of an anesthesia technologist at the advanced level for all types of surgical cases.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the preparation of all types of anesthesia equipment for a variety of anesthesia cases and procedures (2a, 2b, 2c, 2d, 2e).
2. Differentiate between complex and simple types of anesthesia equipment and supplies (2c, 2d, 2e).
3. Analyze patient information to develop an adequate plan of care (2b, 2c, 2d, 2e).
4. Demonstrate appropriate psychomotor skills at the advanced level in the anesthesia preparation of all surgical cases (2c, 2d, 2e).
5. Demonstrate effective leadership skills in working with the anesthesia team in the delivery of patient care (2b, 2c, 2d).

Course Learning Outcomes
End-of-Course Outcomes: Apply theoretical knowledge in function and use of advanced equipment used in cardiac, neurological, and trauma surgical procedures; and apply theoretical knowledge and concepts of the anesthesia technologist role in advanced surgical procedures including cardiac, neurological, and trauma.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Develop a comprehensive anesthesia plan of care with the anesthesia provider for the complex surgical patient (2b, 2c, 2d, 2e).
2. Demonstrate effective communication skills when interacting with the anesthesia care provider in preparation of cardiac, neurological, and trauma patients (2c, 2d).
3. Manage an anesthesia care environment to ensure proper function of various anesthesia equipment used in cardiac, neurological, and trauma surgeries (2a, 2c, 2d, 2e).
4. Demonstrate the characteristics of an effective leader in communicating with other anesthesia providers in the care of complex surgical cases (2a, 2b, 2c, 2d, 2e).
5. Differentiate between the various types of more complex anesthesia equipment and instrumentation (2b, 2c, 2d, 2e).
6. Compare and contrast the various modalities used in peripheral nerve blocks (2b, 2c, 2d, 2e).

Workforce Education Course Manual (WECM)

Description
(3-3-0).Study of ordinances, codes, and legal documents as they relate to specifications and drawing. Discussion of owner-architect-contractor responsibilities, duties, and legal relationships.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize codes, ordinances and legal documents; solve planning and construction problems with available resources; compose written construction specification documents; and analyze owner/architect/contractor relationship.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic concepts of the laws and regulations governing the building industry by
    a. explaining local, state, regional, and national code requirements in building construction (1a, 1b, 1c);
    b. explaining the different regulations that govern the building industry (1a, 1b);
    c. identifying the different professional choices of designers and contractors (1a, 1b);
    d. explaining construction law, safety, and ethical values concerning green technology (1a, 1b).
2. Demonstrate an understanding of a variety of construction contract agreements by
    a. Defining and composing procedures to execute construction documents (1a, 1b, 2b, 2d);
    b. defining the different type of contract agreements (1a, 1b);
    c. explaining the roles and responsibilities of the contract parties involved (1a, 1b, 2b, 2d);
    d. explaining the different parts of the contract agreement; i.e. specifically the owner/architect/contractor relationship (1a, 1b);
    e. discussing insurance coverage and requirements of the parties involved (1a, 1b).
3. Execute a code review of a building project by
    a. explaining the code review process (1a, 1b);
    b. interpreting codes in construction drawings and specifications (1a, 1b, 2c);
    c. preparing a summary report of the code review (1a, 1b, 2a, 2b, 2c);
    d. administering the contract agreement for construction (1a, 1b, 2b, 2c, 2d).
4. Demonstrate an understanding of the process of writing specifications by
    a. explaining the importance of the specifications in the contract (1a, 1b);
    b. explaining the proper sequence and organization in preparing a specification (1a, 1b, 2c);
    c. explaining the contents of the project manual and their formats (1a, 1b, 2c);
    d. preparing a specification for residential and commercial projects (1a, 1b, 2c).
5. Demonstrate an understanding of green building requirements, codes, and ethical values by
    a. explaining the importance of sustainability (1a, 1b);
    b. incorporating green knowledge in the design and construction process (1a, 1b, 2c).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARCH 2312

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Review and apply building and energy codes, select MEP components, and incorporate specifications to produce MEP drawings including comprehension of related calculations and coordination with building systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify various architectural building materials and methods of construction by
    a. explaining complex interrelated architectural building systems (1a, 1b, 2c, 2d, 2e);
    b. explaining complex interrelated architectural building technologies (1a, 1b, 2c, 2d, 2e);
    c. understanding the design process and the stages and the sequence of events in the process in the construction of a building (1a, 1b, 2c, 2d, 2e);
    d. explaining the fundamentals of residential construction elements (1a, 1b, 2c, 2d, 2e);
    e. explaining the fundamentals of commercial construction elements (1a, 1b, 2c, 2d, 2e).
2. Demonstrate familiarity with the quality of building materials and how they affect the quality of the final product, the finished structure, by
    a. giving examples and explaining numerous building materials (1b, 2c, 2d, 2e);
    b. explaining the methods of assembly of the building materials (1b, 2c, 2d, 2e);
    c. being able to synthesize the technical, aesthetic, and ethical values related to building materials (1b, 2c, 2d, 2e);
    d. identifying and differentiating between the different types of construction (1b, 2c, 2d, 2e);
    e. evaluating the effectiveness of the various building systems and materials (1b, 2c, 2d, 2e);
    f. demonstrating, understanding, and comprehending the nature and application of construction materials and methods of construction (1b, 2c, 2d, 2e).
3. Demonstrate familiarity with architectural building systems and their impact on local and global climate-related issues by
    a. identifying related topics and current events (1b, 1c, 2a, 2c, 2e);
    b. explaining attitudes and behaviors pertinent to the technology or occupation (1b, 1c, 2a, 2c, 2e);
    c. explaining attitudes and behaviors relevant to the professional development of the student (1b, 1c, 2a, 2c, 2e).
4. Identify various mechanical, electrical, plumbing, and conveying systems by
    a. explaining interrelationship between mechanical, electrical, plumbing, and conveying systems within a building system and technologies (1a, 1b, 2c, 2d, 2e);
    b. understanding the design process and the stages and the sequence of events in the construction of a building (1a, 1b, 2c, 2d, 2e);
    c. explaining the fundamentals of residential, mechanical, electrical, and plumbing elements (1a, 1b, 2c, 2d, 2e);
    d. explaining the fundamentals of commercial, mechanical, electrical, and plumbing elements (1a, 1b, 2c, 2d, 2e).
5. Demonstrate familiarity with mechanical/electrical/plumbing (MEP) calculations; select MEP components; interpret codes and specifications; and produce MEP drawings by
    a. producing calculations related to specific MEP conditions and criteria (1b, 2c, 2d, 2e);
    b. selecting appropriate MEP systems directly related to calculations (1b, 2c, 2d, 2e);
    c. demonstrating understanding of code and specification requirements related to MEP systems (1b, 2c, 2d, 2e);
    d. assembling information in order to create fundamental MEP drawings related to calculations generated (1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate basic technical skills related architecture by
    a. demonstrating proper technique in assigned technical exercises in the workplace (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating proper technique in assigned architectural applications in the workplace (1a, 1b, 2a, 2b, 2c, 2d, 2e);
2. Demonstrate appropriate interpretation skills in the preparation and performance of assigned technical skills related to architecture by
    a. integrating concepts related to architectural style and interpretation in the preparation and performance of assigned architectural assignments as applicable (1a, 1b, 2a, 2b, 2c, 2d, 2e);
3. Demonstrate practical knowledge related to the course of study by
    a. combining education based knowledge with job related experience in a format which will engender a melding of the two (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. explaining the methods and practices of an architectural work environment (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. demonstrating the self-confidence and experience necessary to successfully enter the architectural workforce upon graduation (1a, 1b, 2a, 2b, 2c, 2d, 2e);

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). Digital imaging using raster image editing and/or image creation software: scanning, resolution, file formats, output devices, color systems, and image-acquisitions.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify terminology, advantages and limitations of image editing software; distinguish bitmapped resolutions for image acquisitions and output devices; use digital editing and painting tools; use basic halftone theory in production of images, manipulate, create, and edit digital images for print and for web; specify appropriate file formats.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of digital imaging terminology and tools by
    a. describing color theory (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. identifying digital terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining color modes (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. comparing basic selections (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Demonstrate an understanding of halftone imagery by
    a. describing halftone theory (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. summarizing advantages of image editing software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. comprehending the limitations of image editing software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. explaining image resolution (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. demonstrating output resolution (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. producing color scan (1a, 1b, 2c, 2d, 2e);
3. Edit digital images by
    a. describing calibrating monitor (1a, 1b, 1c, 2a, 2b, 2a, 2b, 2c, 2d, 2e);
    b. analyzing color photos (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. accessing filters (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. comparing blending modes (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. demonstrating color correction (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. constructing additional alpha channels (1a, 1b, 2c, 2d, 2e);
    g. incorporating multiple layered file with photos (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. creating precise selections (1a, 1b, 1c, 2a, 2b, 2c, 2a, 2b, 2e);
    i. manipulating image with editing tools (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. utilizing various file formats (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

ARTC 1305 - Basic Graphic Design

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Graphic design with emphasis on the visual communication process. Topics include basic terminology and graphic design principles.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define basic design terminology; apply the design process using graphic design principles; and demonstrate the use of design tools and equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify basic graphic design principles by
    a. explaining the terminology used to create layouts (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining the terminology used in digital publishing (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. describing the graphic software tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. identifying parts of a layout (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Identify computer terminology and tools by
    a. explaining general computer terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. describing software tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying peripherals (1a, 1b, 2c);
    d. identifying proofreader symbols (1a, 1b, 1c, 2a, 2b, 2c, 2e);
3. Generate page layout procedures by
    a. preparing a new file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. saving a new file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. opening an existing file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. saving an existing file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. using a type gauge (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. producing a page layout document with graphic elements (1a, 1b, 1c, 2a, 2b, 2c, 2e);
4. Create vector based graphics procedures by
    a. preparing graphic images (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. manipulating graphic images (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. scanning a graphic image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
5. Create a layout using text and original graphic files by
    a. preparing an original advertising layout that includes text and graphics (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. manipulating design elements (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. preparing design file for service bureau (1a, 1b, 1c, 2a, 2b, 2c, 2e);

ARTC 1313 - Digital Publishing I

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). The fundamentals of using digital layout as a primary publishing tool and the basic concepts and terminology associated with typography and page layout.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply fundamentals of page layout; define typographic terminology and specifications; import text and graphics into page layout programs; discuss file formats and file management techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify type terminology and tools by
    a. explaining type terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. describing software page layout tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying hardware tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. distinguishing layout principles (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Demonstrate typesetting procedures by
    a. producing a document file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. saving a document file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. opening an existing document (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. combining typesetting and graphics in one document (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. producing a multiple page document (1a, 1b, 1c, 2a, 2b, 2c, 2e);
3. Create page layout document by
    a. preparing a typeset document (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. manipulating a page layout (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. manipulating a graphic image within a document (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. placing a scanned image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. explaining layout process (1a, 1b, 1c, 2a, 2b, 2c, 2e);
4. Interpret color theory by
    a. differentiating spot/process color (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining color separation (1a, 1b, 1c, 2a, 2b, 2c, 2e);
5. Evaluate output by
    a. critiquing student assignment (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c, 2e);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify terminology, advantages and limitations of vector software; use vector drawing tools manipulate, create, and edit vector drawings for print or web; and specify file formats.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify computer terminology and tools by
    a. explaining computer terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. describing software tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying peripherals (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. distinguishing design principles (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Demonstrate computer illustration procedures by
    a. producing new file (1a, 1b, 1c, 2a, 2c, 2e);
    b. saving new file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. opening existing file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. saving existing file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. using a type gauge (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. producing vector illustration (1a, 1b, 1c, 2a, 2b, 2c, 2e);
3. Produce vector based graphics by
    a. preparing graphic image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. manipulating graphic image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. manipulating Bezier paths (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. manipulating type (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. explaining design process (1a, 1b, 2c, 2e);
    f. scanning graphic image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. producing color separations (1a, 1b, 1c, 2a, 2b, 2c, 2e);
4. Interpret color theory by
    a. differentiating spot/process colors (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining color separations (1a, 1b, 1c, 2a, 2b, 2c, 2e);
5. Evaluate output by
    a. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c, 2e);
6. Interact with an industry service bureau by
    a. preparing reproduction file (1a, 1b, 2b, 2c, 2e);
    b. locating service bureau (1a, 1b, 2a, 2b, 2c, 2e);
    c. communicating with service bureau (1a, 1b, 2a, 2b, 2c, 2e);
    d. justifying service bureau printed file (1a, 1b, 2a, 2b, 2c, 2e);

Requirements

Requirements
Required Prerequisite(s): ARTC 1302

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use advanced concepts and concerns associated with image resolution and file size; demonstrate digital editing and use of printing/web tools; create, edit, and paint digital images; color correction and manipulation of photographic images; save and output images on various devices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of digital imaging terminology by
    a. clarifying uses of RGB files (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. clarifying uses of CMYK files (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. recognizing poor scans (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. operating color scanner (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. creating images on various output devices (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. incorporating imported graphics (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. producing digital halftones (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Edit digital imagery by
    a. categorizing image resolution (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing filters effectively (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. incorporating text with photos (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. balancing color photos (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. manipulating type (1a, 1b, 2c, 2d, 2e);
    f. demonstrating image adjusting capabilities (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. demonstrating advanced skills in image manipulation (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    h. demonstrating advanced masking techniques (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    i. creating precise selections (1a, 1b, 2c, 2d, 2e);
    j. constructing digital art brushes (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    k. designing complex masks (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    l. justifying various file formats (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    m. preparing files for web applications (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    n. submitting files to service bureau (1a, 1b, 1c, 2a, 2b, 2c, 2e);

Required Prerequisite(s): ARTC 1313

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Complete projects using thumbnails, roughs, and comprehensives; use industry standard page layout software to create printable advertising and print collateral; coordinate color and use the principles and elements of design.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. The student will identify computer terminology and tools by
    a. explaining computer terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. describing software tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. listing parameters (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. distinguishing design principles (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. The student will demonstrate page layout procedures by
    a. using a type gauge (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. manipulating text and graphics (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. linking text blocks (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. producing single page publication (1a, 1b, 1c, 2a, 2b, 2c, 2e);
3. The student will create page layout text and graphics by
    a. demonstrating paragraph formatting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. preparing multi-page publication (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. producing color separations (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. creating style sheets (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. generating master pages (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. scanning graphic image (1a, 1b, 1c, 2a, 2b, 2c, 2e);
4. The student will interpret color theory by
    a. differentiating spot/process color (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining color separations (1a, 1b, 1c, 2a, 2b, 2c, 2e);
5. The student will evaluate output by
    a. comparing file formats (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c, 2e);

ARTC 2317 - Typographic Design

General

Course Key
12682

Course Rubric
ARTC

Course Number
2317

Course Title
Typographic Design

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Exploration of typographic design including computer generated letterforms as elements of design. Includes theory and techniques of traditional, contemporary, and experimental typography. Required Prerequisite: ARTC-1305

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take ARTC-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTC 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate an advanced use of type aesthetics; generate computer-based designs; and explore experimental typography.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of typographic history and terminology by
    a. identifying parts of a typeface (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. identifying type terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. explaining history of type (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. comparing typefaces and describing usage (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. recognizing technological changes in the development of typography (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Demonstrate an understanding of type design and structure by
    a. recognizing, evaluating, and thinking critically about typography (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating aesthetic and conceptual problem solving skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. comprehending how designers deal with type to solve graphic design/visual communication problems (1a, 1b, 1c, 2c, 2d, 2e);
    d. recognizing the visual concerns of typography and typographic organizations of space (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. demonstrating understanding of the potential of typography and how it can develop new ways of communicating, thinking, and problem solving (1a, 1b, 1c, 2c, 2d, 2e);
3. Develop the skills in craftsmanship, professionalism, composition, and work habits by
    a. demonstrating software skills to manipulate typographic elements (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating understanding of project presentation for clients (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. explaining image resolution (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. demonstrating output resolution (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. demonstrating the ability to use digital technology as related to the design process (1a, 1b, 1c, 2a, 2b, 2c, 2e);

ARTC 2335 - Portfolio Development for Graphic Design

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take ARTC-1302 ARTC-1305 ARTC-1313 ARTC-1353;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTC 1302 ARTC 1305 ARTC 1313 and ARTC 1353

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Arrange and refine projects for inclusion in a graphic design portfolio; identify industry requirements for employment; identify current events, skills, attitudes and behaviors pertinent to the industry and relevant to the professional development of the student; and create a presentation portfolio.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Modify projects for inclusion in a professional portfolio by
    a. analyzing previous class projects (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. refining class projects (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. categorizing projects (1a, 1b, 1c, 2a, 2b, 2c, 2e);
2. Convey behavior requirements for employment by
    a. explaining ethical behavior (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. drafting ethical industry guidelines (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying teamwork (1a, 1b, 1c, 2c, 2d, 2e);
    d. producing employment attendance policy (1a, 1b, 1c, 2a, 2b, 2c, 2e);
3. Display industry requirements for employment by
    a. distinguishing legal/illegal application questions (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. distinguishing legal/illegal interview questions (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. composing cover letter (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. preparing resume (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. inspecting online job opportunity websites (1a, 1b, 1c, 2a, 2b, 2c, 2e);
4. Create a presentation portfolio by
    a. generating web portfolio (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. producing print portfolio (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting print portfolio for critique (1a, 1b, 1c, 2a, 2b, 2c, 2e);
5. Evaluate peer portfolios by
    a. examining print portfolios (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. justifying portfolio critique (1a, 1b, 1c, 2a, 2b, 2c, 2e);

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTC 1353

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate efficient use of tools; utilize advanced software capabilities; exhibit problem solving skills in relation to output.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify advanced graphics terminology and tools by
    a. defining color modes (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    b. explaining vector versus raster graphics (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    c. distinguishing principles and elements of design (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    d. describing 2D and 3D graphics (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
2. Demonstrate advanced computer illustration techniques by
    a. producing a clipping mask (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    b. applying transparency blending modes (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    c. demonstrating color trapping (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    d. demonstrating use of filters (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    e. demonstrating use of effects (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
3. Create advanced vector based graphics by
    a. preparing a complex graphic image (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    b. manipulating vector based images (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    c. manipulating 3D tools (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    d. manipulating a gradient mesh (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    e. manipulating a vector map on 3D graphics (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
4. Evaluate output by
    a. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    b. justifying analysis (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
5. Prepare completed illustration for a service bureau by
    a. distinguishing publishing file formats (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    b. generating .pdf and native files (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    c. communicating with service bureau (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);
    d. justifying service bureau printed file (1a, 1b, 1c, 2a, 2b, 2d, 2c, 2e);

Take ARTC-1353;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTC 1353

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate animation principles; communicate conceptual ideas through storyboards; execute animation sequences; and develop artwork using traditional or digital tools.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify motion graphics terminology and tools by
    a. defining motion graphics (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining animation terms (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying software components (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. using action scripting language (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. describing animation techniques (1a, 1b, 1c, 2a, 2b, 2c, 2e).
2. Generate visual storyboards by
    a. designing animation sequences (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. creating animation sequences (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. writing storyboard scripts (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. organizing technical/creative storyboards (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. preparing technical/creative storyboards (1a, 1b, 1c, 2a, 2b, 2c, 2e).
3. Create computer generated motion graphics by
    a. using computer generated animation tools (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. creating simple graphics (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. generating shape tweens (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. generating motion tweens (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. designing graphics, buttons, and movie clips (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. distinguishing between the library and the stage (1a, 1b, 2c, 2e);
    g. incorporating sound files (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    h. using basic action scripting code (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    i. producing animated sequences (1a, 1b, 1c, 2a, 2b, 2c, 2e).
4. Troubleshoot the completed animation by
    a. recognizing font issues (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. diagnosing frame spikes (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. analyzing file size (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. calculating animation run time (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. solving action scripting issues (1a, 1b, 1c, 2a, 2b, 2c, 2e).
5. Publish completed animations by
    a. distinguishing publishing file formats (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. generating .fla and .swf files (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. exporting animation file (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. justifying animation file (1a, 1b, 1c, 2a, 2b, 2c, 2e).

AUMT 1305 - Introduction to Automotive Technology

General

Course Key
14892

Course Rubric
AUMT

Course Number
1305

Course Title
Introduction to Automotive Technology

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) An introduction to the automotive industry including automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, professional responsibilities, and basic automotive maintenance. May be taught manufacturer specific.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; describe historical development and career information of the automotive industry; demonstrate safe, professional, and responsible work practices; demonstrate the proper use of shop equipment and tools; describe the eight Automotive Service Excellence (ASE) vehicle subsystems; use service information; and perform basic automotive maintenance.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of an introduction to auto technology by
    a. determining its impact on the vehicle owner, environment, and career opportunities (1a, 1c, 2c, 2d, 2e);
    b. determining individual capabilities to complete repairs (1a, 1c, 2c, 2d, 2e).
2. Demonstrate understanding of safety in the work place, with tools, and equipment by
    a. working safely and developing a secure environment (1a, 1c, 2c, 2d, 2e).
3. Demonstrate understanding of handling of hazardous waste materials by
    a. disposing of hazardous waste and its effects correctly (1a, 1c, 2c, 2d, 2e).
4. Demonstrate understanding of repair equipment, tools, and fasteners by
    a. identifying proper test equipment and tools (1a, 1c, 2c, 2d, 2e);
    b. applying safety principles as applied to use of tools and equipment (1a, 1c, 2c, 2d, 2e);
    c. selecting and securing fasteners correctly (1a, 1c, 2c, 2d, 2e).
5. Demonstrate understanding of engines systems' repair and service by
    a. applying knowledge of engine operation to other engine types (1a, 1c, 2c, 2d, 2e);
    b. applying knowledge of nomenclature and principles of operation to other engine types (1a, 1c, 2c, 2d, 2e);
    c. identifying the components, general inspection, operation, and service of the engine components (1a, 1c, 2c, 2d, 2e);
    d. identifying effects of improper or neglected maintenance (1a, 1c, 2c, 2d, 2e).
6. Demonstrate understanding of basic electricity/electronics by
    a. identifying principles of operation of electrical components and their interrelationship to other automotive systems (1a, 1c, 2c, 2d, 2e);
    b. testing and servicing electrical and electronic systems (1a, 1c, 2c, 2d, 2e).
7. Demonstrate understanding of electrical: batteries, starting, charging, and ignition systems by
    a. studying the principles of basic electricity as applied to ground transportation (1a, 1c, 2c, 2d, 2e);
    b. using basic test meters/equipment (1a, 1c, 2c, 2d, 2e).
8. Demonstrate understanding of fuel systems and emission controls by
    a. identifying basic components and how they operate (1a, 1c, 2c, 2d, 2e);
    b. identifying how each system is serviced (1a, 1c, 2c, 2d, 2e);
    c. identifying, servicing, and maintaining correctly common emission controls (1a, 1c, 2c, 2d, 2e).
9. Demonstrate understanding of suspension and steering by
    a. performing an inspection and identifying commonly worn parts (1a, 1c, 2c, 2d, 2e);
    b. determining the correct procedure for removal of replacement parts (1a, 1c, 2c, 2d, 2e).
10. Demonstrate understanding of power train by
    a. identifying components (1a, 1c, 2c, 2d, 2e);
    b. describing their function and operation (1a, 1c, 2c, 2d, 2e);
    c. identifying the maintenance and servicing of these components (1a, 1c, 2c, 2d, 2e).
11. Demonstrate understanding of heating and air conditioning by
    a. identifying components (1a, 1c, 2c, 2d, 2e);
    b. determining operation, inspection, and general service of these units (1a, 1c, 2c, 2d, 2e).
12. Demonstrate understanding of brake systems by
    a. identifying the components, general operation, inspection, and service procedures (1a, 1c, 2c, 2d, 2e).

AUMT 1306 - Automotive Engine Removal and Install

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; perform mechanical engine tests to determine extent of repair or service; remove and install engines in various types of vehicles.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair engine mechanical problems by
    a. demonstrating the ability to diagnose engine noise and evaluate engine condition (1a, 1b, 2c, 2d, 2e);
    b. removing an engine (1a, 1b, 2c, 2d, 2e);
    c. disassembling an engine (1a, 1b, 2c, 2d, 2e);
    d. inspecting the engine components visually for wear (1a, 1b, 2c, 2d, 2e);
    e. using precision measuring instruments to determine wear (1a, 1b, 2c, 2d, 2e).
2. Assemble an engine using appropriate tools and specifications by
    a. assembling an engine (1a, 1b, 2c, 2d, 2e);
    b. utilizing special tools and manufacturer specifications (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

Required Prerequisite(s) or Corequisite(s): AUMT 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; define basic electrical principles; interpret wiring schematics and symbols; explain operation of batteries, starting/charging systems, and automotive circuits; use test equipment; and perform basic electrical repairs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service battery, starting, and charging systems by
    a. diagnosing the components and operation of storage batteries, starting systems, and charging starting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of storage batteries, starting systems, and charging systems (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and service electrical accessories and lighting systems by
    a. diagnosing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to identify and determine the proper use of electrical test equipment and to explain the use of electrical schematics and symbols by
    a. using electrical wiring diagrams to diagnose and test circuits (1a, 1b, 2c);
    b. demonstrating the ability to locate and utilize computerized and printed repair information (1a, 1b, 2c);
    c. using an ohm meter (1b, 2c, 2e);
    d. using an amp meter (1b, 2c, 2e);
    e. using a volt meter (1b, 2c, 2e).
4. Demonstrate the ability to read, write, and interpret effective repair orders by
    a. writing an accurate, grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b).
5. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; explain operation of modern brake systems, and diagnose and repair hydraulic systems, drum/disc brake systems, parking brakes, and antilock brake systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service hydraulic components related to the braking system by
    a. demonstrating the ability to diagnose and service the master cylinder (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and bleed air from hydraulic system (1a, 1b, 2c, 2e);
    c. demonstrating the ability to diagnose and service hydraulic valves (1a, 1b, 2c, 2e);
    d. servicing brake hydraulic hoses and lines (1a, 1b, 2c, 2e).
2. Demonstrate the ability to diagnose and service disc brakes by
    a. diagnosing disc brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul disc brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake rotors (1a, 1b, 2c, 2e);
    d. measuring disc brake components using precision measuring tools (1a, 1b, 2c, 2e).
3. Demonstrate the ability to diagnose and service drum brakes by
    a. diagnosing drum brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul drum brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake drums (1a, 1b, 2c, 2e);
    d. measuring drum brake components using precision measuring tools (1a, 1b, 2c, 2e).
4. Demonstrate the ability to diagnose and service antilock brakes by
    a. diagnosing antilock brake system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul antilock brake systems (1a, 1b, 2c, 2e);
    c. retrieving diagnostic data for antilock brake systems (1a, 1b, 2c, 2e).
5. Demonstrate the ability to diagnose and service power assist systems by
    a. diagnosing power assist system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul power assist systems (1a, 1b, 2c, 2e).
6. Demonstrate the ability to diagnose and service parking brake systems by
    a. diagnosing parking brake system failures (1a, 1b, 2c, 2e);
    b. repairing parking brake systems (1a, 1b, 2c, 2e);
    c. adjusting parking brakes (1a, 1b, 2c, 2e).

7. Interpret effective repair orders by
    a. writing an accurate and grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
8. Apply use of computerized repair information by
    a. locating computer based service information (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. searching databases for technical service bulletins (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. searching for brake system specifications (1a, 1b, 2a, 2b, 2c, 2d, 2e).
9. Demonstrate an understanding of personal laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the laboratory (1b, 1c, 2a, 2e).

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Utilize safety procedures; explain operations of suspension and steering systems; diagnose and repair system components, including electronically controlled systems; perform 4-wheel alignment procedures; and perform tire service and repair

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair front and rear suspension systems by
    a. diagnosing strut and shock absorber components and control arm, ball joint, spring, and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing strut and shock absorber components and control arm, ball joint, spring and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the operation and construction of suspension systems by explaining the purpose, operation, and components of different types of front and rear suspension systems (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of the operation of different types of steering systems by explaining the purpose, operation, and components of a power steering rack and pinion by
    a. explaining the purpose, operation, and components of a power steering gear (1a, 1b, 2c, 2d);
    b. explaining the purpose, operation, and components of a power steering pump (1a, 1b, 2c, 2d);
    c. explaining the purpose, operation, and components of various types of steering linkages (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of different types of steering systems by
    a. diagnosing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a);
    b. repairing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of alignment and suspension angles by
    a. explaining the purpose of SAI, caster, camber, and toe (1a, 1b, 2c, 2d);
    b. explaining geometric centerline, scrub radius, wheel offset, thrust line, setback, and ride height (1a, 1b, 2c, 2d).
6. Perform a wheel alignment by
    a. performing a four-wheel alignment (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing a two-wheel alignment (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate an understanding of the purpose and construction of automobile tires and rims by
    a. identifying tire construction, size, and ratings (1a, 1b, 2c, 2d);
    b. identifying various rim constructions and sizes (1a, 1b, 2c, 2d).
8. Diagnose and repair tire concerns by identifying tire wear patterns by
    a. measuring tire and rim run out (1a, 1b, 2a, 2c, 2d, 2e);

b. diagnosing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);

c. repairing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);

d. demonstrating how to mount, balance, and rotate tires (1a, 1b, 2a, 2c, 2d).

Course Learning Outcomes
End-of-Course Outcomes: Use safety procedures including proper refrigerant handling; explain the refrigeration cycle; and diagnose and repair systems including automatic temperature control.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of different air bag systems by
    a. describing the purpose, components, and operations of the air bag system (1a, 1b, 2c, 2d);
    b. demonstrating the ability to diagnose and repair air bag concerns (1a, 1b, 2a, 2c, 2d, 2e);
    c. diagnosing air bag systems using the appropriate equipment (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing necessary repairs after air bag deployment (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of heating and air conditioning concerns by
    a. demonstrating the ability to diagnose and repair AC compressor failures (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing an AC performance test (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to diagnose and repair AC refrigerant leaks using appropriate equipment (1a, 1b, 2a, 2c, 2d, 2e);
    d. demonstrating the ability to diagnose refrigerant pressure readings and determine necessary action (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the ability to diagnose and repair system component failures (1a, 1b, 2a, 2c, 2d, 2e);
    f. demonstrating the ability to evacuate, recharge, add oil, and leak check AC system (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the proper use of AC test equipment by
    a. using electrical wiring diagrams to diagnose and test circuits (1a, 1b, 2a, 2c, 2d, 2e);
    b. using manifold gauge sets (1a, 1b, 2a, 2c, 2d, 2e);
    c. using refrigerant recovery and recycling equipment (1a, 1b, 2a, 2c, 2d, 2e);
    d. using electronic leak detectors (1a, 1b, 2a, 2c, 2d, 2e);
    e. using refrigerant identifiers (1a, 1b, 2a, 2c, 2d, 2e);
    f. installing refrigerant dye and identifying leaks (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
5. Utilize computerized software used in the automotive repair industry by
    a. writing repair orders (1a, 1b, 2a, 2c, 2d);
    b. using current industry software to identify repair procedures, locate technical service bulletins (TSBs), and determine repair specifications (1a, 1b, 2a, 2c, 2d, 2e).

AUMT 1405 - Introduction to Automotive Technology

General

Course Key
14933

Course Rubric	Course Number	Course Title
AUMT	1405	Introduction to Automotive Technology
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
4	3	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-4) An introduction to the automotive industry including automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, professional responsibilities, and basic automotive maintenance. May be taught manufacturer-specific.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; describe historical development and career information of the automotive industry; demonstrate safe, professional, and responsible work practices; demonstrate the proper use of shop equipment and tools; describe the eight Automotive Service Excellence (ASE) vehicle subsystems; use service information; and perform basic automotive maintenance.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of an introduction to auto technology by
    a. determining its impact on the vehicle owner, environment, and career opportunities (1a, 1c, 2c, 2d, 2e);
    b. determining individual capabilities to complete repairs (1a, 1c, 2c, 2d, 2e).
2. Demonstrate understanding of safety in the work place, with tools, and equipment by
    a. working safely and developing a secure environment (1a, 1c, 2c, 2d, 2e).
3. Demonstrate understanding of handling of hazardous waste materials by
    a. disposing of hazardous waste and its effects correctly (1a, 1c, 2c, 2d, 2e).
4. Demonstrate understanding of repair equipment, tools, and fasteners by
    a. identifying proper test equipment and tools (1a, 1c, 2c, 2d, 2e);
    b. applying safety principles as applied to use of tools and equipment (1a, 1c, 2c, 2d, 2e);
    c. selecting and securing fasteners correctly (1a, 1c, 2c, 2d, 2e).
5. Demonstrate understanding of engines systems' repair and service by
    a. applying knowledge of engine operation to other engine types (1a, 1c, 2c, 2d, 2e);
    b. applying knowledge of nomenclature and principles of operation to other engine types (1a, 1c, 2c, 2d, 2e);
    c. identifying the components, general inspection, operation, and service of the engine components (1a, 1c, 2c, 2d, 2e);
    d. identifying effects of improper or neglected maintenance (1a, 1c, 2c, 2d, 2e).
6. Demonstrate understanding of basic electricity/electronics by
    a. identifying principles of operation of electrical components and their interrelationship to other automotive systems (1a, 1c, 2c, 2d, 2e);
    b. testing and servicing electrical and electronic systems (1a, 1c, 2c, 2d, 2e).
7. Demonstrate understanding of electrical: batteries, starting, charging, and ignition systems by
    a. studying the principles of basic electricity as applied to ground transportation (1a, 1c, 2c, 2d, 2e);
    b. using basic test meters/equipment (1a, 1c, 2c, 2d, 2e).
8. Demonstrate understanding of fuel systems and emission controls by
    a. identifying basic components and how they operate (1a, 1c, 2c, 2d, 2e);
    b. identifying how each system is serviced (1a, 1c, 2c, 2d, 2e);
    c. identifying, servicing, and maintaining correctly common emission controls (1a, 1c, 2c, 2d, 2e).
9. Demonstrate understanding of suspension and steering by
    a. performing an inspection and identifying commonly worn parts (1a, 1c, 2c, 2d, 2e);
    b. determining the correct procedure for removal of replacement parts (1a, 1c, 2c, 2d, 2e).
10. Demonstrate understanding of power train by
    a. identifying components (1a, 1c, 2c, 2d, 2e);
    b. describing their function and operation (1a, 1c, 2c, 2d, 2e);
    c. identifying the maintenance and servicing of these components (1a, 1c, 2c, 2d, 2e).
11. Demonstrate understanding of heating and air conditioning by
    a. identifying components (1a, 1c, 2c, 2d, 2e);
    b. determining operation, inspection, and general service of these units (1a, 1c, 2c, 2d, 2e).
12. Demonstrate understanding of brake systems by
    a. identifying the components, general operation, inspection, and service procedures (1a, 1c, 2c, 2d, 2e).

AUMT 1407 - Automotive Electrical Systems

General

Course Key
14934

Course Rubric	Course Number	Course Title
AUMT	1407	Automotive Electrical Systems
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
4	3	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-4) An overview of automotive electrical systems including topics in operational theory, testing, diagnosis, and repair of, charging and starting systems, and electrical accessories. Emphasis on electrical principles, schematic diagrams, and service publications. May be taught manufacturer specific.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; define basic electrical principles; interpret wiring schematics and symbols; explain operation of batteries, starting/charging systems, and automotive circuits; use test equipment; and perform basic electrical repairs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service battery, starting, and charging systems by
    a. diagnosing the components and operation of storage batteries, starting systems, and charging starting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of storage batteries, starting systems, and charging systems (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and service electrical accessories and lighting systems by
    a. diagnosing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to identify and determine the proper use of electrical test equipment and to explain the use of electrical schematics and symbols by
    a. using electrical wiring diagrams to diagnose and test circuits (1a, 1b, 2c, 2d, 2e);
    b. demonstrating the ability to locate and utilize computerized and printed repair information (1a, 1b, 2c);
    c. using an ohm meter (1b, 2c, 2e);
    d. using an amp meter (1b, 2c, 2e);
    e. using a volt meter (1b, 2c, 2e).
4. Demonstrate the ability to read, write, and interpret effective repair orders by
    a. writing an accurate, grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; explain operation of modern brake systems, diagnose and repair hydraulic systems, drum/disc brake systems, parking brakes, and anti-lock brake systems; machine drums and rotors with current industry standard equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service hydraulic components related to the braking system by
    a. demonstrating the ability to diagnose and service the master cylinder (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and bleed air from hydraulic system (1a, 1b, 2c, 2e);
    c. demonstrating the ability to diagnose and service hydraulic valves (1a, 1b, 2c, 2e);
    d. servicing brake hydraulic hoses and lines (1a, 1b, 2c, 2e).
2. Demonstrate the ability to diagnose and service disc brakes by
    a. diagnosing disc brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul disc brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake rotors (1a, 1b, 2c, 2e);
    d. measuring disc brake components using precision measuring tools (1a, 1b, 2c, 2e).
3. Demonstrate the ability to diagnose and service drum brakes by
    a. diagnosing drum brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul drum brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake drums (1a, 1b, 2c, 2e);
    d. measuring drum brake components using precision measuring tools (1a, 1b, 2c, 2e).
4. Demonstrate the ability to diagnose and service antilock brakes by
    a. diagnosing antilock brake system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul antilock brake systems (1a, 1b, 2c, 2e);
    c. retrieving diagnostic data for antilock brake systems (1a, 1b, 2c, 2e).
5. Demonstrate the ability to diagnose and service power assist systems by
    a. diagnosing power assist system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul power assist systems (1a, 1b, 2c, 2e).
6. Demonstrate the ability to diagnose and service parking brake systems by
    a. diagnosing parking brake system failures (1a, 1b, 2c, 2e);
    b. repairing parking brake systems (1a, 1b, 2c, 2e);
    c. adjusting parking brakes (1a, 1b, 2c, 2e).
7. Interpret effective repair orders by
    a. writing an accurate and grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
8. Apply use of computerized repair information by
    a. locating computer based service information (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. searching databases for technical service bulletins (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. searching for brake system specifications (1a, 1b, 2a, 2b, 2c, 2d, 2e).
9. Demonstrate an understanding of personal laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the laboratory (1b, 1c, 2a, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; explain operations of suspension and steering systems; diagnose and repair system components, including electronically controlled systems; perform 4-wheel alignment procedures; and perform tire service and repair.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair front and rear suspension systems by
    a. diagnosing strut and shock absorber components and control arm, ball joint, spring, and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing strut and shock absorber components and control arm, ball joint, spring, and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the operation and construction of suspension systems by
    a. explaining the purpose, operation, and components of different types of front and rear suspension systems (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of the operation of different types of steering systems by
    a. explaining the purpose, operation, and components of a power steering rack and pinion (1a, 1b, 2c, 2d);
    b. explaining the purpose, operation, and components of a power steering gear (1a, 1b, 2c, 2d);
    c. explaining the purpose, operation, and components of a power steering pump (1a, 1b, 2c, 2d);
    d. explaining the purpose, operation, and components of various types of steering linkages (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of different types of steering systems by
    a. diagnosing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of alignment and suspension angles by
    a. explaining the purpose of SAI, caster, camber, and toe (1a, 1b, 2c, 2d);
    b. explaining geometric centerline, scrub radius, wheel offset, thrust line, setback, and ride height (1a, 1b, 2c, 2d).
6. Perform a wheel alignment by
    a. performing a four wheel alignment (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing a two wheel alignment (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate an understanding of the purpose and construction of automobile tires and rims by
    a. identifying tire construction, size, and ratings (1a, 1b, 2c, 2d);
    b. identifying various rim constructions and sizes (1a, 1b, 2c, 2d).
8. Diagnose and repair tire concerns by
    a. identifying tire wear patterns (1a, 1b, 2a, 2c, 2d, 2e);
    b. measuring tire and rim run out (1a, 1b, 2a, 2c, 2d, 2e);
    c. diagnosing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);
    d. repairing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating how to mount, balance, and rotate tires (1a, 1b, 2a, 2c, 2d, 2e).
9. Demonstrate an understanding of personal and laboratory safety by
    a. demonstrating the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e).
10. Utilize computerized software used in the automotive repair industry by
    a. writing repair orders (1a, 1b, 2a, 2c, 2d);
    b. using Mitchell On Demand to identify repair procedures, locate technical service bulletins (TSBs), and determine repair specifications (1a, 1b, 2a, 2c, 2d, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; explain engine operating principles; demonstrate engine diagnostic procedures; and repair cylinder head, valve train, block assembly, lubrication, and cooling systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair engine mechanical problems by
    a. demonstrating the ability to diagnose engine noises and evaluate engine condition (1a, 1b, 2c, 2d, 2e);
    b. disassembling an engine (1a, 1b, 2c, 2d, 2e);
    c. inspecting engine components visually for wear and damage (1a, 1b, 2c, 2d, 2e);
    d. using precision measuring instruments to determine wear (1a, 1b, 2c, 2d, 2e).
2. Assemble an engine using appropriate tools and specifications by
    a. assembling an engine (1a, 1b, 2c, 2d, 2e);
    b. utilizing special tools and manufacturer's specifications (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to diagnose and repair cooling and lubrication systems by
    a. diagnosing cooling systems and lubrication systems (1a, 1b, 2c, 2d, 2e);
    b. repairing cooling systems and lubrication systems (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

Required Prerequisite(s): AUMT 1307 or AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use hybrid and/or BEV safety features; explain the operation of hybrid and/or BEV vehicles; and diagnose and repair hybrid and/or BEV systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of hybrid vehicle safety by
    a. identifying high voltage circuits and systems on hybrid vehicles (1a, 1b, 2c, 2d, 2e);
    b. demonstrating proper procedures to safely disable vehicle high voltage circuit systems (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of the operation of hybrid vehicles by
    a. locating and identifying hybrid vehicle components (1a, 1b, 2c, 2d, 2e);
    b. utilizing appropriate industry repair information and best practices to remove and replace hybrid vehicle components (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of how to diagnose and repair hybrid vehicles by
    a. identifying and explaining the proper usage of industry-recognized test equipment (1a, 1b, 2c, 2d, 2e);
    b. identifying and listing some potential locations for testing the hybrid vehicle system using the proper equipment (1a, 1b, 2c, 2d, 2e);
    c. servicing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e).

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): AUMT 1307 and AUMT 2321

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize safety procedures; apply service information; use scan tools and digital storage oscilloscopes; measure electronic controller inputs/outputs; explain common electronic circuit failures; develop diagnostic strategies; and explain on-board computer networks.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service battery, starting, and charging systems by
    a. diagnosing the components and operation of storage batteries, starting systems, and charging starting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of storage batteries, starting systems, and charging systems (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and service electrical accessories and lighting systems by
    a. diagnosing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e);
    b. servicing the components and operation of electrical accessories and wiring and lighting systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to identify and determine the proper use of electrical test equipment and to explain the use of electrical schematics and symbols by
    a. using electrical wiring diagrams to diagnose and test circuits (1a, 1b, 2c);
    b. demonstrating the ability to locate and utilize computerized and printed repair information (1a, 1b, 2c);
    c. using an ohm meter (1b, 2c, 2e);
    d. using an amp meter (1b, 2c, 2e);
    e. using a volt meter (1b, 2c, 2e).
4. Demonstrate the ability to read, write, and interpret effective repair orders by
    a. writing an accurate, grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b).
5. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

AUMT 2313 - Automotive Drive Train and Axles

A Requirement block where all subrequirements are required

#take AUMT-1307 or AUMT-1407
A Subrequirement block where all groups are required

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Required Prerequisite(s): AUMT 1307 or AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; diagnose and repair drivelines, clutches, manual transmissions/transaxles, and differentials; and service constant velocity joints and universal joints.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair manual clutch components by
    a. diagnosing hydraulic clutch systems, linkage type clutch systems, clutches, pressure plates, throw out bearings, pilot bearings, and flywheels (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing hydraulic clutch systems, linkage type clutch systems, clutches, pressure plates, throw out bearings, pilot bearings, and flywheels (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and repair drive lines by
    a. diagnosing a drive shaft and a constant velocity joint (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing a drive shaft and a constant velocity joint (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate the ability to diagnose and repair a manual transmission by
    a. diagnosing transmission noises and shift concerns (1a, 1b, 2a, 2c, 2d, 2e);
    b. diagnosing internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    c. repairing internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    d. diagnosing transmission leaks (1a, 1b, 2a, 2c, 2d, 2e);
    e. repairing transmission leaks (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate the ability to diagnose and repair a manual transaxle by
    a. diagnosing transaxle noises and shift concerns (1a, 1b, 2a, 2c, 2d, 2e);
    b. diagnosing internal transaxle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    c. repairing internal transaxle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    d. diagnosing transaxle leaks (1a, 1b, 2a, 2c, 2d, 2e);
    e. repairing transaxle leaks (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate the ability to diagnose and repair a drive axle by
    a. diagnosing drive axle noises and axle leaks (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing drive axle noises and axle leaks (1a, 1b, 2a, 2c, 2d, 2e);
    c. diagnosing drive axle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    d. repairing drive axle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e).
6. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

7. Utilize computerized software used in the automotive repair industry by
    a. writing repair orders (1a, 1b, 2a, 2c, 2d);
    b. using Mitchell On Demand to identify repair procedures, locate technical service bulletins (TSBs), and determine repair specifications (1a, 1b, 2a, 2c, 2d, 2e).

Required Corequisite(s): AUMT 1307 or AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; explain engine dynamics; diagnose and repair ignition and fuel delivery systems; and use current engine performance diagnostic equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Perform basic engine performance diagnosis by
    a. performing engine compression testing (1a, 1b, 2c, 2d, 2e);
    b. performing cylinder leakage testing (1a, 1b, 2c, 2d, 2e);
    c. performing cooling system temperature testing (1a, 1b, 2c, 2d, 2e);
    d. demonstrating diagnostic and service procedures for basic engine components (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and repair basic ignition system components by
    a. demonstrating diagnostic and service procedures for ignition primary components (1a, 1b, 2c, 2d, 2e);
    b. demonstrating diagnostic and service procedures for ignition secondary components (1a, 1b, 2c, 2d, 2e);
    c. performing basic ignition system tune up (1a, 1b, 2c, 2d, 2e);
    d. adjusting ignition timing (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to diagnose and repair fuel system components by
    a. performing fuel pressure testing (1a, 1b, 2c, 2d, 2e);
    b. demonstrating diagnostic and service procedures for fuel pumps (1a, 1b, 2c, 2d, 2e);
    c. demonstrating service procedures for fuel lines (1a, 1b, 2c, 2d, 2e);
    d. demonstrating service procedures for fuel filters (1a, 1b, 2c, 2d, 2e);
    e. demonstrating service procedures for fuel tank systems (1a, 1b, 2c, 2d, 2e).
4. Demonstrate the ability to diagnose and repair basic fuel delivery systems by
    a. demonstrating service procedures for throttle body and carbureted systems (1a, 1b, 2c, 2d, 2e);
    b. demonstrating diagnostic and service procedures for fuel pressure regulators (1a, 1b, 2c, 2d, 2e);
    c. demonstrating diagnostic and service procedures for fuel injectors (1a, 1b, 2c, 2d, 2e);
    d. demonstrating diagnostic and service procedures for fuel pump electrical circuits (1a, 1b, 2c, 2d, 2e).
5. Demonstrate the ability to diagnose and repair induction systems by
    a. demonstrating diagnostic and service procedures for intake manifold leaks (1a, 1b, 2c, 2d, 2e);
    b. demonstrating diagnostic and service procedures for supercharging systems (1a, 1b, 2c, 2d, 2e);
    c. demonstrating diagnostic and service procedures for turbocharger systems (1a, 1b, 2c, 2d, 2e);
    d. performing induction system testing using proper equipment (1a, 1b, 2c, 2d, 2e).

6. Demonstrate the ability to read, write, and interpret effective repair orders by
    a. demonstrating the ability to write an accurate and grammatically correct repair order (1a, 1b, 2c);
    b. interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
7. Use computerized repair information by
    a. locating computer based service information (1a, 1b, 2c, 2d, 2e);
    b. searching databases for technical service bulletins (1a, 1b, 2c, 2d, 2e);
    c. locating engine performance related specifications (1a, 1b, 2c, 2d, 2e).
8. Demonstrate an understanding of personal laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the laboratory (1b, 1c, 2a, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): AUMT 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize appropriate safety procedures; operate a digital multimeter and other electrical test equipment; diagnose and repair automotive electrical and accessory systems and instrumentation; and repair wiring and wiring harnesses.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Diagnose and repair lighting systems by
    a. analyzing basic lighting circuit operation and applying it to a specific vehicle lighting system (1a, 1b, 2c, 2d, 2e);
    b. performing tests to isolate specific lighting system symptoms, such as will not turn off, will not turn on, and glows dimly (1a, 1b, 2c, 2d, 2e);
2. Inspect, test, and repair various automotive accessories by
    a. analyzing wiper/washer circuit operation and determining proper diagnostic procedures (1a, 1b, 2c, 2d, 2e);
    b. reading and reviewing wiper/washer system components (1a, 1b, 2c, 2d, 2e);
    c. analyzing power window circuits and determining proper diagnostic procedures (1a, 1b, 2c, 2d, 2e);
    d. reading and reviewing power window system components (1a, 1b, 2c, 2d, 2e);
3. Diagnose and repair instrumentation, gauges, and sending units by
    a. analyzing basic gauge and warning lamp circuit operation and applying those principles to a specific vehicle system (1a, 1b, 2c, 2d, 2e);
    b. identifying and diagnosing, using a strategy-based diagnostic system, specific gauge and warning lamp conditions, incorrect gauge readings, and inoperative warning lamp operation (1a, 1b, 2c, 2d, 2e);
    c. reading and reviewing specific gauge's sending unit components (1a, 1b, 2c, 2d, 2e);
4. Repair wiring and wiring harnesses by
    a. developing an electrical circuit that uses a relay to control a load device (1a, 1b, 2c, 2d, 2e);
    b. constructing an electrical circuit using a relay to control a load device (1a, 1b, 2c, 2d, 2e);
    c. writing a diagnostic procedure for diagnosing a fault in the relay circuit (1a, 1b, 2c, 2d, 2e);
    d. diagnosing a relay circuit using available diagnostic materials and tools (circuit constructed by another class member) (1a, 1b, 2c, 2d, 2e);
    e. diagnosing most relay-controlled electrical circuits (1a, 1b, 2c, 2d, 2e);
5. Analyze the operation of the supplemental restraint system by
    a. locating air bag system components (1a, 1b, 2c, 2d, 2e);
    b. servicing the airbag system properly (1a, 1b, 2c, 2d, 2e);
    c. connecting and disconnecting the airbag system safely (1a, 1b, 2c, 2d, 2e);
6. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e);

Course Learning Outcomes
End-of-Course Outcomes: Diagnose, service, adjust, and repair automatic transmissions/transaxles.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair an automatic transmission by
    a. diagnosing transmission noises and shift concerns (1a, 1b, 2a, 2c, 2d, 2e);
    b. diagnosing transmission leaks and internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    c. repairing transmission leaks and internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e).
2. Perform automatic transmission/transaxle maintenance procedures by
    a. changing transmission fluid (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating the ability to change fluid filter and to make necessary adjustment to linkage and bands (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of personal and laboratory safety by
    a. explaining the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).
4. Utilize computerized software used in the automotive repair industry by
    a. writing repair orders (1a, 1b, 2a, 2c, 2d);
    b. using Mitchell On Demand to identify repair procedures, locate technical service bulletins (TSBs), and determine repair specifications (1a, 1b, 2a, 2c, 2d, 2e).

Course Learning Outcomes
End-of-Course Outcomes: Diagnose and repair emission control systems, computerized engine performance systems, and advanced ignition and fuel systems; and use advanced engine performance diagnostic equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair emission systems by
    a. diagnosing and repairing exhaust gas recirculation (EGR) systems (1a, 1b, 2c, 2d, 2e);
    b. diagnosing and repairing positive crankcase ventilation (PCV) systems (1a, 1b, 2c, 2d, 2e);
    c. diagnosing and repairing secondary air injection systems (1a, 1b, 2c, 2d, 2e);
    d. diagnosing and replacing catalytic converters (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and repair computerized engine performance systems, and advanced ignition and fuel systems by
    a. diagnosing and repairing electronic sensors (1a, 1b, 2c, 2d, 2e);
    b. diagnosing and repairing on board diagnostic (OBD) II system faults (1a, 1b, 2c, 2d, 2e);
    c. diagnosing and repairing advanced technology ignition systems (1a, 1b, 2c, 2d, 2e);
    d. diagnosing and repairing advanced technology fuel systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to use advanced technology engine performance diagnostic equipment by
    a. demonstrating the proper use of an electrical multimeter (1a, 1b, 2c, 2d, 2e);
    b. demonstrating the proper use of a digital storage oscilloscope (1a, 1b, 2c, 2d, 2e);
    c. demonstrating the proper use of fuel system test equipment (1a, 1b, 2c, 2d, 2e);
    d. demonstrating the proper use of a diagnostic scan tool (1a, 1b, 2c, 2d, 2e).
4. Read, write, and interpret effective repair orders by
    a. demonstrating the ability to write an accurate and grammatically correct repair order (1a, 1b, 2c);
    b. reading and interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
5. Apply use of computerized repair information by
    a. locating computer based service information (1a, 1b, 2c, 2d, 2e);
    b. locating and searching databases for technical service bulletins (1a, 1b, 2c, 2d, 2e);
    c. locating engine performance related specifications (1a, 1b, 2c, 2d, 2e).
6. Understand, explain, and practice personal laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (2a, 1b, 1c, 2e);
    b. practicing proper safety procedures in the laboratory (2a, 1b, 1c, 2e).

    d. diagnosing and replacing catalytic converters (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and repair computerized engine performance systems, and advanced ignition and fuel systems by
    a. diagnosing and repairing electronic sensors (1a, 1b, 2c, 2d, 2e);
    b. diagnosing and repairing on board diagnostic (OBD) II system faults (1a, 1b, 2c, 2d, 2e);
    c. diagnosing and repairing advanced technology ignition systems (1a, 1b, 2c, 2d, 2e);
    d. diagnosing and repairing advanced technology fuel systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to use advanced technology engine performance diagnostic equipment by
    a. demonstrating the proper use of an electrical multimeter (1a, 1b, 2c, 2d, 2e);
    b. demonstrating the proper use of a digital storage oscilloscope (1a, 1b, 2c, 2d, 2e);
    c. demonstrating the proper use of fuel system test equipment (1a, 1b, 2c, 2d, 2e);
    d. demonstrating the proper use of a diagnostic scan tool (1a, 1b, 2c, 2d, 2e).
4. Read, write, and interpret effective repair orders by
    a. demonstrating the ability to write an accurate and grammatically correct repair order (1a, 1b, 2c);
    b. reading and interpreting customer complaints and repair instructions (1a, 1b, 2a, 2b, 2c, 2d, 2e).
5. Apply use of computerized repair information by
    a. locating computer based service information (1a, 1b, 2c, 2d, 2e);
    b. locating and searching databases for technical service bulletins (1a, 1b, 2c, 2d, 2e);
    c. locating engine performance related specifications (1a, 1b, 2c, 2d, 2e).
6. Understand, explain, and practice personal laboratory safety by
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (2a, 1b, 1c, 2e);
    b. practicing proper safety procedures in the laboratory (2a, 1b, 1c, 2e).

AVIM 2337 - Aviation Law

General

Course Key
11752

Course Rubric
AVIM

Course Number
2337

Course Title
Aviation Law

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of domestic and international aviation law.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the development of aviation law from its origin to modern day; review and critique case studies relating to aviation law.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate proficiency in administrative law by
    a. defining and describing the difference between law and aviation law (1a, 1b, 1c, 2a, 2c);
    b. listing and describing various regulatory agencies and international organizations (1a, 1b, 1c, 2a, 2c);
    c. explaining the Federal Aviation Administration's (FAA) purpose (1a, 1b, 1c, 2a, 2c);
    d. describing FAA enforcement tactics (1a, 1b, 1c, 2a, 2c);
    e. listing steps and procedures in administrative rule making and enforcement of rules (1a, 1b, 1c, 2a, 2c);
    f. discussing aviation medical cases (1a, 1b, 1c, 2a, 2c).
2. Demonstrate proficiency in applying aviation law in aircraft accident cases by
    a. describing basic principles of liability (1a, 1b, 1c, 2a, 2c);
    b. organizing a business to limit liability (1a, 1b, 1c, 2a, 2c);
    c. detailing the importance of aviation insurance (1a, 1b, 1c, 2a, 2c);
    d. explaining exculpatory contracts (1a, 1b, 1c, 2a, 2c);
    e. describing airline and government liability (1a, 1b, 1c, 2a, 2c);
    f. recalling accident notification, reporting, and investigation procedures (1a, 1b, 1c, 2a, 2c).
3. Demonstrate proficiency of aircraft transactions by
    a. describing the procedures related to buying and selling aircraft (1a, 1b, 1c, 2a, 2c);
    b. explaining the benefits and pitfalls of aircraft leasing, co-ownership, and fractional ownership (1a, 1b, 1c, 2a, 2c).
4. Demonstrate proficiency in airport, airspace, and aviation security by
    a. describing FAA regulation of airspace (1a, 1b, 1c, 2a, 2c);
    b. explaining aviation crimes and detailing security tactics to prevent crime (1a, 1b, 1c, 2a, 2c).
5. Demonstrate proficiency in labor and employment law by
    a. describing good practices and poor practices related to hiring staff, crew, and others (1a, 1b, 1c, 2a, 2c);
    b. explaining the role of unions and their effect on labor and employment options (1a, 1b, 1c, 2a, 2c).

