Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

Upon successful completion of this course, students will:

1. Participate in clinical experiences applicable to patient care at the Paramedic Level by
    a. watching the care of patients in the hospital setting and pre-hospital settings (1a, 1b, 1c, 2a, 2b, 2e);
    b. contributing to the care of patients in the hospital and pre-hospital settings (1a, 1b, 1c, 2a, 2b, 2e);
    c. performing patient assessment and management under the direction of an on-site clinical preceptor (1a, 1b, 1c, 2a, 2b, 2e).

EMSP 2243 - Assessment Based Management

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Integrate pathophysiological principles and assessment findings to formulate a field impression; and implement a treatment plan at the paramedic level.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply the principles of Emergency Medical Services and paramedicine by
    a. evaluating the emergency patient (1a, 1b, 2c);
    b. designing a patient care plan based on the assessment of the emergency patient (1a, 1b, 2c);
    c. contrasting forms of management of the emergency patient (1a, 1b, 2c).

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Identify principles of EMS Operations; and describe management of routine and specialized incidents.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of operations carried out in Emergency Medical Services and paramedicine by
    a. describing ambulance operations (1a, 1b, 2c);
    b. discussing Medical Incident Command (1a, 1b, 2c);
    c. demonstrating triage (1a, 1b, 2c);
    d. discussing rescue awareness (1a, 1b, 2c);
    e. discussing hazardous materials incidents (1a, 1b, 2c);
    f. discussing crime scene operations (1a, 1b, 2c);
    g. discussing considerations for patient care in rural and wilderness settings (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Integrate pathophysiological assessment findings to formulate a field impression; implement a treatment plan for diverse patients of special populations; and integrate multiple determinants of such conditions into clinical care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of pediatric care and management as it relates to Emergency Medical Services and paramedicine by
    a. discussing the assessment and management of the neonate (1a, 1b, 2c);
    b. discussing the pathophysiology of conditions encountered in the neonate (1a, 1b, 2c);
    c. discussing the epidemiology and growth and development of pediatric patients (1a, 1b, 2c);
    d. discussing the general assessment and management of pediatric patients (1a, 1b, 2c);
    e. discussing the pathophysiology, assessment, and management of conditions encountered in pediatric patients (1a, 1b, 2c).
2. Demonstrate understanding of geriatric care and management as it relates to Emergency Medical Services and paramedicine by
    a. discussing the epidemiology and physiology of geriatric patients (1a, 1b, 2c);
    b. discussing the general assessment and management of geriatric patients (1a, 1b, 2c);
    c. discussing the pathophysiology, assessment, and management of conditions encountered in geriatric patients (1a, 1b, 2c).
3. Demonstrate understanding of the care and management of patients with special challenges as it relates to Emergency Medical Services and paramedicine by
    a. discussing abuse and assault (1a, 1b, 2c);
    b. discussing the challenged patient (1a, 1b, 2c);
    c. discussing acute interventions for the chronic care patient (1a, 1b, 2c).

Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Integrate pathophysiological principles and assessment findings to formulate an impression; and implement a treatment plan for the cardiac patient.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of cardiology and cardiovascular care as it relates to Emergency Medical Services and paramedicine by
    a. describing the anatomy and physiology of the human cardiovascular system (1a, 1b, 2c);
    b. interpreting the ECG rhythm (1a, 1b, 2c);
    c. interpreting the 12 lead ECG tracing (1a, 1b, 2c);
    d. discussing the pathophysiology, assessment, and management of cardiovascular conditions encountered in the pre-hospital environment (1a, 1b, 2c);
    e. demonstrating the management of a patient experiencing cardiac arrest (1a, 1b, 2c).

Course Learning Outcomes
Course content is guided by the Education Standards set forth by the US DOT - NHTSA, as adopted by the Texas Department of State Health Services.

End-of-Course Outcomes: Integrate pathophysiological assessment findings to formulate a field impression. Implement a treatment plan for the medical patient, and integrate multiple determinants of medical conditions into clinical care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the care of patients experiencing a medical emergency as it relates to Emergency Medical Services and paramedicine by
    a. describing the anatomy and physiology of the human airway and respiratory system (1a, 1b, 2c);
    b. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with pulmonology in the pre-hospital setting (1a, 1b, 2c);
    c. describing the anatomy and physiology of the central and peripheral nervous systems (1a, 1b, 2c);
    d. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with neurology in the pre-hospital setting (1a, 1b, 2c);
    e. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with allergies and anaphylaxis in the pre-hospital setting (1a, 1b, 2c);
    f. describing the anatomy and physiology of the endocrine system (1a, 1b, 2c);
    g. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with endocrinology in the pre-hospital setting (1a, 1b, 2c);
    h. describing the anatomy and physiology of the human gastrointestinal system (1a, 1b, 2c);
    i. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with gastroenterology in the prehospital setting (1a, 1b, 2c);
    j. describing the anatomy and physiology of the human genitourinary system (1a, 1b, 2c);
    k. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with urology in the pre-hospital setting (1a, 1b, 2c);
    l. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with toxicology in the pre-hospital setting (1a, 1b, 2c);
    m. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with environmental emergencies in the pre-hospital setting (1a, 1b, 2c);
    n. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with infectious diseases in the prehospital setting (1a, 1b, 2c);
    o. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with psychology and behavioral problems in the pre-hospital setting (1a, 1b, 2c);
    p. describing the anatomy and physiology of the female reproductive system (1a, 1b, 2c);
    q. discussing the pathophysiology, assessment, and management of patients experiencing problems associated with gynecology and obstetrics in the pre-hospital setting (1a, 1b, 2c).

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An overview of environmental science and current global concerns, and a brief history of environmental ethics, resource use, and conservation. Discussion of fundamental principles of resource economics and environmental health.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the historical impact of the environmental movement; describe the environmental interrelationship between social, political, and natural processes; and describe the environmental regulatory agencies and their mission at federal, state, and local levels.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the basic principles and concepts associated with the field of environmental science and its systems, resources, and conservation by:
    a. describing major historical events that gave rise to the environmental movement;
    b. identifying public policy changes caused by the movement;
    c. listing major federal agencies involved in environmental, health, and safety regulation;
    d. describing governmental processes that give rise to environmental laws at state and federal levels;
    e. comparing responsibility and jurisdiction of federal and state agencies involved in environmental and safety issues;
    f. describing terrestrial and aquatic food chains;
    g. explaining significance of energy flow through successive trophic levels;
    h. listing factors that contribute to loss of biodiversity;
    i. describing cycles that are crucial to sustaining life;
    j. listing key global ecological concerns;
    k. describing major benefits of wetlands;
    l. explaining NEPA's purpose and implementation;
    m. listing major sources of air, water, and land pollution;
    n. describing types of environmental and health damage caused by air, water, and soil pollution;
    o. examining the impact of human activities on air, water, and soil quality;
    p. listing factors that influence land use decision making;
    q. relating how environmental compartments are interconnected;
    r. describing the primary processes that control the fate of environmental pollutants;
    s. summarizing basic provision of the Clean Air Act;
    t. describing the role of federal, state, and local agencies in implementing the Clean Air Act;
    u. explaining the bubble policy for emissions trading;
    v. comparing regulation of point versus nonpoint sources;
    w. listing examples of air emission control technologies;
    x. describing the major provisions of the Safe Drinking Water Act; the Clean Water Act; and the Marine Protection, Research, and Sanctuaries Act;
    y. describing the basic components of water supply systems;
    z. describing the basic unit processes of a water treatment system;
    aa. describing types of treatment technologies used to meet NPDES limits under the Clean Water Act;
    ab. distinguishing between hazardous materials, hazardous substances, hazardous wastes, regulated substances, and hazardous chemicals;
    ac. describing the basic provisions of RCRA, pertaining to regulation of solid waste, hazardous waste, and medical waste;
    ad. listing examples of technologies used in recovering, reducing, recycling, or reusing wastes;
    ae. discussing incentives and obstacles to waste minimization, waste reduction and recycling programs;
    af. contrasting proactive waste management strategies with older end of the pipe controls.

EPCT 1313 - Contingency Planning

General

Course Key
213

Course Rubric	Course Number	Course Title
EPCT	1313	Contingency Planning
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An introduction to the development of an emergency response contingency plan for a facility or community. Emphasis on analyzing the hazards, writing and implementing the contingency plans, and evaluating the effectiveness of the contingency plan.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and apply regulations and standards; identify and describe components of the contingency planning process; and develop and evaluate a contingency plan.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic principles and concepts associated with emergency planning and response by:
    a. differentiating between emergency and disaster;
    b. listing the phases of a comprehensive emergency management program;
    c. listing examples of federal regulations requiring emergency preparedness in industrial facilities;
    d. defining natural hazards and technological hazards;
    e. describing nature and cause, measurement, secondary effects, and detection of samples of natural and technological hazards;
    f. listing eight steps for developing a contingency plan;
    g. naming six common pitfalls in emergency planning;
    h. describing preliminary elements of a comprehensive emergency plan;
    i. describing basic plan elements of a comprehensive emergency plan;
    j. naming two prevention procedures;
    k. listing five preparedness procedures;
    l. describing effectiveness of response procedures;
    m. listing five subjects included in recovery procedures;
    n. explaining the importance of evaluating, reviewing, and maintaining an emergency plan;
    o. explaining SARAs Title III;
    p. explaining the importance of integrating facility plans with community plans;
    q. writing the full name for NRT;
    r. explaining notification procedures recommended by NRT;
    s. explaining NRT recommendations for direction and control of resources in an emergency;
    t. describing several methods of communication among responders;
    u. explaining the importance of warning systems and emergency public notification;
    v. describing an effective emergency resource management program;
    w. listing two basic methods of protection from natural and technological hazards;
    x. listing key factors in large scale evacuations;
    y. explaining the roles of FEMA and NRC in planning evacuations;
    z. describing the systematic approach to emergency training programs;
    aa. listing information included in a job/task profile;
    ab. listing steps involved in emergency training curriculum design and development;
    ac. explaining the importance of trainee and program evaluation;
    ad. naming two basic functions of emergency drills and exercises;
    ae. listing four types of emergency exercises;
    af. describing the scenario narrative;
    ag. writing the full name for MSEL;
    ah. explaining the purpose of planned, written problems and messages;
    ai. explaining the roles of controller, simulator, and evaluator;
    aj. listing four primary goals of exercise evaluation;
    ak. listing three stages of evaluation;
    al. writing list of objectives for a community education program;
    am. explaining importance of media relations in emergencies;
    an. listing elements of an emergency media relation's procedure;
    ao. naming types of onsite facilities that support emergency operations;
    ap. naming types of equipment that support emergency operations;
    aq. listing six steps in developing a plant's emergency communications system;
    ar. describing the use of computers in an emergency preparedness program;
    as. explaining the use of an expert system in managing industrial emergencies;
    at. listing tools available to emergency responders;
    au. explaining the benefits of auditing an emergency preparedness program;
    av. explaining the importance of an emergency management audit report.

EPCT 1327 - Basic Water Works Operations

General

Course Key
12109

Course Rubric	Course Number	Course Title
EPCT	1327	Basic Water Works Operation
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Study of conventional water treatment plants including administration and management. Emphasis on the operation of motors, pumps, and disinfection in small water plants.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define surface and ground water treatment; describe the disinfection process; explain coagulation, flocculation, sedimentation, and filtration; evaluate chemical solutions and reactions; and operate water distribution and storage facilities.

Upon successful completion of this course, students will:

1. Identify/Discuss fundamental laboratory components of water analysis
2. Discuss proper techniques used in the laboratory
3. Define/Discuss basic chemistry and associated mathematical concepts used in water analysis
4. Describe safe work practices for the laboratory
5. Describe the concept of quality assurance and quality control (QA/QC) in the water lab
6. Identify/Discuss the analysis of pH
7. Explain the analysis of alkalinity
8. Clarify/Explain the significance of jar test results
9. Explain the analysis of turbidity
10. Examine/Discuss the fundamental laboratory components of water analysis
11. Describe the fundamentals of microbiology pertaining to water treatment
12. Describe the analysis of ammonia and related nitrogen compounds in the disinfection process
13. Describe/Discuss the chemistry relevant to the analysis of Total Organic Carbon (TOC)
14. Review/Discuss the secondary constituents iron, manganese, sulfate, and fluoride and the relevant analytical procedures
15. Explain groundwater production
16. Describe the physical characteristic of aquifers in Texas
17. Summarize the considerations used in selecting a well site
18. Outline the procedures in constructing a well
19. Give examples of the characteristics of groundwater
20. Explain groundwater treatment alternatives
21. Describe the disinfection requirements for groundwater
22. Discuss the types of pumps and motors used in groundwater operations
23. Outline procedures for proper operation of a groundwater system
24. Summarize safety precautions for the safe operation of a groundwater system
25. Outline reporting requirements for groundwater systems
26. Solve mathematical problems pertaining to the groundwater systems
27. Understand the importance of public health protection
28. Describe the Milwaukee water-borne disease experience
29. Comprehend the importance of performance evaluations
30. Summarize the Texas Optimization Program
31. Define source water management
32. Evaluate raw water quality
33. Identify laboratory equipment
34. Explain the process control test for pH, turbidity, temperature, total alkalinity and jar testing
35. Summarize steps to complete treatment for physical and chemical pre-treatment, coagulation, flocculation, sedimentation, filtration, filter operation, disinfection, safety, rules and regulations, recordkeeping, and math skills

EPCT 1328 - Basic Wastewater Operations

General

Course Key
13643

Course Rubric
EPCT

Course Number
1328

Course Title
Basic Wastewater Operations

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Introduction to the information and operational skills needed for wastewater treatment plants.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the characteristics of wastewater; explain the collection system; differentiate the wastewater treatment process; exhibit knowledge of the operations of different treatments plants; and identify state and federal rules and regulations.

Upon successful completion of this course, students will:

1. List the types of water resources in Texas
2. Describe how water resources are contaminated
3. Discuss how to protect water from contamination
4. Explain the water cycles
5. Explain wastewater treatment plant operator accountability
6. Describe the legal requirements for wastewater treatment
7. Describe the role of the Texas Commission on Environmental Quality (TCEQ) in wastewater treatment
8. List the characteristics of wastewater
9. Describe the sampling requirements for wastewater
10. Describe the sources of wastewater
11. Recognize the sources of wastewater
12. Discuss the purpose of a sewer use ordinance
13. List the parts of the collection system
14. Describe the components used in collection system construction
15. Explain the importance of construction safety
16. Describe the procedures for collection system maintenance
17. Explain the need for lift stations
18. Discuss the purpose of the Environmental Protection Agency's (EPA) Capacity Assurance, Management, Operation, and Maintenance Program
19. Describe the purpose of preliminary treatment
20. Discuss the importance of flow measurement
21. Describe the purpose of the settling tank
22. List the factors that affect settling
23. Describe the settling zones
24. Explain the function of clarifier
25. Describe the function of an Imhoff tank
26. Describe the activated sludge process
27. List the primary components of the activated sludge process
28. Discuss the factors for proper process operation
29. List the activated sludge microorganisms
30. Discuss the method to evaluate the quality of sludge
31. Describe the modifications of the activated sludge process
32. Describe the operation of a trickling filter
33. Describe the operation of a rotating biological contactor
34. Describe the purpose of pond systems
35. List the types of ponds
36. Discuss the parameters considered in selecting ponds as a treatment process
37. Discuss the conditions an operator should maintain daily
38. List the analysis an operator should perform daily on a pond system
39. Explain the purpose of sludge digestion
40. List the types of sludge
41. Describe the anaerobic sludge digestion process
42. Discuss the aerobic sludge digestion process
43. Describe the methods of sludge dewatering
44. List the methods of sludge disposal
45. Discuss the importance of disinfecting wastewater effluent
46. Describe methods often used to disinfect wastewater effluent
47. List the residual test methods
48. List the factors that influence disinfection
49. List uses of chlorine other than wastewater treatment
50. Describe chlorinator designs for wastewater treatment
51. Describe the regulatory requirements in regard to disinfection
52. Explain the purpose of wastewater dechlorination
53. Discuss the design criteria for reusing wastewater effluent
54. Discuss the federal and state laws regarding safety
55. List the elements of a safety program for wastewater treatment plants
56. List the general hazards that are encountered in the wastewater industry
57. List the specific hazards found in the wastewater industry
58. Calculate areas of squares, rectangles, and circles
59. Calculate volume in cubic feet and gallons of rectangular and cylindrical tanks
60. Solve problems requiring the use of conversion factors
61. Calculate dosage problems related to wastewater treatment
62. Solve problems of detention time in days, hours, and minutes
63. Calculate velocity in ft/sec relating to wastewater treatment

EPCT 1341 - Principles of Industrial Hygiene

General

Course Key
217

Course Rubric	Course Number	Course Title
EPCT	1341	Principles of Industrial Hygiene

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Concepts in threshold limits, dose response, and general recognition of occupational hazards, including sampling statistics, calibration, and equipment use. A study of the control of occupational hazards and sample collection and evaluation methods.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain terminology and discuss concepts of industrial hygiene and toxicology; describe the anatomy and function of the routes of entry; explain the function of the major body systems; identify major health hazards found in the workplace and discuss their effects; apply threshold limit values and other appropriate workplace exposure standards; and prepare a report based on research and investigation of an area of industrial hygiene.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the basic principles and concepts of industrial hygiene by:
    a. defining sampling;
    b. defining monitoring;
    c. differentiating between sampling and monitoring;
    d. describing typical situations requiring sampling and monitoring;
    e. explaining relationship of sampling and monitoring to OSHA;
    f. explaining technician's interaction with environmental professionals;
    g. describing data uses and methods used for EPA's five analytical levels;
    h. identifying unit(s) of concentration associated with sampling/monitoring media/wastes;
    i. performing metric to metric and English to metric conversions;
    j. describing current practices of computer use in sampling and monitoring;
    k. identifying components of an oxygen meter, a combustible gas indicator, a digital pH meter, and a toxic gas detector;
    l. explaining principle of operation of an oxygen meter, a combustible gas indicator, a digital pH meter, and a toxic gas detector;
    m. stating percentage of oxygen in air at sea level;
    n. stating atmospheric pressure's effect upon oxygen in air;
    o. stating lower and upper percentages of oxygen in air (sea level) considered to indicate danger;
    p. listing five situations in which an oxygen deficient atmosphere should be suspected;
    q. discussing significance of findings indicating an oxygen deficient atmosphere;
    r. stating oxygen meter's advantages/disadvantages;
    s. defining Lower Explosive Limit (LEL);
    t. defining Upper Explosive Limit (UEL);
    u. defining flammable range;
    v. calculating concentration of gas in air and interpreting results;
    w. discussing factors influencing instrument reading quality;
    x. differentiating between survey meters and personal dosimeters;
    y. determining category of device used to monitor an area or a person;
    z. explaining difference between adjustment and calibration of a device;
    aa. explaining meter adjustment prior to use;
    ab. performing a calibration and battery check on a given meter;
    ac. demonstrating uses of monitoring devices on sample gases;
    ad. assessing concentration or degree of hazard accurately;
    ae. demonstrating end calibration checks and document calibration checks and measurements;
    af. referring to appropriate compliance regulations when using monitoring data for a hypothetical situation;
    ag. evaluating hypothetical situation data;
    ah. recommending next course of action;
    ai. defining blanks;
    aj. defining contamination;
    ak. explaining how blanks and contamination relate to quality assurance in sampling;
    al. discussing ethical and legal considerations regarding sampling bias;
    am. determining preservation method for a list of analytes;
    an. describing use and calibration of personal sampling pumps;
    ao. describing procedure for cleaning equipment;
    ap. explaining when to decontaminate equipment or use fresh sampling equipment during collection activities.

EPCT 1344 - Environmental Sampling and Analysis

General

Course Key
222

Course Rubric
EPCT

Course Number
1344

Course Title
Environmental Sampling and Analysis

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Sampling protocol, procedures, quality control, preservation technology, and field analysis. Emphasis on analysis commonly performed by the field technician.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select monitoring equipment; calibrate instruments for sampling and field analysis; identify preservation procedures; demonstrate representative sampling methods; and prepare and evaluate documentation associated with sampling and field analysis.

Upon successful completion of this course, students will:

1. Define sampling
2. Define monitoring
3. Differentiate between sampling and monitoring
4. Describe typical situations requiring sampling and monitoring
5. Explain relationship of sampling and monitoring to OSHA
6. Explain technician's interaction with environmental professionals
7. Describe data uses and methods used for EPA's five analytical levels
8. Identify unit(s) of concentration associated with sampling/monitoring media/wastes
9. Perform metric to metric and English to metric conversions
10. Describe current practices of computer use in sampling and monitoring
11. Identify components and explain principle of operation of an oxygen meter
12. Identify components and explain principle of operation of a combustible gas indicator (CGI)
13. Identify components and explain principle of operation of a digital pH meter
14. Identify components and explain principle of operations of a toxic gas detector
15. State percentage of oxygen in air at sea level
16. State atmospheric pressure's effect upon oxygen in air
17. State lower and upper percentages of oxygen in air (sea level) considered to indicate danger
18. List five situations in which an oxygen deficient atmosphere should be suspected
19. Discuss significance of findings indicating an oxygen deficient atmosphere
20. State oxygen meter's advantages/disadvantages
21. Define Lower Explosive Limit (LEL)
22. Define Upper Explosive Limit (UEL)
23. Define flammable range
24. Calculate concentration of gas in air and interpret results
25. Discuss factors influencing instrument reading quality
26. Differentiate between survey meters and personal dosimeters
27. Determine category of device used to monitor an area or a person
28. Explain difference between adjustment and calibration of a device
29. Explain meter adjustment prior to use
30. Perform a calibration and battery check on a given meter
31. Demonstrate uses of monitoring devices on sample gases
32. Assess concentration or degree of hazard accurately
33. Demonstrate end calibration checks and document calibration checks and measurements
34. Refer to appropriate compliance regulations, using monitoring data for a hypothetical situation
35. Evaluate hypothetical situation data
36. Recommend next course of action
37. Define blanks
38. Define contamination
39. Explain how blanks and contamination relate to quality assurance in sampling
40. Discuss ethical and legal considerations regarding sampling bias
41. Determine preservation method for a list of analytes
42. Describe use and calibration of personal sampling pumps
43. Describe procedure for cleaning equipment
44. Explain when to decontaminate equipment or use fresh sampling equipment during collection activities

EPCT 1401 - HAZWOPER Training and Related Topics

General

Course Key
242

Course Rubric	Course Number	Course Title
EPCT	1401	Hazardous Waste Operations and Emergency Response (HAZWOPER) Training and Related Topics

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Minimum certification requirements in the Code of Federal Regulations (CFR) for a hazardous waste site worker as found in 29 CFR-1910.120 and 40 CFR-264.16.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify hazards associated with handling of hazardous waste at hazardous waste sites, cleanup operations, and corrective actions, demonstrate knowledge of site-specific Health and Safety Plan (HASP) and sampling and monitoring techniques; and identify minimum training requirements in 40 CFR.264.16.

Upon successful completion of this course, students will:

1. Describe employees' rights and responsibilities provided by OSHA
2. Recognize OSHA and EPA standards applicable to hazardous waste sites
3. Identify provisions of 29 CFR 1910.120 applicable to waste site work
4. Describe purpose and content of employer's general safety and health program
5. Identify relevant portions of a complete site specific safety and health plan
6. Identify key elements of an emergency response plan
7. State purpose and function of site characterization
8. Describe three phrases involved in site characterization
9. Perform a characterization of a work site
10. List four main routes of toxic substance entry into the body
11. Name and describe two categories of toxic chemicals
12. Describe hazards posed by working on a hazardous waste site
13. Describe and utilize a model for hazard recognition
14. Identify measures taken to recognize and prevent injury from particular hazards
15. Describe effects of human chemical exposure to specific types of hazardous chemicals
16. Identify potentially hazardous outcomes of chemical incompatibility
17. Identify types of potential exposures to radiological hazards
18. Describe and differentiate between four types of radiation
19. Describe biological effects of radiation exposure
20. List three methods of protection from radioactive sources
21. List main categories of respirators
22. Differentiate between demand and pressure demand SCBAs
23. List components of a respirator program required by OSHA
24. List limitations associated with major types of respirators
25. List types of respirators acceptable for unknown, IDLH, and/or oxygen-deficient atmospheres
26. Identify major components of a written personal protective equipment program
27. Define permeation, penetration, and degradation
28. Interpret basic permeation data for Chemical Protective Clothing (CPC)
29. Identify differences between Level A, Level B, Level C, and Level D protective ensembles
30. Describe signs and symptoms of heat stress
31. List types of protective equipment for eyes, face, head, feet, and hands
32. Identify key procedures used in an effective site control program
33. Name three most commonly used site work zones
34. Identify decontamination principles used in the field
35. Describe physical and chemical decontamination methods
36. Identify, list, and describe procedures for emergency decontamination
37. Specify purpose of a medical surveillance program
38. Explain value and maintenance of workers' own occupational history reports
39. Identify information provided to physician by employer regarding suspected occupational hazards
40. Define and explain instantaneous samples and integrated samples
41. Identify two media types used in active sampling systems
42. Identify two types of passive sampling devices
43. Identify three characteristics of air monitoring instruments
44. Identify types of air monitoring equipment
45. Describe limitations of each kind of air monitoring equipment and method
46. Interpret readings of common instruments
47. Identify components of a sampling plan
48. List two problems that may be encountered when taking or processing samples at a waste site
49. Describe OSHA and EPA requirements applicable to safe work practices
50. Identify standard operating procedures used for worker protection at hazardous waste sites
51. Identify hazards related to drums
52. Identify, list, and describe manual and mechanical drum handling techniques
53. Identify requirements involved in transportation of hazardous wastes
54. Define confined space and state permitting requirements
55. Describe ways confined spaces present hazardous occupational conditions
56. Describe preliminary steps for safe confined space entry
57. Define elements of and regulatory requirements for a confined space training program
58. List site conditions taken into account before an excavation project begins
59. Describe two methods to protect workers from a trench cave in
60. Name three hazards to workers that exist during excavation work
61. Describe elements of an effective emergency contingency/spill response plan
62. List considerations when planning for decontamination in medical emergencies
63. Identify priorities for decontamination in medical emergencies
64. Select correct procedures in spill response
65. State importance of nonparticipation in a spill response if training or equipment is inadequate
66. Outline emergency response steps
67. List several items which should be available for spill control
68. Describe importance of vertical and lateral containment in an environmental spill
69. List four types of environmental spills and a containment method for each
70. Describe methods available to contain floating products in a waterway

Course Rubric	Course Number	Course Title
EPCT	1407	Introduction to Environmental Safety and Health

Semester Credit Hours	Lecture Hours	Lab Hours
4	4	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0) An historic overview of environmental safety and health. Emphasis on the use of occupational safety and health codes.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the historical impact of the safety and health movement; and interpret and summarize safety and health standards based on student-conducted research.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the basic principles and concepts of environmental health and safety programs by:
    a. describing typical situations affecting environmental, health, and safety program applications;
    b. explaining the relationship of environmental, health, and safety programs in the industry with the EPA and OSHA;
    c. explaining the technician's interaction with environmental professionals in both the public and private sectors;
    d. describing current practices of computer use in environmental, health, and safety applications;
    e. discussing factors influencing environmental, health, and safety in the workplace;
    f. differentiating between environmental and safety devices used in monitoring the environment and workplace safety;
    g. identifying the components of and the principle of operation of monitoring devices used in environmental health and safety programs;
    h. assessing the workplace accurately for safety hazards and instances of environmental noncompliance, analyzing corrective measures, and recommending the next course of action;
    i. demonstrating the ability to investigate and refer to appropriate compliance regulations in the fields of environmental health and safety;
    j. discussing ethical and legal considerations affecting environmental health and safety concerns in the workplace.

Prerequisite

10
A Requirement block where all subrequirements are required

take chem-1405;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CHEM 1405

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify laboratory and field procedures used in industrial chemistry; interpret and compare representative industrial waste handling, storage, and disposal procedures; describe chemical procedures in common industrial use; and interpret and compare representative safety procedures.

Upon successful completion of this course, students will:

1. Recall 4 sources of material balance information
2. Recall 3 factors that must be considered when preparing material balances
3. State 2 categories of products that chemical process industries provide
4. State 2 categories of forming/shaping materials for durable goods
5. List 3 categories for altering or improving a part/product
6. List 3 categories of surface finishing operations
7. Write 2 examples of operations for forming metals in a solid state
8. List 3 types of mechanical joining operations
9. List 3 functions of surface finishing operations
10. List 4 types of coating used in surface finishing
11. List the strategies of the Hazardous Waste Management Hierarchy
12. List 2 types of acid that comprise the most common forms of acid precipitation
13. Describe 2 examples of extensive environmental damage caused by acid rain
14. Explain how acid rain can increase heavy metal pollution of mountain streams
15. Identify living forms protected by the earth's stratospheric ozone envelope
16. Name 3 substances with the ability to reach the stratosphere and break down ozone molecules
17. State consequences for human health and the environment resulting from depletion of the ozone layer
18. Write full chemical names for PCB, CFC, and TCE
19. State primary use of PCBs
20. State primary industrial source(s) of TCE
21. State the primary public health concern associated with TCE
22. List 5 hazardous heavy metal wastes
23. List 5 major sources of heavy metal wastes
24. List 6 typical considerations for deciding assessment priorities
25. List 4 site inspection guidelines
26. List 3 major sources of waste resulting from improper inventory control
27. State the chemical category that raises public concern about waste incinerator operation
28. List 7 process and material modification techniques and technologies
29. Explain principles of operation and advantages of each technique
30. List 3 recycling technologies
31. Explain principles of operation and advantages of each technology
32. Explain cradle to grave liability for hazardous waste generators
33. Define and differentiate waste reduction and recycling according to EPA
34. List the 5 halogens
35. Identify halogenated and non-halogenated hydrocarbons and distinguish halogenated from non-halogenated hydrocarbons relative to the physical characteristic of flammability
36. Explain why halogenated hydrocarbons are preferred for a vapor degreasing operation
37. Write the words represented by CFC and VOC (State the physical characteristic of a material that categorizes it as a VOC)
38. Explain how VOCs contribute to environmental pollution
39. Explain how CFCs contribute to environmental pollution
40. List 2 synonyms for freon
41. Explain why fluoro-chlorinated solvents are preferred to non-halogenated solvents in electronics industry
42. State health effects of exposure to halogenated and non-halogenated solvents
43. Write the words represented by PCB
44. State primary source of PCB waste
45. State 2 strategies for managing spent industrial oils
46. List primary concerns for an environmental department regarding power generation and heat transfer operations
47. List primary concerns for an environmental department regarding process cooling systems, air conditioning, and ventilation
48. List primary concerns for an environmental department regarding process water conditioning and wastewater treatment
49. Explain leak (air emissions) testing
50. Explain the back door
51. Explain why support services such as laboratories, maintenance shops, and garages are of concern to environmental departments
52. List 5 basic processes for producing durable goods
53. Define compounding, curing accelerator, degradation product, feedstock, particulate, residual, the acronyms PSIG and IDLH and RCRA disposal

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0). An introduction to the profession of dietetics in health care delivery systems. Includes roles and responsibilities of dietetics team members, standards, and ethics in dietetic practice. Emphasis on effective professional communications.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare dietetics careers; explain Dietetic Technician, Registered (DTR) roles; describe effective human relations; and state patient rights and professional ethics and principles.

Upon successful completion of this course, students will:

1. Differentiate various career paths in dietetics by:
    a. comparing the roles and responsibilities of dietetics practitioners in a variety of job settings (1a, 1b, 2c, 2d);
    b. outlining the education and training routes of dietetics careers, including Registered Dietitian (RD), Dietetic Technician Registered (DTR), and Dietary Manager (1a, 1b, 2c);
    c. Perform self-assessment that includes awareness in terms of learning and leadership style and cultural orientation and develop goals for self-improvement (KNDT 5.1) (1a, 1b, 1c, 2a);
    d. identifying and articulating one's skills, strengths, knowledge, and experiences relevant to the position desired and career goals (KNDT 5.2, CNDT 5.2) (1a, 1b, 1c, 2a, 2b, 2d);
    e. identifying and describing the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services (KNDT 2.4) (1a, 1c).
2. Demonstrate understanding of Dietetic Program's requirements by:
    a. recalling the educational and practicum requirements of the Dietetic Technician program and Dietary Manager Program (1a, 2c);
    b. discussing the preparation involved for a successful practicum experience (1a, 1c);
    c. explaining verification requirements for becoming a Dietetic Technician, Registered and Certified Dietary Manager (1a, 1b);
    d. completing all necessary documents to apply to the Dietetic Technician program and Dietary Manager program (1a, 1b).
3. Demonstrate an understanding of the code of ethics in the dietetics professions by:
    a. stating the purpose of the Code of Ethics for the Profession of Nutrition and Dietetics (1a, 1b, 2c);
    b. discussing the importance of patient confidentiality (1a, 1b);
    c. providing examples of unethical behaviors (1a, 1b, 2c);
    d. applying Dietetics Code of Ethics to case scenarios (1a, 1b, 2b, 2c).
4. Demonstrate effective and professional oral and written communication skills for entry into technical practice (KNDT 2.1) by:
    a. using clear and effective oral and/or written communication (CNDT 2.2) (1a, 1b);
    b. discussing strategies to improve communication skills (1c, 1c, 2b);
    c. exhibiting professionalism through interpersonal communication (1a, 1c, 2b);
    d. showing cultural humility in interactions with colleagues, staff, clients, patients, and the public (CNDT 2.9) (1a, 1b, 1c, 2b, 2c).
5. Demonstrate identification with the nutrition and dietetics profession by:
    a. discussing the history of the dietetics profession (1a, 1b, 2c);
    b. listing the benefits of membership in the Academy of Nutrition and Dietetics (1a, 1b);
    c. participating in a nutrition and dietetics professional organization and explain the significant role of the organization (KNDT 2.8) (1a, 1c, 2b);
    d. actively contributing to nutrition and dietetics professional and community organizations (CNDT 2.7) (1a, 1c, 2b);
    e. describing the governance of nutrition and dietetics practice, such as the Scope of Practice for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics (KNDT 2.3) (1a, 1c, 2b, 2c).

Required Prerequisite(s): FDNS 1370 or CHEF 1301 grade of "C" or better; FDNS 1103, HECO 1322, and DITA 1300; grade of "C" or better; DITA 1301 grade of "B" or better; and Valid ServSafe Manager Certificate

Recommended Co-Requisite(s): IFWA 2446

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Demonstrate how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice (KNDT 1.1) by:
    a. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols (KNDT 1.2);
    b. using current information technologies to develop, manage, and disseminate nutrition information and data (CDNT 4.3);
    c. accessing data, references, patient education materials, consumer, and other information from credible sources (CNDT 1.1);
    d. evaluating information to determine if it is consistent with accepted scientific evidence (CNDT 1.2);
    e. applying critical thinking skills and evaluate effectiveness of nutrition intervention (KNDT 1.3).
2. Examine quantity food production equipment in the food service organization by:
    a. identifying the equipment in the kitchen and explaining each piece's use in quantity production;
    b. developing a procedure for the operation, cleaning, and sanitizing of a piece of institutional equipment;
    c. operating, cleaning, and maintaining selective food service equipment;
    d. demonstrating the proper procedure for ware washing manually or in a ware washing machine.
3. Examine quantity food production and serving in the food service organization by:
    a. participating in the preparation, portioning, and service of various food items such as meats/entrees, vegetables, salads, and soups;
    b. participating in preparing and taste testing of modified consistency food products and nutritional supplements;
    c. developing a forecast for the amount of food to be produced for a specific recipe;
    d. identifying how production records are used in the facility.
4. Apply safety and sanitation principles related to food, personnel, and consumers (KNDT 4.3) by:
    a. recalling storage principles for different types of products;
    b. outlining receiving procedures for various food types;
    c. identifying inventory recording methods used by the facility;
    d. identifying the chemicals used for cleaning and sanitizing;
    e. identifying HACCP in the facility;
    f. completing a sanitation inspection of the facility.
5. Plan nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs (KNDT 3.4) by:
    a. reviewing the recipe file of a facility;
    b. discussing menu planning with the facility manager, including the influence of regulatory agencies on menu planning, recipe adjustment, use of commodity foods in the federally funded nutrition programs, and marketing strategies;
    c. evaluating a menu for nutritional content;
    d. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals (CNDT 3.8);
    e. demonstrating cultural humility, awareness of personal biases and an understanding of cultural differences as they contribute to diversity, equity, and inclusion (KNDT 2.5).
6. Perform supervisory functions for purchasing, production, and service of food that meets nutrition guidelines, cost parameters, and health needs (CNDT 3.7) by:
    a. outlining the food purchasing methods of the facility;
    b. reviewing the bidding and ordering process for foods and supplies;
    c. discussing how commodity foods affect the purchasing of foods in federally funded child nutrition programs;
    d. participating in purchasing activity in an institutional food service facility;
    e. proposing or using procedures as appropriate to the practice setting to promote sustainability, reduce waste, and protect the environment (CNDT 4.7).
7. Describe the process of budgeting by:
    a. explaining budgeting principles and techniques (KNDT 4.2);
    b. assisting in developing of a plan for a new service including budget (CNDT 4.4);
    c. identifying factors that affect cost control in the facility;
    d. calculating inventory value and turnover;
    e. discussing challenges to implementing and adhering to budgets (CNDT 4.5);
    f. outlining the facility's cash handling procedures;
    g. calculating labor hours and food cost for a recipe or menu.

8. Deliver nutrition services through quality improvement and customer satisfaction activities (CNDT 4.1) by:
    a. identifying healthcare delivery systems and policies that impact nutrition and dietetics technician practice (KNDT 4.4);
    b. discussing quality or process improvement strategies in the facility;
    c. identifying target areas for quality improvement for a food service system;
    d. collecting performance improvement, financial, productivity or outcomes data and compare it to established criteria (CNDT 1.3);
    e. monitoring patient's nutrition status and effectiveness of dietary intervention;
    f. assisting with marketing clinical and customer services (CNDT 4.6);
    g. conducting a customer satisfaction or a plate waste study at the facility;
    h. implementing actions based on care plans, protocols, policies, and evidence-based practice (CNDT 1.4);
    i. following facility protocol in documentation and/or electronic charting.
9. Participate in the human resource management process by:
    a. defining management functions of human resources (KNDT 4.1);
    b. outlining the employee selection and hiring process;
    c. describing the orientation, training, and performance evaluation process for employees;
    d. interviewing the manager about their role and responsibility;
    e. discussing employee retention at the facility;
    f. practicing resolving differences or dealing with conflict, as appropriate (KNDT 5.4);
    g. developing a work schedule for employees at the facility;
    h. performing supervisory, education and training functions (CNDT 4.2).
10. Demonstrate effective interviewing and education methods for diverse individuals and groups (KNDT 2.2) by:
    a. reviewing current diet orders;
    b. comparing meal items served to diet order;
    c. reviewing patients' medical records;
    d. obtaining patients' preferences;
    e. collecting pertinent social, dietary, laboratory, and clinical data;
    f. performing nutrition screenings to identify at-risk patients;
    g. providing diet instructions to patients or families;
    h. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice (KNDT 2.1);
    i. using clear and effective oral and written communication (CNDT 2.2);
    j. presenting an educational session to a target population (KNDT 3.3).
11. Demonstrate active participation, teamwork, and contributions in group settings (CNDT 2.4) by:
    a. identifying and describing the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services (KNDT 2.4);
    b. functioning as a member of inter-professional teams (CNDT 2.5);
    c. referring situations outside the nutrition and dietetics technician scope of practice or area of competence to a registered dietitian nutritionist or other professional (CNDT 2.6);
    d. demonstrating professional attributes in all areas of practice (CNDT 2.8);
    e. practicing how to self-advocate for opportunities in a variety of settings (KNDT 5.3);
    f. identifying and articulating the value of precepting (CNDT 5.7).
12. Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations by:
    a. participating in nutrition and dietetics professional organization and explain the significant role of the organization (KNDT 2.8);
    b. actively contribute to nutrition and dietetics professional and community organizations (CNDT 2.7);
    c. demonstrating professional attributes in all areas of practice (CNDT 2.8);
    d. following procedures and regulations as established by TCC Dietetics program and practicum sites;
    e. describing the governance of nutrition and dietetics practice, such as the Scope of Practice for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics (KNDT 2.3) (CNDT 2.1);
    f. performing self-assessment that includes self-awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement (KNDT 5.1) (CDNT 5.1);
    g. identifying and articulating one's skills, strengths, knowledge and experiences relevant to the position desired and career goals (KNDT 5.2) (CNDT 5.2);
    h. defending a position on issues impacting the nutrition and dietetics profession (KNDT 2.9);
    i. advocating for opportunities in a variety of settings (CNDT 5.4).

FDNS 1309 - Nutrition in the Community

General

Course Key
16521

Course Rubric	Course Number	Course Title
FDNS	1309	Nutrition in the Community
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). A study of the nutritional status of populations at the national, state, and local community levels. Socioeconomic, cultural, and psychological influences on eating behavior, national and state health objectives, marketing strategies for objective implementation and community nutrition programs serving risk group populations. Basic teaching/counseling methods for the nutrition education of small groups and individual clients/patients. Note: A grade of "B" or better is required in this course to petition for FDNS 2168 Practicum - Community Nutrition/Wellness. Recommended Prerequisite: HECO 1322.