AVNC 1303 - Intro to Aviation Electronic Systems

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take AERM-1314;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): AERM 1314

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the function and operation of aviation electronic systems; list frequencies associated with aviation electronic systems; define terminology associated with aviation electronics; and identify safety hazards associated with aviation electronics.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic direct current electrical circuits and circuit components by
    a. explaining basic principles of operation of direct current circuits (1a);
    b. explaining basic principles of operation of components and devices that are used in direct current circuits (1a).
2. Demonstrate an understanding of basic alternating current electrical circuits and circuit components by
    a. explaining basic principles of operation of alternating current circuits (1a);
    b. explaining basic principles of operation of components and devices that are used in alternating current circuits (1a).
3. Demonstrate an understanding of analog electrical components by
    a. explaining the theory, design, and operating principles of analog circuits (1a);
    b. describing the construction of analog electrical/electronic devices (1a);
    c. explaining the principles of operation of analog electrical/electronic devices (1a);
    d. explaining the theory and operating principles of analog aircraft avionic receivers (1a);
    e. explaining the theory and operating principles of analog aircraft avionic transmitters (1a).
4. Demonstrate an understanding of solid state electrical components by
    a. explaining the theory, design, and operating principles of solid state circuits (1a);
    b. describing the construction of solid state electrical/electronic devices (1a);
    c. explaining the principles of operation of solid state electrical/electronic devices (1a).
5. Demonstrate an understanding of digital electrical components by
    a. explaining the theory, design, and operating principles of digital circuits (1a);
    b. describing the construction of digital electrical/electronic devices (1a);
    c. explaining the principles of operation of digital electrical/electronic devices (1a);
    d. explaining the theory and operating principles of digital aircraft avionic receivers (1a);
    e. explaining the theory and operating principles of digital aircraft avionic transmitters (1a);
    f. explaining the theory and design of aircraft digital data busses (1a).
6. Demonstrate an understanding of antenna principles by
    a. explaining the operational principles of antennas (1a);
    b. explaining the design characteristics of antennas (1a);
    c. explaining antenna wave propagation (1a).

AVNC 1343 - Aviation Electric/Electron Syst Install

General

Course Key
15565

Course Rubric
AVNC

Course Number
1343

Course Title
Aviation Electrical and Electronic Systems Installation

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). A comprehensive study of and practical experience in the installation of avionic systems in aircraft, mounting electronic equipment, construction and installation of electrical wiring and cables, proper use of tools, selection of materials, and safety.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify procedures for selecting techniques, tools, and equipment for installing avionics systems; interpret an avionics systems layout; and demonstrate tool and equipment usage and wiring techniques for avionics systems installation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the professional responsibilities of the modern avionics technician by
    a. discussing the professional relationship responsibilities between the avionics technician and the employer (1a);
    b. discussing the professional relationship responsibilities between the avionics technician and the aircraft owner/operator (1a);
    c. discussing the professional relationship responsibilities between the avionics technician and the regulatory agencies, FAA, and FCC (1a).
2. Demonstrate proficiency in identifying various types of wiring associated with aircraft electrical and electronic systems by
    a. discussing the need for proper wiring in aircraft electrical and electronic system installations (1a);
    b. explaining procedures for wiring selection as it pertains to environmental conditions (1a);
    c. explaining procedures for wiring selection as it pertains to load carrying capacity (1a).
3. Demonstrate proficiency in the selection and use of tools associated with various aircraft wiring projects by
    a. identifying various types of solderless connectors used in aircraft wiring (1a, 1b, 2c, 2e);
    b. performing solderless connections using various wire types and associated tooling (1a, 1b, 2c, 2e).
4. Demonstrate an understanding of current systems used in aircraft and upgrades to equipment being made in the aviation industry by
    a. performing preparation duties involved in system installations (1a, 1b, 2c, 2e);
    b. performing actual system installations to include all related hardware and wiring for a specific working avionic system (1a, 1b, 2c, 2e);
    c. performing a systems ground check for proper system installations (1a, 1b, 2c, 2e).

AVNC 1370 - Aircraft Comm Systems Line Maintenance

General

Course Key
15566

Course Rubric
AVNC

Course Number
1370

Course Title
Aircraft Communication Systems Line Maintenance

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Technical Local Need

Description
(3-2-3). A course in the theory, operation, testing and troubleshooting of common aircraft communications systems to include aircraft audio distribution systems, VHF communication systems, UHF communication systems, satellite communication systems, telephone systems, public address systems, and intercom systems. The student will receive training on the setup and use of common and peculiar test equipment associated with the testing of aircraft communication systems. Furthermore, the student will receive training in aircraft communication systems troubleshooting and repair practices/procedures using the correct materials and processes.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of Federal Aviation Administration (FAA) regulations and their role in the professional activities of aircraft/avionics technicians by
    a. identifying FAA regulations that are used for certification of aircraft/avionics technicians (airmen other than flight crew members) (1a);
    b. explaining the process used by the FAA to certify aircraft/avionics technicians (1a);
    c. identifying the FAA regulations that identify and authorize performance privileges for aircraft/avionics technicians (1a);
    d. discussing FAA equipment certification and maintenance requirements on equipment (1a);
    e. identifying FAA regulations that are applicable to the operation of different sizes, weights, types, and uses of aircraft (1a).
2. Demonstrate an understanding of Federal Communication Commission (FCC) regulations and the FCC's role in the professional activities of avionics technicians by
    a. describing how FCC regulations are used to certify avionics communication equipment (1a);
    b. describing how FCC regulations apply to the maintenance of communication equipment (1a).
3. Demonstrate an understanding of communication systems certification by
    a. describing the certification process for visual flight rules (VFR) communication systems equipment (1a);
    b. describing the certification process for instrument flight rules (IFR) communication systems equipment (1a).
4. Demonstrate an understanding of various aircraft communication systems by
    a. describing the different designs of aircraft communication systems (1a);
    b. describing the different configurations that are employed in aircraft communication systems (1a);
    c. describing how different aircraft communication systems are integrated together (1a).
5. Demonstrate an understanding of the theory of operation of aircraft communication systems by
    a. describing the theory of operation of very high frequency (VHF) aircraft communication systems (1a);
    b. describing the theory of operation of high frequency (HF) aircraft communication systems (1a);
    c. describing aircraft audio distribution systems (1a);
    d. describing aircraft passenger address systems (1a);
    e. describing aircraft telephone systems (1a);
    f. describing satellite communication systems (1a).
6. Demonstrate an ability to operate and test aircraft communication systems using common and peculiar testing equipment by
    a. performing an operational test on VHF aircraft communication equipment (1a, 1b, 2c, 2e);
    b. performing operational test on HF aircraft communication equipment (1a, 1b, 2c, 2e);
    c. performing operational test on aircraft audio distribution systems (1a, 1b, 2c, 2e);
    d. performing operational test on aircraft public address systems (1a, 1b, 2c, 2e);
    e. performing operational test on aircraft telephone systems (1a, 1b, 2c, 2e);
    f. performing operational test on satellite communication systems (1a, 1b, 2c, 2e).
7. Demonstrate a basic understanding of the FAA required aircraft communication systems functional test by
    a. explaining the use of various types of common ramp use test equipment (1a);
    b. explaining the use of various types of common ramp use power measurement devices (1a).
8. Demonstrate the ability to troubleshoot and isolate aircraft communication system faults by
    a. locating aircraft communication system faults through the use of operational knowledge (1a, 1b, 2c, 2e);
    b. locating aircraft communication systems faults through the use of published information (1a, 1b, 2c, 2e);
    c. locating aircraft communication systems faults through the use of test equipment (1a, 1b, 2c, 2e).

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of Federal Aviation Administration (FAA) regulations and their role in the professional activities of aircraft/avionics technicians by
    a. identifying FAA regulations that are used for certification of aircraft/avionics technicians (airmen other than flight crew members) (1a);
    b. explaining the process used by the FAA to certify aircraft/avionics technicians (1a);
    c. identifying the FAA regulations that identify and authorize performance privileges for aircraft/avionics technicians (1a);
    d. discussing FAA equipment certification and maintenance requirements on equipment (1a);
2. Demonstrate an understanding of Federal Communication Commission (FCC) regulations and the FCC's role in the professional activities of avionics technicians by
    a. describing how FCC regulations are used to certify avionics equipment (1a);
    b. describing how FCC regulations apply to the maintenance of avionics equipment (1a).
3. Demonstrate an understanding of basic aircraft navigation by
    a. explaining the principles of aviation (aircraft) navigation (1a);
    b. explaining the various levels of navigation used in aviation activities (1a).
4. Demonstrate an understanding of navigation systems' certification by
    a. describing the certification process for visual flight rules (VFR) navigation system equipment (1a);
    b. describing the certification process for instrument flight rules (IFR) navigation system equipment (1a).
5. Describe various aircraft navigation systems by
    a. describing the different designs of aircraft navigation systems (1a);
    b. describing the different configurations that are employed in aircraft navigation systems (1a);
    c. describing how different aircraft navigation systems are integrated together (1a).
6. Demonstrate an understanding of different types of navigation systems by
    a. explaining the theory of operation of VOR/LOC navigation systems (1a);
    b. explaining the theory of operation of Glideslope/Marker Beacon systems (1a);
    c. explaining the theory of operation of distance measuring equipment (DME) systems (1a);
    d. explaining the theory of operation of GPS (satellite navigation) systems (1a);
    e. explaining the theory of operation of transponder systems (1a).
7. Demonstrate a basic understanding of the FAA required aircraft navigation systems functional test by
    a. explaining the use of various types of common ramp use test equipment (1a);
    b. explaining the use of various types of common ramp use power measurement devices (1a).
8. Demonstrate an ability to operate and test aircraft navigation systems using common and peculiar testing equipment by
    a. performing operational test on VOR/LOC navigation equipment (1a, 1b, 2c, 2e);
    b. performing operational test on Glideslope/Marker Beacon navigation equipment (1a, 1b, 2c, 2e);
    c. performing operational test on DME navigation systems (1a, 1b, 2c, 2e);
    d. performing operational test on GPS navigation systems (1a, 1b, 2c, 2e);
    e. performing operational test on transponder systems (1a, 1b, 2c, 2e).
9. Demonstrate the ability to troubleshoot and isolate aircraft navigation system faults by
    a. locating aircraft navigation system faults through the use of operational knowledge (1a, 1b, 2c, 2e);
    b. locating aircraft navigation systems faults through the use of published information (1a, 1b, 2c, 2e);
    c. locating aircraft navigation systems faults through the use of test equipment (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Display professional habits (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of the role and regulations of the FAA as it pertains to airframe and powerplant technicians and repairmen (1a, 1b, 2c, 2e).
3. Demonstrate an understanding of U.S. airspace and the different levels of FAA Air Traffic Control Systems (1a, 1b, 2c, 2e).
4. Demonstrate an understanding of U.S. NextGen and FANS and its impact on Air Traffic Control and its impact on aircraft equipment requirements (1a, 1b, 2c, 2e).
5. Demonstrate an understanding of avionics equipment certification and avionics maintenance procedures (1a, 1b, 2c, 2e).
6. Demonstrate an understanding of the principles and levels of aircraft navigation (IFR/VFR) (1a, 1b, 2c, 2e).
7. Demonstrate an understanding of various aircraft navigation system designs, configurations, and system integration (1a, 1b, 2c, 2e).
8. Demonstrate an understanding of the theory and operating principles of Air Traffic Control Radar Based Mode A, Mode C, and Mode S systems (1a, 1b, 2c, 2e).
9. Demonstrate an understanding of the theory and operating principles of Air Traffic Control Space based ADS-B and Mode S (ES) systems (1a, 1b, 2c, 2e).
10. Demonstrate an understanding of the theory and operating principles of Traffic Collision and Avoidance systems (TCAS) (1a, 1b, 2c, 2e).
11. Demonstrate an overall understanding of required system functional test procedures Air Traffic Control Surveillance Systems to include a working knowledge and operational use of various common ramp test equipment and power measurement devices (1a, 1b, 2c, 2e).
12. Operate and perform maintenance on Air Traffic Control surveillance systems to include inspections, removal/replacement, and required testing (1a, 1b, 2c, 2e).

(4-3-3) Fundamental principles of living organisms will be studied, including physical and chemical properties of life, organization, function, evolutionary adaptation, and classification. Concepts of cytology, reproduction, genetics, and scientific reasoning are included. Laboratory activities will reinforce the fundamental principles of living organisms, including physical and chemical properties of life, organization, function, evolutionary adaptation, and classification. Study and examination of the concepts of cytology, reproduction, genetics, and scientific reasoning are included. Required Prerequisite: TSI Met in Reading and Writing. TSI Met in Algebraic Math pathway Recommended Prerequisite: MATH-1314

Course Classification
Academic Course Guide Manual (ACGM)

Description
(4-3-2) Anatomy and Physiology I is the first part of a two course sequence. It is a study of the structure and function of the human body including cells, tissues and organs of the following systems: integumentary, skeletal, muscular, nervous and special senses. Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis. Content may be either integrated or specialized. The lab provides a hands-on learning experience for exploration of human system components and basic physiology. Systems to be studied include integumentary, skeletal, muscular, nervous, and special senses. Required Prerequisite: TSI Met in Math, and Reading and Writing.

Lab Hours
2

Course Classification
Academic Course Guide Manual (ACGM)

Description
(4-3-2)Anatomy and Physiology II is the second part of a two-course sequence. It is a study of the structure and function of the human body including the following systems: endocrine, cardiovascular, immune, lymphatic, respiratory, digestive (including nutrition), urinary (including fluid and electrolyte balance), and reproductive(including human development and genetics). Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis. The lab provides a hands-on learning experience for exploration of human system components and basic physiology. Systems to be studied include endocrine, cardiovascular, immune, lymphatic, respiratory, digestive (including nutrition), urinary (including fluid and electrolyte balance), and reproductive (including human development and genetics.) Required Prerequisite: BIOL-2401

Course Classification
Academic Course Guide Manual (ACGM)

Description
(4-3-4).This course covers basic microbiology and immunology and is primarily directed at pre-nursing, pre-allied health, and non-science majors. It provides an introduction to historical concepts of the nature of microorganisms, microbial diversity, the importance of microorganisms and acellular agents in the biosphere, and their roles in human and animal diseases. Major topics include bacterial structure as well as growth, physiology, genetics, and biochemistry of microorganisms. Emphasis is on medical microbiology, infectious diseases, and public health. Lab activities cover basics of culture and identification of bacteria and microbial ecology. Required Prerequisite: TSI Met in Math, and Reading and Writing.

BMGT

Course Number
1301

Course Title
Supervision

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). The role of the supervisor. Includes managerial functions as applied to leadership, counseling, motivation, and human relations skills.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the role, characteristics, and skills of a supervisor; identify the principles of management at the supervisory level; explain the human relations skills necessary for supervision; explain motivational techniques; and cite examples of how motivational techniques can be used by a supervisor in a working environment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the role of the supervisor by:
    a. explaining the supervisory role at each organizational level (1a, 1b);
    b. explaining the skills needed by the supervisor at each organizational level (1a, 1b);
    c. defining the decision-making process (2b);
    d. identifying the staffing and training process (1b);
    e. explaining the importance of delegation (1a, 2c);
    f. defining supervision terminology (1a, 1b).
2. Define the human relations skills necessary for supervision by:
    a. defining the communication process (1a, 2c);
    b. selecting the appropriate communication style for the situation (1a, 2c);
    c. demonstrating the ability to communicate one-on-one and in groups (1d, 1e).
3. Explain motivational techniques by:
    a. explaining supervisor leadership skills, styles, and qualities (1a, 1b);
    b. explaining motivation theories and applications used by the supervisor (1a, 1b).

BMGT

Course Number
1305

Course Title
Communications in Management

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Basic theory and processes of communication skills necessary for the management of an organization's workforce.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the communication process; create solutions to major communication barriers; describe how communication contributes to effective management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the importance of communication in management by:
    a. analyzing the communication process (1a, 1b);
    b. explaining the value of effective listening (1d, 1e);
    c. explaining the differences between verbal and non-verbal communication (1d, 1e);
    d. defining barriers to communication and discussing ways to overcome them (1a, 1b, 1d, 1e).
2. Describe how communication contributes to effective management by:
    a. explaining the value of communication across cultures (3a, 3b, 3c, 3d);
    b. discussing the value of diversity within a business environment (1d, 1e, 2b, 2c, 2d).
3. Demonstrate oral and written communication skills by:
    a. demonstrating the ability to write effective letters, memos, emails, and reports (1a, 1b);
    b. demonstrating correct use of grammar and punctuation in business messages (1a, 1b);
    c. demonstrating the ability to prepare and deliver oral presentations (1a, 1b).
4. Demonstrate the ability to perform a job search by:
    a. evaluating his/her skills (1a, 1b, 2b, 2c, 2d, 2e);
    b. developing a resume and cover letter (1a, 1b, 2b, 2c, 2d, 2e);
    c. identifying effective techniques for job interviews (1a, 1b, 2b, 2c, 2d, 2e);
    d. developing interview follow-up techniques (1a, 1b, 2b, 2c, 2d, 2e).

BMGT 1313 - Principles of Purchasing

General

Description
(3-3-0) The purchasing process as it relates to such topics as inventory control, price determination, vendor selection, supply chain management, negotiation techniques, and ethical issues in purchasing.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the purchasing function as it relates to departments within the company; identify the basic concepts used in purchasing decisions including negotiation techniques and ethical issues; explain the relationships of materials management and inventory control with the purchasing process; and explain supply chain management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of purchasing by:
    a. identifying terms and definitions used in purchasing and its impact on supply chain management to include materials management and inventory control (1a, 1b, 2c);
    b. describing the purchasing function as it relates to departments within the company (1a, 1b, 2c);
    c. identifying the basic concepts used in purchasing decisions including negotiation techniques and ethical issues (1a, 1b, 2c).
2. Demonstrate an understanding of the legal aspects and regulatory agencies as they relate to purchasing by:
    a. identifying terms and definitions used to regulate purchasing operations (1a, 1b, 2c);
    b. identifying various local, state, and federal agencies that impact purchasing operations (1a, 1b, 2c).
3. Demonstrate the ability to apply decision-making techniques based on time, materials, and space by:
    a. gathering all needed reference data to solve a complex purchasing problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple-step decision-making process to solve a purchasing problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a purchasing problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain various theories, processes, and functions of management; apply theories to a business environment; identify leadership roles in organizations; and describe elements of the communication process.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of management terminology and basic characteristics by:
    a. defining management and the characteristics of an organization (1b);
    b. identifying functions of management and the essential managerial skills required at each managerial level (1b);
    c. explaining how managers differ from non-managerial employees (1a);
    d. evaluating the rewards and challenges of managers (1b).
2. Demonstrate an understanding of the importance and core components of management by:
    a. explaining why strategic management is important (1a);
    b. demonstrating an understanding of the organizational structure, culture, and design (1b);
    c. demonstrating an understanding of human resource management (1b);
    d. explaining the importance of social responsibility and ethical behavior within a business environment (1b);
    e. discussing the value of diversity within a business environment (1b);
    f. demonstrating an understanding of the control process (1b).
3. Demonstrate an understanding of leadership theories and styles by:
    a. defining leadership and its importance (1b);
    b. explaining similarities and differences between leadership and management (1b);
    c. analyzing how leaders use motivational theories to improve performance (1b).
4. Demonstrate an understanding of the communication process by:
    a. defining communication and its importance (1b);
    b. explaining the use of groups and teams (1b);
    c. explaining the utilization of technology in communication (1b);
    d. demonstrating the ability to communicate one-on-one and in groups (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify factors of plant location and design, resource allocation, and equipment selection and utilization; and use planning, scheduling, inventory management, and quality control techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of production and operations management by:
    a. identifying terms and definitions used in production and operations management (1a, 1b, 2c);
    b. describing the production and operations management function and how it impacts logistics and supply chain management (1a, 1b, 2c);
    c. identifying the basic concepts used in production and operations management decisions including negotiation techniques and ethical issues (1a, 1b, 2c).
2. Demonstrate an understanding of the production and operations management role in accomplishing a firm's objectives by:
    a. identifying factors of plant location and design, resource allocation, and equipment selection and utilization (1a, 1b, 2c);
    b. demonstrating the ability to use planning, scheduling, inventory management, and quality control techniques (1a, 1b, 2c).
3. Demonstrate the ability to apply decision-making techniques based on time, materials, and space by:
    a. gathering all needed reference data to solve a complex production and operations problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple-step decision-making process to solve a production and operations problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a production and operations problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

BMGT 1341 - Business Ethics

General

Course Key
8337

Course Rubric	Course Number	Course Title
BMGT	1341	Business Ethics

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Discussion of ethical issues, the development of a moral frame of reference, and the need for an awareness of social responsibility in management practices and business activities. Includes ethical corporate responsibility.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define business ethics; identify the consequences of unethical business practices; describe reasoning for analyzing ethical dilemmas; describe different ethical views; explain how business, government, and society function interactively; and explain corporate social responsibility.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the need for business ethics by:
    a. defining ethics and its impact on personal behavior (1a, 1b, 1c);
    b. explaining the role of the business firm as a member of the community (1a, 1b, 1c);
    c. explaining the impacts to society of business decisions (1a, 1b, 1c, 2c).
2. Demonstrate an understanding of the major types of ethical reasoning that persons in business can use to analyze ethical dilemmas by:
    a. explaining the concepts of consequentialism (1a, 1b, 1c);
    b. explaining the concepts of non-consequentialism (1a, 1b, 1c).
3. Demonstrate an understanding of how business, government, and society function as an interactive system by:
    a. describing the relationship of businesses to society (1a, 1b, 1c, 2c, 2d);
    b. describing the relationship of business and government in respect to ethical behavior (1a, 1b, 1c, 2c);
    c. describing the responsibility of government to society (1a, 1b, 1c, 2c, 2d).
4. Demonstrate an understanding of the concept of corporate social responsibility by:
    a. defining social responsibility as it pertains to the corporate business world (1a, 1b, 1c, 2c, 2d);
    b. describing the roles of social responsibility by corporations in the current social environment (1a, 1b, 1c, 2c, 2d).
5. Demonstrate an understanding of social and ethical threats emerging from rapid technological change by:
    a. discussing the impact of technological advances in production methods and labor demand (1a, 1b, 1c, 2c, 2d);
    b. discussing the limits of new product development and consumer use (1a, 1b, 1c, 2c);
    c. discussing the threats to commonly accepted beliefs challenged by new technology (1a, 1b, 1c, 2c, 2d).

BMGT 2309 - Leadership

General

Course Key
111

Course Rubric	Course Number	Course Title
BMGT	2309	Leadership

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Leadership and its relationship to management. Prepares the student with leadership and communication skills needed to motivate, influence and identify leadership styles.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Determine individual leadership styles; distinguish differences between leadership and management; explain the effects of leadership style in various organizational environments; and apply principles of leadership.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a basic understanding of leadership concepts by:
    a. defining leadership theories and terminology (1a, 1b, 1e);
    b. explaining the idea and importance of leadership (1a, 1b, 1e, 2a, 2b, 2e, 3e);
    c. contrasting a manager and leader (1a, 1b, 2b, 2c, 2e, 2f);
    d. defining and analyzing leadership styles, traits, skills, and competencies (1a, 1b, 2a, 2b, 2c, 2e, 2f).
2. Demonstrate how to develop individual leadership and inspire people to perform in an organization by:
    a. determining organizational effectiveness and relationships at each level (1a, 1b, 2a, 2b, 2c, 2e, 2f);
    b. assessing effective leadership styles and strategies (1a, 1b, 2a, 2b, 2c, 2e, 2f);
    c. demonstrating communication, decision-making, and collaborative skills for a diverse group (1a, 1b, 2a, 2b, 2c, 2e, 2f, 3e).
3. Demonstrate the ability to complete a capstone leadership project by:
    a. presenting proposed project idea (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e);
    b. presenting completed project to class (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e).

BMGT 2331 - Principles of Quality Management

General

Course Key

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the role of quality in production and service systems; explain concepts related to quality cost/benefit; and define the quality improvement process.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of quality by:
    a. identifying terms and definitions used in quality and its impact on supply chain management (1a, 1b, 2c);
    b. defining the role of quality in production and service systems (1a, 1b, 2c);
    c. explaining concepts related to quality cost/benefit (1a, 1b, 2c).
2. Demonstrate an understanding of the quality improvement process by:
    a. identifying terms and definitions used to define quality improvement (1a, 1b, 2c);
    b. explaining the quality improvement process by using analyses (1a, 1b, 2c).
3. Demonstrate the ability to apply decision-making techniques based on time, materials, and space by:
    a. gathering all needed reference data to solve a complex quality problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple-step decision-making process to solve a quality problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a quality problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the processes involved in management strategy development; and develop an organizational strategic management plan.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the processes for developing management strategy by:
    a. explaining how to apply effective methods of assessing changes and trends in the firm's external environment (1a, 1b, 2c);
    b. analyzing a firm's internal environments for strengths and weaknesses and making recommendations (1a, 1b, 2c, 2d);
    c. explaining the importance of an organization's public perception as being ethical and concerned for the welfare of all its stakeholders (1a, 1b, 1c, 2c);
    d. identifying the relationship between strategy formulation and the strategic control process (1a, 1b, 2c).
2. Demonstrate an understanding of the importance of developing a strategic management plan for an organization by:
    a. evaluating assigned cases using material for historical data and research to develop a strategic plan (1a, 1b, 2c);
    b. researching material to assess a competitor's strategy and potential reactions to strategic plans (1a, 1b, 2c);
    c. analyzing financial and ratio analysis to measure the fiscal condition of the firm, and its relation to short- and long-range goals and strategic plans (1c, 1b, 2a, 2c);
    d. developing a trend and SWOT analysis (1a, 1b, 2c, 2d);
    e. developing and presenting a 3-5 year strategic management plan for an organization (1a, 1b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify and implement a project related to his/her job by:
    a. collaborating with employer and professor to determine the need, value, approval, and implementation (1a, 1b, 1d, 2b, 2c, 3a, 3b, 3e);
    b. completing required Tarrant County College documentation (1a, 1b, 2b, 2c, 3a, 3b, 3e);
    c. utilizing appropriate research techniques to compile, analyze, and assemble information (1a, 1b, 2b, 2c, 2e, 3a, 3b, 3e);
    d. preparing the typewritten portfolio (1a, 1b, 2b, 2c, 3a, 3b, 3e).
2. Demonstrate the ability to manage time and deadlines by:
    a. preparing and submitting all cooperative forms (1a, 1b, 2b, 2c, 3a, 3b, 3e);
    b. scheduling cooperative visit appointments to meet with supervisor and professor (1d, 1e, 2e, 3a, 3c, 3d, 3e);
    c. completing and participating in assigned coursework (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e).
3. Prepare and present oral presentations by:
    a. presenting proposed co-op project idea to supervisor and professor during the first co-op visit (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e);
    b. presenting completed co-op project to class (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e);
    c. presenting completed co-op project to supervisor, professor, and others as deemed necessary at the last cooperative visit (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f, 3a, 3b, 3c, 3d, 3e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify elements for developing a web page; identify security issues; describe transaction processing systems; identify ethical/legal concerns; and discuss tax issues relating to e-commerce transactions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of elements for developing an infrastructure by:
    a. defining the meaning, scope, and elements of e-business, including how it differs from e-commerce (1a, 2c, 2d, 2e);
    b. describing the major types of e-business and e-commerce (1a, 2c, 2d, 2e);
    c. outlining the development and growth of e-business (1a, 2c, 2d, 2e);
    d. listing the barriers to adoption of e-business and e-commerce (1a, 2c, 2d, 2e);
    e. listing key business concepts and strategies applicable to e-business (1a, 2c, 2d, 2e);
    f. describing the major business models being successfully implemented by companies on the web (1a, 2c, 2d, 2e);
    g. describing the hardware and software technologies utilized to build an e-business infrastructure within an organization and with third parties (1a, 2c, 2d, 2e).
2. Demonstrate an understanding of appropriate hardware and software technologies for web page development and for implementation, utilization, and maintenance within the organization by:
    a. explaining the origin of the internet, the role of internet protocols, and the current structure of the internet (1b, 2c, 2d, 2e);
    b. discussing how the internet and web features and services support e-business and e-commerce (1b, 2c, 2d, 2e);
    c. identifying the hardware and software requirements necessary to enable employee access to the internet and the hosting of e-commerce services (1b, 2c, 2d, 2e);
    d. describing current markup languages (i.e., HTML, XHTML, etc.) in use (1b, 2c, 2d, 2e);
    e. identifying common elements of current markup languages (1b, 2c, 2d, 2e);
    f. explaining how current and emerging networking technologies such as wireless and cellular access have affected e-business (1b, 2c, 2d, 2e);
    g. evaluating how current and emerging networking technologies such as wireless and cellular access have affected e-business (1b, 2c, 2d, 2e).
3. Demonstrate an understanding of relevant security issues by:
    a. discussing the scope of internet and e-commerce-related crime and security issues (1a);
    b. identifying key physical, hardware, software, and organizational security threats (1a);
    c. listing the tools and software used to identify and prevent security breaches and to secure e-business systems, organizational processes, and structures (1a);
    d. identifying popular security protocols (1a);
    e. explaining basic concepts related to privacy, including the different methods used to protect online privacy (1a);
    f. explaining the effect security has on the use of technology (1a).
4. Demonstrate an understanding of transaction processing systems from traditional and e-business organizations by:
    a. defining the elements of traditional payment systems (1a, 2c, 2d, 2e);
    b. describing the main elements of electronic supply chain management, e-procurement, payment, and communication transaction systems (1a, 2c, 2d, 2e);
    c. explaining how the major e-commerce payment mechanisms have transformed and/or affected the traditional processes (1a, 2c, 2d, 2e);
    d. explaining the risks and benefits of implementing electronic supply chain management, e-procurement, and communication transaction systems (1a, 2c, 2d, 2e).
5. Demonstrate an understanding of the main ethical, legal, social, and political issues raised by e-business by:
    a. listing the ethical, legal, social, and political issues (1a, 2c);
    b. discussing tax issues relating to e-commerce transactions (1a, 2c);
    c. identifying the opportunities and challenges involved in e-commerce globalization (1a, 2c).

6. Discuss e-commerce marketing and marketing communications by:
    a. identifying the types of internet consumers (1a, 1b, 2c, 2d, 2e);
    b. discussing basic concepts of consumer behavior and purchasing decisions (1a, 1b, 2c, 2d, 2e);
    c. describing the basic marketing concepts needed to understand internet marketing (1a, 1b, 2c, 2d, 2e);
    d. explaining the main technologies that support online marketing (1a, 1b, 2c, 2d, 2e);
    e. identifying the major forms of online marketing communications (1a, 1b, 2c, 2d, 2e);
    f. discussing the costs and benefits of online marketing communications (1a, 1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify community economic issues; explain the benefits of entrepreneurship as an economic development strategy; identify characteristics of successful entrepreneurs in a local community; develop a collaborative support system for entrepreneurs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of entrepreneurship and the contribution entrepreneurs make to an economy by:
    a. defining entrepreneurship (1a, 1b, 2a, 2c, 2d);
    b. identifying examples of entrepreneurship (1a, 1b, 2a, 2c, 2d);
    c. articulating the traits of an entrepreneur (1a, 1b, 2a, 2c, 2d);
    d. describing the importance of the entrepreneur's role in society (1a, 1b, 2a, 2c, 2d);
    e. providing examples of how to serve needs in their own community through entrepreneurial actions (1a, 1b, 2a, 2c, 2d);
    f. recognizing opportunities to be entrepreneurial in their daily lives (1a, 1b, 2a, 2c, 2d).
2. Demonstrate an understanding of the entrepreneur's role in creating value in an economic system by:
    a. defining value and describing why goods of value must be produced by entrepreneurs and businesses (1a, 1b, 2a, 2c, 2d);
    b. explaining the difference between subjective value and competing theories of value, such as the labor theory of value (1a, 1b, 2a, 2c, 2d);
    c. identifying the difference between creating value and creating work (1a, 1b, 2a, 2c, 2d);
    d. discussing how an entrepreneur creates value for society (1a, 1b, 2a, 2c, 2d);
    e. explaining the essential role entrepreneurs play in creating economic growth (1a, 1b, 2a, 2c, 2d);
    f. understanding the entrepreneur's role in discovering and innovating new and better ways of solving problems to meet society's needs (1a, 1b, 2a, 2c, 2d).
3. Demonstrate how entrepreneurs can use economics to make better decisions by:
    a. defining scarcity and opportunity cost (1a, 1b, 2a, 2b, 2c, 2d);
    b. recognizing that individuals face the problem of scarcity in deciding how to allocate their resources, including their time (1a, 1b, 2a, 2b, 2c, 2d);
    c. identifying how all economic choices involve tradeoffs and explaining the concept of opportunity cost (1a, 1b, 2a, 2b, 2c, 2d);
    d. identifying how entrepreneurs may use economics to achieve market-based solutions (1a, 1b, 2a, 2b, 2c, 2d).
4. Demonstrate an understanding of the meaning of profit and loss to a business by:
    a. explaining the function of prices (1a, 1b, 2a, 2b, 2c, 2d);
    b. identifying the necessary requirements for a functioning price system (1a, 1b, 2a, 2b, 2c, 2d);
    c. describing the role of profit and loss in the allocation of resources in society (1a, 1b, 2a, 2b, 2c, 2d);
    d. understanding how profits signal the successful serving of the needs of others (1a, 1b, 2a, 2b, 2c, 2d).
5. Demonstrate an understanding of what institutional factors encourage entrepreneurship in a society by:
    a. identifying the ways in which individuals in an economic system respond to incentives and how positive and negative incentives influence behavior in predictable ways (1a, 1b, 2a, 2c, 2d);
    b. describing the role institutions, policies, and regulations play in stimulating or stifling an individual's pursuit of entrepreneurship ventures and activities (1a, 1b, 2a, 2c, 2d).

Description
(3-3-0) Operating a small business. Emphasizes management functions including planning, leading, organizing, staffing, and controlling operations.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the aspects of operating a small business; describe human resource functions including employee development; explain the elements of total quality management; and compare purchasing procedures, inventory control, and computerized operations of small businesses.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the role of small businesses in free enterprise economies by:
    a. explaining the forces that are driving the growth in small business ownership and entrepreneurship (1a, 1b);
    b. explaining how free enterprise economies work and how small businesses fit into them (1a, 1b);
    c. describing the contributions small businesses make to the U.S. economy (1a, 1b, 2a, 2c).
2. Demonstrate an understanding of how the business plan is used to successfully start, operate, and control a small firm by:
    a. describing a business plan (1a, 1b);
    b. explaining the various purposes for a business plan (1a, 1b);
    c. identifying and developing the components of a business plan (1a, 1b);
    d. demonstrating proper development and formatting of a business plan (1b, 2a, 2c).
3. Demonstrate an understanding of the techniques used to plan and control the financial aspects of a small firm by:
    a. defining fixed and variable costs (1a, 1b);
    b. identifying examples of fixed and variable costs (1a, 1b);
    c. identifying the financial statements needed to operate a business (1a, 1b);
    d. explaining the information contained on the income statement (1b, 2c);
    e. using the balance sheet equation to see the relationship between assets, liabilities, and equity (1b, 2c);
    f. using the cash flow statement to guide the firm's operations (1b, 2c);
    g. identifying the tax returns that a small firm is required to file (1a, 1b);
    h. examining the use of computers and financial software to facilitate the preparation of financial statements and aid in tax compliance (1a, 2a, 2c).
4. Demonstrate an understanding of management and leadership skills for operating a small business by:
    a. describing the tasks handled by managers (1a, 1b);
    b. describing the various styles of leadership (1a, 1b);
    c. explaining what makes an effective leader (1a, 1b);
    d. explaining how to build the kind of company culture and structure to support the owner's/founder's mission and goals and to motivate employees to achieve them (1b, 2c);
    e. describing ways in which small owners can motivate their employees to achieve higher levels of performance (1b, 2c);
    f. developing guidelines for a small firm to act legally and ethically (1b, 1c, 2a, 2c).
5. Demonstrate an understanding of the role human resources play in the management of a small business by:
    a. explaining the major responsibilities of human resources (1a, 1b);
    b. identifying the laws affecting employees (1a, 1b);
    c. describing the importance of hiring the right employees and how to avoid making hiring mistakes (1a, 1b, 2a, 2c);
    d. explaining the importance of providing training and development opportunities to employees (1b, 2c);
    e. identifying training methods best suited for small businesses (1a, 1b).
6. Devise a plan for business operations that will ensure the business delivers on its promises to customers by:
    a. identifying the types of businesses and their production distribution chain (1a, 1b);
    b. explaining the components of a purchasing plan (1a, 1b);
    c. explaining the principles of total quality management (TQM) including Lean, 5S, and Six Sigma and their impact on quality (1a, 1b);
    d. describing the legal implications of the purchasing function (1a, 1b);
    e. explaining techniques used to manage suppliers and inventory (1b, 2a, 2c);
    f. explaining how technology can be used to benefit a small firm (1b, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify business financing options; estimate funds for starting a new business and purchasing or expanding an existing business; prepare a budget; identify types of financial records; describe record keeping requirements; identify tax matters pertaining to a small business; and describe the concepts of risk management.

1. Demonstrate an understanding of the basic economic factors affecting finance by
    a. defining basic economic terms (1a, 1b);
    b. explaining basic economic concepts of finance (1a, 1b, 2c);
    c. listing the factors affecting interest rates (1a, 1b);
    d. examining the three basic forms of taxation (1a, 1b).
2. Demonstrate an understanding of the importance of financial management and planning by
    a. describing the basic management functions (1a, 1b);
    b. comparing and contrasting the basic forms of business ownership (1b, 2c);
    c. identifying the sections included in a business plan (1a, 1b);
    d. explaining the two types of financing for a firm (1a, 1b);
    e. listing sources of financing (1a, 1b);
    f. estimating funding needed to start or purchase a firm and then grow the business (2a, 2c, 2d);
    g. explaining the importance of the business plan as it relates to financing a small firm (1a, 1b, 2c).
3. Demonstrate an understanding of the financial statements used by small firms for recordkeeping by
    a. identifying the basic financial statements used by businesses (1a, 1b);
    b. examining computerized operations that can be employed to facilitate recordkeeping requirements and to prepare financial statements (1a, 1b, 2c);
    c. explaining the information presented on an income statement (1a, 1b, 2c);
    d. explaining the components of a balance sheet (1a, 1b, 2c);
    e. explaining the three activities presented on the statement of cash flows (1a, 1b, 2c);
    f. comparing and contrasting how various business formations are taxed (1b, 2a, 2c, 2d);
    g. examining problems with financial statements (1b, 2c).
4. Demonstrate an understanding of how to perform financial statement analysis by
    a. identifying the purpose of financial statement analysis (1a, 1b);
    b. explaining the three methods of analyzing financial statements (1a, 1b);
    c. identifying the types of business ratios (1a, 1b);
    d. performing financial statement analysis on a small firm's financial statements (1b, 2c, 2d);
    e. comparing a firm's ratios to other companies in the same industry using industry averages and explaining the differences (1b, 2c, 2d).
5. Demonstrate an understanding of how pro forma financial statements are prepared and used in the budgeting process by
    a. identifying fixed expenses, variable expenses, and startup expenses (1a, 1b);
    b. performing break even analysis (1b, 2c, 2d);
    c. explaining the importance of a sales forecast to a business (1a, 1b);
    d. preparing budgeted or pro forma financial statements (1b, 2a, 2c, 2d);
    e. comparing pro forma financial statements to the firm's actual performance and explaining the differences (1b, 2a, 2c, 2d).
6. Demonstrate an understanding of techniques for managing working capital by
    a. explaining the concept of working capital management (1a, 1b);
    b. describing the asset and liability categories included in working capital (1a, 1b);
    c. determining the methods of managing disbursement and collection of cash to increase business profitability (1b, 2a, 2c, 2d);
    d. explaining how to manage current assets and current liabilities to maximize cash flow and profitability (1a, 1b, 2c).
7. Demonstrate an understanding of the purpose and need for capital budgeting and various capital budgeting techniques by
    a. explaining the purpose and need for capital budgeting (1a, 1b, 2a);
    b. listing and explaining the steps in making a capital budgeting decision (1a, 1b);
    c. explaining the relationship between the time value of money and inflation and how that relates to capital budgeting (1b, 2c, 2d);
    d. identifying all costs and benefits associated with a capital budgeting decision (1a, 1b);
    e. discussing the techniques used to make a decision regarding capital budgeting projects (1b, 2a, 2c);
    f. making a decision regarding capital budgeting projects based on calculations from capital budgeting techniques (1b, 2a, 2c, 2d);
    g. discussing the importance of following up, controlling, and taking corrective action after a capital budgeting decision has been made (1b, 2a, 2c, 2d).
8. Demonstrate an understanding of risk management by
    a. explaining the nature of risk as it pertains to businesses (1a, 1b);
    b. identifying the programs used by individuals and businesses in managing risk (1a, 1b);
    c. discussing the role that insurance plays in the transfer of risk (1b, 2c).

BUSG 1370 - Entrepreneurial Mindset

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate leadership skills through planning, implementing, and evaluating a project that addresses current social, political, ethical, international, and economic issues in business and community settings. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Develop a professional portfolio by:
    a. using personality testing or professional assessment(s) to build selfawareness (1a, 1b, 1c, 2c);
    b. developing a personal SWOT analysis (1a, 1b, 1c, 2b);
    c. developing an error free resume (1a, 1b, 1c, 2a, 2c, 2e);
    d. writing a personal vision statement that incorporates career and educational goals (1a, 1b, 1c, 2a, 2e).
2. Utilize community resources effectively by:
    a. interacting appropriately with business and civic leaders (1a, 1b, 1c, 2b);
    b. employing networking skills to develop professional contacts (1a, 1b, 1c, 2b);
    c. making appropriate choices in business grooming and attire (1a, 1b, 1c, 2b);
    d. demonstrating acceptable business etiquette (1a, 2b, 1c, 2b);
    e. completing service learning hours (1a, 1b, 1c, 2b);
    f. participating in field trips and community functions (1a, 1b, 1c, 2b).
3. Demonstrate collaborative skills within diverse groups by:
    a. employing appropriate communication skills in building community (1a, 1b, 1c, 2b);
    b. employing appropriate decision making skills within a group structure (1a, 1b, 1c, 2b, 2d);
    c. evaluating the effectiveness of collaborative efforts (1a, 2b, 1c, 2b).
4. Apply major course preparations to a business community team project by:
    a. utilizing research resources, including the internet (1a, 1b, 2a, 2c, 2d, 2e);
    b. comprehending the global implications of a research topic (1a, 1b, 2c, 2e);
    c. developing an effective PowerPoint with an oral presentation of the end product (1a, 1b, 2c, 2e);
    d. critiquing the end product (1a, 1b, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define fundamental legal terminology regarding contracts, torts, property, and wills; differentiate between business ethics and legal issues; and explain required elements of torts, requirements of contracts, and various consumer laws as applied to businesses and individuals. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify various sources of law that govern the business environment (1a, 1b, 2a, 2c, 2d).
2. Explain the various forms of alternative dispute resolution (1a, 1b, 2a, 2c, 2d).
3. Understand the differences between intentional torts and negligence and demonstrate an understanding of how these torts arise in the business context (1a, 1b, 2a, 2c, 2d).
4. Recognize the elements of a contract and explain the importance of including these elements for enforcement of a contract (1a, 1b, 2a, 2c, 2d).
5. Explain the relevance and enforceability of non-compete clauses in the business environment (1a, 1b, 2a, 2c, 2d).
6. Identify the various forms of intellectual property and demonstrate an understanding of the intangible property each type protects (1a, 1b, 2a, 2c, 2d).
7. Demonstrate an understanding of the strict liability doctrine and its underlying purpose (1a, 1b, 2a, 2c, 2d).
8. Identify the different types of insurance that are relevant for a business (1a, 1b, 2a, 2c, 2d).
9. Explain the relevant federal employment laws prohibiting discrimination (1a, 1b, 2a, 2c, 2d).
10. Distinguish between independent contractors and employees (1a, 1b, 2a, 2c, 2d).
11. Identify the various forms of business ownership (1a, 1b, 2a, 2c, 2d).
12. Understand the Federal Trade Commission's prohibition of deceptive and unfair advertising (1a, 1b, 2a, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify management skills for a small business; outline issues related to choosing a business and obtaining a return on investment; and create a business plan. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of essential entrepreneurial concepts by:
    a. describing the role of the entrepreneur in the United States (1a, 1b);
    b. describing the entrepreneurial profile and evaluating their potential as an entrepreneur (1a, 1b, 2c);
    c. explaining the benefits and drawbacks of entrepreneurship (1a, 1b);
    d. explaining the cultural diversity of entrepreneurship (1a, 1b, 2b, 2d);
    e. describing why creativity and innovation are an integral part of entrepreneurship (1b, 2b, 2c, 2d).
2. Demonstrate an understanding of how to conduct a feasibility analysis by:
    a. explaining what a feasibility analysis is and why it's important (1b, 2c, 2d);
    b. explaining the steps involved in subjecting a business idea to a feasibility analysis (1b, 2c, 2d);
    c. describing a product/service feasibility analysis and explaining its purpose (1b, 2c, 2d);
    d. describing an industry/market feasibility analysis and explaining its purpose (1b, 2c, 2d);
    e. describing what a financial feasibility analysis is; explaining its importance, and identifying the most critical issues to consider when completing this analysis (1b, 2c, 2d).
3. Demonstrate an understanding of how to craft a business plan by:
    a. describing the benefits of preparing a business plan (1b, 2c, 2d);
    b. describing the elements of a solid business plan (1b, 2c, 2d);
    c. demonstrating proper development and formatting of a business plan (1b, 2c, 2d);
    d. identifying the importance of strategic planning as a component of the business plan (1a, 1b);
    e. explaining the steps in the strategic planning process (1a, 1b);
    f. developing the strategic plan component of the business plan (1b, 2a, 2b, 2c, 2d);
    g. describing the keys to preparing a business plan and making an effective business plan presentation (1b, 1c, 2c).
4. Demonstrate an understanding of how to start a business and how to choose the appropriate legal form of business ownership by:
    a. explaining the three options for starting a business: create a new business, purchase a franchise, and buy an existing business (1a, 1b, 2d);
    b. identifying the various legal forms of business ownership (1a, 1b);
    c. explaining the advantages and disadvantages of the various forms of business ownership (1b, 2b, 2c, 2d);
    d. identifying the most appropriate form of business ownership under specific scenarios (1b, 2a, 2b, 2c, 2d);
    e. defining a business contract (1a, 1b);
    f. explaining methods used to protect intellectual property (1a, 1b);
    g. choosing the appropriate methods for managing risk and protecting the business venture (1a, 1b, 2a, 2b, 2c).
5. Demonstrate an understanding of how marketing is best utilized in an entrepreneurial venture by:
    a. demonstrating an understanding of marketing in a small business environment (1a, 1b, 2d);
    b. identifying key target market for the business venture (1a, 1b, 2c, 2d);
    c. explaining the process of conducting marketing research (1a, 1b, 2d, 2e);
    d. identifying market segmentation methods (1a, 1b, 2d);
    e. analyzing market segments in order to determine a firm's target market (1b, 2a, 2b, 2c);
    f. developing a marketing mix for the business venture (1b, 2a, 2b, 2c).
6. Demonstrate an understanding of how to build a powerful marketing plan by:
    a. describing basic marketing principles and strategies used by entrepreneurs (1a, 1b, 2c);
    b. explaining the components of a marketing plan and its interrelationship with the business plan (1b, 2c, 2d);
    c. explaining why and how a small business can create a competitive advantage in the marketplace (1b, 2c, 2d, 2e);
    d. developing a marketing plan (1b, 2a, 2b, 2c, 2d).
7. Demonstrate an understanding of how ecommerce presents new business opportunities for entrepreneurs by:
    a. describing the factors an entrepreneur should consider before launching into ecommerce (1a, 1b, 2c);
    b. explaining the basic strategies entrepreneurs should follow to achieve success in their ecommerce efforts (1b, 2a, 2b, 2c, 2d, 2e);
    c. describing the techniques of designing an effective website (1b, 2a, 2b, 2c, 2d, 2e);
    d. explaining how companies track the results from their websites (1b, 2a, 2b, 2c, 2d, 2e);
    e. describing how e-businesses ensure the privacy and security of the information they collect and store from the web (1b, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate an understanding of how to create a successful financial plan by:
    a. discussing basic accounting and financial concepts used to manage and control a small firm (1a, 1b, 2c);
    b. explaining the components of a financial plan and its interrelationship with the business plan (1b, 2c, 2d);
    c. calculating return on investment (ROI) and explaining how it is used to evaluate potential business opportunities and to manage a firm (1b, 2a, 2b, 2c, 2d);
    d. describing the differences between equity capital and debt capital (1a, 1b, 2d);
    e. identifying the various sources of equity capital available to entrepreneurs (1a, 1b, 2c);
    f. describing the various sources of debt capital (1a, 1b, 2c);
    g. explaining alternative methods of financing a business (1a, 1b, 2c).
9. Demonstrate an understanding of how to create an effective management plan by:
    a. discussing basic management principles employed by a small firm (1a, 1b, 2c);
    b. explaining the components of a management plan and its interrelationship with the business plan (1b, 2c, 2d);
    c. developing a management plan (1b, 2a, 2b, 2c, 2d).
10. Demonstrate an understanding of the global aspects of entrepreneurship by describing the principal strategies small businesses have for going global (1a, 1b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Summarize prenatal development and the birth process; discuss theories of development as they apply to infants and toddlers; outline growth and development of children from birth to age 3; analyze components of teacher/child interactions and positive guidance techniques; design learning environments; and select materials and activities for infants and toddlers. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of prenatal development by:
    a. outlining stages and major milestones of prenatal development (1a, 1b, 2c);
    b. describing possible environmental factors (teratogens) and their effects on the developing embryo or fetus (1a, 1b, 2c);
    c. describing components of good prenatal care (1b, 2c).
2. Demonstrate an understanding of the birth process by:
    a. describing stages of labor (1a, 1b, 2c);
    b. comparing methods of delivery (1a, 1b, 2c);
    c. describing possible complications of delivery (1b, 2c);
    d. discussing effects of medication during the birth process (1b, 2c).
3. Demonstrate an understanding of the theories of development as they apply to infants and toddlers by:
    a. comparing the impact of nature and nurture on the developing child (1b, 2c);
    b. practicing authentic observations of infants and toddlers in relation to developmental milestones (1b, 2b, 2c).
4. Outline growth and development of children from birth to age 3 by:
    a. describing principles of development (1b, 2b);
    b. explaining the importance of brain research as it relates to growth and development of infants and toddlers (1b, 2b, 2c);
    c. describing physical, fine, gross motor, and perceptual development (1a, 1b, 2b, 2c);
    d. describing cognitive development (1a, 1b, 2b, 2c);
    e. describing social development (1a, 1b, 2b, 2c);
    f. describing emotional development, including self-concept and self-esteem (1a, 1b, 2b, 2c);
    g. describing receptive and expressive language development (1a, 1b, 2b, 2c);
    h. describing literacy development (1a, 1b, 2b, 2c);
    i. defining at risk as it applies to infants and toddlers (1a);
    j. identifying community resources available for early intervention (2a, 2b).
5. Demonstrate an understanding of components of quality infant/toddler caregiving by:
    a. discussing characteristics of quality programs for infants and toddlers (1a, 1b, 2b, 2c);
    b. discussing social and cultural influences which impact infant/toddler care (1a, 1b, 2b, 2c);
    c. explaining the importance of establishing and maintaining strong, positive communication and collaborative relationships with families (1a, 1b, 2b, 2c);
    d. explaining principles of quality caregiving (1b, 2b);
    e. explaining appropriate teacher roles and responsibilities for caregivers of children under three (1b, 2b);
    f. describing daily routines used in infant/toddler classrooms and their importance in meeting children's needs (1a, 1b, 2b);
    g. discussing unique health and safety needs of infants and toddlers (1a, 1b, 2b, 2c);
    h. developing appropriate schedules for infants and toddlers (1a, 1b, 2b);
    i. discussing ways to include infants and toddlers with special needs into a quality program (1a, 1b, 2b, 2c).
6. Demonstrate an understanding of elements of appropriate indoor and outdoor environments by:
    a. describing developmentally appropriate indoor environments for infants (1a, 1b, 2b, 2c);
    b. identifying characteristics of effective room arrangements for infants (1a, 1b, 2b, 2c);
    c. describing developmentally appropriate outdoor environments for infants (1a, 1b, 2b, 2c);

d. describing developmentally appropriate indoor environments for toddlers (1a, 1b, 2b, 2c);

e. identifying characteristics of effective room arrangements for toddlers (1a, 1b, 2b, 2c);

7. Provide developmentally appropriate materials and activities by:

a. providing developmentally appropriate materials for use in infant/toddler classrooms (1a, 1b, 2b);

b. implementing student planned developmentally appropriate learning activities for infants/toddlers, including those with special needs (1a, 1b, 2b, 2c).

8. Demonstrate developmentally appropriate teaching/guidance techniques by:

a. applying principles of caregiving in a classroom with children under three (1a, 1b, 2b);

b. using appropriate transitions with infants and toddlers (1a, 1b, 2b);

c. using appropriate direct and indirect guidance techniques with infants and toddlers (1a, 1b, 2b, 2c);

d. demonstrating appropriate procedures for feeding, diapering, toileting, dressing, and sleeping (1a, 1b, 1c, 2b);

e. demonstrating teamwork skills while working with colleagues in infant/toddler classrooms (1a, 1b, 1c, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the components of assessment; compare assessment tools; demonstrate "authentic assessment"; and develop individual plans based on "authentic assessment." Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of appropriate assessment skills by:

a. explaining the importance of assessment (1a, 1b, 2c);

b. discussing how assessment helps to describe and support young children's development (1a, 1b, 2c);

c. observing children's activities in their day to day settings (1a, 1b).

2. Develop skills in observing, recording, and interpreting children's behavior by:

a. explaining the importance of collecting, synthesizing, and interpreting information (1a, 1b, 2c);

b. explaining the importance of documenting (1a, 1b, 2c);

c. explaining how to use documentation to evaluate young children's needs (1a, 1b, 2c).

3. Define and compare assessment tools by:

a. discussing assessment tool terminology, reliability (consistency of measurement), and validity (the test measures what it is supposed to measure) (1a, 1b, 2c);

b. applying anecdotal note taking (1a, 1b, 2c);

c. identifying appropriate checklists (1a, 1b);

d. analyzing children's work samples (1a, 1b, 2c).

4. Develop individual plans based on assessment by:

a. developing an individual plan based upon assessment data (1a, 1b, 2c);

b. discussing how individual plans can assist in identifying children who may be in need of specialized services (1a, 1b, 2b, 2c);

c. discussing how to involve parents in the assessment process (1a, 1b, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define literacy and emergent literacy; analyze theories of language development; describe the teacher's role in promoting emergent literacy; and create literacy environments and experiences for children. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of emergent literacy by:

a. defining literacy and emergent literacy (1a, 1b, 2c);

b. describing elements pertaining to emergent literacy (1a, 1b, 2b);

c. explaining the process related to emergent literacy (1a, 1b, 2c);

d. contrasting theories of early literacy development (1a, 1b, 2c);

e. examining the interrelatedness of speaking, listening, reading, and writing (1a, 1b).

2. Demonstrate an understanding of theories associated with language development by:

a. examining theories of language development (1a, 1b, 2c);

b. outlining developmental milestones of language development/communication of children (1a, 1b, 2c);

c. describing the process of second language learning (1a, 1b, 2c).

3. Demonstrate an understanding of the teacher's role in promoting emergent literacy by:

a. outlining the teacher's roles in promoting emergent literacy (1a, 1b, 2b, 2c);

b. explaining how teachers can integrate the children's cultures into meaningful literacy experiences (1a, 1b, 2b, 2c);

c. analyzing literacy materials for bias content (1a, 1b, 2c);

d. giving examples of strategies for adapting literacy materials for children with special needs (1a, 1b, 2c);

e. describing how assessment information can be used to plan developmentally appropriate learning activities (1a, 1b, 2c);

f. explaining how teachers can integrate technology to support literacy development in a curriculum (1a, 1b, 2c, 2e).

4. Demonstrate an understanding of literacy environments for children by:

a. describing how to incorporate literacy in various centers (1a, 1b, 2c);

b. creating environments that are print rich, offer children real life experiences, and provide meaningful opportunities to promote positive attitudes toward literacy (1a, 1b, 2c);

c. analyzing cultural influences on the literacy environment (1a, 1b, 2c);

d. giving examples of appropriate literacy materials to use in early childhood programs.

5. Demonstrate the ability to select appropriate literature for children by:

a. describing a variety of techniques that promote literacy (1a, 1b, 2c);

b. analyzing criteria for choosing activities and materials for various age groups (1a, 1b, 2c);

c. examining a variety of developmentally appropriate books and other forms of print to promote literacy (1a, 1b, 2c).

CDEC 1358 - Creative Arts for Early Childhood

General

Course Key
209

Course Rubric
CDEC

Course Number
1358

Course Title
Creative Arts for Early Childhood

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An exploration of principles, methods, and materials for teaching music, movement, visual arts, and dramatic play through process-oriented experiences to support divergent thinking for children birth through age eight.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the creative process; describe developmental sequences of creative arts; analyze teacher roles in enhancing creativity; describe concepts taught through the creative arts; identify components of creative environments; and assess creative arts activities. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the creative process by:
    a. describing factors that encourage and discourage creativity (1a, 1b, 2c);
    b. comparing process oriented experiences to product oriented experiences (1a, 1b, 2c, 2d);
    c. explaining the relationship of divergent thinking to creative expression (1a, 1b, 2c, 2d);
    d. describing how open ended questioning techniques encourage divergent thinking (1a, 1b);
    e. explaining the relationship of multiple intelligences to creativity (1a, 1b, 2d).
2. Demonstrate an understanding of the role of play in a child's growth and development by:
    a. explaining how play affects the development of children in all domains (1a, 1b, 2d);
    b. contrasting different types of play (1a, 1b, 2c, 2d);
    c. discussing characteristics of social play at different ages (1a, 1b, 1c, 2b).
3. Demonstrate an understanding of developmental sequences for creative arts by:
    a. outlining how children's art develops (1a, 1b, 2c, 2d);
    b. summarizing how musical development occurs (1a, 1b, 2d);
    c. explaining development of movement (gross motor, fine motor, and perceptual awareness skills) in children (1a, 1b, 2c, 2d);
    d. describing development of dramatic play in children (1a, 1b, 2c).
4. Analyze teacher roles in enhancing creativity by:
    a. explaining teacher roles in supporting visual arts in the classroom (1a, 1b, 2a, 2c);
    b. describing teacher roles in providing musical experiences (1a, 1b, 2a, 2c, 2d);
    c. summarizing teacher roles in promoting movement activities (1a, 1b, 2a, 2c, 2d);
    d. outlining teacher roles in encouraging creative dramatics/dramatic play (1a, 1b, 2a, 2c, 2d);
    e. describing how to use assessment information to plan and provide child centered learning activities (1a, 1b, 2a, 2c, 2d).
5. Demonstrate an understanding of creative arts concepts by:
    a. summarizing the role of visual arts, music, movement, and creative drama in the overall development of children (1a, 1b, 2a, 2c, 2d);
    b. outlining concepts learned by children through participating in creative art, music, movement, and dramatic play/creative drama (1a, 1b, 2a, 2c, 2d);
    c. describing strategies for infusing culture through the creative arts curriculum (1a, 1b, 2a, 2c, 2d);
    d. discussing ways that bias might influence children's behavior when participating in art, music, movement, and dramatic play (1a, 1b, 1c, 2b, 2d).
6. Evaluate components of creative environments by:
    a. describing environments that provide children with a wide range of experiences in the visual arts, music, creative drama, and movement (1a, 1b, 2a, 2c, 2d);
    b. discussing the role of aesthetics in environments for children (1a, 1b, 2a, 2c, 2d);
    c. developing materials that will enhance creativity in children (2a).
7. Demonstrate the ability to plan, implement, and assess child centered activities for music, movement, visual arts, and dramatic play by:
    a. implementing meaningful, integrated learning experiences in the arts, music, drama, and movement with other curriculum areas (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. using creative transitions with children (1c, 2a, 2b, 2c);
    c. adapting music, movement, visual arts, and dramatic play to meet the needs of children with special needs (1a, 1b, 1c, 2a, 2b, 2c, 2d).

CDEC 1359 - Children With Special Needs

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A survey of information regarding children with special needs including possible causes and characteristics of exceptionalities, intervention strategies, available resources, referral processes, the advocacy role, and legislative issues.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Summarize causes, incidences and characteristics of exceptionalities related to the domains of development; discuss current terminology and practices for intervention strategies; identify appropriate community resources and referrals for individual children and families; identify legislation and legal mandates and their impact on practices and environments; explain the role of advocacy for children with special needs and their families; and identify materials and resources, including current technology, to support learning in all domains for each and every child. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of causes, incidence, and characteristics of exceptionalities related to the domains of development by:
    a. defining areas of exceptionality and special education (1a, 1b, 2a, 2b, 2c);
    b. identifying exceptionalities as to genetic and/or environmental causes (1a, 1b, 2a, 2c);
    c. discussing different areas of exceptionalities (1a, 2b, 2c);
    d. describing possible signs or characteristics of areas of exceptionalities (1a, 1b, 2b, 2c).
2. Demonstrate an understanding of current terminology and practices for intervention strategies by:
    a. explaining how children develop an awareness of similarities and differences (1a, 1b, 1c, 2b, 2c);
    b. describing learning experiences that promote children's appreciation and respect for all individuals and groups (1a, 1b, 2b, 2c);
    c. explaining available screening and assessment instruments (1a, 1b, 2b, 2c);
    d. identifying individuals and their roles in developing and implementing educational and family service plans (1a, 1b, 2a, 2b, 2c);
    e. discussing integration of goals from Individualized Education Programs (IEPs), Individualized Transition Plans (ITPs), and Individualized Family Service Plans (IFSPs) into daily activities and routines (1a, 1b, 2a, 2b, 2c).
3. Identify appropriate community resources and referrals for individual children and families by:
    a. listing common needs and challenges facing families caring for children with special needs (1a, 1b, 2a, 2b, 2c);
    b. locating information on resources available in the community (1a, 1b, 2a, 2b, 2c);
    c. outlining the cultural implications and their impact on services to children with special needs (1a, 1b, 1c, 2b, 2c).
4. Evaluate legislation and legal mandates and their impact on practices and environments by:
    a. critiquing the history and impact of legislation affecting children with special needs (1a, 1b, 2a, 2b, 2c);
    b. interpreting the impact of landmark court cases on services for children with special needs (1a, 1b, 2a, 2b, 2c).
5. Comprehend the role of advocacy for children with special needs and their families by:
    a. listing agencies which advocate for children with special needs and their families (1a, 1b, 2b, 2c);
    b. explaining the importance of advocating on behalf of children with special needs and their families (1a, 1b, 2a, 2b, 2c);
    c. explaining how the codes of ethical conduct apply to professional practice (1a, 1b, 1c, 2b, 2c).
6. Use various types of materials and resources, including current technology, to support learning in all domains for all children by:
    a. identifying environments, equipment, materials, and supplies to meet individual needs of all children (1a, 1b, 2a, 2b, 2c);
    b. developing rules to build collaborative relationships with other professionals that work as a professional team (1a, 1b, 1c, 2a, 2b, 2c).

Requirements

Simple Requisites

See course description for prerequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take CDEC-1419;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): CDEC 1419

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define developmentally appropriate practices; describe the process of child-centered curriculum development; develop guidelines for creating learning environments; describe teacher roles in early childhood classrooms; prepare a developmentally appropriate schedule including routines and transitions; and select, plan, implement, and evaluate developmentally appropriate learning experiences for children. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of developmentally appropriate practices by:
    a. describing developmentally appropriate practices as they apply to infants/toddlers and preschool and school age children including children with special needs (1a 1b, 2d);
    b. explaining the value of play and its relationship to developmentally appropriate practices (1a, 1b);
    c. characterizing how cultural and linguistic diversity are part of developmentally appropriate practices (1a, 1b, 2a, 2c);
    d. evaluating classrooms to determine their placement on a continuum from developmentally appropriate to inappropriate in relation to room arrangement, activities, materials, and equipment (2c, 2d, 2e).
2. Demonstrate an understanding of the process of child centered curriculum development by:
    a. describing curriculum approaches/models (1a, 1b);
    b. discussing the application of anti-bias curriculum (1a, 1b, 1c, 2b, 2d);
    c. analyzing different approaches to curriculum planning (2c, 2d);
    d. comparing a variety of assessment strategies and their role in the early childhood curriculum (1b, 2a, 2c, 2d);
    e. developing lesson plans for a specific group of children (2a, 2c, 2d);
    f. examining the planning and implementation of curriculum and instruction practices based on knowledge of individual children, the community, and curriculum goals and content (1b, 2a, 2c, 2d);
    g. developing an anti-biased, developmentally appropriate curriculum (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the guidelines for creating developmentally appropriate indoor and outdoor learning environments by:
    a. describing the relationship between children's ages and developmentally appropriate indoor and outdoor learning environments (1a, 1b, 2a);
    b. defining learning centers and/or activity zones both indoors and outdoors and their relationship to learning through play (1a, 1b, 2a, 2c, 2d);
    c. analyzing basic arrangement of learning centers in developmentally appropriate indoor learning environments (2d);
    d. organizing developmentally appropriate outdoor learning environments (2c);
    e. proposing ways to enhance creativity and aesthetics in the environment (2a, 2b).
4. Demonstrate an understanding and application of teacher roles in early childhood classrooms by:
    a. describing various roles of a teacher (1a, 1b);
    b. practicing teacher roles in early childhood classrooms and settings (2a, 2b, 2c, 2d, 2e);
    c. demonstrating the ability to select the appropriate teacher role (1c, 2a, 2b);
    d. constructing indoor and outdoor environments for all children including those with special needs (2a, 2c).
5. Demonstrate an understanding of the preparation of a developmentally appropriate schedule including routines and transitions by:
    a. describing developmentally appropriate routines for use in classrooms (1a, 1b, 2a);
    b. explaining the use of transitions in classrooms (1a, 1b, 2a);
    c. comparing appropriate and inappropriate schedules for infants/toddlers and preschool and school age children (2c, 2d);
    d. developing an appropriate schedule for a specific group of children (1b, 2a).
6. Demonstrate an understanding of the selection, planning, and evaluation of developmentally appropriate learning experiences for children by:
    a. examining developmentally appropriate learning experiences for children (1b, 2a, 2c);
    b. creating developmentally appropriate learning experiences for use with a specific group of children (1b, 2c, 2d, 2e);
    c. assessing developmentally appropriate learning experiences with children (1b, 2a, 2b, 2c, 2d, 2e).

CDEC 1419 - Child Guidance

General

Course Key
12118

Course Rubric	Course Number	Course Title
CDEC	1419	Child Guidance

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) An exploration of guidance strategies for promoting prosocial behaviors with individual and groups of children. Emphasis on positive guidance principles and techniques, family involvement, and cultural influences. Practical application through direct participation with children in a laboratory setting. Required Pre-requisite: TECA-1311 or TECA-1354

View Course Availability on MyTCCTrack

Requirements

Simple Requisites

See course description for prerequisites/co-requisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # Take TECA-1311 or TECA-1354;
A Subrequirement block where all groups are required

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Required Prerequisite(s): TECA 1311 or TECA 1354

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe theories related to child guidance; explain how guidance promotes autonomy, self-discipline, and pro-social skills; identify familial and cultural influences on child guidance; and apply guidance techniques. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of theories related to child guidance by:
    a. outlining a variety of guidance techniques to use with different age children based on developmental needs and abilities (1a, 1b, 2a, 2b, 2c);
    b. listing characteristics of positive interactions and supportive relationships with children at different stages of development (1a, 1b, 2a, 2b, 2c);
    c. contrasting positive and negative forms of guidance (1a, 1b, 2b, 2c);
    d. summarizing children's social development (1a, 1b, 2b, 2c).
2. Demonstrate an understanding of appropriate guidance techniques that promote autonomy, self-discipline, and lifelong social skills in children by:
    a. describing development of self-concept and self-esteem (1b, 2b);
    b. discussing the process of emerging self-discipline (1a, 1b, 2a, 2b, 2c);
    c. listing positive social behaviors which should be encouraged in classroom settings (1b, 2b);
    d. explaining how positive guidance promotes growth and development (1a, 1b);
    e. describing development of moral competence in children (1a, 1b, 2b);
    f. explaining the role of indirect guidance techniques in classroom management (1a, 1b, 2b).
3. Demonstrate an understanding of the importance of families and culture in guiding children by:
    a. discussing anti-bias curriculum goals (1a, 1b, 2a, 2b, 2c);
    b. describing how cultural differences affect guidance (1b, 2c);
    c. explaining the role of culture in children's interactions and responses to conflict (1a, 1b, 2a, 2b, 2c);
    d. describing the importance of working with parents to solve guidance issues (1a, 1b, 2b, 2c);
    e. discussing family issues which may influence children's behaviors and ways to assist children in coping with these stressful or frightening situations (1a, 1b, 2a, 2b).
4. Promote development of positive self-concept and pro-social behaviors in children by:
    a. discussing how a teacher's guidance techniques affect children's self-esteem (1a, 1b, 2b, 2c);
    b. demonstrating techniques teachers can use to facilitate positive social interactions among children (1a, 1b, 2b, 2c).
5. Apply appropriate guidance methods to specific situations relating to children's behaviors by:
    a. recording children's behavior using anecdotal records from observation (1a, 2d);
    b. giving examples of individualized behavior plans that classroom teachers may be given to implement with children with special needs (1b, 2c);
    c. demonstrating appropriate ways of communicating with children (e.g. active listening, I messages, positive statements, etc.) (1a, 1b, 2a, 2b, 2c);
    d. using developmentally appropriate group management strategies to provide an atmosphere that enhances learning (1b, 2b, 2c);
    e. providing environments and learning experiences that promote development of children's trust, autonomy (e.g. decision making, self-assessment and self-help skills, etc.), initiative, industry, and identity (1b, 2b, 2c);
    f. demonstrating skills in classroom management and guidance techniques as they relate to common problem behaviors (e.g. biting, hitting, tantrums, inappropriate language, high activity level, etc.) (1a 1b, 2b, 2c);
    g. recognizing true problem behaviors and identifying professional resources for specific developmental or family needs (1a, 1b, 2a, 2b, 2c).
6. Demonstrate skills in helping children resolve conflicts by:
    a. supporting a classroom culture that fosters trust, caring, cooperation, responsibility, and leadership (1b, 2b, 2c);
    b. implementing principles of conflict resolution (1a, 1b, 2a, 2b, 2c);
    c. demonstrating teamwork skills when guiding children (1a, 1b, 2a, 2b, 2c).

CDEC 2307 - Math and Science for Early Childhood

7066

Course Rubric	Course Number	Course Title
CDEC	2307	Math and Science for Early Childhood

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An exploration of principles, methods, and materials for teaching children math and science concepts and process skills through discovery and play.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Align the sequence of cognitive development to the acquisition of math and science concepts; explain the scientific process and its application to early care and education environments; develop strategies which promote critical thinking and problem-solving skills in children; plan discovery experiences using observation and assessment; and evaluate developmentally appropriate materials, equipment, and environments to support the attainment of math and science concepts and skills. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the relation of the sequence of cognitive development to the acquisition of math and science concepts by:
    a. summarizing the sequential development of mathematical concepts (1a, 1b);
    b. outlining appropriate science concepts for children (1a, 1b);
    c. describing how the development of mathematical concepts promotes children's thinking skills (1a, 1b);
    d. explaining how to promote children's cognitive development and understanding of their world through active, hands on exploration of science concepts and processes (1a, 1b).
2. Demonstrate an understanding of the scientific process and its application to the early childhood indoor and outdoor learning environments by:
    a. explaining how to encourage all children to view themselves as competent scientific explorers (1a, 1b);
    b. describing ways to promote all children's ability to think scientifically (1a, 1b);
    c. summarizing ways to nurture all children's natural curiosity by encouraging them to explore and make discoveries about their world (1a, 1b).
3. Develop strategies which promote thinking and problem solving skills in children by:
    a. explaining how instructional methods involving the use of various types of thinking can enhance children's mathematical and scientific understanding (1a, 1b);
    b. explaining techniques for integrating math and science throughout the curriculum (1a, 1b);
    c. planning developmentally appropriate methods that include play, small group projects, open ended questioning, group discussion, problem solving, cooperative learning, and inquiry experiences to help children develop intellectual curiosity, solve problems, make decisions, and become critical thinkers (1a, 1b).
4. Utilize observation and assessment as a basis for planning discovery experiences for the individual child by:
    a. reviewing a variety of assessment strategies (1a, 1b);
    b. explaining how assessment information is interpreted and used to provide developmentally appropriate learning activities (1a, 1b);
    c. using a variety of assessment strategies to monitor children's progress in achieving outcomes and planning learning activities (1a, 1b).
5. Demonstrate the ability to create, evaluate, and/or select developmentally appropriate materials, equipment, and environments to support the attainment of math and science concepts by:
    a. evaluating children's books, software, manipulatives, music, blocks, and other materials which enhance math and science concepts for developmental appropriateness (1a, 1b, 2c);
    b. describing how to create indoor and outdoor environments that encourage emergent numeracy and scientific literacy by offering children varied, meaningful, and concrete learning experiences (1a, 1b);
    c. discussing how technology can be philosophically and physically integrated to support development of math and science concepts in the curriculum (1a, 1b);
    d. demonstrating the ability to make and use developmentally appropriate, culturally diverse, and nonsexist activities and materials to support development of specific math and science concepts (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe methods to establish positive and productive relationships with families; explain methods to ensure a well-run, purposeful program responsive to participant needs; identify how to maintain a commitment to professionalism; and utilize skills in writing, speaking, problem solving, time management, and record keeping. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify methods to advance physical and intellectual competence by:
    a. offering a variety of activities which enable children to develop their large muscles (1a, 1b);
    b. offering a variety of activities which enable children to develop their small muscles (1a, 1b);
    c. adapting program activities to meet individual and special needs of children with disabilities (1a, 1b, 2b, 2c);
    d. offering children opportunities to develop their senses (1a, 1b);
    e. planning for individual learning styles (1a, 1b, 2c);
    f. providing throughout the day a variety of age appropriate materials and activities that encourage curiosity, exploration, and problem solving (1a, 1b, 2b, 2c);
    g. providing support for play, exploration, and learning (1a, 1b, 2b, 2c);
    h. communicating with each child frequently (1a, 1b, 2c);
    i. encouraging children to talk (1a, 1b, 2c);
    j. communicating with children in developmentally appropriate ways (1a, 1b, 2b, 2c);
    k. responding positively to children's attempts to communicate (1a, 1b, 2b, 2c);
    l. providing a developmentally appropriate, print rich environment in which children learn about books, literature, and writing (1a, 1b, 2b, 2c);
    m. demonstrating appreciation of individual expression and creativity (1a, 1b, 2c);
    n. providing many appropriate musical experiences (1a, 1b);
    o. providing age appropriate, creative, artistic experiences (1a, 1b);
    p. providing dramatic play experiences with a variety of age appropriate props (1a, 1b, 2c);
    q. providing a variety of age appropriate block play opportunities (1a, 1b, 2c).
2. Demonstrate skills in writing, speaking, problem solving, time management, and record keeping by:
    a. communicating thoughts, ideas, information, and messages in writing (1b, 1c, 2a, 2b, 2c);
    b. communicating orally through messages and through participation in discussions and group presentations (1b, 1c, 2a, 2b, 2c);
    c. implementing a plan of action to resolve problems (1b, 1c, 2a, 2b, 2c);
    d. using technical resources to organize and maintain information (1b, 1c, 2a, 2b, 2c).

CDEC 2326 - Admin of Programs for Children I

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop an initial operational plan; identify the functions of an administrator; evaluate an early care and education program. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the planning functions of an administrator by:
    a. explaining different types of early childhood programs (1a, 1b, 2a, 2b, 2c);
    b. describing the functions and roles of the director in various programs (1a, 1b, 2a, 2b, 2c);
    c. explaining the philosophy of administration of a program (1a, 1b, 2b, 2c);
    d. identifying components of a philosophy (1a, 1b, 2b, 2c);
    e. discussing philosophies from various types of programs (1a, 1b, 2b, 2c);
    f. discussing how the philosophy of a program affects the curriculum (1a, 1b, 2b, 2c);
    g. explaining the important role of parents in planning for children (1a, 1b, 2b, 2c);
    h. describing a program philosophy including goals and objectives (1a, 1b, 2b, 2c);
    i. explaining program policies (parent policies, personnel policies, etc.) (1a, 1b, 2b, 2c);
    j. discussing the importance of a parent policy handbook for an early care and education program (1a, 1b, 2b, 2c).
2. Demonstrate the ability to evaluate the operational functions of an administrator by:
    a. discussing the licensing process (1a, 1b, 2b, 2c);
    b. describing licensing regulations (TDFPRS Minimum Standards) (1a, 1b, 2b, 2c);
    c. simulating or participating in a licensing process (1a, 1b, 1c, 2b, 2c);
    d. explaining local, state, and national laws and regulations which impact a program (1a, 1b, 2b, 2c);
    e. identifying resources available to assist programs (1a, 1b, 2a, 2b, 2c);
    f. discussing the impact of developmentally appropriate practices on the operations of a program (1a, 1b, 2b, 2c);
    g. defining accreditation (1a, 1b, 2b, 2c);
    h. examining a fiscal management system (1a, 1b, 2a, 2b, 2c);
    i. discussing the major categories of income and expenses budgeted in an early care and education program (1a, 1b, 2a, 2b, 2c);
    j. explaining a budget for an early care and education program (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an understanding of the supervisory functions of an administrator by:
    a. analyzing staffing needs (1a, 1b, 2a, 2b, 2c);
    b. discussing employment process (job descriptions, recruiting, screening, interviewing, selecting, terminating, etc.) (1a, 1b, 2a, 2b, 2c);
    c. developing an orientation plan (1a, 1b, 2a, 2b, 2c);
    d. evaluating a staff meeting (1a, 1b, 2a, 2b, 2c).
4. Demonstrate the ability to summarize the evaluation functions in an early care and education program by:
    a. summarizing methods to evaluate the program (1a, 1b, 2a, 2b, 2c);
    b. discussing purposes of and methods for staff evaluation and staff development plans (1a, 1b, 2a, 2b, 2c);
    c. discussing techniques for staff evaluation (1a, 1b, 1c, 2a, 2b, 2c);
    d. explaining types of evaluations which can be completed for children (1a, 1b, 2a, 2b, 2c);
    e. analyzing evaluation instruments (1a, 1b, 2a, 2b, 2c);
    f. conducting a program evaluation (1a, 1b, 2a, 2b, 2c).
5. Demonstrate the ability to explore methods of effective communication by:
    a. discussing importance of communicating with staff and families (1a, 1b, 2a, 2b, 2c);
    b. exploring methods of communicating with staff and families (1a, 1b, 2a, 2b, 2c);
    c. implementing a type of parent and/or staff communication (1a, 1b, 2b, 2c);
    d. demonstrating teamwork skills when working with colleagues and families (1a, 1b, 2a, 2b, 2c).
6. Demonstrate skills in writing, speaking, problem solving, time management, and record keeping by:
    a. communicating thoughts, ideas, information, and messages in writing (1b, 1c, 2a, 2b, 2c);
    b. communicating orally through messages and through participation in discussions and group presentations (1b, 1c, 2a, 2b, 2c);
    c. implementing a plan of action to resolve problems (1b, 1c, 2a, 2b, 2c);
    d. using technical resources to organize and maintain information (1b, 1c, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss codes of ethical conduct; explain the administrator's role in advocacy; describe interpersonal management skills; explain legal issues; and evaluate parent involvement strategies. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the codes of conduct by:
    a. identifying the components of a code of conduct (1a, 1b, 2b, 2c);
    b. identifying the administrator's role in implementing a code of conduct (1a, 1b, 2a, 2b, 2c);
    c. defining professionalism (1a, 1b, 2b, 2c).
2. Demonstrate an understanding of communication skills needed to effectively administer an early care and education program by:
    a. listing components of effective communication (1a, 1b, 2b, 2c);
    b. explaining conflict resolution (1a, 1b, 2b, 2c);
    c. explaining the process of team building (1a, 1b, 2a, 2b, 2c);
    d. discussing a type of staff communication (1a, 1b, 2a, 2b, 2c);
    e. demonstrating teamwork skills (1a, 1b, 2b, 2c).
3. Demonstrate an understanding of the importance of parent education/partnerships in early care and education programs by:
    a. identifying techniques for building partnerships with parents (1a, 1b, 2b, 2c);
    b. explaining methods of parent education (1a, 1b, 2b, 2c);
    c. using a technique for providing parent education or building parent partnerships (1a, 1b, 2b, 2c).
4. Demonstrate an understanding of the administrator's role in advocacy by:
    a. defining advocacy (1a, 1b, 2b, 2c);
    b. identifying advocacy strategies (1a, 1b, 2b, 2c);
    c. explaining the accreditation process (1a, 1b, 2b, 2c);
    d. explaining accreditation criteria (1a, 1b, 2b, 2c);
    e. completing self-study tools of an accreditation process (1a, 1b, 2b, 2c);
    f. participating in an advocacy project (1a, 1b, 2b, 2c).
5. Demonstrate an understanding of personnel management skills necessary to administer programs by:
    a. explaining leadership styles (1a, 1b, 2b, 2c);
    b. identifying a style that fits the student as a director (1a, 1b, 2b, 2c);
    c. explaining change and the change process (1a, 1b, 2b, 2c);
    d. defining stress management (1a, 1b, 2b, 2c).
6. Comprehend symptoms of burnout and how to avoid them by:
    a. identifying stages of development for teachers and directors (1a, 1b, 2b, 2c);
    b. identifying staff training needs (1a, 1b, 2a, 2b, 2c);
    c. explaining how to conduct effective staff meetings (1a, 1b, 2a, 2b, 2c);
    d. conducting a well-planned staff meeting (1a, 1b, 2a, 2b, 2c);
7. Describe legal issues which impact programs by:
    a. explaining labor laws (1a, 1b, 2a, 2b, 2c);
    b. explaining issues of negligence and liability (1a, 1b, 2a, 2b, 2c);
    c. listing insurance needs of a program (1a, 1b, 2a, 2b, 2c).
8. Demonstrate an understanding of the fiscal responsibilities of an administrator by:
    a. incorporating tools for marketing a program (1a, 1b, 2a, 2b, 2c);
    b. explaining fundraising efforts to increase revenues for a program (1a, 1b, 2b, 2c);
    c. developing budgets (1a, 1b, 2a, 2b, 2c);
    d. presenting budgets (1a, 1b, 2a, 2b, 2c);
9. Identify current technology and issues in early care and education administration by:
    a. distinguishing technology needs of an early care and education program (1a, 1b, 2b, 2c, 2e);
    b. listing available administrative software (1a, 1b, 2b, 2c, 2d, 2e);
    c. identifying current issues affecting administration of programs (1a, 1b, 2b, 2c).
10. Demonstrate skills in writing, speaking, problem solving, time management, and record keeping by:
    a. communicating thoughts, ideas, information, and messages in writing (1b, 1c, 2a, 2b, 2c);
    b. communicating orally through messages and through participation in discussions and group presentations (1b, 1c, 2a, 2b, 2c);
    c. implementing a plan of action to resolve problems (1b, 1c, 2a, 2b, 2c);
    d. using technical resources to organize and maintain information (1b, 1c, 2a, 2b, 2c).

CDEC 2341 - The School Age Child

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Outline growth and development of the school age child; analyze components of school age programs; and develop materials, activities, and guidance strategies. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of growth and development of the school age child by:
    a. identifying physical and motor development (1a, 1b, 2b, 2c);
    b. describing cognitive development (1a, 1b, 2b, 2c);
    c. describing social development (1a, 1b, 2b, 2c);
    d. discussing emotional development, including self-concept and self-esteem (1a, 1b, 2b, 2c);
    e. describing language and literacy development (1a, 1b, 2b, 2c);
    f. describing principles of growth and development related to a multiage setting (1a, 1b, 2b, 2c).
2. Analyze components of quality school age programs by:
    a. identifying characteristics of quality programs (1a, 1b, 2b);
    b. describing the role of play (1a, 1b);
    c. describing the characteristics of play behaviors, including the relationship between gender and play (1a, 1b, 2b, 2c);
    d. analyzing social and cultural influences which impact school age programs (1a, 1b, 2b);
    e. describing the importance of establishing and maintaining strong, positive communication and collaborative relationships with families and resource professionals, as needed (1a, 1b, 2b, 2c);
    f. identifying appropriate teacher roles and responsibilities for caregivers of school age children (1b, 2b);
    g. describing routines used in school age programs and their importance in meeting children's needs (1a, 1b, 2b);
    h. identifying health and safety issues affecting school age children (1a, 1b, 2b);
    i. demonstrating appropriate schedules (2a, 2b).
3. Demonstrate an understanding of elements of appropriate indoor and outdoor environments by:
    a. identifying developmentally appropriate indoor environments (1a, 1b, 2b, 2c);
    b. describing characteristics of effective room arrangements (1a, 1b, 2b, 2c);
    c. describing developmentally appropriate outdoor environments (1a, 1b, 2b, 2c);
    d. measuring strategies for adapting programs to a variety of settings (1b, 2b, 2c);
    e. listing strategies for adapting environments for children with special needs (1b, 2b, 2c).
4. Produce developmentally appropriate materials and activities by:
    a. providing, through selection and/or making, developmentally appropriate materials for use in school age programs (1a, 1b, 2b, 2c);
    b. arranging assessment to plan and implement developmentally appropriate activities (1a, 1b, 2b, 2c);
    c. preparing strategies for adapting materials and activities to multiage groups and to children with special needs (1b, 2b, 2c);
    d. planning activities to address issues related to bias and diverse cultures (1b, 2b).
5. Use developmentally appropriate teaching and guidance techniques by:
    a. developing appropriate schedules and transitions (1a, 1b, 2b, 2c);
    b. identifying appropriate direct and indirect guidance techniques (1a, 1b, 2b, 2c);
    c. using negotiation and problem solving techniques (1b, 2c);
    d. applying teamwork skills while working with colleagues in school age programs (1a, 1b, 2b, 2c);
    e. applying strategies for working with children in multiage settings (1b, 2c).

Workforce Education Course Manual (WECM)

Description
(3-0-9) A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer. Includes application of early childhood principles, methods, materials, and appropriate guidance techniques for teaching young children in framework which utilizes active learning. Supervised direct application in a laboratory setting. This course serves as the Capstone experience for child development majors. Required Prerequisites: CDEC-1419 and CDEC-1413

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply theory, concepts, and skills promoting child development and learning by:
    a. applying direct and indirect developmentally appropriate guidance methods to specific situations relating to children's behavior (1a, 1b, 2d);
    b. using a variety of assessment strategies to monitor children's progress in achieving outcomes and planning learning activities (1a, 1b, 2c);
    c. applying an understanding of teacher roles and appropriate strategies in early childhood classrooms (2a, 2b, 2c, 2d, 2e);
    d. building relationships involving families in their children's development and learning (1a, 1b, 2a, 2c);
    e. supporting a classroom culture that fosters trust, caring, cooperation, responsibility, and leadership (1b, 2b, 2c).
2. Demonstrate legal and ethical behavior and safety practices by:
    a. exhibiting self-control (1b, 1c, 2b);
    b. exhibiting professionalism as related to the field of child development (1a, 1b, 2b, 2c);
    c. explaining appropriate nutritional needs of children (2a, 2b, 2c, 2d, 2e);
    d. respecting individual family differences and nurturing each child's cultural identity (1a, 1b, 2b, 2c);
    e. describing the purpose, rules, and practices of confidentiality (1a, 1b, 2b, 2c);
    f. understanding state statutes and procedures for reporting child abuse and neglect (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an ability to work effectively as a member of a professional team and exhibit interpersonal skills by:
    a. demonstrating respect (1a, 1b, 2a, 2b, 2c);
    b. practicing leadership skills (1a, 1b, 2b, 2c);
    c. demonstrating professional and ethical behavior (1a, 1b, 2b, 2c);
    d. demonstrating positive, team building management techniques (1a, 1b, 2a, 2b, 2c).
4. Demonstrate an understanding of how to use appropriate written and verbal communication skills by:
    a. communicating thoughts, ideas, information, and messages in writing (1b, 1c, 2a, 2b, 2c);
    b. communicating oral messages and participating in discussions and group presentations (1b, 1c, 2a, 2b, 2c);
    c. implementing a plan of action to resolve problems (1b, 1c, 2a, 2b, 2c);
    d. organizing and maintaining information using technical resources (1b, 1c, 2a, 2b, 2c).

Description
(4-3-3) A study of the fundamentals of direct current including Ohm's law, Kirchhoff's laws and circuit analysis techniques. Must be TSI Met in Algebraic Math pathway.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Required Prerequisite(s): Must be TSI Met in Algebraic Math pathway

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret color codes and other descriptors used in electronics; identify various sources of electricity; compute voltage, current, resistance, and power in DC circuits; measure voltage, current, and resistance in DC circuits; and troubleshooting various circuits and components; and utilize a multimeter and oscilloscope to measure the output

Upon successful completion of this course, students will:

1. Convert various units of measurement by
   a. converting from volts to kilovolts;
   b. converting from inches to millimeters;
   c. converting from the measurement of force (lbs.) to newtons;
   d. converting from horsepower to watts;
   e. converting energy units from kilowatt hours to joules;
   f. converting from amps to milliamps using the proper metric prefixes.
2. Demonstrate an understanding of the relationships between valence shells, free electrons, and conduction by
   a. describing the valence shell as it applies to an atom;
   b. explaining the purpose of free electrons;
   c. explaining the methods of conduction of electricity.
3. Demonstrate an understanding of current, both in conventional and electron flow methods by
   a. defining current using the conventional flow method;
   b. describing current using the electron flow method.
4. Demonstrate an understanding of the function of a battery and its characteristics by
   a. describing a basic battery including its internal construction ;
   b. identifying the battery's schematic symbol;
   c. applying a battery source to a circuit while observing the conventional flow method ;
   d. describing the proper disposal method of all defective batteries.
5. Demonstrate the proper method in measuring both voltage and current in a DC circuit by
   a. demonstrating the application of a digital multimeter (DMM) in measuring voltage across a component or components in an electrical circuit;
   b. demonstrating the application of a DMM in measuring current through a component or branch of components in an electrical circuit;
   c. applying the proper unit label for either voltage or current measurements.
6. Demonstrate an understanding of Ohm's Law by calculating for the unknown quantity while given two of the three variables (V = IR) by
   a. calculating for voltage when only the current and resistance values are given (V = IR) ;
   b. calculating for current when only the voltage and resistance values are given (I = V/R) ;
   c. calculating for resistance when only the current and voltage values are given (R = V/I).
7. Apply knowledge of Kirchoff's Voltage Law (KVL) and Kirchoff's Current Law (KCL) to the analysis of DC and AC circuits by
   a. applying the KVL to determine the voltage applied to a series circuit (2c);
   b. applying the KCL to determine the currents through parallel components in a parallel circuit (2c);
   c. utilizing both KVL and KCL to analyze a series, parallel combinational circuit (2c).
8. Apply knowledge of resistors to the analysis of electronic circuits by
   a. identifying the different types of resistors;
   b. inspecting different resistors visually to determine wattage values ;
   c. performing lab experiments demonstrating the applications of various resistors ;
   d. demonstrating the use of nonlinear devices such as varistors and diodes;
   e. determining the resistance value of an individual resistor using the resistor's color code;
   f. measuring the resistance values using an ohmmeter and compare to the calculated values.
9. Demonstrate troubleshooting skills while building circuits on a protoboard by
   a. using a solderless breadboard, a protoboard, to set up series, parallel, and combinational circuits;
   b. practicing good safety habits while using external power supplies and other test equipment;
   c. performing lab experiments using knowledge learned in the classroom.
10. Demonstrate troubleshooting skills for voltage dividers and current dividers by
    a. use voltage dividers in a series circuits;
    b. use current dividers in a parallel circuits.
    c. plotting voltage vs. frequency in the resonant circuit (2c);
    d. using PSpice and/or Electronic Workbench to create graphs and plotting of the resonant circuit (2e).
11. Identify transformer circuit quantities by
    a. explaining the concept of mutual inductance (1b);
    b. explaining the concept of impedance matching using a transformer (1b);
    c. reading and explaining the nameplate data of a transformer (1b);
    d. determining the turns ratio of a transformer (1b);
    e. explaining the operation of a tapped, multiple load, and autotransformer (1b).
12. Calculate voltage, current, and power relationships in transformer circuits by
    a. calculating the coefficient of coupling between two mutually coupled coils (1b);
    b. calculating the step up or step down voltage and current of a given transformer (1a);
    c. calculating the primary and secondary power of a given transformer (1a);
    d. using PSpice or Electronics Workbench to simulate the behavior of a transformer (2e).
13. Demonstrate an understanding of AC three phase circuit configuration quantities by
    a. explaining the use of phasor diagrams for calculating three phase voltage and current (1b);
    b. explaining the difference between wye connected and delta connected generators (1b);
    c. explaining the difference between wye connected and delta connected loads (1b);
    d. illustrating the connections of wye connected and delta connected configurations (1b);
    e. explaining the method of making power measurements in a three phase system (1b).
14. Demonstrate the ability to calculate the voltage, current, and power relationships in three phase circuit configurations by
    a. calculating the phasor voltages resulting from three phase circuits (1a);
    b. calculating the phasor currents resulting from three phase circuits (1a);
    c. calculating the power resulting from three phase circuits (1a);
    d. calculating the power factor of different types of three phase circuit configurations (1a);
    e. using PSpice and/or Electronics Workbench to simulate the behavior of a three phase circuit (2e);
    f. using MathCad to verify manual calculations previously performed (2e).

Requirements

Requirements
Required Prerequisite(s): Must be TSI Met in Algebraic Math pathway

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Operate test equipment including oscilloscope; identify various sources of electricity; analyze AC circuits using applicable mathematical formulas; and troubleshoot various AC circuits using schematic diagrams.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of sinusoidal waveforms by describing the alternating current (AC) waveform properties by
   a. calculating the following values: peak, peak to peak, instantaneous value average, RMS, period, and frequency;
   b. determining the phase difference between two AC waveforms and identifying the lead waveform;
   c. measuring the amplitude, frequency, and phase of AC waveforms using an oscilloscope.
2. Demonstrate an understanding of the basic phasor quantities by using equations for reactance to calculate AC circuit properties by
   a. calculating inductive reactance and capacitive reactance;
   b. plotting inductance and capacitance as a function of frequency;
   c. using a scientific calculator to calculate AC reactance quantities.
3. Perform AC circuit calculations using the basic phasor elements by
   a. calculating AC circuit quantities for circuits with resistance, capacitance, or inductance;
   b. diagramming AC circuit quantities for circuits with resistance, capacitance, or inductance;
   c. creating an impedance triangle from the phasor elements.
4. Measure AC circuit quantities involving the basic phasor elements by
   a. measuring AC voltage and current in a purely resistive circuit using a digital multimeter (DMM) and oscilloscope (scope);
   b. measuring AC voltage and current in a circuit containing capacitance using a DMM and scope;
   c. measuring AC voltage and current in a circuit containing inductance using a DMM and scope.
5. Calculate AC circuit quantities for AC series, parallel, and combinational circuits by
   a. calculating the current value through a series, parallel, or combinational AC circuit;
   b. calculating the voltage values in a series, parallel, or combinational AC circuit;
   c. calculating the power utilized in a series, parallel, or combinational AC circuit;
   d. calculating total impedance of series connected elements in an AC circuit;
   e. calculating the total admittance of parallel connected elements in an AC circuit.
6. Perform power calculations in AC circuits by
   a. calculating and plotting AC resistive power;
   b. calculating and plotting AC inductive reactive power;
   c. calculating and plotting AC capacitive reactive power;
   d. calculating and plotting AC total or apparent power;
   e. calculating the power factor (1a);
   f. using computer simulation software and MathCAD to determine the AC power quantities.
7. Perform calculations on AC series resonant circuits by
   a. calculating the series resonant frequency;
   b. calculating the current and voltages at resonant frequency;
   c. determining the bandwidth of a series resonant circuit;
   d. calculating the upper and lower cutoff frequencies for a series resonant circuit.
8. Plot AC series resonant circuit relationships by
   a. plotting current vs. frequency in the resonant circuit;
   b. plotting voltage vs. frequency in the resonant circuit;
   c. Electronic Workbench to create graphs and plotting of the resonant circuit.
9. Identify transformer circuit quantities by
   a. explaining the concept of mutual inductance;
   b. explaining the concept of impedance matching using a transformer;
   c. reading and explaining the nameplate data of a transformer;
   d. determining the turns ratio of a transformer;
   e. explaining the operation of a tapped, multiple load, and autotransformer.
10. Calculate voltage, current, and power relationships in transformer circuits by
    a. calculating the coefficient of coupling between two mutually coupled coils;
    b. calculating the step up or step down voltage and current of a given transformer;
    c. calculating the primary and secondary power of a given transformer;
    d. Electronics Workbench to simulate the behavior of a transformer.
11. Demonstrate an understanding of AC three phase circuit configuration quantities by
    a. explaining the use of phasor diagrams for calculating three phase voltage and current;
    b. explaining the difference between wye connected and delta connected generators;
    c. explaining the difference between wye connected and delta connected loads;
    d. illustrating the connections of wye connected and delta connected configurations;
    e. explaining the method of making power measurements in a three phase system.
12. Demonstrate the ability to calculate the voltage, current, and power relationships in three phase circuit configurations by
    a. calculating the phasor voltages resulting from three phase circuits;
    b. calculating the phasor currents resulting from three phase circuits;
    c. calculating the power resulting from three phase circuits;
    d. calculating the power factor of different types of three phase circuit configurations;
    e. Electronics Workbench to simulate the behavior of a three phase circuit.

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3) Fundamentals of DC circuits and AC circuits operation including Ohm's law, Kirchhoff's laws, networks, transformers, resonance, phasors, capacitive and inductive and circuit analysis techniques. Emphasis on circuit simulation using PSpice. Course includes soldering techniques, hand tools, circuit fabrication techniques, troubleshooting techniques and circuit analysis using Mathcad. For majors in Electronics and Telecommunications Technology, computer Hardware Technology, and Robotics and Automation Technology. Required Prerequisite: TSI Met in Algebraic Math pathway

View Course Availability on MyTCCTrack

Required Prerequisite(s): TSI-Met in Algebraic Math pathway

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Construct and analyze DC and AC circuits from simple to complex; perform test measurements; and utilize a multimeter and oscilloscope to differentiate between two AC signals with respect to voltage, current, and power.

1. Convert various units of measurement by

a. converting from volts to kilovolts (1a);

b. converting from inches to millimeters (1a);

c. converting from the measurement of force (lbs.) to newtons (1a);

d. converting from horsepower to watts (1a);

e. converting energy units from kilowatt hours to joules (1a);

f. converting from amps to milliamps using the proper metric prefixes (1a).

2. Conduct circuit analysis with the aid of computer software by

a. designing and testing circuits using Pspice (2c);

b. applying MathCad software to the analysis of DC-AC circuits (2c).

3. Demonstrate an understanding of the relationships between valence shells, free electrons, and conduction by

a. describing the valence shell as it applies to an atom (1b);

b. explaining the purpose of free electrons (1b);

c. explaining the methods of conduction of electricity (1b).

4. Demonstrate an understanding of conductors, insulators, and semiconductors and give examples of each by

a. listing the characteristics of conductors, insulators, and semiconductors (1a);

b. giving examples of conductors, insulators, and semiconductors (1a).

5. Demonstrate an understanding of electromotive force (EMF) by

a. listing the sources of EMF (1b);

b. describing the effects caused by EMF (1b);

c. defining the unit of measurement of EMF, which is the volt (1b).

6. Demonstrate an understanding of current, both in conventional and electron flow methods by

a. defining current using the conventional flow method (1b);

b. describing current using the electron flow method (1b).

7. Demonstrate an understanding of the function of a battery and its characteristics by

a. describing a basic battery including its internal construction (1a);

b. identifying the battery's schematic symbol (1a);

c. applying a battery source to a circuit while observing the conventional flow method (1a);

d. describing the proper disposal method of all defective batteries (2a).

8. Demonstrate the proper method in measuring both voltage and current in a DC circuit by

a. demonstrating the application of a digital multimeter (DMM) in measuring voltage across a component or components in an electrical circuit (2e);

b. demonstrating the application of a DMM in measuring current through a component or branch of components in an electrical circuit (2e);

c. applying the proper unit label for either voltage or current measurements (2c).

9. Demonstrate an understanding of Ohm's Law by calculating for the unknown quantity while given two of the three variables (V = IR) by

a. calculating for voltage when only the current and resistance values are given (V = IR) (1a);

b. calculating for current when only the voltage and resistance values are given (I = V/R) (1a);

c. calculating for resistance when only the current and voltage values are given (R = V/I) (1a).

10. Apply knowledge of Kirchoff's Voltage Law (KVL) and Kirchoff's Current Law (KCL) to the analysis of DC and AC circuits by

a. applying the KVL to determine the voltage applied to a series circuit (2c);

b. applying the KCL to determine the currents through parallel components in a parallel circuit (2c);

c. utilizing both KVL and KCL to analyze a series, parallel combinational circuit (2c).

11. Apply knowledge of resistors to the analysis of electronic circuits by

a. identifying the different types of resistors (1a);

b. inspecting different resistors visually to determine wattage values (1a);

c. performing lab experiments demonstrating the applications of various resistors (1b);

d. demonstrating the use of nonlinear devices such as varistors and diodes (1b);

e. determining the resistance value of an individual resistor using the resistor's color code (1b);

f. measuring the resistance values using an ohmmeter and compare to the calculated values (2e).

12. Demonstrate troubleshooting skills while building circuits on a protoboard by

a. using a solderless breadboard, a protoboard, to set up series, parallel, and combinational circuits (2e);

b. practicing good safety habits while using external power supplies and other test equipment (1c);

c. performing lab experiments using knowledge learned in the classroom (1b).

13. Demonstrate knowledge of sinusoidal waveforms by describing the alternating current (AC) waveform properties by

a. calculating the following values: peak, peak to peak, instantaneous value, average, RMS, period, and frequency (1a);

b. determining the phase difference between two AC waveforms and identifying the lead waveform (1b);

c. measuring the amplitude, frequency, and phase of AC waveforms using an oscilloscope (1b).

14. Demonstrate an understanding of the basic phasor quantities by using equations for reactance to calculate AC circuit properties by

a. calculating inductive reactance and capacitive reactance (1a);

b. plotting inductance and capacitance as a function of frequency (2c);

c. using a scientific calculator to calculate AC reactance quantities (2e).

15. Use computer software to calculate and plot AC circuit analysis quantities by

a. using MathCad to calculate AC quantities (2e);

b. using PSpice and/or Electronics Workbench to simulate the behavior of AC circuits and plot the results (2e);

c. determining AC circuit quantities using a high level computer programming language (2e).

16. Perform AC circuit calculations using the basic phasor elements by

a. calculating AC circuit quantities for circuits with resistance, capacitance, or inductance (2c);

b. diagramming AC circuit quantities for circuits with resistance, capacitance, or inductance (2c);

c. creating an impedance triangle from the phasor elements (2c).

17. Measure AC circuit quantities involving the basic phasor elements by

a. measuring AC voltage and current in a purely resistive circuit using a digital multimeter (DMM) and oscilloscope (scope) (2e);

b. measuring AC voltage and current in a circuit containing capacitance using a DMM and scope (2e);

c. measuring AC voltage and current in a circuit containing inductance using a DMM and scope (2e).

18. Calculate AC circuit quantities for AC series, parallel, and combinational circuits by

a. calculating the current value through a series, parallel, or combinational AC circuit (1a);

b. calculating the voltage values in a series, parallel, or combinational AC circuit (1a);

c. calculating the power utilized in a series, parallel, or combinational AC circuit (1a);

d. calculating total impedance of series connected elements in an AC circuit (1a);

e. calculating the total admittance of parallel connected elements in an AC circuit (1a).

19. Perform power calculations in AC circuits by

a. calculating and plotting AC resistive power (2c);

b. calculating and plotting AC inductive reactive power (2c);

c. calculating and plotting AC capacitive reactive power (2c);

d. calculating and plotting AC total or apparent power (2c);

e. calculating the power factor (1a);

f. using computer simulation software and MathCAD to determine the AC power quantities (2e).

20. Perform calculations on AC series resonant circuits by

a. calculating the series resonant frequency (1b);

b. calculating the current and voltages at resonant frequency (1b);

c. determining the bandwidth of a series resonant circuit (1b);

d. calculating the upper and lower cutoff frequencies for a series resonant circuit (1b);

e. using MathCad to verify manual calculations (2e).

21. Plot AC series resonant circuit relationships by

a. plotting current vs. frequency in the resonant circuit (2c);

b. plotting voltage vs. frequency in the resonant circuit (2c);

c. using PSpice and/or Electronic Workbench to create graphs and plotting of the resonant circuit (2e).

22. Identify transformer circuit quantities by

a. explaining the concept of mutual inductance (1b);

b. explaining the concept of impedance matching using a transformer (1b);

c. reading and explaining the nameplate data of a transformer (1b);

d. determining the turns ratio of a transformer (1b);

e. explaining the operation of a tapped, multiple load, and autotransformer (1b).

23. Calculate voltage, current, and power relationships in transformer circuits by

a. calculating the coefficient of coupling between two mutually coupled coils (1b);

b. calculating the step up or step down voltage and current of a given transformer (1a);

c. calculating the primary and secondary power of a given transformer (1a);

d. using PSpice or Electronics Workbench to simulate the behavior of a transformer (2e).

24. Demonstrate an understanding of AC three phase circuit configuration quantities by

a. explaining the use of phasor diagrams for calculating three phase voltage and current (1b);

b. explaining the difference between wye connected and delta connected generators (1b);

c. explaining the difference between wye connected and delta connected loads (1b);

d. illustrating the connections of wye connected and delta connected configurations (1b);

e. explaining the method of making power measurements in a three phase system (1b).

25. Demonstrate the ability to calculate the voltage, current, and power relationships in three phase circuit configurations by

a. calculating the phasor voltages resulting from three phase circuits (1a);

b. calculating the phasor currents resulting from three phase circuits (1a);

c. calculating the power resulting from three phase circuits (1a);

d. calculating the power factor of different types of three phase circuit configurations (1a);

e. using PSpice and/or Electronics Workbench to simulate the behavior of a three phase circuit (2e);

f. using MathCad to verify manual calculations previously performed (2e).

Required Prerequisite(s): CETT-1409 or CETT-1403 and CETT-1405 and TSI Met in Algebraic Math pathway

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Construct, analyze, test, and troubleshoot circuits containing various semiconductor devices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a working knowledge of diodes by
   a. comparing the forward and reverse resistance of a diode (1a, 1b, 2e);
   b. examining and drawing the output waveform for the half wave rectifier circuit (1a, 1b, 2e);
   c. examining and drawing the output waveform for the full wave rectifier circuit (1a, 1b, 2e);
   d. examining and drawing the output waveform for the full wave bridge rectifier circuit (1a, 1b, 2d, 2e);
   e. analyzing and measure the output of a clipper and a clamper circuit (1a, 1b, 2d, 2e);
   f. analyzing the output of a zener diode voltage regulator circuit under varying loads (1a, 1b, 2e);
   g. displaying ability to configure a seven segment diode to display the number 4 (1a, 1b, 2d, 2e).
2. Demonstrate a working knowledge of bipolar junction transistor circuits by
   a. constructing and analyzing bipolar junction transistor circuits (1a, 1b, 2e);
   b. constructing and analyzing bipolar junction transistor switching circuits (1a, 1b, 2e);
   c. constructing and analyzing a base biased transistor circuit (1a, 1b, 2e);
   d. analyzing and constructing the voltage divider biased amplifier (1a, 1b, 2e);
   e. analyzing and constructing the common collector amplifier (1a, 1b, 2e);
   f. analyzing and constructing the common base amplifier (1a, 1b, 2e).
3. Demonstrate a working knowledge of Field Effect Transistor circuits by
   a. contrasting the JFET with the Bipolar Transistor (1a, 1b, 2d, 2e);
   b. determining the IDSS current using the transconductance curves for a JFET (1a, 1b, 2d, 2e);
   c. explaining how the Q-point changes as the transconductanced curve of the JFET changes (1a, 1b, 2d, 2e);
   d. designing and constructing a JFET amplifier using voltage divider biasing (1a, 1b, 2d, 2e).
4. Demonstrate an understanding of MOSFETS by
   a. describing the theory of the D-MOSFET (1a, 1b, 2d, 2e);
   b. analyzing D-MOSFET amplifier circuits (1a, 1b, 2d, 2e);
   c. constructing a D-MOSFET amplifier circuit and measuring circuit values (1a, 1b, 2d, 2e);
   d. constructing an E-MOSFET amplifier circuit and measuring circuit values (1a, 1b, 2d, 2e).
5. Demonstrate an understanding of thyristor circuits by
   a. describing the theory of the thyristor (1a, 1b, 2d, 2e);
   b. describing how the SCR differs from the thyristor (1a, 1b, 2d, 2e);
   c. describing how the TRIAC differs from the SCR (1a, 1b, 2d, 2e);
   d. displaying ability to draw a current versus voltage graph for a DIAC (1a, 1b, 2d, 2e);
   e. describing how a Shockley diode functions in the forward biased direction (1a, 1b, 2d, 2e);
   f. describing how the UJT relaxation oscillator operates (1a, 1b, 2d, 2e);
   g. constructing and analyzing an SCR phase control circuit (1a, 1b, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define terms applicable to microprocessor/microcontroller systems; program applications for microprocessor/microcontroller systems; write a program to control microprocessor/microcontroller systems; describe the purpose of microprocessor internal registers.

1. Demonstrate a working knowledge of number systems by

a. counting to 15 in binary (1a, 1b, 2d, 2e);

b. converting binary numbers to hexadecimal numbers (1a, 1b, 2d, 2e);

c. using assembly language to find the complement of a number (1a, 1b, 2d, 2e);

d. using assembly language to find the twos complement difference (1a, 1b, 2d, 2e).

2. Demonstrate a working knowledge of microcontrollers by

a. explaining the program counter and its purpose (1a, 1b, 2d, 2e);

b. explaining the purpose of the general purpose registers (1a, 1b, 2d, 2e);

c. explaining the special function registers in a PIC microcontroller (1a, 1b, 2d, 2e);

d. contrasting the Von Neumann architecture and the Harvard architecture (1a, 1b, 2d, 2e);

e. explaining bank switching and how it is done (1a, 1b, 2d, 2e);

f. explaining the purpose of the W register in a PIC microcontroller (1a, 1b, 2d, 2e);

g. explaining the purpose of the STATUS register in a PIC microcontroller (1a, 1b, 2d, 2e);

h. demonstrating a working knowledge of the instruction set for the PIC16f series of the PIC (1a, 1b, 2d, 2e).

3. Demonstrate an understanding of the PIC instructions by

a. writing code to set up a port as an input or output port for digital data (1a, 1b, 2d, 2e);

b. writing data to a port (1a, 1b, 2d, 2e);

c. switching between data memory banks (1a, 1b, 2d, 2e);

d. declaring variables and constants (1a, 1b, 2d, 2e);

e. reading digital data from a port (1a, 1b, 2d, 2e).

4. Demonstrate an understanding of writing program by

a. determining the program cycle time for each instruction (1a, 1b, 2d, 2e);

b. calculating the time used by a program loop (1a, 1b, 2d, 2e);

c. writing code to loop back to the start of a loop (1a, 1b, 2d, 2e);

d. writing time delay loops (1a, 1b, 2d, 2e);

e. explaining the advantages of using loops over linear programming (1a, 1b, 2d, 2e).

5. Demonstrate an understanding of subroutines by

a. describing the anatomy of a subroutine (1a, 1b, 2d, 2e);

b. explaining the advantages of a subroutine (1a, 1b, 2d, 2e);

c. explaining why the return is necessary for the subroutine to operate properly (1a, 1b, 2d, 2e);

d. demonstrating how to access a subroutine (1a, 1b, 2d, 2e);

e. discussing the use of the stack as it pertains to the subroutine (1a, 1b, 2d, 2e).

6. Demonstrate an understanding of assembly language programming by

a. using lookup tables to access data (1a, 1b, 2d, 2e);

b. using interrupts to access control of a program from outside the processor (1a, 1b, 2d, 2e);

c. demonstrating writing and using macros in programs (1a, 1b, 2d, 2e);

d. interfacing to peripheral devices such as the seven segment display or an LCD display (1a, 1b, 2d, 2e);

e. writing de-bounce programs to input data from a switch (1a, 1b, 2d, 2e);

f. using internal timers (1a, 1b, 2d, 2e).

7. Demonstrate an understanding of embedded C programming by

a. describing the anatomy of a while loop (1a, 1b, 2d, 2e);

b. describing the anatomy of a for loop (1a, 1b, 2d, 2e);

c. explaining the advantages of the if-else statement (1a, 1b, 2d, 2e);

d. identifying the advantages and disadvantages of C programming over assembly language (1a, 1b, 2d, 2e);

e. describing the anatomy of a function (1a, 1b, 2d, 2e);

f. comparing the function and the subroutine (1a, 1b, 2d, 2e).

Required Prerequisite(s): TSI-Met in Algebraic Math pathway

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze and troubleshoot digital systems.

1. Demonstrate an understanding of the binary and hexadecimal number systems with digital circuits by

a. converting from binary to hexadecimal (1a);

b. converting from binary to decimal (1a);

c. converting from hexadecimal to binary (1a);

d. converting from decimal to binary (1a).

2. Perform computer arithmetic by

a. adding binary numbers (1a);

b. subtracting binary numbers using twos complement notation (1a).

3. Demonstrate an understanding of the use of Boolean algebra in digital electronics by

a. explaining the use of letters and words to represent unknown voltages on schematics (1a);

b. identifying the Boolean operators and their truth tables (1a).

4. Design digital circuits using gates by

a. identifying the different gate symbols and their truth tables (1a);

b. converting a Boolean equation to a schematic and a schematic to a Boolean equation (1a, 1b);

c. designing digital circuits with gates using discrete logic (1a, 1b);

d. designing digital circuits with gates using a PLD (1a, 1b).

5. Fabricate digital circuits using gates by

a. fabricating digital circuits with gates using discrete logic (1b, 2e);

b. fabricating circuits with gates using a PLD (1b, 2e).

6. Troubleshoot digital circuits using gates by

a. troubleshooting digital circuits with gates using discrete logic (1a, 1b);

b. troubleshooting digital circuits with gates using a PLD (1a, 1b).

7. Design digital circuits using flip-flops by

a. identifying the different flip-flop symbols and their truth tables (1a);

b. designing digital circuits with flip-flops using discrete logic (1a, 1b);

c. designing digital circuits with gates using a PLD (1a, 1b).

8. Fabricate digital circuits using flip-flops by

a. fabricating digital circuits with flip-flops using discrete logic (1b, 2e);

b. fabricating digital circuits with gates using a PLD (1b, 2e).

9. Troubleshoot digital circuits using flip-flops by

a. troubleshooting digital circuits with flip-flops using discrete logic (1a, 1b);

b. troubleshooting circuits with gates using a PLD (1a, 1b).

10. Demonstrate an understanding of classical digital circuits by

a. describing classical digital circuits that use only gates (1a, 1b);

b. describing classical digital circuits that use only flip-flops (1a, 1b);

c. describing classical digital circuits that use gates and flip-flops (1a, 1b).

(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CETT 1445

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design a microprocessor controlled interface; assemble hardware; write program to perform a practical application; explain the operation of a programmable interfacing chip; and configure a programmable interfacing chip.