View Course Availability on MyTCCTrack

Requirements

Requirements
Recommended Prerequisite(s): HECO 1322

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop written and oral client education/counseling materials and evaluation criteria; apply basic principles of teaching, learning, and behavior modification and demonstrate oral and written communication skills to provide nutrition education to a broad range of populations in the community; describe specific nutrition problems with a multicultural view, identify groups at risk for malnutrition due to nutritional excesses/deficits; demonstrate accurate/practical food menu plan preparation; describe effects of changes in the environment on community nutrition, analyze local, state, federal community nutrition assistance programs, describe the results of national nutrition surveys and how they affect nutrition related public policies; and analyze the role of the dietetics professional in community nutrition.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of community nutrition practice by:
    a. describing the roles and qualifications of dietetics professionals in community nutrition;
    b. listing determinants of health;
    c. explaining the purpose of Healthy People objectives;
    d. giving examples of leading health indicators.
2. Apply principles of epidemiology to nutrition by:
    a. defining common epidemiologic terminologies as related to risk, risk factors, rate, relative risk, incidence, and prevalence;
    b. contrasting the types of epidemiological studies: correlational, cross-sectional, cohort, case-control, and randomized controlled trials;
    c. discussing scientific issues related to validity and reliability;
    d. describing national nutrition surveillance systems in the United States;
    e. explaining the development of DRI/RDA.
3. Assess the community needs and resources by:
    a. listing sources of data for assessing community condition;
    b. selecting appropriate methods to obtain data considering the cultural issues of target population;
    c. identifying food and nutrition resources within the community;
    d. identifying health care delivery systems and policies that impact nutrition and dietetics technician practice;
    e. reviewing data on community health, environmental characteristics, and socioeconomic characteristics;
    f. using current nutrition informatics technology to develop, store, retrieve, and disseminate information and data.
4. Reference nutrition recommendations and dietary guidelines from national groups such as the United States Department of Agriculture, the Academy of Nutrition and Dietetics, the Surgeon General's Report on Nutrition and Health, the American Heart Association, the American Diabetes Association, and the American Cancer Society.
5. Outline eligibility requirements and benefits of the following federal nutrition and food assistance programs: the Supplemental Nutrition Assistance Program; the Special Supplemental Nutrition Program for Women, Infants, and Children; the Child Nutrition Program; the Expanded Food and Nutrition Education Program; and the Title III Nutrition Services.
6. Develop interventions to effect change and enhance wellness in diverse individuals and groups by:
    a. describing different types of intervention strategies;
    b. developing program goals and objectives;
    c. describing evaluation methods as related to formative, process, impact, outcome, structure, fiscal, and summative evaluations;
    d. developing a nutrition education lesson plan;
    e. preparing and delivering sound food and nutrition presentations to a target audience;
    f. developing an educational session for a target population;
    g. presenting an educational session to a target population;
    h. proposing and using procedures as appropriate to the practice setting to promote sustainability, reduce waste, and protect the environment;
    i. Perform specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in accordance with the Scope of Practice for the Nutrition and Dietetics Technician, Registered for individuals, groups and populations in a variety of settings.
7. Promote health improvement, food safety, wellness, and disease prevention for the general population by:
    a. demonstrating how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice;
    b. accessing data, references, patient education materials, consumer, and other information from credible sources;
    c. evaluating information to determine if it is consistent with accepted scientific evidence;
    d. developing nutrition education materials, such as nutrition brochures and/or poster and display boards, for disease prevention and health improvement that are culturally and age appropriate and designed for the educational level of the audience;
    e. providing nutrition and lifestyle education to well populations at community events.
8. Assist with marketing clinical and customer services by:
    a. giving examples of social marketing;
    b. explaining the importance of the 4P of the marketing mix;
    c. conducting a S.W.O.T. analysis of self, a program, or an organization;
    d. selecting appropriate marketing or promotional practices.

9. Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession by:
    a. participating in a nutrition and dietetics professional organization and explain the significant role of the organization;
    b. actively contributing to nutrition and dietetics professional and community organizations;
    c. adhering to current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Practice for the Nutrition and Dietetics Technician, Registered, Standards of Practice, Standards of Professional Performance, and Code of Ethics for the Profession of Nutrition and Dietetics;
    d. identifying strategies for influencing policy and regulatory changes
    e. explaining legislative and regulatory policies related to nutrition and dietetics technician level of practice;
    f. Advocate for local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
10. Demonstrate cultural humility, awareness of personal biases and an understanding of cultural differences by:
    a. summarizing dietary practices of various religions;
    b. giving examples of cultural foods;
    c. explaining two cultural competence models;
    d. discussing the influence of culture on beliefs, values, and behaviors;
    e. identifying barriers in cross cultural communications;
    f. showing cultural humility in interactions with colleagues, staff, clients, and the public.
11. Demonstrate professional attributes in all areas of practice by:
    a. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice;
    b. using clear and effective oral and written communication;
    c. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    d. applying critical thinking skills;
    e. demonstrating effective interviewing and education methods for diverse individuals and groups;
    f. demonstrating active participation, teamwork, and contributions in group settings.
12. Demonstrate skills, strengths, knowledge and experience relevant to leadership potential and professional growth for the nutrition and dietetics practitioner by:
    a. performing self-assessment that includes self-awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement;
    b. identifying and articulating one's skills, strengths, knowledge and experiences relevant to the position desired and career goals;
    c. promoting team involvement and values the skills of each member.

FDNS 1341 - Nutrition in the Life Cycle

Requirements

Simple Requisites

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

take heco-1322;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HECO 1322

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain life cycle (pre-pregnancy through old age) body balance concepts, describe life cycle body composition changes, explain life stage nutrition assessment concepts, explain special women's nutritional needs, explain pregnancy physiological changes, describe fetal/infant, child/adolescent growth as it relates to nutrition, describe nutritional needs/assessment through the life cycle; explain geriatric nutritional disorders, drug/nutrient interactions, food selection patterns.

Upon successful completion of this course, students will:

1. Provide nutrition recommendation for women during pregnancy by:
    a. describing fetal growth and development;
    b. reviewing nutrition needs during pregnancy for adolescent and adult;
    c. providing strategies to manage GI discomfort related to pregnancy;
    d. describing nutrition-related complications during pregnancy;
    e. calculating estimated due date and gestational age;
    f. plotting weight gain on pregnancy growth chart;
    g. assessing adequacy of weight gain;
    h. assessing nutritional status of women during pregnancy;
    i. developing intervention plan to address nutritional needs during pregnancy;
    j. performing specific activities of the Nutrition Care Process as assigned by Registered Dietician Nutritionists in accordance with the Scope of Nutrition and Dietetics Practice for the Nutrition and Dietetics Technician, Registered for individuals, groups and populations in a variety of settings.
2. Demonstrate knowledge needed to support breastfeeding women by:
    a. summarizing advantages of breastfeeding;
    b. explaining physiology changes during lactation;
    c. evaluating nutrition intake during lactation;
    d. describing breastfeeding techniques;
    e. describing common breastfeeding concerns including sore nipples, engorgement, quality and quantity of milk supplies, supplemental feeding, pumping and storage;
    f. providing strategies to manage common breastfeeding concerns.
3. Provide feeding recommendations for infants by:
    a. describing infant growth and development;
    b. reviewing infant nutritional needs;
    c. comparing breast milk to infant formula;
    d. demonstrating infant formula preparation;
    e. discussing introduction of solid food and its criteria;
    f. providing strategies for common nutrition or feeding concerns for infants;
    g. obtaining anthropometric measurements;
    h. plotting measurements on growth charts;

i. assessing adequacy of growth.

4. Assess nutritional intake and growth of children by:
    a. describing growth patterns of childhood and adolescence;
    b. explaining nutritional requirements during childhood and adolescence;
    c. obtaining anthropometric measurements;
    d. calculating BMI;
    e. plotting anthropometric measurements and BMI on growth chart;
    f. assessing growth of children and adolescents;
    g. discussing common nutrition and feeding concerns for children and adolescents;
    h. listing common characteristics of eating disorders;
    i. providing recommendations to prevent adult obesity.
5. Summarize nutrition concerns for infants and children with special health care needs by:
    a. describing the energy requirements of infants with LBW and VLBW;
    b. explaining the effects of developmental delay on nutrition status;
    c. listing conditions that may alter energy and nutrients requirements;
    d. providing recommendations to meet energy and nutrients needs;
    e. referring situations outside the nutrition and dietetics technician scope of practice or area of competence to a registered dietitian nutritionist or other professional;
    f. referring patient to early childhood intervention for evaluation of needs.
6. Describe the important relationship between dietary intake and health by:
    a. recalling components of a healthy lifestyle;
    b. estimating energy requirement of adults;
    c. listing strategies to prevent chronic diseases;
    d. identifying current food fads/popular diets;
    e. summarizing nutrition recommendations for adults.
7. Identify nutritional risks of elderly adults by:
    a. describing nutrition requirements of the elderly;
    b. discussing common nutrition and feeding concerns in the elderly;
    c. demonstrating an understanding of the Nutrition Care Process and clinical workflow elements for nutrition screening for referral to the registered dietician nutritionist, collection of assessment data, nutrition interventions, and monitoring strategies appropriate for the technician level of practice;
    d. applying critical thinking skills by identifying at-risk elderly for malnutrition;
    e. identifying drugs that interfere with intake and absorption of nutrients;
    f. reviewing food programs available for the elderly;
    g. developing an intervention to implement interventions to effect change and enhance wellness in diverse individuals and groups;
    h. providing nutrition recommendations for implementation based on care plans, protocols, policies, and evidence-based practice to address nutrition or feeding concerns.
8. Demonstrate an understanding of cultural competence and sensitivity by:
    a. recalling a food related cultural experience;
    b. describing foods pattern of various cultures/ethnicities;
    c. discussing preparation method of a cultural/ethnic food;
    d. providing culturally appropriate recommendations as related to the life stages;
    e. showing cultural humility in interactions with colleagues, staff, clients, patients, and the public.
9. Demonstrate professional attributes in all areas of practice by:
    a. demonstrating how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice;
    b. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    c. evaluating information to determine if it is consistent with accepted scientific evidence;
    d. integrating scientific information and research when completing case studies on health conditions of various life stages;
    e. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice;
    f. presenting an educational session to a target population;
    g. using current information technologies to develop, manage, and disseminate nutrition information and data.

FDNS 1346 - Medical Nutrition Therapy II

Course Rubric	Course Number	Course Title
FDNS	1346	Medical Nutrition Therapy II
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Principles and techniques of nutrition care for clients/patients at low to moderate nutrition risk. Includes a study of the scientific basis of diets for individuals with diabetes mellitus, pulmonary and cardiovascular disease, and weight control needs. Nutrition assessment parameters, nutrition care planning and evaluation, and menu editing methods. Topics also include nutrition care for healthy individuals, study of Human Immunodeficiency Virus, food allergy, and food intolerance. Requires a grade of "B" or better to enroll in FDNS 2169. Required Prerequisite: DITA-1300 with a C or better Recommended Pre/Corequisite: BIOL-2401

View Course Availability on MyTCCTrack

Requirements

Requirements
Required Prerequisite(s): DITA 1300 with a minimum grade of "C"

Recommended Pre/Co-requisite: BIOL-2401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Recall pathology terms, describe pathology and medical/pharmacological treatment of disorders of weight management, cardiovascular diseases and diabetes; evaluate client laboratory data, food/medication interactions; assess simulated client nutritional status, special needs, analyze food intake, develop nutrition care plans, plan medical nutrition therapy for clients with the above diseases; counsel/instruct clients on therapeutic diets, document nutrition care activities; abstract/critique current peer-reviewed nutrition-related literature.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the Nutrition Care Process and clinical workflow elements for nutrition screening for referral to the registered dietitian nutritionist, collection of assessment data, nutrition interventions, and monitoring strategies appropriate for the technician level of practice by:
    a. describing the nutrition care process;
    b. performing nutrition screening and identifying clients or patients to be referred to a registered dietitian nutritionist;
    c. performing specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in various settings with various disease states including obesity, cardiovascular disease, and diabetes;
    d. collecting and evaluating nutrition assessment data: anthropometric/physical, biochemical, clinical, and dietary;
    e. distinguishing relevant laboratory and nutritional values related to disease states;
    f. identifying food and drug interactions;
    g. estimating requirements for energy, protein, and fluid;
    h. explaining the purpose and use of PES statement;
    i. reviewing problems, etiologies, signs, and symptoms for development of nutrition diagnosis statements;
    j. developing interventions to effect change and enhance wellness in diverse individuals and groups;
    k. planning nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs;
    l. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations;
    m. implementing actions based on care plans, protocols, policies, and evidence-based practice;
    n. monitoring signs and symptoms related to nutrition diagnosis and effectiveness of nutrition care plan;
    o. documenting nutrition care process using current technology.
2. Demonstrate effective and professional oral and written communication skills sufficient for entry into technical practice by:
    a. using clear and effective oral and written communication;
    b. demonstrating active participation, teamwork, and contributions in group settings;
    c. functioning as a member of inter-professional teams during simulation;
    d. demonstrating effective interviewing and education methods for diverse individuals and groups;
    e. incorporating motivational interviewing techniques in diet instructions;
    f. showing cultural humility in interactions with colleagues, staff, clients, patients, and the public;
    g. using current information technology to develop, manage, and disseminate nutrition information and data.
3. Identify and describe the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services by:
    a. describing the governance of nutrition and dietetics practice and interprofessional relationships in various practice settings;
    b. counseling patients within the scope of practice during mock counseling sessions;
    c. adhering to current federal regulations and state statutes and rules, and the Scope of Practice for the Nutrition and Dietetics Technician, Registered;
    d. referring situations outside the nutrition and dietetics technician scope of practice or area of competence to a registered dietitian nutritionist or other professional;
    e. demonstrating ethical principles for providing nutritional care;
    f. demonstrating professional attributes in all areas of practice.
4. Demonstrate how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice by:
    a. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    b. accessing data, references, patient education materials, consumer, and other information from credible sources;
    c. differentiating between scholarly versus popular journals;
    d. listing the major components of peer reviewed articles;
    e. evaluating information to determine if it is consistent with accepted scientific evidence;
    f. citing references in case study reports;
    g. applying critical thinking skills when completing case study research on various disease states using peer-reviewed literature.
5. Demonstrate knowledge and skills in nutrition care planning for weight management issues by:
    a. describing body weight in terms of classifications and different models to estimate body fat;
    b. describing obesity and obesity classifications;

c. collecting and evaluating anthropometric measurements including calculation of Body Mass Index, Ideal Body Weight, and percent weight change;
d. identifying the hazards of metabolic alteration in obesity;
e. evaluating popular diets and weight management practices;
f. summarizing factors affecting satiety, weight, and energy balance;
g. explaining lifestyle modification strategies and goals of treatment for obesity-related disorders;
h. describing surgical procedures used in weight management;
i. explaining nutrition implications of gastric bypass;
j. evaluating the use of meal replacement supplements for weight management;
k. performing activities of the Nutrition Care Process for patients with weight management issues;
l. providing recommendations and strategies to control energy intake.

6. Demonstrate knowledge and skills in nutrition care planning for Cardiovascular Disease (CVD) by:
   a. describing a normal circulatory system in the human body;
   b. describing the common diseases categorized as CVD and summarizing pathophysiologies for CVD disorders;
   c. recalling desirable lipoprotein profile;
   d. identifying CVD risk factors;
   e. describing metabolic syndrome;
   f. summarizing the implications of malnutrition with CVD disease, including possible food and drug interactions;
   g. recalling nutrients composition of the Therapeutic Lifestyle Diet;
   h. performing activities of the Nutrition Care Process for patients diagnosed with CVD;
   i. providing diet instruction on DASH diet;
   j. providing recommendations to reduce consumption of sodium, added sugar, and solid fat.
7. Demonstrate knowledge and skills in nutrition care planning for Diabetes Mellitus (DM) by:
   a. describing the group of diseases characterized by high blood glucose concentrations and the metabolic alterations and clinical manifestations of those diseases;
   b. explaining pathophysiologies for high blood sugars concentration disorders;
   c. describing the complications associated with treating the group of diseases characterized by high blood glucose concentrations;
   d. recalling diagnosis criteria for DM and prediabetes;
   e. listing types of DM medications and human insulin preparations and summarizing the effects of these medications;
   f. recalling food and drug interactions in DM;
   g. performing activities of the Nutrition Care Process for patients diagnosed with DM;
   h. providing diet instruction on carbohydrate counting;
   i. recommending strategies to improve blood glucose control and to manage periods of hypoglycemia and hyperglycemia.
8. Demonstrate knowledge and skills in nutrition care planning for pulmonary diseases or respiratory disorders by:
   a. describing common pulmonary diseases or respiratory disorders;
   b. summarizing pathophysiologies for pulmonary disorders;
   c. listing adverse effects of pulmonary disease on nutrition status;
   d. recalling nutrients recommendation for patients with COPD;
   e. summarizing nutrition management for cystic fibrosis;
   f. summarizing the implications of malnutrition with COPD disease;
   g. recognizing signs and symptoms associated with malnutrition;
   h. evaluating use of enteral nutrition support for patients with pulmonary disorders;
   i. performing activities of the Nutrition Care Process for patients diagnosed with COPD.
9. Demonstrate knowledge and skills in nutrition care planning for Human Immunodeficiency Virus (HIV) by:
   a. describing common HIV disease problems including opportunistic infections and other complications;
   b. summarizing pathophysiology for HIV disorders;
   c. citing food and drug interactions and effects on nutrient intake;
   d. assessing patients with HIV disorders;
   e. recalling WHO policies on breastfeeding by HIV-infected mothers;
   f. summarizing the implications of malnutrition with HIV disease;
   g. assessing the role of nutrition support in HIV diseases;
   h. performing activities of the Nutrition Care Process for patients diagnosed with HIV.
10. Demonstrate knowledge and skills in nutrition care planning for food allergy and food intolerance by:
    a. differentiating food allergy, sensitivities, and intolerance;
    b. describing pathophysiology of food allergy;
    c. identifying risk factors for food allergy;
    d. explaining lactose intolerance;
    e. describing food elimination diet;
    f. identifying allergen-containing foods in menu;
    g. performing activities of the Nutrition Care Process for patients diagnosed with food allergies, sensitivities or intolerance;
    h. modifying recipes and menus for individuals with peanut, milk, soy, eggs, and/or wheat allergies.
11. Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession by:
    a. explaining legislative and regulatory policies related to nutrition and dietetics technician level of practice;
    b. identifying health care delivery systems and policies that impact nutrition and dietetics technician practice;
    c. participating in professional and community organizations;
    d. performing self-assessment and developing goals for self-improvement throughout the program.

FDNS 1370 - Principles of Food Preparation

Course Rubric	Course Number	Course Title
FDNS	1370	Principles of Food Preparation
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	2	4

Course Classification
Technical Local Need

Description
(3-2-4) Application of food science principles to meal preparation including study of food composition, selection, cooking techniques, heat transfer, food safety, nutrition and ingredient substitution.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to evaluate food products by:
   a. describing the five senses involved in sensory evaluation;
   b. identifying the five taste stimuli;
   c. applying descriptive terminologies to evaluate appearance, taste, and texture of food;
   d. conducting a sensory evaluation using objective tests;
   e. explaining the esthetic values applied to food preparation.
2. Apply the basic food preparation techniques by:
   a. stating basic heating methods used in food preparation;
   b. demonstrating correct measuring and mixing techniques;
   c. converting commonly used measurements to metric equivalents;
   d. demonstrating the proper use of knives and production equipment;
   e. applying principles of food safety;
   f. demonstrating active participation, teamwork, and contributions in a group setting;
   g. functioning as a member of inter-professional teams by working with students of various background;
   h. promoting team involvement and value the skills of each member;
   i. applying safety and sanitation principles related to food, personnel, and customers.
3. Demonstrate understanding of food composition and chemical reactions in food by:
   a. identifying macronutrients in food;
   b. describing the functions of water in food preparation;
   c. comparing acid and base characteristics of food;
   d. demonstrating the proper use of a pH chart;
   e. explaining the properties of a colloidal system and differentiating between a solution and an emulsion;
   f. summarizing the role of food additives and various bakery ingredients used in food preparation;
   g. discussing use of functional and engineered foods in a healthful diet.
4. Demonstrate knowledge of physical and chemical properties for the following food groups: milk and dairy; eggs; meat, poultry and fish; vegetables and fruit; cereal and grains; yeast and quick breads; and fats and oils by:
   a. describing the physical composition;
   b. outlining the standards of food selection;
   c. explaining US government criteria in product classification;
   d. identifying factors influencing food quality;
   e. comparing methods of preparation and effects on nutrients' retention;
   f. discussing changes in properties during food preparation;
   g. incorporating healthy eating principles in food selection and preparation;
   h. participating in advocacy on local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
5. Demonstrate basic understanding of food preservation by:
   a. listing food preservation techniques;
   b. outlining biological, chemical, and physical changes that lead to spoilage;
   c. describing basic microorganism function in food;
   d. explaining the relationship between food preservation and sustainability;
   e. proposing and using procedures as appropriate to the practice setting to promote sustainability, reduce waste, and protect

the environment.

6. Demonstrate an understanding of cultural competence/sensitivity by:
    a. selecting appropriate cultural foods for specified ethnic groups;
    b. applying critical thinking skills to substitute ingredients in recipes and menus to meet selected dietary restrictions;
    c. modifying food textures and thickening consistency of beverages;
    d. applying critical thinking skills;
    e. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals.

7. Demonstrate effective and professional oral and written communication skills for entry into technical practice by:
    a. using clear and effective oral and written communications;
    b. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    c. showing cultural humility in interactions with colleagues, staff, clients, patients, and the public;
    d. preparing and delivering sound food and nutrition presentations to target audience;
    e. defending a position on issues impacting the nutrition and dietetics profession.

FDNS 1371 - Child Nutrition and Programs

Description
(3-3-0). Study of nutritional requirements and growth assessment for children 0-18 at low or moderate risk. Review of child nutrition regulatory processes and federal child nutrition programs. Develop practical skills in meal planning and providing nutrition education for children.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe nutrition recommendations for children by:
    a. describing the MyPlate recommendations for children and adolescents;
    b. summarizing dietary guidelines and recommendations as they apply to infants, preschool children, school-aged children, and adolescents;
    c. recalling the Dietary Reference intakes for the following vitamins and minerals: iron, zinc, calcium, and vitamin D;
    d. calculating nutrient requirements including calories and protein for infants, preschool children, school-aged children, and adolescents;
    e. listing factors affecting food choices for infants, preschool children, school-aged children, and adolescents including advertising, parents, peers, and mealtime environment;
    f. providing recommendations to meet hydration needs of infants, children, and adolescents;
    g. describing types of vegetarian diets and special nutrient needs/supplementation for various groups of vegetarians.

2. Demonstrate knowledge and skills to address nutrition concerns of children by:
    a. identifying foods that present a choking hazard in preschool children;
    b. providing recommendations to reduce food refusal by preschoolers;
    c. recommending strategies to decrease risk of dental caries;
    d. calculating BMI and plotting BMI on CDC Growth chart;
    e. identifying children who are overweight or at risk for obesity and factors contributing to obesity;
    f. describing health risks associated with obesity;
    g. applying critical thinking skills;
    h. providing strategies to reduce risk of obesity in children.

3. Demonstrate knowledge and skills to develop menu for the target populations by:
    a. developing menu according to menu planning principles and dietary guidelines;
    b. providing healthy alternative choices for meals and snack items;
    c. modifying regular menus to meet the needs of vegetarians;
    d. incorporating culturally appropriate food items in menu development;
    e. planning nutritionally sound meals, menus, and meal plans that promote health and disease management and meet client's/patient's needs.

4. Demonstrate an understanding of federally funded children's meal programs by:
    a. describing the benefits of child feeding programs available nationally and globally;
    b. explaining the application and eligibility process for free and reduced-price meals;
    c. summarizing the regulations and legislation pertaining to counting and claiming of meals, procurement, financial issues, ethics, reimbursement, the review process, and special diet provisions for the Child Nutrition Programs;
    d. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups and individuals;
    e. recalling current USDA meal patterns and nutrition standards for the National School Lunch and Breakfast programs including food components, calorie, saturated fat, calorie ranges, and sodium requirements;
    f. developing a menu according to current USDA meal patterns and nutrition standards for National School Lunch Program;
    g. evaluating the use of commodity foods within the child nutrition program;
    h. comparing the advantages and disadvantages of using pre-prepared meals;
    i. identifying sanitation and food handling procedures that minimize foodborne illness;
    j. proposing procedures as appropriate to the practice setting to promote sustainability, reduce waste, and protect the environment;
    k. describing the regulations behind accommodating students with special needs through menu substitutions, including life-threatening allergies and non-life-threatening diagnoses such as lactose or gluten intolerance;
    l. Selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols and to develop, manage, and disseminate information and data.

5. Prepare and deliver sound food and nutrition presentations to children by:
    a. describing the learning needs of children and teenagers;
    b. developing lesson plans;
    c. utilizing strategies to improve learning experience of children;
    d. using clear and effective oral and written communication;
    e. providing nutrition and lifestyle education to well populations by developing an educational nutrition session for a target population (preschool, school-aged children, pre-adolescence or adolescents);
    f. developing nutrition education materials for disease prevention and health improvement that are culturally and age appropriate and designed for the literacy level of the audience;
    g. accessing data, education materials for children and parents, consumer, and other information from credible sources;
    h. demonstrating effective, clear, and professional oral and written communication skills when preparing and presenting mock nutrition education lesson;
    i. presenting an educational session to a target population (preschool, school-aged children, pre-adolescence or adolescents);
    j. promoting team involvement and values the skills of each member;
    k. demonstrating active participation, teamwork, and contributions in group settings.

Requirements

Requirements
Required Prerequisite(s): FDNS-1346 with a minimum grade of "C"

Recommended Prerequisite/Corequisite: BIOL-2401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Recall pathology terms, describe pathology and medical/pharmacological treatment of cancer, alimentary tract (and accessory organs) and renal disease; evaluate client laboratory data, food/medication interactions; assess client nutritional status, special needs, analyze food intake, develop nutrition care plans, plan medical nutrition therapy for clients with the above diseases; counsel/instruct clients on therapeutic diets, document nutrition care activities; abstract/critique current peer reviewed nutrition related literature.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the Nutrition Care Process and clinical workflow elements for nutrition screening for referral to the registered dietitian nutritionist, collection of assessment data, nutrition interventions, and monitoring strategies appropriate for the technician level of practice by:
    a. performing nutrition screening and identifying clients or patients to be referred to a registered dietitian nutritionist;
    b. performing specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists for case studies of various disease states;
    c. collecting and evaluating nutrition assessment data, including anthropometric/physical, biochemical, clinical, and dietary;
    d. distinguishing relevant laboratory and nutritional values related to disease states;
    e. identifying food and drug interactions;
    f. estimating requirements for energy, protein, and fluid;
    g. explaining the purpose and use of PES statement;
    h. reviewing problems, etiologies, signs, and symptoms for development of nutrition diagnosis statements;
    i. developing interventions to effect change and enhance wellness in diverse individuals and groups;
    j. planning nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs;
    k. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations;
    l. implementing actions based on care plans, protocols, policies, and evidence-based practice;
    m. monitoring signs and symptoms related to nutrition diagnosis and effectiveness of nutrition care plan;
    n. documenting Nutrition Care Process using current technology.
2. Demonstrate effective and professional oral and written communication skills sufficient for entry into technical practice by:
    a. using clear and effective oral and written communication;
    b. demonstrating active participation, teamwork, and contributions in group settings;
    c. functioning as a member of inter-professional teams during simulation;
    d. demonstrating effective interviewing and education methods for diverse individuals and groups;
    e. incorporating motivational interviewing techniques in diet instructions;
    f. demonstrating an understanding of cultural competence/sensitivity;
    g. showing cultural humility in interactions with colleagues, staff, clients, patients and the public;
    h. using current information technologies to develop, manage, and disseminate nutrition information and data.
3. Identify and describe the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services by:
    a. describing the governance of nutrition and dietetics practice and inter-professional relationships in various practice settings;
    b. counseling patients within the scope of practice during mock counseling sessions;
    c. adhering to current federal regulations and state statutes and rules, and the Scope of Practice for the Nutrition and Dietetics Technician, Registered;
    d. referring situations outside the nutrition and dietetics technician scope of practice or area of competence to a registered dietitian nutritionist or other professional;
    e. demonstrating ethical principles for providing nutritional care;
    f. demonstrating professional attributes in all areas of practice.
4. Demonstrate how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice by:
    a. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    b. accessing data, references, patient education materials, consumer, and other information from credible sources;
    c. differentiating scholarly versus popular journals;
    d. listing the major components of peer-reviewed articles;
    e. evaluating information to determine if it is consistent with accepted scientific evidence;
    f. citing references in case study reports;
    g. applying critical thinking skills when completing case study research on various disease states using peer-reviewed literature.
5. Demonstrate knowledge and skills in nutrition care planning for upper gastrointestinal tract disorders by:
    a. describing the normal anatomy and physiology of the oral cavity and upper GI tract;
    b. describing common upper GI disorders and nutritional care guidelines;

c. summarizing the implications of upper GI surgeries;
d. evaluating the use of enteral nutrition support for upper GI disorders;
e. performing activities of the Nutrition Care Process for patients with upper GI disorders.

6. Demonstrate knowledge and skills in nutrition care planning for lower gastrointestinal tract disorders by:
   a. describing the normal anatomy and physiology of the lower GI tract;
   b. describing common disorders of the lower GI tract;
   c. recalling etiologies and pathophysiologies for lower GI disorders;
   d. identifying gluten-containing and gluten free foods;
   e. planning gluten free diets;
   f. differentiating ulcerative colitis and Crohn's disease;
   g. summarizing nutrition recommendations for IBD, IBS, and diverticular disease;
   h. summarizing the implications of intestinal surgeries;
   i. evaluating the use of enteral nutrition support for lower GI disorders;
   j. performing activities of the Nutrition Care Process for patients diagnosed with lower GI disorders.
7. Demonstrate knowledge and skills in nutrition care planning for liver, biliary, and exocrine pancreas disorders by:
   a. describing the common diseases of the liver, biliary and exocrine pancreas;
   b. describing the physiology and functions of the hepatic system;
   c. identifying common laboratory tests used to test for liver function;
   d. differentiating the different types of hepatitis;
   e. differentiating acute and chronic pancreatitis;
   f. explaining the development and nutrition management of Wilson's disease;
   g. explaining the relationship between alcohol and malnutrition;
   h. summarizing the stages of alcoholic liver disease;
   i. calculating energy and protein requirements for end-stage liver disease;
   j. evaluating use of enteral nutrition support for patients with malnutrition;
   k. performing activities of the Nutrition Care Process for patients diagnosed with liver disease.
8. Demonstrate knowledge and skills in nutrition care planning for renal disorders by:
   a. describing the normal anatomy and physiology of the kidney;
   b. describing pathophysiologies of nephritic syndrome, nephrotic syndrome, acute renal failure, chronic renal failure, and kidney stones;
   c. recalling GFR values for various stages of chronic kidney disease (CKD);
   d. calculating energy and protein requirements for various stages of CKD;
   e. contrasting hemodialysis and peritoneal dialysis;
   f. assessing laboratory values pertinent to renal disorders;
   g. evaluating food and drug interactions;
   h. summarizing the implications of malnutrition with renal disease;
   i. evaluating use of enteral nutrition support for renal disease;
   j. summarizing nutrition management for renal disorders;
   k. performing activities of the Nutrition Care Process for patients diagnosed with renal disease.
9. Demonstrate knowledge and skills in nutrition care planning for cancer prevention, treatment, and recovery by:
   a. listing risk factors related to cancer development;
   b. describing the nutrition implications of cancer and its treatment;
   c. calculating estimated energy needs of cancer patients;
   d. summarizing nutrition management for cancer;
   e. evaluating the use of enteral nutrition support for cancer patients;
   f. evaluating the effectiveness of complementary therapies in cancer patients;
   g. performing activities of the Nutrition Care Process for patients diagnosed with cancer.
10. Demonstrate knowledge and skills in nutrition care planning in critical care situations by:
    a. summarizing metabolic response to stress - ebb and flow phase;
    b. describing common critical care problems including sepsis, burns, and trauma;
    c. describing pathophysiology of inflammatory response syndrome;
    d. calculating energy and protein requirements during critical care;
    e. evaluating the use of enteral nutrition support for critical care patients;
    f. performing activities of the Nutrition Care Process for patients in critical care.
11. Demonstrate knowledge and skills in nutrition care planning for metabolic disorders by:
    a. listing common metabolic disorders;
    b. explaining the pathophysiologies of phenylketonuria, galactosemia, and maple syrup urine disease;
    c. summarizing medical nutrition therapy for children and adults with PKU;
    d. researching evidence-based practice for metabolic disorders;
    e. performing activities of the Nutrition Care Process for patients diagnosed with metabolic disorders.
12. Demonstrate knowledge and skills in nutrition care planning for neurological disorders by:
    a. listing common neurological diseases and problems;
    b. summarizing the eating and swallowing process;
    c. explaining the implications of neurological diseases on food intake;
    d. summarizing the feeding guidelines for dysphagic patients;
    e. identifying consistency of liquid;
    f. modifying diet for dysphagic patients;
    g. identifying the roles of interdisciplinary team members in nutrition management of neurological patients;
    h. evaluating use of enteral nutrition support in patients with neurological disorders;
    i. performing activities of the Nutrition Care Process for patients diagnosed with neurological disease.
13. Defend a position on issues impacting the nutrition and dietetics profession by:
    a. explaining legislative and regulatory policies related to nutrition and dietetics technician level of practice;
    b. identifying healthcare delivery systems and policies that impact nutrition and dietetics technician practice;
    c. summarizing the roles of The Joint Commission (TJC) and recommendations from TJC on nutrition care;
    d. participating in professional and community organizations;
    e. performing self-assessment and developing goals for self-improvement throughout the program.

FDNS 2168 - Practicum-Community Nutrition/Wellness

General

Course Key

Course Rubric	Course Number	Course Title
FDNS	2168	Practicum-Community Nutrition/Wellness
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
1	0	10

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-10) Practical general workplace training supported by an individualized learning plan developed by the employer, college, and student. The plan relates the workplace training and experiences to the student's general and technical course of study. Participation in nutrition intervention including program planning, nutrition education and promotion, and program evaluation to targeted risk group populations in the community. Note: A granted petition is required for registration. See program director for additional practicum requirements. Required Prerequisites: FDNS-1309 with a grade of "B" or better; FDNS-1103, HECO-1322, DITA-1300, DITA-1301 with a grade of "C" or better; FDNS-1371 or FDNS-1341 with a grade of "C" or better

Required Prerequisite(s): FDNS-1309 with a grade of "B" or better; FDNS-1103, HECO-1322, DITA-1300, DITA-1301 with a grade of "C" or better; FDNS-1371 or FDNS-1341 with a grade of "C" or better

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Demonstrate how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice by:
   a. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
   b. accessing data, references, patient education materials, consumer, and other information from credible sources;
   c. evaluating information to determine if it is consistent with accepted scientific evidence;
   d. applying critical thinking skills and evaluating effectiveness of nutrition intervention.
2. Demonstrate effective and professional oral and written communication skills sufficient for entry into technical practice by:
   a. demonstrating effective interviewing and education methods for diverse individuals and groups;
   b. using clear and effective oral and written communication;
   c. preparing and delivering sound food and nutrition presentations to a target audience;
   d. developing nutrition education materials for disease prevention and health improvement that are culturally and age appropriate and designed for the literacy level of the audience;
   e. presenting an educational session to a target population.
3. Use Nutrition Care Process for nutrition screening for referral to the registered dietitian nutritionist, collection of assessment data, nutrition interventions and monitoring strategies appropriate for the technician level of practice by:
   a. performing nutrition screening and collecting anthropometric and dietary data;
   b. evaluating nutritional needs of client;
   c. providing nutrition education and diet instruction to low and moderate risk clients;
   d. developing a three-day menu for a client considering cultural diversity and nutritional needs;
   e. referring clients to registered dietitian and/or community programs based on individual needs and eligibility.
4. Developing interventions to effect change and enhance wellness in diverse individuals and groups by:
   a. performing specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in accordance with the Scope of Practice for the Nutrition and Dietetics Technician, Registered;
   b. planning nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs;
   c. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations;
   d. developing an educational session for a target population;
   e. providing nutrition and lifestyle education to well populations;
   f. promoting health improvement, food safety, wellness, and disease prevention for the general population;
   g. assisting with marketing clinical and customer services.
5. Demonstrate active participation, teamwork, and contributions in group settings by:
   a. identifying and describing the work of inter-professional teams and the roles of others with whom the nutrition and dietetics technician, registered collaborates in the delivery of food and nutrition services;
   b. demonstrating professional attributes in all areas of practice;
   c. functioning as a member of inter-professional teams to promote nutrition and health;
   d. promoting team involvement and value the skills of each member.
6. Demonstrate cultural humility, awareness of personal biases and an understanding of cultural differences as they contribute to diversity, equity and inclusion by:
   a. summarizing cultural-related practices within the community;
   b. showing cultural humility in interactions with colleagues, staff, clients, patients, and the public;
   c. developing culturally appropriate nutrition resources.
7. Explain legislative and regulatory policies related to nutrition and dietetics technician level of practice by:
   a. participating in advocacy on local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession;
   b. explaining current nutrition-related legislation;
   c. describing contributing factors to health inequity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination;
   d. advocating on local, state, or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession;
   e. defending a position on issues impacting the nutrition and dietetics profession.
8. Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession by:
   a. participating in nutrition and dietetics professional organizations and explain the significant role of the organization;

b. actively contributing to nutrition and dietetics professional and community organizations;

c. demonstrating an understanding of the importance and expectations of a professional in mentoring and precepting others;

d. mentoring others;

e. identifying and articulating the value of precepting.

9. Describe the governance of nutrition and dietetics practice, such as the Scope of Practice for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics by:

a. following the procedures and regulations as established by TCC and practicum sites;

b. adhering to current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Practice for the Nutrition and Dietetics Technician, Registered, Standards of Practice, Standards of Professional Performance, and Code of Ethics for the Profession of Nutrition and Dietetics;

c. maintaining client confidentiality.

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the Nutrition Care Process and clinical workflow elements for nutrition screening for referral to the registered dietitian nutritionist, collection of assessment data, nutrition interventions and monitoring strategies appropriate for the technician level of practice by:
    a. performing nutrition risk screenings and identifying patients to be referred to a registered dietitian nutritionist;
    b. performing specific activities of the Nutrition Care Process as assigned by registered dietitian nutritionists in accordance with the Scope of Practice for the Nutrition and Dietetics Technician, Registered;
    c. collecting historical and dietary nutrition data;
    d. reviewing laboratory and food/drug interaction related to patient's disease states;
    e. evaluating and calculating data collected including anthropometric, biochemical, clinical, physical, dietary data, and psychosocial well-being;
    f. assessing nutritional needs of patient pertinent to collected information;
    g. reviewing nutrition diagnosis;
    h. implementing actions based on care plans, protocols, policies and evidence-based practice.
2. Develop nutrition intervention and monitoring strategies by:
    a. developing interventions to effect change and enhance wellness in diverse individuals and groups;
    b. providing nutrition counseling and diet instruction within scope of DTR practice;
    c. planning nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs;
    d. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals;
    e. developing nutrition education materials for disease prevention and health improvement that are culturally and age appropriate and designed for the educational level of the audience;
    f. referring situations outside the dietetic technician scope of practice or area of competence to a registered dietitian nutritionist or other professional;
    g. delivering nutrition services through quality improvement and customer satisfaction activities.
3. Demonstrate effective and professional oral and written communication skills sufficient for entry into technical practice by:
    a. stating effective communication techniques;
    b. using clear and effective oral and written communications;
    c. demonstrating active participation, teamwork, and contributions in group settings;
    d. demonstrating effective interviewing and education methods for diverse individuals and groups;
    e. demonstrating cultural humility in interactions with staff, clients, patients, and the public;
    f. describing the work of inter-professional teams and the roles of others with whom the dietetic technician collaborates in the delivery of food and nutrition services.
4. Describe the governance of nutrition and dietetics practice, such as the Scope of Practice for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics by:
    a. adhering to current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Practice for the Nutrition and Dietetics Technician, Registered, Standards of Practice, Standards of Professional Performance, and Code of Ethics for the Profession of Nutrition and Dietetics;
    b. identifying scenarios involving ethical issues;
    c. applying ethical principles to patient nutritional care;
    d. describing contributing factors to health inequity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination;
    e. participating in quality improvement and customer satisfaction activities to improve delivery of nutrition services.
5. Demonstrate professional attributes in all areas of practice by:
    a. following the procedures and regulations as established by TCC and practicum sites;
    b. functioning actively as a member of inter-professional teams;
    c. demonstrating initiative, leadership, and flexibility;
    d. demonstrating an understanding of cultural competence/sensitivity and respect for life experiences and educational background in interpersonal relationships;
    e. adapting to change in scheduling and assignments;
    f. advocating for opportunities in the professional settings;
    g. applying critical thinking skills;
    h. maintaining client confidentiality;
    i. developing interventions to effect change and enhance wellness in diverse individuals and groups.

6. Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession by:
    a. participating in nutrition and dietetics professional organization and explain the significant role of the organization;
    b. actively contributing to nutrition and dietetics professional and community organizations;
    c. performing self-assessment that includes self-awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement;
    d. identifying and articulating one's skills, strengths, knowledge and experiences relevant to the position desired and career goals;
    e. preparing a plan for professional development according to Commission on Dietetic Registration guidelines;
    f. demonstrating an understanding of the importance and expectations of a professional in mentoring and precepting others;
    g. identifying and articulating the value of precepting.
7. Demonstrate effective use of computer information technologies by:
    a. demonstrating how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice;
    b. selecting and using appropriate current information technologies to locate and apply evidence-based guidelines and protocols;
    c. using current information technologies to develop, manage, and disseminate nutrition information and data;
    d. accessing data, references, patient education materials, consumer, and other information from credible sources;
    e. evaluating information to determine if it is consistent with accepted scientific evidence.

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): FDNS 1447

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Evaluate individual's knowledge and competency for NDTR examination, describe requirements for registration eligibility and maintenance; explain the roles and scope of practice of DTRs, and prepare for a successful employment interview.

Upon successful completion of this course, students will:

1. Discuss requirements for obtaining and maintaining the NDTR credential by:
    a. recalling test specifications and process for the NDTR credentialing examination;
    b. identifying resources for preparing for the NDTR credentialing examination;
    c. outlining the verification requirements for the DTR credentialing exam;
    d. stating the requirements for maintenance of the credential;
    e. listing resources for continuing professional development for maintaining registration status.
2. Describe the governance of nutrition and dietetics practice, such as the Scope for the Nutrition and Dietetics Technician, Registered and the Code of Ethics for the Profession of Nutrition and Dietetics by:
    a. discussing the roles and responsibilities of DTRs and inter-professional relationships in clinical, community, and dietary management;
    b. identifying situations outside of the DTR's Scope of Practice that necessitate referrals to Registered Dietitians or other professionals;
    c. demonstrating identification with the nutrition and dietetics profession through participation in dietetics professional organization meetings or events;
    d. using clear and effective oral and written communication;
    e. discussing ethical issues faced by dietetics professionals and appropriate courses of actions;
    f. adhering to current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Practice for the Nutrition and Dietetics Technician, Registered, Standards of Practice, Standards of Professional Performance, and Code of Ethics for the Profession of Nutrition and Dietetics.
3. Demonstrate knowledge to sit for the NDTR credentialing examination by:
    a. reviewing the following topics within the domain of nutrition science and care for individuals and groups:
        1. Principles of basic and normal nutrition
        2. Nutrition screening and assessment for individuals and populations
        3. Nutrition for health promotion and disease prevention
        4. Planning and implementing medical nutrition therapy for individuals
        5. Dietary guidelines and nutrition programs in community
        6. Planning of nutrition education and training
        7. Monitoring and evaluation for outcomes individuals and nutrition programs
    b. reviewing the following topics within the domain of Food Science and Food Service:
        1. Menu Development
        2. Procurement and Supply Management
        3. Food Production, Distribution, and Service

4. Sanitation, Safety, Facility and Equipment

c. reviewing the following topics within the domain of Management of Food and Nutrition Service:

1. Human Resources
2. Finance and Materials
3. Marketing Products and Services
4. Management Principles and Functions
5. Quality Management, Regulatory Compliance, and Research

4. Prepare for an employment interview by:

a. identifying characteristics of a successful candidate for employment;
b. developing a written cover letter and resume for a potential employer of DTRs;
c. using current information technologies to develop, manage, and disseminate nutrition information and data;
d. creating an employment portfolio;
e. identifying potential employment opportunities in dietetics;
f. demonstrating effective and professional oral and written communication skills sufficient for entry into technical practice by participating in a job mock interview;
g. advocating for opportunities in the professional settings (such as asking for additional responsibility, practicing negotiating a salary or wage or asking for a promotion).