1. Demonstrate an understanding of analog to digital conversion (ADC) by

a. inputting an analog voltage into the microprocessor's analog to digital converter and retrieving a digital representation of that input voltage (1a, 1b, 2a, 2c, 2d, 2e);

b. developing a subroutine to convert the binary representation of the input voltage to a useable BCD value (1a, 1b, 2a, 2c, 2d, 2e);

c. creating a subroutine to clear the CRT terminal screen for information display (1a, 1b, 2a, 2c, 2d, 2e);

d. creating a subroutine to display the input voltage on the screen (1a, 1b, 2a, 2c, 2d, 2e);

e. constructing the necessary interface circuitry to input a 0 to 50V input without overdriving the ADC input to the microprocessor (1a, 1b, 2a, 2c, 2d, 2e).

2. Demonstrate an understanding of digital to analog conversion (DAC) by

a. developing a menu driven program to select various analog outputs (1a, 1b, 2a, 2c, 2d, 2e);

b. writing subroutines to output various analog outputs (1a, 1b, 2a, 2c, 2d, 2e);

c. building a digital to analog converter (1a, 1b, 2a, 2c, 2d, 2e).

3. Demonstrate an understanding of a multitasking computer system by

a. interfacing a LCD display to the microprocessor (1a, 1b, 2a, 2c, 2d, 2e);

b. developing a subroutine to take advantage of the handshaking feature of the LCD display (1a, 1b, 2a, 2c, 2d, 2e);

c. programming the microprocessor to output all data to the LCD display (1a, 1b, 2a, 2c, 2d, 2e);

d. retrieving data from the keyboard and display said data on the LCD display (1a, 1b, 2a, 2c, 2d, 2e);

e. playing a computer generated song simultaneously on a speaker without interruption (1a, 1b, 2a, 2c, 2d, 2e).

4. Demonstrate an understanding of real time software interrupts by

a. using the onboard real time interrupt capability of the microprocessor to keep time (1a, 1b, 2a, 2c, 2d, 2e);

b. setting up memory locations for storing seconds, minutes, and hours for display on a LCD display (1a, 1b, 2a, 2c, 2d, 2e);

c. developing software to allow for input of time and other data for display on the LCD display (1a, 1b, 2a, 2c, 2d, 2e).

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

1. Complete paperwork for employment by

a. completing a job application (1a);

b. organizing a resume (1a);

c. composing a two week resignation letter (if necessary) (1a).

2. Become employed in the culinary arts field at an approved site by

a. completing an interview with the hiring company (1c);

b. becoming hired as an employee in a foodservice company (1b);

c. completing 224 hours of work in 16 week semester (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Illustrate work experience in a written project by

a. summarizing weekly experience on time sheets (1a, 1b);

b. sketching kitchen of employment (1a, 1b, 2e);

c. outlining menus, organizational charts of front and back of the house, management styles, and history of company (1a, 1b, 2c, 2d).

4. Evaluate experience by

a. preparing self-evaluation (1a, 1b, 1c);

b. preparing worksite evaluation (1a, 2d);

c. preparing practicum experience evaluation (1a, 1b).

Requirements
Recommended Prerequisite(s) or Corequisite(s): CHEF 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate skills in knife, tool and equipment handling, and operate equipment safely and correctly; demonstrate proficiency in dry and moist heat cooking methods; produce a variety of food products applying principles of food handling and preparation; implement professional standards in food production.

1. Demonstrate an understanding of areas of culinary history and professionalism by

a. identifying the forefathers of culinary arts and how they have shaped the industry today (1a);

b. explaining the organization of classic and modern kitchen brigades (1a, 2d);

c. demonstrating principles of culinary professionalism in labs and practical exams (1b, 1c, 2a, 2b).

2. Practice procedures of sanitation and safety by

a. identifying causes of food borne illness (1a);

b. planning flow of foods in accordance to food safety standards (1b);

c. using a safe and sanitary work environment (1a, 2a, 2d).

3. Apply fundamental principles of nutrition by

a. explaining importance of categories of nutrients in a healthy diet (1a, 1b);

b. identifying nutrition trends that affect food service (1a, 1b);

c. applying use of alternative ingredients and substitutes in recipes/menus (1a, 2a).

4. Demonstrate skills of equipment and small ware operation by

a. identifying a variety of professional kitchen tools and equipment of use (1a, 2e);

b. demonstrating care for knives (2a);

c. explaining how a professional kitchen is organized (1a, 1b, 2d).

5. Explain common kitchen staples and their uses by

a. describing basic principles of the physiology of the sense of taste and smell (1a);

b. identifying a variety of herbs, spices, oils, vinegars, wines, and other flavorings (1a);

c. demonstrating proper use of flavoring ingredients to create, enhance, or alter the natural flavors of a dish (1b, 2a).

6. Demonstrate working knowledge of basic culinary techniques by

a. using principles of mise en place (1a, 1b, 2e);

b. preparing items needed prior to actual cooking (2a);

c. demonstrating scaling techniques (2e);

d. modifying recipe yield amounts (1a, 1b);

e. demonstrating ability to perform all knife cuts from memory (2a).

7. Summarize principles of cooking by

a. explaining how heat is transferred to foods through conduction, convection, and radiation (1a);

b. explaining how heat affects foods (1a);

c. identifying the basic principles of various cooking methods (1a, 1b).

8. Demonstrate cooking methods by

a. using principles of dry and moist combination cooking methods (1a, 2a);

b. preparing stock, soups, and sauces (1a, 2a);

c. using principles of egg cookery (1a, 2a);

d. using principles of meat cookery - beef, poultry, pork, veal, and lamb (1a, 2a).

CHEF 1302 - Principles of Healthy Cuisine

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Modify recipes and substitute ingredients to reduce calories, sugar, fat, and sodium; create recipes using healthy techniques; identify common food allergies and special dietary needs; relate nutritional guidelines to diets and recipe production.

1. Demonstrate working knowledge of basic culinary techniques by

a. assembling equipment for use (2e);

b. demonstrating equipment operation (2e);

c. demonstrating hand tool usage (2e);

d. demonstrating sanitation and safety practices (2d);

e. demonstrating proper use/care of knives (2e);

f. demonstrating proper mise en place of ingredients (1a, 1b, 1c, 2a);

g. converting recipes (1a, 1b);

h. demonstrating cooking methods - dry, moist and combination (1b, 2c, 2e);

i. demonstrating scaling techniques (1b, 2c, 2e).

2. Identify key nutrition concepts and terms by

a. defining nutrition (1a, 1b);

b. discussing nutrition as the study of foods and health (1a, 1b).

3. Modify recipes and substitute ingredients to reduce calories, sugar, fat, and sodium by

a. modifying recipes to make them healthier in accordance with the Dietary Guidelines for Americans and USDA My Plate (1a, 1b, 2a, 2b, 2c);

b. utilizing ingredients and techniques that produce a more healthy cuisine (1a, 1b, 2a, 2b, 2c);

c. preparing healthful recipes utilizing ingredients and techniques to produce healthy cuisine (1a, 1b, 2a, 2b, 2c).

4. Identify common food allergies and special dietary needs by

a. discussing common food allergies (1a, 1b);

b. discussing special diets - spa, vegetarian, modified (1a, 1b).

5. Produce food presentations by

a. demonstrating buffet service techniques (1b, 2c);

b. demonstrating plate presentation (1b, 2c);

c. demonstrating various garnish techniques (1b, 2c).

6. Demonstrate proficient preparation of foods by

a. prepping (handling, cleaning, cutting, portioning, cooking/cooking with, and presenting) appetizers, salads, and salad dressings (1a, 1b, 2a);

b. prepping (handling, cleaning, cutting, portioning, cooking/cooking with, and presenting) stocks, soups, sauces, relishes, and spreads (1a, 1b, 2a);

c. prepping (handling, cleaning, cutting, portioning, cooking/cooking with, and presenting) main course selections (1a, 1b, 2a);

d. prepping (handling, cleaning, cutting, portioning, cooking/cooking with, and presenting) vegetables, potatoes, grains, and legumes (1a, 1b, 2a);

e. prepping (handling, cleaning, cutting, portioning, cooking/cooking with, and presenting) desserts, breads, and quick breads (1a, 1b, 2a).

7. Demonstrate menu planning procedures/execution by

a. planning a menu according to guidelines (1a, 1b, 2a, 2b, 2c);

b. converting recipes (1a, 1b, 2a, 2b, 2c);

c. creating an ingredient list needed (1a, 1b, 2a, 2b, 2c);

d. executing production of menu (1a, 1b, 2a, 2b, 2c);

e. critiquing performance (1a, 1b, 2a, 2b, 2c).

CHEF 1305 - Sanitation and Safety

11754

Course Rubric	Course Number	Course Title
CHEF	1305	Sanitation and Safety

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of personal cleanliness; sanitary practices in food preparation; causes, investigation and control of illness caused by food contamination (Hazard Analysis Critical Control Points); and work place safety standards.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify causes of and prevention procedures for food-borne illness, intoxication, and infection; discuss personal hygiene and safe food handling procedures; describe food storage and refrigeration techniques; explain sanitation of dishes, equipment, and kitchens including cleaning material, garbage, and refuse disposal; discuss Occupational Safety and Health Administration (OSHA) requirements and workplace safety programs.

1. Demonstrate an understanding of basic sanitation and safety procedures by

a. identifying consumer safe foods expectations (1a, 2b);

b. listing food borne illnesses/causes (1a, 2c);

c. defining sanitation in terms of food, people, facilities/equipment (1a, 2c);

d. discussing microorganisms, bacteria, viruses, parasites, and fungi (1a, 1b);

e. listing contamination and food borne illnesses; biological, chemical, and physical hazards (1a, 1b);

f. listing ten safe food handling rules (1a, 1b, 2c);

g. identifying types of and accident prevention/actions for emergencies (1a, 1b, 1c, 2a, 2b, 2c).

2. Demonstrate an understanding of the impact of food safety on a business operation by

a. distinguishing food safety/sanitation challenges (1a, 1b, 1c, 2c);

b. identifying safe food handler traits (1b, 1c);

c. outlining effective personal hygiene system development (1a, 1b, 1c, 2c);

d. demonstrating proper use of food thermometers (1a, 2b);

e. distinguishing sanitary design, interior construction design (1a, 1b, 2a, 2b, 2c);

f. distinguishing waste management (1a, 1b, 2d);

g. defining integrated pest management (IPM) program (1a, 1b, 2d).

3. Demonstrate an understanding of the flow of food through the operation by

a. identifying safe food sources (1a, 1b);

b. discussing receiving/inspecting techniques (1a, 1b, 1c, 2a, 2b, 2d);

c. discussing shipment rejections/spoilage (1a, 1b, 1c, 2a, 2b, 2d);

d. identifying safe storage principles (1a, 1b, 1c, 2a, 2b, 2d);

e. listing storage options and proper storage for specific foods (1a, 1b, 1c, 2a, 2b, 2d);

f. explaining food protection during preparation and service (1a, 1b, 1c, 2a, 2b, 2d);

g. discussing time/temperature principles (1a, 1b, 1c, 2a, 2b, 2d);

h. acknowledging sanitary food service (1a, 1b, 1c, 2a, 2b, 2d);

i. identifying food protection methods in service areas (1a, 1b, 1c, 2a, 2b, 2d);

j. acknowledging food spoilage signs (1a, 1b);

k. examining sanitary facilities/equipment (1a, 1b, 1c, 2a, 2b, 2d);

l. surveying cleaning needs, selection of proper cleaning materials (1a, 1b, 1c, 2a, 2b, 2d).

4. Demonstrate an understanding of management issues facing operation manager and staff by

a. identifying foodservice manager role in sanitation (1a, 1b);

b. summarizing training and system monitoring (1a, 1b, 1c, 2a, 2b, 2d, 2e);

c. explaining the Americans with Disabilities Act (ADA) (1a, 1b);

d. examining types, arrangement, and installation of kitchen equipment (1a, 1b, 2a, 2c, 2e);

e. identifying hazardous materials use/proper storage (1a, 1b, 1c, 2a, 2b, 2d);

f. identifying management's responsibility in cleaning schedule introduction, implementation, and monitoring (1a, 1b, 1c, 2a, 2b, 2d);

g. outlining pest control operator methods (1a, 1b, 1c, 2a, 2b, 2d);

h. explaining the Occupational Safety and Health Administration (OSHA) (1a, 1b, 1c, 2a, 2b, 2d);

i. establishing a crisis management plan (1a, 1b, 1c, 2a, 2b, 2d, 2e).

5. Explain the importance of the HACCP system in the workplace by

a. describing hazard control food safety programs (1a, 1b, 1c, 2a, 2c, 2d);

b. identifying critical control points (1a, 1b, 1c, 2a, 2c, 2d);

c. outlining HACCP/S.A.F.E. systems (1a, 1b, 1c, 2a, 2c, 2d);

d. comprehending HACCP system setup (1a, 1b, 1c, 2a, 2c, 2d).

6. Demonstrate knowledge of relevant topics by

a. presenting a research project based on course related topics in written format (1a, 1b, 1c, 2a, 2c, 2e);

b. presenting a research project based on course related topics in oral format (1a, 1b, 1c, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify tools and equipment common to the Garde Manger Station; develop fundamental skills in preparation of forcemeats; demonstrate basic skills in charcuterie and aspic development; demonstrate cold food techniques for presentation.

1. Describe the history and origins of the Garde Manger by

a. explaining origins and structure of the European apprenticeship process (1a);

b. describing the personal abilities required of the modern Garde Manger chef (1a);

c. describing the professional development goals and activities for building a career in food service (1a, 2a).

2. Demonstrate an understanding of banquet organization by

a. summarizing the importance of ergonomics in kitchen layout and design (1a, 2a, 2d);

b. using the proper methods of dry and refrigerated storage (1b, 2a);

c. demonstrating buffet arrangement (1a, 2e).

3. Use tools and equipment of the Garde Manger by

a. selecting proper tools (1b, 2e);

b. demonstrating proper care of tools (2a, 2e);

c. demonstrating proper use of tools (1b, 2a, 2e).

4. Use preparation skills of the Garde Manger by

a. preparing Amuse-Bouches, appetizers, and Hors d'Oeuvres (2a);

b. assembling salads with vegetables, fruits, and grains (2a);

c. assembling sandwiches (2a).

5. Use fabrication skills of the Garde Manger by

a. demonstrating fabrication of poultry, game birds, game meats, meats, fish, shellfish, and specialty meats (2a);

b. producing quality points of food products (2a);

c. demonstrating proper handling/storage of food products (1b, 2a).

6. Make preserved foods of the Garde Manger by

a. summarizing concepts of preserving methods (1a);

b. using methods of curing, sausage making, and smoking (2a);

c. making pates, terrines, mousselines, and kitchen made cheeses/creams (2a).

7. Create displayed arts of the Garde Manger by

a. preparing sculpting, carving, and modeling (2a);

b. planning food decoration, platter presentation, and buffet (2a);

c. creating buffet for service (2a).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare the unique similarities and differences in American cuisine; explain the importance of the immigration phenomena in the shaping of American cuisine; produce regional cuisine dishes which employ standard principles, concepts, and quality factors.

1. Differentiate the different regions of the United States through cuisine by

a. summarizing differences in cuisines through the influence of history, geography, topography, climate, crop, and livestock (1a, 1b);

b. distinguishing differences of flavorings in different regions (1a).

2. Demonstrate various cooking methods by

a. practicing baking/roasting, grilling/broiling, braising, boiling/simmering/ poaching, steaming, sautéing and deep frying (2a).

3. Demonstrate the impact of international cuisine on American cuisine by

a. comparing ingredients used in American regional cuisine to international cuisines (1a);

b. preparing various dishes from different regions (2a).

4. Create a meal distinguishing a certain American region by

a. composing a menu specific to the region (1a, 1b);

b. making the meal for service (2b).

5. Evaluate menus/meals for ethnicity of assigned American regions by

a. evaluating his/her own menu/meal (1a, 1c, 2b);

b. evaluating classmates' menus/meals (1a, 1c, 2b).

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take CHEF-1301(6415) CHEF-1305(11754) CHEF-2301(12136) RSTO-1304; Minimum grade C;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): CHEF 1301, CHEF 1305, RSTO 1304, and CHEF 2301 with a "C" or better

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify common food products and commercial restaurant equipment; operate and clean equipment; demonstrate basic knife and cooking skills; demonstrate teamwork and time management in the preparation and service of meals in a commercial setting.

CHEF 2301 - Intermediate Food Preparation

General

Course Key
12136

Course Rubric
CHEF

Course Number
2301

Course Title
Intermediate Food Preparation

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Continuation of previous food preparation course. Topics include the concept of pre-cooked food items, as well as scratch preparation. Covers full range of food preparation techniques. Master the identification of spices, herbs, oils, and vinegar's; discuss and prepare various proteins; discuss and prepare various fruits, vegetables, and starches; discuss and prepare sandwiches and salads. Licensure/Certification Agency: American Culinary Federation Educational Institute. Required Prerequisite: CHEF-1301 and CHEF-1305 with a "C" or better. Student must have current Serv-Safe Manager Certification. Enrollment into class with approved petition.

(ALL COURSES): Take all of the following courses...

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Required Prerequisite(s): CHEF 1301 and CHEF 1305 with a "C" or better Student must have current Serv-Safe Manager Certification Enrollment into class with approved petition

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Master the identification of spices, oils, and vinegars; discuss and prepare various proteins; discuss and prepare various fruits, vegetables, and starches; discuss and prepare sandwiches and salads.

1. Demonstrate working knowledge of basic culinary techniques by

a. assembling equipment for use (2e);

b. demonstrating equipment operation (2e);

c. demonstrating hand tool usage (2e);

d. demonstrating sanitation and safety practices (2d);

e. demonstrating proper use/care of knives (2e);

f. demonstrating proper mise en place of ingredients (1a, 1b, 1c, 2a);

g. identifying spices, oils, and vinegars (1b);

h. converting recipes (1a, 1b);

i. demonstrating cooking methods - dry, moist and combination (1b, 2c, 2e);

j. demonstrating scaling techniques (1b, 2c, 2e).

2. Produce food presentations by

a. demonstrating buffet service techniques (1b, 2c);

b. demonstrating plate presentation (1b, 2c);

c. demonstrating various garnish techniques - apple swan, tomato rose, vegetable carvings, centerpiece, fluted mushroom, etc. (1b, 2c).

3. Identify various foods by

a. describing/selecting various dairy products: cheese, milk, cream, butter (1a, 1b);

b. describing/selecting various starches: grains, potatoes, pastas (1a, 1b);

c. describing/selecting various vegetables (1a, 1b);

d. describing/selecting various fruits (1a, 1b);

e. describing/selecting various fish and shellfish (1a, 1b);

f. describing/selecting various vegetarian (analogous) ingredients (1a, 1b).

4. Demonstrate proficient preparation of foods by

a. prepping (handling, cleaning, cutting, portioning), cooking/cooking with, and/or presenting various dairy products (1a, 1b, 2a);

b. prepping (handling, cleaning, cutting, portioning), cooking/cooking with, and/or presenting various starches: grains, potatoes, and pastas (1a, 1b, 2a);

c. prepping (handling, cleaning, cutting, portioning), cooking/cooking with, and/or presenting a rice pilaf (1a, 1b, 2a);

d. prepping (handling, cleaning, cutting, portioning), cooking/cooking with, and/or presenting various vegetables (1a, 1b, 2a);

e. prepping (handling, cleaning, cutting, portioning), cooking/cooking with, and/or presenting a roasted bell pepper (1a, 1b, 2a);

5. Demonstrate menu planning procedures/execution by

a. planning a menu according to guidelines (1a, 1b, 2a, 2b, 2c);

b. converting recipes (1a, 1b, 2a, 2b, 2c);

c. creating an ingredient list needed (1a, 1b, 2a, 2b, 2c);

d. executing production of menu (1a, 1b, 2a, 2b, 2c);

e. critiquing performance (1a, 1b, 2a, 2b, 2c).

CHEF 2302 - Saucier

General

Course Key

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): CHEF 1301, CHEF 1305, and CHEF 2301 with a "C" or better

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will:

1. The student will display competence in applying culinary techniques that are necessary in the food service industry. (1a, 1b, 2a, 2b, 2c)

2. The student will exhibit professional behavior and work ethic necessary to compete and advance in the hospitality industry. (1a, 1b, 2a, 2b, 2c)

3. The student will produce, present and evaluate a variety of culinary dishes. (1a, 1b, 2a, 2b, 2c)

4. The student will prepare various cured & smoked preparations (1a, 1b, 2a, 2b, 2c)

5. The student will prepare forcemeats & sausages for appetizers and cold plates (1a, 1b, 2a, 2b, 2c)

6. The student will prepare pates & terrines from meats, fish, shellfish, and vegetable products (1a, 1b, 2a, 2b, 2c)

7. The student will prepare en croute forcemeats products (1a, 1b, 2a, 2b, 2c)

8. The student will prepare galantines & roulades from poultry, meat, & fish forcemeats (1a, 1b, 2a, 2b, 2c)

9. The student will prepare mousses and timbales from meats, fish, shellfish, and vegetable products (1a, 1b, 2a, 2b, 2c)

10. The student will explain principles of gross piece construction and presentation. (1a, 1b, 2a, 2b, 2c)

11. The student will present various preserved & forcemeat-based items in Buffet Style Presentation with use of aspic gelee & chaud froid (1a, 1b, 2a, 2b, 2c)

12. The student will prepare various cured & smoked preparations (1a, 1b, 2a, 2b, 2c)

13. Students cook a variety of dishes using curing & smoking techniques (1a, 1b, 2a, 2b, 2c)

14. The student will prepare forcemeats & sausages for appetizers and cold plates (1a, 1b, 2a, 2b, 2c)

15. Students cook a variety of forcemeats to be used in sausages, galantines, roulades, pates, terrines, mousses & timbales. (1a, 1b, 2a, 2b, 2c)

16. The student will prepare pates & terrines from meats, fish, shellfish, and vegetable products (1a, 1b, 2a, 2b, 2c)

17. The student will prepare en croute forcemeats products (1a, 1b, 2a, 2b, 2c)

18. The student will prepare galantines & roulades from poultry, meat, & fish forcemeats (1a, 1b, 2a, 2b, 2c)

19. The student will prepare mousses and timbales from meats, fish, shellfish, and vegetable products (1a, 1b, 2a, 2b, 2c)

20. The student will demonstrate menu planning procedures/execution. The student will be able to

a. Plan a menu according to guidelines (1a, 1b, 2a, 2b, 2c)

b. Convert recipes (1a, 1b, 2a, 2b, 2c)

c. Create an ingredient list needed (1a, 1b, 2a, 2b, 2c)

d. Execute production of menu (1a, 1b, 2a, 2b, 2c)

e. Critique performance (1a, 1b, 2a, 2b, 2c)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify objectives, preparation, and procedures for searching a crime scene; diagram crime scene sketches and identify their relationship to photographs and videos; and identify and classify fingerprints, types of impressions, and techniques for locating and developing impressions.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of investigation by
    a. describing the initial examination of the scene (1a, 1b, 1c, 2a, 2b, 2c);
    b. defining important considerations in crime scene investigations (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying crime scenes for various offenses (1a, 1b, 2a, 2b, 2c).
2. Demonstrate an understanding of evidence by
    a. defining chain of custody (1a, 1b, 2a, 2c);
    b. identifying the guidelines for forensic laboratory management practices (1a, 1b, 2a, 2c, 2d, 2e);
    c. identifying specialized personnel at a crime scene and their function (1a, 1b, 2a, 2b, 2c);
    d. defining trace evidence (1a, 1b, 2a, 2c);
    e. describing evidence from various sources (1a, 1b, 2a, 2c);
    f. describing the advantages and disadvantages for collection and preservation of physical evidence (1a, 1b, 2a, 2b).
3. Demonstrate the ability to conduct independent research on issues related to criminal justice by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2b, 2c);
    b. synthesizing research and acquiring knowledge (1a, 1b, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2c).
4. Demonstrate an understanding of effective usage of scientific information in the field of criminal justice by
    a. determining impact of scientific advancement of the criminal justice system (1a, 1b, 1c, 2b, 2c);
    b. identifying strengths and weakness of certain evidence, i.e. crime scene photography (1a, 1b, 2a, 2b, 2c).

CJLE 1373 - Serial Killers & Extraordinary Homicide

Course Learning Outcomes

End-of-Course Outcomes

Learning outcomes/objectives are determined by local occupational needs and business and industry trends. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Articulate the prevalence and patterns of forms of extraordinary homicide, including serial murder, over time and across offender and victim sociodemographic characteristics
(1a, 1b, 2c).
2. Apply and contrast the main criminological theories used to explain homicide and extraordinary homicide, including serial homicide, and speak to the respective empirical validity of each as applied to rare forms of criminal offending
(1a, 1b, 1c, 2a, 2c, 2d).
3. Articulate the strategies of investigation and crime scene analysis used in the investigation and prosecution of offenders
(1a, 1b, 1c, 2a, 2c, 2d).
4. Develop critical thinking and writing skills through essay responses on examinations and writing assignments
(1a, 1b, 2c).

CJLE 1375 - Sex Crimes

Course Classification
Technical Local Need

Description
(3-3-0). This course serves as an introduction to criminal sexual offending, sexual victimization and other sexual behaviors, both criminal and noncriminal, which might be encountered by criminal justice professionals during their course of their duties. The course will examine the various definitions of sexual offending, the major criminological theories related to sexual offending, a brief history of social and legal responses to sex and sexual offending, and potential treatments and criminal justice responses to sexual offenders. The course will also address the consequences of criminal sexual victimization for the crime victims. Recommended Prerequisite(s): CRIJ-1301

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate outcomes set forth for Texas Commission on Law Enforcement Course #1000. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic fitness and wellness concepts related to the ability to perform law enforcement job tasks and to maintain a high level of fitness and wellness by
    a. describing the importance and relevance of health habits, fitness, and wellness to the law enforcement profession (1b, 2a, 2b, 2c);
    b. identifying the guidelines and principles of a safe exercise program (1b, 2a, 2b, 2c);
    c. identifying the principles of an exercise program (1b, 2a, 2b, 2c);
    d. identifying FITT for thresholds of fitness training related to cardiovascular, strength, anaerobic, and flexibility training (1a, 1b, 2a, 2b, 2c);
    e. identifying the components of an exercise program (1a, 1b, 2a, 2b, 2c);
    f. identifying safety measures for fitness training (1a, 1b, 2a, 2b, 2c).
2. Demonstrate an understanding of the development and influence of the evolution of police service models and styles by
    a. describing significant historical events that have influenced policing in the United States (1a, 1b, 2a, 2b, 2c);
    b. tracing the historical development of police service models or styles (1a, 1b, 2a, 2b, 2c);
    c. explaining the evolution of policing in Texas (1a, 1b, 2a, 2b, 2c);
    d. listing the requirements of licensees under selected sections of the current Commission Rules (1a, 1b, 2a, 2b, 2c);
    e. explaining the traditional police service model (1a, 1b, 2a, 2b, 2c);
    f. explaining community policing (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an understanding of the organization's role in society and police organizational issues by
    a. explaining the police organization's role in society (1a, 1b, 2a, 2b, 2c);
    b. recognizing the values of providing quality police customer service (1a, 1b, 2a, 2b, 2c);
    c. analyzing the characteristics of traditional (formal) police organizational structure and police subculture (informal) (1a, 1b, 2a, 2b, 2c).
4. Demonstrate an understanding of and respect for professionalism as it applies to law enforcement by
    a. discussing the concept of professionalism (1a, 1b, 2a, 2b, 2c);
    b. discussing the characteristics of professionalism (1a, 1b, 2a, 2b, 2c).
5. Demonstrate an understanding and acceptance of the crucial role of ethics as related to professionalism by
    a. discussing the Law Enforcement Code of Ethics (1a, 1b, 1c, 2a, 2b, 2c);
    b. discussing ethical dilemmas in law enforcement (1a, 1b, 1c, 2a, 2b, 2c);
    c. discussing the differences between physical and moral courage (1a, 1b, 1c, 2a, 2b, 2c).
6. Demonstrate an understanding of the civil and criminal laws related to unethical behavior of peace officers by
    a. discussing Title 8 of the Texas Penal Code in relationship to an officer's behavior (1a, 1b, 2a, 2b, 2c);
    b. explaining relevant federal criminal law in relationship to an officer's behavior (1a, 1b, 2a, 2b, 2c);
    c. listing civil penalties for sexual harassment and inappropriate officer conduct (1a, 1b, 2a, 2b, 2c).
7. Demonstrate an understanding of and respect for the U.S. Constitution and Bill of Rights as they pertain to the role of peace officers and the rights of citizens by
    a. explaining the basis of the U.S. Constitution and Bill of Rights with special emphasis on the freedom of the individual and human rights (1a, 1b, 2a, 2b, 2c);
    b. defining Writ of Habeas Corpus (1a, 1b, 2a, 2b, 2c);
    c. explaining the main concepts of Article 2 and Article 3 of the Constitution (1a, 1b, 2a, 2b, 2c);
    d. explaining the rights enumerated in Constitutional Amendments I, IV, V, VI, VIII, IX, X, and XIV (1a, 1b, 2a, 2b, 2c);
    e. analyzing personal and organizational values relative to police role in relation to the Constitution and Bill of Rights (1a, 1b, 2a, 2b, 2c).
8. Demonstrate an understanding of and respect for the Texas Constitution and Bill of Rights as they pertain to the role of peace officers and the rights of citizens by
    a. explaining an individual's rights proclaimed under Article 1 of the Constitution of the State of Texas (1a, 1b, 2a, 2b, 2c);
    b. defending an individual's rights proclaimed under Article 1 of the Constitution of the State of Texas (1a, 1b, 2a, 2b, 2c);
    c. explaining Article 17 of the State Constitution as it relates to the ever evolving nature of the document (1a, 1b, 2a, 2b, 2c).
9. Demonstrate an understanding of the specific roles and interrelationships of the various components within the criminal justice system by
    a. explaining the structure and role of the criminal justice system (1a, 1b, 2a, 2b, 2c);
    b. explaining how the three components of the criminal justice system directly affect each other (1a, 1b, 2a, 2b, 2c);
    c. identifying the differences between civil and criminal law (1a, 1b, 2a, 2b, 2c);
    d. explaining the civil/criminal courts and their jurisdiction (1a, 1b, 2a, 2b, 2c).
10. Demonstrate an understanding of the statutory authority for administration of criminal procedure as enumerated by the Texas Code of Criminal Procedure (CCP) by
    a. identifying the basis for administration of criminal procedure in Texas (1a, 1b, 2a, 2b, 2c);
    b. identifying the basic rights enumerated in the CCP (1a, 1b, 2a, 2b, 2c).
11. Demonstrate an understanding of the general duties and responsibilities of officers as enumerated by the CCP by
    a. identifying magistrates and their duties (1a, 1b, 2a, 2b, 2c);
    b. identifying peace officers (1a, 2c);
    c. listing the duties of peace officers (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of peace officers relating to racial profiling (1a, 1b, 2a, 2b, 2c);
    e. listing the duties of peace officers relating to forfeiture of contraband (1a, 1b, 2a, 2b, 2c).
12. Demonstrate an understanding of the courts and their criminal jurisdiction by
    a. identifying courts which have criminal jurisdiction (1a, 1b, 2a, 2b, 2c);
    b. identifying the jurisdiction of the courts of appeals (1a, 1b, 2a, 2b, 2c);
    c. identifying the jurisdiction of the court of criminal appeals (1a, 1b, 2a, 2b, 2c);
    d. identifying the jurisdiction of district courts (1a, 1b, 2a, 2b, 2c);
    e. identifying the jurisdiction of the county courts (1a, 1b, 2a, 2b, 2c);
    f. identifying the jurisdiction of the justice courts (1a, 1b, 2a, 2b, 2c);
    g. identifying the jurisdiction of municipal courts (1a, 1b, 2a, 2b, 2c).
13. Demonstrate an understanding of the procedures to be followed in the prevention and suppression of offenses by
    a. listing the duties of officers relating to family violence prevention (1a, 1b, 2a, 2b, 2c);
    b. listing the duties of officers relating to threats of injury or death to persons or damage to property (1a, 1b, 2a, 2b, 2c);
    c. listing the duties of officers relating to suppression of riots and other disturbances (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of officers relating to protective orders for victims of sexual assault (1a, 1b, 2a, 2b, 2c).
14. Demonstrate an understanding of the time limitations relating to felonies and misdemeanors by
    a. identifying the time limitations relating to felony offenses (1a, 1b, 2a, 2b, 2c);
    b. identifying the time limitations relating to misdemeanor offenses (1a, 1b, 2a, 2b, 2c);
    c. identifying the time limitations relating to aggravated offenses, attempt, conspiracy, solicitation, and organized criminal activity (1a, 1b, 2a, 2b, 2c).
15. Demonstrate an understanding of court processes as they relate to criminal offenses by
    a. explaining court papers relating to offenses (1a, 1b, 2a, 2b, 2c);
    b. explaining court papers relating to witnesses (1a, 1b, 2a, 2b, 2c);
    c. explaining the bail procedure (1a, 1b, 2a, 2b, 2c).

16. Demonstrate an understanding of the process relating to inquests upon dead bodies by
    a. identifying requirements for an inquest (1a, 1b, 2a, 2b, 2c).

17. Demonstrate an understanding of the process relating to the sex offender registration program by
    a. identifying requirements for sex offenders (1a, 1b, 2a, 2b, 2c).

18. Identify the elements of offenses in the Texas Penal Code by
    a. explaining the organization of the PC (1a, 2c);
    b. explaining the general provisions of the PC (1a, 2c);
    c. describing the proof required to convict a person of an offense (1a, 1b, 2a, 2b, 2c);
    d. defining terms as they relate to multiple prosecutions (1a, 1b, 2a, 2b, 2c);
    e. explaining the general principles of criminal responsibility (Title 2) of the penal code (1a, 1b, 2a, 2b, 2c);
    f. explaining the culpable mental states (1a, 1b, 2a, 2b, 2c);
    g. identifying when one person is criminally responsible for conduct of another (1a, 1b, 2a, 2b, 2c);
    h. identifying general defenses to criminal responsibility (1a, 1b, 2a, 2b, 2c);
    i. explaining the punishments (Title 3) of the penal code (1a, 1b, 2a, 2b, 2c);
    j. applying the elements of offenses for all offenses (1a, 1b, 2a, 2b, 2c).

19. Demonstrate an understanding of the causes and effects of stress in the lives of peace officers by
    a. identifying the types of stress related to the law enforcement profession (1a, 1b, 2a, 2b, 2c);
    b. identifying the emotional and physical symptoms of the physiology of stress (1a, 1b, 2a, 2b, 2c);
    c. identifying common symptoms and illnesses associated with stress (1a, 1b, 2a, 2b, 2c);
    d. identifying common stressors for peace officers (1a, 1b, 2a, 2b, 2c).

20. Develop personal strategies for the positive management of stress by
    a. recognizing strategies to manage stress (1a, 1b, 2a, 2b, 2c);
    b. identifying ways to reduce stress through relaxation (1a, 1b, 2a, 2b, 2c).

    b. explaining how the three components of the criminal justice system directly affect each other (1a, 1b, 2a, 2b, 2c);
    c. identifying the differences between civil and criminal law (1a, 1b, 2a, 2b, 2c);
    d. explaining the civil/criminal courts and their jurisdiction (1a, 1b, 2a, 2b, 2c).

10. Demonstrate an understanding of the statutory authority for administration of criminal procedure as enumerated by the Texas Code of Criminal Procedure (CCP) by
    a. identifying the basis for administration of criminal procedure in Texas (1a, 1b, 2a, 2b, 2c);
    b. identifying the basic rights enumerated in the CCP (1a, 1b, 2a, 2b, 2c).

11. Demonstrate an understanding of the general duties and responsibilities of officers as enumerated by the CCP by
    a. identifying magistrates and their duties (1a, 1b, 2a, 2b, 2c);
    b. identifying peace officers (1a, 2c);
    c. listing the duties of peace officers (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of peace officers relating to racial profiling (1a, 1b, 2a, 2b, 2c);
    e. listing the duties of peace officers relating to forfeiture of contraband (1a, 1b, 2a, 2b, 2c).

12. Demonstrate an understanding of the courts and their criminal jurisdiction by
    a. identifying courts which have criminal jurisdiction (1a, 1b, 2a, 2b, 2c);
    b. identifying the jurisdiction of the courts of appeals (1a, 1b, 2a, 2b, 2c);
    c. identifying the jurisdiction of the court of criminal appeals (1a, 1b, 2a, 2b, 2c);
    d. identifying the jurisdiction of district courts (1a, 1b, 2a, 2b, 2c);
    e. identifying the jurisdiction of the county courts (1a, 1b, 2a, 2b, 2c);
    f. identifying the jurisdiction of the justice courts (1a, 1b, 2a, 2b, 2c);
    g. identifying the jurisdiction of municipal courts (1a, 1b, 2a, 2b, 2c).

13. Demonstrate an understanding of the procedures to be followed in the prevention and suppression of offenses by
    a. listing the duties of officers relating to family violence prevention (1a, 1b, 2a, 2b, 2c);
    b. listing the duties of officers relating to threats of injury or death to persons or damage to property (1a, 1b, 2a, 2b, 2c);
    c. listing the duties of officers relating to suppression of riots and other disturbances (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of officers relating to protective orders for victims of sexual assault (1a, 1b, 2a, 2b, 2c).

14. Demonstrate an understanding of the time limitations relating to felonies and misdemeanors by
    a. identifying the time limitations relating to felony offenses (1a, 1b, 2a, 2b, 2c);
    b. identifying the time limitations relating to misdemeanor offenses (1a, 1b, 2a, 2b, 2c);
    c. identifying the time limitations relating to aggravated offenses, attempt, conspiracy, solicitation, and organized criminal activity (1a, 1b, 2a, 2b, 2c).

15. Demonstrate an understanding of court processes as they relate to criminal offenses by
    a. explaining court papers relating to offenses (1a, 1b, 2a, 2b, 2c);
    b. explaining court papers relating to witnesses (1a, 1b, 2a, 2b, 2c);
    c. explaining the bail procedure (1a, 1b, 2a, 2b, 2c).

16. Demonstrate an understanding of the process relating to inquests upon dead bodies by
    a. identifying requirements for an inquest (1a, 1b, 2a, 2b, 2c).

17. Demonstrate an understanding of the process relating to the sex offender registration program by
    a. identifying requirements for sex offenders (1a, 1b, 2a, 2b, 2c).

18. Identify the elements of offenses in the Texas Penal Code by
    a. explaining the organization of the PC (1a, 2c);
    b. explaining the general provisions of the PC (1a, 2c);
    c. describing the proof required to convict a person of an offense (1a, 1b, 2a, 2b, 2c);
    d. defining terms as they relate to multiple prosecutions (1a, 1b, 2a, 2b, 2c);
    e. explaining the general principles of criminal responsibility (Title 2) of the penal code (1a, 1b, 2a, 2b, 2c);
    f. explaining the culpable mental states (1a, 1b, 2a, 2b, 2c);
    g. identifying when one person is criminally responsible for conduct of another (1a, 1b, 2a, 2b, 2c);
    h. identifying general defenses to criminal responsibility (1a, 1b, 2a, 2b, 2c);
    i. explaining the punishments (Title 3) of the penal code (1a, 1b, 2a, 2b, 2c);
    j. applying the elements of offenses for all offenses (1a, 1b, 2a, 2b, 2c).

19. Demonstrate an understanding of the causes and effects of stress in the lives of peace officers by
    a. identifying the types of stress related to the law enforcement profession (1a, 1b, 2a, 2b, 2c);
    b. identifying the emotional and physical symptoms of the physiology of stress (1a, 1b, 2a, 2b, 2c);
    c. identifying common symptoms and illnesses associated with stress (1a, 1b, 2a, 2b, 2c);
    d. identifying common stressors for peace officers (1a, 1b, 2a, 2b, 2c).

20. Develop personal strategies for the positive management of stress by
    a. recognizing strategies to manage stress (1a, 1b, 2a, 2b, 2c);
    b. identifying ways to reduce stress through relaxation (1a, 1b, 2a, 2b, 2c).

Required Corequisite(s): CJLE 1506 CJLE 1518 CJLE 1524 and CJLE 1429

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate outcomes set forth for Texas Commission on Law Enforcement Course #1000.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the development and influence of the evolution of police service models and styles by
    a. describing significant historical events that have influenced policing in the United States (1b, 2a, 2b, 2c);
    b. describing the historical development of police service models or styles (1b, 2a, 2b, 2c);
    c. describing the evolution of policing in Texas (1b, 2a, 2b, 2c);
    d. listing the requirements of licensees under selected sections of the current commission rules (1b, 2a, 2b, 2c);
    e. explaining the traditional police service model (1b, 2a, 2b, 2c);
    f. defining community policing and explaining this service model (1b, 2a, 2b, 2c).
2. Demonstrate an understanding of the organization's role in society and police organizational issues by
    a. explaining the police organization's role in society (1b, 2a, 2b, 2c);
    b. explaining the value of providing quality police customer service (1b, 2a, 2b, 2c);
    c. describing the characteristics of traditional (formal) police organizational structure and police subculture (informal) (1b, 2a, 2b, 2c).
3. Demonstrate an understanding of the role of multiculturalism in law enforcement by
    a. discussing key concepts and origins of prejudice (1b, 2a, 2b, 2c, 2d);
    b. identifying forms of prejudice (1b, 2a, 2b, 2c, 2d);
    c. discussing personal prejudices (1b, 2a, 2b, 2c, 2d);
    d. defining key functions of discrimination (1b, 2a, 2b, 2c, 2d).
4. Demonstrate an understanding of the importance of human relations in law enforcement by
    a. discussing the importance of not allowing personal prejudices to affect professional behavior (1b, 2a, 2b, 2c, 2d);
    b. discussing the value of, respect for, and sensitivity to the feelings and needs of others (1b, 2a, 2b, 2c, 2d);
    c. discussing the public's perceptions of and attitudes toward peace officers (1b, 2a, 2b, 2c, 2d);
    d. discussing cross cultural communication and conflict resolution (1b, 2a, 2b, 2c, 2d).
5. Demonstrate effective written communication skills by
    a. writing with complete sentences (1a, 1b, 2a, 2b, 2c);
    b. demonstrating the ability to recognize sentence clarity problems and to correct them (1a, 1b, 2a, 2b, 2c);
    c. using punctuation correctly (1a, 1b, 2a, 2b, 2c).
6. Demonstrate an understanding of the importance of and the creation of effective field notes by
    a. explaining the definition and use of a field note (1a, 1b, 2a, 2b, 2c);
    b. demonstrating observation and descriptive skills (1a, 1b, 2a, 2b, 2c);
    c. listing the types of information that should be entered into the officer's field notebook (1a, 1b, 2a, 2b, 2c);
    d. listing the questions to be answered in field notes to complete a report (1a, 1b, 2a, 2b, 2c).
7. Demonstrate an understanding of the uses and essential characteristics of police reports by
    a. listing the significant uses of the police report (1a, 1b, 2a, 2b, 2c);
    b. listing the eight essential criteria of a good police report (1a, 1b, 2a, 2b, 2c);
    c. listing the common types of police reports (1a, 1b, 2a, 2b, 2c);
    d. explaining the difference between chronological and categorical ordering in report writing (1a, 1b, 2a, 2b, 2c);
    e. listing the three basic kinds of information necessary in police reports (1a, 1b, 2a, 2b, 2c);
    f. explaining the importance of separating fact from opinion in police reports (1a, 1b, 2a, 2b, 2c);
    g. identifying the statutory authority relating to confidentiality of sex offense victims (1a, 1b, 2a, 2b, 2c).
8. Demonstrate an understanding of the legal authorities pertaining to peace officers' use of force by
    a. defining the terms relating to use of force (1b, 2a, 2b, 2c);
    b. explaining the legal authorities for the use of force (1b, 2a, 2b, 2c);
    c. explaining the justification(s) for use of force (1b, 2a, 2b, 2c).
9. Demonstrate a basic understanding of the concepts regarding use of force by
    a. identifying definitions relating to use of force (1b, 2a, 2b, 2c);
    b. describing psychological aspects of the use of force (1b, 2a, 2b, 2c);
    c. identifying the deciding factors for use of force when affecting an arrest (1b, 2a, 2b, 2c);
    d. identifying circumstances which are high risks for officers (1b, 2a, 2b, 2c);
    e. identifying moral considerations and forces affecting an officer's decision to use deadly force (1b, 2a, 2b, 2c).
10. Demonstrate an understanding of various force options or alternatives available to peace officers by
    a. discussing force options available to peace officers (1b, 2a, 2b, 2c);
    b. identifying the principal considerations in applying and using force continuum (1b, 2a, 2b, 2c);
    c. discussing the impact of an officer's professional presence (1b, 2a, 2b, 2c);
    d. identifying the various aspects of communication strategies used when dealing with the public (1b, 2a, 2b, 2c);
    e. identifying elements that an officer must recognize and control in every encounter (1b, 2a, 2b, 2c);
    f. identifying some helpful tools used in redirecting someone's behavior, using verbal persuasion (1b, 2a, 2b, 2c);
    g. identifying criteria relating to a professional peace officer's use of force (1b, 2a, 2b, 2c);
    h. identifying typical procedures that are followed after an officer involved shooting (1b, 2a, 2b, 2c).
11. Demonstrate an understanding of the factors basic to unreasonable force and the possible consequences when excessive force is used by
    a. identifying the possible consequences that may arise from improper or excessive use of force (1b, 2a, 2b, 2c);
    b. identifying factors that the courts use to determine if unreasonable force was used in a case (1b, 2a, 2b, 2c).
12. Demonstrate effective interpersonal communication skills by
    a. facilitating effective communication (1a, 1b, 2a, 2b, 2c);
    b. demonstrating the ability to understand and interpret nonverbal cues (1a, 1b, 2a, 2b, 2c);
    c. demonstrating the ability to understand and interpret situations (1a, 1b, 2a, 2b, 2c);
    d. listening effectively (1a, 1b, 2a, 2b, 2c);
    e. using communication skills that assist in getting people to share information (1a, 1b, 2a, 2b, 2c);
    f. demonstrating how to fairly and respectfully handle and make requests (1a, 1b, 2a, 2b, 2c).
13. Demonstrate critical thinking and police problem solving abilities through the use of different models including the SARA and crime triangle by
    a. defining critical thinking (1a, 1b, 2a, 2b, 2c);
    b. defining community policing (1a, 1b, 2a, 2b, 2c);
    c. identifying the essential aspects of critical thinking (1a, 1b, 2a, 2b, 2c);
    d. identifying four typical reasons for errors in reasoning (1a, 1b, 2a, 2b, 2c);
    e. identifying methods of good problem solvers (1a, 1b, 2a, 2b, 2c);
    f. identifying the four steps of the SARA model (1a, 1b, 2a, 2b, 2c);
    g. explaining how the SARA model applies to the problem solving method (1a, 1b, 2a, 2b, 2c);

h. explaining the crime triangle (1a, 1b, 2a, 2b, 2c);

i. discussing how to be a problem oriented policing agency (1a, 1b, 2a, 2b, 2c);

j. participating in a group problem solving case study/activity (1a, 1b, 2a, 2b, 2c).

14. Demonstrate an understanding of the importance and methods of patrol function and preparation by

a. listing the patrol functions (1b, 2a, 2b, 2c);

b. identifying the methods of mental and physical preparation (1b, 2a, 2b, 2c);

c. identifying basic safety awareness tactics (1b, 2a, 2b, 2c).

15. Demonstrate an understanding of the hazards a peace officer may encounter when on patrol by

a. explaining the various kinds of hazards encountered while on patrol (1b, 2a, 2b, 2c).

16. Demonstrate an understanding of the various concepts and different techniques of patrol by

a. identifying the two types of problem area patrols (1b, 2a, 2b, 2c);

b. identifying the five patrol patterns (1b, 2a, 2b, 2c);

c. identifying the advantages of the six different patrol modes (1b, 2a, 2b, 2c);

d. discussing the various patrol methods (1b, 2a, 2b, 2c);

e. discussing effective observation skills (1b, 2a, 2b, 2c).

17. Demonstrate an understanding of the various concepts and techniques used when confronting pedestrians and conducting field interviews by

a. demonstrating a proper pedestrian stop (1a, 1b, 2a, 2b, 2c);

b. demonstrating techniques used while interviewing persons during field operations (1a, 1b, 2a, 2b, 2c);

c. demonstrating the use of the field inquiry (1a, 1b, 2a, 2b, 2c).

18. Demonstrate an understanding of the various concepts and techniques used to assess risk in vehicle stops and other responses to calls for service by

a. identifying the seven step violator contact method (1b, 2a, 2b, 2c);

b. identifying the procedures for high risk vehicle stops (1b, 2a, 2b, 2c);

c. identifying the procedures for safe responses to crimes in progress calls (1b, 2a, 2b, 2c);

d. listing the procedures for safe building searches (1b, 2a, 2b, 2c);

e. identifying the procedures for safe response to incidents involving bomb threats (1b, 2a, 2b, 2c);

f. explaining the procedures for the safe response to an active shooter by the first responders (1b, 2a, 2b, 2c);

g. recognizing the homicide in progress (1b, 2a, 2b, 2c);

h. identifying critical considerations in a homicide in progress (1b, 2a, 2b, 2c);

i. establishing immediate action plan tactics (1b, 2a, 2b, 2c);

j. demonstrating proper team formation of the diamond formation or linear (t) formation (1b, 2a, 2b, 2c);

k. defining crowd management (1b, 2a, 2b, 2c);

l. explaining procedures for responding to crowd control situations (1b, 2a, 2b, 2c).

19. Demonstrate the ability to maintain the peace and safeguard lives and property during situations calling for crowd management by

a. defining selected types of crowds and mobs (1b, 2a, 2b, 2c);

b. listing the elements of the offenses relevant to crowd control (1b, 2a, 2b, 2c);

c. identifying factors of responding to crowd control situations (1b, 2a, 2b, 2c).

20. Demonstrate an understanding of and appreciation for the unique opportunities available through effective public service by

a. listing the goals of public service (1b, 2a, 2b, 2c);

b. identifying the consequences of public service (1b, 2a, 2b, 2c);

c. identifying different methods designed to enhance public service (1b, 2a, 2b, 2c);

d. identifying community resources that can be used for assistance in emergencies (1b, 2a, 2b, 2c).

21. Demonstrate an understanding of the value of the crime prevention function and crime prevention activities by

a. defining the role of law enforcement in providing crime prevention services to the public (1b, 2a, 2b, 2c);

b. identifying methods to gain citizen involvement in crime prevention (1b, 2a, 2b, 2c);

c. listing the elements of a crime prevention program (1b, 2a, 2b, 2c).

22. Demonstrate an understanding of the duties and responsibilities of the officer regarding consular notification by

a. identifying the provisions of consular notification as per the Vienna Convention on Consular Notification and bilateral treaties (1b, 2a, 2b, 2c, 2d);

b. identifying the steps to be taken when a foreign national is arrested (1b, 2a, 2b, 2c, 2d);

c. identifying the purpose of the Vienna Convention on Consular Notification treaty and bilateral treaties (1b, 2a, 2b, 2c, 2d);

d. identifying the forms of access a consular official may have to an arrested foreign national (1b, 2a, 2b, 2c, 2d);

e. identifying reasons for conducting consular notification (1b, 2a, 2b, 2c, 2d);

f. using the Consular Notification and Access Handbook and the Consular Notification and Access Reference Card appropriately (1b, 2a, 2b, 2c, 2d).

23. Demonstrate an understanding of the psychological, social, and economic impact of crime on the victims by

a. identifying the elements of a crisis reaction (1b, 2a, 2b, 2c);

b. identifying phases of a victim's reaction to crime (1b, 2a, 2b, 2c);

c. discussing the ripple effect of crime victimization (1b, 2a, 2b, 2c);

d. discussing elements of crisis intervention (1b, 2a, 2b, 2c);

e. discussing the potential for secondary victimization by the criminal justice system and how to avoid it (1b, 2a, 2b, 2c);

f. identifying the elements of an appropriate death notification (1b, 2a, 2b, 2c).

24. Demonstrate an understanding of statutory responsibilities relating to victims' rights by

a. identifying the legal basis of law enforcement's responsibilities to victims' rights (1b, 2a, 2b, 2c);

b. identifying crime victim liaisons and their duties (1b, 2a, 2b, 2c);

c. summarizing legal requirement for providing victims written notice (1b, 2a, 2b, 2c);

d. explaining rights granted to victims of crime (1b, 2a, 2b, 2c);

e. identifying the value to law enforcement of effective assistance to victims (1b, 2a, 2b, 2c).

25. Demonstrate an understanding of the dynamics of family violence by

a. discussing how victims might be affected by family violence (1b, 2a, 2b, 2c);

b. identifying common characteristics of family violence offenders (1b, 2a, 2b, 2c);

c. describing the cycle of abuse phases (1b, 2a, 2b, 2c);

d. discussing examples of the types of abuse often occurring in incidences of family violence (1b, 2a, 2b, 2c);

e. listing examples of some barriers victims face when attempting to leave an abusive relationship (1b, 2a, 2b, 2c).

26. Demonstrate an understanding of the legal issues pertaining to family violence by

a. identifying offenses and statutes that refer to family violence (1b, 2a, 2b, 2c);

b. defining family violence terms related to Title 4 of the Family Code: Protective Orders and Family Violence (1b, 2a, 2b, 2c);

c. explaining the application procedure for a protective order (1b, 2a, 2b, 2c);

d. describing the protective order court hearing process (1b, 2a, 2b, 2c);

e. discussing the meaning of a protective order and the consequences of violating it (1b, 2a, 2b, 2c);

f. discussing the recommended steps in handling family violence calls involving temporary ex-parte protective orders, protective orders, and magistrate's order for emergency protection (1b, 2a, 2b, 2c).

27. Demonstrate an understanding of the legal issues pertaining to child abuse by

a. identifying the legal requirements for investigation of child abuse or neglect (1b, 2a, 2b, 2c);

b. identifying the legal requirements relating to medical treatment and medical examinations of a child (1b, 2a, 2b, 2c);

c. identifying the legal requirements for taking possession of a child in an emergency (1b, 2a, 2b, 2c);

d. identifying the legal requirements relating to communication between law enforcement authorities and school officials (1b, 2a, 2b, 2c).

28. Demonstrate an understanding of procedures for responding to family violence by

a. discussing family violence situations and procedures for conducting preliminary investigations (1b, 2a, 2b, 2c);

b. giving examples of community resources and referrals (1b, 2a, 2b, 2c).

29. Demonstrate a basic understanding and respect for the fundamental rights of and a proficiency in interacting with people with mental illness by

a. discussing the impetus for crisis intervention training and why it is so important to the law enforcement community (1b, 2a, 2b, 2c);

b. recognizing the community mindset as it relates to persons with a mental illness and their relationship with law enforcement personnel (1b, 2a, 2b, 2c);

c. explaining the paradox of crisis intervention training for the law enforcement officer (1b, 2a, 2b, 2c);

d. explaining crisis intervention's role in officer safety (1b, 2a, 2b, 2c);

e. identifying the parameters of an officer's qualification after receiving this training (1b, 2a, 2b, 2c).

30. Demonstrate sensitivity for the adversity of mental illness by

a. defining mental illness (1b, 2a, 2b, 2c);

b. listing four prominent categories of mental illness (1b, 2a, 2b, 2c);

c. listing the three most common personality disorders encountered by law enforcement officers (1b, 2a, 2b, 2c);

d. identifying prevalent behaviors associated with personality disorders (1b, 2a, 2b, 2c);

e. listing the two most common mood disorders encountered by law enforcement officers (1b, 2a, 2b, 2c);

f. identifying prevalent behaviors associated with mood disorders (1b, 2a, 2b, 2c);

g. defining anxiety disorder (1b, 2a, 2b, 2c);

h. discussing psychosis and how it relates to officer contact (1b, 2a, 2b, 2c);

i. briefly illustrating a psychotic episode from a consumer's perspective (1b, 2a, 2b, 2c);

j. explaining how substance abuse and Alzheimer's disease can relate to psychosis (1b, 2a, 2b, 2c);

k. discussing schizophrenia as it relates to psychosis (1b, 2a, 2b, 2c);

l. demonstrating the communicative approach an officer should take when confronting a person in a psychotic episode (1b, 2a, 2b, 2c);

m. discussing the two most common developmental disorders encountered by law enforcement officers (1b, 2a, 2b, 2c);

n. identifying behaviors associated with developmental disorders (1b, 2a, 2b, 2c);

31. Demonstrate a basic understanding of suicide and the evaluation of danger levels by

a. verbalizing commonly stated myths about suicide (1b, 2a, 2b, 2c);

b. discussing suicide and its relationship with mental illness (1b, 2a, 2b, 2c);

c. explaining the phrase suicide by cop (1b, 2a, 2b, 2c);

d. recording questions that will assist in evaluating an individual's current level of suicidal danger (1b, 2a, 2b, 2c);

e. discussing psychopharmacology as it relates to medications prescribed and their prominent side effects in persons with a mental illness (1b, 2a, 2b, 2c);

f. naming four categories of medications utilized in controlling the symptoms of mental illness (1b, 2a, 2b, 2c);

g. listing possible side effects with the use of psychotropic medications;

h. discussing old vs. new medications (1b, 2a, 2b, 2c);

i. identifying three primary reasons why consumers do not take their medications as prescribed (1b, 2a, 2b, 2c);

j. demonstrating crisis communication skills used with individuals with a mental illness (1b, 2a, 2b, 2c);

k. defining crisis behavior and its relevance to CIT Training (1b, 2a, 2b, 2c);

l. listing the basic strategies that are necessary when communicating in crisis situations (1b, 2a, 2b, 2c);

m. listing the components of the first three minute assessment (1b, 2a, 2b, 2c);

n. summarizing the usage of the LEAPS concept of interaction (1b, 2a, 2b, 2c);

o. demonstrating the process of modeling (1b, 2a, 2b, 2c);

p. illustrating examples of you vs. I statements verbally (1b, 2a, 2b, 2c);

q. listing barriers to active communication (1b, 2a, 2b, 2c);

r. discussing the three levels of active listening and techniques for their usage (1b, 2a, 2b, 2c);

s. demonstrating how crisis intervention techniques can be utilized in other crisis situations, such as a domestic disturbance situation (1b, 2a, 2b, 2c);

t. applying knowledge obtained in coursework to class exercises and scenarios for role play (1b, 2a, 2b, 2c);

u. demonstrating a basic understanding of the legal process, including evaluation and techniques for appropriateness of apprehension per Texas Health and Safety Code (Mental Health Code) (1b, 2a, 2b, 2c);

v. explaining the process in evaluating the appropriateness of a warrantless apprehension (1b, 2a, 2b, 2c);

w. describing the step by step process for obtaining an emergency detention order (1b, 2a, 2b, 2c);

x. explaining the criteria an officer must meet in order to take a person with a mental illness who has committed no crime into custody involuntarily for emergency mental health evaluation (1b, 2a, 2b, 2c);

y. proposing justifications in assessing proper use of force option (1b, 2a, 2b, 2c);

z. explaining an officer's limitation of liability (1b, 2a, 2b, 2c);

32. Demonstrate a basic understanding of the world of the mentally ill through discussion of legal and societal concerns and perspectives by

a. discussing the person with a mental illness in the situation of being homeless (1b, 2a, 2b, 2c);

b. discussing the individual with a mental illness as a victim of crime (1b, 2a, 2b, 2c);

c. evaluating the stigma and societal discrimination that exist toward persons who have a mental illness (1b, 2a, 2b, 2c);

d. discussing legal and societal concerns from a mental health consumer's vantage point (1b, 2a, 2b, 2c);

e. discussing the family member's perspective on mental illness (1b, 2a, 2b, 2c);

f. explaining mental health referrals/resources in the student's community (1b, 2a, 2b, 2c);

g. listing the mental health facilities in his/her area that can be utilized as a resource when encountering a subject/suspect identified as having possible mental health issues (1b, 2a, 2b, 2c);

h. investigating possible referral/treatment challenges in his/her community (1b, 2a, 2b, 2c);

i. discussing jail/court related alternatives and referrals for persons with a mental illness (1b, 2a, 2b, 2c);

j. discussing the concept of mental health courts (1b, 2a, 2b, 2c);

k. describing the State of Texas jail diversion ideal (1b, 2a, 2b, 2c);

l. listing two approaches to jail diversion (1b, 2a, 2b, 2c);

m. listing two facts associated with the jail diversion concept (1b, 2a, 2b, 2c);

n. listing the benefits of jail diversion (1b, 2a, 2b, 2c);

Course Learning Outcomes

Course Learning Outcomes

1. End-of-Course Outcomes: Demonstrate an understanding of the Texas laws pertaining to controlled substances and of the major categories of those substances by
    a. defining the terms contained in the Texas Controlled Substances Act, Health and Safety Code (HSC) (1a, 1b, 2a, 2b, 2c);
    b. identifying the six major categories of controlled substances (1a, 1b, 2a, 2b, 2c);
    c. identifying penalty groups for manufacture, delivery, and possession of controlled substances, simulated controlled substances, controlled substance analogues, and other controlled substance offenses (1a, 1b, 2a, 2b, 2c);
    d. identifying evidentiary rules related to the investigation and prosecution of offenses involving the possession and delivery of controlled substances or simulated controlled substances (1a, 1b, 2a, 2b, 2c);
    e. identifying enhancements that may affect the punishment one receives for violating the Texas drug laws (1a, 1b, 2a, 2b, 2c);
    f. identifying the procedures to be followed in the seizure and destruction of controlled substances and related items (1a, 1b, 2a, 2b, 2c).
2. Demonstrate an understanding of Texas laws pertaining to dangerous drugs and abuseable volatile chemicals by
    a. defining terms pertaining to dangerous drugs (1a, 1b, 2a, 2b, 2c);
    b. identifying commonly abused drugs (1a, 1b, 2a, 2b, 2c);
    c. identifying the methods of drug abuse (1a, 1b, 2a, 2b, 2c);
    d. identifying the symptoms commonly associated with drug abuse (1a, 1b, 2a, 2b, 2c);
    e. identifying the penalties for possession, delivery, and manufacture of dangerous drugs, and for forging or altering a prescription (1a, 1b, 2a, 2b, 2c);
    f. discussing the use of uncorroborated testimony and its effect in drug cases (1a, 1b, 2a, 2b, 2c);
    g. identifying the procedures to be followed in the seizure and destruction of dangerous drugs (1a, 1b, 2a, 2b, 2c);
    h. identifying relevant terms relating to abuseable volatile chemicals (1a, 1b, 2a, 2b, 2c);
    i. applying the elements of following violations related to abuseable volatile chemicals (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an understanding of narcotic investigation techniques and procedures by
    a. identifying the procedures for qualifying and utilizing informants in conducting investigations related to controlled substance and dangerous drug violations (1a, 1b, 2a, 2b, 2c);
    b. discussing methods for conducting surveillance of suspected drug violators (1a, 1b, 2a, 2b, 2c);
    c. identifying equipment and its importance when conducting clandestine drug investigations (1a, 1b, 2a, 2b, 2c);
    d. identifying the proper procedures and possible hazards associated with clandestine lab investigations (1a, 1b, 2a, 2b, 2c);
    e. identifying the common places of concealment of controlled substances and dangerous drugs on or in persons, places, and things (1a, 1b, 2a, 2b, 2c);
    f. discussing the incidence of drug interdiction and common characteristics of drug smugglers and their vehicles (1a, 1b, 2a, 2b, 2c);
    g. discussing appropriate interview techniques and factors contributing to probable cause in drug investigation (1a, 1b, 2a, 2b, 2c);
    h. explaining methods of identifying suspected controlled substances and dangerous drugs (1a, 1b, 2a, 2b, 2c).
4. Demonstrate an understanding of the first responder role at a hazardous materials event by
    a. defining the term hazardous material (HAZMAT) (1a, 1b, 2a, 2b, 2c);
    b. discussing the basic concepts of toxic material, infectious material, and ionizing radiation (1a, 1b, 2a, 2b, 2c);
    c. describing the potential effects of a HAZMAT incident (1a, 1b, 2a, 2b, 2c);
    d. identifying sources of onsite information about hazardous materials being transported (1a, 1b, 2a, 2b, 2c);
    e. explaining the National Incident Management System (NIMS) and Incident Command System (ICS) (1a, 1b, 2a, 2b, 2c);
    f. explaining the basic procedures for safeguarding lives at a HAZMAT event (1a, 1b, 2a, 2b, 2c);
    g. describing personal protection equipment (PPE) and decontamination (1a, 1b, 2a, 2b, 2c).
5. Demonstrate an understanding of the psychological, social, and economic impact of crime on the victims by
    a. identifying the elements of a crisis reaction (1a, 1b, 2a, 2b, 2c);
    b. identifying the phases of a victim's reaction to crime (1a, 1b, 2a, 2b, 2c);
    c. discussing the ripple effect of crime victimization (1a, 1b, 2a, 2b, 2c);
    d. discussing elements of crisis intervention (1a, 1b, 2a, 2b, 2c);
    e. discussing the potential for secondary victimization by the criminal justice system and how to avoid it (1a, 1b, 2a, 2b, 2c);
    f. identifying the elements of an appropriate death notification (1a, 1b, 2a, 2b, 2c).
6. Demonstrate an understanding of statutory responsibilities relating to victims' rights by
    a. identifying the legal basis of law enforcement's responsibilities to victims' rights (1a, 1b, 2a, 2b, 2c);
    b. identifying crime victim liaisons and their duties (1a, 1b, 2a, 2b, 2c);
    c. summarizing legal requirement for providing victims' written notices (1a, 1b, 2a, 2b, 2c);
    d. explaining rights granted to victims of crime (1a, 1b, 2a, 2b, 2c);
    e. identifying the value to law enforcement of effective assistance to victims (1a, 1b, 2a, 2b, 2c).
7. Demonstrate a working knowledge of the goals and objectives of criminal investigation by
    a. defining criminal investigation (1a, 1b, 2a, 2b, 2c);
    b. identifying the tools of the criminal investigator (1a, 1b, 2a, 2b, 2c);
    c. listing the goals of criminal investigation (1a, 1b, 2a, 2b, 2c);
    d. defining corpus delicti and discussing its significance in the criminal investigative process (1a, 1b, 2a, 2b, 2c);
    e. discussing the legal significance of evidence (1a, 1b, 2a, 2b, 2c);
    f. discussing the significance of reasonable doubt in criminal cases (1a, 1b, 2a, 2b, 2c);
    g. listing five qualifications of an investigator (1a, 1b, 2a, 2b, 2c).
8. Demonstrate a working knowledge of crimes against property and persons and characteristics of these crimes by
    a. discussing various types of property offenses and characteristics of these types of crimes (1a, 1b, 2a, 2b, 2c);
    b. identifying the characteristics of a street thief (1a, 1b, 2a, 2b, 2c);
    c. identifying what is meant by gray market vehicle (1a, 1b, 2a, 2b, 2c);
    d. explaining what a salvage switch is and how it works (1a, 1b, 2a, 2b, 2c);
    e. identifying some common problems of dealership inventory control (1a, 1b, 2a, 2b, 2c);
    f. identifying some problems with car rental agencies (civil vs. criminal violations) (1a, 1b, 2a, 2b, 2c);
    g. identifying some conditions of a vehicle that might lead an officer to suspect it to be stolen (1a, 1b, 2a, 2b, 2c);
    h. identifying some indicators that lead an officer to believe the vehicle is stolen after it has been stopped and observed (1a, 1b, 2a, 2b, 2c);
    i. describing procedures for determining whether a vehicle has been impounded or repossessed in reported auto theft cases (1a, 1b, 2a, 2b, 2c);
    j. identifying the various types of offenses against persons and the characteristics of these crimes (1a, 1b, 2a, 2b, 2c).
9. Demonstrate a working knowledge of basic preliminary investigatory procedures associated with various crimes by
    a. discussing general preliminary investigatory procedures to be followed when dealing with crimes against property (1a, 1b, 2a, 2b, 2c);
    b. discussing general preliminary investigatory procedures to be followed when dealing with crimes against persons (1a, 1b, 2a, 2b, 2c);
    c. identifying the elements of the continuing or follow up investigation (1a, 1b, 2a, 2b, 2c).
10. Demonstrate a working knowledge of forensic procedures and terminology related to homicide investigation by
    a. discussing the definition of autopsy and autopsy's value in homicide investigations (1a, 1b, 2a, 2b, 2c);
    b. discussing the significance of homicide investigation terms (1a, 1b, 2a, 2b, 2c).

11. Demonstrate a working knowledge of the laboratory and other procedures of value in the criminal investigative process by
    a. identifying typical laboratory procedures and other procedures useful in furthering criminal investigations (1a, 1b, 2a, 2b, 2c).

12. Demonstrate an understanding of and respect for the tasks required in conducting a criminal investigation by
    a. describing procedures to be taken upon arrival at the scene (1a, 1b, 2a, 2b, 2c);
    b. describing procedures for identifying the victim in case of serious injury or death (1a, 1b, 2a, 2b, 2c);
    c. identifying the available special units which may be called to the scene (1a, 1b, 2a, 2b, 2c);
    d. identifying information that should be made known to other officers (1a, 1b, 2a, 2b, 2c);
    e. discussing the legal authority to protect the crime scene and establish the perimeters (1a, 1b, 2a, 2b, 2c);
    f. describing procedures for securing the crime scene (1a, 1b, 2a, 2b, 2c).

13. Demonstrate an understanding of protecting and searching the crime scene by
    a. discussing the objectives in conducting a crime scene search (1a, 1b, 2a, 2b, 2c);
    b. identifying the potential problems in conducting a crime scene search (1a, 1b, 2a, 2b, 2c);
    c. demonstrating the selection and use of crime scene search methods (1a, 1b, 2a, 2b, 2c);
    d. describing procedures involved in implementing a crime scene search (1a, 1b, 2a, 2b, 2c);
    e. determining circumstances under which additional investigative and technical personnel should be called to conduct a crime scene search and when officers may vacate the scene (1a, 1b, 2a, 2b, 2c);
    f. identifying when evidence may and may not be used (1a, 1b, 2a, 2b, 2c);
    g. identifying the procedures to be followed in photographing a crime scene (1a, 1b, 2a, 2b, 2c);
    h. discussing the value of crime scene sketches (1a, 1b, 2a, 2b, 2c);
    i. describing the proper procedures for crime scene documentation (1a, 1b, 2a, 2b, 2c);
    j. demonstrating methods for preparing a crime scene sketch (1a, 1b, 2a, 2b, 2c);
    k. identifying types of crime scene sketches (1a, 1b, 2a, 2b, 2c);
    l. explaining chain of custody (1a, 1b, 2a, 2b, 2c);
    m. using procedures for establishing chain of custody (1a, 1b, 2a, 2b, 2c);
    n. categorizing the type of evidence to be collected for the type of offense committed (1a, 1b, 2a, 2b, 2c);
    o. demonstrating safe methods for preserving evidence in original condition (1a, 1b, 2a, 2b, 2c);
    p. applying procedures for obtaining information from victims, complainants, and witnesses (1a, 1b, 2a, 2b, 2c).

14. Demonstrate an understanding of the components of and the differences between interviewing complainants/witnesses, victims, and suspects by
    a. explaining the legal requirements for conducting interviews (1a, 1b, 2a, 2b, 2c);
    b. practicing the techniques used in conducting an interview (1a, 1b, 2a, 2b, 2c).

15. Demonstrate a basic understanding of the officer's responsibility in the booking process by
    a. listing the reasons and procedures for search during booking (1a, 1b, 2a, 2b, 2c);
    b. practicing proper manner of detailed recording and securing of prisoner's property (1a, 1b, 2a, 2b, 2c);
    c. practicing proper procedure to record all necessary booking data on a prisoner and vehicle impound information (1a, 1b, 2a, 2b, 2c);
    d. identifying the processes by which stolen and wanted information may be retrieved (1a, 1b, 2a, 2b, 2c);
    e. identifying procedures to follow when a prisoner and/or officer may have suffered bodily injury (1a, 1b, 2a, 2b, 2c);
    f. identifying results of a proper booking process (1a, 1b, 2a, 2b, 2c).

16. Demonstrate a basic understanding of how to be an effective courtroom witness by
    a. discussing the benefits of professional courtroom demeanor and appearance (1a, 1b, 2a, 2b, 2c);
    b. employing the steps used to refresh memory in preparation for testimony (1a, 1b, 2a, 2b, 2c);
    c. demonstrating proper demeanor when called to testify (1a, 1b, 2a, 2b, 2c);
    d. describing methods of court procedure (1a, 1b, 2a, 2b, 2c);
    e. using techniques for presenting effective testimony (1a, 1b, 2a, 2b, 2c);
    f. demonstrating responses to questions within the limits of known information without speculation (1a, 1b, 2a, 2b, 2c);
    g. explaining the procedure for exclusion of witnesses from the courtroom (1a, 1b, 2a, 2b, 2c);
    h. giving examples of courtroom tactics used by defense attorneys (1a, 1b, 2a, 2b, 2c);
    i. demonstrating the ability to testify effectively and to critique the testimony of others (1a, 1b, 2a, 2b, 2c).

17. Demonstrate proficiency in the case management process by
    a. describing the reasons for case management (1a, 1b, 2a, 2b, 2c);
    b. discussing the value of a properly prepared case folder (1a, 1b, 2a, 2b, 2c);
    c. preparing the type of documentary information included in a case folder and in a prosecution summary (1a, 1b, 2a, 2b, 2c);
    d. identifying the necessity of properly prepared case files (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate outcomes set forth for Texas Commission on Law Enforcement Course #1000. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic fitness and wellness concepts related to the ability to perform law enforcement job tasks and to maintain a high level of fitness and wellness by
    a. describing the importance and relevance of health habits, fitness, and wellness to the law enforcement profession (1b, 2a, 2b, 2c);
    b. identifying the guidelines and principles of a safe exercise program (1b, 2a, 2b, 2c);
    c. identifying the principles of an exercise program (1b, 2a, 2b, 2c);
    d. identifying FITT for thresholds of fitness training related to cardiovascular, strength, anaerobic, and flexibility training (1a, 1b, 2a, 2b, 2c);
    e. identifying the components of an exercise program (1a, 1b, 2a, 2b, 2c);
    f. identifying safety measures for fitness training (1a, 1b, 2a, 2b, 2c).
2. Demonstrate an understanding of the development and influence of the evolution of police service models and styles by
    a. describing significant historical events that have influenced policing in the United States (1a, 1b, 2a, 2b, 2c);
    b. tracing the historical development of police service models or styles (1a, 1b, 2a, 2b, 2c);
    c. explaining the evolution of policing in Texas (1a, 1b, 2a, 2b, 2c);
    d. listing the requirements of licensees under selected sections of the current Commission Rules (1a, 1b, 2a, 2b, 2c);
    e. explaining the traditional police service model (1a, 1b, 2a, 2b, 2c);
    f. explaining community policing (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an understanding of the organization's role in society and police organizational issues by
    a. explaining the police organization's role in society (1a, 1b, 2a, 2b, 2c);
    b. recognizing the values of providing quality police customer service (1a, 1b, 2a, 2b, 2c);
    c. analyzing the characteristics of traditional (formal) police organizational structure and police subculture (informal) (1a, 1b, 2a, 2b, 2c).
4. Demonstrate an understanding of and respect for professionalism as it applies to law enforcement by
    a. discussing the concept of professionalism (1a, 1b, 2a, 2b, 2c);
    b. discussing the characteristics of professionalism (1a, 1b, 2a, 2b, 2c).
5. Demonstrate an understanding and acceptance of the crucial role of ethics as related to professionalism by
    a. discussing the Law Enforcement Code of Ethics (1a, 1b, 1c, 2a, 2b, 2c);
    b. discussing ethical dilemmas in law enforcement (1a, 1b, 1c, 2a, 2b, 2c);
    c. discussing the differences between physical and moral courage (1a, 1b, 1c, 2a, 2b, 2c).
6. Demonstrate an understanding of the civil and criminal laws related to unethical behavior of peace officers by
    a. discussing Title 8 of the Texas Penal Code in relationship to an officer's behavior (1a, 1b, 2a, 2b, 2c);
    b. explaining relevant federal criminal law in relationship to an officer's behavior (1a, 1b, 2a, 2b, 2c);
    c. listing civil penalties for sexual harassment and inappropriate officer conduct (1a, 1b, 2a, 2b, 2c).
7. Demonstrate an understanding of and respect for the U.S. Constitution and Bill of Rights as they pertain to the role of peace officers and the rights of citizens by
    a. explaining the basis of the U.S. Constitution and Bill of Rights with special emphasis on the freedom of the individual and human rights (1a, 1b, 2a, 2b, 2c);
    b. defining Writ of Habeas Corpus (1a, 1b, 2a, 2b, 2c);
    c. explaining the main concepts of Article 2 and Article 3 of the Constitution (1a, 1b, 2a, 2b, 2c);
    d. explaining the rights enumerated in Constitutional Amendments I, IV, V, VI, VIII, IX, X, and XIV (1a, 1b, 2a, 2b, 2c);
    e. analyzing personal and organizational values relative to police role in relation to the Constitution and Bill of Rights (1a, 1b, 2a, 2b, 2c).
8. Demonstrate an understanding of and respect for the Texas Constitution and Bill of Rights as they pertain to the role of peace officers and the rights of citizens by
    a. explaining an individual's rights proclaimed under Article 1 of the Constitution of the State of Texas (1a, 1b, 2a, 2b, 2c);
    b. defending an individual's rights proclaimed under Article 1 of the Constitution of the State of Texas (1a, 1b, 2a, 2b, 2c);
    c. explaining Article 17 of the State Constitution as it relates to the ever evolving nature of the document (1a, 1b, 2a, 2b, 2c).
9. Demonstrate an understanding of the specific roles and interrelationships of the various components within the criminal justice system by
    a. explaining the structure and role of the criminal justice system (1a, 1b, 2a, 2b, 2c);
    b. explaining how the three components of the criminal justice system directly affect each other (1a, 1b, 2a, 2b, 2c);
    c. identifying the differences between civil and criminal law (1a, 1b, 2a, 2b, 2c);
    d. explaining the civil/criminal courts and their jurisdiction (1a, 1b, 2a, 2b, 2c).
10. Demonstrate an understanding of the statutory authority for administration of criminal procedure as enumerated by the Texas Code of Criminal Procedure (CCP) by
    a. identifying the basis for administration of criminal procedure in Texas (1a, 1b, 2a, 2b, 2c);
    b. identifying the basic rights enumerated in the CCP (1a, 1b, 2a, 2b, 2c).
11. Demonstrate an understanding of the general duties and responsibilities of officers as enumerated by the CCP by
    a. identifying magistrates and their duties (1a, 1b, 2a, 2b, 2c);
    b. identifying peace officers (1a, 2c);
    c. listing the duties of peace officers (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of peace officers relating to racial profiling (1a, 1b, 2a, 2b, 2c);
    e. listing the duties of peace officers relating to forfeiture of contraband (1a, 1b, 2a, 2b, 2c).
12. Demonstrate an understanding of the courts and their criminal jurisdiction by
    a. identifying courts which have criminal jurisdiction (1a, 1b, 2a, 2b, 2c);
    b. identifying the jurisdiction of the courts of appeals (1a, 1b, 2a, 2b, 2c);
    c. identifying the jurisdiction of the court of criminal appeals (1a, 1b, 2a, 2b, 2c);
    d. identifying the jurisdiction of district courts (1a, 1b, 2a, 2b, 2c);
    e. identifying the jurisdiction of the county courts (1a, 1b, 2a, 2b, 2c);
    f. identifying the jurisdiction of the justice courts (1a, 1b, 2a, 2b, 2c);
    g. identifying the jurisdiction of municipal courts (1a, 1b, 2a, 2b, 2c).
13. Demonstrate an understanding of the procedures to be followed in the prevention and suppression of offenses by
    a. listing the duties of officers relating to family violence prevention (1a, 1b, 2a, 2b, 2c);
    b. listing the duties of officers relating to threats of injury or death to persons or damage to property (1a, 1b, 2a, 2b, 2c);
    c. listing the duties of officers relating to suppression of riots and other disturbances (1a, 1b, 2a, 2b, 2c);
    d. listing the duties of officers relating to protective orders for victims of sexual assault (1a, 1b, 2a, 2b, 2c).
14. Demonstrate an understanding of the time limitations relating to felonies and misdemeanors by
    a. identifying the time limitations relating to felony offenses (1a, 1b, 2a, 2b, 2c);
    b. identifying the time limitations relating to misdemeanor offenses (1a, 1b, 2a, 2b, 2c);
    c. identifying the time limitations relating to aggravated offenses, attempt, conspiracy, solicitation, and organized criminal activity (1a, 1b, 2a, 2b, 2c).

15. Demonstrate an understanding of court processes as they relate to criminal offenses by
    a. explaining court papers relating to offenses (1a, 1b, 2a, 2b, 2c);
    b. explaining court papers relating to witnesses (1a, 1b, 2a, 2b, 2c);
    c. explaining the bail procedure (1a, 1b, 2a, 2b, 2c).
16. Demonstrate an understanding of the process relating to inquests upon dead bodies by
    a. identifying requirements for an inquest (1a, 1b, 2a, 2b, 2c).
17. Demonstrate an understanding of the process relating to the sex offender registration program by
    a. identifying requirements for sex offenders (1a, 1b, 2a, 2b, 2c).
18. Identify the elements of offenses in the Texas Penal Code by
    a. explaining the organization of the PC (1a, 2c);
    b. explaining the general provisions of the PC (1a, 2c);
    c. describing the proof required to convict a person of an offense (1a, 1b, 2a, 2b, 2c);
    d. defining terms as they relate to multiple prosecutions (1a, 1b, 2a, 2b, 2c);
    e. explaining the general principles of criminal responsibility (Title 2) of the penal code (1a, 1b, 2a, 2b, 2c);
    f. explaining the culpable mental states (1a, 1b, 2a, 2b, 2c);
    g. identifying when one person is criminally responsible for conduct of another (1a, 1b, 2a, 2b, 2c);
    h. identifying general defenses to criminal responsibility (1a, 1b, 2a, 2b, 2c);
    i. explaining the punishments (Title 3) of the penal code (1a, 1b, 2a, 2b, 2c);
    j. applying the elements of offenses for all offenses (1a, 1b, 2a, 2b, 2c).
19. Demonstrate an understanding of the causes and effects of stress in the lives of peace officers by
    a. identifying the types of stress related to the law enforcement profession (1a, 1b, 2a, 2b, 2c);
    b. identifying the emotional and physical symptoms of the physiology of stress (1a, 1b, 2a, 2b, 2c);
    c. identifying common symptoms and illnesses associated with stress (1a, 1b, 2a, 2b, 2c);
    d. identifying common stressors for peace officers (1a, 1b, 2a, 2b, 2c).
20. Develop personal strategies for the positive management of stress by
    a. recognizing strategies to manage stress (1a, 1b, 2a, 2b, 2c);
    b. identifying ways to reduce stress through relaxation (1a, 1b, 2a, 2b, 2c).

CJSA 1330 - Cybercrimes

General

Course Key
15884

Course Rubric	Course Number	Course Title
CJSA	1330	Cybercrimes

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An introduction to cybercrime. Topics include specific laws, investigative techniques, and criminological theories applicable to computer crime.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify principles of organization, administration, management, motivation, and leadership; and describe the quality approach to community relations. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the law enforcement component of criminal justice by
    a. distinguishing between supervision and management (1a, 1b, 2c);
    b. defining community policing (1a, 1b, 2c);
    c. identifying the elements of effective supervision (1a, 1b, 2c);
    d. identifying discipline strategies (1a, 1b, 2c).
2. Demonstrate an understanding of leadership and its value in criminal justice by
    a. defining leadership (1a, 1b, 2c);
    b. identifying the process and necessary skills of leadership (1a, 1b, 2c);
    c. identifying major theories of leadership (1a, 1b, 2c);
    d. defining time management (1a, 1b, 2a, 2b, 2c);
    e. developing strategic planning strategies for time management enhancement (1a, 1b, 2a, 2b, 2c).
3. Conduct independent research on issues related to criminal justice by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2b, 2c);
    b. synthesizing research and knowledge gained (1a, 1b, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2c).
4. Demonstrate an understanding of effective communication and its impact on the field of criminal justice by
    a. identifying effective communication strategies (1a, 1b, 2b, 2c);
    b. identifying problem solving models (1a, 1b, 2a, 2b, 2c);
    c. identifying verbal and nonverbal communication cues (1a, 1b, 2a, 2b, 2c).

Course Rubric	Course Number	Course Title
CJSA	2331	Child Abuse: Prevention and Investigation

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Forms of child abuse and neglect and the traits of typical abusers. Includes strategies to investigate abuse, interview victims and witnesses, document evidence in accordance with state law, and conduct case studies.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify forms of abuse and neglect; compare and contrast characteristics of typical abusers; and outline investigative strategies. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the dynamics of child abuse by
    a. defining child abuse and neglect (1a, 1b, 2c);
    b. identifying types of child abuse and neglect (1a, 1b, 2c);
    c. identifying the role of the offender, non-offending parent, and child victim (1a, 1b, 2c).
2. Demonstrate an understanding of the social problems related to child abuse and neglect by
    a. assessing the role of treatment (1a, 1b, 2c);
    b. identifying the risk assessment factors in child abuse/neglect cases (1a, 1b, 2c);
    c. identifying trends in society as they pertain to issues of child abuse/neglect (1a, 1b, 2c).
3. Demonstrate the ability to conduct independent research on issues related to child abuse/neglect by
    a. identifying pertinent scholarly resources (1a, 1b, 2a, 2c);
    b. synthesizing research and knowledge gained (1a, 1b, 2a, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2c).
4. Demonstrate an understanding of the state law in accordance with child abuse/neglect by
    a. analyzing case studies (1a, 1b, 2b, 2c);
    b. determining what cases are child abuse/neglect cases (1a, 1b, 2b, 2c);
    c. identifying the law relevant to child abuse cases (1a, 1b, 2b, 2c);
    d. applying the law to child abuse cases (1a, 1b, 2b, 2c);
    e. preparing written documented reports of child abuse/neglect cases (1a, 1b, 2c);
    f. locating community resources to aid families dealing with child abuse/neglect issues (1a, 1b, 2a, 2b, 2c).

Course Rubric	Course Number	Course Title
CJSA	2334	Contemporary Issues in Criminal Justice
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A series of lectures and class participation exercises presenting selected topics currently confronting criminal justice personnel and the public they serve. (Capstone Course - Must be taken during the last semester of the program.)

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explore an assigned contemporary topic in criminal justice; list specific problems within the topic and suggest solutions. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the dynamic nature of criminal justice issues, the criminal justice system, and the need to stay current and informed of the ever-changing environment as a team member by
    a. reviewing case studies (1a, 1b, 2b, 2c);
    b. analyzing the nature of current issues (1a, 1b, 2b, 2c);
    c. explaining the rationale for developing research based skills and abilities (1a, 1b, 2c);
    d. explaining the need for critical reading and thinking as issues are analyzed (1a, 1b);
    e. participating in discussion and debate (1a, 1b, 2c).
2. Demonstrate an understanding of systems thinking and its value in criminal justice as a member of a team in a workplace simulation by
    a. reviewing case studies (1a, 1b, 2b, 2c);
    b. assessing the role the system or system thinking played in the scenario (1a, 1b, 2b, 2c);
    c. explaining the value of systems thinking as it relates to being proactive (1a, 1b, 2b, 2c);
    d. determining whether the presence or absence of systems philosophy affected the outcomes associated with the case study or problem (1a, 1b, 2b, 2c).
3. Conduct independent research on issues related to criminal justice by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2c);
    b. synthesizing research and knowledge gained (1a, 1b, 2b, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2c);
    d. delivering the reports in a simulated work environment (1a, 1b, 2c).
4. Demonstrate an understanding of effective recruitment and selection strategies in the field of criminal justice as a member of a workplace simulation team by
    a. reviewing case studies (1a, 1b, 2a, 2c);
    b. determining why human resources affect criminal justice as a system and as a profession (1a, 1b, 2a, 2c);
    c. identifying strengths and weakness of current recruitment and selection systems (1a, 1b, 2a, 2c);
    d. preparing strategies for recruitment and selection (1a, 1b, 2a, 2c);
    e. analyzing employment trends in criminal justice (1a, 1b, 2a, 2c).

CJSA	2388	Internship in Criminal Justice and Safety Studies
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	0	9

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-0-9) A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the dynamic nature of criminal justice issues and the need to stay current and informed about the ever changing environment as a member of a team by
    a. providing practical perspectives on the academic concepts and theories studied in the classroom (1a, 1b, 2c);
    b. locating an organization linked to the criminal justice field and modeling him/herself as an employee (1a, 1b, 2c);
    c. demonstrating an understanding of system thinking in the workforce (1a, 1b, 2c).
2. Demonstrate the ability to conduct research and analysis on issues within the workforce by
    a. identifying problems and solutions (1a, 1b, 2c);
    b. documenting experiences in a journal (1a, 1b, 2c);
    c. preparing written and oral reports based on the information obtained from the experience (1a, 1b, 2c);
    d. delivering the report in both oral and written format (1a, 1b, 2c).

CNBT 1110 - Basic Construction Safety

General

Course Key
10515

Course Rubric	Course Number	Course Title
CNBT	1110	Basic Construction Safety

Semester Credit Hours	Lecture Hours	Lab Hours
1	1	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0) Basic job site construction safety in residential, commercial, and industrial construction.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define terms used in construction safety; discuss local, state, and national standards of safety on the job site; list and describe the common hazardous materials and processes; and develop a tool box talk for the job site. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the basic types of occupational safety hazards associated with the construction industry by
    a. explaining the different types of occupational safety hazards (1a);
    b. recognizing, evaluating, and controlling occupational safety hazards as they relate to OSHA (1b).
2. Study and explore various information regarding workers' rights, employer responsibilities, and filing a complaint by
    a. identifying the employee's responsibilities and roles in the work area regarding safety procedures (1a, 1b);
    b. identifying the employer's responsibilities and roles in the work area regarding safety procedures (1a);
    c. identifying the procedure for filing a complaint (1a, 1b).
3. Demonstrate understanding of a working knowledge of construction safety, improve communication skills, and promote a sense of civic duty and responsibility with high moral and ethical standards by
    a. communicating to other employees the safety precautions and procedures (1a);
    b. identifying the various ethical and moral standards as they relate to safety and the welfare of others (1b).
4. Demonstrate understanding of and describe site safety measures relating to construction operation and use of equipment and gain knowledge of work ethics by
    a. knowing OSHA and its importance (1a, 1b);
    b. understanding the responsibilities of the workers (1b, 2b).
5. Demonstrate understanding of about the various careers, overview, and future of the construction industry by
    a. recognizing the different types of construction industry sectors (1a, 1b);
    b. explaining construction ethics, technology, and opportunities (1a, 2e).

CNBT 1300 - Residential/Light Comm Cons Drawings

General

Course Key

Course Rubric	Course Number	Course Title
CNBT	1300	Residential and Light Commercial Construction Drawings

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) Introduction to construction drawings with a focus on residential and light commercial construction.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify construction drawing symbols and abbreviations; interpret a set of construction drawings; and correlate elevations, sections, details, plan views, schedules, general notes, and use of architectural and engineering scales. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic types of construction blueprints by:
    a. explaining why drawings are important in the construction industry;
    b. identifying what is included in a set of construction drawings;
    c. describing how drawings and prints are made;
    d. explaining the advantages of computer aided design and drafting.
2. Demonstrate an understanding of construction math and its application by:
    a. converting measurements both in English and metric system;
    b. calculating numbers in fractions;
    c. calculating areas and volumes of objects;
    d. relating math to construction applications.
3. Demonstrate an understanding of different measuring tools commonly used in the construction industry by:
    a. reading both customary and metric rulers and tapes;
    b. explaining the commonly used drawing scales.
4. Demonstrate an understanding of commonly used lines and symbols in construction drawings by:
    a. defining the different plan symbols and abbreviations;
    b. identifying features from different lines;
    c. describing drawing symbols and their meanings;
    d. identifying material drawing renderings and fills with their indicated symbols on the drawing.
5. Demonstrate an understanding of pictorial drawings by:
    a. explaining the basic concepts of perspective drawing;
    b. sketching isometric and oblique drawings;
    c. drawing objects and structures using one and two point perspective.
6. Demonstrate an understanding of orthographic drawings by:
    a. visualizing orthographic objects and structures;
    b. creating orthographic sketches;
    c. identifying different types of orthographic drawings.
7. Demonstrate the ability to use engineer and architectural scales and read dimensioned drawings by:
    a. scaling dimension from a print;
    b. reading dimension on a print;
    c. performing basic math regarding dimensions;
    d. identifying items that should be dimensioned on different drawing types.
8. Demonstrate an understanding of the CSI Master Format and ASTM Uni-format of specification by:
    a. explaining items that are included in the project specification;
    b. explaining the importance of specification;
    c. presenting a particular topic within specification.

9. Demonstrate an understanding of the different types of construction materials and their specific uses by:
    a. identifying various basic construction materials;
    b. identifying the components of concrete;
    c. explaining the different concrete construction methods;
    d. describing the different types of masonry units (bricks, blocks, stone, etc.);
    e. classifying wood as hardwood or softwood;
    f. recognizing different structural metal and steel shapes;
    g. describing various types of glass, plastic, and insulation;
    h. identifying symbols representing materials on drawings.

10. Demonstrate skill at dealing with plot plans by:
    a. recognizing common features of a plot plan;
    b. identifying property line description;
    c. explaining the difference between true north and plan north;
    d. reading contour elevation lines on a topography plan.

11. Demonstrate an understanding of foundation prints by:
    a. distinguishing the various types of soils and their importance in construction;
    b. identifying the different methods and requirements of site preparation as reflected in grading plans;
    c. identifying footings on a foundation plan;
    d. identifying various components of a foundation system.

12. Demonstrate an understanding of residential and commercial framing systems by:
    a. identifying the differences between heavy and light framing;
    b. recognizing the components of various framing systems;
    c. explaining concrete reinforcing notation;
    d. reading beam and column schedules;
    e. identifying various structural steel members;
    f. explaining stair details and terms.

13. Demonstrate an understanding of plumbing, mechanical, and electrical prints by:
    a. identifying various piping systems and plumbing fixture symbols;
    b. explaining HVAC systems and types of heating and cooling systems and symbols;
    c. identifying electrical symbols and terms.

14. Demonstrate an understanding of site safety measures relating to construction operation and use of equipment as well as gain knowledge of work ethics by:
    a. explaining OSHA and its importance;
    b. explaining the responsibilities of the workers.

15. Demonstrate an understanding of the various careers available and an overview and future of the construction industry by:
    a. recognizing the different types of construction industry sectors;
    b. explaining construction ethics, technology, and opportunities.

CNBT 1302 - Mech/Plumb/Elect System Construction I

General

Course Key
10516

Course Rubric	Course Number	Course Title
CNBT	1302	Mechanical, Electrical & Plumbing Systems in Construction I

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A presentation of the basic mechanical, electrical, and plumbing components in construction and their relationship to residential and light commercial buildings.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify equipment and components of heating, air conditioning, and ventilation, electrical, and plumbing systems; and describe the relationships between the mechanical, electrical, and plumbing systems; and discuss implications of sustainable building systems. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of an introduction to building mechanical, plumbing, and electrical design by
    a. explaining the elementary engineering concepts and design principles of electrical design (1a, 1b);
    b. explaining the elementary engineering concepts and design principles of mechanical and plumbing design (1a, 1b);
    c. defining the different electrical, mechanical, and plumbing vocabulary terms (1a, 1b);
    d. identifying the codes that govern electrical, mechanical, and plumbing systems for residential and commercial building (1a, 1b).

2. Demonstrate understanding of the fundamental concept of electrical and mechanical calculation by
    a. calculating power, voltage, current, and resistance as applied to residential and commercial buildings (1a, 1b, 2a, 2b);
    b. calculating mechanical problems (1a, 1b, 2a, 2b).

3. Demonstrate understanding of the growing complexity of design standards and regulations and rapid changes in new building technologies as related to electrical, mechanical, and plumbing systems by
    a. identifying the roles of the construction parties involved (1a, 1b);
    b. identifying the roles of architectural and engineering technicians I (1a, 1b).

4. Demonstrate understanding of and describe the step by step approach to the design of each system by
    a. identifying the various requirements in the design process of an electrical system (1a, 1b);
    b. identifying the various requirements in the design process of a mechanical system (1a, 1b);
    c. identifying the various requirements in the design process of a plumbing system (1a, 1b).

5. Demonstrate understanding of the equipment and components of electrical, plumbing, heating, air conditioning, and ventilation systems by
    a. describing the relationship between mechanical, plumbing, and electrical systems (1a, 1b);
    b. discussing implications of a sustainable building system on design (1a, 1b);
    c. learning load calculations for an electrical design project (1a, 1b, 2a, 2b);
    d. explaining jobsite inspection process (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify construction materials; list their applications; and describe the various methods of construction. Explain the development and use of new materials being introduced to the construction industry under sustainable building standards. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of an overview of the construction delivery process by
    a. identifying and explaining the different project delivery processes and stages (1a, 1b);
    b. explaining the principles of the bidding process (1a, 1b);
    c. identifying the roles of the project team player (1a, 1b);
    d. identifying the content of construction documents (1a, 1b);
    e. understanding and applying the various codes and standards (1a, 1b, 2c).
2. Demonstrate an understanding of the principles of sustainable construction by
    a. discussing practices and fundamentals of sustainable construction (1a, 1b);
    b. identifying construction materials that are from rapidly renewable resources (1a, 1b);
    c. defining concepts of eco-labeling of building (1a, 1b);
    d. recognizing the different characteristics of green building products (1a, 1b, 2c);
3. Demonstrate an understanding of wood materials for light and heavy construction by
    a. differentiating wood, timber, and lumber (1a, 1b);
    b. defining and identifying softwood and hardwood classification (1a, 1b);
    c. recognizing manufactured wood products (1a, 1b);
    d. identifying different accessories associated with wood construction (1a, 1b).
4. Demonstrate an understanding of metals as materials for construction by
    a. differentiating forms of metals and their manufacturing process (1a, 1b);
    b. distinguishing different structural steel shapes and light-gauge metal (1a, 1b);
    c. recognizing the different components of wall, ceiling, flooring, and roofing metal system (1a, 1b);
    d. labeling steel detailing and fabrication (1b, 2c);
    e. explaining corrosion protection (1a, 1b).
5. Demonstrate an understanding of reinforced concrete construction materials by
    a. differentiating between lime, pc, and concrete (1a, 1b);
    b. defining and explaining the process of hydration (1a, 1b, 1c);
    c. identifying the different concrete curing processes (1a, 1b);
    d. explaining the various alternative materials for Portland cement (1a, 1b);
    e. describing the physical and mechanical properties of concrete (1a, 1b);
    f. distinguishing various grades of cement and reinforcing bars (1a, 1b);
    g. placing and erecting concrete (1a, 1b, 1c, 2b);
    h. explaining the methods and process of preparing concrete formworks for foundation, beams, slabs, and columns (1a, 1b);
    i. differentiating cast-in-place concrete and precast concrete (1a, 1b).
6. Demonstrate an understanding of masonry as construction materials by
    a. identifying the different masonry materials and their application (1a, 1b);
    b. differentiating types of masonry mortars (1a, 1b);
    c. differentiating the different types of brick masonry wall construction, patterns, and orientation (1a, 1b);
    d. identifying the various materials, accessories, and components associated with masonry construction (1a, 1b).
7. Demonstrate an understanding of the various types of soils and foundation systems by
    a. identifying the different classifications of soils (1a, 1b);
    b. identifying the different classifications of excavation (1a, 1b);
    c. identifying the different types of foundations (1a, 1b);
    d. explaining and applying safety practices (1a, 1b).

CNBT 1342 - Building Codes and Inspections

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify various construction classifications and occupancy categories; cross reference the guidelines, tables, charts, and specifications as presented in the building codes; and determine if construction meets building codes. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic concepts of the laws and regulations governing the building industry by
    a. explaining local, state, regional, and national code requirements in building construction (1a, 1b, 1c);
    b. explaining the different regulations that govern the building industry (1a, 1b);
    c. identifying the different professional choices of designers and contractors (1a, 1b);
    d. explaining construction law, safety, and ethical values concerning green technology (1a, 1b).
2. Demonstrate an understanding of a variety of construction contract agreements by
    a. defining the different types of contract agreements (1a, 1b);
    b. explaining the roles and responsibilities of the contract parties involved (1a, 1b, 2b, 2d);
    c. explaining the different parts of the contract agreement (1a, 1b);
    d. discussing insurance coverage and requirements of the parties involved (1a, 1b).
3. Execute a code review of a building project by
    a. explaining the code review process (1a, 1b);
    b. interpreting codes in construction drawings and specifications (1a, 1b, 2c);
    c. preparing a summary report of the code review (1a, 1b, 2a, 2b, 2c);
    d. administering the contract agreement for construction (1a, 1b, 2b, 2c, 2d).
4. Demonstrate an understanding of the process of writing specifications by
    a. explaining the importance of the specifications in the contract (1a, 1b);
    b. explaining the proper sequence and organization in preparing a specification (1a, 1b, 2c);
    c. explaining the contents of the project manual and their formats (1a, 1b, 2c);
    d. preparing a specification for residential and commercial projects (1a, 1b, 2c).
5. Demonstrate an understanding of green building requirements, codes, and ethical values by
    a. explaining the importance of sustainability (1a, 1b);
    b. incorporating green knowledge in the design and construction process (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform materials testing procedures; demonstrate the use of testing equipment; perform inspection procedures; and prepare test samples. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of different compositions of soil by
    a. distinguishing between different classifications of rocks (1a, 1b);
    b. discussing cohesive and cohesion-less soils (1a, 1b);
    c. discussing Atterberg limits (1a, 1b);
    d. explaining soil classification systems (1a, 1b).
2. Demonstrate an understanding of the effects of frost and freezing on soils by
    a. discussing soil strength and improvement (1a, 1b);
    b. identifying the effects of frost and freezing on structures (1a, 1b).
3. Demonstrate an understanding of the different classifications of aggregates by
    a. explaining fine and coarse aggregates (1a, 1b);
    b. understanding the use of aggregates in cement (1a, 1b);
    c. calculating the required fineness modulus of aggregates (1a, 1b).
4. Demonstrate an understanding of different types of cement by
    a. describing non-hydraulic cements (1a, 1b);
    b. describing Portland cement (1a, 1b);
    c. identifying characteristics of concrete (1a, 1b);
    d. producing concrete specimens for testing and evaluation (1a, 1b, 2a, 2e).
5. Demonstrate an understanding of the different types of woods by
    a. differentiating between early and late wood (1a, 1b);
    b. explaining the relationship of wood's moisture content and its strength (1a, 1b).
6. Demonstrate an understanding of the different uses of asphalt cements by
    a. identifying the different components of asphalt (1a, 1b);
    b. describing the different methods used in asphalt (1a, 1b).
7. Differentiate between ferrous and nonferrous metals by
    a. discussing manufacturing of steel (1a, 1b);
    b. explaining the use of heat treated metals (1a, 1b);
    c. explaining the process of heat treating (1a, 1b);
    d. performing laboratory testing for tension of ferrous and nonferrous metals (1a, 1b, 1c, 2c, 2e).
8. Demonstrate an understanding of the physical and mechanical properties of traditional construction materials and green building materials by
    a. performing laboratory testing for the physical and mechanical properties of traditional and green building construction materials (1a, 1b, 2a, 2b, 2c, 2e);
    b. explaining procedures of enhancing properties of traditional and green building materials (1a, 1b, 1c, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain estimating procedures; estimate materials from contract documents; and calculate labor units and costs. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of construction projects and the bidding process by
    a. identifying the different types of construction projects (1a, 1b);
    b. differentiating the characteristics of different construction projects (1a, 1b);
    c. defining the bidding process (1a, 1b);
    d. explaining the procedures involved in the bidding process (1a, 1b, 2c);
    e. explaining the different bidding methods (1a, 1b).
2. Demonstrate the ability to interpret construction plans and specifications in construction documents by
    a. distinguishing between construction plans and specifications (1a, 1b);
    b. explaining the importance of construction plans and specifications (1a, 1b);
    c. explaining the relationship of the construction plans and specifications (1a, 1b, 2c);
    d. identifying the direct cost and indirect cost of a construction project (1a, 1b).
3. Demonstrate an understanding of the different types of estimates by
    a. defining estimating, estimator, and estimate (1a, 1b);
    b. differentiating the different types of estimates (1a, 1b);
    c. explaining the uses of the different types of estimates (1a, 1b);
    d. comparing the degree of accuracy of each type of estimate (1a, 1b, 2c).
4. Demonstrate an understanding of determining unit of measurements in estimating by
    a. identifying the different unit of measurements in estimating (1a, 1b);
    b. applying the appropriate units to the different measurements involved in estimating (1a, 1b, 2a, 2c);
    c. choosing the appropriate unit to be applied for each type of estimate (1a, 1b).
5. Demonstrate the ability to perform quantity takeoff for earthwork and site works by
    a. explaining the different factors that affect quantification of site works (1a, 1b);
    b. differentiating the two methods of quantifying earthworks (1a, 1b);
    c. applying the formula for determining volume of soil excavation (1a, 1b);
    d. performing quantifying earth volumes using the different methods in a real world construction project (1a, 1b, 1c, 2c).
6. Demonstrate an understanding of the different methods of determining labor and equipment costs by
    a. explaining how labor estimates are a direct correlation of the material takeoff (1a, 1b);
    b. determining labor work hours based on productivity rates (1a, 1b);
    c. differentiating the direct and indirect cost of equipment (1a, 1b).

7. Perform quantification of the amount of concrete and reinforcement used for foundation, walls, and other structural members by
    a. identifying the unit of measurement used in concrete (1a, 1b);
    b. applying the formula for determining volume of concrete (1a, 1b);
    c. quantifying reinforcement needed for foundation, walls, slabs, columns, and beams (1a, 1b, 1c, 2c);
    d. applying the principles learned to quantify concrete in a real world construction project (1a, 1b, 1c, 2c).

8. Perform quantification of masonry units and related accessories for masonry construction by
    a. identifying the unit of measurement used in masonry (1a, 1b);
    b. applying the formula for determining quantity of masonry (1a, 1b);
    c. applying the principles learned to quantify concrete in a real world construction project (1a, 1b, 1c, 2c).

9. Demonstrate an understanding of wood, timber, and lumber and quantification of wood materials by
    a. differentiating wood, timber, and lumber (1a, 1b);
    b. quantifying the amount of lumber in foot board measure for studs, joists, rafters, and other structural members (1a, 1b);
    c. identifying woods that are considered softwoods and hardwoods (1a, 1b);
    d. quantifying lumber materials used in an actual construction project (1a, 1b, 1c, 2c).

10. Perform quantifications of roof shingles, thermal protections, and finishes by
    a. identifying the unit of measurements used in roof materials, thermal protection, and finishes (1a, 1b);
    b. distinguishing the different types of shingles (1a, 1b);
    c. identifying the different materials used in dry and wet wall construction (1a, 1b);
    d. explaining the importance of roof underlayment and ice dam protection (1a, 1b);
    e. performing calculations to estimate roof materials, thermal protection, and finishes (1a, 1b, 1c, 2c).

11. Demonstrate an understanding of the various items under the general condition section of the specifications by
    a. explaining information in the general condition section of the estimates;
    b. identifying the different items included in this section;
    c. identifying the method used to quantify the different items.

12. Demonstrate an understanding of quantifying sustainable construction materials by
    a. performing cost comparison between traditional construction materials and green building materials (1a, 1b, 1c, 2c);
    b. evaluating cost implications of green building (1a, 1b, 2c);
    c. identifying factors that contribute to soft cost, capital cost, and initial investment in green building (1a, 1b);
    d. estimating cost of waste removal and recycling related to sustainable construction (1a, 1b).

CNBT 2266 - Practicum-Construction Engineering Tech

Requirements
Required Prerequisite(s): Approval of Department Chair

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Complete a semester project by completing the required hours in the office/field environment in a professional manner or completing a project (estimating, scheduling, and planning) plus at least 100 hours of field experience (alternate option) by
    a. preparing documentation of each day's work activities and experiences, including interaction with other office/site personnel as well as with consultants and clients (1a,1b);
    b. demonstrating satisfactorily how skills and knowledge learned in the classroom relate to work (1a,1b,1c);
    c. preparing a narrative report outlining experiences (1a,1b,1c).

2. Demonstrate understanding of the basic processes in construction by
    a. understanding the various construction processes (1a, 1b);
    b. calculating the estimated cost of a construction activity (1a, 1b, 2c);
    c. preparing a schedule of construction activities (1a, 1b, 2c);
    d. assigning resources for the different construction activities confidently (1a,1b,2c);
    e. using various construction equipment and computer technology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Demonstrate an understanding of the importance of industry immersion for students by
    a. identifying the various construction sectors (1a, 1b);
    b. distinguishing the various construction delivery processes (1a, 1b);
    c. identifying the various opportunities in the construction industry (1a, 1b).

4. Present a final report of the practicum experience by
    a. discussing the knowledge and skills gained through the practicum experience (1a, 1b);
    b. demonstrating skill in oral and written presentation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Required Prerequisite(s): CNBT 1346

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify scheduling software programs; develop construction schedules; and explain components and procedures in scheduling. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand the process and method of project scheduling (planning, directing, controlling) and utilizing computer scheduling software (Primavera, MS Project) to perform various scheduling procedures by
    a. explaining the concept of the estimating process (1a, 1b);
    b. defining scheduling and planning (1a, 1b);
    c. explaining the importance of scheduling projects (1a, 1b).
2. Demonstrate understanding of the fundamental concept and types of scheduling methods and techniques by
    a. identifying the scheduling methods and techniques and their uses (1a, 1b, 2a, 2b);
    b. explaining the various types of activity relationships (1a, 1b, 2a, 2b);
    c. defining the critical path method (1a, 1b).
3. Demonstrate understanding of the concept of computerized scheduling by
    a. explaining the benefits of computerized scheduling to support successful project management (1a, 1b);
    b. demonstrating familiarity with the features and capabilities of the scheduling software (1a, 1b);
    c. preparing and setting up project information, time, and baseline of the project (1a, 1b).
4. Demonstrate understanding of how to set up information for a project by
    a. defining project elements (1a, 1b);
    b. developing the project and coding structures (reports) (1a, 1b);
    c. creating project calendars (1a, 1b);
    d. developing a project network with precedence relationships (1a, 1b, 2a, 2b, 2c);
    e. performing schedule calculations (1a, 2a, 2b, 2c);
    f. applying constraints to a schedule (1a, 1b);
    g. customizing the project layouts (1a, 1b);
    h. assigning resources and costs to a project (1a, 1b);
    i. defining a target schedule (1a, 1b);
    j. entering the appropriate status (1a, 1b);
    k. creating a computerized bar chart schedule of a project (1a, 1b);
    l. creating a computerized schedule or diagram/critical path diagram of a project (1a, 1b, 1c);
    m. preparing complete reports of the project (1a, 1b).
5. Prepare and consolidate project scheduling reports by
    a. creating a computerized bar chart schedule of a project (1a, 1b);
    b. creating a computerized schedule diagram/critical path diagram of a project (1a, 1b, 1c);
    c. creating computerized project progress reports and cost reports (1a, 1b, 3a, 3b).
6. Demonstrate understanding of the concept of the various legal structures of organization, cash flow analysis/accounting, equipment cost, tax, and depreciation by
    a. identifying the various legal forms of an organization (1a, 1b);
    b. preparing a cash flow analysis, ROR, and cost accounting of a project (1a, 1b, 2a, 2b);
    c. calculating equipment cost, tax, and depreciation cost of equipment (1a, 1b, 2a, 2b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize various estimating resources; determine types of estimating needed in construction; calculate quantities, costs, and time units; and develop computerized reports for detailed construction estimates. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the bidding process by
    a. identifying the processes in bidding (1a, 1b);
    b. identifying the bidding requirements and documents (1a, 1b);
    c. identifying the different bidding methods (1a, 1b).
2. Differentiate construction plans and specifications in a construction document by
    a. identifying the different information from the drawing plans and its importance (1a, 1b);
    b. outlining the content of the specifications (1a, 1b);
    c. identifying the relationship of drawings and specifications (1a, 1b);
    d. identifying and using a project manual (1a, 1b).
3. Demonstrate understanding of the advantages and disadvantages of manual and computerized estimating by
    a. explaining the commonly used estimating software in the construction industry (1a, 1b);
    b. understanding the importance of software as a tool in estimating (1a, 1b);
    c. appraising the future of computerized estimating (1a, 1b, 2e).
4. Demonstrate an understanding of the different type of estimates such as conceptual, square foot, assembly, and detailed estimates by
    a. discussing and explaining the conceptual estimate, preliminary estimate, and detailed estimate (1a, 1b);
    b. using the different methods of estimating in a real-world application problem (1a, 1b, 2c, 2e).
5. Discuss the principles of Time Value of Money (TVOM) by
    a. discussing the methods of determining interest value (1a, 1b);
    b. discussing the methods of determining future and current value of equipment (1a, 1b);
    c. explaining the principles of depreciation (1a, 1b);
    d. calculating depreciation cost of equipment (1a, 1b).
6. Define the term spreadsheet by
    a. explaining cells, rows, and columns in a spreadsheet (1a, 1b, 2e);
    b. distinguishing between a worksheet and a workbook (1a, 1b);
    c. creating a spreadsheet and database (1a, 1b);
    d. understanding the mathematical and logical capabilities of MS Excel (1a, 1b);
    e. operating and demonstrating skills in using MS Excel (1a, 1b, 2c, 2e).
7. Demonstrate the ability to create programs to calculate quantity take off for the different phases/aspects of construction estimating by
    a. applying MS Excel to create a template for estimating (1a, 1b);
    b. differentiating between a worksheet and summary sheet (1a, 1b);
    c. solving typical construction technology-based problems using MS Excel to produce a worksheet (1a, 1b, 2c);
    d. utilizing appropriate formulas to quantify materials (1a, 1b).
8. Demonstrate understanding of how labor estimates are a direct correlation of the material take off by
    a. defining items that need to be estimated in the "general condition" section of the specifications (1a, 1b);
    b. identifying items under the direct cost and indirect cost of the project (1a, 1b);
    c. understanding the relationship of construction management in the estimating process (1a, 1b);
    d. performing calculations for direct and indirect costs of a project (1a, 1b, 1c, 2c, 2e).
9. Demonstrate the use of WINEST software as a tool for the project manager by
    a. learning the different capabilities of the WINEST program (1a, 1b);
    b. demonstrating knowledge in the use of the WINEST software program (1a, 1b);
    c. producing material take offs for simple commercial building projects (1a, 1b, 1c, 2c, 2e);
    d. applying a cost data base (1a, 1b, 1c, 2c, 2e);
    e. manipulating and navigating various capabilities and functions of WINEST (1a, 1b, 1c, 2c, 2e).