5. Demonstrate skills, strengths, knowledge and experience relevant to leadership potential and professional growth for the nutrition and dietetics practitioner by:

a. performing self-assessment that includes self-awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement;
b. identifying and articulating one's skills, strengths, knowledge and experiences relevant to the position desired and career goals;
c. functioning as a member of interprofessional teams;
d. practicing how to self-advocate for opportunities in a variety of settings (such as asking for support, presenting an elevator pitch).

FDNS 2300 - Food Management Systems

Requirements
Required Prerequisite(s): DITA-1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe organizational structure, flow of authority, employee scheduling in dietetic facilities; recall/convert units of measure; and identify can sizes. Classify and describe various food production systems; classify food service systems; and define portion control. Identify institutional serving and measuring utensils; describe/analyze/write menus; and outline U.S. food distribution systems and governmental regulations. Outline food procurement and storage systems; outline inventory systems; and describe HACCP and safety regulations. Recall disaster planning principles; describe continuous quality improvement principles; and identify food quality characteristics and measures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Evaluate foodservice operation by:
   a. identifying various types of foodservice operations in the foodservice industry;
   b. identifying factors that affect the operation of the foodservice;
   c. analyzing foodservice operations using the foodservice systems model.
2. Plan a static or cycle menu for a healthcare facility by:
   a. explaining the roles of menu in foodservice operation;
   b. discussing pros and cons of static, cycle, and single-use menus;
   c. summarizing factors affecting menu planning;
   d. selecting culturally appropriate food items for menu planning;
   e. modifying menus and recipes for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals;
   f. utilizing current technology in menu planning.
3. Evaluate food production flow and kitchen design by:
   a. discussing types of foodservice: conventional, ready prepared, commissary, and assembly serve;
   b. designing a kitchen to improve food production flow;
   c. proposing procedures as appropriate to the practice setting to promote sustainability, reduce waste and protect the environment.
4. Discuss factors associated with control of inventory and food cost by:
   a. summarizing inventory management practice, including par stock, physical and perpetual;
   b. writing a purchasing specification;
   c. outlining the bidding process;
   d. estimating inventory values using inventory valuation methods;
   e. improving receiving and storage process in foodservice facilities.
5. Follow HACCP and safety guidelines for a foodservice operation by:
   a. describing HACCP and safety regulations;
   b. identifying critical control points in food production, receiving, and storage;
   c. applying safety and sanitation principles related to food, personnel, and consumers;
   d. developing a HACCP protocol for a specific food product;
   e. resolving issues related to food safety and sanitation.
6. Demonstrate knowledge in food production management by:
   a. reviewing production schedule, ingredients control, and recipe standardization;
   b. describing the processes involved in delivering quality food and nutrition services;
   c. delivering nutrition services through quality improvement and customer satisfaction activities;
   d. identifying sizes and volume of serving utensils;
   e. calculating estimated number of servings based on sizes of serving utensils;
   f. adjusting quantity using factoring and percentage methods;
   g. calculating As Purchased (AP) and Edible Portion (EP) for food production;
   h. forecasting production needs using forecasting methods.
7. Participate in quality improvement and customer satisfaction activities to improve delivery of nutrition services by:
   a. reviewing policies and guidelines established by regulatory agencies;
   b. identifying health care delivery systems and policies that impact nutrition and dietetics technician practice;
   c. discussing policies for quality standards established by regulatory agencies (State, Joint Commission, and Children's Medical Services);
   d. differentiating quality assurance versus process improvement;
   e. selecting appropriate tools for process improvement;
   f. identifying characteristics and measures of food quality;
   g. conducting a customer satisfaction survey;
   h. discussing preparation for disasters.
8. Assist with marketing clinical and customer services by:
   a. reviewing components of the marketing mix;
   b. identifying target market using market segmentation;
   c. selecting tools for conducting market research;
   d. discussing branding concept and niche marketing;

e. applying critical thinking skills to evaluate market needs;
f. accessing data, references, consumer, and other information from credible sources to evaluate target population;
g. developing a marketing plan and strategies.

9. Perform management and leadership roles by:
   a. describing the roles and functions of management;
   b. reviewing organization structure;
   c. comparing theories of motivation;
   d. identifying characteristics of effective leaders;
   e. reviewing decision-making techniques;
   f. providing strategies to improve communication at workplace;
   g. demonstrating active participation, teamwork, and contributions in group settings;
   h. performing supervisory functions for purchasing, production, and service of food that meets nutrition guidelines, cost parameters, and health needs.
10. Participate in the human resource management process, including employee recruitment, scheduling, training, evaluation, and retention by:
   a. reviewing the employment process, including recruiting, selection, orientation, training, and performance appraisal;
   b. defining management functions of human resources;
   c. explaining legislative and regulatory policies related to human resource management and labor unions;
   d. conducting a personnel need analysis of a foodservice operation;
   e. using clear and effective oral and written communication;
   f. writing a job description for hiring of a new employee;
   g. developing hiring interview questions;
   h. participating in a mock hiring interview of employees;
   i. preparing employee work schedule;
   j. performing supervisory, education, and training functions;
   k. identifying areas for training and professional development for employees;
   l. practicing resolving differences or dealing with conflict, as appropriate. providing strategies for conflict resolution;
   m. discussing strategies to retain employees;
   n. advocating for opportunities in the professional settings (such as asking for additional responsibility, practicing negotiating a salary or wage or asking for a promotion);
   o. promoting team involvement and values the skills of each member.
11. Evaluate and analyze financial data by:
   a. explaining budgeting principles and techniques;
   b. differentiating types of budgets;
   c. calculating labor hours and FTE;
   d. calculating productivity using productivity measures, including meals/labor hour, minutes/meal, labor cost/meal, etc.;
   e. examining basic accounting principles such as revenue, indirect costs, profit, and profit margin;
   f. evaluating information presented in balance sheets and income statements;
   g. calculating cost of goods sold;
   h. calculating and comparing financial data using ratio analysis, e.g. inventory turnover, food and labor cost percentages, minutes per meal, meals per labor hours, etc.;
   i. comparing pricing methods in pricing of menu items;
   j. collecting performance improvement, financial, productivity, or outcomes data and comparing it to established criteria;
   k. utilizing information technology to develop, store, and retrieve financial data;
   l. assisting developing a budget spreadsheet for a foodservice operation;
   m. presenting the budget for the new service to administration;
   n. implementing and adhering to budgets.

FDST 2333 - Wine Types & Sensory Evaluation

General

Course Key
12915

Course Rubric
FDST

Course Number
2333

Course Title
Wine Types and Sensory Evaluation

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0)A study of the major types of wines including factors that affect quality with on the development of sensory evaluation techniques. Required Prerequisite: RSTO-1319

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # TAKE RSTO-1319;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): RSTO 1319

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the major wine types; explain the factors that affect wine quality; and demonstrate the sensory techniques used to evaluate wine.

Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of the Wine and Food Pyramid: A Hierarchy of Taste.
2. Demonstrate knowledge and understanding of the effect of environment and culture on texture and flavors of food and wine.
3. Analyze the impact of sweetness and acidity levels in wine and food.
4. Develop a working knowledge of wine texture characteristics, including tannin, oak, and body.
5. Demonstrate knowledge and understanding of menu planning both from horizontal and vertical pairing decisions.
6. Understand the importance of the customer service experience, including product, service, and training issues.

FDST 2335 - Wine Growing Regions of The Wo

General

Course Key
12988

Course Rubric
FDST

Course Number
2335

Course Title
Wine Growing Regions of the World

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of the major wine growing regions of the world including their history and diversity, viticultural and enological practices and procedures, wine types, and the sensory evaluation of their productions.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the major wine growing regions and the wines produced throughout the world; compare the viticultural and enological practices of the major wine growing regions of the world; conduct a critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin; create a plan to evaluate the wines, the viticultural practices, and the enological practices of wine production in five of the major wine growing regions of the world; and describe and compare the types of soil, their geology, and their structure from the major wine regions of the world.

Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of the current issues and trends in the wine industry, including wines from the United States, Europe, Italy, Asia, and France.
2. Analyze the fundamentals of growing grapes, grape types, making wine, and tasting wine.
3. Demonstrate knowledge and understanding of the differences between wines from varying regions of the world and compare those wines with the wines of the United States.
4. Demonstrate and evaluate the pairing of wine with unique food items.
5. Demonstrate knowledge and understanding of the art of wine service and wine lists.
6. Evaluate and understand how purchasing and storage of wine relates to wine service.

FIRS 1301 - Firefighter Certification I

Simple Requisites

See course description for prerequisite/corequisite.
Type
Required concurrent courses.

10
A Requirement block where all subrequirements are required

Take FIRS-1323, FIRS-1329, FIRT-1338, FIRS-1319 and FIRS-1313
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Corequisite(s): FIRS 1313, FIRS 1319, FIRS 1323, FIRS 1329 and FIRT 1338

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate competencies for subjects taught set forth in the TCFP curriculum for Basic Fire Suppression.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the correct laws and rules applicable to Basic Firefighter certification by the Texas Commission on Fire Protection by:
    a. identifying the requirements for certification as a Basic Firefighter as stated in the Standards Manual for Fire Protection Personnel;
    b. identifying the various levels of firefighter certification as stated in the Standards Manual for Fire Protection Personnel;
    c. identifying the various levels of instructor certification as stated in the Standards Manual for Fire Protection Personnel.
2. Demonstrate an understanding of all the aspects of firefighter safety by:
    a. describing the elements of personnel accountability systems and the application of systems at an incident;
    b. describing techniques for action when trapped or disoriented in a fire situation or in a hostile situation;
    c. demonstrating techniques for action when trapped or disoriented in a fire situation or in a hostile situation;
    d. describing safety precautions and the use of safety equipment provided for protection while riding on apparatus;
    e. identifying safety procedures for ensuring a safe station facility environment.
3. Demonstrate an understanding of the process of combustion and of key terms associated with fire science by:
    a. explaining fire theory;
    b. explaining heat energy sources;
    c. explaining the stages of fire and the appropriate action to be taken for extinguishment;
    d. explaining fire extinguishment theory.
4. Demonstrate an understanding of all aspects of personal protective equipment by:
    a. explaining the NFPA standards applicable to personal protective equipment;
    b. demonstrating the correct procedures for inspection and maintenance of personal protective equipment.
5. Demonstrate an understanding of the use of the self-contained breathing apparatus by:
    a. explaining the NFPA standards applicable to self-contained breathing apparatus;
    b. describing different types of self-contained breathing apparatus;
    c. demonstrating the various methods of donning and doffing the self-contained breathing apparatus;
    d. demonstrating inspection, care, and testing of the self-contained breathing apparatus.
6. Demonstrate an understanding of the importance of reports and records as they relate to fire service by:
    a. identifying fire incident reporting systems;
    b. completing a basic fire incident report.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate competencies, for subjects taught, set forth in the TCFP curriculum for Basic Fire Suppression.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of equipment, tactics, and procedures associated with forcible entry by:
    a. demonstrating appropriate use of forcible tools;
    b. describing the methods and procedures for properly cleaning, maintaining, and inspecting forcible entry tools;
    c. identifying materials and construction features;
    d. describing the dangers associated with forcible entry for doors, locks, glass, fences, windows, floors, and walls and, if required, simulating forcible entry with each.
2. Demonstrate an understanding of equipment, tactics, and procedures associated with ventilation by:
    a. describing the principles, advantages, and effects of proper ventilation;
    b. describing the considerations affecting the decision to ventilate;
    c. demonstrating the various methods of ventilation.
3. Demonstrate an understanding of equipment, tactics, and procedures associated with salvage by:
    a. explaining the purpose of salvage and its value to the fire department and to public relations;
    b. demonstrating various salvage procedures as an individual or team member;
    c. demonstrating the procedures of inspection, cleaning, and maintaining salvage equipment.
4. Demonstrate an understanding of equipment, tactics, and procedures associated with overhaul by:
    a. explaining the value of proper overhaul;
    b. explaining the safety precautions necessary during overhaul;
    c. demonstrating various overhaul procedures as an individual or team member.

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate competencies for subjects taught set forth in the TCFP curriculum for Basic Fire Suppression.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of equipment, tactics, and procedures associated with ropes and knots by:
    a. demonstrating terms used when tying a knot and describing their uses;
    b. explaining the uses of and tying knots with safety, given proper size and length of rope;
    c. selecting the appropriate knot, given a task;
    d. demonstrating the procedures for the inspection, maintenance, and storage of ropes.
2. Demonstrate an understanding of equipment, tactics, and procedures associated with rescue by:
    a. demonstrating the proper techniques of searching for victims;
    b. demonstrating the proper techniques for removing injured persons from hazardous environments.
3. Demonstrate an understanding of equipment, tactics, and procedures associated with hazardous materials by:
    a. explaining purpose, goals, and definitions of the NFPA standards applicable to hazardous materials;
    b. explaining safety principles applicable to hazardous materials response at the awareness level;
    c. identifying principles pertaining to the recognition of hazardous materials;
    d. explaining principles of classification, identification, and verification of hazardous materials.

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate competencies for subjects taught set forth in the TCFP curriculum for Basic Fire Suppression. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the procedures pertaining to fire cause determination by
    a. determining point of origin (1a, 1b, 2a, 2b, 2c);
    b. describing events of fire cause (1a, 1b, 2a, 2b, 2c);
    c. explaining factors indicating arson (1a, 1b, 2a, 2b, 2c);
    d. describing the protection of evidence (1a, 1b, 2a, 2b, 2c);
    e. explaining the importance of securing the scene (1a, 1b, 2a, 2b, 2c).
2. Demonstrate an understanding of pre-incident planning by
    a. describing all the components of pre-incident planning (1a, 1b, 2a, 2b, 2c);
    b. performing a facility survey (1a, 1b, 2a, 2b, 2c).
3. Demonstrate an understanding of wild land fire suppression by
    a. explaining terminology associated with wild land fires (1a, 1b, 2a, 2b, 2c);
    b. explaining methods used in locating and sizing up wild land fires (1a, 1b, 2a, 2b, 2c);
    c. explaining suppression techniques and safety procedures (1a, 1b, 2a, 2b, 2c).
4. Demonstrate an understanding of fire protection systems by
    a. describing the purpose of the National Fire Protection Association (NFPA) 13 (1a, 1b, 2a, 2b, 2c);
    b. explaining the purpose of NFPA 101, life safety code, applicable to fire prevention inspections (1a, 1b, 2a, 2b, 2c).
5. Demonstrate an understanding of public transportation by
    a. describing recommended procedures using apparatus, equipment, and resources available as they apply to the modes of public transportation (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply provisions of local building and fire prevention codes to fire prevention inspections; and describe fire inspection practices and procedures including hazard recognition and correction. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of issues relating to fire prevention codes by
    a. explaining the national fire problem and main related issues (1a, 1b, 2b);
    b. explaining the need for, responsibilities of, and importance of fire prevention as part of an overall mix of fire protection (1a, 1b, 1c, 2a, 2b, 2c);
    c. explaining the need for, responsibilities of, and importance of fire prevention organizations (1a, 1b, 1c, 2a, 2b, 2c);
    d. identifying minimum professional qualifications at the state and national level for Fire Inspector, Fire Investigator and Public Educator (1a, 1b, 1c, 2b);
    e. defining the elements of a Plan Review Process (1a, 1b, 2c, 2d);
    f. identifying the laws, rules, codes, and other regulations relevant to fire protection of the authority or authorities having jurisdiction (1a, 1b, 2c, 2d);
    g. discussing training programs for fire prevention (1b, 2a, 2b);
    h. designing media programs (1b, 2d);
    i. discussing the major programs for public education (2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe basic principles of hydraulics; identify components of a water distribution system; calculate fire flows for various types of occupancies; explain various types of fire pumps and pump operational procedures; calculate pump pressure for various types of hose lays; and describe various types of nozzles and the application of each type. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of basic fire ground operations and tactical goals by
    a. defining hydraulics (1a, 1b, 2a, 2b, 2c);
    b. examining characteristics of water (1a, 1b, 2a, 2b, 2c);
    c. explaining hydrostatics (1a, 1b, 2a, 2b, 2c);
    d. analyzing velocity and discharge (1a, 1b, 2a, 2b, 2c);
    e. listing basic flow formulas (1a, 1b, 2a, 2b, 2c);
    f. applying discharge coefficients (1a, 1b, 2a, 2b, 2c);
    g. explaining nozzle reaction (1a, 1b, 2a, 2b, 2c);
    h. classifying types of hydrants (1a, 1b, 2a, 2b, 2c);
    i. classifying fire service pumps (1a, 1b, 2a, 2b, 2c);
    j. explaining a centrifugal fire pump (1a, 1b, 2a, 2b, 2c);
    k. defining cavitation (1a, 1b, 2a, 2b, 2c);
    l. distinguishing between a single stage and two stage fire pump (1a, 1b, 2a, 2b, 2c);
    m. identifying pressure control devices (1a, 1b, 2a, 2b, 2c);
    n. calculating friction loss (1a, 1b, 2a, 2b, 2c).

FIRT 1315 - Hazardous Materials I

General

Course Key
564

Course Rubric	Course Number	Course Title
FIRT	1315	Hazardous Materials I

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). The chemical characteristics and behavior of various materials. Storage, transportation, handling hazardous emergency situations, and the most effective methods of hazard mitigation.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify hazardous materials in various shipping and storage containers; explain chemical characteristics, and how chemicals may react under certain conditions; select protective clothing and equipment; and describe the most effective methods of hazard mitigation. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of basic fire ground operations and tactical goals by
    a. defining chemistry (1a, 1b, 2a, 2b, 2c);
    b. critiquing atomic structure (1a, 1b, 2a, 2b, 2c);
    c. analyzing the characteristics of compounds (1a, 1b, 2a, 2b, 2c);
    d. describing covalent bonding (1a, 1b, 2a, 2b, 2c);
    e. explaining how nonmetals combine (1a, 1b, 2a, 2b, 2c);
    f. defining straight chain hydrocarbons (1a, 1b, 2a, 2b, 2c);
    g. describing isomers (1a, 1b, 2a, 2b, 2c);
    h. listing seven hydrocarbon derivatives (1a, 1b, 2a, 2b, 2c);
    i. contrasting pyrolysis and bond energies (1a, 1b, 2a, 2b, 2c);
    j. enumerating the physical forms of compressed gases (1a, 1b, 2a, 2b, 2c);
    k. contrasting temperature, pressure, and volume (1a, 1b, 2a, 2b, 2c);
    l. identifying the hazards of cryogenics (1a, 1b, 2a, 2b, 2c);
    m. defining polymer and its groups (1a, 1b, 2a, 2b, 2c);
    n. explaining monomer and its groups (1a, 1b, 2a, 2b, 2c);
    o. contrasting acids and bases (1a, 1b, 2a, 2b, 2c);
    p. defining organic peroxides (1a, 1b, 2a, 2b, 2c);
    q. identifying DOT classifications (1a, 1b, 2a, 2b, 2c);
    r. explaining water and air reactive materials (1a, 1b, 2a, 2b, 2c);
    s. enumerating and defining pyrophoric materials (1a, 1b, 2a, 2b, 2c).

FIRT 1329 - Building Codes and Construction

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify model building codes; and compare construction types related to fire behavior. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of basic fire ground operations and tactical goals by
    a. identifying reasons for building construction (1a, 1b, 2a, 2b, 2c);
    b. explaining design considerations (1a, 1b, 2a, 2b, 2c);
    c. defining the steps in the design and construction process (1a, 1b, 2a, 2b, 2c);
    d. explaining differences in building classifications (1a, 1b, 2a, 2b, 2c);
    e. defining structural failure (1a, 1b, 2a, 2b, 2c);
    f. explaining the sources of force (1a, 1b, 2a, 2b, 2c);
    g. defining live and dead loads (1a, 1b, 2a, 2b, 2c);
    h. listing primary building materials (1a, 1b, 2a, 2b, 2c);
    i. examining the relative strengths of building materials (1a, 1b, 2a, 2b, 2c);
    j. identifying building systems (1a, 1b, 2a, 2b, 2c);
    k. explaining the hazards of each type of construction to firefighters (1a, 1b, 2a, 2b, 2c);
    l. illustrating various fire protection systems (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify fire detection and alarm systems, heat and smoke control systems, special protection and sprinkler systems, water supply for fire protection, and portable fire extinguishers; identify the applications of fire detection, alarm, and extinguishing systems; and explain the operation of fire detection, alarm, and extinguishing systems. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of national fire emergency standards according to the Fire and Emergency Services Higher Education Conference (FESHE) by
    a. explaining appropriate national standards governing the installation, inspection, and maintenance of given extinguishing systems and their related components (1a, 1b, 2a, 2b, 2c, 2e);
    b. classifying detection, alarm, supervisory devices, heat, flame, smoke control devices, and hardware (1b, 2a, 2c);
    c. articulating knowledge of distribution and installation of water supply systems in suburban and rural areas (1a, 1b, 2a, 2b, 2e);
    d. distinguishing types, components, and operation of automatic, special sprinkler systems, and standpipes (1a, 1b, 2a, 2b, 2c);
    e. distinguishing types, components, and operation of automatic, special sprinkler systems, and standpipes (1a, 1b, 2a, 2b, 2c);
    f. explaining appropriate national standards governing the installation, inspection, and maintenance of given extinguishing agent/systems and their related components (1a, 1b, 2a, 2b, 2c, 2e);
    g. distinguishing types, components, and operation of automatic special sprinkler systems and standpipes (1a, 1b, 2a, 2b, 2c).

take firt-1309;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): FIRT 1309

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: List the organizations that work with the fire service and explain how they affect fire service operations; develop an organizational structure demonstrating interagency cooperation and explain how those agencies assist a fire service function; and describe management principles and techniques for effective organizational performance. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic concepts of fire service management by
    a. describing how history impacts the fire industry today (1a, 1b, 2a, 2e);
    b. explaining how the National Fire Academy has influenced professional development in the fire service (1a, 1b, 2a, 2e);
    c. explaining modern management theories such as Theory X, Theory Y, Theory Z, Maslow's hierarchy, motivation hygiene model and others (1b, 1c, 2b, 2e);
    d. defining the importance of the Johari Window in enhancing leadership ability (1a, 1b, 2b, 2c);
    e. explaining why core values are important to an organization (1b, 1c, 2b, 2c);
    f. describing past events that have forced ethical legislation to be written (1b, 2a, 2b, 2c);
    g. describing how morale can affect and impact an organization (1b, 1c, 2b, 2c);
    h. explaining the typical models of local governance and organization (1a, 1b, 2b, 2e);
    i. explaining the differences between probability and consequence and why they are important in the development of community risk management (1b, 1c, 2b, 2c);
    j. defining performance measures, baselines, and benchmarks (1a, 1b, 2b, 2c);
    k. describing the federal National Response Plan (1a, 1b, 2a, 2c).

FIRT 1433 - Fire Chemistry I

General

Course Key
10534

Course Rubric	Course Number	Course Title
FIRT	1433	Fire Chemistry I

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	1

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-1) Chemical nature and properties of compounds as related to the fire service. Fundamental laws of chemistry, states of matter, gas laws, chemical bonding, and thermodynamics. This course meets Fire and Emergency Services Higher Education (FESHE) Model Curriculum core requirements.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the combustion process; describe states of matter; differentiate properties of gases and solutions; and interpret chemical reactions related to effective fire extinguishment. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of basic fire ground operations and tactical goals by
    a. defining chemistry (1a, 1b, 2a, 2b, 2c);
    b. explaining the role of fire throughout history (1a, 1b, 2a, 2b, 2c);
    c. describing the classes of fire (1a, 1b, 2a, 2b, 2c);
    d. defining matter (1a, 1b, 2a, 2b, 2c);
    e. describing density of matter (1a, 1b, 2a, 2b, 2c);
    f. explaining features of matter and energy (1a, 1b, 2a, 2b, 2c);
    g. determining units of measurement (1a, 1b, 2a, 2b, 2c);
    h. identifying elements and compounds (1a, 1b, 2a, 2b, 2c);
    i. explaining the elements of chemical bonding (1a, 1b, 2a, 2b, 2c);
    j. classifying metals, nonmetals, and metalloids (1a, 1b, 2a, 2b, 2c);
    k. classifying chemical reactions (1a, 1b, 2a, 2b, 2c);
    l. listing eight important common elements (1a, 1b, 2a, 2b, 2c);
    m. describing the physical properties of oxygen and halogens (1a, 1b, 2a, 2b, 2c);
    n. identifying the alkali metals (1a, 1b, 2a, 2b, 2c);
    o. examining chemical categories of organic pesticides (1a, 1b, 2a, 2b, 2c);
    p. defining organic compounds (1a, 1b, 2a, 2b, 2c);
    q. explaining halogenated hydrocarbons (1a, 1b, 2a, 2b, 2c);
    r. defining polymerization (1a, 1b, 2a, 2b, 2c);
    s. explaining US DOT explosive regulations (1a, 1b, 2a, 2b, 2c);
    t. describing storage practices of chemical explosives (1a, 1b, 2a, 2b, 2c);
    u. listing the types of radiation (1a, 1b, 2a, 2b, 2c).

FIRT 2309 - Firefighting Strategies and Tactics I

General

Course Key
8055

Course Rubric	Course Number	Course Title
FIRT	2309	Firefighting Strategies and Tactics I

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Analysis of the nature of fire problems and selection of initial strategies and tactics including an in-depth study of efficient and effective use of staffing and equipment to mitigate the emergency.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify potential scenarios in various fire situations; develop strategies and tactics; and describe components of an incident management system. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate understanding of basic fire ground operations and tactical goals by
    a. describing firefighting operations (1a, 1b, 2a, 2b, 2c);
    b. explaining occupancy classes and fuel loading (1a, 1b, 2a, 2b, 2c);
    c. applying fire flow calculations (1a, 1b, 2a, 2b, 2c);
    d. selecting proper hose lines (1a, 1b, 2a, 2b, 2c);
    e. demonstrating fire ground safety (1a, 1b, 2a, 2b, 2c);
    f. identifying tactical priorities (1a, 1b, 2a, 2b, 2c);
    g. applying ICS system to fire ground operations (1a, 1b, 2a, 2b, 2c);
    h. applying risk versus benefit analysis (1a, 1b, 2a, 2b, 2c);
    i. defining pre-fire planning (1a, 1b, 2a, 2b, 2c);
    j. describing fire attack (1a, 1b, 2a, 2b, 2c);
    k. identifying fire ground safety concerns (1a, 1b, 2a, 2b, 2c);
    l. contrasting fire attack modes (1a, 1b, 2a, 2b, 2c);
    m. explaining positive and negative ventilation effects (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate skills appropriate to the external working environment, while working as an intern by
    a. working successfully in a new external work/learning environment (1a, 1b, 1c, 2a, 2b, 2e);
    b. evaluating procedures and processes from the perspective of a neutral party in order to provide feedback to the sponsoring organization (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. summarizing in verbal and written form the experiences gained from the external environment (1a, 1b, 1c, 2b, 2c);
    d. integrating successfully into organizations other than the normal workplace (1c, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate skills in lighting a scene to achieve a professional camera image while on location or in a studio setting. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Explain the nature of work in lighting for the film and television business by
    a. defining the job of lighting for film and television production (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. describing the relationship of the lighting department to other production departments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying principles of lighting contributions to the film and television art forms (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. analyzing lighting in film and television productions where it is done well and where it is done poorly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate the ability to distinguish values and qualities of light on a set by
    a. identifying the conventional wisdom of the nature of light (1a, 1b, 1c, 2b, 2c);
    b. identifying the sources of light (1a, 1b, 1c, 2b, 2c);
    c. defining the qualities of light (1a, 1b, 2a, 2c, 2d);
    d. distinguishing the principles of the color of light (1a, 1b, 2a, 2c, 2d).
3. Perform safe practices and techniques for handling lighting equipment, instruments, and lamps by
    a. identifying the components and functions of a variety of lamps for lighting instruments (1a, 1b, 2a, 2c, 2d, 2e);
    b. defining the function and application of reflectors as a source of light on the set (1a, 1b, 2a, 2c, 2d, 2e);
    c. manipulating the components and functions of a variety of basic lighting instruments (1a, 1b, 2a, 2c, 2d, 2e);

d. describing the purpose and applications for special lighting instruments to achieve specific illumination on the set (1a, 1b, 2a, 2c, 2d, 2e);

e. demonstrating image contrast ratios and how to make adjustments with light (1a, 1b, 2a, 2c, 2d, 2e);

f. employing a variety of ancillary equipment used to control and manipulate light from instruments on the set (1a, 1b, 2a, 2c, 2d, 2e).

4. Prepare basic lighting setups by

a. defining how instruments are set up to provide basic lighting on the set (1a, 1b, 2a, 2c, 2d, 2e);

b. performing to survey a location for lighting (1a, 1b, 2a, 2c, 2d, 2e);

c. staging lighting instruments in preparation for lighting a location (1a, 1b, 2a, 2c, 2d, 2e);

d. correcting problems with lights that requires correction (1a, 1b, 2a, 2c, 2d, 2e);

e. explaining the power needs for lights and solutions on set (1a, 1b, 2a, 2c, 2d, 2e);

f. plotting lighting set ups with diagrams for directing others how to set lights (1a, 1b, 2a, 2b, 2c, 2d, 2e);

g. maintaining light kits for stocking, set up and striking lights on the set (1a, 1b, 2a, 2c, 2d, 2e).

5. Work as a team member and leader of lighting projects in various production locations by

a. defining unique needs and solutions for lighting on location (1a, 1b, 2a, 2c, 2d, 2e);

b. determining how to work in mixed lighting conditions (1a, 1b, 2a, 2c, 2d, 2e);

c. configuring lighting instruments for moving shots (1a, 1b, 2a, 2c, 2d, 2e);

d. creating lighting techniques for green screen and blue screen shots in a variety of set configurations (1a, 1b, 2a, 2c, 2d, 2e);

e. creating lighting setups solving for a variety of problems with costumes (1a, 1b, 2a, 2c, 2d, 2e);

f. creating lighting setups solving for a variety of problems with table top items (1a, 1b, 2a, 2c, 2d, 2e);

g. creating lighting setups presenting a variety of moods (1a, 1b, 2a, 2c, 2d, 2e);

h. creating lighting setups for a variety of talent with various hair colors and skin tones (1a, 1b, 2a, 2c, 2d, 2e);

i. creating lighting setups presenting a variety of special lighting effects (1a, 1b, 2a, 2c, 2d, 2e);

j. solving lighting setup problems for a variety of set challenges (1a, 1b, 2a, 2c, 2d, 2e).

FLMC 2333 - Cinematography

Requirements

Simple Requisites

See course descriptions for prerequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take RTVB-1321(11047) comm-1336 comm-2303;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take comm-1307 or comm-1335
A Subrequirement block where all groups are required

31
(SELECTED CRSES): Take 3 of the following courses...

See course description for prerequisite/corequisite.
Type
Pre/ Co-requisite

10
A Requirement block where all subrequirements are required

take flmc-1304;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): RTVB 1321, COMM 1336, and COMM 2303
Required Prerequisite(s) or Corequisite(s): FLMC 1304
Recommended Prerequisite(s): COMM 1307 or COMM 1335

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Employ concepts and theory; analyze scene with respect to cinematography; explain differences in lighting styles; evaluate cinematic production tools; and apply techniques to produce a short video or film. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Examine cinematography for film and video productions by

a. defining a film or HDTV cine camera production system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. identifying the jobs performed on a film shoot (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. describing the process of creating film programs in the field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. identifying the principles of planning a film production (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

e. developing time management skills to maximize field production time (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

f. explaining the steps in the production process (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

2. Develop the skills necessary to operate HDTV cine equipment for single camera film production by

a. operating cine field cameras (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. applying effective picture composition techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. identifying field camera mounting equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. applying effective camera movement techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

e. identifying field lighting instruments (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. operating field lighting instruments (1a, 1b, 1c, 2a, 2c, 2d, 2e);

g. identifying signal formats for acquisition (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

h. operating field audio production equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

i. identifying battery and DC power formats for field equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

j. demonstrating proper camera operating techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

k. demonstrating proper field monitor operating techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

l. assisting in the operation of all field equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Explore the technical processes of advanced signal applications by

a. explaining the function of white balance (1a, 1b, 1c, 2a, 2c, 2d, 2e);

b. differentiating how light is transduced into an electronic signal (1a, 1b, 1c, 2a, 2c, 2d, 2e);

c. explaining the function of gain in visual and sound applications (1a, 1b, 1c, 2a, 2c, 2d, 2e);

d. explaining the function of gamma in acquisition (1a, 1b, 1c, 2a, 2c, 2d, 2e);

e. differentiating the qualities of light sources for the cinematographer (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. examining field recording systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);

g. differentiating recording formats for visual and sound signals (1a, 1b, 1c, 2a, 2c, 2d, 2e).

4. Explore the technical processes of advanced lens applications by

a. examining lens systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);

b. differentiating how light is measured for cinematography (1a, 1b, 1c, 2a, 2c, 2d, 2e);

c. explaining the function of matte boxes (1a, 1b, 1c, 2a, 2c, 2d, 2e);

d. explaining the function of filters on the lens (1a, 1b, 1c, 2a, 2c, 2d, 2e);

e. differentiating the qualities of lenses (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. examining focus systems and techniques (1a, 1b, 1c, 2a, 2c, 2d, 2e);

g. examining techniques to control exposure (1a, 1b, 1c, 2a, 2c, 2d, 2e).

5. Perform the production functions of a cinematographer by

a. interpreting scripts for productions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. conceptualizing shooting ideas (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. creating a lighting plan (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. applying creative lighting techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

e. explaining the elements of a camera slate (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

f. composing a variety of shots (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

g. creating a camera department equipment list (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

h. following procedures to properly check out and return equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

i. preparing materials to be used for a production or exercise (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

j. producing programs and exercises (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

6. Perform a variety of production functions required for shooting programs in the field by

a. practicing safe operations with equipment and personnel in the field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. serving as crewmember in every position required using learned skills (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. performing as talent on television productions as necessary (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. operating camcorders properly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

e. operating audio equipment properly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

f. communicating effectively with production team members (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

g. analyzing film and video production program elements constructively both verbally and in writing (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

h. critiquing personal production performance constructively both verbally and in writing (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

i. delivering completed production assignments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the works of classic and contemporary directors; identify the skill sets of a director; and direct a crew and talent in a film or video production. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the process of creating program length film and video productions by

a. exploring the process of creating program length film and television productions (1a, 1b, 2a, 2c, 2d, 2e);

b. examining the production timeline (1a, 1b, 2a, 2c, 2d, 2e);

c. identifying the production team positions for large scale productions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. identifying the principles of planning a long form production (1a, 1b, 2a, 2c, 2d, 2e);

e. discovering the tools used to manage large scale productions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

f. explaining the steps in mounting a large production (1a, 1b, 2a, 2c, 2d, 2e).

2. Demonstrate an understanding of the legal issues of film and television productions by

a. describing how a property is acquired for production (1a, 1b, 2a, 2c, 2d, 2e);

b. determining techniques for acquiring production rights (1a, 1b, 2a, 2c, 2d, 2e);

c. differentiating contractual production credits (1a, 1b, 2a, 2c, 2d, 2e);

d. examining production contracts (1a, 1b, 2a, 2c, 2d, 2e);

e. identifying relevant labor laws affecting production (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. examining remedies for production risks (1a, 1b, 1c, 2a, 2c, 2d, 2e);

g. examining funding sources for production (1a, 1b, 2a, 2c, 2d, 2e);

h. exploring tax advantages for production (1a, 1b, 2a, 2c, 2d, 2e);

i. identifying film commission resources (1a, 1b, 2a, 2c, 2d, 2e);

j. exploring legal liabilities of production (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Demonstrate an understanding of the role of the producer in film and television productions by

a. examining the responsibilities of the producer (1a, 1b, 1c, 2a, 2c, 2d, 2e);

b. differentiating the various jobs with a producer title (1a, 1b, 1c, 2a, 2c, 2d, 2e);

c. explaining the process of development (1a, 1b, 1c, 2a, 2c, 2d, 2e);

d. explaining the function of the script (1a, 1b, 1c, 2a, 2c, 2d, 2e);

e. examining how a budget is produced (1a, 1b, 1c, 2a, 2c, 2d, 2e);

f. examining a production business proposal package (1a, 1b, 1c, 2a, 2c, 2d, 2e);

g. differentiating the stages of preproduction (1a, 1b, 1c, 2a, 2c, 2d, 2e);

h. analyzing case studies of producing scenarios (1a, 1b, 2a, 2c, 2d, 2e).

4. Demonstrate an understanding of the role of the director in creating film and television productions by

a. examining the responsibilities of the director (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. differentiating the positions working with a director title (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. differentiating between narrative and documentary program formats (1a, 1b, 2a, 2c, 2d, 2e);

d. explaining directing styles (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

e. analyzing a script as a director (1a, 1b, 2a, 2c, 2d, 2e);

f. analyzing script characterization (1a, 1b, 2a, 2c, 2d, 2e);

g. staging cameras (1a, 1b, 2a, 2c, 2d, 2e);

h. determining production lighting needs (1a, 1b, 2a, 2c, 2d, 2e);

i. determining production music needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

j. determining production design needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

k. determining production location needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

l. determining production audio needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

m. analyzing case studies of directing scenarios (1a, 1b, 2a, 2c, 2d, 2e).

5. Participate in creating program length video productions by

a. practicing safe operations with equipment and personnel (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. developing a treatment (1a, 1b, 2a, 2c, 2d, 2e);

c. developing a script (1a, 1b, 2a, 2c, 2d, 2e);

d. developing storyboards (1a, 1b, 2a, 2c, 2d, 2e);

e. developing script breakdowns (1a, 1b, 2a, 2c, 2d, 2e);

f. developing a shot list (1a, 1b, 2a, 2c, 2d, 2e);

g. completing a shooting schedule (1a, 1b, 2a, 2c, 2d, 2e);

h. completing a crew list (1a, 1b, 2a, 2c, 2d, 2e);

i. completing a production schedule (1a, 1b, 2a, 2c, 2d, 2e);

j. completing talent release forms (1a, 1b, 2a, 2c, 2d, 2e);

k. developing a production budget summary (1a, 1b, 2a, 2c, 2d, 2e);

l. developing a script analysis (1a, 1b, 2a, 2c, 2d, 2e);

m. developing a script markup (1a, 1b, 2a, 2c, 2d, 2e);

n. developing audition notes for talent selection (1a, 1b, 2a, 2c, 2d, 2e);

o. completing call sheets (1a, 1b, 2a, 2c, 2d, 2e);

p. developing blocking diagrams (1a, 1b, 2a, 2c, 2d, 2e);

q. developing remote survey sheets (1a, 1b, 2a, 2c, 2d, 2e);

r. developing budget worksheets (1a, 1b, 2a, 2c, 2d, 2e);

s. participating in a variety of production roles for practice productions (1a, 1b, 2a, 2c, 2d, 2e);

t. examining post production requirements (1a, 1b, 2a, 2c, 2d, 2e).

6. Demonstrate an understanding of the marketing and distribution outlets for film and television productions by

a. analyzing festival circuit opportunities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. examining distribution deals (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. analyzing online distribution opportunities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. exploring product lifespan issues (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Distinguish between natural and man-made fibers; identify the types of yarns; explain construction methods; examine dyeing methods; differentiate printing techniques; describe finishing techniques; and analyze textile applications for the design, manufacturing, marketing, and care of fashion merchandise. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Distinguish between natural and manmade fibers (1a, 1b, 2c).
2. Identify types of yarns (1a, 1b, 2c).
3. Explain construction methods (1a, 1b, 2c, 2d, 2e).
4. Examine dyeing methods (1a, 1b, 2c, 2d, 2e).
5. Differentiate printing techniques (1a, 1b, 2c, 2d, 2e).
6. Describe finishing techniques (1a, 1b, 2c).
7. Analyze textile applications for the design, manufacturing, marketing, and care of fashion merchandise (1a, 1b, 1c, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Examine apparel and accessories marketing procedures; apply marketing concepts and procedures to the development of a marketing plan; present a marketing plan for an apparel or accessory product. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the development of the American fashion industry as it impacts today's marketing of apparel and accessories (1a, 1b, 1d, 2d).
2. Explain how fashion trends and consumer demand impact apparel and accessories marketing (1a, 1b, 1d, 1e, 1f).
3. Explain how environmental influences affect the marketing of apparel and accessory products (1a, 1b, 1d, 1e, 2f).
4. Demonstrate an understanding of the global nature of apparel and accessories marketing (1a, 1b, 1d, 1d, 1f).
5. Demonstrate an understanding of the critical nature of branding apparel and accessories products (1a, 1b, 1d, 2f).
6. Examine apparel and accessory marketing procedures (1a, 1b, 1d, 2a, 23, 2f).
7. Apply marketing concepts and procedures to the development of a marketing plan for apparel or accessory product (1a, 1b, 1d, 2a, 2b, 2c, 2f).
8. Present a marketing plan for an apparel or accessory product (1a, 1b, 1e, 2a, 2d, 3a).

Course Title
Fashion Retailing

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An overview of retailing procedures used in various types of fashion companies. A study of operations, personnel, merchandising, sales promotion, and finance and control. Examination of job opportunities available in the retail fashion industry.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Distinguish the types of retail fashion companies; examine practices in operations; identify personnel needs; develop merchandise assortment; implement sales promotion concepts; differentiate among various finance and control procedures; and research job opportunities. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Distinguish the types of fashion retail companies by
    a. identifying types of store based fashion retailers (2c);
    b. outlining forms of offsite fashion retailing including internet usage (2c, 2d);
    c. describing trends in globalization of fashion retailing (2c, 2d).
2. Demonstrate an understanding of methods for classifying fashion consumer behavior by
    a. identifying types of fashion buying motives (2c, 2d);
    b. outlining fashion consumer research methods (2c, 2d);
    c. distinguishing demographic, psychographic, and lifestyle groupings of fashion consumers (2c, 2d).
3. Demonstrate an understanding of considerations in locating and designing a fashion retail store by
    a. listing critical issues in locating a fashion retail store (2a, 2c, 2d);
    b. describing factors used in developing fashion store layouts (2a, 2c, 2d);
    c. identifying loss prevention methods (2a, 2c, 2d).
4. Demonstrate an understanding of management theories applied in fashion retailing by
    a. identifying organizational structures of fashion retailers (2a, 2b, 2c, 2d);
    b. identifying job opportunities in fashion retailing (2a, 2b, 2c, 2d);
    c. explaining the importance of human resources in successful fashion retail operations (2a, 2b, 2c, 2d);
    d. outlining human resource trends in fashion retailing (2a, 2b, 2c, 2d).
5. Demonstrate an understanding of ethical environments in fashion retailing by
    a. explaining the importance of business ethics (2a, 2b, 2d);
    b. explaining the importance of businesses being socially responsible (2a, 2b, 2d).
6. Demonstrate an understanding of the buying and pricing of fashion merchandising products for resale to the consumer by
    a. outlining the role of fashion buyer (2a, 2c, 2d);
    b. listing decision factors in buying domestic and foreign fashion goods (1b, 2a, 2d);
    c. comparing branding choices (1b, 2c, 2d);
    d. identifying factors in pricing fashion products for resale (2a, 2c, 2d);
    e. calculating markup and markdown (1a, 1b, 2a, 2c, 2d);
    f. calculating 6 month buying plan, assortment plan, and open to buy plan (1a, 1b, 2a, 2c, 2d).
7. Demonstrate an understanding of finance and control procedures in fashion retail operations by
    a. identifying major components of a profit and loss statement and balance sheet and their relationship to a profitable retail operation (1a, 1b, 2a, 2d, 2d);
    b. outlining major measurements used to assess the health of the financial operation of a retail operation (1a, 1b, 2a, 2c, 2d).
8. Demonstrate an understanding of predominant promotional strategies for fashion products by
    a. defining advertising, promotion, and publicity strategies (2a, 2c, 2d);
    b. outlining visual merchandising strategies (1b, 2a, 2b, 2d);
    c. summarizing trends in fashion promotions (2a, 2c, 2d);
    d. implementing sales promotion concepts through project/team assignments (1a, 1b, 2a, 2c, 2d).

FSHN 2309 - Fashion Image

General

Course Key
8981

Course Rubric
FSHN

Course Number
2309

Course Title
Fashion Image

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Instruction in the techniques used to analyze the fashion image of individual clients. Emphasis on personal coloring, body types, and wardrobe coordination. Study of fashion image consultant business practices and job qualifications.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze personal fashion images; present an in depth personal image evaluation; and examine the business practices and job qualifications of a fashion image consultant. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the rationale for wearing and for choosing clothes by
    a. identifying the functions of clothing (2c, 2d);
    b. outlining rationale for making choices based on life stages and roles (1b, 1c, 2c, 2d).
2. Demonstrate an understanding of fashion evolution by
    a. tracing developmental eras of fashion (2c, 2d);
    b. identifying fashion designers and their contributions to the industry (2c, 2d).
3. Distinguish fashion styles for men and women by
    a. identifying major categories of clothing (2c, 2d);
    b. listing different clothing styles within each major category (2c, 2d).
4. Choose a garment with rationale based upon figure type by
    a. relating rationale for choosing principles based upon figure types (1b, 2c, 2d);
    b. completing a figure analysis (1b, 1c, 2a, 2b, 2c);
    c. determining best choice of design principles and clothing styles to enhance personal body type (1b, 1c, 2c, 2d).
5. Select appropriate color choices for figure enhancement by
    a. identifying groupings of colors and color combinations (2b, 2d);
    b. illustrating appropriate color choices for body types and skin tones (2b, 2d).
6. Prepare a two week business wardrobe plan by
    a. determining appropriate clothing styles for personal wardrobe choices (2c, 2d);
    b. using design principles and color choices that enhance personal figure in wardrobe plan (1a, 1b, 1c, 2a);
    c. illustrating choices in project presentation format (1a, 1b, 2a, 2e).
7. Demonstrate an understanding of the role of a fashion image consultant by
    a. identifying the qualifications for becoming a fashion image consultant (2c);
    b. giving examples of local fashion image consulting businesses (2c).

GAME 1304 - Level Design

General

Course Key
7556

Course Rubric
GAME

Course Number
1304

Course Title
Level Design

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-2). Introduction to the tools and concepts used to create levels for games and simulations. Incorporates level design, architecture theory, concepts of critical path and flow, balancing, play testing, and storytelling. Includes utilization of toolsets from industry titles.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the pros and cons of a level including balance and emotional impact, create original game environments using existing game engines and tools, and evaluate existing architectural spaces for game aesthetics. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up game levels by
    a. defining a game level (1a, 1b, 1d, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    b. defining the elements that make up a game level (1a, 1b, 1d, 2a, 2b, 2f, 3a, 3d, 3c);
    c. defining the appropriate use of the elements that make up a game level (1a, 1b, 1d, 2a, 2b, 2e, 2f, 3a, 3d, 3c).
2. Apply the elements that make up game levels by
    a. building rudimentary game levels using industry accepted practices and applications (1a, 1b, 1d, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    b. incorporating a completed game level into a functioning game or application (1a, 1b, 1d, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    c. defining the testing procedures for a game level (1a, 1b, 1d, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    d. implementing the testing procedures for a game level (1a, 1b, 1d, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e).

GAME 1328 - Video Game Design

General

Course Key
12112

Course Rubric
GAME

Course Number
1328

Course Title
Video Game Design

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) Introduction to video game design techniques which inspire artists and non-artists. Including characters, environments, architecture, static objects, user interface, and storyboards for games. Emphasizes applying 2D design concepts.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe best practices in design techniques; recommend design solutions; and identify criteria for communicating design. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up basic 2D design and development by
    a. explaining the steps involved in the process of 2D design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. tracing the history and philosophy of 2D design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining current issues and practices behind 2D design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Apply basic design principles to a course project related to 2D design and development using an industry standard application by
    a. developing a rudimentary 2D design using industry accepted practices and applications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. incorporating current design and development principles into a functioning 2D design so that it reflects the current philosophy of the production process (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. implementing analytic procedures for game 2D design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create art assets; integrate assets into game engines; and execute the concepts and fundamentals of graphic objects. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up basic art assets used in game engines by
    a. explaining the steps involved in the process of art asset design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. tracing the history and philosophy of art asset design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining current issues and practices behind art asset design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Apply basic design principles to a course project related to art asset design and development using an industry standard application by
    a. developing rudimentary art assets using industry accepted tools, practices, and applications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. incorporating current design and development principles into functioning art assets so that they reflect the current philosophy of the production process (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. implementing analytic procedures for art asset design and development (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

GAME 1403 - Introduction to Game Design/Development

General

Course Key
7551

Course Rubric
GAME

Course Number
1403

Course Title
Introduction to Game Design and Development

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Introduction to electronic game development and game development careers. Includes examination of history and philosophy of games, the game production process, employee factors for success in the field, and current issues and practices in the game development industry.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the history and evolution of video and computer games and game genres; identify the phases and processes involved in developing a computer game; design a simple computer game from initial concept to final design document; and describe current trends in the game industry with regards to hiring practices and working conditions. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up basic game design and development by
    a. explaining the steps involved in the process of game design and development (1a, 1b, 2c);
    b. tracing the history and philosophy of the game production process (1a, 1b, 2a, 2c);
    c. explaining current issues and practices in the game development industry (1a, 1b, 2c, 2d).
2. Apply basic design principles to a course project related to game design and development using an industry standard application by
    a. building a rudimentary game using industry accepted practices and applications (1a, 1b, 2a, 2b, 2c, 2d);
    b. incorporating current design and development principles into a functioning game so that the game reflects the current philosophy of the game production process (1a, 1b, 2a, 2b, 2c, 2d);
    c. implementing testing procedures for the game that is developed during the course (1a, 1b, 2a, 2b, 2c, 2d).

GAME 1409 - Introduction to Animation Programming

Description
(4-3-2) Mathematical elements and algorithms involved in basic animation. Includes generating graphics, viewing 3D environments such as visible line detection and 3D surfaces, image processing techniques, and special effects.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop programs that apply the basic character animation techniques, build and pose animated characters, and implement proper timing within animations. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up basic animation design and development by
    a. explaining the steps involved in the process of animation design and development (1a, 1b, 2c);
    b. tracing the history and philosophy of the animation production process (1a, 1b, 2a, 2c);
    c. explaining current issues and practices in the animation development industry (1a, 1b, 2c, 2d).
2. Apply basic design principles to a course project related to animation design and development using an industry standard application by
    a. building a rudimentary animation sequence using industry accepted practices and applications (1a, 1b, 2a, 2b, 2c, 2d);
    b. incorporating current design and development principles into a functioning animation sequence so that it reflects the current philosophy of the animation production process (1a, 1b, 2a, 2b, 2c, 2d);
    c. implementing testing procedures for the animation sequence that is developed during the course (1a, 1b, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Incorporate sound and graphics in programs; develop a game/simulation advanced pointer techniques and application. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an appropriate level of competency in understanding and using course concepts by
    a. explaining principles related to the nature and characteristics of analog sound (1a, 1b, 2a, 2b, 2c, 2d);
    b. explaining the relationships between the nature of analog sound and sound perception (1a, 1b, 2a, 2b, 2c, 2d);
    c. explaining principles related to the creation and editing of digital sound files (1a, 1b, 2a, 2b, 2c, 2d);
    d. explaining ambient sound techniques for enhancing immersion in a game environment (1a, 1b, 2a, 2b, 2c, 2d);
    e. explaining techniques for optimizing the use of audio memory (1a, 1b, 2a, 2b, 2c, 2d);
    f. explaining techniques for producing a realistic interactive sound world to support gameplay (1a, 1b, 2a, 2b, 2c, 2d);
    g. explaining basic music techniques for games (1a, 1b, 2a, 2b, 2c, 2d);
    h. explaining effective dialogue techniques in gameplay (1a, 1b, 2a, 2b, 2c, 2d);
    i. explaining basic techniques for modifying a game using Blueprint graphical programming tool (1a, 1b, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design a professional portfolio for various delivery systems; and create resume, business card, web page, demo reel, and hardcopy. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up a portfolio for the game development industry by
    a. defining what portfolio for game development is (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2f, 3a, 3c, 3d, 3e);
    b. defining the elements that make up a portfolio for game development (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    c. defining the appropriate construction and implementation of the elements that make up a portfolio for game development (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e).
2. Apply the elements that make up a portfolio for game development by
    a. developing a comprehensive portfolio for game development using industry accepted practices and applications (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    b. incorporating game content and designs they have created into a comprehensive portfolio for game development (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e);
    c. defining and implementing accepted industry procedures for creating a portfolio for game development (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f, 3a, 3c, 3d, 3e).

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Character animation for application interfaces. Skinning and weighting, forward kinematics, inverse kinetics, constraints, expressions, scripting and driven keys, mesh deformers, morph targets/blend shapes, and animation user interfaces.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop a character for animating; demonstrate techniques of skinning and weighting, forward kinematics, inverse kinetics, constraints, expressions, scripting and driven keys, mesh deformers, morph targets/blend shapes, and creating animation user interfaces; demonstrate animation of characters to test their rigs; and demonstrate techniques for exporting compressed animations into a game format. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Identify the elements that make up 3D animation design and development by
    a. explaining the steps involved in the process of animation design and development (1a, 1b, 2c);
    b. tracing the history and philosophy of the animation production process (1a, 1b, 2a, 2c);
    c. explaining current issues and practices in the 3D animation development industry (1a, 1b, 2c, 2d).
2. Apply basic design principles to a course project related to 3D animation design and development using an industry standard application by
    a. building a rudimentary 3D animation sequence using industry accepted practices and applications (1a, 1b, 2a, 2b, 2c, 2d);
    b. incorporating current design and development principles into a functioning 3D animation sequence so that it reflects the current philosophy of the animation production process (1a, 1b, 2a, 2b, 2c, 2d);
    c. implementing testing procedures for the 3D animation sequence that is developed during the course (1a, 1b, 2a, 2b, 2c, 2d).

GEOG 1301 - Physical Geography

General

Course Key
16404

Course Rubric
GEOG

Course Number
1301

Course Title
Physical Geography

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0). This course introduces students to the processes that drive Earth's physical systems. Students will explore the relationships among these physical systems, with emphasis on weather and climate, water, ecosystems, geologic processes and landform development, and human interactions with the physical environment.

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0). This course introduces students to fundamental concepts, skills, and practices of human geography. Place, space, and scale serve as a framework for understanding patterns of human experience. Topics for discussion may include globalization, population and migration, culture, diffusion, political and economic systems, language, religion, gender, and ethnicity.

Description
(3-3-0). This course is an introduction to the world's major regions seen through their defining physical, social, cultural, political, and economic features. These regions are examined in terms of their physical and human characteristics and their interactions. The course emphasizes relations among regions on issues such as trade, economic development, conflict, and the role of regions in the globalization process.

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Overview of the social, psychological, and biological changes that accompany aging. Focuses on the implications of these changes for the individual, as well as for the larger society.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate the multi-disciplinary aspect of theory, research, and practice in gerontology; articulate the implications of aging in American society; interpret the demographics of aging; and identify cultural aspects of aging.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of theories and research on adult development and aging by
    a. defining gerontology, the normal aspects of aging, and comprehending myths and stereotypes about aging;
    b. explaining the forces of development, developmental influences, culture, and ethnicity along with core issues in development;
    c. examining measurement in adult development and aging research;
    d. integrating findings from different studies while conducting research ethically about aging.
2. Demonstrate an understanding of physical changes among aging clients by
    a. discovering changes in skin, hair, voice, body build, mobility, and understanding the psychological implications of these changes;
    b. explaining sensory system changes including vision, hearing, somethesia, taste, and smell;
    c. using efficient learning techniques to acquire and apply new knowledge and skills to understand the basic changes in vital functions, the reproductive system, and autonomic nervous system of aging adults.
3. Demonstrate an understanding of longevity, health, mental health, and functioning of aging adults by
    a. exploring average and maximum longevity while defining genetic and environmental factors in average longevity;
    b. describing ethnic, gender, and international differences in average longevity;
    c. identifying health and illness, quality of life, changes in the immune system, chronic and acute disease, and the role of stress in longevity;
    d. recognizing and describing mental health issues faced by the aging population in current society;
    e. explaining how mental illness can be a result of substance abuse issues;
    f. exploring functional health and disability by determining functional health status, causes of functional limitations, and disability in older adults.
4. Demonstrate understanding and empathy regarding relationships in aging adults by
    a. identifying social, familial, and community support for the aging;
    b. defining how networks shape the transition of older adults;
    c. understanding lifestyles and love relationships such as singlehood, cohabitation, marriage, divorce, remarriage, widowhood, and how these relationships impact psychological well-being of aging adults.
5. Demonstrate an understanding of work, leisure, and retirement while focusing on the implications of these for aging adults by
    a. describing the meaning of work, revisiting occupational choices, and job satisfaction for the aging;
    b. recognizing occupational transitions, occupational insecurity, and coping with unemployment;
    c. exploring various types of leisure activities, developmental changes in leisure, and consequences of leisure activities;
    d. identifying retirement and work in late life while exploring the adjustment to retirement, new employment, and volunteering.
6. Demonstrate an understanding of aging in economic realms and environmental interactions by
    a. describing Social Security, Medicare, and private pensions that affect the aging;
    b. identifying lifestyles of aging adults living in poverty and the quality of life of these individuals;
    c. exploring changes in living environments: community options, nursing homes, home modifications, the decision-making processes, and implications of making these changes.

GERS 1342 - Aging and Mental Health

General

Course Rubric	Course Number	Course Title
GERS	1342	Aging and Mental Health

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Examination of current issues relating to mental health of older adults. Includes the theoretical and empirical foundations relevant to the psychological study of older adults.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the impact of mental health on the quality of life of older persons; assess mental health of older persons; implement intervention techniques; and identify contributions the older person brings to the care giving partnership.

Upon successful completion of this course, students will:

1. Express an understanding of the impact of mental health issues on the aging population and their quality of life by
    a. defining the foundation of mental health and social services practice with the aging;
    b. recognizing the context of human services practice with the aging population;
    c. understanding the theories of the aging process.
2. Recognize the models of mental health in later life by
    a. understanding the psychodynamic, cognitive-behavioral, stress and coping, and family systems models;
    b. exploring the relationship between aging, physical health, and mental health;
    c. defining the psychosocial adjustments to aging.
3. Explore differential assessments of cognitive and emotional problems of the aging population by
    a. understanding successful and healthy aging;
    b. identifying and describing cognitive disorders;
    c. identifying and exploring common psychiatric disorders, especially those related to suicide and substance use disorder among the aging.
4. Learn case management models and client referral process and apply to clinical situations by
    a. understanding appropriate diagnostic tools;
    b. demonstrating an ability to administer tools in order to determine general treatment plans and referrals as needed;
    c. identifying effective care coordination.
5. Explore appropriate care options for the aging individual with mental illness and other special needs by
    a. assessing the family's ability to cope and provide care for the individual;
    b. monitoring and evaluating intervention strategies and outcomes appropriate to needs of aging clients from diverse populations through empirical observation;
    c. identifying appropriate placement options for aging individuals with cognitive decline and/or psychological impairments;
    d. understanding and responding to legal and ethical issues related to informed consent, personal capacity, elder abuse, and caregiver abuse, while defining proper reporting protocol.

GISC 1402 - Understanding Geographic Inform Systems

General

Course Key
7542

Course Rubric	Course Number	Course Title
GISC	1402	Understanding Geographic Information Systems

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Theory and application of geographic information science (GIS). Includes an overview of the general principles of GIS and practical experience in its use.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create, obtain, and evaluate data; demonstrate implementation and management of a GIS project; and use Map Projections. Discuss the history, purpose, and parts of a map; integrate data (vector, tabular, and raster) in the creation of a GIS application for business; use ArcGIS; and identify GIS career options.

Upon successful completion of this course, students will:

1. Apply conceptual foundations for GIS tasks and projects.
    a. Think critically and spatially to analyze and evaluate patterns in places and time frames.
    b. Choose and apply appropriate map scales and coordinate systems.
    c. Apply geospatial technology (GIS, remote sensing, GNSS) to solve problems.
    d. Apply principles of geography to projects (human-environment interaction, time-space geography, Tobler's First Law of Geography).
2. Create and/or acquire GIS data.
    a. Define the data requirements, research sources of available data, and purchase data from reputable source.
    b. Determine data compatibility (projection), perform data conversion, populate feature attributes.
3. Maintain GIS Data.
    a. Convert data between formats.
4. Conduct spatial/non-spatial analysis.
    a. Preprocess geographic data (generalize, subset).
    b. Perform geoprocessing through clipping, buffering, overlay, etc.
    c. Interpret data results.
    d. Develop SQL expressions and run queries.
5. Generate GIS products.
    a. Create printed cartographic output.
    b. Create analysis report.
    c. Create tables.
    d. Create charts.
    e. Distribute digital and hard copy products.
    f. Create 3D/4D representations.
6. Develop software applications.
    a. Create map templates for cartographic output.
7. Manage GIS data.
    a. Organize file structure (e.g. create directories, perform data and directory housekeeping).
8. Perform administrative tasks.
    a. Participate in GIS awareness events such as presentations, conferences and user groups.
    b. Apply a code of ethics to geospatial professionals.

    b. Create tables.
6. Develop software applications.
    a. Create map templates for cartographic output.
7. Manage GIS data.
    a. Organize file structure (e.g. create directories, perform data and directory housekeeping).
8. Perform administrative tasks.
    a. Create formal and informal communications using email, phone, listservs, social media, and written reports.
    b. Coordinate GIS projects including cost estimates, timelines, and budgets.
    c. Prepare and maintain contracts. Maintain equipment and office supplies.
    d. Provide internship supervision for students and new workers.
    e. Participate in GIS awareness events such as presentations, conferences and user groups.
    f. Apply a code of ethics to geospatial professionals.
9. Pursue professional development.
    a. Participate in professional conferences using both oral and written communications.
    b. Continue professional education through credit and/or noncredit courses, technical training and informal education, such as online courses.

A Requirement block where all subrequirements are required

take gisc-1402
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): GISC 1402

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the purpose of metadata; outline national and international data infrastructure and census data; summarize how to select and evaluate data according to source and quality; and collect and analyze metadata sets for a project. Formulate geographic-based database queries; establish an audit trail; use geographic information in decision making; design a data acquisition project; and utilize datums, coordinate systems, and mapping projections.

Upon successful completion of this course, students will:

1. Apply conceptual foundations for GIS tasks and projects.
    a. Think critically and spatially to analyze and evaluate patterns in places and time frames.
    b. Choose and apply appropriate map scales and coordinate systems.
    c. Apply geospatial technology (GIS, remote sensing, GNSS) to solve problems.
    d. Apply principles of geography to projects (human-environment interaction, time-space geography, Tobler's First Law of Geography).
2. Create and/or acquire GIS data.
    a. Define the data requirements, research sources of available data, and purchase data from reputable source.
    b. Develop (and document with metadata) database(s) including: defining geometry, attributes, relationships, topology rules, feature behaviors such as types and domains, incorporating data schema models.
    c. Determine data compatibility (projection), perform data conversion, populate feature attributes.
    d. Perform both COGO, and on screen digitization with attribution.
    e. Collect field attribute and location data via GPS (Tablet PC/PDA).
    f. Geocode data.
    g. Perform quality control (QC) and quality assurance (QA) of GIS databases.
3. Create image data.
    a. Scan hard copy images into digital format.
    b. Geo-reference digital imagery.
    c. Rectify images to meet data standards.
    d. constructing a valid query statement (1a, 1b, 2c).
4. Maintain GIS data.
    a. Develop procedures and schedules for data maintenance.
    b. Maintain data QA/QC through update operations: (add/delete/change).
    c. Convert data between formats.
    d. Perform database performance tuning through compression, indexing, etc.
5. Conduct spatial/non-spatial analysis.
    a. Interpret data results.
    b. Develop SQL expressions and run queries.
6. Generate GIS products.
    a. Create printed cartographic output.
    b. Create tables.
    c. Generate mailing labels, logos, posters, etc.
    d. Distribute digital and hard copy products.
    e. Create 3D/4D representations.
7. Develop software applications.
    a. Create map templates for cartographic output.
8. Manage GIS data.
    a. Establish data custodianship and distribute and assign database permissions according to organizational policies.
    b. Organize file structure (e.g. create directories, perform data and directory housekeeping).
    c. Perform data maintenance through archival functions.
9. Perform administrative tasks.
    a. Participate in GIS awareness events such as presentations, conferences and user groups.
    b. Apply a code of ethics to geospatial professionals.

GISC 2402 - GIS Design with Raster Analysis

A Requirement block where all subrequirements are required

Take GISC-1402
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s) or Corequisite(s): GISC 1402

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate proper operation of industry-standard software; create new tables; identify basic GIS concepts; and design map layouts. Use map scales, legends, and projections; identify classification methods; define continuous and discrete data types; and manipulate data in tables. Create graphs; describe topological data structures; design analysis projects; describe spatial relationships of near and far, inside/outside, and adjacent; use values to determine most/least and density; and discuss the importance of mapping change over time.

Upon successful completion of this course, students will:

1. Apply conceptual foundations for GIS tasks and projects.
    a. Think critically and spatially to analyze and evaluate patterns in places and time frames.
    b. Choose and apply appropriate map scales and coordinate systems.
    c. Apply geospatial technology (GIS, remote sensing, GNSS) to solve problems.
    d. Apply principles of geography to projects (human-environment interaction, time-space geography, Tobler's First Law of Geography).
2. Create and/or acquire GIS data.
    a. Define the data requirements, research sources of available data, and purchase data from reputable source.
    b. Determine data compatibility (projection), perform data conversion, populate feature attributes.
3. Maintain GIS data.
    a. Convert data between formats.
    b. Perform database performance tuning through compression, indexing, etc.
4. Conduct spatial/non-spatial analysis.
    a. Create analysis models through flowcharts and processes.
    b. Preprocess geographic data (generalize, subset).
    c. Perform geoprocessing through clipping, buffering, overlay, etc.
    d. Generate descriptive and spatial statistics.
    e. Perform quality control and assurance.
    f. Interpret data results.
    g. Develop SQL expressions and run queries.
5. Generate GIS products.
    a. Create printed cartographic output.
    b. Create analysis report.
    c. Create tables.
    d. Create charts.
    e. Distribute digital and hard copy products.
    f. Create 3D/4D representations.
6. Develop software applications.
    a. Create map templates for cartographic output.
7. Manage GIS data.
    a. Organize file structure (e.g. create directories, perform data and directory housekeeping).
8. Perform administrative tasks.
    a. Participate in GIS awareness events such as presentations, conferences and user groups.
    b. Apply a code of ethics to geospatial professionals.

GISC 2411 - Geographic Information Syst (GIS) App

General

Course Key
7809

Course Rubric	Course Number	Course Title
GISC	2411	Geographic Information Systems (GIS) Applications

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Application of GIS technology to real workplace applications from public and private sectors. Completion of Global Positioning Systems (GPS) fieldwork required for lab exercises.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Relate the use of GIS for infrastructure management; recognize the meaning of accuracy and precision in different applications; use GIS/GPS for infrastructure management; and complete a real world project. Create presentations of geographic information; reduce digital field data to produce final plans and reports; write technical reports which will accompany the presentation of the geographic information; and produce finished reports on various printers and plotters.

Upon successful completion of this course, students will:

1. Apply conceptual foundations for GIS tasks and projects.
    a. Think critically and spatially to analyze and evaluate patterns in places and time frames.
    b. Choose and apply appropriate map scales and coordinate systems.
    c. Apply geospatial technology (GIS, remote sensing, GNSS) to solve problems.
    d. Apply principles of geography to projects (human-environment interaction, time-space geography, Tobler's First Law of Geography).
2. Create and/or acquire GIS data.
    a. Define the data requirements, research sources of available data, and purchase data from reputable source.
    b. Determine data compatibility (projection), perform data conversion, populate feature attributes.
    c. Collect field attribute and location data via GPS (Tablet PC/PDA).
    d. Geocode data.
3. Maintain GIS data.
    a. Perform data layer updates and update metadata (imagery/themes).
    b. Convert data between formats.
4. Conduct spatial/non-spatial analysis.
    a. Create scripts.
    b. Interpret data results.
    c. Develop SQL expressions and run queries.
5. Generate GIS products.
    a. Create printed cartographic output.
    b. Create analysis report.
    c. Create tables.
    d. Generate mailing labels, logos, posters, etc.
    e. Distribute digital and hard copy products.
    f. Create 3D/4D representations.
6. Develop software applications.
    a. Define user software needs and determine application design format (hardware platform and programming language).
    b. Create customized software application solution.
    c. Create map templates for cartographic output.
    d. Perform quality control and assurance for applications, such as beta testing.
    e. Create help files and support documentation.
7. Manage GIS data.
    a. Establish data custodianship and distribute and assign database permissions according to organizational policies.
    b. Organize file structure (e.g. create directories, perform data and directory housekeeping).
8. Provide technical support.
    a. Resolve user technical problems.
    b. Assist in writing technical guides for GIS applications.
    c. Provide technical training for end-users.
9. Perform administrative tasks.
    a. Participate in GIS awareness events such as presentations, conferences and user groups.
    b. Apply a code of ethics to geospatial professionals.

GISC 2420 - Intermediate Geographic Info Systems

Course Rubric	Course Number	Course Title
GISC	2420	Intermediate Geographic Information Systems (GIS)

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). This course focuses on the study of spatial data structures and the display, manipulation, and analysis of geographic information. Students will study the technical aspects involved in spatial data handling, analysis and modeling. Instruction will include theories and procedures associated with the implementation and management of GIS projects. A variety of GIS software packages will be used in the laboratory. Required Prerequisite: GISC-1402

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): GISC 1402

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the terms, concepts, commands, and procedures of Geographic Information Systems software; import, generate and project spatial data sets; obtain spatial data from available sources; demonstrate topological editing; and develop tables, plots, and thematic map compositions.

Upon successful completion of this course, students will:

1. Apply conceptual foundations for GIS tasks and projects.
    a. Think critically and spatially to analyze and evaluate patterns in places and time frames.
    b. Choose and apply appropriate map scales and coordinate systems.
    c. Apply geospatial technology (GIS, remote sensing, GNSS) to solve problems.
    d. Apply principles of geography to projects (human-environment interaction, time-space geography, Tobler's First Law of Geography).
2. Create and/or acquire GIS data.
    a. Define the data requirements, research sources of available data, and purchase data from reputable source.
    b. Develop (and document with metadata) database(s) including: defining geometry, attributes, relationships, topology rules, feature behaviors such as types and domains, incorporating data schema models.
    c. Determine data compatibility (projection), perform data conversion, populate feature attributes.
    d. Perform quality control (QC) and quality assurance (QA) of GIS databases.
3. Maintain GIS data.
    a. Develop procedures and schedules for data maintenance.
    b. Maintain data QA/QC through update operations: (add/delete/change).
    c. Convert data between formats.
    d. Perform database performance tuning through compression, indexing, etc.
4. Conduct spatial/non-spatial analysis.
    a. Perform quality control and assurance.
    b. Interpret data results.
    c. Develop SQL expressions and run queries.
5. Generate GIS products.
    a. Create printed cartographic output.
    b. Create tables.
    c. Distribute digital and hard copy products.
6. Develop software applications.
    a. Create map templates for cartographic output.
7. Manage GIS data.
    a. Establish data custodianship and distribute and assign database permissions according to organizational policies.
    b. Organize file structure (e.g. create directories, perform data and directory housekeeping).
8. Provide technical support.
    a. Resolve user technical problems.
    b. Assist in writing technical guides for GIS applications.
    c. Provide technical training for end-users.
9. Perform administrative tasks.
    a. Participate in GIS awareness events such as presentations, conferences and user groups.
    b. Apply a code of ethics to geospatial professionals.
10. Pursue professional development.
    a. Participate in professional conferences using both oral and written communications.
    b. Continue professional education through credit and/or noncredit courses, technical training and informal education, such as online courses.

GISC 2435 - Programming for GIS

HALT 1301 - Principles of Horticulture

General

Course Key
857

Course Rubric	Course Number	Course Title
HALT	1301	Principles of Horticulture

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	1

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-1). An overview of the horticulture industry, plant science, terminology, classification, propagation, environmental responses, and careers and opportunities in the field of horticulture.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the fundamentals of plant science; explain the effect of environmental factors on plant growth; contrast the methods of plant production; and identify the various facets of the horticulture industry and career opportunities.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the relationship of agriculture and horticulture by
    a. listing the various fields of agriculture and horticulture (1a);
    b. listing career opportunities in the horticulture field (1a);
    c. explaining the relationship of agriculture, horticulture, botany, and the other sciences (1b).
2. Demonstrate an understanding of the classification of plants by
    a. listing the taxonomic units of the binomial system of nomenclature (1b);
    b. defining the taxonomic units of the binomial system of nomenclature (1b);
    c. applying the binomial system of nomenclature (1b, 2c).
3. Demonstrate an understanding of plant anatomy by
    a. listing plant cells and tissues (1b);
    b. explaining functions of plant cells and tissues (1b);
    c. identifying plant cells and tissues (1b, 2c).
4. Demonstrate an understanding of plant morphology by
    a. listing plant morphological structures (1b);
    b. explaining function(s) of morphological structures (1b);
    c. identifying plant morphological structures (2c).
5. Demonstrate an understanding of basic plant growth and development by
    a. listing functions of growth and development (1b);
    b. explaining functions of growth and development (1b);
    c. explaining the manipulation of growth and development (1b, 2c).
6. Demonstrate an understanding of how light affects plant growth by
    a. listing the factors of light that affect plant growth (1b);
    b. explaining how light affects plant growth (1b);
    c. explaining the manipulation of light to maximize plant growth (1b, 2c).
7. Demonstrate an understanding of how temperature affects plant growth by
    a. listing factors of temperature that affect plant growth (1b);
    b. explaining how temperature affects plant growth (1b);
    c. explaining manipulation of temperature to maximize plant growth (1b, 2c).
8. Demonstrate an understanding of how water affects plant growth by
    a. listing the factors of water that affect plant growth (1b);
    b. explaining the effects of water on plant growth (1b);
    c. explaining the manipulation of water to maximize plant growth (1b, 2c).
9. Demonstrate an understanding of how mineral nutrients affect plant growth by
    a. listing essential nutrients (1b);
    b. explaining functions of elements (1b);
    c. explaining effects of pH on plant nutrition (1b);
    d. explaining how nitrogen reacts in the soil and in plants (1b).
10. Demonstrate an understanding of the importance of soil on plant growth by
    a. listing the various factors of soils (1b);
    b. explaining the factors of soils (1b);
    c. explaining the modification of soils (1b, 2c).
11. Demonstrate an understanding of fertilizers by
    a. listing properties of fertilizers (1b);
    b. listing fertilizer application methods (1b);
    c. explaining fertilizer usage (1b);
    d. calculating fertilizer application rates (1b, 2c).

Type
Prerequisite

10
A Requirement block where all subrequirements are required

take halt-1301;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify herbaceous plants at various growth stages; explain methods used to propagate herbaceous plants; and describe the cultural requirements for care and use of herbaceous plants.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Recognize herbaceous plants by
    a. identifying plant families (2c);
    b. identifying plants by scientific names (2c);
    c. identifying plants by common names (2c).
2. Demonstrate an understanding of seed germination by
    a. explaining seed germination (1b);
    b. comparing germination methods (1b);
    c. calculating seed requirements (1b, 2c);
    d. identifying germination requirements (2c);
    e. preparing seeds for germination (2c, 2e);
    f. sowing seeds (2b, 2c, 2e).
3. Demonstrate an understanding of herbaceous plant production by
    a. explaining transplanting procedures (1b);
    b. explaining production procedures (1b);
    c. comparing production methods (1b, 2c);
    d. transplanting seedlings and plugs (2c, 2e);
    e. labeling plants (2b, 2c, 2e);
    f. producing crop(s) (2b, 2c, 2e).
4. Apply knowledge of herbaceous plants by
    a. explaining cultural requirements (1b);
    b. explaining plant habits (1b);
    c. explaining plant uses (1b);
    d. suggesting plants to clients (1b).
5. Demonstrate an understanding of plant problems by
    a. listing plant problems (1a);
    b. explaining causes (1b);
    c. explaining solutions (1b, 2c).
6. Demonstrate an understanding of the marketing of bedding plants by
    a. listing outlet types (1a);
    b. explaining marketing methods (1b);
    c. marketing bedding plants (1b, 2a, 2b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate between biotic diseases and abiotic disorders; identify common plant disease symptoms; and recommend disease control measures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the historical and economic impact of plant diseases by
    a. listing plant disease epidemics of great significance (1a, 1b);
    b. explaining the historical and sociological impact of major plant disease epidemics (2c, 2d);
    c. explaining the historical and current economic impacts of plant diseases (2c, 2d).
2. Use plant pathology terminology properly by
    a. explaining plant disease (2c);
    b. defining plant pathology terms (2c);
    c. explaining plant pathology concepts (2c).
3. Recognize plant diseases by
    a. differentiating between pathogenic and nonpathogenic plant diseases (1b, 2c);
    b. explaining plant disease damage (2c);
    c. describing plant disease symptoms (1b);
    d. recognizing plant disease symptoms (1b, 2c);
    e. listing common names of plant diseases (1a, 1b).
4. Recognize plant pathogens by
    a. distinguishing among plant pathogens (1b, 2c);
    b. explaining plant pathogen life cycles (2c);
    c. recognizing plant pathogen structures (1b, 2c);
    d. explaining dissemination methods (2c);
    e. explaining penetration and infection methods (2c);
    f. listing scientific names of pathogens causing plant diseases (1a, 1b).
5. Recommend control measures for plant diseases by
    a. listing control measures (1a, 1b);
    b. explaining sanitation methods (2c);
    c. explaining cultural control methods (2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify interior plants; develop care methods for specific plants; and identify production methods of interior plants.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the cultural requirements of plants in the interior environment by
    a. listing the light requirements for growing and maintaining plants (1b, 2c, 2d);
    b. listing the water requirements for growing and maintaining plants (1b, 2c, 2d);
    c. listing the temperature requirements for growing and maintaining plants (1b, 2c, 2d).
2. Demonstrate an understanding of methods of modifying the environment to accommodate the growth and maintenance of plants in the interior by
    a. measuring the light levels in interior environments (1b, 2c, 2e);
    b. measuring moisture levels of container media (1b, 2c, 2e);
    c. explaining the characteristics of container media (1b, 2c, 2d).
3. Demonstrate knowledge of pests of interior plants by
    a. identifying common insect pests (1b, 2c, 2d);
    b. identifying common diseases (1b, 2c, 2d);
    c. recommending control measures (1b, 2c, 2d, 2e).
4. Apply knowledge of plant taxonomy by
    a. identifying plant families (1b, 2c);
    b. identifying plant genera (1b, 2c);
    c. identifying plant species (1b, 2c).
5. Perform plant identifications by
    a. examining plant specimens (1b, 2c);
    b. identifying plant specimens using scientific and common names (1b, 2c);
    c. writing, spelling, and pronouncing plant scientific and common names (1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify shrubs, vines, and groundcovers in various growth stages; describe morphological, anatomical, or other botanical features; and explain the cultural requirements of shrubs, vines, and groundcovers.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of plant anatomy by
    a. listing anatomical features of plants (1b);
    b. explaining the functions of plant tissues (1b);
    c. identifying anatomical regions of plants (2c).
2. Demonstrate an understanding of plant morphology by
    a. listing plant morphological structures (1b);
    b. explaining function(s) of plant morphological structures (1b);
    c. identifying plant morphological structures (2c).
3. Apply knowledge of plant taxonomy by
    a. identifying plant families (2c);
    b. identifying plant genera (2c);
    c. identifying plant species (2c).
4. Perform plant identifications by
    a. examining plant specimens (2c);
    b. identifying plant specimens using scientific and common names (2c);
    c. demonstrating correct writing, spelling, and pronunciation of plant scientific and common names (2c).
5. Describe the use of plants in the landscape by
    a. listing the physical features (1b, 2c);
    b. listing the aesthetic properties (1b, 2c);
    c. explaining the cultural requirements (1b, 2c);
    d. explaining pest susceptibility and resistance (1b, 2c).
6. Recommend plants for various landscape situations by
    a. selecting drought tolerant plants (1b, 2c);
    b. selecting native plants (1b, 2c);
    c. selecting adapted plants (1b, 2c);
    d. selecting pest resistant plants (1b, 2c);
    e. selecting dwarf and other plants suited to small landscapes (1b, 2c);
    f. selecting plants with desired aesthetic characteristics (1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Recognize insect morphological and anatomical features; classify insects; and describe methods for controlling insect pests based on entomological principles.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the importance of insects in the human endeavor by
    a. listing the harmful effects of insects (1a, 1b);
    b. listing the benefits of insects (1a, 1b);
    c. explaining why insects have been the most successful life form on earth (2c, 2d).
2. Recognize insect body structures by
    a. identifying external insect body structures (1b, 2c, 2d);
    b. explaining the functions of external body structures (1b, 2c, 2d);
    c. identifying internal body structures (1b, 2c, 2d);
    d. explaining the functions of internal structures (1b, 2c, 2d).
3. Demonstrate an understanding of the life cycles of insects by
    a. listing the types of metamorphosis (1a, 1b);
    b. explaining the types of metamorphosis (1b, 2c);
    c. classifying insects according to metamorphosis (1b, 2c, 2d).
4. Utilize taxonomy by
    a. listing arthropod characteristics (1a, 1b);
    b. identifying arthropod classes (1b, 2c, 2d);
    c. identifying entomologically important molluscans (1b, 2c, 2d);
    d. identifying arachnid orders (1b, 2c, 2d);
    e. identifying insect orders (1b, 2c, 2d);
    f. classifying insects as beneficial or destructive (1b, 2c, 2d).
5. Apply knowledge of entomology by
    a. collecting insects (1b, 1c, 2a, 2c, 2e);
    b. assembling a proper insect collection (1b, 1c, 2a, 2c, 2e);
    c. identifying insects (1b, 2c, 2d);
    d. using entomological terminology properly (1b, 2c).
6. Demonstrate an understanding of insect control methods by
    a. listing insect control methods (1a, 1b);
    b. listing Integrated Pest Management (IPM) methods (1b);
    c. defining IPM terminology (1b, 2c, 2d, 2e);
    d. explaining IPM methods (1b, 2c, 2d, 2e).

HALT

Course Number
1324

Course Title
Turfgrass Science and Management

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A survey of various species of warm and cool season grasses, including their uses, application, adaptability, environmental tolerances, anatomy, and physiological responses.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss turfgrass quality, selection, and adaptation; describe cultural practices of major cool and warm season turfgrasses; and examine turfgrass responses to different environmental conditions.