CNBT 2342 - Construction Management I

Construction Management I

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Overview of the construction industry and management skills on the job site. Topics include written and oral communications, leadership and motivation, problem solving, and decision making. The course also deals with the concepts and principles in estimating, planning, scheduling, controlling and construction ethics.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify types of construction and organizational structures. Explain purposes for various construction documents. Describe the roles and responsibilities of the key players in the building industry. Identify environmental health and safety agency requirements. Identify the various construction crafts and trades; and describe sustainable building practices and standards. Define terms associated with construction supervision, leadership, motivation, problem solving, and decision making. Demonstrate problem solving and decision making skills in construction problems. Apply sustainable building codes and concepts. Demonstrate techniques for successful contractor interaction including professional protocol and communication. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the overview of the construction industry by
    a. describing the different construction industry sectors (1a, 1b);
    b. defining management, project, and project management (1a, 1b);
    c. describing the different characteristics of the construction industry cycle (1a, 1b);
    d. explaining the characteristics of a construction project and project manager (1a, 1b);
    e. identifying the future trends and direction of the construction industry (1a, 1b);
    f. defining terms associated with construction supervision, leadership, motivation, problem solving, and decision making (1a, 1b, 2a, 2c);
    g. demonstrating understanding of the various techniques for successful contractor interaction, including professional protocol and communication (1a, 1b).
2. Demonstrate an understanding of the fundamentals of project management processes by
    a. demonstrating a working knowledge of the different construction project processes (1a, 1b);
    b. identifying the roles, responsibilities, and professional ethics of the construction team player (1a, 1b);
    c. explaining the life cycle of a construction project (1a, 1b);
    d. explaining the concept of value engineering (1a, 1b);
    e. illustrating the basic principles and concepts of sustainability (1a, 1b);
    f. demonstrating understanding of green and sustainable building codes and standards (1a, 1b).
3. Demonstrate an understanding of construction contracts and different delivery methods by
    a. explaining project risk and liability (1a, 1b);
    b. explaining different project delivery methods (1a, 1b);
    c. identifying the appropriate contract types for different project delivery methods (1a, 1b).
4. Demonstrate an understanding of the fundamental principles of cost estimating by
    a. defining the different types of estimates (1a, 1b);
    b. identifying the different cost variables of estimates (1a, 1b);
    c. calculating project cost and variation in cost due to time, location, and size of the project (1a, 1b, 1c, 2a, 2c);
    d. evaluating cost analysis and economic implications for green building materials (1a, 1b, 1c, 2a, 2c).
5. Demonstrate an understanding of scheduling fundamentals by
    a. defining scheduling (1a, 1b);
    b. identifying the different activities and defining WBS (1a, 1b);
    c. explaining the different methods of scheduling (1a, 1b);
    d. explaining the purpose and usage of bar chart, matrix, and network scheduling (1a, 1b);
    e. demonstrating the ability to perform calculations and prepare network scheduling (1a, 1b, 1c, 2a, 2c).
6. Demonstrate an understanding of the fundamentals of project control by
    a. defining the objectives of project control systems (1a, 1b);
    b. calculating direct and indirect costs of a project (1a, 1b, 2a, 2c);
    c. performing calculations of project crashing (1a, 1b, 2a, 2c);
    d. preparing a cumulative production graph of the project progress (1a, 1b, 1c, 2c);
    e. demonstrating the ability to monitor and update a project's budget and schedule (1a, 1b, 1c, 2e).
7. Demonstrate an understanding of construction law and labor/management relations by
    a. explaining the basic history of labor/management relations in the U.S. (1a, 1b);
    b. explaining common methods and procedures related to claim, liability, and dispute resolution (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define terms, expressions and phrases associated with computers; and use basic commands in various applications. Explain the internal components of a computer; assemble a computer system; install an operating system; and troubleshoot using system tools and diagnostic software. Use simulation and virtual software to investigate operating systems.

1. Demonstrate knowledge computer terms, phrases, and expressions (1a, 1b, 2c).
2. Demonstrate basic commands in various applications (1a, 1b, 2c).
3. Demonstrating the ability to assemble a computer system (1a, 1b, 2c, 2e).
4. Demonstrating the ability to diagnose and isolate faulty components (1a, 1b, 2c, 2e).
5. Demonstrating the ability to install/connect peripherals (1a, 1b, 2c, 2e).
6. Demonstrating an understanding of the fundamental operating systems concepts, methodologies, and technologies (1a, 1b, 2c).
7. Demonstrating the ability to install an operating system (1a, 1b, 2c, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CETT 1441 and CETT 1445

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will:

1. Demonstrate an understanding of data and network communications by:
    a. describing a data communication system;
    b. describing a data communication link;
    c. defining character codes;
    d. defining digital data rates;
    e. defining serial data formats;
    f. describing encoded data formats.
2. Demonstrate an understanding of the telephone system by:
    a. defining the telephone system;
    b. listing specifications and parameters;
    c. identifying line impairments.
3. Demonstrate an understanding of error detection and correction by:
    a. explaining asynchronous data methods;
    b. explaining synchronous data error methods;
    c. identifying error testing equipment.
4. Demonstrate an understanding of open systems network models by:
    a. describing data topologies;
    b. defining data switching;
    c. listing the types of networks;
    d. explaining OSI architecture (OSI);
    e. explaining systems network Architecture (SNA).
5. Demonstrate an understanding of OSI physical layer components by:
    a. listing the units of a communications link;
    b. describing an RS232C interface;
    c. describing the RS449 interface standard;
    d. describing RS422 and RS423 interface standards;
    e. defining FSK modems;
    f. listing additional types of modems;
    g. defining .34 and V.90 modems.

6. Demonstrate an understanding of higher capacity data communications by:
    a. describing multiplexing methods;
    b. explaining the sampling theorem;
    c. explaining quantization;
    d. explaining pulse code modulation;
    e. explaining delta modulation;
    f. describing digital T carriers;
    g. defining companding;
    h. defining CODECs.

7. Demonstrate an understanding of data link layer protocols by:
    a. describing data link sections;
    b. defining character oriented protocols;
    c. defining bit oriented protocols;
    d. defining protocol analyzers.

8. Demonstrate an understanding of network architecture and protocols by:
    a. listing networks by size;
    b. describing IEEE 802.3 and ethernet;
    c. describing IEEE 802.4 Token Bus;
    d. describing IEEE 802.5 Token Ring;
    e. defining network interface cards (NIC);
    f. defining interconnecting LANs;
    g. describing IEEE 802.6 Metropolitan Area Network (MAN);
    h. defining X.25 packet switch protocol.

9. Demonstrate an understanding of integrated services and routing protocols by:
    a. defining integrating services;
    b. describing broadband ISDN;
    c. describing IEEE 802.9 Integrated Voice and Data Services;
    d. describing Digital Subscriber Line (DSL);
    e. defining private branch exchange;
    f. defining Asynchronous Transfer Mode (ATM);
    g. defining frame relay.

10. Demonstrate an understanding of the internet and TCP/IP by:
    a. explaining internet history;
    b. listing uses for the internet;
    c. explaining accessing the internet;
    d. describing internet address;
    e. defining security on the internet;
    f. defining authentication;
    g. explaining firewalls;
    h. defining intranets and extranets;
    i. describing TCP/IP.

11. Demonstrate an understanding of fiber optic communications by:
    a. describing basic concepts of light propagation;
    b. describing fiber optic cables;
    c. defining light sources;
    d. defining optical detectors;
    e. explaining fiber cable losses;
    f. defining wave division multiplexing;
    g. defining fiber distribution data interface;
    h. defining FDII-II isochronous traffic;
    i. describing the fiber channel;
    j. defining SONET.

12. Demonstrate an understanding of wireless communications systems by:
    a. defining microwave communications;
    b. describing cellular mobile telephone service;
    c. defining personal communications systems;
    d. defining IEEE 802.11 wireless LAN;
    e. describing digital packet network;
    f. describing satellite communications;
    g. describing methods of satellite communications;
    h. defining satellite networking.

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Computed Tomography from the American Registry of Radiologic Technologists, The Joint Review Committee on Education in Computed Tomography (Professional Curriculum topics), and the current Radiology Curriculum Guide and Practice Standards from American Society of Radiologic Technology.

End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the role of an imaging professional by:
    a. displaying knowledge of patient care and its associated competencies (1a, 1b, 1c, 2b, 2c, 2e).

2. Identify the principles of pharmacology by:
    a. identifying the route used (1a, 1b, 1c, 2b, 2c, 2e);
    b. identifying different levels of controlled substances (1a, 1b, 1c, 2b, 2c, 2e).

3. Distinguish the differences between biopharmaceutics and pharmacology by:
    a. identifying the varying dosage forms (1a, 1b, 1c, 2b, 2c, 2e);
    b. identifying the varying vehicles (1a, 1b, 1c, 2b, 2c, 2e).

4. Identify the different drug classifications by:
    a. demonstrating knowledge of cardiac meds (1a, 1b, 1c, 2b, 2c, 2e);
    b. demonstrating knowledge of anticoagulants (1a, 1b, 1c, 2b, 2c, 2e);
    c. demonstrating knowledge of analgesics (1a, 1b, 1c, 2b, 2c, 2e);
    d. demonstrating knowledge of antihistamines (1a, 1b, 1c, 2b, 2c, 2e).

5. Demonstrate readiness for the registry exam by:
    a. reviewing questions for the registry exam (1a, 1b, 1c, 2b, 2c, 2e);
    b. passing practice registry exams (1a, 1b, 1c, 2b, 2c, 2e).

CTMT 2336 - Computed Tomography Equipment/Methodolo

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Computed Tomography from the American Registry of Radiologic Technologists, The Joint Review Committee on Education in Computed Tomography (Professional Curriculum topics), and the current Radiology Curriculum Guide and Practice Standards from American Society of Radiologic Technology.

End-of-Course Outcomes: Determine operating protocols for routine computed tomography to include radiation protection and quality assurance; and analyze imaging artifacts. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the basics functions of a scanner by:
    a. describing the basic functions of a CT scanner (1a, 1b, 1c, 2b, 2c, 2e);
    b. recognizing the differences between the different platforms (GE, Siemens, Toshiba) (1a, 1b, 1c, 2b, 2c, 2e);
    c. describing how an image is created (1a, 1b, 1c, 2b, 2c, 2e).
2. Line up the patient for procedures by:
    a. identifying the landmarks (1a, 1b, 1c, 2b, 2c, 2e).
3. Recognize different protocols by:
    a. displaying familiarity with different protocols on the different systems (1a, 1b, 1c, 2b, 2c, 2e).
4. Demonstrate knowledge of the history and basic principles of scanning by:
    a. understanding how the slices are obtained and reconstructed (1a, 1b, 1c, 2b, 2c, 2e);
    b. identifying the different generations of scanners (1a, 1b, 1c, 2b, 2c, 2e).
5. Demonstrate knowledge of rad dose and factors by:
    a. identifying an exposure (1a, 1b, 1c, 2b, 2c, 2e);
    b. identifying an absorbed dose (1a, 1b, 1c, 2b, 2c, 2e);
    c. identifying an effective dose (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Computed Tomography from the American Registry of Radiologic Technologists, The Joint Review Committee on Education in Computed Tomography (Professional Curriculum topics), and the current Radiology Curriculum Guide and Practice Standards from American Society of Radiologic Technology.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the technical factors/protocols for each scan by:
    a. citing the factors from the different types of machines (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. using the factors correctly (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate skills and knowledge in clinic from didactic learning by:
    a. accomplishing initial competency documentation under direct supervision (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. accomplishing interim proficiency documentation under indirect supervision (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. accomplishing task items as listed on the ARRT Task Inventory (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate patient care and the administrating contrast by:
    a. using the correct gauge of needle for procedure (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. determining which contrast and how much to give (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Workforce Education Course Manual (WECM)

Description
(3-3-0) Emphasizes pharmacological effects of substances, including tolerance, dependence, cross addiction, drug interaction, withdrawal, and recovery. Describes the psychological and physiological effects of substance use and behaviors.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate and explain the stages of drug use and addiction; identify the components of the central nervous system and explain their general functions in relation to drug use; explain the physiological and psychological effects of drugs or addictive behavior on the major systems of the body; identify classes and schedules of psychoactive drugs; and define terms common to drug use, misuse, abuse, and dependence. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the terms drug, illicit drug use, deviant drug use, drug abuse, and addiction/dependency/compulsive behaviors by:
    a. categorizing four types of toxicity and along with examples of each;
    b. demonstrating the ability to recognize problems and to devise and implement plan of action in which substance abuse impacts the family;
    c. using efficient learning techniques to acquire and apply new knowledge and skills to familiarize oneself with the terminology and approaches to intervention using prominent therapeutic theories;
    d. demonstrating the ability to organize, identify, and process information to various definitions of drug abuse, use, dependency, and compulsive behaviors;
    e. explaining similarities and differences in treatment process for both individual and family recovery of substance abusers.
2. Demonstrate an understanding of differences between physical and psychological dependence by:
    a. discussing specific goals and constraints in treatment of dependence;
    b. evaluating one's own experience as related to readings, media, and research regarding drug use and dependence;
    c. explaining similarities and differences in research on the brain as it relates to physical and psychological dependence;
    d. explaining the impact of mood altering substances and behaviors as they relate to family of origin, taking into consideration various cultural and national differences.
3. Demonstrate an understanding of how neurotransmitters are released from neurons and from what parts of the nervous system they come, and of interaction with receptors by:
    a. categorizing major subdivisions of the nervous system and the functions of the two parts of the autonomic nervous system;
    b. describing the life cycle of the neurotransmitter molecule and various ways that psychoactive drugs can interact with it.
4. Demonstrate an understanding of the five major categories of psychoactive drugs and between specific and nonspecific drug effects by:
    a. explaining similarities and differences in depressant drugs such as barbiturates, benzodiazepines, and other classes of depressive drugs;
    b. explaining similarities and differences in classes of stimulants and effects on body and behavior;
    c. describing the process by which FDA has reviewed OTC products for safety and effectiveness;
    d. describing the changes in approaches to drug use based on current research related to medical professionals.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the effects of addiction on the family system; differentiate between various family treatment processes; identify the impact of addictive behaviors as they relate to diverse family structures; and analyze the roles of the family members in the addictive and recovery process. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the various styles and compositions of family life in the United States and of unique strengths and potential problem areas including substance abuse using a multicultural approach by:
    a. demonstrating the ability to define and classify various methods of family therapy appropriate to population served;
    b. demonstrating the ability to recognize problems and to devise and implement plan of action in which substance abuse and violence impact the family;
    c. using efficient learning techniques to familiarize oneself with the terminology and approaches to intervention of the prominent therapeutic models utilized by professional therapists;
    d. generating new ideas regarding misinformation and misperceptions about substance abuse as well as approaching the problem from a systems perspective;
    e. demonstrating the ability to organize, identify, and process information to various family roles within the substance abusing family system;
    f. explaining similarities and differences in the treatment process for both individual and family recovery of substance abusers and causes and occurrences of domestic violence.
2. Demonstrate an understanding of characteristics of healthy families and how these can be developed and sustained by:
    a. displaying ability to specify goals and constraints to apply to families of dysfunction based on characteristics found within functional family systems;
    b. demonstrating the ability to evaluate and generate alternatives to apply to families of dysfunction based on characteristics found within functional family systems;
    c. evaluating one's own experience as a member of a family system by developing a Genogram of one's own family system;
    d. explaining similarities and differences between healthy family systems styles of behavior and relationship to one another during crises, lifestyle changes, and other anticipated life events and family systems of dysfunction;
    e. explaining the impact of mood altering substances and behaviors as they relate to family systems from a multicultural and trans-generational perspective;
    f. describing the role of the family in the recovery process.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify sociopolitical barriers to treatment; examine counselor's personal values, biases and prejudices; explain the counselor's responsibility in developing and maintaining cultural competence; compare and contrast multicultural counseling theories; and analyze and categorize unique issues affecting diverse populations. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of their attitudes, beliefs, understandings, and acculturative experiences.
2. Analyze multicultural and pluralistic trends, including characteristics and concerns with diverse populations.
3. Examine how social and cultural factors influence the social service relationship and are reflected in theory and practice.
4. Explore ethical and legal considerations.
5. Articulate essential basic diversity competencies.
6. Engage in experiential activities involving eliminating biases, prejudices, and processes of intentional and unintentional oppression and discrimination into a professional practice framework.
7. Demonstrate an understanding of cultural variables that impact sustainability, including but not limited to poverty, privilege, and cycle of oppression.
8. Comprehend how age, mental, and physical characteristics impact client experience and influence services received.
9. Demonstrate an ability to use various strategies for working with diverse individuals, couples, families, groups, and communities.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the concepts of substance use disorder counseling and recovery; identify issues of confidentiality and ethics as applied to the client; and demonstrate the skills and techniques of counseling for substance use disorders. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify special skills and techniques in the application of counseling skills for the alcohol and other drug client by:
    a. defining a working definition of substance abuse, substance use, and substance dependence;
    b. explaining similarities and differences in individualized perspective when counseling substance abusers using KSA model;
    c. describing continuum of substance abuse;
    d. describing multidimensional treatment focusing on long term recovery;
    e. developing skills for completing a comprehensive assessment and treatment plan;
    f. displaying ability to review confidentiality rules and laws and review ethical issues.
2. Demonstrate an understanding of principles for twenty-first century substance abuse counseling by:
    a. displaying ability to focus on evidence based practices;
    b. using a respectful and positive approach with all clients;
    c. using a multicultural perspective to meet the needs of diverse client populations;
    d. displaying ability to support the idea that client advocacy is central to counselor's role.
3. Demonstrate an understanding of the portrayal of substance abuse counseling as a field in the midst of a paradigm shift from coercion to collaboration, from scare tactics to empowerment and respect, to models based on science by:
    a. using motivational interviewing;
    b. using various treatment planning techniques for various substances of abuse;
    c. identifying most current brain research and importance in treatment of substance abuse client;
    d. explaining similarities and differences in valid and reliable assessment instruments for various substances of abuse.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify current issues within substance use counseling and analyze treatment implications related to substance use disorders. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of substance use counseling, non-substance related disorder counseling, co-occurring disorder counseling, and identify treatment implications related to these issues by:
    a. defining use, abuse, and addiction by using the DSM-V;
    b. discussing similarities and differences between substance misuse and compulsive behaviors;
    c. demonstrating in writing an understanding of differences noted in chemical dependency and problematic behaviors, e.g., gambling, etc.;
    d. demonstrating an understanding of co-occurring disorders and appropriate treatment;
    e. discussing similarities and differences between prescription misuse and illicit drugs of addiction;
    f. explaining good pill/bad pill using brain research.
2. Demonstrate an understanding of the KSAs as developed by the chemical dependency counseling professionals by:
    a. discussing similarities and differences between KSAs and twelve core functions;
    b. creating a comparative spread sheet incorporating twelve core functions into KSA's format by locating, reading, and interpreting implementation of KSAs and application in the workplace;
    c. explaining the relationship between KSAs and twelve core functions and competencies needed for each area.
3. Demonstrate an understanding of various treatment modalities specific to chemical dependency treatment by:
    a. explaining motivational interviewing, including how to apply modality to client;
    b. explaining treatment modalities recommended for various types of addiction;
    c. demonstrating the ability to organize and maintain information differentiating treatment modalities for children and adults;
    d. using efficient learning techniques to acquire and apply new knowledge regarding substance use counseling versus psychotherapy for other issues of mental health.
4. Demonstrate the ability to locate, interpret, and respond to educational expectations necessary to succeed on required state examination by:
    a. demonstrating understanding of KSAs and twelve core functions sufficient to succeed on oral, written, and case presentation for state examination;
    b. locating on the internet procedures for completing all legislative requirements set forth for licensure.

DEMR

Course Number
1229

Course Title
Preventative Maintenance

Semester Credit Hours
2

Lecture Hours
1

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-3) An intermediate course designed to provide the student with basic knowledge of proper servicing practices. Content includes record keeping and condition of major systems. Required Prerequisite: DEMR-1305

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply preventative maintenance practices; perform preventative maintenance on systems; and practice appropriate record keeping.

Upon successful completion of this course, students will:

1. Utilize appropriate safety procedures (1a, 1b, 2c, 2d, 2e).
2. Demonstrate safe, professional, and responsible work practices (1a, 1b, 2c, 2d, 2e).
3. Demonstrate proper use of shop equipment and tools (1a, 1b, 2c, 2d, 2e).
4. Use service information correctly (1a, 1b, 2c, 2d, 2e).
5. Perform basic maintenance (1a, 1b, 2c, 2d, 2e).

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify failed components using visual inspections, troubleshooting procedures and equipment; repair or replace parts on various steering and suspension systems; and adjust components on various steering and suspension systems.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair front and rear suspension systems by:
    a. diagnosing shock absorber components and control arm, ball joint, spring, and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing shock absorber components and control arm, ball joint, spring, and torsion bar components (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the operation and construction of suspension systems by:
    a. explaining the purpose, operation, and components of different types of front and rear suspension systems (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of the operation of different types of steering systems by:
    a. explaining the purpose, operation, and components of a power steering rack and pinion (1a, 1b, 2c, 2d);
    b. explaining the purpose, operation, and components of a power steering gear (1a, 1b, 2c, 2d);
    c. explaining the purpose, operation, and components of a power steering pump (1a, 1b, 2c, 2d);
    d. explaining the purpose, operation, and components of various types of steering linkages (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of different types of steering systems by:
    a. diagnosing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing power steering rack and pinion components, gear components, pumps, and different types of steering linkages (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of alignment and suspension angles by:
    a. explaining the purpose of SAI, caster, camber, and toe (1a, 1b, 2c, 2d);
    b. explaining geometric centerline, scrub radius, wheel offset, thrust line, setback, and ride height (1a, 1b, 2c, 2d).
6. Perform a wheel alignment by:
    a. performing a four-wheel alignment (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing a two-wheel alignment (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate an understanding of the purpose and construction of tires and rims by:
    a. identifying tire construction, size, and ratings (1a, 1b, 2c, 2d);
    b. identifying various rim constructions and sizes (1a, 1b, 2c, 2d).
8. Diagnose and repair tire concerns by:
    a. identifying tire wear patterns (1a, 1b, 2a, 2c, 2d, 2e);
    b. measuring tire and rim run out (1a, 1b, 2a, 2c, 2d, 2e);
    c. diagnosing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);
    d. repairing tire inflation problems and tire pressure monitoring systems (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating how to mount, balance, and rotate tires (1a, 1b, 2a, 2c, 2d, 2e).
9. Demonstrate an understanding of personal and laboratory safety by:
    a. demonstrating the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e).

DEMR 1280 - Coop Ed - Diesel Mech Technology/Techn

See course description for prerequisites/corequisites.
Type
Prerequisites

10
A Requirement block where all subrequirements are required

Take DEMR-1301 DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1301 and DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Complete training station agreement (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Complete cooperative work experience objectives worksheet (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Complete objectives listed in the cooperative work experience worksheet (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Be at work on time every day of co-op (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Be in uniform at work (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Call supervisor if unable to be at work for any reason (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and use basic hand tools; use personal protection equipment (PPE); and correctly use and dispose of hazardous materials.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic hand tools by:
    a. identifying hand tools from different tool categories in the shop and classroom assessments (1a, 1b, 2c, 2d, 2e);
    b. choosing the correct hand tools in the shop (1a, 1b, 2c, 2d, 2e);
    c. using hand tools in a safe manner according to industry standards (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of PPE by:
    a. identifying the equipment in classroom assessments (1a, 1b, 2c, 2d, 2e);
    b. choosing the correct equipment in the shop (1a, 1b, 2c, 2d, 2e);
    c. using the correct equipment in the shop (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of hazardous material disposal by:
    a. identifying and describing hazardous materials (1a, 1b, 2c, 2d, 2e);
    b. explaining disposal methods adopted by industry (1a, 1b, 2c, 2d, 2e);
    c. demonstrating proper handling of hazardous materials (1a, 1b, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform circuit analysis; identify electrical symbols; use special tools; and test circuits.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of electrical fundamentals by:
    a. reading electrical wiring diagrams and demonstrating 100% accuracy on a multiple choice question assessment (1a, 1b, 2c, 2d, 2e);
    b. measuring electrical circuits utilizing electrical test meters, live vehicles, or simulators and demonstrating 100% accuracy on a multiple choice question assessment (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of starting systems by:
    a. diagnosing and correcting starter system problems and demonstrating 100% accuracy on a performance checklist (1a, 1b, 2c, 2d, 2e);
    b. reading repair information and successfully completing a starter R&R procedure (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of the charging system by:
    a. diagnosing and correcting charging system problems and demonstrating 100% accuracy on a performance checklist (1a, 1b, 2c, 2d, 2e);
    b. reading repair information and successfully completing an alternator R&R procedure (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of batteries by:
    a. diagnosing and correcting battery problems and demonstrating 100% accuracy on a performance checklist (1a, 1b, 2c, 2d, 2e);
    b. reading repair information and successfully completing a battery R&R procedure (1a, 1b, 2c, 2d, 2e).

DEMR 1306 - Diesel Engine I

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the history of diesel engines and diesel systems and their evolution; demonstrate knowledge of the basic principles of diesel systems and engines and how they function; and utilize precision instruments to diagnose and repair basic systems and engines.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair engine mechanical problems by:
    a. demonstrating the ability to diagnose engine noises and evaluate engine condition (1a, 1b, 2c, 2d, 2e);
    b. disassembling an engine (1a, 1b, 2c, 2d, 2e);
    c. inspecting engine components visually for wear and damage (1a, 1b, 2c, 2d, 2e);
    d. using precision measuring instruments to determine wear (1a, 1b, 2c, 2d, 2e).
2. Assemble an engine using appropriate tools and specifications by:
    a. assembling an engine (1a, 1b, 2c, 2d, 2e);
    b. utilizing special tools and manufacturer's specifications (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to diagnose and repair cooling and lubrication systems by:
    a. diagnosing cooling systems and lubrication systems (1a, 1b, 2c, 2d, 2e);
    b. repairing cooling systems and lubrication systems (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of personal and laboratory safety by:
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

DEMR 1316 - Basic Hydraulics

General

Course Key
14482

Course Rubric	Course Number	Course Title
DEMR	1316	Basic Hydraulics
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Fundamentals of hydraulics including components and related systems. Required Prerequisite: DEMR-1305

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify various components used in hydraulic systems; evaluate hydraulic components by inspection and testing; and explain hydraulics, theory, circuits, and application.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic concepts of fluid power by:
    a. defining fluid power (1a, 1b, 2c);
    b. differentiating between the terms "hydraulics" and "pneumatics" (1a, 1b, 2a, 2c, 2e);
    c. explaining the history of the fluid power industry (1a, 1b, 2a, 2c, 2e);
    d. specifying the basic components of fluid power systems (1a, 1b, 2c, 2d, 2e);
    e. identifying the categories of personnel who are employed in the fluid power industry (1a, 1b, 2a, 2c, 2d, 2e).
2. Apply the physical properties of hydraulic fluids to hydraulic systems by:
    a. defining the term "fluid" (1a, 1b, 2c, 2e);
    b. defining the terms "specific weight," "density," and "specific gravity" (1a, 1b, 2c);
    c. defining the terms "pressure," "head," and "force" (1a, 1b, 2c, 2d, 2e);
    d. differentiating between gauge pressure and absolute pressure (1a, 1b, 2a, 2d, 2e);
    e. calculating the force created by a pressure (1a, 1b, 2a, 2c, 2e);
    f. converting viscosity from one set of units to another (1a, 1b, 2a, 2c, 2d, 2e);
    g. explaining the difference between viscosity and viscosity index (1a, 1b, 2a, 2c).
3. Perform maintenance procedures on hydraulic systems by:
    a. identifying the common causes of hydraulic system failures (1a, 1b, 2a, 2c, 2d, 2e);
    b. discussing the various types of fire and foam resistance fluids (1a, 1b, 2a, 2c, 2d);
    c. explaining the neutralization number of a hydraulic fluid (1a, 1b, 2c, 2d, 2e);
    d. describing the operation of filters and strainers and specifying their location in hydraulic circuits (1a, 1b, 2c, 2d, 2e);
    e. calculating the beta ratio and beta efficiency of filters (1a, 1b, 2c, 2d, 2e);
    f. explaining the mechanism of the wear of moving parts of hydraulic components due to solid particle contamination of the fluid (1a, 1b, 2a, 2c, 2d, 2e);
    g. describing the problems caused by gases in hydraulic fluids (1a, 1b, 2a, 2c, 2d, 2e);
    h. explaining how to troubleshoot fluid power circuits effectively depending on the symptoms of the problems involved (1a, 1b, 2a, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the basic theory and operation of the brake systems; diagnose brake components for wear and usability; repair brake components by rebuilding or replacing parts; and adjust brake components.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and service hydraulic components related to the braking system by:
    a. demonstrating the ability to diagnose and service the master cylinder (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and bleed air from hydraulic system (1a, 1b, 2c, 2e);
    c. demonstrating the ability to diagnose and service hydraulic valves (1a, 1b, 2c, 2e);
    d. servicing brake hydraulic hoses and lines (1a, 1b, 2c, 2e).
2. Demonstrate the ability to diagnose and service disc brakes by:
    a. diagnosing disc brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul disc brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake rotors (1a, 1b, 2c, 2e);
    d. measuring disc brake components using precision measuring tools (1a, 1b, 2c, 2e).
3. Demonstrate the ability to diagnose and service drum brakes by:
    a. diagnosing drum brake failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul drum brakes (1a, 1b, 2c, 2e);
    c. servicing machine brake drums (1a, 1b, 2c, 2e);
    d. measuring drum brake components using precision measuring tools (1a, 1b, 2c, 2e).
4. Demonstrate the ability to diagnose and service antilock brakes by:
    a. diagnosing antilock brake system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul antilock brake systems (1a, 1b, 2c, 2e);
    c. retrieving diagnostic data for antilock brake systems (1a, 1b, 2c, 2e).
5. Demonstrate the ability to diagnose and service power assist systems by:
    a. diagnosing power assist system failures (1a, 1b, 2c, 2e);
    b. demonstrating the ability to service and overhaul power assist systems (1a, 1b, 2c, 2e).
6. Demonstrate the ability to diagnose and service parking brake systems by:
    a. diagnosing parking brake system failures (1a, 1b, 2c, 2e);
    b. repairing parking brake systems (1a, 1b, 2c, 2e);
    c. adjusting parking brakes (1a, 1b, 2c, 2e).
7. Apply the use of computerized repair information by:
    a. locating computer-based service information (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. searching databases for technical service bulletins (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. searching for brake system specifications (1a, 1b, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate an understanding of personal laboratory safety by:
    a. explaining the practices necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the laboratory (1b, 1c, 2a, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform visual inspection of components; determine serviceability of components; and disassemble and reassemble power train components.

Upon successful completion of this course, students will:

1. Demonstrate the ability to diagnose and repair manual clutch components by:
    a. diagnosing hydraulic clutch systems, linkage type clutch systems, clutches, pressure plates, throw out bearings, pilot bearings, and flywheels (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing hydraulic clutch systems, linkage type clutch systems, clutches, pressure plates, throw out bearings, pilot bearings, and flywheels (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate the ability to diagnose and repair drive lines by:
    a. diagnosing a drive shaft and a constant velocity joint (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing a drive shaft and a constant velocity joint (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate the ability to diagnose and repair a manual transmission by:
    a. diagnosing transmission noises and shift concerns (1a, 1b, 2a, 2c, 2d, 2e);
    b. diagnosing internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    c. repairing internal transmission failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    d. diagnosing transmission leaks (1a, 1b, 2a, 2c, 2d, 2e);
    e. repairing transmission leaks (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate the ability to diagnose and repair a drive axle by:
    a. diagnosing drive axle noises and axle leaks (1a, 1b, 2a, 2c, 2d, 2e);
    b. repairing drive axle noises and axle leaks (1a, 1b, 2a, 2c, 2d, 2e);
    c. diagnosing drive axle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e);
    d. repairing drive axle failures to manufacturer's specifications (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of personal and laboratory safety by:
    a. explaining the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

DEMR 1323 - HVAC Troubleshooting and Repair

General

Course Key
14485

Course Rubric
DEMR

Course Number
1323

Course Title
Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Introduction to heating, ventilation, and air conditioning theory, testing, and repair. Emphasis on refrigerant reclamation, safety procedures, specialized tools, and repairs. Required Prerequisite: DEMR-1305

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze heating, ventilation, and air conditioning systems; utilize specialized tools; and repair or replace components.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of heating and air conditioning concerns by:
    a. demonstrating the ability to diagnose and repair AC compressor failures (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing an AC performance test (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to diagnose and repair AC refrigerant leaks using appropriate equipment (1a, 1b, 2a, 2c, 2d, 2e);
    d. demonstrating the ability to diagnose refrigerant pressure readings and determine necessary action (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the ability to diagnose and repair system component failures (1a, 1b, 2a, 2c, 2d, 2e);
    f. demonstrating the ability to evacuate, recharge, add oil, and leak check AC system (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the proper use of AC test equipment by:
    a. using electrical wiring diagrams to diagnose and test circuits (1a, 1b, 2a, 2c, 2d, 2e);
    b. using manifold gauge sets (1a, 1b, 2a, 2c, 2d, 2e);
    c. using refrigerant recovery and recycling equipment (1a, 1b, 2a, 2c, 2d, 2e);
    d. using electronic leak detectors (1a, 1b, 2a, 2c, 2d, 2e);
    e. using refrigerant identifiers (1a, 1b, 2a, 2c, 2d, 2e);
    f. installing refrigerant dye and identifying leaks (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of personal and laboratory safety by:
    a. explaining the procedures necessary to ensure a minimal chance of personal injury or property damage (1b, 1c, 2a, 2e);
    b. practicing proper safety procedures in the classroom and laboratory (1b, 1c, 2a, 2e).

DEMR 1327 - Tractor Trailer Service and Repair

Prerequisite

10
A Requirement block where all subrequirements are required

Take DEMR-1305;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DEMR 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Inspect vehicles and make necessary repairs to the tractor or trailer to Department of Transportation standard; and complete Department of Transportation documentation using appropriate forms and procedures.

Upon successful completion of this course, students will:

1. Identify tire and wheel types, identify wheel ends and proper service procedures for wheel end service (1a, 1b, 2c, 2d, 2e).
2. Perform wheel hub adjustments on the vehicle (1a, 1b, 2c, 2d, 2e).
3. Perform tire and wheel removal and dismounting of tires from the wheel (1a, 1b, 2c, 2d, 2e).
4. Perform tire and wheel inspections to identify OOS conditions (1a, 1b, 2c, 2d, 2e).
5. Identify frame types and design of vehicle chassis frames (1a, 1b, 2c, 2d, 2e).
6. Identify proper servicing procedures for truck frames (1a, 1b, 2c, 2d, 2e).
7. Perform frame alignment checks, and inspection for damage (1a, 1b, 2c, 2d, 2e).
8. Identify trailer types and designs and trailer train configurations (1a, 1b, 2c, 2d, 2e).
9. Perform trailer inspections to State and Federal guidelines (1a, 1b, 2c, 2d, 2e).
10. Identify fifth wheel manufacturers and different locking designs (1a, 1b, 2c, 2d, 2e).
11. Perform fifth wheel disassembly and inspection procedures to identify problems (1a, 1b, 2c, 2d, 2e).

DFTG 1305 - Introduction to Technical Drawing

General

14749

Course Rubric
DFTG

Course Number
1305

Course Title
Introduction to Technical Drawing

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) An introduction to reading, interpreting, and developing technical drawings, including the principles of drafting and computer-aided design.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Read, interpret, and develop technical sketches and drawings, lettering techniques, annotations, scales, line types, line weights, geometric construction, orthographic projections, pictorial views, sectional views, dimension drawings, calculations, and measurements. Identify terminology and basic functions used with 2D and 3D computer-aided design software.

Upon successful completion of this course, students will:

1. Identify technical drafting terminology, tools, and symbols by:
    a. describing manufacturing and design processes (1a, 1b, 2d);
    b. outlining the methods of drawing reproduction (1a, 1b, 2d);
    c. describing fractional, decimal, and metric dimensions (1a, 1b, 2d);
    d. listing standard drafting symbols (1a, 1b, 2d);
    e. naming the standard line types (1a, 1b, 2d);
    f. describing projection methods (1a, 1b, 2d);
    g. selecting the various modes of viewing drawings (1a, 1b, 2d);
    h. identifying threads, fasteners, and springs (1a, 1b, 2d);
    i. defining geometric dimensioning and tolerancing (1a, 1b, 2d);
    j. listing the parts of an assembly drawing (1a, 1b, 2d);
    k. identifying weld symbols (1a, 1b, 2d).
2. Produce hand sketches by:
    a. applying sketching techniques (1a, 1b, 2d, 2e);
    b. displaying proper lettering techniques (1a, 1b, 2d, 2e);
    c. using geometric constructions (1a, 1b, 2d, 2e);
    d. illustrating multi view projection (1a, 1b, 2d, 2e);
    e. producing sectional and auxiliary views (1a, 1b, 2d, 2e).
3. Use drafting principles by:
    a. producing a projection of normal, inclined, and oblique surfaces (1a, 1b, 2d, 2e);
    b. demonstrating drawing conventions for machine processes (1a, 1b, 2d, 2e);
    c. relating the concept of first and third angle projections (1a, 1b, 2d, 2e);
    d. constructing depth, height, or width auxiliary views (1a, 1b, 2d, 2e);
    e. using conventional dimensioning techniques to describe size and shape accurately (1a, 1b, 2d, 2e);
    f. identifying aligned and unidirectional dimensioning systems (1a, 1b, 2d, 2e);
    g. producing geometric dimensioning and tolerancing symbols (1a, 1b, 2d, 2e).
4. Create drawings on a CAD system by:
    a. producing CAD drawings from hand sketch exercises (1a, 1b, 2d, 2e);
    b. creating geometric constructions (1a, 1b, 2d, 2e);
    c. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    d. producing 3 dimensional parametric model drawings (1a, 1b, 2d, 2e);
    e. completing drawing exercises on auxiliary views (1a, 1b, 2d, 2e);
    f. constructing sectional views (1a, 1b, 2d, 2e);
    g. producing detailed assembly drawings (1a, 1b, 2d, 2e);
    h. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
5. Complete final documents by:
    a. summarizing the language of drafting (1a, 1b, 2d, 2e);
    b. composing final drawings (1a, 1b, 2d, 2e);
    c. justifying correct drafting principles (1a, 1b, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify terminology and basic functions used with CAD software; use CAD hardware and software to create, organize, display, and plot/print working drawings; and use file management techniques.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of computer-aided drafting (CAD) terminology, tools, and symbols by:
    a. defining the Cartesian Coordinate System (1a, 1b, 2d);
    b. describing the menu structure (1a, 1b, 2d);
    c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d);
    d. identifying the standard draw commands (1a, 1b, 2d);
    e. giving examples of modifying commands (1a, 1b, 2d);
    f. selecting the various modes of viewing drawings (1a, 1b, 2d);
    g. defining a dimension style (1a, 1b, 2d).
2. Produce hand sketches by:
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. describing proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various commands in a CAD system by:
    a. operating CAD software (1a, 1b, 2d, 2e);
    b. demonstrating draw commands (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. demonstrating the ability to create 3D objects (1a, 1b, 2d, 2e);
    e. preparing examples of blocks (1a, 1b, 2d, 2e);
    f. manipulating an external reference or file (1a, 1b, 2d, 2e);
    g. demonstrating the ability to import information from a different software program into a CAD system (1a, 1b, 2d, 2e);
    h. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create drawings on a CAD system by:
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    c. producing a draft of an architectural floor plan (1a, 1b, 2d, 2e);
    d. diagramming an electrical circuit board (1a, 1b, 2d, 2e);
    e. producing CAD drawings from civil engineering information (1a, 1b, 2d, 2e);
    f. completing 3D parametric models (1a, 1b, 2d, 2e);
    g. organizing a complex assembly (1a, 1b, 2d, 2e).
5. Complete final documents by:
    a. summarizing CAD skills (1a, 1b, 2d, 2e);
    b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);
    c. composing final drawings (1a, 1b, 2d, 2e);
    d. justifying correct drawing methods (1a, 1b, 2d, 2e).

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize architectural terms, symbols, residential construction materials, and processes to produce a set of residential construction drawings including site plan, floor plan, elevations, wall sections, schedules, details, and foundation plan using reference materials.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of architectural terminology, practices, and project phases by:
    a. defining the term anthropometrics (1a, 1b, 2d, 2e);
    b. identifying the phases of an architectural project (1a, 1b, 2d, 2e);
    c. describing the basic relationship between Owner/Architect/Contractor (1a, 1b, 2d, 2e);
    d. describing the role of an architect (1a, 1b, 2d, 2e).
2. Prepare a program for an architectural residential project by:
    a. identifying functions of space (1a, 1b, 2d, 2e);
    b. measuring current living space (1a, 1b, 2d, 2e);
    c. listing required spaces by priority (1a, 1b, 2d, 2e);
    d. determining the square footage of each space (1a, 1b, 2d, 2e).
3. Produce a schematic design by:
    a. using the information from the programming phase of the architectural project (1a, 1b, 2d, 2e);
    b. producing a drawing of spaces to scale on a computer-aided drafting (CAD) system (1a, 1b, 2d, 2e);
    c. arranging spaces according to their relationships (1a, 1b, 2d, 2e);
    d. diagramming connections between spaces (1a, 1b, 2d, 2e).
4. Generate design development drawings for a house design by:
    a. using the sketches from the schematic design phase (1a, 1b, 2d, 2e);
    b. applying industry standard construction methods to the design (1a, 1b, 2d, 2e);
    c. illustrating rough drawings based on passive solar considerations (1a, 1b, 2d, 2e);
    d. analyzing site information for building placement (1a, 1b, 2d, 2e).
5. Complete final construction documents by:
    a. producing a draft of final floor plans with appropriate materials and methods for construction (1a, 1b, 2d, 2e);
    b. applying civil and structural engineering standards to a foundation/site plan design (1a, 1b, 2d, 2e);
    c. constructing a roof plan based on framing considerations (1a, 1b, 2d, 2e);
    d. illustrating all four exterior elevations with poche (1a, 1b, 2d, 2e).
6. Display ability to publish presentation drawings from the construction documents by:
    a. calibrating the location of a camera based on passive solar sun angles (1a, 1b, 2d, 2e);
    b. producing a final still frame presentation perspective drawing of residence (1a, 1b, 2d, 2e);
    c. producing an animation of a final building walk around of architectural project (1a, 1b, 2d, 2e);
    d. justifying final building project design (1a, 1b, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret field notes; develop documents for a civil project related to drainage and utilities infrastructure, to include a comprehension of related calculations.

Upon successful completion of this course, students will:

1. Switch between the AutoCAD Civil 3D tools, 2D drafting and annotation tools, 3D modeling tools, and planning and analysis tools by changing the workspace (1a, 1b, 2d, 2e).
2. Locate the basic features and commands of the AutoCAD Civil 3D software interface, which includes the Ribbon, Drawing Window, Command Line, and Toolspaces (1a, 1b, 2d, 2e).
3. Access commands by right clicking on an object or collection of objects in the Prospector and Setting tabs in the Toolspace (1a, 1b, 2d, 2e).
4. Access predetermined reports and create custom reports to be able to share useful engineering data Settings tabs in the Toolspace (1a, 1b, 2d, 2e).
5. Create assign object and label styles to correctly display AutoCAD Civil 3D objects for printing and other purposes (1a, 1b, 2d, 2e).

Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use parametric modeling techniques to create rendered assemblies, orthographic drawings, auxiliary views, and details from 3-dimensional models.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of parametric terminology, tools, and symbols by
    a. defining the view projections used in 3D design (1a, 1b, 2d, 2e);
    b. describing the menu structure (1a, 1b, 2d, 2e);
    c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d, 2e);
    d. identifying the project browser (1a, 1b, 2d, 2e);
    e. giving examples of modifying commands (1a, 1b, 2d, 2e);
    f. selecting the various modes of viewing drawings (1a, 1b, 2d, 2e);
    g. defining a dimension style (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. delineating proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various toolbars in the parametric system by
    a. operating 3D software (1a, 1b, 2d, 2e);
    b. demonstrating the various toolbars (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. dimensioning objects (1a, 1b, 2d, 2e);
    e. importing information from a different software program into a CAD system (1a, 1b, 2d, 2e);
    f. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create three dimensional objects using the 3D system software by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating three dimensional objects based on mechanical drawings (1a, 1b, 2d, 2e);
    c. generating three dimensional assemblies using three dimensional objects (1a, 1b, 2d, 2e);
    d. generating assembly drawings (1a, 1b, 2d, 2e);
    e. producing two dimensional drawings based on three dimensional objects (1a, 1b, 2d, 2e);
    f. simulating solid object functionality (1a, 1b, 2d, 2e).
5. Complete final documents by
    a. summarizing CAD skills (1a, 1b, 2d, 2e);
    b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);
    c. composing final drawings (1a, 1b, 2d, 2e);
    d. justifying correct drawing methods (1a, 1b, 2d, 2e).

Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Layout components and symbols, both electronic and electrical; apply basic math and the theory of electricity; utilize component identification including schematics, block, wiring, and logic; and perform diagram construction and drafting. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the various components in an electrical layout by
    a. describing various electrical layouts (1a, 1b, 2d, 2e);
    b. describing when each layout is used (1a, 1b, 2d, 2e);
    c. describing electrical safety codes (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. delineating proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various electrical designs and the part CAD systems play in them by
    a. operating CAD software (1a, 1b, 2d, 2e);
    b. drawing block diagrams, schematic diagrams, logic diagrams, wiring/assembly drawings, printed circuit board layouts, motor control diagrams, power distribution diagrams, and electrical one line diagrams (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. dimensioning objects (1a, 1b, 2d, 2e);
    e. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create drawings on a CAD system by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    c. drafting an architectural or commercial floor plan with electrical data (1a, 1b, 2d, 2e);
    d. organizing a complex assembly (1a, 1b, 2d, 2e).
5. Complete final documents by
    a. summarizing design skills needed to create an electrical design project (1a, 1b, 2d, 2e);
    b. composing final drawings (1a, 1b, 2d, 2e);
    c. justifying correct drawing methods (1a, 1b, 2d, 2e).

DFTG 2402 - Machine Drafting

General

Course Key
13594

Course Rubric
DFTG

Course Number
2402

Course Title
Machine Drafting

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3) Production of detail and assembly drawings of machines, threads, gears, utilizing tolerances, limit dimensioning, and surface finishes. Required Prerequisite: DFTG-1305 and DFTG-1409

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # TAKE DFTG-1305 DFTG-1409;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret terms used in tolerancing; identify dimensions of two mating parts; draw spur and/or bevel gears; draw details and assemblies; identify interference and clearance fits; identify types of threads forms; and interpret thread notes. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify parametric terminology, tools, and symbols by
    a. defining the view projections used in 3D design (1a, 1b, 2d, 2e);
    b. describing the menu structure (1a, 1b, 2d, 2e);
    c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d, 2e);
    d. identifying the project browser (1a, 1b, 2d, 2e);
    e. giving examples of modifying commands (1a, 1b, 2d, 2e);
    f. selecting the various modes of viewing drawings (1a, 1b, 2d, 2e);
    g. defining a dimension style (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. delineating proper drafting techniques (1a, 1b, 2d, 2e).
3. Examine various toolbars in the parametric system by
    a. operating 2D and 3D software (1a, 1b, 2d, 2e);
    b. demonstrating the various toolbars (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. dimensioning objects (1a, 1b, 2d, 2e);
    e. importing information from a different software program into a CAD system (1a, 1b, 2d, 2e);
    f. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create three dimensional objects using the 3D system software by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating three dimensional objects based on mechanical drawings (1a, 1b, 2d, 2e);
    c. generating three dimensional assemblies using three dimensional objects (1a, 1b, 2d, 2e);
    d. generating assembly drawings (1a, 1b, 2d, 2e);
    e. producing two dimensional drawings based on three dimensional objects (1a, 1b, 2d, 2e);
    f. simulating solid object functionality (1a, 1b, 2d, 2e);
    g. identifying dimensions of two mating parts (1a, 1b, 2d, 2e);
    h. drawing spur and/or bevel gears (1a, 1b, 2d, 2e);

i. identifying interference and clearance fits (1a, 1b, 2d, 2e);

j. interpreting thread forms and notes (1a, 1b, 2d, 2e).

5. Complete final documents by

a. summarizing CAD skills (1a, 1b, 2d, 2e);

b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);

c. composing final drawings (1a, 1b, 2d, 2e);

d. justifying correct drawing methods (1a, 1b, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Produce 2D and 3D drawings, pictorial drawings; use external referencing of multiple drawings to construct a composite drawing; and import and extract data utilizing attributes. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Demonstrate an understanding of computer-aided drafting (CAD) terminology, tools, and symbols by

a. defining the Cartesian Coordinate System (1a, 1b, 2d, 2e);

b. describing the menu structure (1a, 1b, 2d, 2e);

c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d, 2e);

d. identifying the standard draw commands (1a, 1b, 2d, 2e);

e. giving examples of modifying commands (1a, 1b, 2d, 2e);

f. selecting the various modes of viewing drawings (1a, 1b, 2d, 2e);

g. defining a dimension style (1a, 1b, 2d, 2e).

2. Produce hand sketches by

a. sketching assignments (1a, 1b, 2d, 2e);

b. using graphic descriptions (1a, 1b, 2d, 2e);

c. illustrating methods of projection (1a, 1b, 2d, 2e);

d. describing proper drafting techniques (1a, 1b, 2d, 2e).

3. Demonstrate an understanding of various commands in a CAD system by

a. operating CAD software (1a, 1b, 2d, 2e);

b. demonstrating draw commands (1a, 1b, 2d, 2e);

c. modifying drawn objects (1a, 1b, 2d, 2e);

d. demonstrating the ability to create 3D objects (1a, 1b, 2d, 2e);

e. preparing examples of blocks (1a, 1b, 2d, 2e);

f. manipulating an external reference or file (1a, 1b, 2d, 2e);

g. demonstrating the ability to import information from a different software program into a CAD system (1a, 1b, 2d, 2e);

h. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).

4. Create drawings on a CAD system by

a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);

b. generating projected mechanical drawings (1a, 1b, 2d, 2e);

c. generating drawings with external references (1a, 1b, 2d, 2e);

d. generating 3D objects (1a, 1b, 2d, 2e);

e. completing 3D parametric models (1a, 1b, 2d, 2e);

f. organizing a complex assembly (1a, 1b, 2d, 2e).

5. Complete final documents by
    a. summarizing CAD skills (1a, 1b, 2d, 2e);
    b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);
    c. composing final drawings (1a, 1b, 2d, 2e);
    d. justifying correct drawing methods (1a, 1b, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret survey data and topographic symbols; and produce topographical drawings. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify topographical terminology, tools, and symbols by
    a. defining cartography (1a, 1b, 2a, 2c, 2e);
    b. listing types of maps (1a, 1b, 2a, 2c, 2e);
    c. naming map scales (1a, 1b, 2a, 2c, 2e);
    d. describing the units of measure in civil engineering (1a, 1b, 2a, 2c, 2e);
    e. identifying topographic symbols (1a, 1b, 2a, 2c, 2e);
    f. matching the appropriate survey equipment with its function (1a, 1b, 2a, 2c, 2e);
    g. defining stationing (1a, 1b, 2a, 2c, 2e).
2. Examine various methods of surveying by
    a. describing the great survey (1a, 1b, 2a, 2c, 2e);
    b. defining survey types (1a, 1b, 2a, 2c, 2e);
    c. identifying contour lines (1a, 1b, 2a, 2c, 2e);
    d. describing the surveying process (1a, 1b, 2a, 2c, 2e).
3. Produce drawings based on survey field notes by
    a. operating survey equipment (1a, 1b, 2a, 2c, 2e);
    b. using CAD systems (1a, 1b, 2a, 2c, 2e);
    c. recording balanced latitudes and departures (1a, 1b, 2a, 2c, 2e);
    d. calculating acreage from survey field notes (1a, 1b, 2a, 2c, 2e);
    e. producing CAD drawings of surveys (1a, 1b, 2a, 2c, 2e).
4. Create CAD drawings of profiles and plat maps by
    a. completing a CAD profile drawing (1a, 1b, 2a, 2c, 2e);
    b. determining grade and slope (1a, 1b, 2a, 2c, 2e);
    c. calculating vertical scale (1a, 1b, 2a, 2c, 2e);
    d. illustrating a contour map (1a, 1b, 2a, 2c, 2e);
    e. producing a topographical map (1a, 1b, 2a, 2c, 2e).
5. Create CAD drawings of profiles and plat maps by
    a. completing a CAD profile drawing (1a, 1b, 2a, 2c, 2e);
    b. determining grade and slope (1a, 1b, 2a, 2c, 2e);

c. calculating vertical scale (1a, 1b, 2a, 2c, 2e);

d. illustrating a contour map (1a, 1b, 2a, 2c, 2e);

e. producing a topographical map (1a, 1b, 2a, 2c, 2e);

f. completing a CAD profile drawing (1a, 1b, 2a, 2c, 2e).

DFTG 2423 - Pipe Drafting

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create drawings of foundations, structural supports, and process equipment; identify symbols and research specifications; generate a bill of material list; use charts and standards; generate isometric drawings; and calculate measurements for pipe fittings. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of pipe, pipe fittings, and pipe symbols and how they are used in drawings by
    a. describing the various types of pipe and how they are created (1a, 1b, 2d, 2e);
    b. describing the types of fittings used to join pipe (1a, 1b, 2d, 2e);
    c. describing the symbols used to represent pipes and fittings (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. delineating proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various pipe process systems in a CAD system by
    a. operating CAD software (1a, 1b, 2d, 2e);
    b. demonstrating the drawing of a pipe process plan (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. dimensioning objects (1a, 1b, 2d, 2e);
    e. using the plot command to print or plot drawings.
4. Create drawings on a CAD system by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    c. drafting an architectural or commercial floor plan with pipe data (1a, 1b, 2d, 2e);
    d. organizing a complex assembly (1a, 1b, 2d, 2e).
5. Complete final documents by
    a. summarizing CAD skills needed to complete the drawing (1a, 1b, 2d, 2e);
    b. composing final drawings (1a, 1b, 2d, 2e);
    c. justifying correct drawing methods (1a, 1b, 2d, 2e).

 # TAKE DFTG-1305 DFTG-1409;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform a site analysis; develop a layout for plant materials and site amenities; explain plant material selection; design an irrigation system; apply codes and standards; develop a cost estimate for a landscape project; and develop project specifications. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terminology and practices used in the landscape drafting field by
    a. defining terms such as LEED, indigenous species, transit, planimeter, benchmark, grade, slope, etc., used in the landscape drafting industry (1a, 1b, 2d, 2e);
    b. translating bearings to azimuths and azimuths to bearings when used in property descriptions (1a, 1b, 2d, 2e);
    c. identifying basic equipment used in landscape design (1a, 1b, 2d, 2e);
    d. computing basic site acreage and square footage (1a, 1b, 2d, 2e).
2. Prepare reports and documents for a landscape project by
    a. classifying soil conditions from standard soil survey report (1a, 1b, 2d, 2e);
    b. defining the LEED certification components related to site work (1a, 1b, 2d, 2e);
    c. describing methods of soil stabilization for landscape preparation (1a, 1b, 2d, 2e);
    d. displaying ability to graphically represent methods for protecting landscape from the following: extreme weather conditions, public use of site, and construction work (1a, 1b, 2d, 2e);
    e. displaying ability to document the following site amenities: exterior shade structures, exterior public seating areas, and site lighting (1a, 1b, 2d, 2e).
3. Produce a landscape layout for a commercial facility by
    a. describing standard site plan scales (1a, 1b, 2d, 2e);
    b. displaying basic city requirements graphically for the following: standard parking, handicap accessibility, drive entry/exit, LEED certification parking requirements, island design, landscape requirements, and site lighting (1a, 1b, 2d, 2e).
4. Produce a commercial irrigation plan by
    a. describing standard irrigation equipment (1a, 1b, 2d, 2e);
    b. identifying local indigenous plant species used in landscape design (1a, 1b, 2d, 2e);
    c. computing water flow utilizing standard charts for irrigation design (1a, 1b, 2d, 2e);
    d. using the species, equipment information, and water charts to design an irrigation system (1a, 1b, 2d, 2e).
5. Generate a cost estimate from standard drawings for a landscape design by
    a. using the drawing from the irrigation design (1a, 1b, 2d, 2e);
    b. applying industry standard construction estimates to the design (1a, 1b, 2d, 2e);
    c. illustrating spreadsheets based on cost estimates using a standard cost means report (1a, 1b, 2d, 2e);
    d. analyzing the feasibility of the project based on industry standards (1a, 1b, 2d, 2e).
6. Complete final documents by
    a. displaying ability to draft final landscape plans with appropriate materials and methods for completion (1a, 1b, 2d, 2e);
    b. applying LEED certified environmental components to landscape design (1a, 1b, 2d, 2e);
    c. constructing a site plan based on LEED considerations (1a, 1b, 2d, 2e);
    d. illustrating all site work amenities (1a, 1b, 2d, 2e).
7. Display ability to publish presentation landscape drawings by
    a. displaying ability to draw a landscape plan of a commercial facility including all site work (1a, 1b, 2d, 2e);
    b. completing a color coded legend of all plant species (1a, 1b, 2d, 2e);
    c. displaying ability to denote low maintenance plant life, water collection areas, and LEED certified components of drawing (1a, 1b, 2d, 2e);
    d. justifying final landscape project design (1a, 1b, 2d, 2e).

 # TAKE DFTG-1305 DFTG-1409 DFTG-1417;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305, DFTG 1409 and DFTG 1417

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize architectural terms, symbols, commercial construction materials and processes to produce a set of construction drawings including a site plan, floor plans, reflected ceiling plans, sections, elevations, schedules, and details. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of architectural terminology, practices, and project phases by
    a. defining the term anthropometrics (1a, 1b, 2d, 2e);
    b. identifying the phases of an architectural project (1a, 1b, 2d, 2e);
    c. describing the basic relationship between Owner/Architect/Contractor (1a, 1b, 2d, 2e);
    d. describing the role of an architect (1a, 1b, 2d, 2e).
2. Prepare a program for an architectural commercial project by
    a. identifying functions of space (1a, 1b, 2d, 2e);
    b. measuring current work space (1a, 1b, 2d, 2e);
    c. listing required spaces by priority (1a, 1b, 2d, 2e);
    d. determining the square footage of each space (1a, 1b, 2d, 2e).
3. Produce a schematic design by
    a. using the information from the programming phase of the architectural project (1a, 1b, 2d, 2e);
    b. producing a drawing of spaces to scale on a CAD system (1a, 1b, 2d, 2e);
    c. arranging spaces according to their relationships (1a, 1b, 2d, 2e);
    d. diagramming connections between spaces (1a, 1b, 2d, 2e).
4. Generate design development drawings for a commercial design by
    a. using the sketches from the schematic design phase (1a, 1b, 2d, 2e);
    b. applying industry standard construction methods to the design (1a, 1b, 2d, 2e);
    c. illustrating rough drawings based on passive solar considerations (1a, 1b, 2d, 2e);
    d. analyzing site information for building placement (1a, 1b, 2d, 2e).
5. Complete final construction documents by
    a. producing a draft of final floor plans with appropriate materials and methods for construction (1a, 1b, 2d, 2e);
    b. applying civil and structural engineering standards to a foundation/site plan design (1a, 1b, 2d, 2e);
    c. constructing a roof plan based on framing considerations (1a, 1b, 2d, 2e);
    d. illustrating all four exterior elevations with poche (1a, 1b, 2d, 2e).
6. Display ability to publish presentation drawings from the construction documents by
    a. calibrating the location of a camera based on passive solar sun angles (1a, 1b, 2d, 2e);
    b. producing a final still frame presentation perspective drawing of residence (1a, 1b, 2d, 2e);
    c. producing an animation of a final building walk around of architectural project (1a, 1b, 2d, 2e);
    d. justifying final building project design (1a, 1b, 2d, 2e).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of Revit terminology, tools, and symbols by
    a. defining the elevation systems used in Revit (1a, 1b, 2d, 2e);
    b. describing the menu structure (1a, 1b, 2d, 2e);
    c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d, 2e);
    d. identifying the project browser (1a, 1b, 2d, 2e);
    e. giving examples of modifying commands (1a, 1b, 2d, 2e);
    f. selecting the various modes of viewing drawings (1a, 1b, 2d, 2e);
    g. defining a dimension style (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. displaying ability to delineate proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various toolbars in the Revit system by
    a. operating Revit software (1a, 1b, 2d, 2e);
    b. demonstrating the various toolbars (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. creating three dimensional objects (1a, 1b, 2d, 2e);
    e. displaying ability to import information from a different software program into a CAD system (1a, 1b, 2d, 2e);
    f. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create architectural drawings using the Revit system by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    c. displaying ability to draft an architectural floor plan (1a, 1b, 2d, 2e);
    d. diagramming an electrical circuit board (1a, 1b, 2d, 2e);
    e. producing site drawings from civil engineering information (1a, 1b, 2d, 2e);
    f. completing three dimensional parametric models (1a, 1b, 2d, 2e).
5. Complete final documents by
    a. summarizing CAD skills (1a, 1b, 2d, 2e);
    b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);
    c. composing final drawings (1a, 1b, 2d, 2e);
    d. justifying correct drawing methods (1a, 1b, 2d, 2e).

DFTG 2438 - Final Project - Advanced Drafting

General

Course Key
14761

Course Rubric
DFTG

Course Number
2438

Course Title
Final Project - Advanced Drafting

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3) An advanced course in which students produce a comprehensive project from conception to conclusion. Required Prerequisites: DFTG-1305, DFTG-1409, DFTG-1417, DFTG-2421, DFTG-2428, and DFTG-2440

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisites

10
A Requirement block where all subrequirements are required

Take DFTG-1305(10522) DFTG-1409(13586) DFTG-1417(13588) DFTG-2421(13599) DFTG-2428(13603) DFTG-2440(207);
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305, DFTG 1409, DFTG 1417, DFTG 2421, DFTG 2428, and DFTG 2440

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Conceptualize, design and present a complete project/portfolio in a prescribed discipline. Integrate problem solving and related technologies to identify solutions; use discipline-specific industry standards, and produce documentation. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the discipline that the project will define by
    a. identifying the discipline (1a, 1b, 2d, 2e);
    b. gathering information (1a, 1b, 2d, 2e);
    c. combining information into preliminary definition (1a, 1b, 2d, 2e);
    d. preparing a progress report (1a, 1b, 2d, 2e).
2. Generate solutions through synthesis by
    a. generating solution ideas (1a, 1b, 2d, 2e);
    b. using systematic techniques (1a, 1b, 2d, 2e);
    c. using creative techniques and attitudes (1a, 1b, 2d, 2e).
3. Evaluate alternative solution ideas using analysis by
    a. preparing solution ideas for analysis (1a, 1b, 2d, 2e);
    b. comparing solution alternatives to constraints and specifications (1a, 1b, 2d, 2e);
    c. conducting a design review (1a, 1b, 2d, 2e);
    d. refining the final solution (1a, 1b, 2d, 2e).
4. Document, specify, and communicate the solution by
    a. preparing drawings (1a, 1b, 2d, 2e);
    b. preparing a written report (1a, 1b, 2d, 2e);
    c. giving an oral presentation (1a, 1b, 2d, 2e).
5. Develop, manufacture, and deliver the results of the project by
    a. preparing technical detail drawings of each component to be manufactured (1a, 1b, 2d, 2e);
    b. scheduling assembly, final testing, packaging, and delivery (1a, 1b, 2d, 2e);
    c. keeping all records of the project (1a, 1b, 2d, 2e).

DFTG 2440 - Solid Modeling/Design

General

 # TAKE DFTG-1305 DFTG-1409;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create three dimensional solid model objects; and generate pictorial and orthographic drawings. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of Solidworks terminology, tools, and symbols by
    a. defining the view projections used in Solidworks (1a, 1b, 2d, 2e);
    b. describing the menu structure (1a, 1b, 2d, 2e);
    c. explaining the differences between type in commands, icons, and pull down menus (1a, 1b, 2d, 2e);
    d. identifying the project browser (1a, 1b, 2d, 2e);
    e. giving examples of modifying commands (1a, 1b, 2d, 2e);
    f. selecting the various modes of viewing drawings (1a, 1b, 2d, 2e);
    g. defining a dimension style (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. disclosing proper drafting techniques (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of various toolbars in the Solidworks system by
    a. operating Solidworks software (1a, 1b, 2d, 2e);
    b. demonstrating the various toolbars (1a, 1b, 2d, 2e);
    c. modifying drawn objects (1a, 1b, 2d, 2e);
    d. creating three dimension objects (1a, 1b, 2d, 2e);
    e. displaying ability to import information from a different software program into a CAD system (1a, 1b, 2d, 2e);
    f. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create three dimensional objects using the Solidworks system by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating three dimensional objects based on mechanical drawings (1a, 1b, 2d, 2e);
    c. generating three dimensional assemblies using three dimensional objects (1a, 1b, 2d, 2e);
    d. generating assembly drawings (1a, 1b, 2d, 2e);
    e. producing two dimensional drawings based on three dimensional objects (1a, 1b, 2d, 2e);
    f. displaying ability to simulate solid object functionality (1a, 1b, 2d, 2e).
5. Complete final documents by

a. summarizing CAD skills (1a, 1b, 2d, 2e);

b. comparing the various methods of drawing solids (1a, 1b, 2d, 2e);

c. composing final drawings (1a, 1b, 2d, 2e);

d. justifying correct drawing methods (1a, 1b, 2d, 2e).

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze design problems and prepare solutions to complete a set of drawings. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the various steps involved in successful design projects by
    a. describing the theory of design (1a, 1b, 2d, 2e);
    b. describing the steps involved in a design project (1a, 1b, 2d, 2e);
    c. describing symbols and terminology used in design projects (1a, 1b, 2d, 2e).
2. Produce hand sketches by
    a. sketching assignments (1a, 1b, 2d, 2e);
    b. using graphic descriptions (1a, 1b, 2d, 2e);
    c. illustrating methods of projection (1a, 1b, 2d, 2e);
    d. delineating proper drafting techniques (1a, 1b, 2d, 2e).
3. Examine various design projects and the part CAD systems play in them by
    a. operating CAD software (1a, 1b, 2d, 2e);
    b. modifying drawn objects (1a, 1b, 2d, 2e);
    c. dimensioning objects (1a, 1b, 2d, 2e);
    d. using the plot command to print or plot drawings (1a, 1b, 2d, 2e).
4. Create drawings on a CAD system by
    a. relating hand sketches to a CAD system (1a, 1b, 2d, 2e);
    b. generating projected mechanical drawings (1a, 1b, 2d, 2e);
    c. organizing a complex assembly (1a, 1b, 2d, 2e).
5. Complete final documents by
    a. summarizing design skills needed to create a machine designed project (1a, 1b, 2d, 2e);
    b. composing final drawings (1a, 1b, 2d, 2e);
    c. justifying correct drawings methods (1a, 1b, 2d, 2e).

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain general nutritional requirements and deficiencies within the human body; analyze dietary records and apply nutritional counseling strategies to optimize oral health.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the general nutritional requirements, deficiencies, and major biochemical reactions within the human body by:
    a. stating general requirements (1a, 1b, 2c);
    b. listing the various deficiencies (1a, 1b, 2c);
    c. stating the major biochemical reactions and how they impact dental health (1a, 1b, 2c).
2. Demonstrate the ability to interpret and analyze dietary records by:
    a. analyzing a diet with respect to oral implications (1a, 1b, 2b, 2c);
    b. identifying and counseling clients regarding various disease states to optimize oral health (1a, 1b, 2b).

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-3) The principles and concepts of community public health and dental health education emphasizing community assessment, educational planning, implementation, and evaluation including methods and materials used in teaching dental health education in various community settings.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design a community dental health educational program that meets the needs of a target population; differentiate the governmental, sociological, environmental, and cultural concerns of the community; and describe the principles and concepts of community dental health education and evaluation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the design of a dental hygiene program that meets the needs of a target population by:
    a. performing an original community oral health presentation utilizing computer generated paper and prepared poster and covering assessment, planning, implementation, and evaluation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate an understanding of the different governmental, sociological, environmental, and cultural concerns of a community by:
    a. defining dental public health and all the supporting agencies (1a, 1b);
    b. describing the internal and external factors and how they play a role in perception of dental services (1a, 1b, 1c, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Differentiate between the various types of dental materials and their respective properties; and manipulate materials used in dentistry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the various types of dental materials and their respective properties by:
    a. defining assigned terminology (1a, 1b, 2c);
    b. differentiating oral environment limitations and dental materials (1a, 1b, 2c);
    c. comparing and contrasting dental materials (1a, 1b, 2c).
2. Demonstrate the manipulation of materials used in dentistry by:
    a. preparing a dental impression (1a, 1b, 2c, 2e);
    b. preparing study models (1a, 1b, 2c, 2e);
    c. preparing bleaching trays/mouthguard (1a, 1b, 2c, 2e);
    d. performing restoration polishing (1a, 1b, 2c, 2e);
    e. demonstrating placement of rubber dam (1a, 1b, 2c, 2e).

Description
(2-1-3) The role of the dental hygienist as a therapeutic oral health care provider with emphasis on concepts of disease management, health promotion, communication, and behavior modification.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Describe the role of the dental hygienist as a therapeutic oral health care provider; develop and implement a patient education plan for periodontal disease; and explain the concepts of disease management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the role of the dental hygienist as a therapeutic oral health care provider by:
    a. defining preventive dentistry (1a, 1b, 2c);
    b. explaining the role of the dental hygienist in the teaching/learning process as it relates to a dental hygiene patient (1a, 1b, 2c).
2. Demonstrate an understanding of the concepts of dental disease prevention and health promotion by:
    a. defining the biofilm related dental diseases (1a, 1b, 2c);
    b. identifying interventions and treatments for biofilm related dental diseases (1a, 1b, 2c).
3. Develop and implement a patient education plan utilizing the concepts of communication and behavior modification by:
    a. identifying the steps in a behavior modification program (1a, 1b, 2c);
    b. developing intervention strategies for patient behavior modification (1a, 1b, 2c);
    c. initiating a behavior modification program for a patient (1a, 1b, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Differentiate the classification of drugs; identify the uses, actions, and contraindications of drugs; and recognize systemic and oral manifestations associated with their use.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the uses, actions, and contraindications of drugs by:
    a. identifying the use, actions, and contraindications of drugs given a patient medical history (1a, 1b, 2b, 2c, 2e);
    b. identifying possible drug interactions and possible implications given a patient medical history (1a, 1b, 2b, 2c, 2e).
2. Demonstrate understanding of the differences in the classification of drugs by:
    a. identifying drug names and their classifications for use (1a, 1b, 2b);
    b. stating the use(s) of various classifications for pharmacological use (1a, 1b, 2b).
3. Demonstrate understanding of the systemic and oral manifestations associated with drug use by:
    a. identifying possible systemic effects of various pharmacological agents (1a, 1b, 2b, 2c, 2e);
    b. identifying possible oral effects of various pharmacological agents (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Differentiate between normal and abnormal conditions of the human body with emphasis on the oral cavity; and identify the major principles for disease prevention.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the differences between normal and abnormal conditions of the human body with emphasis on the oral cavity by:
    a. defining assigned terminology (1a, 1b);
    b. comprehending signs and symptoms of benign oral disease (1a, 1b, 1c, 2b, 2e);
    c. identifying diagnosis and treatment of common vesicular and ulcerative oral lesions (1a, 1b, 2b, 2c, 2e).
2. Demonstrate an understanding and the ability to identify the major principles for disease prevention by:
    a. synthesizing a differential diagnosis (1a, 1b, 2b, 2c, 2e);
    b. constructing a treatment plan (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. organizing a treatment plan for a patient with oral cancer (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Description
(2-0-8) A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the dental hygiene knowledge applicable to the theory, concepts, and skills involving specialized dental hygiene instrumentation and procedures - beginner level by:
    a. designing preventive counseling sessions and a report (1a, 1b, 1c, 2b, 2c, 2e);
    b. explaining patient assessment, diagnosis, planning, implementation, and evaluation (1a, 1b, 1c, 2b, 2c, 2e);
    c. demonstrating an understanding of the policies and procedures in the TCC clinic manual (1a, 1b, 1c, 2b, 2c, 2e).
2. Demonstrate an understanding of the legal and ethical behavior expected during dental hygiene patient care by:
    a. receiving acceptable ratings on professionalism evaluations (1a, 1b, 1c, 2b, 2c);
    b. adhering to ethical principles (1a, 1b, 1c).
3. Participate in clinical experiences applicable to dental hygiene patient care - beginner level by:
    a. performing acceptable clinical skills demonstrations (1a, 1b, 1c, 2b, 2c, 2e).

Description
(3-2-3) Fundamentals of oral radiography, including techniques, interpretation, quality assurance, and ethics. Topics include radiation physics, biology, hygiene, and safety theories with an emphasis on the fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, and other ancillary radiographic techniques.

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Explain the principles of radiation as it relates to physics, biology, hygiene, and safety; produce and interpret diagnostically acceptable radiographs utilizing various radiographic techniques; apply the principles of quality assurance and ethics in dental radiography; and describe the fundamentals of oral radiographic techniques and interpretation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the principles of radiation physics, biology, hygiene, and safety by:
    a. stating the various principles regarding radiation physics (1a, 1b, 2c);
    b. stating biological, hygiene, and safety concerns regarding dental radiology (1a, 1b, 2b, 2c, 2d, 2e).
2. Demonstrate an understanding of the principles of quality assurance and ethics in dental radiography by:
    a. describing the concepts involved in maintaining quality assurance and ethics (1a, 1b, 1c, 2b);
    b. creating a quality assurance program for the dental office (1a, 1b, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate an understanding of the fundamentals of oral radiographic techniques and interpretation basic level by:
    a. applying radiographic techniques by exposing, processing, and mounting various types of radiographs (1a, 1b, 2a, 2b, 2e);
    b. offering interpretation of normal and abnormal findings on various radiographs (1a, 1b, 2a, 2b, 2c, 2e).

DHYG 1311 - Periodontology

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Normal and diseased periodontium including the structural, functional, and environmental factors. Emphasis on etiology, pathology, treatment modalities, and therapeutic and preventive periodontics.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Contrast normal and abnormal periodontium; analyze the etiology and pathology of periodontal diseases; differentiate treatment modalities used for therapy and prevention; and interpret periodontal assessment data to develop a dental hygiene care plan.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of normal and abnormal periodontium by:
    a. identifying periodontal structures (1a, 1b, 2c);
    b. differentiating between healthy and diseased periodontium (1a, 1b, 2c).
2. Demonstrate an understanding of the etiology and pathology of periodontal diseases by:
    a. describing periodontal disease processes (1a, 1b, 2c);
    b. explaining etiology of periodontal diseases (1a, 1b, 2c);
    c. interpreting signs and symptoms of the various periodontal diseases (1a, 1b, 2c).
3. Demonstrate an understanding of the differences in treatment modalities used for therapy and prevention by:
    a. distinguishing between prevention and therapy (1a, 1b, 2c);
    b. identifying methods of prevention for periodontal diseases (1a, 1b, 2c);
    c. identifying treatment modalities for periodontal diseases (1a, 1b, 2c).
4. Demonstrate an understanding of periodontal assessment data to develop a dental hygiene treatment plan by:
    a. identifying components of the periodontal assessment process (1a, 1b, 2c);
    b. performing analysis of patient assessment data (1a, 1b, 2c);
    c. formulating a dental hygiene treatment plan based on a patient's periodontal assessment data (1a, 1b, 2c).

Workforce Education Course Manual (WECM)

Description
(4-2-6) Foundational knowledge for performing clinical skills and management of medical emergencies for patients with emphasis on procedures and rationale for performing dental hygiene care. Introduction to ethical principles as they apply to dental hygiene care.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Explain the procedures and rationale for dental hygiene care; demonstrate basic dental hygiene instrumentation skills; and define ethical principles related to dental hygiene care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of various patient needs by:
    a. defining special needs patient (1a, 1b, 2c);
    b. identifying systemic conditions that warrant special considerations for a patient (1a, 1b, 2c).
2. Demonstrate an understanding of and the ability to formulate a treatment plan for the medically and dentally compromised patient by:
    a. defining the components for treatment planning (1a, 1b, 2c);
    b. developing treatment plans for medically compromised patients (1a, 1b, 2a, 2c, 2e).
3. Describe supplemental instrumentation techniques by:
    a. performing modified fulcrum techniques (1a, 1b, 2c);
    b. performing instrument sharpening (1a, 1b, 2c).
4. Demonstrate an understanding of ethical principles as they relate to dental hygiene care by:
    a. defining ethical terminology (1a, 1b, 2c);
    b. formulating a personal philosophy by writing a moral compass paper (1a, 1b, 2a, 2c, 2e).

Course Rubric	Course Number	Course Title
DHYG	2253	Dental Hygiene Practice

Semester Credit Hours	Lecture Hours	Lab Hours
2	1	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-3) Emphasis on the laws governing the practice of dentistry and dental hygiene, moral standards, and the ethical standards established by the dental hygiene profession. Practice settings for the dental hygienist, office operations, preparation for employment, and introduction to the dental team.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: Explain the Dental Practice Act governing the dental and dental hygiene profession; evaluate ethical and moral issues affecting dental hygiene practice; describe traditional and non-traditional dental hygiene practice settings; and prepare for employment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the rules governing the dental and dental hygiene profession by:
    a. demonstrating acceptable ratings on written exams (1a, 1b, 1c, 2b, 2c, 2e);
    b. contributing actively in class discussions (1a, 1b, 1c, 2b, 2c).
2. Demonstrate understanding of the ethical and moral issues affecting dental hygiene practice by:
    a. demonstrating acceptable ratings on written exams (1a, 1b, 1c, 2b, 2c, 2e);
    b. contributing actively in class discussions (1a, 1b, 1c, 2b, 2c).
3. Demonstrate understanding of the current technologies in dental hygiene practice settings by:
    a. demonstrating acceptable ratings on written exams (1a, 1b, 1c, 2b, 2c, 2e);
    b. contributing actively in utilizing the various technologies (1a, 1b, 1c, 2b, 2c, 2d, 2e).
4. Demonstrate understanding of the process to prepare for employment by:
    a. demonstrating acceptable ratings on written exams and resume writing (1a, 1b, 1c, 2b, 2c, 2e);
    b. contributing actively in activities designed to prepare them for seeking employment (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the dental hygiene knowledge applicable to the theory, concepts, and skills involving specialized dental hygiene instrumentation and procedures - intermediate level by:
    a. performing acceptable clinical skills demonstrations (1a, 1b, 1c, 2b, 2c, 2e);
    b. demonstrating knowledge as given on computer exams and written projects (1a, 1b, 1c, 2b, 2c, 2e).
2. Demonstrate understanding of the legal and ethical behavior expected during dental hygiene patient care by:
    a. demonstrating acceptable ratings on Professionalism Evaluations (1a, 1b, 1c, 2b, 2c, 2e).
3. Participate in clinical experiences applicable to dental hygiene patient care - intermediate level by:
    a. demonstrating acceptable clinical skills at extramural rotations (1a, 1b, 1c, 2b, 2b, 2c, 2e).

Requirements
Recommended Corequisite(s): HECO-1322 and DITA-1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply diet and nutrition principles to menu selection and food preparation for maximal health benefit and enjoyment of persons on regular or altered diets; discuss nutrition assessment and care planning process and participate in the processes as required; and organize the procurement and preparation of foods and meals to meet the dietary needs of clientele within resources available.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the relationship between food and culture by:
    a. demonstrating an understanding of cultural competence/sensitivity (KNDT 2.5) (1a, 1b, 2c);
    b. demonstrating effective interviewing and education methods for diverse individuals and groups (KNDT 2.2) (1a, 1b, 2c);
    c. obtaining food preferences from individuals (1a, 1b, 1c, 2a, 2b);
    d. comparing food customs and nutritional intake of various racial, cultural, and religious groups (1a, 1b, 2c);
    e. discussing factors that affect food choices (1a, 1b);
    f. performing self-assessment that includes self-awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement (KNDT 5.1) (CNDT 5.1) (1a, 1b, 1c);
2. Demonstrate understanding of normal nutrition and basic nutritional needs of healthy individuals by:
    a. identifying food sources of macro and micro nutrients (1a, 2a);
    b. describing primary functions of macro and micro nutrients (1a, 2b);
    c. discussing factors leading to excess dietary intake (1a, 1b, 2b, 2c);
    d. identifying foods high in saturated fat, sodium, carbohydrates, and calories (1a, 1b, 2a);
    e. identifying characteristics of a healthy meal (1a, 1b, 2b, 2c);
    f. developing a healthy and calorie controlled meal plan using current food guidance system (1a, 1b, 2c);
    g. providing nutrition and lifestyle education to well populations (CNDT 3.3) (1a, 1b, 2c);
    h. promoting health improvement, food safety, wellness, and disease prevention for the general population (CNDT 3.4) (1a, 1b, 2c);
3. Demonstrate general understanding of the use of complementary and alternative therapies by:
    a. recalling common complementary and alternative therapies (CAM) (1a, 1b, 2c);
    b. discussing principles and approaches of various CAM therapies (1a, 1b, 2c);
    c. identifying risks and benefits associated with the use of alternative therapies (1a, 1b, 2c);
4. Demonstrate understanding of basic concepts of Medical Nutrition Therapy (MNT) by:
    a. defining basic concepts of MNT (1a, 1b, 2c);
    b. explaining use of MNT in clinical settings (1a, 1b, 2c);
    c. reviewing symptoms of nutrient deficiency and excess as related to nutrient intake (1a, 1b, 2c);
    d. relating basic concepts of MNT to diseases involving different organ systems (1a, 1b, 2c);
    e. completing a case study research on a low risk patient (1a, 1b, 2c);
    f. referencing diet manuals or other nutrition resources (1a, 1b, 2c, 2e);
    g. demonstrating an understanding of the Nutrition Care Process and clinical workflow elements for nutrition screening for the referral to the registered dietitian nutritionist, collection of assessment data, nutrition interventions and monitoring strategies appropriate to technician level of practice (KNDT 3.1) (1a, 1b, 2b, 2d, 2e);
5. Perform nutrition interview to collect diet history by:
    a. identifying and describing the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services (KNDT 2.4) (1b, 1c);
    b. showing cultural humility in interactions colleagues, staff, clients, patients, and the public (CNDT 2.9) (1a, 1b, 1c, 2b, 2c);
    c. asking appropriate questions considering culture and needs of patients (1a, 1c, 2a, 2b, 2c);
    d. recognizing non-verbal responses and communication cues (1a, 1b);
    e. gathering information from patients, family members, and other multidisciplinary team members (1a, 1b, 2b, 2c);
    f. applying ethical and confidentiality principles (1b, 1c, 2a, 2d);
    g. addressing food customs and nutritional needs of patients (1a, 1b, 2c, 2d);
6. Perform nutrition screening and identify clients or patients to be referred to a registered dietitian nutritionist (CNDT 3.1) by:
    a. performing specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in accordance with the Scope of Nutrition and dietetics practice for individuals, groups, and populations in a variety of settings (CNDT 3.2) (1a, 1b, 1c);
    b. outlining nutrition screening process (1a, 1b, 2c);
    c. gathering appropriate data specific to client types (1a, 1b, 1c, 2a, 2c);
    d. recognizing signs and symptoms of malnutrition and excess intake (1a, 1b, 2c);
    e. recognizing signs and symptoms of dysphagia (1a, 1b, 2c);
    f. referring situations outside the nutrition and dietetics technician scope of practice or area of competence to a registered dietitian nutritionist or professional (CNDT 2.6) (1a, 1b, 2c);
    g. differentiating between nutrition screening and assessment (1a, 1b, 2c);
7. Demonstrate competency in conducting nutrition assessments by:
    a. applying critical thinking skills (KNDT 1.3) (1b);

b. gathering patient's history, dietary intake, anthropometric measurements, laboratory data, and clinical/physical assessment data (1a, 1b, 2a, 2c);

c. functioning as a member of inter-professional teams (CNDT 2.5) (1a, 1c, 2b);

d. computing nutrient intake (1a, 1b, 2a, 2c, 2e);

e. evaluating anthropometric measurements and growth (1a, 1b, 2c);

f. distinguishing nutrition-relevant laboratory values for nutritional assessment (1a, 1b, 2c, 2d);

g. estimating requirements for energy, protein, and fluid (1a, 1b, 2c);

h. identifying common food/drug interactions (1a, 1b, 2c);

i. evaluating patient's nutrition status (1a, 1b, 2c);

8. Plan nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs (KNDT 3.4) by:

a. accessing data, references, patient education materials, consumer, and other information from credible sources (CNDT 1.1) (1a, 2c, 2e);

b. evaluating information to determine if it is consistent with accepted scientific evidence (CNDT 1.2) (1a, 2c);

c. developing interventions to effect change and enhance wellness in diverse individuals and groups (KNDT 3.2) (1a 1b);

d. identifying menu planning needs of infants, children, and older adults (1a, 1b, 2c, 2d);

e. assisting patients with selection of meals that meet dietary restrictions (1a, 1b, 2b);

f. selecting appropriate foods for modified consistency and transitional diets (1a, 1b, 2c);

g. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various population, groups and individuals (CNDT 3.8) (1a, 1b, 2b, 2c);

h. honoring patient rights and input while providing nutrition care (1a, 1b, 2a, 2b, 2c, 2d);

i. monitoring signs and symptoms related to nutrition diagnosis and effectiveness of nutrition care plan (1a, 1b, 2a, 2c);

j. recognizing appropriateness of diet order for diagnosis (1a, 1b, 2c, 2d);

k. demonstrating active participation, teamwork, and contributions in group settings (CNDT 2.4) (1c, 2b);

9. Provide appropriate nutrition education by:

a. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice (KNDT 2.1) (1a);

b. using clear and effective oral and written communication (CNDT 2.2) (1a);

c. preparing and delivering sound food and nutrition presentations to a target audience (CNDT 2.3) (1a, 1b, 2c);

d. implementing interventions to effect change and enhance wellness in diverse individuals and groups (KNDT 3.2) (1a, 1b, 2d);

e. presenting an educational session to a target population (KNDT 3.3) (1a, 1b, 2c);

f. evaluating client readiness, ability to learn, and social resources (1a, 1b, 2b, 2c, 2d);

g. assessing client's knowledge and needs (1a, 1b, 2b, 2c, 2d);

h. selecting appropriate nutrition education materials and resources (1a, 1b, 2c);

i. suggesting acceptable food substitutes according to patient preferences (1a, 1b, 2c, 2d);

10. Utilize standardized language and nutrition terminology in documenting nutrition data by:

a. demonstrating how to locate, interpret, evaluate, and use professional literature to make ethical, evidenced-based practice decisions related to dietetics technician level of practice (KNDT 1.1) (1a, 1b, 2c);

b. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols (KNDT 1.2) (1b, 2c, 2e);

c. explaining uses of common documents, including diet manual, medical record, MDS form, and Resident Assessment Instrument (RAI) (1a, 1b, 2c);

d. decoding common medical abbreviations and medical nutrition terminology (1a, 2c);

e. charting in medical records using appropriate format (e.g. ADIME) and forms (1a, 1b, 2c);

f. using current nutrition informatics technology to develop, manage, and disseminate information and data (CNDT 4.3) (2c, 2e);

11. Understand the relationship between the quality of care and the regulatory agencies by:

a. identifying health care delivery systems and policies that impact nutrition and dietetics technician practice (KNDT 4.4) (1a, 1b);

b. stating the name of the regulatory agency for long term care facilities (1a, 1b, 2c);

c. explaining legislative and regulatory policies related to nutrition and dietetics technician level of practice (KNDT 2.6) (1a, 1b);

d. advocating for local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession (CNDT 2.10) (1a, 1b,1c, 2b, 2d, 2e);

e. explaining the importance of regulation on the quality management process (1a, 1b, 2c, 2d);

f. identifying regulatory areas specific to dietary/nutrition evaluation and intervention (1a, 1b, 2c, 2d);

g. describing the governance of nutrition and dietetics practice, such as the Scope for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics (KNDT 2.3) (1a, 1b, 1c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Name and use the latest safe food handling techniques to meet state and federal guidelines; and demonstrate leadership through recruitment, orientation, staff development, and evaluation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the processes involved in delivering quality food and nutrition services (KNDT 4.5) by:

a. comparing various meal service options (1a, 2a);

b. discussing quality control standards for meals, including appearance, portion size, temperature, diet accuracy, and acceptance (1a, 1b, 2a, 2c);

c. demonstrating use of standard food weights, measures, and recipes correctly (1a, 1b, 2a, 2c);

d. calculating food cost and meals per labor hours for foodservice operation (1a, 1b, 2a, 2c);

e. identifying and providing appropriate nutrition information based on patient needs (1a, 1b, 2d);

f. recommending procedures to monitor cost and passing of meals and nourishments (1a, 1b, 2a, 2c, 2d);

2. Supervise the purchasing, production, and service of food that meets nutrition guidelines, cost parameters, and health needs (CNDT 3.7) by:

a. identifying elements of standardizing recipes (1a, 1b);

b. using diet census and tally sheets to estimate amount to produce (1a, 1b);

c. using current nutrition informatics technology to develop, manage, and disseminate nutrition information, data, and to analyze nutrient contents of recipes (CNDT 4.3) (1a, 1b, 2a, 2c, 2e);

d. discussing procedures to monitor food production and food waste (1a, 1b);

e. proposing procedures and using procedures as appropriate to the practice setting to promote sustainability, reduce waste and protect the environment (CNDT 4.7) (1a, 1b, 2d);

3. Participate in menu planning for food service organizations by:

a. describing characteristics of different types of menus (1a, 1b);

b. utilizing nutrition guides and other appropriate resources to develop or modify menus (1a, 2a, 2c, 2e);

c. computing cost of menus, catered meals, and daily cost per patient (1a, 1b);

d. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals (CDNT 3.8) (1a, 1b, 2a, 2c, 2d);

4. Manage food supplies and equipment use as related to purchasing, receiving, storage, and distribution by:

a. conducting inventory and maintaining inventory records (1a, 1b);

b. describing the process of receiving food deliveries (1a, 1b, 2a);

c. recognizing signs of contamination upon receipt and in storage (1a, 1b, 2a, 2c, 2d);

d. explaining food and inventory management practices, such as FIFO, par stock, physical, and perpetual (1a, 1b, 2a);

e. describing specifications for products for purchasing (1a, 1b);

f. completing purchase order and requisition forms (1a, 1b);

g. selecting appropriate equipment considering needs, space, and budget (1a, 1b, 2a);

h. discussing process for vendor bidding and selection (1a, 1b);

i. establishing equipment cleaning and maintenance procedures (1a, 1b, 2a, 2d, 2e);

5. Evaluate departmental design and facility layout by:

a. reviewing kitchen design and facility layout of different types of food service facilities (1a, 1b, 2a, 2c, 2d);

b. identifying workflow and essential equipment (1b, 2a, 2c, 2d);

c. developing equipment specifications for new equipment requests (1a, 1b, 2a, 2d, 2e);

d. considering concepts of sustainability and environment in facility design (1a, 1b, 2a);

6. Apply safety and sanitation principles related to food, personnel, and consumers (KNDT 4.3) by:

a. explaining legislative and regulatory policies related to federal safety laws and regulations for food service facilities (KNDT 2.6) (1a, 1b, 2a);

b. identifying potentially hazardous foods and foodborne pathogens (1b, 2a, 2c);

c. explaining the HACCP principles (1a, 1b);

d. developing procedures to prevent cross contamination (1a, 1b, 2c, 2d);

e. recalling temperature and time during cooling and holding (1a, 1b);

f. developing a HACCP plan for a recipe (1a, 1b, 2c, 2d, 2e);

g. demonstrating proper hand washing procedure and safe food practices (1a, 1b);

h. interpreting and using SDS (1a, 1b);

i. writing cleaning procedures for utensils, equipment, and work areas (1a, 1b);

j. preparing a safety inspection check list (1a, 1b, 2c, 2d);

k. conducting a mock sanitation and safety inspection (1a, 1b, 2c, 2d);

7. Deliver nutrition services through quality improvement and customer satisfaction activities to improve delivery of nutrition services (CNDT 4.1) by:
    a. defining departmental goals and objectives (1a, 2a);
    b. identifying quality indicators in healthcare food service (1a, 1b, 2c);
    c. developing auditing tool to determine the effectiveness of quality indicators (1a, 1b, 2a, 2c, 2d, 2e);
    d. using technology to develop food acceptance survey to identify food preferences and problem areas (1a, 2a, 2c, 2d, 2e);
    e. providing recommendations to improve meal services (1a, 2a, 2c, 2d);
8. Participate in the human resource management process by:
    a. defining management functions of human resources (KNDT 4.1) (1a, 1b);
    b. calculating labor hours, FTEs and personnel cost for a foodservice department (1a, 2a, 2c);
    c. writing detailed job descriptions (1a, 1b);
    d. preparing departmental organizational chart (1a, 1b, 2a, 2c);
    e. participating in recruiting, interviewing, hiring, and termination processes (1a, 1b, 1c, 2a, 2b, 2c);
    f. identifying fair employment laws and practices (1a, 1b, 2a, 2c, 2d);
    g. preparing employee work schedules based on estimated needs and trends (1a, 1b, 2a, 2b, 2c);
    h. identifying personnel management laws and practices (1a, 1b, 2a);
    i. providing strategies to retain employees and decrease turnovers (1a, 1b, 2a, 2b, 2c, 2d);
    j. identifying criteria for promotion and termination (1a, 1b, 2c, 2d);
    k. preparing a performance evaluation (1a, 1b, 2c, 2d);
    l. practicing and/or role playing mentoring of employees (CNDT 2.13) (1c, 2b);
    m. demonstrating an understanding of the importance and expectations of a professional in mentoring and precepting others (KNDT 5.6) (1c, 2a, 2b);
9. Demonstrate understanding of business operations by
    a. defining financial terminology (1a, 1b);
    b. explaining budgeting principles and techniques (KNDT 4.2) (1a, 1b);
    c. identifying revenue-generating opportunity (1a, 2a);
    d. calculating employee productivity (1a, 2a);
    e. calculating food cost and profitability (1a, 2a);
    f. identifying cost-control strategies to balance budget (1b, 2a, 2c, 2d);
    g. assisting with marketing clinical and customer services (CNDT 4.6) (1a, 1b, 2d);
    h. differentiating between operating and capital budgets (1b, 2a, 2c, 2d);
    i. applying critical thinking skills (KNDT 1.3) (1b);
    j. assisting in developing a plan for a new foodservice operation, including budget (CNDT 4.4) (1b, 2a, 2c, 2d);
    k. making ethical decisions in business operations (1b, 1c, 2a).
10. Communicate effectively with staff by
    a. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice (KNDT 2.1) (1a, 2b);
    b. using clear and effective oral and written communication (CNDT 2.2) (1a, 2b);
    c. writing an internal memo on changes and justification for changes (1a, 1b, 2b, 2e);
    d. developing an agenda for conducting a departmental meeting (1b, 2a, 2b, 2c);
    e. presenting education and training sessions to employees on the following topics: facility procedures, HIPAA guidelines, food safety guidelines, infection control, and use/maintenance of equipment (CNDT 4.2) (1a, 2c, 2d).
11. Demonstrate professional attributes in all areas of practice (CNDT 2.8) by
    a. identifying and describing the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services (KNDT 2.4) (1a, 1c, 2b);
    b. functioning as a member of inter-professional teams (CNDT 2.5) (1a, 1c, 2b);
    c. demonstrating active participation, teamwork, and contributions in group settings (CNDT 2.4) (1a, 1c, 2b);
    d. adhering to current federal regulations and state statutes and rules by honoring patients' rights and responsibilities (CNDT 2.1) (1a, 1c, 2b);
    e. showing professionalism in interactions with colleagues, staff, clients, patients, and the public (CNDT 2.9) (1a, 1b, 1c, 2b, 2c);
    f. identifying and articulating the value of precepting (CNDT 5.7) (1a, 1b, 2a);
    g. advocating for local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession (CNDT 2.10) (1a, 1b,1c, 2b, 2d, 2e);
    h. defending a position on issues impacting nutrition and dietetics profession (KNDT 2.9) (1a, 1b, 2c, 2d).
12. Demonstrate skills, strengths, knowledge, and experience relevant to leadership potential and professional growth for the nutrition and dietetics practitioner by
    a. performing self-assessment that includes self-awareness in terms of learning and leadership styles and develop goals for self-improvement (KNDT 5.1) (CDNT 5.1) (1a, 1b, 1c);
    b. identifying and articulating one's skills, strengths, knowledge, and experiences relevant to the position desired and career goals (KNDT 5.2) (1a, 1b, 1c, 2a, 2b, 2d);
    c. practicing resolving differences or dealing with conflict, as appropriate (KNDT 5.4) (1a, 1b, 2a, 2b, 2c, 2d);
    d. advocating for opportunities in the professional settings (such as asking for additional responsibility, practicing negotiating a salary or wage or asking for a promotion) (CNDT 5.4) (1a, 1b, 1c, 2b, 2d);
    e. creating a resume and setting up an employment portfolio for documents collection (1a, 1b, 1c).

DMSO 1110 - Introduction to Sonography

General

Course Key
15166

Course Rubric
DMSO

Course Number
1110

Course Title
Introduction to Sonography

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
1

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-1) An introduction to the profession of sonography, the education and role of the sonographer. Emphasis on medical terminology, ethical/legal aspects, written and verbal communication, and professional issues relating to registry, accreditation, professional organizations and history of the profession. Required Prerequisite: Admission into Diagnostic Medical Sonography Program Required Corequisites: DMSO-1302, DMSO-1441, and DMSO-1266

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Corequisite

10
A Requirement block where all subrequirements are required

#TAKE DMSO-1302 DMSO-1441 DMSO-1266;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): Admission into Diagnostic Medical Sonography Program
Required Corequisite(s): DMSO 1302, DMSO 1441, and DMSO 1266

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Describe the historical development of ultrasound and related professional organizations; identify registry and lab accreditation requirements and process; discuss clinical practice guidelines for sonographers; define medical terms; and explain medical, legal, and ethical aspects of the profession.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Define sonographic terms and medical terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Describe the communication and critical thinking skills for the sonographer (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Describe sonographer safety issues (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Describe patient-sonographer interaction, including medical techniques, and patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Identify clinical assessments and sonographic procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Understand the fundamental elements for implementing a quality assurance and improvement program, and policies, protocols, and procedures for the general function of the ultrasound laboratory (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of acoustic physics, Doppler ultrasound principles, and ultrasound instrumentation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate basic medical techniques and patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate knowledge and understanding of human gross anatomy and sectional anatomy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge and understanding of physiology, pathology, and pathophysiology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate the scanning planes and methods used in sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Describe the operations of the assigned clinical facility service area (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate the professional qualities pertinent to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize the importance of, and practice ergonomically correct scanning techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Prepare patient for the sonographic examination and observe the clinical instructor during the sonographic evaluation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Integrate sonographic findings with clinical history, patient history, prior imaging studies, and lab results, and formulate the sonographic impression (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Present the case to the radiologist and articulate a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate professional judgement and discretion in relation to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Demonstrate knowledge and understanding of human gross anatomy and sectional anatomy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge and understanding of physiology, pathology, and pathophysiology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate the scanning planes, methods, and protocols used in sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Describe the operations of the assigned clinical facility service area (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate the professional qualities pertinent to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize the importance of, and practice ergonomically correct scanning techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Review sonographic order, review prior studies, review lab results, review the clinical history, obtain the patient history, and prepare patient for the sonography examination by explaining the procedure, how the patient will receive results, and placing the patient in the appropriate patient position to begin the scan (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Demonstrate the ability to perform sonographic examination of the abdomen-limited exam according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology in the abdomen-limited exam (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate the ability to perform sonographic examination of the abdomen-complete exam according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology in the abdomen-complete exam (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Demonstrate the ability to perform sonographic examination of the biopsy, aspiration, or drainage procedure according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology in the biopsy, aspiration, or drainage procedure (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
16. Integrate sonographic findings with clinical history, patient history, prior imaging studies, and lab results, and formulate the sonographic impression (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
17. Present the case to the radiologist and articulate a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
18. Demonstrate professional judgement and discretion in relation to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Identify the sonographic appearances of normal abdominal and pelvic structures.

End-of-Course Outcomes: Identify abnormal sonographic patterns and pathological processes in organs and structures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Recognize abnormal sonographic patterns of the abdomen, reproductive, and urinary systems (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Recognize pathologic processes in identified organ structures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Explain physiology, pathology, and pathophysiology of abdominal and pelvic organs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Discuss the processes of pathology by
    a. listing and describing the basic mechanisms of disease and risk factors associated with disease (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. listing and describing the categories of pathogenic organisms and how they cause disease (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. distinguishing between the terms “benign” and “malignant” as they apply to tumors (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. outlining the events of inflammatory response and explaining its role in disease (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Describe the appropriate scanning techniques according to standard protocol guidelines (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, other modalities, normal, normal variants, and abnormal sonographic patterns of the abdominal vascular system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the liver (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the biliary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the pancreas (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the gastrointestinal tract (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the urinary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the spleen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the adrenal glands (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the retroperitoneum (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the peritoneal cavity and spaces (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
16. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the female pelvis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

17. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the male pelvis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
18. Describe how other modalities correlate to the organ and vascular systems evaluated with sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
19. Demonstrate how to interact with physicians with oral and written communication using sonographic terms regarding sonographic findings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

A Requirement block where all subrequirements are required

#TAKE DSVT-1103 DMSO-2305 DMSO-2243;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): Admission into the Diagnostic Medical Sonography Program
Required Corequisite(s): DSVT 1103, DMSO 2305, and DMSO 2243

Course Learning Outcomes

Course Learning Outcomes

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of acoustic physics, Doppler ultrasound principles, and ultrasound instrumentation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate basic medical techniques and patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate knowledge and understanding of human gross anatomy and sectional anatomy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge and understanding of physiology, pathology, and pathophysiology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate the scanning planes, methods, and protocols used in sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Describe the operations of the assigned clinical facility service area (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate the professional qualities pertinent to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize the importance of, and practice ergonomically correct scanning techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Review sonographic order, review prior studies, review lab results, review the clinical history, obtain the patient history, and prepare patient for the sonography examination by explaining the procedure, how the patient will receive results, and placing the patient in the appropriate patient position to begin the scan (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Demonstrate the ability to perform sonographic examination of the liver according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the liver (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate the ability to perform sonographic examination of the gallbladder and biliary system according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the gallbladder and biliary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Demonstrate the ability to perform sonographic examination of the spleen according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the spleen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
16. Demonstrate the ability to perform sonographic examination of the pancreas according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
17. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the pancreas (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
18. Demonstrate the ability to perform sonographic examination of the urinary system according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
19. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the urinary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
20. Demonstrate the ability to perform sonographic examination of the prevertebral vessels (aorta, IVC) according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

21. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the prevertebral vessels (aorta, IVC) (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
22. Demonstrate the ability to perform sonographic examination of the abdomen according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
23. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the abdomen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
24. Integrate sonographic findings with clinical history, patient history, prior imaging studies, and lab results, and formulate the sonographic impression (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
25. Present the case to the radiologist and articulate a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
26. Demonstrate professional judgement and discretion in relation to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

7. Demonstrate the professional qualities pertinent to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize the importance of, and practice ergonomically correct scanning techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Review sonographic order, review prior studies, review lab results, review the clinical history, obtain the patient history, and prepare patient for the sonography examination by explaining the procedure, how the patient will receive results, and placing the patient in the appropriate patient position to begin the scan (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Demonstrate the ability to perform sonographic examination of the abdomen with pathology according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the abdomen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate the ability to perform sonographic examination of the thyroid according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the thyroid (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Demonstrate the ability to perform sonographic examination of the scrotum according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the scrotum (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
16. Demonstrate the ability to perform sonographic examination of the transabdominal non-gravid gynecological region according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
17. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the transabdominal non-gravid gynecological region (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
18. Demonstrate the ability to perform sonographic examination of the endocavitary, non-gravid gynecological region according to protocol (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
19. Identify relational anatomy, normal anatomy, anatomic variants, pathology, and pathophysiology of the endocavitary, non-gravid gynecological region (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
20. Recognize, identify, and appropriately document the sonographic appearance of obstetric abnormalities, disease, pathology, and

pathophysiology in the first trimester exam (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

21. Recognize, identify, and appropriately document the sonographic appearance of obstetric abnormalities, disease, pathology, and pathophysiology in the obstetric-limited and follow-up of second and third trimester exams (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
22. Recognize, identify, and appropriately document the sonographic appearance of obstetric abnormalities, disease, pathology, and pathophysiology in the biophysical exam (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
23. Integrate sonographic findings with clinical history, patient history, prior imaging studies, and lab results, and formulate the sonographic impression (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
24. Present the case to the radiologist and articulate a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
25. Demonstrate professional judgement and discretion in relation to patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Identify the sonographic appearances of normal abdominal and pelvic structures; explain physiology of abdominal and pelvic organs; and describe ergonomic scanning techniques according to standard protocol guidelines.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Explain physiology, pathology, and pathophysiology of abdominal and pelvic organs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, other modalities, normal, normal variants, and abnormal sonographic patterns of the abdominal vascular system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the liver (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the biliary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the pancreas (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the gastrointestinal tract (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the urinary system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the spleen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the adrenal glands (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the retroperitoneum (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the peritoneal cavity and spaces (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the female pelvis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Demonstrate knowledge and understanding of the human gross anatomy, sectional anatomy, embryology, normal, normal variants, and abnormal sonographic patterns of the male pelvis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Describe how other modalities correlate to the organ and vascular systems evaluated with sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Demonstrate how to interact with physicians with oral and written communication using sonographic terms regarding sonographic findings, including formulating a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

End-of-Course Outcomes: Differentiate normal and abnormal fetal and maternal structures; evaluate patient history and laboratory data as it relates to ultrasound.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Describe the sonographic appearance of obstetric abnormalities, disease, pathology, and pathophysiology (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Describe ultrasound and its application in high risk pregnancy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Describe 3-D and 4-D evaluation of fetal anomalies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Describe the fetal syndromes and congenital anomalies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Describe the fetal therapy in obstetrics (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Describe the role of Doppler in Obstetrics (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Describe prenatal management of the fetus with a correctable defect (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize, identify, and appropriately document normal and abnormal findings of sonography of the multiple-gestation pregnancy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Recognize, identify, and appropriately document normal and abnormal findings relating to artifacts, pitfalls, and normal variants (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): Admission into Diagnostic Medical Sonography Program
Required Corequisite(s): DMSO 2305, DMSO 1366, and DSVT 1103

Course Learning Outcomes

Course Learning Outcomes

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Describe ultrasound principles and instrumentation including modes of operation, techniques for recording sonographic images, and advances in ultrasound technology.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Describe the interaction of sound and soft tissues (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Explain sound production and propagation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate knowledge and understanding of acoustic physics, Doppler principles, and ultrasound instrumentation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge and understanding of the interaction between ultrasound and tissue, and the probability of biological effects of clinical ultrasound (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Summarize the basic principles and techniques of ultrasound (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

DMSO 2253 - Sonography of Superficial Structures

Course Learning Outcomes

Course Learning Outcomes

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Identify sonographic appearance of normal and abnormal superficial structures; demonstrate ergonomic scanning techniques using standard protocol guidelines; and evaluate patient history and laboratory data as it relates to superficial structures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify sonographic appearance of normal and abnormal structures as they relate to invasive procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Identify sonographic appearance of normal and abnormal non-cardiac chest; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Identify sonographic appearance of normal and abnormal neck; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Identify sonographic appearance of normal and abnormal breast; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Identify sonographic appearance of normal and abnormal scrotum; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Identify sonographic appearance of normal and abnormal prostate; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Identify sonographic appearance of normal and abnormal anterior abdominal wall; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Identify sonographic appearance of normal and abnormal extremities; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Identify sonographic appearance of normal and abnormal neonatal brain and spinal cord; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Identify sonographic appearance of normal and abnormal neonatal hips; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Identify sonographic appearance of normal and abnormal musculoskeletal; identify appropriate scanning technique using standard protocol guidelines; and evaluate patient history and laboratory data as they relate to sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Describe how other modalities correlate to the superficial structures evaluated with sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Demonstrate how to interact with physicians with oral and written communication using sonographic terms regarding sonographic findings, including formulating a differential diagnosis (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Identify the sonographic appearances of normal and abnormal female pelvis; identify normal and abnormal obstetrical findings; demonstrate ergonomic scanning techniques using standard protocols; and evaluate patient history and laboratory data as it relates to sonography.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Recognize, identify, and appropriately document the sonographic appearances of normal and abnormal female pelvis findings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Recognize, identify, and appropriately document the sonographic appearances of normal and abnormal obstetrical findings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate appropriate scanning techniques using standard protocols for obstetrical and gynecological pelvis sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Evaluate patient history and laboratory data as they relate to obstetrical and gynecological pelvis sonography (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Discuss the role of ultrasound in obstetrics (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Recognize, identify, and appropriately document the sonographic appearance of normal maternal, embryonic, and fetal anatomic structures during the first, second, and third trimesters (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Recognize, identify, and appropriately document first trimester complications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Recognize, identify, and appropriately document complications during the second and third trimesters (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
9. Recognize, identify, and appropriately document obstetric measurements and gestational age (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
10. Recognize, identify, and appropriately document normal and abnormal fetal growth assessment by ultrasound (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
11. Describe prenatal diagnosis of congenital anomalies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
12. Recognize, identify, and appropriately document normal and abnormal findings of the placenta (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
13. Recognize, identify, and appropriately document normal and abnormal findings of the umbilical cord (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
14. Recognize, identify, and appropriately document normal and abnormal findings of the amniotic fluid and membranes (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
15. Recognize, identify, and appropriately document normal and abnormal findings of sonography of the multiple gestation pregnancy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
16. Recognize, identify, and appropriately document normal and abnormal findings relating to artifacts, pitfalls, and normal variants (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

DNTA 1103 - Registered Dental Assistant Exam Review

1103

Course Title
Registered Dental Assistant Exam Review

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0) Preparation for Dental Assistants to meet Texas State Board of Dental Examiners (TSBDE) examination requirements. Includes review of radiology, infection control, and jurisprudence and take the TSBDE exam upon completion of course.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify principles and theories relating to radiology, infection control, and jurisprudence; and take the TSBDE exam upon completion of course.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of general guidelines and industry standards for dental radiology by
    a. describing x-ray production and radiation protection (1a, 1b, 2c);
    b. describing radiographic infection control, patient education and positioning/exposure procedures (1a, 1b, 2c);
    c. explaining digital and manual radiographic image processing and duplication (1a, 1b, 2c);
    d. identifying radiographic anatomical landmarks and mounting techniques (1a, 1b, 2c);
    e. describing digital and extraoral radiographic exposures (1a, 1b, 2c);
    f. explaining radiographic quality assurance and HIPAA/Patient Privacy Rules (1a, 1b, 2c).
2. Demonstrate an understanding of general guidelines and industry standards for dental infection control by
    a. explaining the OSHA/Hazard Communication Standards (1a, 1b, 2c);
    b. describing infectious diseases, immunizations, hand hygiene, and personal protective equipment (1a, 1b, 2c);
    c. differentiating between disinfection and sterilization protocols (1a, 1b, 2c);
    d. differentiating between dental equipment infection control, handling hazardous materials, and infection control quality assurance procedures (1a, 1b, 2c).
3. Demonstrate an understanding of general guidelines and industry standards for dental jurisprudence by
    a. differentiating between jurisprudence and ethics (1a, 1b, 2c);
    b. identifying TSBDE Dental Practice Act sections applicable to dental assistants (1a 1b, 2c);
    c. identifying TSBDE Occupations Code and Regulations sections applicable to dental assistants (1a, 1b, 2c);
    d. explaining the TSBDE rules and regulations for dental assistants to become registered to expose dental x-rays (1a, 1b, 2c).
4. Demonstrate an understanding of obtaining TSBDE Registered Dental Assistant (RDA) certification by
    a. explaining TSBDE RDA examination requirements and process (1a, 1b, 2c);
    b. explaining TSBDE RDA application requirements and process (1a, 1b, 2c);
    c. explaining TSBDE RDA CEU's requirements and process (1a, 1b, 2c).

DNTA 1202 - Comm and Behavior in The Dental Office

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-1-3) The study of human interaction and communication in the dental office.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Recognize human behaviors; and demonstrate techniques required to communicate effectively with patients and health professionals.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of human behavior in a professional setting by
    a. describing the aspect of cultural diversity and interpersonal relationships (1a, 1b, 1c, 2b);
    b. explaining how social attitudes influence behavior (1a, 1b, 1c, 2b);
    c. differentiating the levels of Maslow's hierarchy of needs (1a, 1b, 1c, 2b);
2. Demonstrate an understanding of communication pathways by
    a. describing the two parts of a communication message (1a, 1b, 2b, 2c);
    b. differentiating between verbal and non-verbal communications (1a, 1b, 1c, 2b);
    c. explaining the effectiveness of good listening skills (1a, 1b, 1c, 2b);
3. Demonstrate an understanding of interpersonal communications by
    a. describing how to effectively communicate with the dental team (1a, 1b, 1c, 2b);
    b. explaining the importance of effective patient communication (1a, 1b, 1c, 2b);
    c. identifying the different needs of patients in a patient-professional relationship (1a, 1b, 1c, 2b);
    d. describing the communication and behavior traits that meet patient needs (1a, 1b, 1c, 2b);
4. Demonstrate an understanding of effective telephone and written skills by
    a. describing telephone courtesy and etiquette (1a, 1b, 2b, 2c);
    b. explaining appropriate methods of handling different types of calls (1a, 1b, 2b, 2c);
    c. identifying telephone messaging systems (1a, 1b, 2c, 2d);
    d. describing business letter formats (1a, 1b, 2c);
    e. identifying the components of a business letter (1a, 1b, 2c);
5. Demonstrate an understanding of practice marketing by
    a. differentiating between internal and external marketing methods (1a, 1b, 2b, 2c);
    b. describing internal and external marketing tools (1a, 1b, 2b, 2c);

Workforce Education Course Manual (WECM)

Description
(2-1-3) The study of nutrition and preventable dental disease and community dental health.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Provide nutritional and preventive dental counseling; apply fluoride agents; demonstrate oral hygiene techniques; and participate in community dental health activities.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of dental caries and periodontal disease and impact oral health by
    a. describing dental caries, risk factors, and intervention methods (1a, 1b, 2c);
    b. explaining periodontal procedures including periodontal charting (1a, 1b, 2c).
2. Demonstrate an understanding of preventive dentistry components that improve dental health by
    a. performing oral hygiene techniques for patient use (1a, 1b, 2b, 2c);
    b. communicating nutritional counseling to promote good oral health (1a, 1b, 2b, 2c);
    c. describing medical issues that affect the oral health of special needs and medically compromised patients (1a, 1b, 2c);
    d. identifying the different drug schedules and associated complications (1a, 1b, 2c).
3. Demonstrate an understanding of preventive dentistry in pediatrics by
    a. differentiating between pediatric and adult dental procedures (1a, 1b, 2c);
    b. describing the dental sealants procedure in preventing caries development (1a, 1b, 2b, 2c);
    c. explaining the coronal polishing procedure in removing intrinsic stains (1a, 1b, 2b, 2c).
4. Demonstrate an understanding of the application of preventive dentistry in dental community health by
    a. researching and developing a dental community health topic for general presentation (1a, 1b, 2b, 2c);
    b. researching and developing a group dental community health topic for pediatric and special needs presentation (1a, 1b, 2b, 2c).