Upon successful completion of this course, students will:

1. Describe Turfgrass Species and Adaptability by
    a. Identifying major warm-season and cool-season turfgrass species by morphological and visual characteristics. (1b)
    b. Evaluating species adaptability to different soils, climates, and site conditions. (1b)
2. Demonstrate an understanding of Turfgrass Anatomy and Physiology by
    a. Describing the structures and functions of roots, stems, leaves, rhizomes, stolons, and seedheads. (1a)
    b. Explaining growth cycles and turfgrass physiological responses to stress such as drought, shade, temperature extremes, and traffic. (1a)
3. Demonstrate and understanding of Turfgrass Cultural Practices by
    a. Applying proper mowing practices, including recommended cutting heights for common turf species. (2e)
    b. Developing irrigation schedules using evapotranspiration data and species requirements. (2d)
    c. Preparing fertilization programs that account for nutrient needs, seasonal timing, and environmental impact. (2c)
4. Implement Integrated Turfgrass Management by
    a. Identifying common turfgrass pests, diseases, and weeds, and appropriate control strategies. (1a)
    b. Applying Integrated Pest Management (IPM) principles in turfgrass maintenance planning. (1b)
    c. Assessing soil compaction and recommended aeration and top-dressing methods. (2c)
5. Prioritize Environmental Stewardship by
    a. Proposing sustainable turfgrass practices that reduce water consumption, minimize chemical inputs, and enhance soil health. (2c)
    b. Evaluating case studies in golf courses, athletic fields, and residential or commercial landscapes. (2c)
6. Demonstrate Laboratory and Field Competencies by
    a. Collecting, preparing, and analyzing soil and turf samples for nutrient and pest diagnosis. (2c)
    b. Safely operating turfgrass maintenance equipment in lab or field settings. (2e)
    c. Preparing field reports with observations, problem diagnosis, and recommended management actions. (1b)
7. Communicate Effectively and Professionally by
    a. Producing written reports and delivering oral presentations on turfgrass management topics. (1a)
    b. Working collaboratively in field/lab teams and demonstrating professionalism in academic and applied settings. (1c)

HALT 1333 - Landscape Irrigation

General

Course Key
9602

Course Rubric	Course Number	Course Title
HALT	1333	Landscape Irrigation

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Coverage of irrigation systems including equipment, design, performance, and maintenance. Topics include residential and small business applications, troubleshooting, repair, and technological advances in irrigation systems.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the basic installation techniques used to install an irrigation system; discuss the separation of zones for turf areas, shrubs, groundcovers, and other plant groups; and prepare a design for an irrigation system.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the historical and current importance of landscape irrigation by
    a. describing past developments in irrigation (1a, 1b);
    b. explaining the significance of past developments on current systems and practices (1a, 1b).
2. Recognize the fundamentals of landscape irrigation by
    a. defining and using irrigation terminology (1b, 2c, 2d);
    b. listing local, state, and federal rules and laws regulating the irrigation industry in Texas (1b, 2c, 2d);
    c. calculating basic irrigation functions such as: flow rates, friction losses, pressure, pipe sizing, application rates, infiltration rates, percolation rates, etc. (1b, 2c, 2d, 2e).
3. Demonstrate knowledge of irrigation system components by
    a. identifying basic irrigation system components (1b, 2c, 2d);
    b. describing the function(s) of basic irrigation components (1b, 2c);
    c. identifying basic drip irrigation system components (1b, 2c, 2d);
    d. describing the function(s) of drip irrigation components (1b, 2c).
4. Recognize the importance of backflow mitigation by
    a. describing the functions of backflow prevention devices (1b, 2c);
    b. explaining the importance of backflow prevention (1b, 2c, 2d);
    c. explaining the legal requirements for backflow prevention (1b, 2c, 2d);
    d. choosing proper backflow prevention devices for various situations (1b, 2c, 2d).
5. Design irrigation systems by
    a. choosing and placing sprinkler heads, choosing and placing proper size pipes, calculating flow rates, dividing system into zones, placing valves, specifying controller unit and backflow prevention, and other components to complete a residential irrigation system (1b, 1c, 2a, 2c, 2e);
    b. selecting and incorporating drip irrigation components into a system design (1b, 1c, 2a, 2c, 2e).
6. Install irrigation system components by
    a. operating tools and equipment commonly used to install irrigation systems (1b, 2c);
    b. placing and connecting components into a working irrigation system (1b, 2c).
7. Comprehend proper irrigation scheduling by
    a. explaining methods of scheduling irrigation times and lengths (1b, 2c, 2d);
    b. explaining the functions of various equipment used in scheduling and controlling irrigation times and durations (1b, 2c, 2d).
8. Demonstrate a working knowledge of the practice of landscape irrigation by
    a. describing the legal requirements for practicing landscape irrigation in Texas (1a, 1b, 2d);
    b. describing the procedures for obtaining an irrigator's license in Texas (1a, 1b).

HALT 1353 - Landscape Computer Design

39

Course Rubric	Course Number	Course Title
HALT	1353	Landscape Computer Design

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). A course in computer-aided landscape design. Emphasis on the application of design concepts and techniques using software.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design landscape plans using computer software programs; and generate a report of all hardscape and softscape materials used in the design.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Manipulate CAD drawing settings by
    a. starting various CAD software (1b, 2c, 2e);
    b. setting drawing limits (1b, 2c, 2e);
    c. setting drawing units (1b, 2c, 2e);
    d. creating layers (1b, 2c, 2e);
    e. manipulating layers (1b, 2c, 2e);
    f. calculating scales (1b, 1c, 2e).
2. Manipulate CAD drawing views by
    a. dividing the monitor screen into viewports (1b, 2c, 2e);
    b. creating views, plan views, display 3D views, and employ User Coordinate Systems (UCS) (1b, 2c, 2e);
    c. saving views, plan views, display 3D views, and employ User Coordinate Systems (UCS) (1b, 2c, 2e).
3. Create 3D objects by
    a. drawing 3D primitives (1b, 2c, 2e);
    b. modifying 3D primitives (1b, 2c, 2e);
    c. creating 3D objects (1b, 2c, 2e).
4. Work with blocks by
    a. creating blocks (1b, 2c, 2e);
    b. inserting blocks (1b, 2c, 2e);
    c. using external references (1b, 2c, 2e).
5. Create a 3D landscape design by
    a. creating a landscape design (1b, 2a, 2c, 2d, 2e);
    b. performing advanced routines using CAD software (1b, 2c, 2e);
    c. performing a quantity takeoff (1b, 2a, 2c, 2d, 2e);
    d. performing shading and rendering of the drawing (1b, 2c, 2e);
    e. altering drawing to reflect the growth of plants (1b, 2c, 2e);
    f. plotting in model and paper space (1b, 2c, 2e).
6. Work with imaging software by
    a. importing photos of landscape projects (1b, 2c, 2e);
    b. altering photos of landscape projects (1b, 2c, 2e);
    c. designing a landscape image from photos (1b, 2a, 2c, 2d, 2e);
    d. performing advanced routines (1b, 2c, 2e).

Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate procedures utilized in the development of a landscape plan; develop a landscape design; and perform a site analysis and incorporate the information into the final design.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the landscape design profession by
    a. explaining the need (1b);
    b. listing the various professions (1b);
    c. comparing the educational requirements, licensing, and duties of the various professions (2c).
2. Demonstrate an understanding of the measurement of angles by
    a. distinguishing acute, right, obtuse, and straight (1b);
    b. measuring angles with a protractor (1b);
    c. explaining the measurement of angles using CAD software (1b, 2c);
    d. measuring using CAD software (2e).
3. Demonstrate an understanding of the use of scales by
    a. selecting the proper scale (2e);
    b. measuring the length and width of objects (2c, 2e);
    c. measuring the diameter and radius of circles (2c, 2e).
4. Perform basic takeoffs from landscape designs by
    a. identifying basic geometric shapes (2c);
    b. calculating perimeter, area, and circumference of basic geometric shapes (1b, 2c);
    c. calculating the volume of basic geometric shapes (1b, 2c);
    d. calculating edging, mulch, media, and sod required (1b, 2c).
5. Demonstrate knowledge of the family inventory by
    a. explaining the need (1b);
    b. listing the information (2c);
    c. compiling a family inventory (2c).
6. Demonstrate knowledge of a site analysis by
    a. explaining the need (1b);
    b. listing the information (2c);
    c. conducting a site analysis (2c).
7. Demonstrate knowledge of contour lines and topography by
    a. listing the rules (1b);
    b. identifying topographic features (1b, 2c);
    c. explaining the effect of topography (1b);
    d. calculating slope ratio and percent slope (2c);
    e. drawing topographic profiles (2c).
8. Demonstrate knowledge of landscape design plants by
    a. listing the necessary information (1b);
    b. interpreting symbols used (1b, 2c);
    c. calculating the information (2c).
9. Demonstrate knowledge of the principles of landscape design by
    a. defining the various principles (1b);
    b. explaining the design principles (1b);
    c. integrating the design principles (1b, 2c).
10. Demonstrate knowledge of the outdoor room principles by
    a. listing the outdoor rooms (1b);
    b. explaining the components and functions (1b);
    c. designing outdoor rooms (1b, 2a, 2c).
11. Demonstrate knowledge of plan materials in landscape design by
    a. listing the characteristics of plants (1b);
    b. explaining how to properly integrate (1b);
    c. incorporating plant materials (1b, 2a, 2c).
12. Demonstrate knowledge of hardscape materials by
    a. listing the characteristics (1b);
    b. integrating hardscape materials (1b, 2c);
    c. designing outdoor stairs (1b, 2c).
13. Demonstrate knowledge of water conservation in the landscape by
    a. defining xeriscape (1b);
    b. explaining different methods (1b, 2c);
    c. integrating different methods (1b, 2a, 2c).
14. Demonstrate knowledge of how to reduce energy consumption through landscape by
    a. listing different methods (1b);
    b. explaining different methods (1b, 2c);
    c. incorporating different methods (1b, 2c).
15. Demonstrate knowledge of computer systems and CAD software by
    a. knowing the basic commands (2c);
    b. creating drawings (1b, 2c, 2e);
    c. drawing landscape designs (2a, 2c, 2e);
    d. annotating landscape designs (1b, 2c, 2e);
    e. using proper design elements (1b, 2c).

HALT 2301 - Arboriculture

General

Course Key
54

Course Rubric	Course Number	Course Title
HALT	2301	Arboriculture

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). Fundamentals of woody plant physiology and growth including techniques and procedures utilized in making sound tree care decisions related to growth pest, and disease control. Topics include design principles of planning and maintenance for city streets, parks, and commercial and residential properties. Recommended Prerequisite: HALT-1301

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply woody plant physiology and growth to tree management and planting decisions; identify tree growth, insect and disease problems; establish a tree fertilization and pruning program; and analyze the site conditions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the principles of arboriculture by
    a. defining terms used in arboriculture (1a, 1b);
    b. explaining environmental contributions and benefits of trees in the landscape (1a, 1b, 2c);
    c. explaining the rules of arboriculture (1a, 1b, 2c).
2. Demonstrate knowledge of tree physiology by
    a. explaining the mechanisms involved in tree growth (1a, 1b, 2c);
    b. describing tree root growth processes (1a, 1b, 2c);
    c. describing the functions of anatomical and morphological structures of trees (1a, 1b, 2c);
    d. explaining the effects of wounding and tree responses (1a, 1b, 2c, 2d);
    e. explaining the effects of environmental factors on tree growth and development (1a, 1b, 2c, 2d).
3. Demonstrate knowledge of industry standards of tree establishment by
    a. explaining proper selection of tree species to fit various planting environments (1a, 1b, 2c, 2d);
    b. describing methods to properly prepare a planting site (1a, 1b, 2c, 2d);
    c. performing proper planting techniques (1a, 1b, 2c, 2d, 2e);
    d. explaining proper watering techniques (1a, 1b, 2c, 2d);
    e. describing proper tree fertilization strategies (1a, 1b, 2c, 2d).
4. Demonstrate knowledge of tree maintenance by
    a. describing proper pruning practices (1a, 1b, 2c, 2d);
    b. identifying tools used in tree care (1a, 1b, 2c, 2d);
    c. demonstrating proper pruning techniques (1a, 1b, 2c, 2d, 2e);
    d. explaining tree cabling procedures (1a, 1b, 2c, 2d);
    e. describing tree safety and climbing techniques (1a, 1b, 2c, 2d);
    f. tying knots commonly used in climbing (1a, 1b, 2c, 2d, 2e);
    g. using ropes and climbing equipment safely (1a, 1b, 2c, 2d, 2e);
    h. describing methods of protecting trees from lightning and other hazards (1a, 1b, 2c, 2d).
5. Demonstrate an understanding of pathological, physiological, entomological, and environmental problems of trees by
    a. identifying tree problems (1a, 1b, 2c, 2d);
    b. listing control options for tree problems (1a, 1b, 2a, 2c, 2d, 2e);
    c. recommending control options for tree problems (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing diagnostic procedures (1a, 1b, 2c, 2d).
6. Perform tree evaluations by
    a. calculating tree appraisals and evaluations (1a, 1b, 2a, 2c, 2d, 2e);
    b. making tree hazard assessments (1a, 1b, 2a, 2c, 2d, 2e);
    c. performing a tree inventory (1a, 1b, 2a, 2c, 2d, 2e).

HALT 2307 - Horticultural Food Crops

General

Course Key
14421

Course Rubric	Course Number	Course Title
HALT	2307	Horticultural Food Crops

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A study of commercial and home cultivated food crops including various vegetables, fruits, and nuts. Topics address planting, maintenance, harvest, and storage of the various crops.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Implement a plan to design and plant a vegetable garden or small fruit orchard; organize a schedule to cultivate, fertilize, water, and harvest the garden or orchard; and discuss various types of gardens and their applications in both commercial and residential settings.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the current and historical importance of horticulture food crops by
    a. listing types of horticultural food crops (1a);
    b. distinguishing characteristics of horticulture food crops from other food crops (1a);
    c. explaining the significance of sustainable horticultural food crop production in both local and global contexts (1b).
2. Demonstrate knowledge of crops for food production by
    a. listing and describing vegetable crops and associated families (1b);
    b. listing and describing tree fruit/nut crops (1b);
    c. listing and describing other horticulture food crops (1b, 2c).
3. Demonstrate an understanding of food crop production systems by
    a. distinguishing production systems of both residential and commercial scales (1b);
    b. explaining fundamentals of site selection and establishment for food crops (1b);
    c. surveying various food crop growing systems and techniques (1b, 2c).
4. Demonstrate an understanding of vegetable production practices by
    a. recognizing specific cultural requirements of vegetable crops (1b);
    b. demonstrating hands-on production skills by growing vegetable crops from seed to harvest (1b);
    c. developing deeper understanding of vegetable production by engaging in field trips, case studies, and grower/farmer profiles (2c);
    d. understanding specific vegetable crops by family grouping (2c).
5. Demonstrate an understanding of fruit/nut production practices by
    a. recognizing specific cultural requirements of fruit/nut crops (1b);
    b. demonstrating hands-on production skills by growing fruit/nut crops (1b);
    c. developing deeper understanding of fruit/nut production by field trips, case studies, and grower/farmer profiles (2c);
    d. understanding specific fruit/nut crops (2c).
6. Demonstrate crop planning and informed decision-making by
    a. conducting real world site assessments and proper crop selection and placement (1b);
    b. designing garden and/or farm site, crop selection, establishment, cultivation, production plan, and rotation for multi-year hobby, homestead, and/or commercial use operation (1b);
    c. presenting farm/garden design to peers and experienced growers for discussion and constructive feedback (1b, 2c).
7. Demonstrate an understanding of sustainable soil/crop management by
    a. understanding soil health concerns and soil management options (1b);
    b. demonstrating ability to utilize soil/site characteristics to guide crop selection, planning, and establishment (1b);
    c. using proper irrigation, fertilization, tillage, pruning, pest and disease management, and other appropriate cultural practices (1b, 2c).
8. Demonstrate an understanding of current trends/sociological impacts by
    a. listing ways that food production is valued in society (1b);
    b. understanding the direct/indirect benefits of growing food crops (1b);
    c. explaining the increased demand for local food crop production (1b, 2c).
9. Demonstrate proper understanding of successful harvest and post-harvest practices for horticulture food crops by
    a. recognizing proper harvest timing and techniques (1b);
    b. understanding best practices for storage of various crops after harvest (1b);
    c. understanding post-harvest options for food crops such as fresh use, dried use, canning, fermentation, pickling, culinary uses, etc. (1b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare and select architectural styles and materials for greenhouse construction; calculate heating, cooling, and light requirements and select appropriate equipment; and identify cultural and business methods necessary for crop production.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the greenhouse industry by
    a. listing historical developments of greenhouses and the industry (1b, 2c);
    b. explaining past developments in the industry (1b, 2c, 2d);
    c. explaining current developments and future trends in the greenhouse industry (1b, 2c, 2d).
2. Demonstrate an understanding of greenhouse architecture by
    a. identifying greenhouse architectural styles (1b, 2c, 2e);
    b. explaining the advantages and disadvantages of greenhouse styles (1b, 2c, 2e);
    c. identifying greenhouse structural members (1b, 2c, 2e);
    d. explaining the advantages and disadvantages of framework materials (1b, 2c, 2e);
    e. identifying greenhouse glazing materials (1b, 2c, 2e);
    f. explaining the advantages and disadvantages of glazing materials (1b, 2c, 2e).
3. Demonstrate knowledge of growing systems by
    a. identifying different bench and growing systems (1b, 2c, 2e);
    b. explaining the advantages and disadvantages of different bench and growing systems (1b, 2c, 2e);
    c. identifying container types and materials (1b, 2c, 2e);
    d. calculating container volume (1b, 2c, 2e);
    e. calculating the spacing of containers (1b, 2c, 2e).
4. Demonstrate knowledge of greenhouse heating systems by
    a. comparing the advantages and disadvantages of various fuels (1b, 2c, 2e);
    b. identifying heating systems and equipment (1b, 2c, 2e);
    c. calculating heat requirements (1b, 2c, 2e);
    d. designing heating systems (1b, 2a, 2c, 2d, 2e);
    e. pricing heating systems (1b, 2a, 2c, 2d, 2e);
    f. explaining energy conservation methods (1b, 2c, 2e).
5. Demonstrate knowledge of greenhouse cooling systems by
    a. identifying cooling systems and equipment (1b, 2c, 2e);
    b. calculating cooling requirements (1b, 2c, 2e);
    c. designing cooling systems (1b, 2a, 2c, 2d, 2e);
    d. pricing cooling systems (1b, 2a, 2c, 2d, 2e);
    e. explaining light modification methods (1b, 2c, 2e).
6. Demonstrate understanding of growth media by
    a. listing media components and their properties (1b, 2c, 2e);
    b. comparing the advantages and disadvantages of media components (1b, 2c, 2e);
    c. comparing growing media preparation methods (1b, 2c, 2e).
7. Describe greenhouse irrigation practices by
    a. comparing water sources (1b, 2c, 2e);
    b. interpreting water quality analysis (1b, 2c, 2e);
    c. comparing irrigation equipment and methods (1b, 2c, 2e).
8. Demonstrate knowledge of plant growth manipulation by
    a. comparing fertilization methods (1b, 2c, 2e);
    b. identifying fertilization equipment (1b, 2c, 2e);
    c. calculating fertilizer formulations and analysis (1b, 2c, 2e);
    d. calculating fertilizer dilution rates (1b, 2c, 2e);
    e. explaining the advantages and disadvantages of carbon dioxide enrichment (1b, 2c, 2e);
    f. explaining methods of carbon dioxide enrichment (1b, 2c, 2e);
    g. explaining plant growth regulator use (1b, 2c, 2e).
9. Demonstrate knowledge of business practices related to greenhouse production by
    a. explaining direct and indirect costs of production (1b, 2c, 2d);
    b. explaining labor costs (1b, 2c, 2d);
    c. explaining profit margins (1b, 2c, 2d);
    d. calculating production costs (1b, 2a, 2c, 2d, 2e);
    e. calculating prices (1b, 2a, 2c, 2d, 2e);
    f. calculating profits (1b, 2a, 2c, 2d, 2e);
    g. producing a crop (1b, 2a, 2c, 2d, 2e).

HALT 2314 - Plant Propagation

General

10
A Requirement block where all subrequirements are required

take halt-1301;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate propagation methods; manipulate propagation environments; and explain sexual and asexual reproduction processes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the theories and physiology of plant propagation through sexual methods by
    a. defining sexual plant propagation terminology (1a, 1b);
    b. explaining sexual reproduction processes (1b, 2c);
    c. explaining physical, chemical, environmental, and physiological factors of seed dormancy (1b, 2c);
    d. explaining chemical and physiological processes of germination (1b, 2c);
    e. explaining environmental factors involved in germination (1b, 2c).
2. Apply the methodologies of sexual plant propagation by
    a. explaining seed storage methods (1b, 2a, 2c, 2d);
    b. explaining seed testing processes (1b, 2a, 2c, 2d);
    c. explaining methods of breaking seed dormancies (1b, 2a, 2c, 2d);
    d. applying various seed treatments (1b, 2a, 2b, 2c, 2d, 2e);
    e. propagating plants through sexual methods (1b, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate an understanding of the theories and processes of plant propagation through asexual methods by
    a. defining asexual plant propagation terminology (1a, 1b);
    b. explaining the processes and theories of asexual propagation (1b, 2c);
    c. explaining the physiological, chemical, environmental, and physical factors involved in asexual propagation (1b, 2c).
4. Apply the methodologies of asexual plant propagation by
    a. describing methods of asexual propagation using cuttings, grafting, budding, layering, division, and tissue culture (1b, 2a, 2c, 2d);
    b. calculating dilution rates of various chemicals used in plant propagation (1b, 2c, 2d, 2e);
    c. propagating plants using asexual methods such as cuttings, grafting, budding, division, layering, and tissue culture (1b, 2a, 2b, 2c, 2d, 2e).

Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform techniques used for lawn installations, planting, and construction related to landscape maintenance; demonstrate proper lawn and landscape maintenance practices; and demonstrate proper pruning techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the theories and practices in the utilization of grasses in the landscape by
    a. defining terminology related to turfgrass (1a, 1b);
    b. identifying morphological features of grasses (1a, 1b, 2c, 2d);
    c. utilizing scientific and common names of grasses commonly used in the landscape (1a, 1b, 2c, 2d);
    d. identifying commonly used grass species (1a, 1b, 2c, 2d);
    e. describing the characteristics of commonly used grasses (2c, 2d);
    f. explaining methods used to establish grasses in the landscape (2c, 2d, 2e);
    g. explaining mowing methods (2c, 2d, 2e);
    h. explaining turfgrass renovation methods (2c, 2d, 2e);
    i. describing irrigation techniques (2c, 2d, 2e).
2. Demonstrate an understanding of the theories and practices in the utilization of trees and shrubs in the landscape by
    a. defining terminology related to trees and shrubs (1a, 1b);
    b. explaining planting practices related to trees and shrubs (2c, 2d, 2e);
    c. describing proper pruning methods (2c, 2d, 2e);
    d. identifying tools used in pruning (2c, 2d, 2e);
    e. demonstrating proper pruning methods (2a, 2c, 2d, 2e);
    f. explaining safe pruning procedures (2c, 2d, 2e).
3. Demonstrate knowledge of proper fertilization of plants in the landscape by
    a. explaining methods of fertilizing turfgrass (2c, 2d, 2e);
    b. explaining methods of fertilizing trees and shrubs (2c, 2d, 2e);
    c. calculating fertilization rates (2a, 2c, 2d, 2e);
    d. calibrating fertilizer application equipment (2a, 2c, 2d, 2e).
4. Demonstrate knowledge of irrigation practices in the landscape by
    a. describing proper irrigation methods (2c, 2d, 2e);
    b. identifying irrigation equipment (2c, 2d, 2e);
    c. explaining xeriscape principles and methods (2c, 2d, 2e).

5. Demonstrate knowledge of problems in the landscape by
    a. identifying common weeds (2c, 2d, 2e);
    b. describing common disease problems (2c, 2d, 2e);
    c. describing common pests of plants in the landscape (2c, 2d, 2e);
    d. recommending controls for pests in the landscape (2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the functions of essential elements in plants; calculate fertilizer requirements; specify fertilizer application rates; and list various fertilizer materials available for use on horticultural plants.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize fertilizer terminology by
    a. defining fertilizer terms (1b, 2c);
    b. explaining fertilizer terms (1b, 2c);
    c. explaining fertilizer chemistry (1b, 2c).
2. Demonstrate an understanding of plant nutrition by
    a. listing the elements essential to plant growth (1b, 2c);
    b. explaining the function of essential nutrients in plant nutrition (1b, 2c);
    c. describing plant nutrient deficiency symptoms (1b, 2c);
    d. describing plant nutrient toxicity symptoms (1b, 2c);
    e. describing factors affecting plant nutrient availability (1b, 2c, 2d).
3. Perform fertilizer calculations by
    a. calculating fertilizer analysis (1b, 2c);
    b. calculating fertilizer costs (1b, 2c);
    c. calculating fertilizer application rates (1b, 2c, 2d).
4. Demonstrate an understanding of fertilizer and plant nutrient applications by
    a. listing organic plant nutrient sources (1b, 2c);
    b. explaining the characteristics of organic plant nutrient sources (1b, 2c);
    c. listing inorganic plant nutrient sources (1b, 2c);
    d. explaining the characteristics of inorganic plant nutrient sources (1b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain various production practices for nursery crops; apply business and management practices used in commercial nurseries; and perform various calculations associated with the operation and management of a commercial nursery.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the development of the nursery industry by
    a. explaining the history of the nursery industry (1b, 2c, 2d);
    b. outlining important developments in the nursery industry (1b, 2c, 2d);
    c. sequencing nursery industry trends (1b, 2c, 2d).
2. Demonstrate an understanding of the complexities of the nursery industry by
    a. utilizing nursery terminology (1b, 2c, 2d);
    b. categorizing wholesale nursery types (1b, 2c, 2d);
    c. categorizing retail nursery types (1b, 2c, 2d).
3. Demonstrate an understanding of nursery production processes by
    a. analyzing nursery layouts (1b, 2a, 2c, 2d);
    b. explaining bare root production methods (1b, 2c, 2d);
    c. explaining balled and burlap production methods (1b, 2c, 2d).
4. Demonstrate an understanding of the marketing of nursery products by
    a. explaining the wholesale distribution methods (1b, 2c, 2d);
    b. explaining wholesalers (1b, 2c, 2d);
    c. explaining retail operations (1b, 2c, 2d);
    d. explaining methods for improving the sales of nursery products (1b, 2c, 2d);
    e. calculating prices (1a, 1b, 2c, 2d);
    f. explaining price barriers and pricing strategies (2b, 2c, 2d).
5. Demonstrate an understanding of the basics of operating a nursery by
    a. comparing business ownership forms (1b, 2c, 2d);
    b. explaining methods for working with employees (1b, 2b, 2c, 2d);
    c. explaining methods for working with customers (1b, 2b, 2c, 2d).

HALT 2321 - Small Farming

Course Learning Outcomes

Course Learning Outcomes
End of course outcomes: Identify major physical and biological factors that affect crops; utilize innovative production techniques for a small farming operation; demonstrate creative marketing techniques for small farming operations; and design productive and profitable small farming operations.

Upon successful completion of this course, students will:

1. Describe the importance of small farming systems by
   a. explaining the global and regional significance of small farming in society (1a)
   b. distinguishing characteristics of small farms compared to industrialized agriculture (1b)
   c. listing various types of food crops grown in small farming systems (1a)
2. Demonstrate an understanding of crop growth by
   a. listing and describing biological and physical factors that impact crop growth (1a)
   b. listing and describing management techniques that promote healthy crops and farms (1a)
   c. explaining the unique benefits and challenges of small farming systems for crop production (1b)
3. Demonstrate knowledge of innovative production techniques by
   a. listing and describing examples of small-scale farmer innovations (1a).
   b. explaining the significance of crop diversification strategies for small farms (2d)
   c. listing and describing livestock suitable for small farm production (1a).
   d. listing and describing appropriate technologies used in small scale production systems (2e)
4. Demonstrate creative marketing techniques for small scale farms by
   a. listing and describing direct marketing options such as CSA, farmers markets, etc. (1a)
   b. listing and describing farm sales and agritourism related opportunities for income generation (1a)
   c. listing and describing alternative wholesale outlets such as restaurants, cooperatives, and food banks. (1a)
   d. developing a customized marketing approach and pricing structure to achieve profitability for a small farm (2a, 1b)
5. Design a productive and profitable small farming operation by
   a. evaluating the site, soil, and resources sufficient for small farming operations. (2c, 2a)
   b. developing a holistic farm plan considering crop/livestock integration, crop rotations, infrastructure placement, and resource availability. (2a, 2d)
   c. organizing priorities for small farm construction from initial establishment to future completion. (2c, 2d)

(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HALT 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define pest control terminology; interpret federal, state, local laws, and regulations; and recommend proper pest control methods and procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize pest control terminology by
   a. listing pesticide categories (1a);
   b. listing pesticide formulations (1a);
   c. defining pest control terms (1a);
   d. explaining the importance of pesticides and pest control (1b, 2c);
   e. explaining the risks of pesticides (1b, 2c).
2. Demonstrate an understanding of pesticide labels by
   a. identifying the sections of a pesticide label (1b, 2c);
   b. explaining the information required on a pesticide label (1b, 2c);
   c. interpreting information on a pesticide label (1b, 2c).
3. Demonstrate an understanding of Material Safety Data Sheets (MSDS) by
   a. identifying the sections of MSDS (1b, 2c);
   b. explaining the information on a MSDS (1b, 2c);
   c. interpreting the information contained on a MSDS (1b, 2c).
4. Demonstrate an understanding of federal, state, and local pesticide and pest control regulations by
   a. listing various laws and agencies regulating pesticides and pest control (1b);
   b. explaining the impact of various laws and regulations (1b, 2c);
   c. interpreting laws and regulations affecting pest control (1b, 2c).
5. Apply knowledge of pesticides, IPM, and pest control methods by
   a. listing common names of pest control materials (1b, 2c);
   b. listing trade names of pest control materials (1b, 2c);
   c. recommending pest control measures for various situations (1b, 2c, 2d).
6. Perform basic pesticide calculations by
   a. calculating LD50 values for given materials and body weights (1b, 2c);
   b. calculating dilution rates (1b, 2c);
   c. calculating calibration rates (1b, 2c).

HAMG 1213 - Front Office Management

HAMG

Course Number
1213

Course Title
Front Office Management

Semester Credit Hours
2

Lecture Hours
2

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) Functions of front office operations as they relate to customer service. Includes a study of front office interactions with other departments in the lodging operation.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the various service levels and market segments in the lodging industry as they pertain to the front office area of the hospitality operation; and identify front office responsibilities, accounting procedures, revenue management, checkout and settlement procedures, and night audit functions and verification.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend foundational concepts of the lodging industry as they pertain to the Front Office Manager (FOM) by
    a. defining what is the lodging segment (1a, 1b);
    b. defining the common ways to classify hotels (1a, 1b);
    c. listing how hotels are organized (1a, 1b);
    d. identifying the most common structures of hotel affiliation ownership (1a, 1b);
    e. identifying the common challenges confronting the lodging industry (1a, 1b).

2. Demonstrate knowledge of the customer service process by
    a. defining why guest service is so critical to a hotel operation (1a, 1b);
    b. giving examples of quality feedback as it relates to the role of FOM's (1a, 1b);
    c. explaining the importance of the quality components for the FOM (1a, 1b);
    d. identifying the reasons for continuous quality improvement (1a, 1b);
    e. identifying processes that address quality expectations in the hotel (1a, 1b);
    f. explaining a system to design service in a hotel to address customer service (1a, 1b).

3. Provide an overview of the front office department by
    a. explaining the basic function of the front office staff to coordinate guest services (1a, 1b);
    b. comprehending the differences in front office management amongst small, large, and mega hotels (1a, 1b);
    c. defining job tasks that are commonly found in management and non-management positions in the front office of a large hotel (1a, 1b);
    d. identifying basic human resource tactics to recruiting, selecting, training, and staffing for entry level front office employees (1a, 1b).

4. Comprehend the basics of a Property Management System (PMS) by
    a. comprehending how the PMS system provides information for management planning and decision making (1a, 1b, 2d);
    b. identifying the factors that are important when selecting PMS reports for development (1a, 1b);
    c. defining how a PMS system maintains detailed reservation records related to guests and their specific needs (1a, 1b);
    d. identifying how a PMS maintains and reports information about types of rooms sold (1a, 1b);
    e. explaining how the PMS can help the FOM forecast demand (1a, 1b);
    f. explaining how the PMS can price the room inventory (1a, 1b, 2c).

5. Comprehend the basic forecasting considerations for a FOM by
    a. identifying the role of the FOM in the management of rooms forecast data (1a, 1b);
    b. describing how historical, current, and future data help the FOM to estimate room demand (1a, 1b);
    c. explaining how a FOM can utilize PMS data relating to transient and group guests to make room demand forecasts (1a, 1b);
    d. identifying the basic types of reports that FOM's can use to monitor their demand forecast (1a, 1b).

6. Understand the importance of revenue management by
    a. identifying the personnel that are involved in revenue management (1a, 1b);
    b. explaining the concept of establishing room rates by applying information about rate types and rate determination factors (1a, 1b);
    c. explaining the basic information that is used about room types, market codes, and track codes to help maximize RevPar (1a, 1b);

d. comprehending yield management philosophy (1a, 1b);

e. identifying tactics utilized by revenue managers to influence hotel occupancy (1a, 1b, 1c).

7. Understand the different distribution channels by

a. identifying the evolution of distribution channels for hotel reservations (1a, 1b);

b. explaining the different types of distribution channels that are in current use (1a, 1b);

c. explaining how different distribution channels operate (1a, 1b);

d. explaining the challenges to management of different reservation distribution channels (1a, 1b).

8. Understand the importance of reservation reception and room assignment management by

a. explaining the importance of effectively managing processes used for individual and group reservations (1a, 1b);

b. explaining the importance of handling guest reception concerns including those related to arrival lists, upselling, registration, and payment methods (1a, 1b);

c. describing tactics for assigning rooms, issuing keys, walking arriving guests, and recording no-shows (1a, 1b);

d. explaining the use of equipment and procedures that may be integral to the hotel check in process in the future (1a, 1b).

9. Understand the importance of the FOM delivering quality service by

a. explaining the importance of making exemplary first impressions on the guests who are arriving (1a, 1b);

b. explaining the do's and don'ts of dialogue between front desk agents and guests (1a, 1b);

c. describing various opportunities for guest service opportunities for FOM's (1a, 1b);

d. explaining the roles and responsibilities of uniformed service personnel as they assist hotel guests (1a, 1b);

e. explaining the use of processes to manage guest complaints (1a, 1b).

10. Understand the importance of the FOM executing proper guest charges, payment, and check out by

a. describing the basic accounting information necessary to accurately determine guest charges due at check out (1a, 1b);

b. explaining the policies and procedures needed to establish and monitor credit limits (1a, 1b);

c. describing the fundamental requirements to check out and settle accounts of departing guests (1a, 1b);

d. identifying the considerations important when managing late and express check outs and unpaid accounts (1a, 1b);

e. explaining the methods to utilize in managing group allowances (1a, 1b).

11. Understand the importance of the night audit responsibilities by

a. describing the role of the night auditor in accounting for guest and non-guest charges (1a, 1b);

b. explaining the policies and procedures utilized in managing guest and city ledgers (1a, 1b);

c. describing the fundamentals in managing end of day reconciliations (1a, 1b);

d. identifying the purpose of common night audit reports and note sources or report data (1a, 1b);

e. identifying how night audit reports are set to a zero balance (1a, 1b);

f. explaining the basic procedures for archiving appropriate data (1a, 1b, 2c).

12. Understand the role that the FOM plays as the hub of the hotel by

a. describing the executive committee and different agenda items (1a, 1b);

b. giving examples of how information generated by the FOM is used for work assignments by other departments (1a, 1b);

c. explaining how FOM's interact with different departments that have contact with guests (1a, 1b);

d. explaining how FOM's interact with managers and others in building services departments (1a, 1b, 1c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify various segments of the recreation and entertainment industry; and describe management techniques as they pertain to operating recreation and entertainment environments.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Be exposed to the basic characteristics of the hospitality industry by

a. identifying the diverse delivery of services and products in the industry (1a, 1b);

b. comprehending the perishable and nonperishable products of the industry (1a, 1b);

c. identifying the common trends in the hospitality industry (1a, 1b);

d. identifying key elements that impact customer service (1a, 1b).

2. Comprehend the elements of tourism by

a. labeling the key components of tourism (1a, 1b);

b. identifying the benefits of tourism (1a, 1b);

c. recalling the history of tourism (1a, 1b);

d. stating the promoters of tourism (1a, 1b).

3. Recall the different aspects of the hotel business by

a. describing hotel ownership and development (1a, 1b);

b. giving examples of different types of hotels (1a, 1b);

c. recalling the names of prestigious hotels (1a, 1b).

4. Identify the different types of career opportunities in the hospitality industry by

a. recalling the different positions in the hotel business (1a, 1b);

b. recalling the different positions in the restaurant business (1a, 1b);

c. recalling the different positions in managed services (1a, 1b);

d. recalling the different positions in the theme park business (1a, 1b);

e. recalling the different positions in the club business (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the procedures involved in recruiting, interviewing, selecting, hiring, training, developing, and terminating employees; and describe federal and state laws and regulations relating to human resources management. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the importance of human resources in the hospitality business by
    a. explaining the contribution of the human resource department to the organization (1a, 1b);
    b. identifying the different roles in the human resource department (1a, 1b);
    c. identifying human resource terminology (1a, 1b).
2. Demonstrate an understanding of the role of human resources in building a diverse work environment by
    a. identifying characteristics of a diverse work environment (1a, 1b);
    b. giving examples of the benefits of a diverse work environment (1a, 1b);
    c. explaining the procedures to avoid illegal discrimination (1a, 1b);
    d. explaining how prejudices and stereotypes affect the work environment (1a, 1b);
    e. giving examples of methods to promote diversity (1a, 1b).
3. Demonstrate an understanding of the important elements of job descriptions by
    a. defining a job description (1a, 1b);
    b. explaining the related documents to the job description (1a, 1b);
    c. explaining the methods for analyzing a job (1a, 1b);
    d. explaining the difference between exempt and nonexempt positions (1a, 1b);
    e. explaining the importance of maintaining job descriptions (1a, 1b).
4. Demonstrate an understanding of the recruiting process by
    a. explaining the steps in the recruiting process (1a, 1b);
    b. explaining the importance of forecasting staffing needs (1a, 1b);
    c. defining the factors that encompass a proper forecast (1a, 1b);
    d. identifying the benefits of different types of forecast related to recruiting (1a, 1b);
    e. identifying the sources of potential employees (1a, 1b);
    f. explaining the benefits of recruiting from internal sources (1a, 1b);
    g. explaining the benefits of recruiting from external sources (1a, 1b);
    h. defining the methods to communicate a job opening (1a, 1b);
    i. defining the steps in a make or buy analysis (1a, 1b);
    j. explaining the methods for evaluating a recruiting method (1a, 1b).
5. Demonstrate an understanding of the basics of screening and interviewing potential employees by
    a. describing the screening process (1a, 1b);
    b. describing screening tools and techniques (1a, 1b);
    c. explaining procedures for avoiding illegal discrimination in screening (1a, 1b);
    d. describing how to conduct screening interviews (1a, 1b);
    e. describing the methods for testing work skills (1a, 1b);
    f. describing the use of personality tests (1a, 1b);
    g. identifying the steps of the job interview (1a, 1b);
    h. explaining the steps to plan for the job interview (1a, 1b);
    i. describing how to conduct a job interview (1a, 1b);
    j. explaining the importance of reference checks (1a, 1b);
    k. giving examples of methods for conducting reference checks (1a, 1b).

6. Demonstrate an understanding of making a job offer by
    a. explaining the necessary elements to choose the best candidate (1a, 1b);
    b. describing the different elements of a job offer (1a, 1b);
    c. explaining the methods for making a job offer (1a, 1b);
    d. explaining the methods of negotiating a job offer (1a, 1b);
    e. describing a successful job acceptance (1a, 1b);
    f. explaining the methods for notifying the unsuccessful candidates (1a, 1b);
    g. describing the importance of conducting final background checks (1a, 1b);
    h. giving examples of various types of final background checks (1a, 1b).

7. Demonstrate an understanding of hiring and orienting new employees by
    a. explaining the importance of orientation (1a, 1b);
    b. describing the hiring and orientation activities (1a, 1b);
    c. identifying the steps in planning an orientation (1a, 1b);
    d. describing the processing of hiring related documents (1a, 1b);
    e. explaining the methods of evaluating an orientation (1a, 1b).

8. Demonstrate an understanding of the transition to supervising and motivating employees by
    a. explaining the difference between supervising and being an employee (1a, 1b);
    b. describing the various methods and theories that motivate an employee (1a, 1b);
    c. describing methods of planning for success (1a, 1b);
    d. identifying different methods of communication (1a, 1b);
    e. identifying methods of monitoring employees (1a, 1b);
    f. explaining steps to ensure standards are upheld by employees (1a, 1b);
    g. identifying the steps in the disciplinary process (1a, 1b);
    h. giving examples of recognition and incentive programs (1a, 1b).

9. Demonstrate an understanding of developing employees by
    a. explaining the importance of the function of employee development (1a, 1b);
    b. explaining the employee development process (1a, 1b);
    c. giving examples of methods of employee development (1a, 1b);
    d. describing the difference between a supervisor and a coach (1a, 1b);
    e. explaining the benefits of coaching (1a, 1b).

10. Demonstrate an understanding of training employees by
    a. describing the benefits of training (1a, 1b);
    b. giving examples of different forms of training (1a, 1b);
    c. explaining the elements of effective training (1a, 1b);
    d. identifying the steps in the five step training development model (ADDIE) (1a, 1b);
    e. identifying recognized hospitality industry training (1a, 1b).

11. Demonstrate an understanding of the proper methods for managing shifts by
    a. describing the importance of setting standards (1a, 1b);
    b. giving examples of standards in different hospitality organizations (1a, 1b);
    c. describing the process of setting shift goals (1a, 1b);
    d. explaining the shift planning process (1a, 1b);
    e. explaining the process for scheduling staff (1a, 1b);
    f. explaining the importance of pre-shift, mid-shift, and shift end meetings (1a, 1b);
    g. describing the importance of utilizing checklists (1a, 1b);
    h. describing the different methods of evaluating shift performance (1a, 1b, 2c).

12. Demonstrate an understanding of how to properly terminate employees by
    a. describing the difference between voluntary and involuntary terminations (1a, 1b);
    b. explaining the importance of utilizing termination checklists (1a, 1b);
    c. explaining the purpose of exit interviews (1a, 1b);
    d. identifying the exit interview methods and formats (1a, 1b);
    e. identifying the proper methodology of using exit interview information (1a, 1b).

13. Demonstrate an understanding of the importance of ensuring a lawful workplace by
    a. explaining the impact of laws on the hospitality business (1a, 1b);
    b. explaining the methods for providing safe food (1a, 1b);
    c. describing the process of serving alcohol responsibly (1a, 1b);
    d. explaining the importance of ensuring a fair workplace (1a, 1b);
    e. describing the methods of communicating workplace hazards to employees (1a, 1b);
    f. explaining the importance of laws to protect younger workers (1a, 1b);
    g. defining a union (1a, 1b);
    h. describing the general guidelines for complying with laws (1a, 1b).

14. Demonstrate an understanding of employee benefits, compensation, and how it impacts labor costs by
    a. explaining the basic employee benefits plans (1a, 1b);
    b. describing the types of employee benefits (1a, 1b);
    c. describing common voluntary benefits (1a, 1b);
    d. describing the methods for complying with retirement and health benefit laws (1a, 1b);
    e. explaining the importance of ensuring accurate compensation (1a, 1b);
    f. explaining the relationship of benefits and compensation to labor costs (1a, 1b);
    g. explaining different methods of controlling labor costs (1a, 1b).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the basic legal principles governing the hospitality industry as they relate to guests, employees, vendors, and contractors; articulate the legal environment in which the hospitality industry must exist; and analyze the impact of laws and regulations on the industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the legal prevention philosophy in the hospitality industry by
    a. identifying the advantages of preventing rather than managing a legal difficulty (1a, 1b);
    b. explaining the decisions that they will make as managers and the legal implications for each of the decisions (1a, 1b, 2a, 2c);
    c. identifying the significant federal and state governmental administrative agencies that interact with the hospitality industry (1a, 1b, 2a, 2c);
    d. identifying the steps in responding to an inquiry and/or complaint (1a, 1b).
2. Demonstrate an understanding of hospitality business structures by
    a. identifying common organizational structures (1a, 1b);
    b. identifying common operational structures (1a, 1b);
    c. inferring the differences between real and personal property (1a, 1b, 2a, 2c).
3. Demonstrate an understanding of contract basics by
    a. explaining the essential components of an enforceable contract (1a, 1b, 2c);
    b. identifying key elements of a franchise contract (1a, 1b);
    c. explaining the advantages and disadvantages of operating as a franchise (1a, 1b).
4. Demonstrate an understanding of how to legally select employees by
    a. defining employment at will (1a, 1b);
    b. demonstrating understanding of employee selection techniques (1a, 1b, 2c);
    c. explaining the laws related to hiring (1a, 1b, 1c).
5. Demonstrate an understanding of his/her responsibilities to guests by
    a. explaining when to admit and to refuse accommodation to guests (1a, 1b, 2c);
    b. explaining the issues of premises liability and obligations regarding total guest safety (1a, 1b, 2c, 2d);
    c. explaining the duties to guests of guests (1a, 1b, 1c);
    d. explaining the appropriate considerations for eviction, lockout, and expulsion procedures (1a, 1b, 2c, 2d).
6. Demonstrate an understanding of his/her responsibilities regarding the service of food and beverages by
    a. explaining the potential liability for serving alcohol (1a, 1b, 2c);
    b. summarizing the Uniform Commercial Code's warranty for serving food (1a, 1b, 2c, 2d);
    c. explaining the necessity of accurately describing services and ingredients to comply with the various truth in menu laws (1a, 1b, 1c).

HAMG 2267 - Practicum-Hospitality Admin/Management

General

Course Key
12721

Course Rubric
HAMG

Course Number
2267

Course Title
Practicum-Hospitality Administration and Management

Semester Credit Hours
2

Lecture Hours
0

Lab Hours
14

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-0-14) Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Complete paperwork for employment by
    a. completing a job application (1a);
    b. organizing a resume (1a);
    c. composing a two-week resignation letter (if necessary) (1a).
2. Become employed in the hospitality industry at an approved site by
    a. completing an interview with the hiring company (1c);
    b. becoming hired as an employee in a hospitality organization (1b);
    c. completing 224 hours of work in 16 week semester (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Illustrate work experience in a written format by
    a. summarizing weekly experience on weekly timesheets (1a, 1b);
    b. sketching work station (1a, 1b);
    c. preparing reproduction or organization chart of front of house and back of house (1a, 1b, 2c, 2d).
4. Evaluate experience by
    a. preparing self-evaluation (1a, 1b);
    b. preparing worksite evaluation (1a, 1b, 2d);
    c. preparing practicum experience evaluation (1a, 1b).

HAMG 2301 - Principles of Food & Beverage Operations

General

Course Key
190

Course Rubric
HAMG

Course Number
2301

Course Title
Principles of Food and Beverage Operations

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An overview of food and beverage management in various hospitality environments. Emphasizes cost controls from procurement to marketing and sales. Examines forecasting, menu planning and pricing, logistical support, production, purchasing, and quality assurance.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify food and beverage operations in various hospitality settings. Describe the methods for incorporating cost control techniques and identify areas of excessive cost and waste; compare a forecasted budget to an actual budget; and identify techniques that impact sales. Create and analyze a menu plan and pricing strategies, production, purchasing, and quality assurance.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of foundational concepts related to cost and sales by
    a. defining the terms sales and costs (1a, 1b);
    b. defining fixed, directly variable, semi-variable, controllable, noncontrollable, unit, total, prime, historical, and planned costs (1a, 1b);
    c. providing examples of fixed, directly variable, semi-variable, controllable, non-controllable, unit, total, prime, historical, and planned costs (1a, 1b);
    d. giving examples illustrating monetary and nonmonetary sales concepts (1a, 1b);
    e. describing the significance of cost to sales relationships (1a, 1b);
    f. identifying several cost to sales ratios important in food and beverage management (1a, 1b);
    g. explaining the value of comparing current cost to sales ratios with those for previous periods (1a, 1b);
    h. describing factors that cause industry wide variations in cost percentages (1a, 1b).
2. Demonstrate an understanding of the control process in a food and beverage establishment by
    a. defining control in food and beverage management (1a, 1b);
    b. providing examples of the significance of control in food and beverage management (1a, 1b);
    c. describing control techniques used in food and beverage operations (1a, 1b);
    d. listing the steps in the control process (1a, 1b);
    e. explaining why the cost benefit ratio is significant when making control decisions (1a, 1b).
3. Demonstrate an understanding of cost/volume/profit analysis by
    a. explaining the relationships that exist among cost/volume/profits (1a, 1b);
    b. applying the cost/volume/profit equation (1a, 1b);
    c. defining the terms variable rate and contribution rate (1a, 1b);
    d. applying the formulas used to determine a forecast for sales in dollars and sales in units (1a, 1b, 2c);
    e. applying the formulas used to determine a forecast for variable and fixed costs (1a, 1b, 2a, 2c, 2d);
    f. applying the formulas used to determine profit, contribution rate, and contribution margin (1a, 1b, 2c);
    g. applying the formulas to determine variable rate and breakeven point (1a, 1b, 2d).
4. Demonstrate an understanding of food purchasing and quality assurance as it relates to cost control by
    a. outlining the purchasing process in the operations of foodservice establishments (1a, 1b);
    b. explaining how quality standards for food purchases are established (1a, 1b);
    c. describing the forecasting process to determine the quantity of perishable food purchased (1a, 1b);
    d. determining order quantities using periodic and perpetual order methods (1a, 1b, 2c);
    e. explaining the advantages and disadvantages of centralized purchasing and standardized purchases (1a, 1b).
5. Demonstrate an understanding of the importance of proper food storing and issuing as it relates to cost control and quality assurance by
    a. listing causes of unplanned costs that can develop while food is in storage (1a, 1b);
    b. explaining the principle of stock rotation as applied to foodservice (1a, 1b);
    c. describing the process utilized to price and extend a food requisition (1a, 1b);
    d. explaining the difference between inter-unit and intra-unit transfers (1a, 1b);
    e. explaining the significance of transfers in determining accurate food costs (1a, 1b).
6. Demonstrate an understanding of the importance of monitoring foodservice operations by
    a. explaining the importance of monitoring a foodservice operation to assess monthly performance (1a, 1b);
    b. describing the procedure for taking physical inventory at the end of the month (1a, 1b);
    c. explaining methods to assign unit costs to a food inventory (1a, 1b);
    d. calculating the cost of food consumed, cost of food sold, and food cost percentage (1a, 1b, 2c);
    e. distinguishing between opening inventory and closing inventory (1a, 1b);
    f. explaining the relationship between the monthly calculation of cost of food sold and the monthly income statement (1a, 1b);
    g. preparing a monthly food cost report (1a, 1b, 2c).
7. Demonstrate an understanding of how menu planning and pricing impacts sales, costs, and profits by
    a. explaining how menu prices impact sales, costs, and profits (1a, 1b);
    b. explaining the concept of menu engineering (1a, 1b);
    c. completing a menu engineering worksheet (1a, 1b, 2c);
    d. analyzing the resulting information from a menu engineering worksheet (1a, 1b, 2c);
    e. describing appropriate action to take based on results of menu engineering worksheet (1a, 1b, 2c).
8. Demonstrate an understanding of the importance of controlling food and beverage sales by
    a. explaining the goals of sales control (1a, 1b);
    b. describing the determinants of customer restaurant selection (1a, 1b);
    c. describing standard procedures for controlling revenue (1a, 1b).
9. Demonstrate an understanding of the basics of forecasting in a food and beverage environment by
    a. explaining the impact of forecasting as it relates to menu pricing, marketing, production, and purchasing (1a, 1b, 2d);
    b. identifying the key elements to be utilized in a forecast (1a, 1b, 2c, 2d);
    c. producing forecasts for a food and beverage establishment (1a, 1b, 2c, 2d);
    d. identifying the common anomalies in business that can produce significant errors in forecasting (1a, 1b, 1c, 2c, 2d).
10. Demonstrate an understanding of the basics of controlling labor cost in a food and beverage environment by
    a. defining the basic elements that make up labor cost (1a, 1b, 2d);
    b. identifying the determinates that impact labor costs (1a, 1b);
    c. computing basic labor cost formulas (1a, 1b, 2c, 2d).

HAMG 2305 - Hospitality Management and Leadership

General

Course Key
201

Course Rubric
HAMG

Course Number
2305

Course Title
Hospitality Management and Leadership

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An overview of management and leadership in the hospitality industry with an emphasis on management philosophy, policy formulation, communications, motivation, and team building.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare and contrast the various styles of leadership and management; develop mission statements supported by goals and objectives; identify motivation and team building practices as they relate to the hospitality industry; and evaluate the communication styles of leaders and managers.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Be exposed to the basic leadership philosophies of the hospitality industry by
    a. comprehending the definition of management (1a, 1b);
    b. identifying what is involved in strategic management in the hospitality business (1a, 1b);
    c. comprehending the difference between traditional style and contemporary style of management (1a, 1b);
    d. comprehending a philosophical overview of management and leadership (1a, 1b);
    e. giving examples of different types of operational management structures in the hospitality business (1a, 1b).
2. Identify the key stakeholders that are part of management decisions by
    a. labeling the key stakeholders in hospitality decision making (1a, 1b);
    b. identifying the roles of stakeholders in management decisions (1a, 1b);
    c. comprehending the major cultural issues affecting the hospitality industry (1a, 1b);
    d. stating the main governmental agencies that influence hospitality decision making (1a, 1b);
    e. giving examples of how stakeholders and governmental agencies impact a hospitality organization's mission statements and goals (1a, 1b).
3. Recall the different methods of motivation and team building by
    a. describing how individuals at different levels in the hospitality business are motivated (1a, 1b);
    b. giving examples of foundational motivational theories (1a, 1b);
    c. recalling different methods of communication (1a, 1b);
    d. comprehending how communication style influences policy formulation (1a, 1b);
    e. giving examples of common hospitality policies utilized in the hospitality business (1a, 1b).
4. Define the purpose of a mission statement by
    a. recalling the definition of a mission statement (1a, 1b);
    b. giving examples of mission statements utilized by hospitality organizations (1a, 1b);
    c. defining a goal (1a, 1b);
    d. defining an objective (1a, 1b);
    e. comprehending how a mission statement is supported by goals and objectives (1a, 1b);
    f. giving examples of mission statements that are utilized in the hospitality industry (1a, 1b).
5. Comprehend the major strategic hospitality management trends and how they relate to leadership decision making by
    a. identifying U.S. trends that are impacting hospitality decision making (1a, 1b, 2a);
    b. identifying global trends that are impacting hospitality decision making (1a, 1b);
    c. comprehending the leadership competencies required to successfully leverage hospitality trends into an organization (1a, 1b);
    d. composing a mission statement, goals, and objectives for a hospitality organization (1a, 1b, 2a, 2c).

HAMG 2307 - Hospitality Marketing and Sales

General

Course Key
210

Course Rubric
HAMG

Course Number
2307

Course Title
Hospitality Marketing and Sales

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Identification of the core principles of marketing and sales and their impact on the hospitality industry.

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the components of the marketing mix; develop or critique a marketing plan as it relates to an organizational mission statement and strategic plan; and differentiate between various marketing and sales techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend the core principles of marketing and sales by
    a. defining the role of hospitality and tourism marketing (1a, 1b);
    b. identifying core marketing concepts (1a, 1b);
    c. identifying the key components of the marketing mix (1a, 1b);
    d. identifying the key marketing terminology (1a, 1b);
    e. identifying hospitality companies that embrace the marketing/customer satisfaction model (1a, 1b);
    f. distinguishing differences amongst needs, wants, and demands; values, satisfaction, and quality (1a, 1b).
2. Comprehend an understanding of market segmentation, target marketing, and positioning by
    a. defining market segmentation, target marketing, and positioning (1a, 1b);
    b. listing the steps in segmentation, targeting marketing, and positioning (1a, 1b);
    c. illustrating with examples the concept of positioning for competitive advantage (1a, 1b, 2a, 2b, 2c, 2d).
3. Identify aspects of identification, differentiation, analysis of production, pricing considerations, approaches, and strategies by
    a. identifying external and internal factors affecting pricing and pricing decisions (1a, 1b);
    b. distinguishing amongst various pricing approaches (1a, 1b);
    c. explaining short term and long term effects of inappropriate pricing strategies (1a, 1b, 2a, 2b, 2c);
    d. selecting appropriate pricing approach for selected product (1a, 1b, 2a, 2c).
4. Develop a hospitality marketing plan as it relates to an organizational mission statement and strategy plan by
    a. identifying a hospitality product as subject of a marketing plan (1a, 1b, 2a, 2c);
    b. selecting components of a marketing plan (1a, 1b, 2a);
    c. evaluating components of a marketing plan (1a, 1b);
    d. composing a hospitality marketing plan (1a, 1b, 2a, 2c);
    e. discussing marketing plan with peer group that includes successful technique to sales (1a, 1b, 2a, 2b, 2c, 2d).

HAMG 2330 - Convention & Group Management & Services

General

Course Key
219

Course Rubric
HAMG

Course Number
2330

Course Title
Convention and Group Management and Services

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An application of the essential components of successful convention and meeting planning.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the economic impact of the conventions industry; describe and compare the various types of conventions, exhibitions, conferences, and the marketing tools used for pre-planning strategies; and assess requirements for food and beverage service, meeting room setups, and post meeting evaluations. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of foundational concepts of conventions and group management services by
    a. explaining the different types of conventions and meetings (1a, 1b);
    b. describing some events from the past that were meetings (1a, 1b);
    c. identifying who attends meetings (1a, 1b);
    d. identifying what is accomplished at a convention (1a, 1b);
    e. identifying the key jobs in a facility (e.g. hotel, resort, etc.) that contribute to a successful convention (1a, 1b);
    f. giving examples of industry organizations that represent the convention and group management industry (1a, 1b);
    g. defining APEX (1a, 1b);
    h. explaining what APEX is intended to accomplish (1a, 1b);
    i. explaining the future of electronic meetings (1a, 1b);
    j. distinguishing between a trade show and an exposition (1a, 1b).

2. Demonstrate an understanding of the organizations that sponsor conventions by
    a. identifying the types of sponsoring organizations that hold the greatest number of gatherings (1a, 1b);
    b. identifying the types of sponsoring organizations that have the greatest economic benefit (1a, 1b);
    c. identifying which types of sponsoring organizations have the greatest marketing challenges (1a, 1b);
    d. identifying the changes that are taking place with incentive trips (1a, 1b);
    e. explaining how not for profit organizations differ from for profit organizations (1a, 1b);
    f. explaining what types of organizations make up associations known as SMERFS (1a, 1b).

3. Demonstrate an understanding of destination marketing organizations (DMO's) in relation to the convention business by
    a. defining a DMO (1a, 1b);
    b. giving examples of DMO services (1a, 1b);
    c. identifying the different methods by which DMO's can be funded (1a, 1b);
    d. explaining the contributions that a DMO provides for meeting professionals (1a, 1b);
    e. explaining the contributions that the DMAI provides for meeting professionals (1a, 1b).

4. Demonstrate an understanding of the basics of special event management by
    a. defining the characteristics of a special event (1a, 1b);
    b. identifying the planning tools for a special event (1a, 1b);
    c. defining the target market for a special event (1a, 1b);
    d. giving examples of stakeholders that plan for a special event (1a, 1b);
    e. defining profitable opportunities for a special event (1a, 1b).

5. Demonstrate an understanding of the basics of banquet and catered events by
    a. defining a banquet (1a, 1b);
    b. explaining the purpose of a banquet (1a, 1b);
    c. describing the different types of catering operations (1a, 1b);
    d. explaining the relationship between a catering department and other hotel departments (1a, 1b);
    e. explaining the purpose of the meal function at a banquet (1a, 1b);
    f. distinguishing the types of meal functions (1a, 1b);
    g. explaining how effective menu planning is related to service (1a, 1b);
    h. describing different types of menu design (1a, 1b);
    i. identifying steps to pricing a banquet event for profit (1a, 1b);
    j. explaining the different types of room setups for effective customer service (1a, 1b).

6. Demonstrate an understanding of the basics of creating and executing a legal contract by
    a. explaining the importance of utilizing a contract (1a, 1b);
    b. identifying the important elements of a contract (1a, 1b);
    c. identifying the basic risks at a convention (1a, 1b);
    d. explaining methods to reduce the risks at conventions (1a, 1b);
    e. explaining the basics of negotiating a contract (1a, 1b);
    f. explaining the legal aspects of recording or videotaping entertainers (1a, 1b).

7. Demonstrate an understanding of the management of a meeting, exposition, event and convention (MEEC) by
    a. identifying the method to create a statement of objectives for a MEEC (1a, 1b);
    b. identifying the different expenses associated with a MEEC (1a, 1b);
    c. explaining the different revenue sources with a MEEC (1a, 1b);
    d. explaining the importance of a timetable for a MEEC (1a, 1b);
    e. describing the elements that are part of a timetable for a MEEC (1a, 1b, 2c);
    f. identifying the elements that are part of a site inspection (1a, 1b);
    g. describing the process of conducting a site inspection (1a, 1b, 2c);
    h. defining a request for proposal (RFP) (1a, 1b);
    i. describing the different elements of a RFP (1a, 1b);
    j. explaining the methodology for measuring the success of a MEEC (1a, 1b).

HART 1401 - Basic Electricity for HVAC

Course Key
12201

Course Rubric	Course Number	Course Title
HART	1401	Basic Electricity for Heating, Ventilation and Air Conditioning (HVAC)

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Principles of electricity as required by HVAC, including proper use of test equipment, electrical circuits, and component theory and operation.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate knowledge of basic principles of electricity, electrical current, circuitry, and air conditioning devices; apply Ohm's law to electrical calculations; perform electrical continuity, voltage, and current tests with appropriate meters; and demonstrate electrical safety. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the current theory of electron flow by
    a. describing atomic structure (1a, 1b);
    b. defining electrical charge (1a, 1b);
    c. differentiating between conventional and electron current flow (1a, 1b).
2. Define electrical terms by
    a. defining voltage (1a, 2c);
    b. defining current (1a, 2c);
    c. defining amperage (1a, 2c).
3. Demonstrate an understanding of DC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values (1a, 1b, 2c);
    b. using Kirchoff's current law to determine node currents (1a, 1b, 2c);
    c. using the power formula to calculate circuit wattages (1a, 1b, 2c).
4. Connect DC circuits by
    a. connecting series circuits (1a, 1b, 2c);
    b. connecting parallel circuits (1a, 1b, 2c);
    c. connecting combination circuits (1a, 1b, 2c).
5. Demonstrate the proper use of a multimeter by
    a. connecting the meter to measure amperage in a series and parallel circuit (1a, 1b, 2c, 2e);
    b. connecting the meter to measure voltage (1a, 1b, 2c, 2e);
    c. connecting the meter to measure resistance (1a, 1b, 2c, 2e).
6. Demonstrate an understanding of the generation of AC electricity by
    a. explaining the current theory of magnetism (1a, 1b, 2c);
    b. identifying sine wave properties (1a, 1b, 2c).
7. Demonstrate an understanding of the effect of inductance in an AC circuit by
    a. defining inductance (1a, 1b, 2c);
    b. defining inductive reactance (1a, 1b, 2c).
8. Analyze inductive circuits by
    a. calculating inductive reactance (1a, 1b, 2c);
    b. calculating inductive power (1a, 1b, 2c);
    c. drawing voltage and current wave forms for a purely inductive circuit (1a, 1b, 2c).
9. Explain the principle of operation of a power transformer by
    a. defining mutual inductance (1a, 1b, 2c);
    b. determining transformer ratios (1a, 1b, 2c);
    c. identifying transformer windings (1a, 1b, 2c).
10. Demonstrate an understanding of the effect of capacitance in an AC circuit by
    a. defining capacitance (1a, 1b, 2c);
    b. defining capacitive reactance (1a, 1b, 2c);
    c. drawing voltage and current wave forms for a purely inductive circuit (1a, 1b, 2c).
11. Connect AC circuits by
    a. connecting series circuits (1a, 1b);
    b. connecting parallel circuits (1a, 1b);
    c. connecting transformer circuits (1a, 1b).
12. Demonstrate an understanding of AC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values (1a, 1b, 2c);
    b. using Kirchoff's current law to determine node currents (1a, 1b, 2c);
    c. using the power formula to calculate circuit wattages (1a, 1b, 2c);
    d. calculating apparent and true power (1a, 1b, 2c);
    e. calculating the power factor of an AC reactive circuit (1a, 1b, 2c).

Requirements
Required Prerequisite(s): HART 1401 & HART 2431

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Test, repair, and/or replace HVAC-related electrical and control components, wiring and equipment; read, draw, and interpret high and low voltage control circuits. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the purpose of a wiring diagram by
    a. listing the types of wiring diagrams (1a, 1b, 2c, 2d);
    b. describing the advantages and disadvantages of the types of wiring diagrams (1a, 1b, 2c, 2d);
    c. identifying the parts of a wiring diagram (1a, 1b, 2c, 2d);
    d. creating a practical wiring circuit using a wiring diagram (1a, 1b, 1c, 2a, 2c, 2d, 2e).

2. Demonstrate an understanding of the purpose of electrical meters by
    a. identifying a voltmeter, ammeter, and ohmmeter (1a, 1b, 2c, 2d);
    b. determining which meter is best for a particular application or situation (1a, 1b, 2c, 2d);
    c. describing how to physically connect the meter to a circuit for measurement (1a, 1b, 2c, 2d);
    d. measuring voltage, current, and resistance with the proper electric meter (1a, 1b, 1c, 2c, 2d, 2e);
    e. listing the safety precautions when using electric meters (1a, 1b, 2c, 2d);
    f. interpreting meter readings (1a, 1b, 2c, 2d).

3. Demonstrate an understanding of low voltage control circuits by
    a. listing the modes of operation of a typical forced air conditioning and heating system (1a, 1b, 2c, 2d);
    b. explaining why 24 volts AC is used (1a, 1b, 2c, 2d);
    c. creating a low voltage control wiring circuit (1a, 1b, 1c, 2c, 2d, 2e);
    d. describing the color coding of control wiring (1a, 1b, 2c, 2d).

4. Demonstrate an understanding of the function of a thermostat by
    a. identifying the types of thermostats (1a, 1b, 2c, 2d);
    b. describing the advantages and disadvantages of the different types of thermostats (1a, 1b, 2c, 2d);
    c. explaining the operation of auto changeover and multistage thermostats (1a, 1b, 2c, 2d).

5. Demonstrate an understanding of the function of an indoor blower in HVAC equipment by
    a. listing the types of blower motors found in residential and light commercial HVAC (1a, 1b, 2c, 2d);
    b. identifying the type of motor from its electrical wiring connections (1a, 1b, 2c, 2d);
    c. explaining the operation of different types of blower motors (1a, 1b, 2c, 2d);
    d. explaining how to test and adjust an ECM motor (1a, 1b, 2c, 2d);
    e. listing the types of indoor blower relays (1a, 1b, 2c, 2d);
    f. identifying the types of blower motors (1a, 1b, 2c, 2d);
    g. creating a practical working multi speed electrical circuit using a PSC motor (1a, 1b, 1c, 2c, 2d, 2e).

6. Demonstrate an understanding of the components in a gas furnace by
    a. listing the gas furnace efficiency levels (1a, 1b, 2c, 2d);
    b. identifying the components found in a gas furnace (1a, 1b, 2c, 2d);
    c. explaining the function of the components found in gas furnaces (1a, 1b, 2c, 2d);
    d. creating an electrical connection diagram of a gas furnace (1a, 1b, 1c, 2c, 2d, 2e).

7. Demonstrate an understanding of the components in an electric air handler by
    a. identifying the components found in an electric air handler (1a, 1b, 2c, 2d);
    b. explaining the function of the components in an electric air handler (1a, 1b, 2c, 2d);
    c. creating an electrical connection diagram of an electric air handler (1a, 1b, 1c, 2c, 2d, 2e).

8. Demonstrate an understanding of the low voltage components found in a central air conditioning condensing unit by
    a. identifying the low voltage components found in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
    b. explaining the function of the low voltage components in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
    c. listing the types of low voltage switches and relays found in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
    d. describing the operation of pressure switches (1a, 1b, 2c, 2d);
    e. describing the operation of time delay relays (1a, 1b, 2c, 2d);
    f. describing the operation of condensate overflow safety devices (1a, 1b, 2c, 2d).

9. Demonstrate an understanding of the line voltage components found in a central air conditioning condensing unit by
    a. identifying the line components found in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
    b. explaining the function of the line voltage components in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
    c. creating an electrical connection diagram of a central air conditioning condensing unit (1a, 1b, 1c, 2c, 2d, 2e).

10. Demonstrate an understanding of troubleshooting procedures by
    a. analyzing a system to determine its problem (1a, 1b, 1c, 2c, 2d, 2e);
    b. breaking down areas of a system to focus in on the problem (1a, 1b, 1c, 2c, 2d, 2e);
    c. developing a process of elimination to determine the problem with a system (1a, 1b, 1c, 2c, 2d, 2e);
    d. evaluating the findings of an improperly operating system to that of a properly working system (1a, 1b, 1c, 2c, 2d, 2e);
    e. locating the source of the problem using test equipment (1a, 1b, 1c, 2c, 2d, 2e).

HART 1407 - Refrigeration Principles

General

Course Key
12202

Course Rubric	Course Number	Course Title
HART	1407	Refrigeration Principles

Semester Credit Hours	Lecture Hours	Lab Hours
4	2	7

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-7). An introduction to the refrigeration cycle, heat transfer theory, temperature/pressure relationship, refrigerant handling, refrigeration components, and safety.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify refrigeration components; explain operation of the basic refrigeration cycle and heat transfer; demonstrate proper application and/or use of tools, test equipment, and safety procedures. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Evaluate basic lab and workplace safety procedures and protocols by
    a. describing safety as it pertains to tools, chemicals, clothing, and fire (1a, 1b, 2c);
    b. listing the components of the fire triangle (1a, 1b, 2c);
    c. demonstrating safety in the lab environment (1a, 1b, 2c).
2. Evaluate the physical laws as they apply to the refrigeration cycle by
    a. discussing the gas laws, absolute pressure, absolute temperature, atmospheric pressure, and enthalpy (1a, 1b, 2c);
    b. listing the four temperature scales (1a, 1b, 2c, 2d);
    c. distinguishing sensible heat from latent heat (1a, 1b, 2c, 2d);
    d. calculating enthalpy change both sensible and latent (1a, 1b, 2c, 2d).
3. Evaluate brazing and soldering procedures by
    a. describing the operation of an oxygen/acetylene torch and an air/acetylene torch (1a, 1b, 2c, 2d);
    b. demonstrating safety using both torches (1a, 1b, 2c, 2d);
    c. demonstrating brazing and soft soldering skills (1a, 1b, 2c, 2d).
4. Demonstrate understanding of the refrigeration cycle by
    a. describing the sequence of operation of the refrigeration cycle (1a, 1b, 2a, 2d);
    b. sketching the refrigeration cycle (1a, 1b, 2a, 2d);
    c. listing the four major components of the refrigeration cycle (1a, 1b, 2a, 2d).
5. Demonstrate understanding of refrigerants and oils by
    a. describing the purpose of refrigerants and oils (1a, 1b, 2a, 2d);
    b. listing the classifications of refrigerants (1a, 1b, 2a, 2d);
    c. discussing safety procedures during refrigerant handling (1a, 1b, 2a, 2d).
6. Demonstrate understanding of refrigeration compressors by
    a. discussing the operation of compressors within the refrigeration cycle (1a, 1b, 2a, 2d);
    b. listing the three compressor configurations (1a, 1b, 2a, 2d);
    c. listing the five compression types (1a, 1b, 2a, 2d);
    d. identifying compressors (1a, 1b, 2a, 2d).
7. Demonstrate understanding of metering devices by
    a. discussing the operation of the metering device within the refrigeration cycle (1a, 1b, 2a, 2d);
    b. listing the six types of metering devices (1a, 1b, 2a, 2d);
    c. identifying metering devices within the refrigeration system (1a, 1b, 2a, 2d).
8. Demonstrate understanding of piping practices by
    a. discussing piping of the refrigeration lines (1a, 1b, 2a, 2d);
    b. determining proper techniques to overcome special challenges within the three refrigerant lines (1a, 1b, 2a, 2d);
    c. sketching the refrigeration circuit (1a, 1b, 2a, 2d).
9. Demonstrate an understanding of system evacuation by
    a. discussing the purpose and procedures of system evacuation (1a, 1b, 2a, 2d);
    b. listing the components of system evacuation (1a, 1b, 2a, 2d);
    c. demonstrating proper technique and safety during system evacuation (1a, 1b, 2a, 2d).
10. Demonstrate understanding of refrigerant recovery by
    a. discussing the purpose and procedures of system recovery (1a, 1b, 2a, 2d, 2e);
    b. demonstrating troubleshooting techniques on computer simulation (1a, 1b, 2a, 2e);
    c. demonstrating proper technique and safety during system recovery (1a, 1b, 2a, 2e);
    d. demonstrating the knowledge necessary to become EPA certified (1a, 1b, 2a, 2e).

HART 1441 - Residential Air Conditioning

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take HART-1401 HART-1407;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): HART 1401 and HART 1407

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify various types of system applications; perform charging, recovery, and evacuation procedures of an installed system; perform component and part diagnostics and replacement; and perform system maintenance. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply the principles and theory of refrigeration by
    a. defining refrigeration terms (1a, 1b);
    b. defining temperature ranges (1a, 1b);
    c. defining refrigeration process (1a, 1b);
    d. analyzing refrigerator components (1a, 1b).
2. Demonstrate an understanding of the current EPA regulations by
    a. defining ozone (1a, 1b);
    b. defining ozone depletion (1a, 1b);
    c. defining appliance types (1a, 1b);
    d. explaining permitted releases (1a, 1b);
    e. defining recovery (1a, 1b);
    f. defining recycle (1a, 1b);
    g. defining reclaim (1a, 1b);
    h. analyzing the rules and regulations as they apply to small appliances (1a, 1b).
3. Define electrical terms by
    a. defining voltage (1a, 2c);
    b. defining current (1a, 2c);
    c. defining amperage (1a, 2c);
    d. analyzing compressor windings (1a, 1b).
4. Explain the principle of operation single phase motors by
    a. defining resistive start induction run (1a, 1b, 2c);
    b. defining PSC (1a, 1b, 2c);
    c. discussing start devices (1a, 1b, 2c).
5. Connect and troubleshoot electrical circuits and controls by
    a. explaining different methods of defrost (1a, 1b, 2c);
    b. analyzing termination thermostat (1a, 1b, 2c);
    c. analyzing sweat prevention heaters (1a, 1b, 2c);
    d. explaining devices that respond to thermal change (1a, 1b, 2c).
6. Demonstrate the proper use of a wiring diagram by
    a. explaining the difference between a ladder and a pictorial (1a, 1b, 2c);
    b. identifying all components (1a, 1b, 2c);
    c. analyzing the proper sequence of operation (1a, 1b, 2c).
7. Demonstrate an understanding of system evacuation by
    a. explaining evacuation (1a, 1b, 2c);
    b. defining vapor charging (1a, 1b);
    c. defining critical charge (1a, 1b).
8. Explain the principle of operation of a cooling and dehumidifying system by
    a. defining room air conditioning (1a, 1b, 2c);
    b. defining package unit (1a, 1b, 2c);
    c. explaining capacity (1a, 1b, 2c);
    d. analyzing manufacturer design (1a, 1b, 2c);
    e. defining sealed system (1a, 1b, 2c);
    f. analyzing unit construction (1a, 1b, 2c).
9. Explain the principle of operation of a heat pump system by
    a. defining reverse cycle refrigeration (1a, 1b, 2c);
    b. explaining the 4 way valve (1a, 1b, 2c);
    c. explaining supplemental heat (1a, 1b, 2c);
    d. analyzing sticking reversing valve (1a, 1b, 2c).
10. Explain the principles of installing and servicing small hermetic systems by
    a. explaining sizing of ACR copper (1a, 1b, 2c);
    b. analyzing tubing type (1a, 1b, 2c);
    c. analyzing brazing types (1a, 1b, 2c);
    d. analyzing methods for repair (1a, 1b, 2c).
11. Explain the principle of proper troubleshooting of residential air conditioning systems by
    a. determining the difference between mechanical and electrical problems (1a, 1b, 2c);
    b. understanding what the unit should be doing (1a, 1b, 2c);
    c. repairing the unit (1a, 1b, 2c);
    d. analyzing a wiring diagram (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify different types of gas furnaces; identify and describe component operation of gas furnaces; service and troubleshoot gas furnaces; perform safety inspections on gas and electric heating systems; identify unsafe operation of gas furnaces; identify and discuss component operation of electric heating systems; and service and troubleshoot electric heating systems. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the fuel gases used in residential heating by
    a. describing BTU content (1a, 1b, 2c);
    b. defining specific gravity (1a, 1b);
    c. determining fuel usage volumes (1a, 1b).
2. Demonstrate an understanding of fuel gas ignition by
    a. identifying perfect flame (1b, 2c, 2d, 2e);
    b. identifying typical flame (1b, 2c, 2d, 2e);
    c. identifying lifting flame (1b, 2c, 2d, 2e);
    d. identifying incomplete combustion in a flame (1b, 2c, 2d, 2e);
    e. identifying flame rollout (1b, 2c, 2d, 2e);
    f. determining complete combustion (1b, 2c, 2d, 2e).
3. Define electrical terms by
    a. defining voltage (1a, 2c);
    b. defining current (1a, 2c);
    c. defining amperage (1a, 2c);
    d. defining wattage (1a, 2c).
4. Demonstrate the ability to identify heat exchanger types by
    a. describing a tubular heat exchanger (1b, 2c, 2d);
    b. describing a sectional heat exchanger (1b, 2c, 2d);
    c. describing a barrel heat exchanger (1b, 2c, 2d);
    d. differentiating heat exchanger efficiency (1a, 1b, 2c, 2d).
5. Demonstrate the proper use of a multimeter by
    a. connecting the meter to measure amperage in a series and parallel circuit (1a, 1b, 2c, 2e);
    b. connecting the meter to measure voltage (1a, 1b, 2c, 2e);
    c. connecting the meter to measure resistance (1a, 1b, 2c, 2e).
6. Demonstrate the ability to identify and troubleshoot gas furnace control system components by
    a. identifying controls (1a, 1b, 2c, 2d);
    b. explaining control usage (1a, 1b, 2c, 2d);
    c. modifying control settings (1b, 2a, 2d, 2e);
    d. distinguishing control failure (1b, 1c, 2c, 2d, 2e).
7. Demonstrate the ability to identify and operate electronic fuel gas ignition systems by
    a. differentiating available ignition systems (1a, 1b, 2c, 2d);
    b. explaining operation of ignition systems (1a, 1b, 2c, 2d);
    c. analyzing ignition system failures (1a, 1b, 2c, 2e);
    d. isolating ignition system failure causes (1a, 1b, 2c, 2d, 2e).
8. Display sound industry based work habits in the laboratory by
    a. employing safe work practices (1a, 1c, 2a);
    b. capitalizing on assigned laboratory activities (1a, 1c, 2a, 2b, 2c);
    c. performing group activities (1a, 1c, 2a, 2b);
    d. calculating service invoice pricing (1a, 2a, 2b, 2e).
9. Operate computerized simulation software by
    a. operating a personal computer system (1b, 2a, 2c, 2e);
    b. reacting to simulated heating system failures (1b, 2a, 2c, 2e);
    c. responding to failures with corrective actions (1b, 2a, 2c, 2d, 2e).
10. Construct operational wiring circuits on training devices by
    a. illustrating operational gas heating ladder diagram (1a, 1b, 2c, 2d, 2e);
    b. creating an operating gas heating electrical circuit (1a, 1b, 2c, 2d, 2e);
    c. illustrating operational electric heating ladder diagrams (1a, 1b, 2c, 2d, 2e);
    d. creating an operating electric heating ladder diagram (1a, 1b, 2c, 2d, 2e).
11. Calculate combustion air volumes by
    a. calculating volumes based on code requirements (1a, 1b, 2c, 2d);
    b. calculating vent system volumes based on system consumption (1a, 1b, 2c, 2d);
    c. calculating vent system size (1a, 1b, 2c, 2d);
    d. calculating combustion sizing (1a, 1b, 2c, 2d).

HART 2402 - Commercial Air Conditioning System Dsgn

Simple Requisites

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

take hart-2445;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HART 2445

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate heat loss and heat gain; read and interpret detailed HVAC design specifications and plans; design a complete air distribution system; size heating and cooling equipment to the structure; and perform a load calculation using industry standards. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Evaluate environmental air conditions using psychometric standards by
    a. locating the various indices on a psychometric chart (1a, 1b, 2c);
    b. determining air conditions on a psychometric chart (1a, 1b, 2c);
    c. predicting supply air conditions on a psychometric chart (1a, 1b, 2c);
    d. calculating the required BTU's required for the specific temperature change (1a, 1b, 2c, 2d).
2. Formulate HVAC system size for a residential structure by
    a. evaluating building materials (1a, 1b, 2c, 2d);
    b. evaluating thermal resistance (1a, 1b, 2c, 2d);
    c. identifying the various heat load considerations located in a commercial structure (1a, 1b, 2c, 2d);
    d. locating the appropriate table values in the Manual N (1a, 1b, 2c, 2d);
    e. determining the correct construction numbers for building materials (1a, 1b, 2c, 2d);
    f. calculating structure loss and gains (1a, 1b, 2c, 2d);
    g. completing the Manual N form (1a, 1b, 2c, 2d, 2e);
    h. determining correct grill type and size (1a, 1b, 2c, 2d, 2e).
3. Design a commercial HVAC duct system by
    a. selecting appropriate materials (1a, 1b, 2c, 2d);
    b. calculating duct static losses (1a, 1b, 2c, 2d, 2e);
    c. estimating duct sizes (1a, 1b, 2c, 2d, 2e);
    d. estimating duct sizing using a ductulator (1a, 1b, 2c, 2d, 2e);
    e. determining correct grill type and size (1a, 1b, 2c, 2d, 2e).
4. Calculate a price quote for a commercial HVAC system by
    a. listing required installation materials (1a, 1b, 2a, 2d);
    b. evaluating material cost and markup (1a, 1b, 2a, 2e);
    c. determining expected labor costs (1a, 1b, 2a, 2d, 2e);
    d. summarizing information into a job price quote (1a, 1b, 2a, 2e).

HART 2431 - Advanced Electricity for HVAC

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): HART 1401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply the principles and theory of power distribution; describe the theory, operation, and protection of electric motors; identify the application of solid state devices; troubleshoot electric motors and controls. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the principles and theory of power distribution by
    a. defining control transformer terms (1a, 1b);
    b. connecting control transformers (1a, 1b, 2c);
    c. explaining 3 phase power generation (1a, 1b, 2c).
2. Define electrical terms by
    a. defining inductance (1a, 2c);
    b. defining impedance (1a, 2c);
    c. defining capacitance (1a, 2c).
3. Demonstrate an understanding of AC circuits by
    a. using Ohm's law to determine resistance, amperage, and voltage values (1a, 1b, 2c);
    b. using Z formulas to determine total impedance (1a, 1b, 2c);
    c. using the power formula to calculate circuit wattages (1a, 1b, 2c).
4. Connect 3 phase circuits by
    a. connecting delta circuits (1a, 1b, 2c);
    b. connecting open delta circuits (1a, 1b, 2c);
    c. connecting wye circuits (1a, 1b, 2c).
5. Demonstrate the proper use of a multimeter by
    a. connecting the meter to measure amperage in a series and parallel circuit (1a, 1b, 2c, 2e);
    b. connecting the meter to measure voltage (1a, 1b, 2c, 2e);
    c. connecting the meter to measure resistance (1a, 1b, 2c, 2e).
6. Demonstrate an understanding of the generation of AC electricity in a delta transformer configuration by
    a. listing 3 wire delta voltages (1a, 1b, 2c);
    b. listing 4 wire delta voltages (1a, 1b, 2c);
    c. listing open delta voltages (1a, 1b, 2c).
7. Demonstrate an understanding of the generation of AC electricity in a wye transformer configuration by
    a. listing low wye voltages (1a, 1b, 2c);

b. listing high wye voltages (1a, 1b, 2c).

8. Use National Electrical Code charts by
   a. determining ampacity (1a, 1b, 2c);
   b. determining disconnect size (1a, 1b, 2c);
   c. computing inductor resistance (1a, 1b, 2c).

9. Explain the principle of operation single phase motors by
   a. defining motor slip (1a, 1b, 2c);
   b. determining starting torque (1a, 1b, 2c);
   c. discussing start winding removal devices (1a, 1b, 2c).

10. Demonstrate an understanding of the effect of capacitance in a single phase motor circuit by
    a. defining start capacitor (1a, 1b, 2c);
    b. defining run capacitor (1a, 1b, 2c);
    c. connecting capacitor motor circuits (1a, 1b, 2c).

11. Connect 3 phase motor circuits by
    a. connecting delta motor circuits (1a, 1b);
    b. connecting wye motor circuits (1a, 1b);
    c. connecting dual voltage motor circuits (1a, 1b).

12. Demonstrate an understanding of solid state circuits by
    a. defining semiconductors (1a, 1b, 2c);
    b. discussing semiconductor theory (1a, 1b, 2c);
    c. listing advantages of semiconductors (1a, 1b, 2c).

HART 2434 - Advanced Air Conditioning Controls

General

HART

Course Number
2434

Course Title
Advanced Air Conditioning Controls

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Theory and application of electrical control devices, electromechanical controls, and/or pneumatic controls. Recommended Prerequisite: HART-1403

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

take hart-1403;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HART 1403

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Install and troubleshoot complex electrical control devices; control circuits; apply A/C control concepts; and analyze the effects of smart energy networks and how they interface with HVAC control systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the purpose of a wiring diagram by
   a. listing the types of wiring diagrams (1a, 1b, 2c, 2d);
   b. describing the advantages and disadvantages of the types of wiring diagrams (1a, 1b, 2c, 2d);
   c. identifying the parts of a wiring diagram (1a, 1b, 2c, 2d);
   d. creating a practical wiring circuit using a wiring diagram (1a, 1b, 1c, 2a, 2c, 2d, 2e).