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Perform dental office administrative duties; demonstrate accounting and financial operations; comply with federal and state guidelines regarding health care providers; and operate dental technology and software systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of the course, students will:

1. Demonstrate an understanding the dental office management role of the business assistant by:
    a. identifying general administrative functions and tasks (1a, 1b, 2c, 2d);
    b. describing effective communication and management skills (1a, 1b, 1c, 2b, 2c);
    c. explaining the financial relationship between business and clinical areas (1a, 1b, 2a, 2b, 2c);
    d. differentiating between compliance, operational and personnel manuals (1a, 1b, 2a, 2c, 2d).
2. Demonstrate an understanding of dental business office operating systems by:
    a. differentiating between types of electronic/manual patient files and records (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining electronic/manual appointment scheduling procedures (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing effective telephone management for appointment scheduling (1a, 1b, 1c, 2b, 2c);
    d. differentiating between electronic/manual recall management procedures (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining inventory management procedures (1a, 1b, 2a, 2c, 2d, 2e);
    f. describing equipment maintenance/repair records (1a, 1b, 2a, 2c, 2d, 2e);
    g. performing electronic dental business office tasks/procedures using Dentrix software (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding dental office financial accounts management by:
    a. differentiating between accounts receivable and accounts payable (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining the components of accounts receivable and payable (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing effective financial billing and collections procedures (1a, 1b, 2a, 2c, 2d, 2e);
    d. identifying payroll deductions and employer financial responsibilities (1a, 1b, 2c, 2d, 2e);
    e. differentiating between types of third-party dental insurance plans (1a, 1b, 2c);
    f. explaining filing/managing dental insurance claims procedures (1a, 1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate dental materials for specific procedures; manipulate materials; demonstrate the basic principles of laboratory safety and comply with OSHA and other regulatory agencies' standards.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of dental impression materials by
    a. differentiating between hydrocolloid, elastomeric, and occlusal (bite) registration impression materials and uses (1a, 1b, 2c);
    b. identifying the appropriate impressions' materials and trays (1a, 1b, 2c);
    c. explaining corresponding mixing techniques and applications (1a, 1b, 2c);
    d. performing irreversible hydrocolloid (alginate) impressions on a typodont (1a,1b, 2c);
    e. performing elastomeric and occlusal (bite) registration impressions on a typodont (1a, 1b, 2c);
    f. describing appropriate dental impression asepsis and infection control procedures (1a, 1b, 2c).
2. Demonstrate an understanding of laboratory equipment and procedures by
    a. identifying dental laboratory equipment and uses (1a, 1b, 2c);
    b. explaining dental laboratory safety precautions (1a, 1b, 2c);
    c. describing purpose and use of gypsum products (1a, 1b, 2c);
    d. performing pouring/trimming a set of study models using dental gypsum (1a,1b, 2c);
    e. differentiating between three types of custom impression trays (1a, 1b, 2c);
    f. identifying types of dental waxes and uses (1a, 1b, 2c).
3. Demonstrate an understanding of restorative and esthetic dental materials by
    a. describing the general properties of dental materials (1a, 1b, 2c);
    b. describing direct restorative and esthetic materials and uses (1a, 1b, 2c);
    c. differentiating between amalgam and composite properties and application (1a, 1b, 2c);
    d. identifying instrumentation for amalgam and composite placement (1a, 1b, 2c);
    e. identifying matrix materials and uses (1a, 1b, 2c);
    f. performing manipulation and placement of amalgam and composite materials (1a, 1b, 2c);
    g. explaining the use of glass ionomers and temporary restorative materials (1a, 1b, 2c);
    h. performing multiple methods of temporary crown fabrication (1a, 1b, 2c);
    i. describing function of indirect restorative and esthetic materials (1a, 1b, 2a);
    j. performing whitening tray fabrication and use of whitening products (1a, 1b, 2a).
4. Demonstrate an understanding of dental liners, bases, and bonding systems by
    a. differentiating between dental liners, bases and bonding systems (1a, 1b, 2c);
    b. describing the correlation between tooth sensitivity and material selection (1a, 1b, 2c);
    c. explaining the restorative uses of cavity liners, sealers, desensitizers and bases (1a, 1b, 2c);
    d. performing manipulation and placement of cavity liners, sealers, desensitizers, and bases on a typodont (1a, 1b, 2c);
    e. describing dentin and enamel bonding systems and adhesion process (1a, 1b, 2c);
    f. explaining the etchant, bonding, and application procedure steps (1a, 1b, 2c);
    g. performing manipulation and placement of a selected bonding system on a typodont (1a, 1b, 2c).
5. Demonstrate an understanding of permanent and temporary dental cements by
    a. differentiating between the types of cements (1a, 1b, 2c);
    b. describing the luting properties of selected cements (1a, 1b, 2c);
    c. identifying factors that affect final cementation (1a, 1b, 2c);
    d. explaining cement removal instrumentation and procedure steps (1a, 1b, 2c).

DNTA 1305 - Dental Radiology

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) Introduction to radiation physics, radiation protection, and the operation of radiographic equipment. Instruction in exposure, processing and mounting of dental radiographs, and study of federal and state safety and standard practices.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the theory of radiation physics; comply with radiation health and safety principles; apply radiographic techniques; expose, process, and mount radiographs; and demonstrate quality assurance practices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of radiation physics by
    a. identifying the properties of x-rays (1a, 1b, 2c);
    b. describing the production of x-rays (1a, 1b, 2c);
    c. differentiating between the types of radiation (1a, 1b, 2c);
    d. describing the characteristics of the x-ray beam (1a, 1b, 2c).
2. Demonstrate an understanding of radiation effects and safety by
    a. explaining the effect of ionization on human tissues (1, 1b, 2c);
    b. describing the biological effects of radiation and the latent period (1a, 1b, 2c);
    c. differentiating radiation safety processes for the equipment, operator, and patient (a, 1b, 2c);
    d. performing proper safety precautions for the operator and patient (1a, 1b, 2c).
3. Demonstrate an understanding of standard and digital imaging equipment by
    a. describing the standard x-ray unit components and function (1a, 1b, 2c);
    b. describing the digital imaging unit components and function (1a, 1b, 2c);
    c. differentiating between the standard and digital imaging devices (1a, 1b, 2c).
4. Demonstrate an understanding of infection control and operator/patient exposure preparation procedures by
    a. describing the CDC Guidelines for Infection Control in Dental Health-Care Settings (1a, 1b, 2c);
    b. explaining before and after exposure infection control procedures for operator/patient (1a, 1b, 2c);
    c. performing placement of treatment area and x-ray equipment barriers (1a, 1b, 2c, 2d);
    d. performing operator and patient preparation procedures for exposure (1a, 1b, 2c, 2d).
5. Demonstrate an understanding of intraoral imaging exposure by
    a. differentiating between digital, portable, and standard (film) imaging exposure techniques (1a, 1b, 2c, 2e);
    b. differentiating between intraoral bisecting and paralleling exposure techniques (1a, 1b, 2c);
    c. describing patient positioning and PID (cone)/tube head placement (1a, 1b, 2c);
    d. explaining image receptor placement for anterior and posterior exposure sequencing (1a, 1b, 2c);
    e. performing bitewing and full mouth survey exposure (1a, 1b, 2c, 2d);
    f. identifying exposure errors and exposure corrective actions (1a, 1b, 2c).
6. Demonstrate an understanding of extraoral imaging exposure by
    a. differentiating between panoramic and cone beam computed tomography (CBCT) (1a, 1b, 2c, 2e);
    b. describing patient positioning for panoramic and CBCT exposures (1a, 1b, 2c);
    c. explaining operation of panoramic and CBCT units (1a, 1b, 2c, 2e);
    d. performing panoramic and CBCT exposure (1a, 1b, 2c, 2d, 2e).
7. Demonstrate an understanding of digital and film image processing by
    a. differentiating between digital and film processing techniques (1a, 1b, 2c);
    b. describing procedure steps to scan and view digital dental images (1a, 1b, 2c);
    c. performing intraoral and extraoral scanning and viewing procedure steps (1a, 1b, 2c);
    d. explaining the film processing procedure steps and chemical components (1a, 1b, 2c);
    e. identifying processing errors and corrective actions (1a, 1b, 2c).
8. Demonstrate an understanding of legal and quality assurance considerations by
    a. differentiating between the laws that impact dental imaging exposure (1a, 1b, 2c);
    b. describing the components of a radiology quality assurance program (1a, 1b, 2c);
    c. performing quality control tests on radiographic equipment (1a, 1b, 2c, 2d).

DNTA 1311 - Dental Science

General

Course Key
14692

Course Rubric	Course Number	Course Title
DNTA	1311	Dental Science
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A fundamental study of anatomical systems with emphasis placed on head and neck anatomy. Topics include embryology of the teeth along with basic dental terminology.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe anatomical systems in terms of components and functions; identify teeth and related structures; recognize oral structures and tooth nomenclature; and explain the physiology and morphology of the deciduous/primary and the permanent/secondary teeth.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of oral embryology and histology and their correlating development phases and structures by
    a. explaining the embryonic development of the face and oral cavity (1a, 1b, 2c);
    b. identifying developmental disturbances of the jaws and dental structures (1a, 1b, 2c);
    c. describing the life cycle of a tooth (1a, 1b, 2c);
    d. identifying the parts of the tooth and its surrounding structures (1a, 1b, 2c);
    e. differentiating the chronological order of eruption for the primary and permanent dentition (1a, 1b, 2c).
2. Demonstrate an understanding of head, neck, and oral anatomy and their corresponding structures by
    a. identifying bones and anatomical landmarks of the skull and face (1a, 1b, 2c);
    b. identifying muscles of facial expression and mastication (1a, 1b, 2c);
    c. describing location and function of the major salivary glands, blood supply, trigeminal nerve, and lymph nodes of the head and neck (1a, 1b, 2c);
    d. identifying anatomical landmarks of the face and oral cavity (1a, 1b, 2c).
3. Demonstrate an understanding of the dentitions and tooth morphology by
    a. differentiating between the primary and permanent dentitions (1a, 1b, 2c);
    b. identifying the names of the teeth and their functions (1a, 1b, 2c);
    c. describing the location and surfaces for the primary and permanent dentitions (1a, 1b, 2c).
4. Demonstrate an understanding of oral pathology and the impact of disease on the oral tissues by
    a. differentiating between acute and chronic inflammation and their signs (1a, 1b, 2c);
    b. describing diseases of the oral tissues (1a, 1b, 2c);
    c. identifying development disorders of the jaws and dentition (1a, 1b, 2c).

DNTA 1315 - Chairside Assisting

General

Course Key
14693

Course Rubric	Course Number	Course Title
DNTA	1315	Chairside Assisting

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A study of pre-clinical chairside assisting procedures, instrumentation, OSHA and other regulatory agencies' standards.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select armamentarium for introductory dental skills; implement infection and hazard control protocol; practice equipment safety; perform equipment maintenance; and demonstrate specific pre-clinical chairside assisting procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of asepsis and disinfection by
    a. describing steps in preparing instruments for sterilization and disinfection procedures to comply with OSHA and manufacturer's specifications (1a, 1b, 2c, 2d);
    b. describing appropriate instrumentation preparation prior to sterilization (1a, 1b, 2c);
    c. describing the operation and use of the ultrasonic cleaner (1a, 1b, 2c);
    d. identifying the correct time, temperature, pressure, and monitoring procedures used for moist heat (autoclave) and flash sterilization (1a, 1b, 2c);
    e. describing proper storage and handling of sterilized instruments (1a, 1b, 2c);
    f. explaining the procedure for biological monitoring (1a, 1b, 2c, 2d);
    g. differentiating current OSHA regulations pertaining to asepsis, chemical, and waste management (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of the prevention of disease transmission and cross-contamination by
    a. performing correct handwashing techniques (1a, 1b, 2c);
    b. performing the donning and doffing of appropriate personal protective equipment (1a, 1b, 2c);
    c. performing appropriate setup breakdown and protective barriers placement for the dental chair, dental unit, and dental equipment in the operatory (1a, 1b, 2c, 2d);
    d. performing proper breakdown and surface disinfection techniques for the dental chair, dental unit, and dental equipment in the operatory (1a, 1b, 2c, 2d);
    e. explaining the daily maintenance procedures performed by the dental assistant (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of patient information and assessment by
    a. describing personal health information (PHI) and its application to HIPAA (1a, 1b, 2c);
    b. identifying the components of the electronic/manual patient chart and dental record (1a, 1b, 2c);
    c. recording a patient's medical health history, blood pressure, and pulse (1a, 1b, 2c);
    d. describing advanced patient monitoring procedures and assessment (1a, 1b, 2c, 2d).
4. Demonstrate a basic understanding of oral diagnosis and treatment planning by
    a. differentiating the numbering system of teeth for the Universal (primary and permanent), Palmer, and International methods (1a, 1b, 2c, 2d);
    b. identifying the six classifications of cavities (1a, 1b, 2c);
    c. charting existing conditions of the teeth/oral cavity using appropriate charting abbreviations (1a, 1b, 2c);
    d. explaining the purpose and types of dental treatment plans (1a, 1b, 2c).
5. Demonstrate an understanding of delivering dental care by
    a. describing four-and six-handed dentistry (1a, 1b, 2c);
    b. explaining the clock concept and various positions for the patient, operator, and assistant (1a, 1b, 2c);
    c. performing the proper positioning (posture) of the operator (1a, 1b, 2c);
    d. performing the proper positioning (posture) of the assistant (1a, 1b, 2c).
6. Demonstrate an understanding of dental hand instruments, procedure trays, and handpieces by
    a. describing appropriate armamentarium for specific chairside procedures (1a, 1b, 2c);
    b. describing preset trays, tubs, and color-coding systems (1a, 1b, 2c);
    c. explaining the use of dental handpieces in dental procedures (1a, 1b, 2c);
    d. performing proper maintenance of all handpieces (1a, 1b, 2c);
    e. differentiating between the various types of burs and their function (1a, 1b, 2c).
7. Demonstrate an understanding of moisture control in the oral cavity by
    a. performing oral evacuation/tissue retraction with the high-volume evacuator and saliva ejector (1a, 1b, 2c);
    b. performing rinsing of the oral cavity with the air-water syringe (1a, 1b, 2c);
    c. explaining isolation techniques to decrease moisture during dental procedures (1a, 1b, 2c);
    d. describing dental dam placement for anterior and posterior teeth (1a, 1b, 2c).
8. Demonstrate an understanding of anesthesia and pain control by
    a. explaining the importance of pain control in dentistry (1a, 1b, 2c);
    b. describing the composition and application of topical anesthetics (1a, 1b, 2c);
    c. performing the placement of a topical anesthetic agent (1a, 1b, 2c);
    d. describing the composition and application of local anesthetic agents (1a, 1b, 2c);
    e. performing the preparation and management of a local anesthetic setup (1a, 1b, 2c).

A Requirement block where all subrequirements are required

Take dnta-1315;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): DNTA 1315

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Assemble tray setups and materials for designated general and specialty procedures; record patient chart information; maintain clear field of vision including isolation techniques; utilize chairside ergonomics; and apply OSHA and other regulatory agencies' standards.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of general and specialty patient procedures by
    a. performing a review of the electronic/manual patient chart for treatment;
    b. performing patient medical health history, blood pressure, and pulse assessment;
    c. identifying basic oral exam instrumentation, materials, and tray setup;
    d. explaining proper ergonomic positioning for the assistant and operator;
    e. performing oral evacuation/tissue retraction with the high volume evacuator and saliva ejector;
    f. performing rinsing of the oral cavity with the air/water syringe;
    g. explaining isolation techniques for moisture control during dental procedures;
    h. differentiating between general/specialty dental procedures;
    i. differentiating patient postoperative instructions for general/specialty procedures.
2. Demonstrate an understanding of the dental assistant's role in amalgam and composite restoration procedures by
    a. differentiating between restoration classifications for amalgam and composite restorations;
    b. describing instrumentation, materials, and tray setup for Class I and II amalgam restorations;
    c. identifying instrumentation, materials, and tray setup for composite (direct veneer) restorations;
    d. differentiating between Class III and IV composite restoration procedure steps;
    e. assembling an armamentarium tray setup for a simulated composite restoration procedure.
3. Demonstrate an understanding of the dental assistant's role in fixed and removable prosthodontic restoration procedures by
    a. differentiating between fixed and removable prosthodontic restorations;
    b. differentiating between full, partial, and overdentures;
    c. differentiating between various indirect fixed prosthodontic restorations;
    d. identifying full metal or porcelain-fused-to-metal crown and fixed bridge instrumentation, materials, and tray setups;
    e. describing crown and bridge restoration procedure steps;
    f. explaining shade selection procedure;
    g. assembling an armamentarium tray setup for a simulated crown and bridge procedure;
    h. identifying necessary information required on the laboratory prescription form;
    i. differentiating between manual and computer-assisted impression restoration fabrication process.
4. Demonstrate an understanding of the dental assistant's role in oral and maxillofacial surgery procedures by
    a. differentiating between various oral and maxillofacial procedures;
    b. identifying specialized oral surgery instruments and accessories;
    c. describing function/use of specialized oral surgery instruments and accessories;
    d. identifying surgical extraction instrumentation, materials, and tray setup;
    e. describing surgical extraction procedure steps;
    f. assembling an armamentarium tray setup for a simulated surgical extraction procedure;
    g. explaining suture removal procedure steps;
    h. assembling an armamentarium tray setup for a simulated suture removal procedure;
    i. describing post-surgical care for bleeding, pain management, and swelling;
    j. explaining alveolar osteitis (dry socket) treatment.
5. Demonstrate an understanding of the dental assistant's role in endodontic procedures by
    a. differentiating between the various endodontic procedures;
    b. describing endodontic diagnosis techniques;
    c. differentiating between pulp capping, pulpotomy, and pulpectomy;
    d. identifying specialized endodontic instruments and accessories;
    e. describing function/use of specialized endodontic instruments and accessories;
    f. identifying endodontic (root canal) instrumentation, materials, and tray setup;
    g. describing endodontic root canal procedure steps;
    h. assembling an armamentarium tray setup for a simulated endodontic (root canal) procedure.
6. Demonstrate an understanding of the dental assistant's role in dental implants and orthodontic specialty procedures by
    a. describing types of dental implants;
    b. describing the dental implant surgical and restorative procedure steps;
    c. explaining the corrective orthodontic process and treatment;
    d. identifying specialized orthodontic instruments and accessories.

Requirements
Required Prerequisite(s): Coordinator Approval

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

1. Demonstrate an understanding of the dental assistant's role in the dental clinical setting by
    a. differentiating the roles of the dental team (1a, 1b, 2c, 2b);
    b. describing the characteristics of a professional dental assistant (1a, 1b, 1c, 2b, 2c);
    c. explaining the professional code of ethics for a dental assistant (1a, 1b, 1c, 2b, 2c);
    d. identifying the State Board of Dental Examiners dental assistant rules and regulations (1a, 1b, 2c).
2. Demonstrate an understanding of applied general patient assessment skills in the dental clinical setting by
    a. integrating dental terminology into daily procedures (1a, 1b, 2c);
    b. assembling patient records for treatment (1a, 1b, 2c);
    c. receiving and preparing the patient for dental treatment (1a, 1b, 2c);
    d. performing a review of patient's medical and dental history (1a, 1b, 2c);
    e. recording patient vital signs (1a, 1b, 2c);
    f. exposing, processing, and labeling dental x-rays (1a, 1b, 2c);
    g. taking alginate impressions for study models (1a, 1b, 2c);
    h. charting existing oral conditions and anomalies (1a, 1b, 2c);
    i. reviewing patient oral hygiene techniques (1a, 1b, 2c);
    j. communicating nutritional and dietary counseling (1a, 1b, 2c).
3. Demonstrate an understanding of applied general chairside skills in the dental clinical setting by
    a. preparing and assembling armamentarium procedure trays (1a, 1b, 2c);
    b. placing and/or removing dental dam when indicated (1a, 1b, 2c);
    c. maintaining field of vision with use of oral evacuation (1a, 1b, 2c);
    d. passing and retrieving procedure instruments in sequential order (1a, 1b, 2c);
    e. dispensing and preparing procedure appropriate dental materials (1a, 1b, 2c);
    f. applying infection control techniques to maintain asepsis of instruments and equipment (1a, 1b, 2c);
    g. applying acquired knowledge and clinical skills in the dental clinical setting (1a, 1b, 2b, 2c).
4. Demonstrate an understanding of applied specialty chairside skills in the dental clinical setting by
    a. removing periodontal pack and/or surgical sutures (1a, 1b, 2c);
    b. fabricating and cementating of a temporary crown (1a, 1b, 2c);
    c. inserting or removing medicinal temporary fillings with hand instruments (1a, 1b, 2c);
    d. receiving removable dental prostheses for cleaning or repair (1a, 1b, 2c);
    e. performing dental laboratory procedures and tasks (1a, 1b, 2c);
    f. performing business office procedures and tasks (1a, 1b, 2c).
5. Demonstrate an understanding of seeking dental assisting career and employment opportunities by
    a. determining career goals and professional objectives (1a, 1b, 1c, 2b, 2c);
    b. identifying marketable certifications and skills (1a, 1b, 1c, 2b, 2c);
    c. developing a cover letter and resume (1a, 1b, 1c, 2b, 2c);
    d. assessing interview communication and presentation skills (1a, 1b, 1c, 2b, 2c).

Requirements
Required Prerequisite(s): Admission into Diagnostic Medical Sonography Program
Required Corequisite(s): DMSO 2305, DMSO 2243, and DMSO 1366

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Describe fundamental vascular concepts of duplex and nonimaging procedures including positioning the patient, equipment, and other devices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify arteries of the upper and lower extremities and the branches of the abdominal aorta (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Differentiate between arterial and venous wall anatomy at the microscopic level (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Identify the vessels in the extracranial and intracranial cerebrovascular system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Identify the central, upper, and lower extremity deep and superficial veins, and list the major perforating veins in the lower extremity (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

DSVT 1300 - Principles of Vascular Technology

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Describe protocols for performing non-invasive vascular exams; explain measurement and grading criteria; and perform basic non-invasive peripheral vascular exams, including arterial and venous studies with measurements.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe standard protocol guidelines for performing non-invasive vascular exams, with emphasis on the following imaging vascular studies:
    a. Renal/aorta ratio;
    b. TCD exam;
    c. Abdominal vascular exam;
    d. Extracranial cerebrovascular (Carotid) exam;
    e. Lower extremity arterial exam;
    f. Lower extremity venous exam;
    g. Upper extremity venous exam;
    h. Upper extremity arterial exam.
2. Explain measurement and grading criteria for the following procedures:
    a. Aorta/renal ratios;
    b. Resistive index;
    c. Pulsatility index;
    d. Internal carotid artery to common carotid artery ratio;
    e. Percentage velocity change across stenosis for grading arterial lesions;
    f. Area and diameter reduction measurements;
    g. Knowledge of normal and abnormal vascular flow patterns and waveform morphology.
3. Describe fundamental vascular concepts of duplex and non-imaging procedures including positioning the patient, equipment, and other devices.
4. Explain physiology, pathology, and pathophysiology in relation to arterial, venous, and special circulations.
5. Describe how other modalities correlate to the vascular systems evaluated with sonography.
6. Demonstrate knowledge and understanding of clinical pharmacology as it relates to vascular evaluation and stress testing.
7. Demonstrate how to interact with physicians with oral and written communication using sonographic terms regarding sonographic findings, including formulating a differential diagnosis.

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of acoustic physics, Doppler ultrasound principles, and ultrasound instrumentation.
2. Demonstrate basic medical techniques and patient care.
3. Demonstrate knowledge and understanding of human gross anatomy and sectional anatomy.
4. Demonstrate knowledge and understanding of physiology, pathology, and pathophysiology.
5. Demonstrate the scanning planes, methods, and protocols used in sonography.
6. Describe the operations of the assigned clinical facility service area.
7. Demonstrate the professional qualities pertinent to patient care.
8. Recognize the importance of, and practice ergonomically correct scanning techniques.
9. Review sonographic order, review prior studies, review lab results, review the clinical history, obtain the patient history, and prepare patient for the sonography examination by explaining the procedure, how the patient will receive results, and placing the patient in the appropriate patient position to begin the scan.
10. Demonstrate knowledge and skills consistent with an entry-level sonographer for the following vascular examinations and evaluations:
    a. Segmental exam;
    b. TCD exam;
    c. Abdominal vascular exam;
    d. Extracranial cerebrovascular (Carotid) exam;
    e. Lower extremity arterial exam;
    f. Lower extremity venous exam;
    g. Upper extremity venous exam;
    h. Upper extremity arterial exam.
11. Integrate sonographic findings with clinical history, patient history, prior imaging studies, and lab results and formulate the sonographic impression.
12. Present the case to the radiologist and articulate a differential diagnosis.
13. Demonstrate professional judgement and discretion in relation to patient care.

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the following resources: Workforce Education Course Manual (WECM); the current content specifications for the examinations from the American Registry for Diagnostic Medical Sonographers (ARDMS); the National Education Curriculum (NEC); and, the current Commission on Accreditation of Allied Health Education Programs (CAAHEP) Standards and Guidelines for the Accreditation of Educational Programs in Diagnostic Medical Sonography.

End-of-Course Outcomes: Evaluate current diagnostic trends in non-invasive vascular technology; list the indications, contraindications, technical aspects, and standard protocols for each of the advanced modalities; perform advanced vascular procedures utilizing standard protocols and measurements; and discuss case studies and current literature.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe standard protocol guidelines and demonstrate proficiency for performing non-invasive vascular exams, with emphasis on the following physiologic vascular studies:
    a. Transcranial Doppler exam;
    b. Intracranial cerebrovascular (Carotid) exam;
    c. Extracranial cerebrovascular (Carotid) exam;
    d. Extremity arterial upper and lower exam;
    e. Extremity venous competency exam;
    f. Transthoracic outlet exam.
2. Explain measurement and grading criteria for the following procedures:
    a. Aorta/renal ratios;
    b. Resistive index;
    c. Pulsatility index;
    d. Internal carotid artery to common carotid artery ratio;
    e. Percentage velocity change across stenosis for grading arterial lesions;
    f. Area and diameter reduction measurements;
    g. Knowledge of normal and abnormal vascular flow patterns and waveform morphology.
3. Describe fundamental vascular concepts of duplex and non-imaging procedures including positioning the patient, equipment, and other devices.
4. Explain physiology, pathology, and pathophysiology in relation to arterial, venous, and special circulations.
5. Describe how other modalities correlate to the vascular systems evaluated with sonography.
6. Understand the fundamental elements for implementing a quality assurance and improvement program, and the policies, protocols and procedures for the general function of the ultrasound laboratory.
7. Demonstrate knowledge and understanding of clinical pharmacology as it relates to vascular evaluation and stress testing.
8. Demonstrate how to interact with physicians with oral and written communication using sonographic terms regarding sonographic findings, including formulating a differential diagnosis.

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0) A study of the research and theory in the psychology of learning, cognition, and motivation; factors that impact learning; and application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. (Students may NOT earn credit for both EDUC 1300 and PSYC 1300.) (NOTE: While traditional study skills courses include some of the same learning strategies -e.g., note-taking, reading, test preparation etc. - as learning framework courses, the focus of study skills courses is solely or primarily on skill acquisition. Study skills courses, which are not under-girded by scholarly models of the learning process, are not considered college-level, and, therefore, are distinguishable from Learning Framework courses.)

Required Prerequisite(s): CETT 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform field site evaluations; design solar photovoltaic array to meet customer requirements; investigate certification requirements; install and troubleshoot systems; and employ techniques for successful customer interaction.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the six basic forms of energy (1a, 1b).
2. Define potential and kinetic energy (1a, 1b).
3. Explain renewable and non-renewable energy sources (1a, 1b).
4. Define conservation of energy (1a, 1b).
5. Explain the different types of solar energy technologies utilizing solar radiation by
    a. differentiating between solar radiance and solar irradiation (1a, 1b);
    b. describing the photovoltaic effect and the fundamental operation of PV devices (1a, 1b);
    c. comparing the advantages and disadvantages of installing a PV system (1a, 1b).
6. Describe the purposes and functions of the major components in PV systems (2a, 2d).
7. Evaluate how array orientation affects solar energy received by solar collectors (2a, 2c, 2d).
8. Install and operate a power converter to convert DC power to AC power (2a, 2c, 2d, 2e).
9. Determine the amount of power in demand and the ability of a system to deliver that power (2a, 2c, 2d).
10. Demonstrate how to distribute power safely and effectively (2a, 2c, 2d, 2e).
11. Install and operate a solar electrical system to deliver alternative energy more effectively by
    a. installing and operating a charge controller in a solar-powered electrical system (2a, 2c, 2d, 2e);
    b. installing and verifying proper grounding of critical circuits and devices in an alternative energy system (2a, 2c, 2d, 2e);
    c. verifying proper operation of circuit protection devices during industrial servicing and/or maintenance operations (2a, 2c, 2d, 2e).
12. Inspect, troubleshoot, debug, and repair a standalone solar electrical system (2a, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize test equipment for problem analysis; find test point locations from schematics or prints; isolate faults and repair; and perform routine maintenance.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic troubleshooting fundamentals by
    a. defining the different levels of system troubleshooting (1a, 1b, 2c, 2e);
    b. explaining proper troubleshooting procedures (1a, 1b, 1c, 2c, 2d, 2e);
    c. practicing appropriate industry safety practices while troubleshooting and performing repairs and service (1a, 1b, 1c, 2c, 2d, 2e);
    d. applying Ohm's Law and Kirchoff's Current and Voltage Laws to different circuit configurations (1a, 1b, 2c, 2e).
2. Demonstrate an understanding of the use and application of meters while troubleshooting and repairing systems by
    a. listing the precautions needed in making proper measurements (1a, 1b, 2c, 2e);
    b. performing both voltage and current measurements properly (1a, 1b, 2a, 2c, 2e);
    c. analyzing the results of the measurements to determine the correct repair process (1a, 1b, 2c, 2d, 2e);
    d. utilizing the different types of tachometers when measuring motors (1a, 1b, 2a, 2c, 2e);
    e. evaluating the measurements of fuses and circuit breakers (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of the proper methods of troubleshooting electrical motors and starters by
    a. explaining the use of contactors and motor starters (1a, 1b, 2c, 2d, 2e);
    b. analyzing the application of solid state relays (1a, 1b, 2c, 2d, 2e);
    c. comparing motor nameplate ratings (1a, 1b, 2a, 2c, 2e);
    d. explaining why overheating of a motor is symptomatic (1a, 1b, 2a, 2c, 2d, 2e);
    e. differentiating between DC and AC motor problems (1a, 1b, 2a, 2c, 2e).
4. Demonstrate an understanding of the different forms of power distribution through transformers by
    a. comparing the voltages supplied with either the Wye or Delta connection configurations (1a, 1b, 2a, 2c, 2d, 2e);
    b. calculating for correct transformer load size and balancing (1a, 1b, 2a, 2c, 2d, 2e);
    c. identifying the results of nonlinear loading (1a, 1b, 2c, 2d, 2e);
    d. analyzing other power problems such as sags, swells, under voltage, and over voltage (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of troubleshooting of motor control circuits by
    a. identifying the cause of power loss (1a, 1b, 2c, 2d, 2e);
    b. recognizing the multiphase motor configuration along with its associated circuit protection (1a, 1b, 2c, 2d, 2e);
    c. locating the source of the power loss and providing corrective action (1a, 1b, 2c, 2e);
    d. listing the advantages of using pulse width modulation over other control methods (1a, 1b, 2c, 2d, 2e);
    e. listing the safety guidelines that should be observed during troubleshooting (1a, 1b, 1c, 2c, 2d, 2e).
6. Demonstrate an understanding of the different types of lighting along with applications and troubleshooting techniques by
    a. listing the different types of illumination along with their applications (1a, 1b, 2a, 2c, 2e);
    b. identifying the proper lighting levels for a given situation or location (1a, 1b, 2c, 2d, 2e);
    c. identifying the different configurations of bulbs, along with safety factors (1a, 1b, 1c, 2a, 2c, 2e);
    d. determining the maximum lighting load that could be placed on a given circuit (1a, 1b, 2a, 2c, 2e);
    e. demonstrating the proper testing technique for different lighting configurations (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate an understanding of the proper troubleshooting process when dealing with solenoids, heating elements, and mechanical/solid state switches by
    a. identifying the schematic symbols for each of the system components (1a, 1b, 2a, 2c, 2e);
    b. explaining the function of different solenoids (1a, 1b, 2a, 2c, 2e);
    c. determining which cause and repair agrees with a given problem/symptom (1a, 1b, 2c, 2d, 2e);
    d. applying the proper troubleshooting technique for solid state switches (1a, 1b, 2c, 2d, 2e).
8. Apply the basic fundamentals of solid state devices to repair malfunctioning equipment by
    a. explaining diodes, transistors, and thyristors (1a, 1b, 2a, 2c, 2e);
    b. applying test equipment properly to ensure proper operation of the solid state devices (1a, 1b, 2a, 2c, 2e);
    c. performing successful testing upon diodes, transistors, and thyristors (1a, 1b, 2c, 2d, 2e).
9. Demonstrate an understanding of the function of programmable logic controllers (PLC) by
    a. developing a ladder logic program to control specific output devices (1a, 1b, 2a, 2c, 2e);
    b. listing the major components of the PLC systems (1a, 1b, 2a, 2c, 2e);
    c. explaining how to use the LEDs on the PLC for troubleshooting (1a, 1b, 2c, 2d ,2e);
    d. identifying the troubleshooting techniques for inputs and outputs (1a, 1b, 2c, 2d, 2e);
    e. building a troubleshooting flow chart for the PLC system (1a, 1b, 2a, 2c, 2d, 2e).
10. Demonstrate an understanding of the value of renewable energy by
    a. describing the advantages of using a geothermal system for heating and cooling (1a, 1b, 1c, 2a, 2c, 2e);
    b. developing a troubleshooting process for geothermal systems, wind systems, and photovoltaic systems (1a, 1b, 2c, 2d, 2e);

c. explaining the process needed to determine which alternative energy system would meet a given application (1a, 1b, 2c, 2d, 2e).

ELPT 1311 - Basic Electrical Theory

General

Course Key
14701

Course Rubric
ELPT

Course Number
1311

Course Title
Basic Electrical Theory

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) Basic theory and practice of electrical circuits. Includes calculations as applied to alternating and direct current.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain atomic structure and basic values such as voltage, current, resistance, and power; determine electrical values for combination circuits in direct current (DC) and alternating current (AC) containing resistance, inductance, and capacitance; summarize the principles of magnetism; calculate voltage drop based on conductor length, type of material, and size; and utilize electrical measuring instruments.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the current theory of electron flow by
    a. describing atomic structure;
    b. defining electrical charge;
    c. differentiating between conventional and electron current flow.
2. Define electrical terms by
    a. defining voltage;
    b. defining current;
    c. defining amperage.
3. Demonstrate an understanding of DC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values;
    b. using Kirchoff's current law to determine node currents;
    c. using the power formula to calculate circuit wattages.
4. Connect DC circuits by
    a. connecting series circuits;
    b. connecting parallel circuits;
    c. connecting combination circuits.
5. Demonstrate the proper use of a multimeter by
    a. connecting the meter to measure amperage in a series and parallel circuit;
    b. connecting the meter to measure voltage;
    c. connecting the meter to measure resistance.
6. Demonstrate an understanding of the generation of AC electricity by
    a. explaining the current theory of magnetism;
    b. identifying sine wave properties.
7. Demonstrate an understanding of the effect of inductance in an AC circuit by
    a. defining inductance;
    b. defining inductive reactance.
8. Analyze inductive circuits by
    a. calculating inductive reactance;
    b. calculating inductive power;
    c. drawing voltage and current wave forms for a purely inductive circuit.
9. Explain the principle of operation of a power transformer by
    a. defining mutual inductance;
    b. determining transformer ratios;
    c. identifying transformer windings.

10. Demonstrate an understanding of the effect of capacitance in an AC circuit by
    a. defining capacitance;
    b. defining capacitive reactance;
    c. drawing voltage and current wave forms for a purely inductive circuit.

11. Connect AC circuits by
    a. connecting series circuits;
    b. connecting parallel circuits;
    c. connecting transformer circuits.

12. Demonstrate an understanding of AC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values;
    b. using Kirchoff's current law to determine node currents;
    c. using the power formula to calculate circuit wattages;
    d. calculating apparent and true power;
    e. calculating the power factor of an AC reactive circuit.

ELPT	1315	Electrical Calculations I

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Introduction to mathematical applications utilized to solve problems in the electrical field. Topics include fractions, decimals, percentages, simple equations, ratio and proportion, unit conversions, and applied geometry.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize a calculator to perform operations involving fractions and decimals; compute percentages utilizing ratio and proportions; convert unit values; solve simple equations; and calculate areas and volumes of geometric solids.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of how basic arithmetic operations are used in the technical fields by
    a. demonstrating the ability to add, subtract, multiply, and divide integers;
    b. solving technical applications and problems involving integers.

2. Demonstrate an understanding of basic geometric operations by
    a. calculating geometric perimeter, area (not circles), and volume;
    b. identifying types of angles and triangles;
    c. solving technical application problems involving geometric concepts.

3. Demonstrate an understanding of mathematic operations using fractions by
    a. converting improper fractions to mixed numbers;
    b. converting mixed numbers into improper fractions;
    c. reducing or simplifying fractions;
    d. demonstrating the ability to add, subtract, multiply, and divide signed fractions;
    e. simplifying complex fractions;
    f. solving algebraic equations involving fractions;
    g. solving application problems involving fractions.

4. Demonstrate an understanding of mathematical operations using decimals by
    a. demonstrating the ability to add, subtract, and multiply signed decimals;
    b. rounding decimals and whole numbers;
    c. dividing decimals;
    d. solving decimal applications involving technical problems;
    e. converting fractions to decimals;
    f. converting decimals to fractions;
    g. ordering and comparing fractions to decimals.

5. Demonstrate an understanding of ratios and proportions by
    a. stating ratios in reduced fractional form;
    b. solving proportions and proportion applications;
    c. solving technical application problems involving ratios and proportions, including converting numbers to different units of measurement;
    d. converting English units to metric units and metric units to English units.

6. Demonstrate an understanding of percentages by
    a. converting percent to decimal;
    b. converting decimal to percent;
    c. converting percent to fraction;
    d. converting fraction to percent;
    e. solving technical application problems involving percent.

7. Demonstrate an understanding of AC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values;

b. using Kirchoff's current law to determine node currents;

c. using the power formula to calculate circuit wattages;

d. calculating apparent and true power;

e. calculating the power factor of an AC reactive circuit.

8. Demonstrate an understanding of DC circuits by

a. using Ohm's law to calculate resistance, amperage, and voltage values;

b. using the power formula to calculate circuit wattages.

ELPT	1321	Introduction to Electrical Safety and Tools

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Safety rules and regulations. Includes the selection, inspection, use, and maintenance of common tools for electricians.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain electrical hazards and how to avoid them in the workplace; discuss safety issues concerning lockout/tagout procedures; and demonstrate safe work habits using common hand and power tools for electricians.

1. Demonstrate an understanding of the application and usage of Electrical Safety Standards in the workplace and on jobsites by

a. describing line voltage and low voltage circuits (1a, 1b, 2d, 2d);

b. explaining the proper usage of electrical hazard labeling (2a, 2c, 2d, 2d);

c. describing the purpose of ARC Fault Certification Training (2d, 2e).

2. List types of electrical hazards to personnel, including

a. describing electrical shocks, arcs and blasts (1a, 2d, 2e);

b. describing fault current and potential difference (2b, 2c, 2d);

c. describing the characteristics of an arc flash hazard (2b, 2c, 2d);

d. describing the characteristics of an arc blast hazard (2b, 2c, 2d);

e. explaining how other injury hazards are related to shock, flash, and blast (2b, 2c, 2d).

3. Demonstrate the purpose and usage of PPE in the workplace by

a. listing types of PPE for electrical hazards (1a, 1b, 2a, 2b, 2c, 2d);

b. listing the hazard types which PPE will protect against (1a, 1b, 2a, 2c, 2d);

c. describing how each type of PPE protects against hazards and identifying the limitations of PPE (1b, 2a, 2c, 2e);

d. explaining the need for flame resistant (FR) clothing and layering of clothing for protection and listing clothing prohibited where electrical hazards are present (1b, 2a, 2c, 2e);

e. selecting PPE for a given Hazard Risk Category including gloves, eye, head, face protection and (FR) clothing (1b, 2a, 2c, 2e).

4. Demonstrate correct tool selection and safe usage by

a. describing correct tool application (1a, 1b, 2a, 2c, 2e);

b. describing safe tool usage (1a, 1b, 2a, 2c);

c. describing PPE as required based on tool selection (1a, 1b, 2a, 2c);

d. performing group activities in the laboratory with hand tools (1a, 1b, 1c, 2b).

5. Demonstrate lock out/tag out (LOTO) procedures by

a. describing when LOTO is a safety requirement (1b, 2b, 2c);

b. describing the potential effects of failure to employ LOTO procedures (1b, 2b, 2c);

c. performing LOTO procedures in the laboratory (1b, 1c, 2b, 2c, 2d).

ELPT 1345 - Commercial Wiring

General

14704

Course Rubric	Course Number	Course Title
ELPT	1345	Commercial Wiring

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) Commercial wiring methods. Includes overcurrent protection, raceway panel board installation, proper grounding techniques, and associated safety procedures.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret electrical blueprints/drawings; compute the circuit sizes and overcurrent protection needed for the installation of branch circuits, feeders, and service entrance conductors; explain the proper installation of wiring devices according to the National Electrical Code (NEC) and local electrical codes; demonstrate grounding methods; identify commercial wiring methods including conduit bending; and demonstrate proper safety procedures.

1. Demonstrate a knowledge of electrical fundamentals by

a. describing basic electrical circuit units of measure (1a, 1b, 2c, 2d);

b. describing basic circuits (1a, 1b, 2c, 2d);

c. describing alternating current and its applications (1a, 1b, 2c, 2d);

d. describing proper utilization of voltages (1a, 1b, 2c, 2d).

2. Demonstrate safe work practices by

a. listing the cause of accidents (1b, 1c, 2a, 2b, 2d);

b. listing accident prevention measures as related to the workplace (1b, 1c, 2a, 2b, 2d);

c. describing the steps for first aid preparation (1b, 1c, 2b, 2d).

3. Demonstrate safe work practices and the appropriate selection of tools for a task by

a. listing all standard construction tools (1b, 2a, 2b, 2d);

b. identifying electrical industry-specific tools (1b, 2a, 2b, 2d).

4. Demonstrate electrical construction plan reading by

a. describing electrical construction plan reading (1a, 1b, 2c, 2d);

b. listing electrical specifications and notations (1a, 1b, 2c, 2d);

c. identifying building codes related to construction projects (1a, 1b, 2c, 2d).

5. Demonstrate wiring methods by

a. listing general rules and requirements (1a, 1b, 2a, 2c, 2d);

b. demonstrating wiring methods in laboratory-based activities (1a, 1b, 2a, 2c).

6. Identify conductors used in the electrical industry by

a. categorizing conductors by usage (1a, 1b, 2c, 2d);

b. identifying code requirements for conductors (1a, 1b, 2c, 2d);

c. listing allowable ampacities in conductors (1a, 1b, 2c, 2d);

d. defining voltage drop (1a, 1b, 2c);

e. explaining conduit capacity (1a, 1b, 2c, 2d).

7. Compare boxes and conduit bodies by

a. identifying enclosures (1b, 2a, 2b, 2d);

b. explaining enclosure sizing (1b, 2a, 2b, 2d);

c. identifying outlet and device (1a, 1b, 2c, 2d).

8. Classify overcurrent protection by

a. defining overcurrent (1a, 1b, 2c);

b. listing overcurrent protection requirements (1a, 1b, 2c, 2d);

c. describing overcurrent protective devices (1a, 1b, 2c, 2d);

d. defining conductor taps (1a, 1b, 2c).

9. Describe service and distribution systems by

a. listing the various service entrances (1a, 1b, 2c, 2d);

b. listing distribution systems (1a, 1b, 2c, 2d).

10. Explain grounding by
    a. listing grounding theory (1a, 1b, 2c, 2d);
    b. defining system grounding (1a, 1b, 2c);
    c. defining equipment grounding (1a, 1b, 2c);
    d. defining grounding electrode system (1a, 1b, 2c);
    e. identifying grounding methods (1a, 1b, 2c, 2d).

11. Identify branch circuits and feeder circuits by
    a. listing definitions (1a, 1b, 2c, 2d);
    b. drawing branch circuits (1a, 1b, 2c, 2d);
    c. explaining branch circuit loads (1a, 1b, 2c, 2d);
    d. drawing feeders (1a, 1b, 2c, 2d);
    e. summarizing the commercial service load computational procedure (1a, 1b, 2c, 2d).

ELPT 1371 - Introduction to Electrical Controls

General

14705

Course Rubric
ELPT

Course Number
1371

Course Title
Introduction to Electrical Controls

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Technical Local Need

Description
(3-2-3) General principles of electrical controls and their components in the electrical power industry. Includes reading electrical diagrams and identifying industrial switches and pilot devices. Introduction to hardwiring and troubleshooting of industrial control relays and timers. Commercial lighting system installation, wiring, and their integration to specialized control systems.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify terms and devices used in electrical circuits and controls; read and interpret schematic diagrams using industrial switches, pilot devices, control relays, and timers; setup and hardwire circuits using control relays and timers; and analyze characteristics and differentiate between on and off delay timers. Understanding of the integration of lighting control systems, energy management systems, and their control devices.

1. Demonstrate a knowledge of electrical fundamentals by
    a. describing basic electrical circuit units of measure (1a, 1b, 2c, 2d);
    b. describing basic circuits (1a, 1b, 2c, 2d);
    c. describing alternating current and its applications (1a, 1b, 2c, 2d);
    d. describing proper utilization of voltages (1a, 1b, 2c, 2d).

2. Demonstrate safe work practices by
    a. listing the cause of accidents (1b, 1c, 2a, 2b, 2d);
    b. listing accident prevention measures as related to the workplace (1b, 1c, 2a, 2b, 2d);
    c. describing the steps for first aid preparation (1b, 1c, 2b, 2d).

3. Demonstrate safe work practices and the appropriate selection of tools for a task by
    a. listing all standard construction tools (1b, 2a, 2b, 2d);
    b. identifying electrical industry-specific tools (1b, 2a, 2b, 2d).

4. Demonstrate electrical construction plan reading by
    a. describing electrical construction plan reading (1a, 1b, 2c, 2d);
    b. listing electrical specifications and notations (1a, 1b, 2c, 2d);
    c. identifying building codes related to construction projects (1a, 1b, 2c, 2d).

5. Demonstrate wiring methods by
    a. listing general rules and requirements (1a, 1b, 2a, 2c, 2d);
    b. demonstrating wiring methods in laboratory-based activities (1a, 1b, 2a, 2c).

6. Identify conductors used in the electrical industry by
    a. categorizing conductors by usage (1a, 1b, 2c, 2d);
    b. identifying code requirements for conductors (1a, 1b, 2c, 2d);
    c. listing allowable ampacities in conductors (1a, 1b, 2c, 2d);
    d. defining voltage drop (1a, 1b, 2c);
    e. explaining conduit capacity (1a, 1b, 2c, 2d).

7. Identify lighting fixtures by
    a. identifying illumination mechanisms (1a, 1b, 2c, 2d);
    b. listing operating voltages (1a, 1b, 2c, 2d);
    c. defining lighting control methodology (1a, 1b, 2c).

8. Identify occupancy-based control systems by
    a. explaining control system interfaces (1a, 1b, 2c, 2d);
    b. describing motion detection (1a, 1b, 2c, 2d).

9. Explain grounding by
    a. listing grounding theory (1a, 1b, 2c, 2d);
    b. defining equipment grounding (1a, 1b, 2c);

c. identifying grounding methods (1a, 1b, 2c, 2d).

Take ELPT-1311 ELPT-1315 ELPT-1321 ELPT-1345 ELPT-1371;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ELPT 1311, ELPT 1315, ELPT 1321, ELPT 1345, and ELPT 1371

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

1. Complete a semester long project by applying the learned skills on a jobsite while assigned with a Journeyman Electrician working under a Master Electrician's guidance by
    a. preparing for each day's work activities and experiences, including interaction with job site personnel as well as clients (1a, 1b);
    b. demonstrating how skills and knowledge learned in the classroom relate to the work environment (1a, 1b, 1c);
    c. preparing a narrative report outlining experiences on the job (1a, 1b, 1c).
2. Demonstrate an understanding of the basic processes in the electrical industry by
    a. understanding the various electrical installation processes (1a, 1b);
    b. using various tools and equipment available on the jobsite (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate an understanding of the importance of industry immersion for students by
    a. identifying the various industry certification levels and associated skills for that level (1a, 1b);
    b. identifying the various opportunities in the electrical industry (1a, 1b).
4. Present a final report of the experience by
    a. discussing the knowledge and skills gained through the experience (1a, 1b);
    b. demonstrating skill through oral and written presentation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Required Prerequisite(s): RBTC 1401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Convert ladder diagrams into programs; explain digital/analog devices used with programmable logic controllers; apply advanced programming techniques; execute and evaluate control system operation; and implement interfacing and networking schemes.

1. Demonstrate a thorough understanding of safety in the work environment by
    a. defining an accident (1a, 2c);
    b. explaining why accidents happen (1a, 1b, 1c);
    c. describing how accidents can be prevented (1a, 1b, 1c, 2a, 2c);
    d. describing lockout/tagout procedures and how they are used in industry (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of PLCs by
    a. defining terminology including ladder logic, CPU, and input/output devices (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining why PLCs are replacing hardwired logic in automation (1a, 1b, 2a, 2c, 2d, 2e);
    c. blocking diagrams of multiple PLCs (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of Rockwell automation by
    a. explaining Rockwell automation memory organization (1a, 1b, 2a, 2c, 2d, 2e);
    b. defining addresses for various file types (1a, 1b, 2a, 2c, 2d, 2e);
    c. writing programs that utilize Rockwell automation instructions (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of advanced concepts by
    a. moving instructions for data manipulation (1a, 1b, 2a, 2c, 2d, 2e);
    b. copying instructions for data manipulation (1a, 1b, 2a, 2c, 2d, 2e);
    c. interpreting special purpose instructions such as PID and ramp (1a, 1b, 2a, 2c, 2d, 2e);
    d. writing ladder logic programs using sequencers to control multiple outputs (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining the benefits and use of stage programming, fuzzy logic, and state logic programming (1a, 1b, 1c, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of the use of industrial sensors by
    a. choosing the appropriate sensor for a given application (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the use of digital and analog sensors (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining the wiring of load and line powered sensors (1a, 1b, 2a, 2c, 2d, 2e);
    d. explaining the principles of thermocouples (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the principles of thermocouples (1a, 1b, 2a, 2c, 2d, 2e).
6. Demonstrate an understanding of IEC 61131-3 standard by
    a. explaining the purpose of the standard (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining each of the languages specified in this standard (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining the use of function blocks, functions, and statements referred to by this standard (1a, 1b, 2a, 2c, 2d, 2e).

7. Demonstrate an understanding of SCADA by
    a. describing a typical SCADA application (1a, 1b, 2a, 2c, 2d, 2e);
    b. defining the terms: driver, topic, item, recipe, and historical log (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining how SCADA software can be used to improve the performance of an enterprise (1a, 1b, 2a, 2c, 2d, 2e).
8. Demonstrate an understanding of communications within a manufacturing plant by
    a. defining terms such as serial, synchronous, RS-232, RS-422, device, cell, area, and host (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining how computers communicate with PLCs (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing some of the industrial networks and their functions (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing the purpose and capabilities of ControlLogix (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing the purpose and capabilities of DeviceNet (1a, 1b, 2a, 2c, 2d, 2e).
9. Demonstrate an understanding of PC based control of automation by
    a. describing the types of applications that necessitate this type of control in industry (1a, 1b, 2a, 2c, 2d, 2e);
    b. contrasting this type of control with PLC control of automation (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing flowchart programming and its advantages (1a, 1b, 2a, 2c, 2d, 2e);
    d. listing some alternative approaches to PC based control of automation (1a, 1b, 2a, 2c, 2d, 2e).
10. Demonstrate an understanding of the fundamentals of process control by
    a. defining these terms: open loop, closed loop, feedback, summing junction, command error, disturbances, and damping (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the principles of proportional, integral, and derivative (PID) control (1a, 1b, 2a, 2c, 2d, 2e);
    c. tuning a PID system (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing the common methods of measurement and control of flow, level, density, and temperature measurement systems (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing the types of signals used in process measurement (1a, 1b, 2a, 2c, 2d, 2e).
11. Demonstrate an understanding of batch and continuous processes by
    a. defining these terms: batch, continuous, separation, and distillation (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing a reactor (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining the process of fractional distillation (1a, 1b, 2a, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the United States Department of Transportation National Highway Traffic and Safety Administration Office of Emergency Medical Service's educational guidelines and the National Standard Curriculum for the EMT-Basic, the Texas Department of State Health Services Division of Emergency Medical Service and Trauma Systems regulations and guidelines for Emergency Medical Service education, and the National Registry of EMTs requirements for certification testing.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Participate in clinical experiences applicable to patient care at the EMT-Basic level by
    a. observing care of patients in the hospital emergency room setting (1a, 1b, 1c, 2a, 2b, 2e);
    b. observing care of patients in the pre-hospital environment (1a, 1b, 1c, 2a, 2b, 2e);
    c. participating in patient care (if permitted) by onsite clinical preceptors (1a, 1b, 1c, 2a, 2b, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Integrate the pathophysiological assessment findings to formulate a field impression; implement the treatment plan for the trauma patient; and integrate multiple determinants of trauma conditions into clinical care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the management of the injured patient in the prehospital environment by
    a. discussing trauma systems (1a, 1b, 2a);
    b. discussing kinematics of trauma (1a, 1b, 2a);
    c. describing the pathophysiology of injuries to the head and neck (1a, 1b, 2a);
    d. describing the pathophysiology of injuries to the chest (1a, 1b, 2a);
    e. describing the pathophysiology of injuries to the abdomen and pelvis (1a, 1b, 2a);
    f. describing the pathophysiology of injuries to the spine (1a, 1b, 2a);
    g. describing the pathophysiology of injuries to the musculoskeletal system (1a, 1b, 2a);
    h. describing the pathophysiology of injuries to the soft tissues, including burns (1a, 1b, 2a);
    i. demonstrating the assessment and management of injuries to the head and neck (1a, 1b, 2a);
    j. demonstrating the assessment and management of injuries to chest (1a, 1b, 2a);
    k. demonstrating the assessment and management of injuries to the abdomen and pelvis (1a, 1b, 2a);
    l. demonstrating the assessment and management of injuries to the spine (1a, 1b, 2a);
    m. demonstrating the assessment and management of injuries to the musculoskeletal system (1a, 1b, 2a);
    n. demonstrating the assessment and management of injuries to the soft tissues, including burns (1a, 1b, 2a).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Perform a history and comprehensive physical exam on various patient populations; establish and/or maintain a patient airway; and demonstrate oxygenation and ventilation of a patient; differentiate respiratory distress, failure, and arrest; and interpret results of monitoring devices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of airway management as it relates to Emergency Medical Services and paramedicine by
    a. describing the anatomy and physiology of the human airway and respiratory system (1a, 1b, 2c);
    b. demonstrating basic airway management (1a, 1b, 2c);
    c. demonstrating the use of basic airway adjuncts (1a, 1b, 2c);
    d. demonstrating advanced airway management (1a, 1b, 2c).
2. Demonstrate understanding of patient assessment associated with Emergency Medical Services and paramedicine by
    a. describing the patient assessment process (1a, 1b, 2c);
    b. discussing critical clinical decision making (1a, 1b, 2c);
    c. discussing the general survey of anatomic regions (1a, 1b, 2c);
    d. demonstrating patient related communication (1a, 1b, 2c);
    e. demonstrating documentation of patient care (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Describe the roles and responsibilities of advanced EMS personnel within the EMS system; apply concepts of pathophysiology and pharmacology to the assessment and management of emergency patients; administer medications; employ effective communication; interpret medical/legal issues; demonstrate ethical behaviors; and discuss well-being of the paramedic.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the profession of Emergency Medical Services and paramedicine by
    a. discussing the development of EMS Systems (1a, 1b, 2c);
    b. describing the roles and responsibilities of the paramedic (1a, 1b, 2c);
    c. discussing wellness and illness/injury prevention as it relates to Emergency Medical Services (1a, 1b, 2c);
    d. describing medical legal and ethical boundaries and responsibilities as they relate to Emergency Medical Services (1a, 1b, 2c).
2. Demonstrate foundational understanding of pathophysiology as it relates to Emergency Medical Services and paramedicine by
    a. describing cellular function and the cellular environment (1a, 1b, 2c);
    b. describing acid/base balance (1a, 1b, 2c);
    c. discussing genetic and familial diseases (1a, 1b, 2a);
    d. discussing hypoperfusion (1a, 1b, 2c);
    e. discussing and contrasting the inflammatory response and the immune response (1a, 1b, 2c);
    f. discussing stress and the stress response (1a, 1b, 2c).
3. Demonstrate foundational understanding of pharmacology and medication administration as it relates to Emergency Medical Services and paramedicine by
    a. describing pharmacotherapeutics (1a, 1b, 2c);
    b. discussing pharmacokinetics (1a, 1b, 2c);
    c. discussing pharmacodynamics (1a, 1b, 2a);
    d. discussing medications used in the pre-hospital setting (1a, 1b, 2c).
4. Demonstrate foundational understanding of socio-cultural aspects of human encounters as it relates to Emergency Medical Services and paramedicine by
    a. describing therapeutic communications (1a, 1b, 2c);
    b. discussing lifespan development (1a, 1b, 2c).

Course Learning Outcomes
Course content is guided by the US DOT - NHTSA Office of Emergency Medical Service's educational guidelines and the National Standard Curriculum for the EMT-Basic, the Texas Department of State Health Services Division of Emergency Medical Service and Trauma Systems regulations and guidelines for Emergency Medical Service education, and the National Registry of EMT requirements for certification testing.

End-of-Course Outcomes: Demonstrate proficiency in cognitive, psychomotor, and affective domains for the Emergency Medical Technician (EMT) in accordance with the current guidelines of the credentialing agency.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of medical knowledge applicable to patient care at the EMT-Basic level by
    a. defining assigned terminology (1a, 1b, 2b, 2c);
    b. comprehending signs and symptoms of trauma and disease (1a, 1b, 2b, 2c);
    c. employing appropriate treatment for identified medical conditions (1a, 1b, 2b, 2c).
2. Apply EMT-Basic level required and assigned skills by
    a. identifying patient care skills appropriate for specific scenarios (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. performing patient care skills (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. organizing a patient care plan based on patient assessment findings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

EMSP 2160 - Clinical - EMT Paramedic

General

Course Key
9544

Course Rubric	Course Number	Course Title
EMSP	2160	Clinical - Emergency Medical Technology/ Technician (EMT Paramedic)

Semester Credit Hours	Lecture Hours	Lab Hours
1	0	5

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-5) A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. (Clinical experiences are unpaid external learning experiences.) Recommended Pre/ Corequisites: EMSP-1356 and EMSP-1438