2. Demonstrate an understanding of the purpose of electrical meters by
   a. identifying a voltmeter, ammeter, and ohmmeter (1a, 1b, 2c, 2d);
   b. determining which meter is best for a particular application or situation (1a, 1b, 2c, 2d);
   c. describing how to physically connect the meter to a circuit for measurement (1a, 1b, 2c, 2d);
   d. measuring voltage, current, and resistance with the proper electric meter (1a, 1b, 1c, 2c, 2d, 2e);
   e. listing the safety precautions when using electric meters (1a, 1b, 2c, 2d);
   f. interpreting meter readings (1a, 1b, 2c, 2d).

3. Demonstrate an understanding of low voltage control circuits by
   a. listing the modes of operation of a typical forced air conditioning and heating system (1a, 1b, 2c, 2d);
   b. explaining why 24 volts AC is used (1a, 1b, 2c, 2d);
   c. creating a low voltage control wiring circuit (1a, 1b, 1c, 2c, 2d, 2e);
   d. describing the color coding of control wiring (1a, 1b, 2c, 2d).

4. Demonstrate an understanding of the function of a thermostat by
   a. identifying the types of thermostats (1a, 1b, 2c, 2d);
   b. describing the advantages and disadvantages of the different types of thermostats (1a, 1b, 2c, 2d);
   c. explaining the operation of auto changeover and multistage thermostats (1a, 1b, 2c, 2d).

5. Demonstrate an understanding of the function of an indoor blower in HVAC equipment by
   a. listing the types of blower motors found in residential and light commercial HVAC (1a, 1b, 2c, 2d);
   b. identifying the type of motor from its electrical wiring connections (1a, 1b, 2c, 2d);
   c. explaining the operation of different types of blower motors (1a, 1b, 2c, 2d);
   d. explaining how to test and adjust an ECM motor (1a, 1b, 2c, 2d);
   e. listing the types of indoor blower relays (1a, 1b, 2c, 2d);
   f. identifying the types of blower motors (1a, 1b, 2c, 2d);

g. creating a practical working multispeed electrical circuit using a PSC motor (1a, 1b, 2c, 2d, 2e).

6. Demonstrate an understanding of the components in a gas furnace by
   a. listing the gas furnace efficiency levels (1a, 1b, 2c, 2d);
   b. identifying the components found in a gas furnace (1a, 1b, 2c, 2d);
   c. explaining the function of the components found in gas furnaces (1a, 1b, 2c, 2d);
   d. creating an electrical connection diagram of a gas furnace (1a, 1b, 1c, 2c, 2d, 2e).
7. Demonstrate an understanding of the components in an electric air handler by
   a. identifying the components found in an electric air handler (1a, 1b, 2c, 2d);
   b. explaining the function of the components in an electric air handler (1a, 1b, 2c, 2d);
   c. creating an electrical connection diagram of an electric air handler (1a, 1b, 1c, 2c, 2d, 2e).
8. Demonstrate an understanding of the low voltage components found in a central air conditioning condensing unit by
   a. identifying the low voltage components in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
   b. explaining the function of the low voltage components in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
   c. listing the types of low voltage switches and relays found in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
   d. describing the operation of pressure switches (1a, 1b, 2c, 2d);
   e. describing the operation of time delay relays (1a, 1b, 2c, 2d);
   f. describing the operation of condensate overflow safety devices (1a, 1b, 2c, 2d).
9. Demonstrate an understanding of the voltage components found in a central air conditioning condensing unit by
   a. identifying the line components found in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
   b. explaining the function of the line voltage components in a central air conditioning condensing unit (1a, 1b, 2c, 2d);
   c. creating an electrical connection diagram of a central air conditioning condensing unit (1a, 1b, 2c, 2d, 2e).
10. Demonstrate an understanding of troubleshooting procedures by
    a. analyzing a system to determine its problem (1a, 1b, 1c, 2c, 2d, 2e);
    b. breaking down areas of a system to focus in on the problem (1a, 1b, 1c, 2c, 2d, 2e);
    c. developing a process of elimination to determine the problem with a system (1a, 1b, 1c, 2c, 2d, 2e);
    d. evaluating the findings of an improperly operating system to that of a properly working system (1a, 1b, 1c, 2c, 2d, 2e);
    e. locating the source of the problem using test equipment (1a, 1b, 1c, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Test and diagnose components, systems, and accessories; complete applicable documentation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the refrigeration cycle by
   a. defining saturated refrigerant, superheat, and sub-cooling (1a, 1b, 2c, 2d);
   b. labeling components in the refrigeration cycle (1a, 1b, 2c, 2d);
   c. describing the function of each refrigeration system component (1a, 1b, 2c, 2d);
   d. showing refrigerant conditions in the refrigeration system (1a, 1b, 2b, 2c, 2d).
2. Demonstrate an understanding of refrigerant charge conditions by
   a. identifying the symptoms of a properly charged system (1a, 1b, 2c, 2d, 2e);
   b. identifying the symptoms of an undercharged system (1a, 1b, 2c, 2d, 2e);
   c. identifying the symptoms of an overcharged system (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of proper airflow in an HVAC system by
   a. explaining proper airflow volume and velocity (1a, 1b, 2c, 2d);
   b. adjusting airflow on a lab system and record readings (1a, 1b, 2c, 2d, 2e);
   c. evaluating a system with variable airflow (1a, 1b, 2c, 2d).
4. Demonstrate the ability to properly dismantle lab equipment by
   a. practicing the replacement of common components in HVAC systems (1a, 1b, 2c, 2d, 2e);
   b. differentiating components of the same type, but different brand or configuration (1a, 1b, 2c, 2d);
   c. identifying defective components through visual and audible analysis (1a, 1b, 2c, 2d, 2e).
5. Demonstrate the ability to diagnose HVAC related problems through computer simulation software by
   a. duplicating conditions that would be found in a malfunctioning system (1a, 1b, 2c, 2d);
   b. analyzing conditions to determine the fault (1a, 1b, 2c, 2d);
   c. performing troubleshooting procedures using test equipment (1a, 1b, 2c, 2d, 2e).
6. Demonstrate the ability to analyze wiring diagrams by
   a. identifying components on a wiring diagram (1a, 1b, 2c, 2d);
   b. describing the operation of a system based on its wiring diagram (1a, 1b, 2c, 2d);
   c. explaining the troubleshooting procedure from the electrical side of the system (1a, 1b, 2c, 2d).

7. Demonstrate an understanding of troubleshooting procedures by
    a. analyzing a system to determine its problem (1a, 1b, 2c, 2d, 2e);
    b. breaking down areas of a system to focus on the problem (1a, 1b, 2c, 2d, 2e);
    c. developing a process of elimination to determine the problem with a system (1a, 1b, 2c, 2d);
    d. evaluating the findings of an improperly operating system to that a of properly working system (1a, 1b, 1c, 2c, 2d, 2e);
    e. locating the source of the problem using test equipment (1a, 1b, 2c, 2d, 2e).

8. Display sound industry based work habits in the laboratory by
    a. employing safe work practices (1a, 1c, 2a);
    b. capitalizing on assigned laboratory activities (1a, 1c, 2a, 2b, 2c);
    c. performing group activities successfully (1a, 1c, 2a, 2b);
    d. calculating service invoice pricing (1a, 2a, 2b, 2e).

9. Demonstrate an understanding of workplace ethics related to HVAC by
    a. reporting troubleshooting findings to the end user (1a, 1b, 1c, 2b, 2c, 2d);
    b. differentiating between ethical and unethical practices (1a, 1b, 1c, 2b, 2c, 2d);
    c. helping end users make educated decisions regarding their HVAC system (1a, 1b, 1c, 2b, 2c, 2d).

HART 2438 - Air Conditioning Installation/Startup

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Install air conditioning equipment and evaluate system performance; demonstrate disposal and recycling of materials, including refrigerants and mercury; demonstrate bending and cutting technique for system piping; and install equipment and ductwork according to industry standards to maximize efficiency.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Display good industry based work habits in the laboratory by
    a. employing safe work practices (1a, 1c, 2a);
    b. capitalizing on assigned laboratory activities (1a, 1c, 2a, 2b, 2c);
    c. performing group activities (1a, 1c, 2a, 2b);
    d. calculating job pricing (1a, 2a, 2b, 2e).

2. Design a condensate removal system by
    a. formulating condensate removal pipe size (1b, 2b, 2c, 2d);
    b. constructing condensate removal piping system (1b, 2d, 2e);
    c. evaluating HVAC system type required (1b, 2a, 2e).

3. Install a functional supply air duct system by
    a. choosing correct materials for specific applications (1a, 1b, 2b, 2d);
    b. fastening system components together (1a, 1b, 2a, 2d);
    c. evaluating system for air tightness (1b, 2d);
    d. determining if system meets state and local code requirements (1a, 1b, 2b).

4. Construct sheet metal duct fitting(s) in the laboratory by
    a. following instructions from a layout (1a, 1b, 2a);
    b. measuring stock for correct size (1b, 2c);
    c. using hand and shop tools (1b, 2c, 2e);
    d. constructing a duct fitting (1b, 2b, 2c, 2e).

5. Demonstrate an understanding of building code references by
    a. relating learned skills to code requirements (1a, 1b, 2c);
    b. deducing which reference to use for specific applications (1a, 1b, 2c);
    c. reading a mechanical code reference book (1a, 1b, 2c);
    d. reading an energy conservation code reference book (1a, 1b, 2c);
    e. reading a fuel gas code reference book (1a, 1b, 2c).

6. Demonstrate the ability to design and construct an HVAC refrigerant piping system by
    a. choosing correct size materials for specific applications (1a, 1b, 2b, 2d);
    b. fastening system components together (1a, 1b, 2a, 2d);
    c. evaluating system for tightness (1b, 2d);
    d. determining if system meets state and local code requirements (1a, 1b, 2b).

7. Design a functioning electric supply circuit by
    a. selecting appropriately sized wiring (1a, 1b, 2b, 2d);
    b. fastening wire in an appropriate manner (1a, 1b, 2a, 2d);
    c. evaluating system for operation (1b, 2d);
    d. determining if system meets state and local code requirements (1a, 1b, 2b).

8. Become NAIMA certified for modular duct board construction by
    a. evaluating duct board materials (1a, 1b, 2b, 2d);
    b. selecting appropriate materials (1a, 1b, 2b, 2d);
    c. building duct modules by hand fabrication (1a, 1b, 2a, 2d);
    d. building duct modules by machine fabrication (1a, 1b, 2a, 2d);
    e. altering duct modules to construct fittings (1a, 1b, 2d);
    f. evaluating fittings for functionality (1b, 2d);
    g. determining if system meets state and local code requirements (1a, 1b, 2b);
    h. completing NAIMA certification successfully (1a, 1b, 2b).

9. Construct an operational HVAC system by
    a. assembling HVAC equipment (1a, 1b, 2b, 2e);
    b. constructing a duct system (1a, 1b, 2b, 2e);
    c. constructing a drainage system (1a, 1b, 2b, 2e);
    d. constructing a refrigerant piping system (1a, 1b, 2b, 2e);
    e. connecting line and low voltage wiring (1a, 1b, 2b, 2e);
    f. evaluating system operation (1a, 1b, 2c, 2d, 2e).

Recommended Prerequisite(s): HART 1441

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply and describe the sequence of operation for commercial air conditioning systems and their accessories; identify components relative to commercial air conditioning; and explain energy efficient and renewable energy technologies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the refrigeration cycle by
    a. defining saturated refrigerant, superheat, and sub-cooling (1a, 1b, 2c, 2d);
    b. labeling components in the refrigeration cycle (1a, 1b, 2c, 2d);
    c. describing the function of each refrigeration system component (1a, 1b, 2c, 2d);
    d. showing refrigerant conditions in the refrigeration system (1a, 1b, 2b, 2c, 2d).

2. Describe applications of commercial air conditioning by
    a. identifying where commercial applications are found (1a, 1b, 2c, 2d);
    b. giving examples of facilities requiring air conditioning (1a, 1b).

3. Identify various commercial air conditioning systems by
    a. identifying a split system and a self-contained system (1a, 1b, 2c, 2d);
    b. differentiating between a split system and a self-contained system (1a, 1b, 2c, 2d, 2e);
    c. locating various fixtures in the lab area (1a, 1b, 2c, 2d, 2e).

4. Demonstrate an understanding of various compressor types and designs by
    a. identifying a reciprocating, scroll, rotary, and screw compressor (1a, 1b, 2c, 2d);
    b. describing the operation of a reciprocating, scroll, rotary, and screw compressor (1a, 1b, 2c, 2d);
    c. identifying an open drive, semi hermetic, and hermetic compressor (1a, 1b, 2c, 2d);
    d. locating various compressor types in the lab area (1a, 1b, 2c, 2d).

5. Perform service procedures on a working air conditioning system by
    a. explaining proper charging procedures (1a, 1b, 1c, 2c, 2d);
    b. adjusting the refrigerant and oil charge in an air conditioning system (1a, 1b, 1c, 2b, 2c, 2d);
    c. describing the effects of an undercharged and overcharged air conditioning system (1a, 1b, 2c, 2d);
    d. altering the refrigerant charge to create a change in system performance (1a, 1b, 1c, 2b, 2c, 2d).

6. Demonstrate an understanding of a pump down cycle by
    a. stating the purpose of the pump down cycle (1a, 1b);
    b. identifying the components that make up a pump down cycle (1a, 1b, 2c, 2d);
    c. determining the cut in, cut out, and differential settings on a low pressure switch (1a, 1b, 2c, 2d);
    d. adjusting a low pressure switch for proper operation (1a, 1b, 2b, 2c, 2d).

7. Demonstrate an understanding of air conditioning accessories in an air conditioning system by
    a. identifying types of accessories (1a, 1b, 2c, 2d);
    b. explaining the purpose of various accessories (1a, 1b, 2c, 2d);
    c. locating various accessories in an air conditioning system (1a, 1b, 2c, 2d).

8. Demonstrate an understanding of refrigerant recovery, recycling, and reclamation by
    a. describing the application of refrigerant recovery, recycling, and reclamation (1a, 1b, 2c, 2d);
    b. differentiating recovery processes (1a, 1b, 2c, 2d);
    c. classifying required evacuation levels on different sizes of equipment (1a, 1b, 2c, 2d);
    d. performing a refrigerant recovery procedure in the lab area (1a, 1b, 1c, 2b, 2c, 2d, 2e).

9. Demonstrate an understanding of types of refrigerants by
    a. ranking refrigerants as to their harmfulness to the environment (1a, 1b, 2c, 2d);
    b. grouping refrigerants based on their temperature application (1a, 1b, 2c, 2d);
    c. defining temperature glide, including its effects (1a, 1b, 2c, 2d).

10. Demonstrate an understanding of condensers by
    a. describing various condenser types (1a, 1b, 2c, 2d);
    b. identifying air cooled, water cooled, and evaporative condensers (1a, 1b, 2c, 2d);
    c. explaining proper cleaning and maintenance procedures for condensers (1a, 1b, 2c, 2d);
    d. evaluating condenser performance on a working system (1a, 1b, 2c, 2d).

11. Demonstrate an understanding of condenser head pressure control by
    a. listing the methods of head pressure control (1a, 1b, 2c, 2d);
    b. identifying the components for various types of head pressure control (1a, 1b, 2c, 2d);
    c. adjusting head pressure controls (1a, 1b, 1c, 2c, 2d, 2e).

12. Demonstrate an understanding of evaporators by
    a. identifying different evaporator designs and types (1a, 1b, 2c, 2d);
    b. describing various evaporator types (1a, 1b, 2c, 2d);
    c. explaining the proper selection procedure of an evaporator (1a, 1b, 2c, 2d).

13. Demonstrate an understanding of an evaporator pressure regulating (EPR) valve by
    a. describing the application of an EPR valve (1a, 1b, 2c, 2d);
    b. identifying an EPR valve (1a, 1b, 2c, 2d);
    c. adjusting an EPR valve (1a, 1b, 2c, 2d, 2e).

14. Demonstrate an understanding of the operation of a thermostatic expansion valve (TXV) by
    a. identifying a TXV (1a, 1b, 2c, 2d);
    b. defining internal and external equalization as it relates to TXVs (1a, 1b, 2c, 2d);
    c. explaining proper adjustment procedure for a TXV (1a, 1b, 2c, 2d);
    d. adjusting a TXV (1a, 1b, 2c, 2d, 2e);
    e. selecting a TXV (1a, 1b, 2c, 2d, 2e).

15. Demonstrate an understanding of capacity control by
    a. explaining five methods of capacity control (1a, 1b, 2c, 2d);
    b. defining compressor/evaporator balance (1a, 1b, 2c, 2d);
    c. describing operation of the different types of capacity control (1a, 1b, 2c, 2d);
    d. identifying types of capacity control devices (1a, 1b, 2c, 2d);
    e. adjusting capacity control devices (1a, 1b, 2c, 2d, 2e).

16. Demonstrate an understanding of an oil separator by
    a. listing the types of oil separators (1a, 1b, 2c, 2d);
    b. explaining the operation of an oil separator (1a, 1b, 2c, 2d);
    c. locating an oil separator in an air conditioning system (1a, 1b, 2c, 2d);
    d. describing other accessories that may be found being used with an oil separator (1a, 1b, 2c, 2d).

17. Demonstrate an understanding of an oil pressure failure safety switch by
    a. explaining how to connect an oil pressure failure safety switch (1a, 1b, 2c, 2d);
    b. identifying an oil pressure failure safety switch (1a, 1b, 2c, 2d);
    c. measuring effective oil pressure (1a, 1b, 2c, 2d, 2e);
    d. constructing an electrical circuit using an oil pressure failure safety switch (1a, 1b, 2c, 2d).

18. Demonstrate an understanding of proper piping design and installation by
    a. describing the types of fittings and piping used in air conditioning refrigerant piping (1a, 1b, 2c, 2d);
    b. evaluating a piping system (1a, 1b, 2c, 2d);
    c. listing the minimum and maximum refrigerant flow velocities (1a, 1b, 2c, 2d);
    d. describing the problems associated with poor piping practices (1a, 1b, 2c, 2d).

19. Demonstrate an understanding of troubleshooting procedures by
    a. analyzing a system to determine its problem (1a, 1b, 2c, 2d, 2e);
    b. breaking down areas of a system to focus on the problem (1a, 1b, 2c, 2d, 2e);
    c. developing a process of elimination to determine the problem with a system (1a, 1b, 2c, 2d);
    d. evaluating the findings of an improperly operating system to that of a properly working system (1a, 1b, 1c, 2c, 2d, 2e);
    e. locating the source of the problem using test equipment (1a, 1b, 2c, 2d, 2e).

HART 2442 - Commercial Refrigeration

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take HART-1441 HART-2431;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): HART 1441 and HART 2431

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain and apply medium and low temperature systems operation; explain and apply ice machine and packaged refrigeration system operation; explain application and conversion procedures of refrigerants related to specific systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the refrigeration cycle by
    a. defining saturated refrigerant, superheat, and sub-cooling (1a, 1b, 2c, 2d);
    b. labeling components in the refrigeration cycle (1a, 1b, 2c, 2d);
    c. describing the function of each refrigeration system component (1a, 1b, 2c, 2d);
    d. showing refrigerant conditions in the refrigeration system (1a, 1b, 2b, 2c, 2d).
2. Describe applications of commercial refrigeration by
    a. identifying where commercial refrigeration is found (1a, 1b, 2c, 2d);
    b. listing the temperature ranges (1a, 1b);
    c. giving examples of products requiring refrigeration (1a, 1b).
3. Identify various commercial refrigeration systems by
    a. identifying a split system and a self-contained system (1a, 1b, 2c, 2d);
    b. differentiating between a split system and a self-contained system (1a, 1b, 2c, 2d, 2e);
    c. locating various fixtures in the lab area (1a, 1b, 2c, 2d, 2e);
    d. identifying an ice machine (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of various compressor types and designs by
    a. identifying a reciprocating, scroll, rotary, and screw compressor (1a, 1b, 2c, 2d);
    b. describing the operation of a reciprocating, scroll, rotary, and screw compressor (1a, 1b, 2c, 2d);
    c. identifying an open drive, semi hermetic, and hermetic compressor (1a, 1b, 2c, 2d);
    d. locating various compressor types in the lab area (1a, 1b, 2c, 2d);
    e. evaluating the performance of a compressor (1a, 1b, 2c, 2d, 2e);
    f. computing compression ratio (1a, 1b, 2c).
5. Perform service procedures on a working refrigeration system by
    a. explaining proper charging procedures (1a, 1b, 1c, 2c, 2d);
    b. adjusting the refrigerant and oil charge in a refrigeration system (1a, 1b, 1c, 2b, 2c, 2d);
    c. describing the effects of an undercharged and overcharged refrigeration system (1a, 1b, 2c, 2d);
    d. altering the refrigerant charge to create a change in system performance (1a, 1b, 1c, 2b, 2c, 2d).
6. Demonstrate an understanding of a pump down cycle by
    a. stating the purpose of the pump down cycle (1a, 1b);
    b. identifying the components that make up a pump down cycle (1a, 1b, 2c, 2d);
    c. determining the cut in, cut out, and differential settings on a low pressure switch (1a, 1b, 2c, 2d);
    d. adjusting a low pressure switch for proper operation (1a, 1b, 2b, 2c, 2d).
7. Demonstrate an understanding of refrigeration accessories by
    a. identifying types of refrigeration accessories (1a, 1b, 2c, 2d);
    b. explaining the purpose of various refrigeration accessories (1a, 1b, 2c, 2d);
    c. locating various refrigeration accessories in a refrigeration system (1a, 1b, 2c, 2d).
8. Demonstrate an understanding of refrigerant recovery, recycling, and reclamation by
    a. describing the application of refrigerant recovery, recycling, and reclamation (1a, 1b, 2c, 2d);
    b. differentiating recovery processes (1a, 1b, 2c, 2d);
    c. classifying required evacuation levels on different sizes of equipment (1a, 1b, 2c, 2d);
    d. performing a refrigerant recovery procedure in the lab area (1a, 1b, 1c, 2b, 2c, 2d, 2e).
9. Demonstrate an understanding of types of refrigerants by
    a. ranking refrigerants as to their harmfulness to the environment (1a, 1b, 2c, 2d);
    b. grouping refrigerants based on their temperature application (1a, 1b, 2c, 2d);
    c. defining temperature glide, including its effects (1a, 1b, 2c, 2d).
10. Demonstrate an understanding of condensers by
    a. describing various condenser types (1a, 1b, 2c, 2d);
    b. identifying air cooled, water cooled, and evaporative condensers (1a, 1b, 2c, 2d);
    c. explaining proper cleaning and maintenance procedures for condensers (1a, 1b, 2c, 2d);
    d. evaluating condenser performance on a working system (1a, 1b, 2c, 2d).
11. Demonstrate an understanding of condenser head pressure control by
    a. listing the methods of head pressure control (1a, 1b, 2c, 2d);
    b. identifying the components for various types of head pressure control (1a, 1b, 2c, 2d);
    c. adjusting head pressure controls (1a, 1b, 1c, 2c, 2d, 2e).
12. Demonstrate an understanding of evaporators by
    a. identifying different evaporator designs and types (1a, 1b, 2c, 2d);
    b. describing various evaporator types (1a, 1b, 2c, 2d);
    c. explaining the proper selection procedure of an evaporator (1a, 1b, 2c, 2d).
13. Demonstrate an understanding of evaporator defrost by
    a. explaining the methods of evaporator defrost (1a, 1b, 2c, 2d);
    b. identifying the components for various types of defrost systems (1a, 1b, 2c, 2d);
    c. determining if a defrost system is functioning properly (1a, 1b, 2c, 2d, 2e);
    d. adjusting a defrost time clock (1a, 1b, 1c, 2c, 2d, 2e).
14. Demonstrate an understanding of an evaporator pressure regulating (EPR) valve by
    a. describing the application of an EPR valve (1a, 1b, 2c, 2d);
    b. identifying an EPR valve (1a, 1b, 2c, 2d);
    c. adjusting an EPR valve (1a, 1b, 2c, 2d, 2e).
15. Demonstrate an understanding of the operation of a thermostatic expansion valve (TXV) by
    a. identifying a TXV (1a, 1b, 2c, 2d);
    b. defining internal and external equalization as it relates to TXV's (1a, 1b, 2c, 2d);
    c. explaining proper adjustment procedure for a TXV (1a, 1b, 2c, 2d);
    d. adjusting a TXV (1a, 1b, 2c, 2d, 2e);
    e. selecting a TXV (1a, 1b, 2c, 2d, 2e).
16. Demonstrate an understanding of capacity control by
    a. explaining five methods of capacity control (1a, 1b, 2c, 2d);
    b. defining compressor/evaporator balance (1a, 1b, 2c, 2d);
    c. describing operation of the different types of capacity control (1a, 1b, 2c, 2d);

d. identifying types of capacity control devices (1a, 1b, 2c, 2d);

e. adjusting capacity control devices (1a, 1b, 2c, 2d, 2e).

17. Demonstrate an understanding of an oil separator by

a. listing the types of oil separators (1a, 1b, 2c, 2d);

b. explaining the operation of an oil separator (1a, 1b, 2c, 2d);

c. locating an oil separator in a refrigeration system (1a, 1b, 2c, 2d);

d. describing other accessories that may be found being used with an oil separator (1a, 1b, 2c, 2d).

18. Demonstrate an understanding of an oil pressure failure safety switch by

a. explaining how to connect an oil pressure failure safety switch (1a, 1b, 2c, 2d);

b. identifying an oil pressure failure safety switch (1a, 1b, 2c, 2d);

c. measuring effective oil pressure (1a, 1b, 2c, 2d, 2e);

d. constructing an electrical circuit using an oil pressure failure safety switch (1a, 1b, 2c, 2d).

19. Demonstrate an understanding of an ice machine by

a. listing the types of ice machines (1a, 1b, 2c, 2d);

b. describing uses of cubed and flaked ice (1a, 1b, 2c, 2d);

c. differentiating a cubed from a flaked ice machine (1a, 1b, 2c, 2d);

d. explaining the operation of a cubed and flaked ice machine (1a, 1b, 2c, 2d);

e. identifying the parts of an ice machine (1a, 1b, 2c, 2d);

f. computing ice production (1a, 1b, 2c, 2d, 2e).

20. Demonstrate an understanding of proper refrigeration piping design and installation by

a. describing the types of fittings and piping used in refrigeration piping systems (1a, 1b, 2c, 2d);

b. evaluating a piping system (1a, 1b, 2c, 2d);

c. listing the minimum and maximum refrigerant flow velocities (1a, 1b, 2c, 2d);

d. describing the problems associated with poor piping practices (1a, 1b, 2c, 2d).

21. Demonstrate an understanding of troubleshooting procedures by

a. analyzing a system to determine its problem (1a, 1b, 2c, 2d, 2e);

b. breaking down areas of a system to focus on the problem (1a, 1b, 2c, 2d, 2e);

c. developing a process of elimination to determine the problem with a system (1a, 1b, 2c, 2d);

d. evaluating the findings of an improperly operating system to that of a properly working system (1a, 1b, 1c, 2c, 2d, 2e);

e. locating the source of the problem using test equipment (1a, 1b, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): HART 1441

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the sequence of operation for industrial systems and its accessories; identify components relative to industrial systems including chilled water systems; troubleshoot systems; and perform program maintenance procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the refrigeration cycle by

a. defining saturated refrigerant, superheat, and sub-cooling (1a, 1b, 2c, 2d);

b. labeling components in the refrigeration cycle (1a, 1b, 2c, 2d);

c. describing the function of each refrigeration system component (1a, 1b, 2c, 2d);

d. showing refrigerant conditions in the refrigeration system (1a, 1b, 2b, 2c, 2d).

2. Describe applications of industrial air conditioning by

a. identifying where industrial applications are found (1a, 1b, 2c, 2d);

b. giving examples of facilities requiring industrial air conditioning (1a, 1b).

3. Identify various industrial air conditioning systems by

a. identifying industrial HVAC system types (1a, 1b, 2c, 2d);

b. differentiating between industrial HVAC system types (1a, 1b, 2c, 2d, 2e);

c. locating various fixtures in the lab area (1a, 1b, 2c, 2d, 2e).

4. Demonstrate an understanding of various compressor types and designs by

a. identifying a reciprocating, scroll, rotary, screw, and centrifugal compressor (1a, 1b, 2c, 2d);

b. describing the operation of a reciprocating, scroll, rotary, screw, and centrifugal compressor (1a, 1b, 2c, 2d);

c. identifying an open drive, semi hermetic, and hermetic compressor (1a, 1b, 2c, 2d);

d. locating various compressor types in the lab area (1a, 1b, 2c, 2d).

5. Perform service procedures on a working air conditioning system by

a. explaining proper charging procedures (1a, 1b, 1c, 2c, 2d);

b. adjusting the refrigerant and oil charge in an air conditioning system (1a, 1b, 1c, 2b, 2c, 2d);

c. describing the effects of an undercharged and overcharged air conditioning system (1a, 1b, 2c, 2d);

d. altering the refrigerant charge to create a change in system performance (1a, 1b, 1c, 2b, 2c, 2d).

6. Demonstrate an understanding of refrigerant recovery, recycling, and reclamation by

a. describing the application of refrigerant recovery, recycling, and reclamation (1a, 1b, 2c, 2d);

b. differentiating recovery processes (1a, 1b, 2c, 2d);

c. classifying required evacuation levels on different sizes of equipment (1a, 1b, 2c, 2d);

d. performing a refrigerant recovery procedure in the lab area (1a, 1b, 1c, 2b, 2c, 2d, 2e).

7. Demonstrate an understanding of types of refrigerants by
    a. ranking refrigerants as to their harmfulness to the environment (1a, 1b, 2c, 2d);
    b. grouping refrigerants based on their temperature application (1a, 1b, 2c, 2d).
8. Demonstrate an understanding of condensers by
    a. describing various condenser types (1a, 1b, 2c, 2d);
    b. identifying air cooled, water cooled, and evaporative condensers (1a, 1b, 2c, 2d);
    c. explaining proper cleaning and maintenance procedures for condensers (1a, 1b, 2c, 2d);
    d. evaluating condenser performance on a working system (1a, 1b, 2c, 2d).
9. Demonstrate an understanding of evaporators by
    a. identifying different evaporator designs and types (1a, 1b, 2c, 2d);
    b. describing various evaporator types (1a, 1b, 2c, 2d);
    c. explaining the proper selection procedure of an evaporator (1a, 1b, 2c, 2d).
10. Demonstrate an understanding of a cooling tower by
    a. describing the application of various cooling tower types (1a, 1b, 2c, 2d);
    b. identifying cooling tower types (1a, 1b, 2c, 2d).
11. Demonstrate an understanding of the operation of a thermostatic expansion valve (TXV) by
    a. identifying a TXV (1a, 1b, 2c, 2d);
    b. defining internal and external equalization as it relates to TXV's (1a, 1b, 2c, 2d);
    c. explaining proper adjustment procedure for a TXV (1a, 1b, 2c, 2d);
    d. adjusting a TXV (1a, 1b, 2c, 2d, 2e);
    e. selecting a TXV (1a, 1b, 2c, 2d, 2e).
12. Demonstrate an understanding of proper condenser water piping design and installation by
    a. describing the types of fittings and piping used in air conditioning condenser water piping (1a, 1b, 2c, 2d);
    b. evaluating a condenser water piping system (1a, 1b, 2c, 2d);
    c. listing the minimum and maximum water flow velocities (1a, 1b, 2c, 2d);
    d. describing the problems associated with poor piping practices (1a, 1b, 2c, 2d).
13. Demonstrate an understanding of proper chilled water piping design and installation by
    a. describing the types of fittings and piping used in air conditioning chilled piping (1a, 1b, 2c, 2d);
    b. evaluating a chilled water piping system (1a, 1b, 2c, 2d);
    c. listing the minimum and maximum water flow characteristics (1a, 1b, 2c, 2d);
    d. describing the problems associated with poor piping practices (1a, 1b, 2c, 2d).
14. Demonstrate an understanding of troubleshooting procedures by
    a. analyzing a system to determine its problem (1a, 1b, 2c, 2d, 2e);
    b. breaking down areas of a system to focus on the problem (1a, 1b, 2c, 2d, 2e);
    c. developing a process of elimination to determine the problem with a system (1a, 1b, 2c, 2d);
    d. evaluating the findings of an improperly operating system to that of a properly working system (1a, 1b, 1c, 2c, 2d, 2e);
    e. locating the source of the problem using test equipment (1a, 1b, 2c, 2d, 2e).

HART 2445 - Residential AC Systems Design

Course Rubric	Course Number	Course Title
HART	2445	Residential Air Conditioning Systems Design

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Study of the properties of air and results of cooling, heating, humidifying or dehumidifying; heat gain and heat loss calculations including equipment selection and balancing the air system.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate heat loss and heat gain; size heating and cooling equipment to the structure; read and interpret detailed HVAC design plans; perform a load calculation using industry standards; and design a complete air distribution system including ventilation requirements and indoor air quality.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Evaluate environmental air conditions using psychrometric standards by
    a. locating the various indices on a psychrometric chart (1a, 1b, 2c);
    b. determining air conditions on a psychrometric chart (1a, 1b, 2c);
    c. predicting supply air conditions on a psychrometric chart (1a, 1b, 2c);
    d. calculating the required BTU's required for specific temperature change (1a, 1b, 2c, 2d).
2. Formulate HVAC system size for a residential structure by
    a. evaluating building materials (1a, 1b, 2c, 2d);
    b. evaluating thermal resistance (1a, 1b, 2c, 2d);
    c. locating the appropriate table values in the Manual J (1a, 1b, 2c, 2d);
    d. determining the correct construction numbers for building materials (1a, 1b, 2c, 2d);
    e. calculating structure loss and gains (1a, 1b, 2c, 2d);
    f. completing the Manual J form 1 (1a, 1b, 2c, 2d, 2e);
    g. determining equipment size requirements (1a, 1b, 2c, 2d, 2e).
3. Design an HVAC duct system by
    a. selecting appropriate materials (1a, 1b, 2c, 2d);
    b. calculating duct static losses (1a, 1b, 2c, 2d);
    c. calculating duct sizes (1a, 1b, 2c, 2d);
    d. estimating duct sizing using a ductulator (1a, 1b, 2c, 2d);
    e. determining correct grill type and size (1a, 1b, 2c, 2d).
4. Calculate a job price quote for a HVAC system by
    a. listing required installation materials (1a, 1b, 2a, 2d);
    b. evaluating material cost and markup (1a, 1b, 2a, 2e);
    c. determining expected labor costs (1a, 1b, 2a, 2d, 2e);
    d. summarizing information into a job price quote (1a, 1b, 2a, 2e).

Required Prerequisite(s): HART 1403 HART 1441 HART 1445 and HART 2445

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain a reverse cycle system; list the mechanical and electrical components for the heat pump operation; and explain the operation of heat pump modes including cooling, heating, defrost, emergency heat, and auxiliary heat mode. Identify and explain different methods of accomplishing defrost; charge a system correctly in the heating and cooling mode; troubleshoot electrical and mechanical components; perform tests for adequate air flow; and determine balance point and coefficiency of performance (C.O.P.); and define attributes of geothermal heat pump systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic heat pump refrigerant cycle by
    a. describing the heat pump refrigerant cycle (1a, 1b, 2c);
    b. sketching the heat pump refrigerant cycle (1a, 1b, 2c);
    c. distinguishing the heat pump refrigerant cycle from standard cooling cycle (1a, 1b, 2c).
2. Demonstrate an understanding of the specialized components of a heat pump system by
    a. locating the heat pump specific components (1a, 1b, 2c);
    b. explaining the purpose of heat pump specific components (1a, 1b, 2c, 2d);
    c. sketching the location of heat pump specific components (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of heat pump thermostats by
    a. describing the operation of heat pump thermostats (1a, 1b, 2c, 2d);
    b. describing the low voltage wiring to a heat pump thermostat (1a, 1b, 2c, 2d);
    c. sketching the low voltage wiring to a heat pump thermostat (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of reversing valves by
    a. describing the operation, installation, and diagnosis of reversing valves (1a, 1b, 2a, 2d);
    b. sketching the location of reversing valves (1a, 1b, 2a, 2d);
    c. listing required installation materials (1a, 1b, 2a, 2d).
5. Demonstrate an understanding of the heat pump defrost cycle by
    a. describing the purpose and sequence of a heat pump defrost cycle (1a, 1b, 2a, 2d);
    b. listing the basic components of a heat pump defrost cycle (1a, 1b, 2a, 2d);
    c. explaining the operation and wiring of the defrost relay (1a, 1b, 2a, 2d).
6. Demonstrate an understanding of defrost controls by
    a. explaining the operation and wiring of defrost controls (1a, 1b, 2a, 2d);
    b. listing the 4 categories of defrost controls (1a, 1b, 2a, 2d);
    c. identifying defrost controls by category (1a, 1b, 2a, 2d).
7. Demonstrate an understanding of heat pump electrical circuits by
    a. explaining the electrical sequence of operation during all 4 modes of a heat pump system (1a, 1b, 2a, 2d);
    b. listing the electrical components of a heat pump system (1a, 1b, 2a, 2d);
    c. sketching the electrical diagram of a heat pump system (1a, 1b, 2a, 2d).
8. Demonstrate an understanding of the balance point of a heat pump system by
    a. defining heat pump balance point (1a, 1b, 2a, 2d);
    b. determining heat pump balance point using a graph (1a, 1b, 2a, 2d);
    c. analyzing the data yielded by the balance point graph (1a, 1b, 2a, 2d).
9. Demonstrate an understanding of geothermal heat pumps by
    a. explaining the operation and installation of geothermal heat pump systems (1a, 1b, 2a, 2d);
    b. listing the components of a geothermal heat pump system (1a, 1b, 2a, 2d);
    c. sketching the refrigerant and water cycles of a geothermal heat pump system (1a, 1b, 2a, 2d).
10. Demonstrate an understanding of troubleshooting techniques for heat pumps by
    a. explaining the troubleshooting flow chart (1a, 1b, 2a, 2d, 2e);
    b. demonstrating troubleshooting techniques on computer simulation (1a, 1b, 2a, 2e);
    c. using troubleshooting techniques on practical lab equipment (1a, 1b, 2a, 2e).

HECO 1322 - Nutrition and Diet Therapy

General

Course Rubric
HECO

Course Number
1322

Course Title
Nutrition and Diet Therapy

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0). This course introduces general nutritional concepts in health and disease and includes practical applications of that knowledge. Special emphasis is given to nutrients and nutritional processes including functions, food sources, digestion, absorption, and metabolism. Food safety, availability, and nutritional information including food labels, advertising, and nationally established guidelines are addressed.

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). Concepts of privacy, security, confidentiality, ethics, health care legislation, and regulations relating to the maintenance and use of health information.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply local, state, and federal standards and regulations for the control and use of health information; demonstrate appropriate health information disclosure practices; and identify and discuss ethical issues in health care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of major components and principles of the U.S. legal system by
    a. identifying civil law origins, functions, and types (1a, 1b, 2c);
    b. identifying public law origin, functions, and types (1a, 1b, 2c);
    c. describing organization of U.S. and Texas legislative systems (1a, 1b, 2c);
    d. describing organization of U.S. and Texas judicial systems (1a, 1b, 2c);
    e. identifying sources of U.S. and Texas laws (1a, 1b, 2c).

2. Demonstrate an understanding of principles of liability as they pertain to health care by
    a. describing corporate liability legislation (1a, 1b, 2c);
    b. describing medical negligence categories and liability (1a, 1b, 2c);
    c. analyzing medical negligence risk factors (1a, 1b, 2c);
    d. discussing civil trial procedures (1a, 1b, 2c).

3. Demonstrate an understanding of health care consent and disclosure guidelines by
    a. describing accreditation and statutory acknowledgement and consent and disclosure guidelines (1a, 1b, 2c);
    b. describing general and informed consent requirements (1a, 1b, 2c);
    c. identifying U.S. and Texas reporting mandates (1a, 1b, 2c);
    d. comparing types of advanced directives, addressing application, and requirements (1a, 1b, 2c).

4. Produce written and oral presentations on assigned topics by
    a. using legal and health care resources to prepare written assignments (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. presenting a self-prepared PowerPoint presentation on an assigned bioethical issue (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Workforce Education Course Manual (WECM)

Description
(3-2-4) Introduction to systems and processes for collecting, maintaining, and disseminating primary and secondary health related information including content of health record, documentation requirements, registries, indices, licensing, regulatory agencies, forms, and screens.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze health record content; describe health information management department function and purpose; differentiate the various types of health care facilities and their records; and identify the various licensing and regulatory agencies in the healthcare industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the role of health care delivery systems by
    a. describing the historical development of medical records and hospitals (1a, 1b, 2c);
    b. comparing health care facility types, ownership categories, and department functions (1a, 1b, 2c);
    c. distinguishing among patient classifications (1a, 1b, 2c).
2. Demonstrate an understanding of the role of the American Health Information Management Association (AHIMA) by
    a. describing AHIMA's history, organizational structure, and responsibilities (1a, 1b, 2c);
    b. identifying AHIMA's membership and certification categories (1a, 1b, 2c).
3. Analyze health records for completion by
    a. identifying sources of documentation requirements (1a, 1b, 2c);
    b. comparing documentation requirements for acute care and specialty facilities (1a, 1b, 2c);
    c. performing qualitative and quantitative analysis (1a, 1b, 2c).
4. Demonstrate an understanding of primary and secondary health information maintenance, retention, and disclosure guidelines by
    a. describing health information security, confidentiality, disclosure, and retention guidelines (1a, 1b, 2c, 2e);
    b. applying straight numeric and terminal digit order filing principles (1a, 1b, 2c);
    c. computing shelving requirements (1a, 1b, 2c).
5. Demonstrate an understanding of health information and forms development by
    a. describing the purpose of forms control (1a, 1b, 2c);
    b. applying forms design elements (1a, 1b, 2c, 2e);
    c. comparing input and output mechanisms (1a, 1b, 2c, 2e).
6. Prepare a research presentation by
    a. presenting a self-prepared PowerPoint presentation on an assigned topic utilizing the internet and TCC library databases (1a, 1b, 2c, 2e);
    b. preparing research presentation outline and bibliography (computer generated) (1a, 1b, 2c, 2e).

Requirements

Requirements
Recommended Prerequisite(s): Any Computer Applications Course

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe general functions, purposes and benefits of health information systems; describe the evolution and adoption of health information systems; compare health information systems in terms of their ability to support the requirements of a health care enterprise; explain the impact of electronic health records on reporting outcomes; explain strategies to minimize major barriers to the adoption of electronic health records; explain the principles of health care data exchange and standards; review workflow design and assessment, and their relationship to patient care, productivity and data analysis; propose the hardware, software, operating system and networking considerations necessary for effective data storage and use in health care organizations; and utilize the tools and techniques for collecting, storing, securing, retrieving, and reporting health care data.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a basic understanding of health information systems in a provider setting by
    a. explaining the origins of the electronic health record (1a, 2c);
    b. defining health information technology (1a, 1b, 2c, 2d, 2e);
    c. identifying the key elements in government programs for incentivizing the use of the electronic health information system (1a, 1b, 2a, 2c);
    d. describing the conceptual model of electronic health information system in a provider setting (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of information systems theory by
    a. explaining general systems theory and its relevance to the components of health information technology (1a, 1b, 2c);
    b. describing the general information theory as it relates to developing data infrastructure (1a, 1b, 2c, 2d).
3. Construct a strategic plan for health information technology by
    a. defining the purpose and scope of strategic planning for health IT (1a, 1b, 2a, 2c, 2d, 2e);
    b. discussing the strategic planning process (1a, 1b, 1c, 2a, 2c);
    c. recognizing the tools to manage change in order to effect clinical transformation expected from health IT (1b, 1c, 2d, 2e);
    d. explaining how to construct a migration path to a health information system (1a, 1b, 2a, 2c, 2d, 2e);
    e. identifying critical success factors in health IT strategic planning (1b, 2c, 2d, 2e).
4. Demonstrate an understanding of data infrastructure in a health information system by
    a. defining data types and data formats (1a, 1b, 2c, 2d, 2e);
    b. distinguishing between types of data infrastructure (1b, 2c, 2e);
    c. defining data management (1a, 1b, 2c);
    d. describing the techniques of data modeling (1a, 1b, 1c, 2c, 2e);
    e. applying data types and formatting principles (1a, 1b, 2c, 2e);
    f. constructing a data dictionary (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of health information technology by
    a. identifying the input/output, storage, processing, network, and hardware associated with health information systems (1a, 1b, 2c, 2d, 2e);
    b. identifying the types of software that support health information systems (1a, 1b, 2c, 2d, 2e);
    c. recommending improvements to usability and data quality in health IT (1a, 1b, 2b, 2c, 2d, 2e);
    d. evaluating strategies to address emerging technologies (1a, 1b, 2c, 2e).
6. Demonstrate understanding in privacy and security in health information systems by
    a. explaining the federal privacy and security standardization efforts (1a, 1b, 2b, 2c, 2e);
    b. discussing the steps necessary to manage a breach of protected health information (1a, 1b, 1c, 2b, 2c, 2e);
    c. summarizing administrative and physical factors that reduce risks to privacy and security in a health IT environment (1a, 1b, 2c);
    d. recommending strategies for addressing privacy and security threats (1a, 1b, 2b, 2c, 2d, 2e).

7. Demonstrate understanding of interoperability in health information systems by
    a. defining interoperability (1a, 1b, 2c, 2d, 2e);
    b. describing technical standards for interoperability (1a, 1b, 2c, 2e);
    c. applying technical standards for interoperability (1a, 1b, 2a, 2c, 2d, 2e);
    d. differentiating forms of health information exchange architectures (1b, 1b, 2c, 2d, 2e);
    e. assessing the importance of interoperability (1a, 1b, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply nomenclatures and classification systems and assign codes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the structure of the ICD-9-CM Coding Classification System by
    a. explaining the history of coding (1a, 1b, 2c);
    b. differentiating between nomenclature and classification (1a, 1b, 2c, 2d, 2e);
    c. identifying the format of the ICD-9-CM coding system (1a, 1b, 2c, 2d, 2e);
    d. identifying the difference between ICD-9-CM and ICD-10 (1b, 1c, 2b).
2. Demonstrate understanding of the ICD-9-CM coding by
    a. explaining ICD-9-CM convention (1a, 1b, 2c);
    b. identifying Uniform Hospital Discharge Data Sets (UHDDS) (1a, 1b, 2c);
    c. listing basic coding steps (1a, 1b, 2c);
    d. applying basic coding guidelines for disease and injuries (1a, 1b, 2c, 2d, 2e);
    e. employing coding guidelines for operations and procedures (1a, 1b, 2c, 2d, 2e).
3. Demonstrate ability to code disease processes and injuries associated with specific body systems by
    a. explaining the coding guidelines for specific diseases and injuries (1a, 1b, 2c);
    b. defining principal diagnosis (1a, 1b, 2c, 2d, 2e);
    c. displaying ability to assign ICD-9-CM codes for diseases and injuries (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to sequence ICD-9-CM according to UHDDS guidelines (1a, 1b, 2c, 2d, 2e).
4. Display ability to code procedures and operations associated with specific body systems by
    a. explaining the coding guidelines for specific procedures and operations (1a, 1b, 2c);
    b. defining principal procedure (1a, 1b, 2c);
    c. displaying ability to assign ICD-9-CM procedure codes (1a, 1b, 2c, 2e);
    d. displaying ability to sequence ICD-9-CM according to UHDDS guidelines (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply nomenclatures and classification systems and assign codes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the structure of the HCPCS Coding System by
    a. explaining the history of the HCPCS coding system (1a, 1b, 2c);
    b. differentiating between nomenclature and classification (1a, 1b, 2c, 2d, 2e);
    c. identifying the format of each level of the HCPCS coding system (1a, 1b, 2c, 2d, 2e);
    d. explaining the use of each level of the HCPCS Coding System (1a, 1b, 2c, 2d);
    e. outlining HCPCS conventions (1a, 1b, 2c);
    f. differentiating between ICD-9-CM and HCPCS coding systems (1b, 1c, 2b).
2. Demonstrate understanding of coding physician services by
    a. identifying the types of physician services in Level 1 of HCPCS (1a, 1b, 2c);
    b. listing the steps for selecting the level of evaluation and management service (1a, 1b, 2c);
    c. determining the level of evaluation and management service provided (1a, 1b, 2c, 2e);
    d. displaying ability to assign evaluation and management codes (1a, 1b, 2c, 2e).
3. Demonstrate understanding of coding anesthesia services by
    a. identifying the structure of anesthesia section in Level 1 of HCPCS;
    b. outlining the structure of anesthesia section in HCPCS, Level 1 (1a, 1b, 2c);
    c. determining the anesthesia services provided (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to assign Level 1 HCPCS codes for anesthesia services (1a, 1b, 2c, 2d, 2e).
4. Demonstrate understanding of coding surgical services by
    a. identifying the structure of surgery section in Level 1 of HCPCS;
    b. outlining the structure of surgery section in HCPCS, Level 1 (1a, 1b, 2c);
    c. determining the surgical services provided (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to assign Level 1 HCPCS surgery codes for physician services (1a, 1b, 2c, 2d, 2e);
    e. displaying ability to assign Level 1 HCPCS surgery codes for hospital services (1a, 1b, 2c, 2d, 2e).
5. Demonstrate understanding of coding radiology services by
    a. outlining the structure of radiology section in HCPCS, Level 1 (1a, 1b, 2c);
    b. determining the radiology service provided (1a, 1b, 2c, 2d, 2e);
    c. displaying ability to assign Level 1 HCPCS radiology codes for physician services (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to assign Level 1 HCPCS radiology codes for hospital services (1a, 1b, 2c, 2d, 2e).
6. Demonstrate understanding of coding pathology and laboratory services by
    a. identifying the structure of pathology and lab section in Level 1 of HCPCS (1a, 1b, 2c);
    b. outlining the structure of pathology and lab section in HCPCS, Level 1 (1a, 1b, 2c);
    c. determining the pathology and laboratory services provided (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to assign Level 1 HCPCS codes for pathology and laboratory services (1a, 1b, 2c, 2d, 2e).
7. Demonstrate understanding of coding medicine services by
    a. identifying the structure of the medicine section in Level 1 of HCPCS (1a, 1b, 2c);
    b. outlining the structure of medicine section in HCPCS, Level 1 (1a, 1b, 2c);
    c. determining the medicine services provided (1a, 1b, 2c, 2d, 2e);
    d. displaying ability to assign Level 1 HCPCS codes for medicine services (1a, 1b, 2c, 2d, 2e).

HITT 1345 - Health Care Delivery Systems

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Examination of delivery systems including organization, financing, accreditation, licensure, and regulatory agencies.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify components and functions of multiple health care delivery systems to include accreditation, licensure, regulations, payment, and reimbursement systems; describe routine institutional statistics; interpret health care data; prepare health care data for presentation purposes; and evaluate reliability and validity of health care data.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the three measures of central tendency by
    a. defining mean, median, and mode (1a, 1b, 2c);
    b. identifying the relationship between mean, median, and mode (1a, 1b, 2d);
    c. computing mean, median, and mode (1a, 1b, 2c, 2e).

2. Demonstrate knowledge of hospital specific statistical data by
    a. defining rate (1a, 1b, 2c);
    b. defining percentage (1a, 1b, 2c);
    c. outlining statistic preparation steps (1a, 1b, 2b, 2c);
    d. identifying primary statistic sources (1a, 1b, 2c);
    e. differentiating between intra-hospital transfer and discharge transfer (1a, 1b, 2c).

3. Demonstrate understanding of hospital census by
    a. distinguishing between a day of leave of absence and leave of absence (1a, 1b, 2c);
    b. differentiating between inpatient census and daily inpatient census (1a, 1b, 2c);
    c. listing inpatient census taking conventions (1a, 1b, 2c);
    d. citing newborn transfer admission category (1a, 1b, 2c);
    e. computing inpatient census (1a, 1b, 2a, 2c, 2d);
    f. computing total inpatient service days (1a, 1b, 2a, 2c, 2d);
    g. computing average daily inpatient census (1a, 1b, 2a, 2c, 2d).

4. Demonstrate understanding of hospital occupancy rates by
    a. defining occupancy rate (1a, 1b, 2c);
    b. finding inpatient bed count (1a, 1b, 2c);
    c. identifying the elements required to compute occupancy rate (1a, 1b, 2c);
    d. computing occupancy rate (1a, 1b, 2a, 2c, 2d).

5. Demonstrate understanding of hospital mortality rates by
    a. identifying the elements required to compute mortality rates (1a, 1b, 2c);
    b. differentiating between net death rate and gross death rate (1a, 1b, 2c);
    c. contrasting hospital neonatal death and hospital fetal death (1a, 1b, 2c);
    d. computing hospital mortality rates (1a, 1b, 2a, 2c, 2d);
    e. modifying formula to determine unconventional statistical data (1a, 1b, 2a, 2c, 2d).

6. Demonstrate understanding of hospital autopsy rates by
    a. identifying the elements required to compute autopsy rates (1a, 1b, 2c);
    b. differentiating net rate, gross, and hospital autopsy rates (1a, 1b, 2c);
    c. computing hospital autopsy rates (1a, 1b, 2a, 2c, 2d).

7. Demonstrate understanding of other key miscellaneous statistical data by
    a. defining key terms (1a, 1b, 2c);
    b. choosing the appropriate formula (1a, 1b, 2c);
    c. identifying the key elements of the formulas (1a, 1b, 2c);

d. computing miscellaneous hospital statistics (1a, 1b, 2a, 2c, 2d).

8. Demonstrate understanding of the purpose, function, and limitations of various data displays by
    a. constructing a table displaying the data when given selected data (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing calculations with the Microsoft Office Excel and Access applications (2c, 2e);
    c. analyzing information derived from Microsoft Office applications (1a, 1b, 2a, 2c, 2d, 2e);
    d. developing probable explanations based on interpretation of the data (1a, 1b, 2c).
9. Demonstrate ability to present oral presentations of various health care topics by
    a. displaying ability to research health care professions and health care trends in the United States (1a, 1c, 2c);
    b. evaluating the role of health care professions (1a, 1b, 1c, 2c);
    c. identifying a current health care trend (1a, 1b, 2c);
    d. preparing an oral presentation on a health care profession and current trend (1a, 1b, 1c, 2c);
    e. presenting an oral presentation on a health care profession and a current trend (1a, 1b, 1c).
10. Demonstrate understanding of health care delivery systems in the United States by
    a. defining key terms in health care delivery (1a, 1b, 2c);
    b. explaining the role of information systems in health care (1a, 1b, 2c);
    c. identifying the function of the electronic health record in health care delivery (1a, 1b);
    d. identifying various types of managed care (1a, 1b, 2c).

HITT 2149 - RHIT Competency Review

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-2) Review Health Information Technology (HIT) competencies, skills, and knowledge.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform self-assessment of HIT competencies; resolve learning gaps.

Students will demonstrate competency in the six domains of the Registered Health Information Technology (RHIT) Certification Exam curriculum: (1) health data content, data structure, and information governance; (2) access, disclosure, privacy, and security; (3) data analytics; (4) revenue cycle management; (5) health information compliance; (6) leadership.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of health data content, data structure, and data governance by
    a. defining the legal health record (1a, 1b);
    b. applying health information guidelines (1a, 1b, 2a);
    c. auditing content and completion of the legal health record (1a, 1b, 2e);
    d. maintaining secondary health information (1a, 1b, 2a, 2d, 2e);
    e. coordinating document control (1a, 1b, 2b);
    f. maintaining the Master Patient Index (2c, 2d, 2e).
2. Demonstrate an understanding of access, disclosure, privacy, and security of patient information by
    a. applying laws and regulations in managing disclosure of patient health information (1a, 1b, 2c);
    b. determining right of access to the legal health record (1a, 1b, 1c, 2c, 2e);
    c. conducting privacy and security audits (1a, 1b, 2c, 2d, 2e);
3. Demonstrate competency in data analytics and use by
    a. abstracting and analyzing patient data (1a, 1b, 1c);
    b. analyzing privacy and security audits (1a, 1b, 2c, 2d);
    c. creating data reports (1a, 1b, 2c, 2d);
    d. compiling healthcare statistics (1a, 1b, 2c);
    e. analyzing healthcare statistics (1a, 1b, 2c, 2d, 2e).
4. Demonstrate competency in revenue cycle management by
    a. converting medical information to alpha-numeric information (coding the medical record) (1a, 1b, 2a, 2c, 2d, 2e);
    b. analyzing physician query (1a, 1b, 1c, 2c, 2d);
    c. conducting resource utilization reviews (1a, 1b, 2d, 2e);
    d. auditing coded health information (1a, 1b, 2c);
    e. analyzing case mix index (1a, 1b, 2c, 2d).
5. Demonstrate an understanding of health information compliance by
    a. refining departmental policies and procedures (1a, 1b, 1c, 2c, 2d, 2e);
    b. performing quality assessment (1a, 1b, 2c, 2d, 2e);
    c. assessing risk (1b, 2c, 2d, 2e);
    d. ensuring health information compliance (1a, 1b, 2d, 2e).
6. Demonstrate an understanding of leadership in health information management by
    a. providing education regarding health information management (HIM) laws and regulations (1a, 1b, 2b);
    b. recommending improvements to HIM procedures (1a, 1b, 2b, 2e);
    c. collaborating with other departments for HIM interoperability ((1a, 1b, 2b, 2d, 2e);
    d. providing HIM technical expertise (1a, 1b, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Demonstrate professional conduct in the work place by
    a. adhering strictly to hospital policy on attendance (1b, 1c, 2b);
    b. demonstrating punctuality (1b, 1c, 2b);
    c. complying with hospital's dress code (1a, 1b, 1c, 2b);
    d. receiving constructive criticism (1b, 1c, 2b);
    e. developing working relationships (1b, 1c, 2b);
    f. executing work duties with minimum supervision (1b, 1c, 2b).
2. Demonstrate understanding of medical coding outpatient services by
    a. defining clinic, emergency department, observation, and outpatient surgery (1a, 1b, 2c);
    b. citing ambulatory services coding guidelines (1a, 1b, 2c, 2e);
    c. complying with ambulatory services coding guidelines (1a, 1b, 2c, 2e);
    d. assigning codes for ambulatory services (1a, 1b, 2d, 2e);
    e. reporting daily activity (1a, 2c).
3. Demonstrate understanding of medical coding of inpatient services by
    a. defining key terms (1a, 1b, 2c);
    b. citing inpatient services coding guidelines (1a, 1b, 2d);
    c. complying with inpatient services coding guidelines (1a, 1b);
    d. assigning codes for inpatient services (1b, 1c, 2c, 2d, 2e).
4. Demonstrate understanding of reimbursement policies for hospital services by
    a. evaluating coding and reimbursement software application (1b, 1c, 2c, 2d, 2e);
    b. determining appropriate DRG/APC assignment (1b, 1c, 2c, 2d, 2e);
    c. auditing claims for coding errors (1b, 1c, 2c, 2d, 2e);
    d. analyzing returned claims (1b, 1c, 2c, 2d, 2e);
    e. verifying correct coding assignment (1b, 1c, 2c, 2d, 2e).

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Participate successfully in clinical experiences related to HIM records processing functions by
    a. explaining clinical site admitting procedures and numbering systems (1a, 1b, 2c, 2e);
    b. utilizing clinical site master patient index and other indices and registries as directed (1a, 1b, 2c, 2e);
    c. demonstrating the ability to locate and file clinical site patient records (1a, 1b, 2c, 2e);
    d. performing record completion and enforcement procedures (1a, 1b, 2c, 2e);
    e. preparing patient records for storage (1a, 1b, 2c, 2e);
    f. describing receptionist duties (1a, 1b, 2c, 2e);
    g. describing release of information procedures (1a, 1b, 2c, 2e);
    h. explaining statistical report procedures (1a, 1b, 2c, 2e);
    i. preparing daily statistical report (1a, 1b, 2c, 2e);
    j. explaining record retention policies (1a, 1b, 2c, 2e).
2. Participate successfully in clinical experiences related to performance improvement and quality assessment by
    a. performing assigned performance improvement and quality assessment activities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. performing assigned specialized management projects (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Improve a work related process by
    a. utilizing performance improvement and quality assessment tools to evaluate the problem (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. utilizing performance improvement and quality assessment tools to develop a solution (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. preparing a presentation to describe the problem, tools utilized, and the solution (1a, 1b, 2c, 2e).
4. Display professional attributes by
    a. demonstrating professional conduct and appearance (1a, 1b, 1c, 2a, 2b, 2c);
    b. demonstrating professional interpersonal relations and communications (1a, 1b, 1c, 2a, 2b, 2c);
    c. displaying self-management skills (1c, 2a);
    d. choosing ethical courses of action (1b, 1c, 2a, 2b, 2c);
    e. preparing daily clinical reports according to guidelines (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze project requirements; define project lifecycle; apply project management and change management principles; create implementation plans to achieve project requirements; use tools and techniques for project planning, monitoring, risk management and control; and discuss team dynamics in relation to project management techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a basic understanding of project management by
    a. defining project management and how it differs from operations (1a, 2a);
    b. describing project management knowledge areas (1a, 1b, 2a, 2c);
    c. describing key roles and skills of project managers (1b, 1c, 2b);
    d. discussing the challenges of project management (1b, 2c, 2d);
    e. outlining the essential project manager tools (2a, 2d, 2e).
2. Describe the processes that establish the foundation of a project by
    a. demonstrating how to define a project (1a, 1b, 2a);
    b. describing the key principles of project planning (1a, 1b, 2c);
    c. describing the essential elements of a project plan (1a, 2a, 2c);
    d. demonstrating how to develop a project schedule (1a, 1b, 2a, 2c);
    e. discussing project budget determination (1b, 2a).
3. Demonstrate processes to effectively monitor, track, correct, and protect a project's performance by
    a. describing management fundamentals for project control (1c, 2b);
    b. demonstrating techniques for project control and performance reporting (1b, 1c, 2b, 2d);
    c. discussing project change types and how to manage project change (1b, 2c, 2d, 2e);
    d. demonstrating how to manage project deliverables and quality (1b, 2a, 2d);
    e. discussing project issues and risk management (1b, 1c, 2a, 2d).
4. Describe the key leadership and people-focused skills to meet project demands by
    a. describing the difference between managing and leading a project (1c, 2b);
    b. discussing the importance of effective project communication and best use of each communication tool (1b, 2b, 2d, 2e);
    c. discussing critical expectation components to manage stakeholder expectations (1b, 1c, 2a, 2b, 2c);
    d. discussing key management principles to improve project team performance (1b, 1c, 2b, 2e);
    e. discussing techniques to manage cross-functional projects and vendors (1b, 1c, 2b, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Sequence codes according to established guidelines and standards; and apply reimbursement methodologies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of healthcare reimbursement systems in the United States by
    a. identifying the different types of healthcare reimbursement systems (1a, 1b, 2d);
    b. differentiating the different code sets approved by HIPAA (1a, 1b, 2c, 2d);
    c. conforming to federal coding compliance requirements that influence reimbursement (1a, 1b, 2c).
2. Demonstrate understanding of various voluntary healthcare insurance by
    a. defining voluntary healthcare insurance (1a, 1b, 2c);
    b. differentiating major types of voluntary healthcare insurance plans (1a, 1b, 2c);
    c. defining basic language associated with reimbursement by commercial health insurance plans (1a, 1b, 2c, 2d);
    d. explaining common models and policies of payment for commercial healthcare insurance plans (1a, 1b, 2c, 2d, 2e).
3. Describe the characteristics of various prospective payment systems by
    a. differentiating major types of Medicare and Medicaid prospective payment systems (1a, 1b, 2c, 2d);
    b. identifying the basic components of the inpatient prospective payment system (1a, 1b, 2c, 2d, 2e);
    c. identifying the major components of the outpatient prospective payment system (1a, 1b, 2c, 2d, 2e);
    d. explaining common models and policies of payment for outpatient and inpatient Medicare and Medicaid prospective payment systems (1a, 1b, 2c, 2d, 2e).
4. Demonstrate understanding of revenue cycle management by
    a. comprehending the components of the revenue cycle (1a, 1b, 2c);
    b. defining revenue cycle management (1a, 1b, 2c);
    c. describing the importance of effective revenue cycle management (1a, 1b, 2c, 2d).
5. Apply advanced coding techniques by
    a. applying diagnoses and procedure codes using ICD-9-CM and HCPCS coding systems (1a, 1b, 2c, 2d, 2e);
    b. ensuring accuracy of diagnostic and procedural groupings using the DRG and APC systems (1a, 1b, 2c, 2d, 2e);
    c. displaying ability to validate coding accuracy using clinical information found in the health record (1a, 1b, 2c);
    d. working with electronic applications that support clinical classification and coding assignments (1a, 1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Coordinate the utilization of internal and external resources; apply problem solving, conflict resolution, leadership and decision-making skills, analyze budgets; evaluate contracts; develop team building techniques; and identify local, state, and federal labor regulations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Summarize health information related leadership roles (1a, 1b).
2. Apply the fundamentals of team leadership (1a, 1b, 2b, 2d).
3. Organize and facilitate meetings (2a, 2b).
4. Recognize the impact of change management on processes, people, and systems (2a, 2b, 2c, 2d, 2e).
5. Utilize tools and techniques to monitor, report, and improve processes (2d, 2e).
6. Identify cost-saving and efficient means of achieving work processes and goals (2a, 2d).
7. Report staffing levels and productivity standards for health information functions (2a, 2c).
8. Adhere to work plans, policies, procedures, and resource requisitions in relation to job functions (1a, 1b, 1c).
9. Explain the methodology of training and development (1a, 1b, 2a).
10. Explain the return on investment for employee training and development (1a, 1b, 2a, 2b).
11. Plan budgets (1a, 1b, 1c, 2a).
12. Explain accounting methodologies (1a, 1b, 2a, 2c).
13. Summarize project management methodologies (2c, 2e).

HITT 2343 - Quality Assessment/Perform Improvement

General

Course Key
10554

Course Rubric
HITT

Course Number
2343

Course Title
Quality Assessment/Performance Improvement

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Study of quality standards and methodologies in the health information management environment. Topics include licensing, accreditation, compilation and presentation of data in statistical formats, quality management and performance improvement functions, utilization management, risk management, and medical staff data quality issues. Approaches to assessing patient safety issues and implementation of quality management and reporting through electronic systems.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Monitor compliance with governmental and organizational regulations and accreditation standards; use tools to perform quality assessment and improvement; identify potential risk management issues; define utilization and resource management functions; and assist in medical staff quality improvement functions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of health care quality standards by
    a. distinguishing among licensure, certification, and accreditation (1a, 1b, 2c);
    b. identifying common hospital accreditation agencies (1a, 1b, 2c);
    c. applying health information accreditation guidelines to policy writing and chart analysis (1a, 1b, 2b, 2c, 2e).
2. Demonstrate an understanding of performance improvement by
    a. tracing the evolution from quality assurance to performance improvement (1a, 1b, 2c, 2d);
    b. describing performance improvement accreditation standards (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of performance improvement plans by
    a. describing performance improvement, utilization management, and risk management components, concepts, and pioneers (1a, 1b, 2c, 2d);
    b. analyzing processes utilizing accreditation standards and performance improvement tools (1a, 1b, 2b, 2c, 2e);
    c. comparing performance improvement standards for all types of health care facilities (1a, 1b, 2c, 2d);
    d. writing policies and procedures based on these standards (1a, 1b, 2b, 2c, 2d, 2e).
4. Apply medical staff performance improvement and data quality accreditation standards by
    a. describing medical staff structure, governance, credentialing, and peer review accreditation standards (1a, 1b, 2c, 2d);
    b. writing policies and procedures based on these standards (1a, 1b, 2b, 2c, 2d, 2e).
5. Apply specialized Health Information Management performance improvement tools by
    a. describing the purpose of staffing and workflow management tools (1a, 1b, 2c, 2d);
    b. describing the purpose of work simplification, job analysis, and job evaluation tools (1a, 1b, 2c, 2d);
    c. using these tools to improve workflow and performance (1a, 1b, 2b, 2c, 2d, 2e).
6. Display ability to assess the role of the Health Information Management professional in maintaining data integrity by
    a. identifying characteristics of data quality (1a, 1b, 2c);
    b. identifying data integrity standards setting organizations (1a, 1b, 2c);
    c. describing the purpose of Recovery Audit Contractors (RACs) and Regional Health Information Organizations (RHIOs) (1a, 1b, 2c);
    d. analyzing potential effects of substandard data quality on patient outcomes and health care facility economic stability (1a, 1b, 2a, 2c).

HITT 2346 - Advanced Medical Coding

General

Course Key
7540

Course Rubric
HITT

Course Number
2346

Course Title
Advanced Medical Coding

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Advanced concepts of ICD and CPT coding rules, conventions, and guidelines in complex case studies. Investigation of government regulations and changes in health care reporting.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze health records to assign principal/secondary diagnoses and procedures; and assign reimbursement methodologies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of conditions affecting pregnancy, childbirth, and the puerperium by
    a. identifying the coding guidelines for coding complications of pregnancy, abortion, childbirth, and puerperium (1a, 1b, 2c);
    b. analyzing the steps for selecting pregnancy, abortion, childbirth, and puerperium codes (1a, 1b, 2c, 2d);
    c. diagramming a decision tree for coding complications of pregnancy, abortion, childbirth, and puerperium (1a, 1b, 2c);
    d. analyzing the fifth digit classification in conditions of pregnancy, childbirth, and puerperium (1b, 1c, 2b);
    e. displaying ability to assign ICD-9 codes for complications of pregnancy, abortion, childbirth, and puerperium (1a, 1b, 2c, 2d, 2e).
2. Demonstrate understanding of the coding classification of congenital anomalies and perinatal conditions by
    a. distinguishing between congenital and acquired conditions (1a, 1b, 2c);
    b. explaining the difference between congenital and perinatal deformities (1a, 1b, 2c);
    c. listing the coding guidelines for congenital and perinatal conditions (1a, 1b, 2c);
    d. displaying ability to assign codes for congenital anomalies and perinatal conditions (1a, 1b, 2c, 2d, 2e).
3. Demonstrate understanding of coding disease processes associated with diseases of the circulatory system by
    a. identifying the coding guidelines for coding diseases of the circulatory system (1a, 1b, 2c);
    b. classifying complex disorders related to the circulatory system (1a, 1b, 2c, 2d, 2e);
    c. using the ICD-9-CM hypertension table (1a, 1b, 2c, 2d, 2e);
    d. distinguishing between the different conditions regarded as ischemic heart disease (1a, 1b, 2c);
    e. classifying procedures involving the circulatory system (1a, 1b, 2c, 2d, 2e);
    f. displaying ability to sequence circulatory system codes according to UHDDS guidelines (1a, 1b, 2c, 2d, 2e).
4. Demonstrate understanding of coding conditions and procedures associated with neoplasm by
    a. outlining the coding guidelines for specific conditions and procedures associated with neoplasm (1a, 1b, 2c);
    b. explaining the various classifications of neoplasm (1a, 1b, 2c);
    c. displaying ability to assign ICD-9-CM codes for neoplasm conditions and procedures (1a, 1b, 2c, 2e);
    d. displaying ability to sequence ICD-9-CM neoplasm codes according to UHDDS guidelines (1a, 1b, 2c, 2d).
5. Demonstrate understanding of coding of complex infectious disease processes by
    a. explaining the pathological progression of certain complex infectious diseases (1a, 1b, 2c);
    b. selecting ICD-9-CM codes for complex infectious diseases (1a, 1b, 2c, 2d, 2e);
    c. defending ICD-9-CM code selections for complex infectious diseases (1a, 1b, 2c, 2d);
    d. displaying ability to sequence ICD-9-CM infectious disease codes according to UHDDS guidelines (1a, 1b, 2c, 2d, 2e).

HMSY 1371 - Computer Crime

Course Key
12890

Course Rubric
HPRS

Course Number
1202

Course Title
Wellness and Health Promotion

Semester Credit Hours
2

Lecture Hours
2

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) An overview of wellness theory and its application throughout the life span. Focus is on attitude development, impact of cultural beliefs, and communication of wellness.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain personal, social, cultural, nutritional, and environmental components of wellness and prevention; correlate concepts of wellness and healthy lifestyle; and develop health promotion strategies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss and analyze the theory and philosophy of health attitude development (1a, 1b, 1c, 2b, 2c, 2e).
2. Outline the components of holistic health for healthy individuals across the lifespan (1a, 1b, 1c, 2b, 2c, 2e).
3. Develop a personal wellness program including nutrition, exercise, and stress reduction (1a, 1b, 1c, 2b, 2c, 2e).
4. Discuss and analyze the impact of health issues on the individual's environment and community (1a, 1b, 1c, 2b, 2c, 2e).
5. Evaluate the role of gender, ethnicity, gender identity, age, and sex in health disparities (1a, 1b, 1c, 2b, 2c, 2e).
6. Research, analyze, and present a current health issue project (1a, 1b, 1c, 2b, 2c, 2e).
7. Analyze the role of the health provider in addressing health lifestyle issues both personally and in others (1a, 1b, 1c, 2b, 2c, 2e).

HPRS 1206 - Essentials of Medical Terminology

General

8413

Course Rubric
HPRS

Course Number
1206

Course Title
Essentials of Medical Terminology

Semester Credit Hours
2

Lecture Hours
2

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). A study of medical terminology, word origin, structure, and application.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define, pronounce, and spell medical terms with the use of medical references as resource tools; utilize terms in context; analyze medical terms; examine word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding and appropriate usage of medical terms related to the various systems of the human body by
    a. defining assigned terms (1a, 1b, 2c);
    b. defining word parts (1a, 1b, 2c);
    c. defining abbreviations (1a, 1b, 2c);
    d. writing medical terms with correct spelling (1a, 1b, 2c).
2. Demonstrate the ability to analyze medical terms related to the various systems of the human body by
    a. determining word parts (1a, 1b, 2c);
    b. writing word parts (1a, 1b, 2c);
    c. dividing word parts (1a, 1b, 2c);
    d. labeling word parts (1a, 1b, 2c).

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A study of the concepts that serve as the foundation for health profession courses, including client care and safety issues, basic client monitoring, and health documentation methods.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Comply with national, state, and local regulatory agencies; respond to basic medical emergencies; perform client monitoring skills; and document health care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comply with national, state, and local regulatory agencies by displaying knowledge of and following the guidelines of the accrediting bodies (1a, 1b, 1c, 2b, 2c, 2e).
2. Respond to basic medical emergencies by demonstrating competence in ACLS, BLS, and other patient care needed in medical emergencies (1a, 1b, 1c, 2b, 2c, 2e).
3. Perform client monitoring skills such as BP, EKG, temperature, and oxygen saturation (1a, 1b, 1c, 2b, 2e).
4. Document health care by complying with documentation standards set by each medical institution (1a, 1b, 1c, 2b, 2e).

Description
(4-3-2) An exploration of the subsections of the Central Sterile Processing Certification program: A) Instrument and Instrument Identification-identifying surgical instruments by name and purpose, examination of the process by which surgical instruments are manufactured and prepared for the sterilization process. B) Endoscopic Instruments-proper care, handling and processing of endoscopic instruments. C) Decontamination-describe how reusable equipment, instruments, and supplies are cleaned and decontaminated by means of manual or mechanical cleaning processes and chemical disinfection and the proper use of Personal Protective Equipment (PPE) and Standard Precautions. D) Preparation and Handling-relates to basic principles of various packaging materials and closure methods used for sterilization preparation as they relate to the Association of Advancement of Medical Instrument (AAMI) standards. E) Sterilization- relates sterilization procedures and theory including high and low temperature sterilization, sterilization equipment, types of sterilizers, various cycles, quality assurance concepts, documentation, standards, policies and procedures.

Lab Hours
15

Course Classification
Workforce Education Course Manual (WECM)

Description
(5-0-15) A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Recognize and practice within limitations of professional practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Practice the professional standards, guidelines, requirements, standard of practice, and ethics that guide sterile processing practices (1a, 1b, 1c, 2a, 2c, 2d, 2e).
3. Identify surgical instruments by name and purpose (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge of the process by which surgical instruments are manufactured and prepared for the sterilization process (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Care for and assemble instruments in the correct order (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Practice the use of different types of sterilizers and various cycles at clinical sites (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Follow policy and procedures for cleaning, decontaminating, and sterilizing instrument and equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Description
(2-2-0). A study of drug classifications, actions, therapeutic uses, adverse effects, routes of administration, and calculation of dosages.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Categorize the classification of drugs; calculate drug dosages; and identify the therapeutic use, routes of administration, indications, contraindications, and adverse effects

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of U.S. drug regulations by
    a. describing the drug approval process (1a, 1b, 2c);
    b. describing drug control legislation impacting the sale and use of pharmaceuticals and narcotics (1a, 1b, 2c);
    c. identifying the purpose of drug safety categories and schedules (1a, 1b, 2c).
2. Demonstrate an understanding of principles of drug administration by
    a. comparing drug administration routes (1a, 1b, 2c);
    b. explaining dosage guidelines (1a, 1b, 2c);
    c. differentiating between pharmacokinetics and pharmacodynamics (1a, 1b, 2c).
3. Demonstrate an understanding of adverse outcomes of pharmaceutical use by
    a. distinguishing between physical and psychological dependence (1a, 1b, 2c);
    b. distinguishing between substance abuse and addiction (1a, 1b, 2c);
    c. distinguishing between tolerance and dependence (1a, 1b, 2c);
    d. identifying side effects and adverse effects for assigned drugs (1a, 1b, 2c).
4. Demonstrate an understanding of assigned drugs by
    a. identifying assigned drugs' generic names (1a, 1b, 2c);
    b. identifying assigned drugs' classifications (1a, 1b, 2c);
    c. describing assigned drugs' indications (1a, 1b, 2c);
    d. describing assigned drugs' mechanisms of action (1a, 1b, 2c).

HPRS 2201 - Pathophysiology

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Distinguish environmental factors, physical, psychosocial, and cognitive characteristics of various diseases and conditions; and identify implications of therapeutic interventions for diseases and conditions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the pathophysiology of human diseases by
    a. describing the disease (1a, 1b, 2c);
    b. explaining the etiology (1a, 1b, 2c);
    c. explaining the signs and symptoms (1a, 1b, 2c);
    d. determining the diagnosis (1a, 1b, 2c);
    e. explaining the treatment (1a, 1b, 2c);
    f. identifying the prognosis (1a, 1b, 2c).
2. Demonstrate the ability to understand and apply medical terms related to pathophysiology of human diseases by
    a. defining assigned terms (1a, 1b, 2c);
    b. writing medical terms (1a, 1b, 2c);
    c. defining abbreviations (1a, 1b, 2c).

HPRS	2321	Medical Law and Ethics for Health Professionals
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Principles, procedures, and regulations governing the legal and ethical relationships between physicians, patients, and health care professionals. Includes current ethical issues related to the various healthcare professions and patient confidentiality. This course offers insights into the ethical responsibilities of healthcare leaders and effective decision-making principles, while providing the necessary tools to establish a systematic approach to ethics. Three categories will be emphasized: Economics, Law, and Administration.

Course Learning Outcomes

Course Learning Outcomes
End-of Course Outcomes: Define general legal terms as they apply to the practice of medicine; discuss the importance of the Patient's Bill of Rights; identify local, state and federal standards and relations for the control and use of health information; demonstrate appropriate health information disclosure practices; and differentiate among traditional and contemporary views and principles of bioethics.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand how ethics apply to clients, patients, vendors, providers, clinicians, and stakeholders in the healthcare environment by
    a. discussing ethical theories, concepts, and principles (2a, 2b, 2c, 2d, 2e, 2f, 4a, 4b);
    b. describing ethical standards of conduct when making decisions (2d, 3a, 3b, 3c, 4b, 4c);
    c. understanding and applying ethical principles and boundaries (1d, 2d, 2e, 3a, 4c);
    d. understanding why leaders become unethical, and the self-awareness needed to avoid unethical practices (1d, 2d, 3a, 3c, 3d, 4a, 4c);
    e. analyzing the role of ethics in healthcare management, particularly with end of life care, privacy, and resource allocation (1c, 1d, 2c, 2d, 2e, 3a, 3b, 3c, 4a, 4c, 5b).

Course Rubric	Course Number	Course Title
HPRS	2331	General Health Professions Management
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Exploration and application of management concepts necessary for effective health profession operations. Developing and capturing new healthcare markets and enhancing organizational effectiveness occur through increased improvement and continuous innovation. New discoveries, technologies, competition, and globalization promote healthcare leaders to foster pragmatic innovation. This course explores successful frameworks, models, funding techniques, risks, and barriers for introducing breakthrough products and services. Topics include design-driven innovation, knowledge management, and data collection and analysis for effective decision making.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze current health care trends; apply health care management concepts; distinguish supervisor and supervisory roles; demonstrate management of financial and personnel operations; evaluate regulatory/legal processes in health care management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply healthcare models to lead and manage in a competitive market-based environment by
    a. discussing the history of the health care industry (1a, 1b, 1c, 3a, 3b, 4a, 5a, 5b);
    b. describing the current issues affecting the healthcare industry (1a, 1c, 2d, 3a, 3c, 5b);
    c. understanding the relationship between hospitals, medical practices, public and private insurance, and public health to the healthcare industry (2c, 2f, 3a, 3b, 3c, 3d, 4a);
    d. selecting the appropriate means to collect and analyze data to convey information (1a, 1c, 2d, 3d, 4a, 4b, 4c, 5a, 5b);
    e. evaluating and selecting appropriate methods to present briefings to decision makers and healthcare stakeholders (3b, 3c, 4a, 4b, 4c, 5a, 5b).

HRPO 1302 - Human Resources Training and Development

General

Course Key

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: List organizational advantages of human resources development policies; describe how training and development strategies are linked to organizational goals; identify methods of measuring training needs; identify components of training design and delivery; and describe methods of evaluating a training program.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of organizational human resources development by
    a. explaining the need for policy as it relates to human capital development in the workplace (1a, 1b, 2c);
    b. identifying organizational needs and issues surrounding workforce sustainability (1a, 1b, 2c);
    c. discussing the trend toward performance management, and how this impacts today's training professional (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of training and development and the correlation between organizational goals by
    a. describing how training and development links to overall development of human capital in the workplace (1a, 1b, 2c, 2d);
    b. identifying the principles which impact how adults learn and applying these principles in organizational settings (1a, 1b, 2c);
    c. identifying common models and theories related to training and curriculum design (1a, 1b, 2c).
3. Explain methods of identifying training needs by
    a. describing methods of training and learning needs analysis (1a, 1b, 2c);
    b. discussing the importance of proper analysis of learning needs (1a, 1b, 2c);
    c. explaining the training needs analysis process (1a, 1b, 2c).
4. Demonstrate an understanding of the methods used to design and deliver training by
    a. applying methods of instructional design to the design of training programs (1a, 1b, 2c);
    b. developing an appropriate training strategy for modern organizations, using a variety of learning technologies (1a, 1b, 2a, 2c, 2e);
    c. analyzing methods for delivering a training program (1a, 1b, 2c).
5. Demonstrate an understanding of training evaluation by
    a. identifying strategies and models used for training evaluation (1a, 1b, 2c);
    b. identifying technology used for effective training follow up (1a, 1b, 2c);
    c. developing an effective evaluation for a training program (1a, 1b, 2c, 2d).

HRPO 1306 - Basic Mediator Training

HRPO	1306	Basic Mediator Training

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Topics include history of mediation, Alternative Dispute Resolution legislation in Texas, conflict resolution theory, mediation theory and practice, mediation process and techniques, self-awareness and ethics. When scheduled for 40 or more hours, can be used to meet the standards for basic mediation training in Texas as established by the Texas Mediation Trainer Roundtable.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the history of mediation and the key aspects of legislation affecting mediation; define types of conflict, responses to conflict, and the dispute resolution continuum; identify the mediation models and the benefits of the mediation process; identify the elements of the mediation process; apply mediation techniques; and evaluate the influence of personal characteristics and biases in the mediation process; explain the ethical considerations in mediation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of mediation and related legislation by
    a. listing specific legislation that affects the mediation process (1a);
    b. identifying basic principles of the mediation process (1a, 2c).
2. Demonstrate an understanding of conflict and conflict resolution by
    a. discussing the nature of conflict, personally and within organizations (1a, 1b, 2c);
    b. identifying types of conflict that can occur in organizational settings (1a, 1b);
    c. explaining the causes and effects of conflict within organizations (1a, 1b);
    d. explaining the elements of the dispute resolution continuum (1a, 1b, 2c);
    e. identifying effective responses to negotiation and conflict resolution (1a, 1b, 2c).
3. Demonstrate an understanding of the mediation process by
    a. identifying the mediation models and the benefits of the mediation process (1a, 1b);
    b. explaining the roles and functions of the mediator (1a, 1b, 2c);
    c. summarizing the process of preparing for effective mediation (1a, 1b, 2c);
    d. identifying the elements of the mediation process within organizations (1a, 1b);
    e. describing the methods and styles of negotiation (1a, 1b, 2c);
    f. developing a plan for conflict resolution and mediation (1a, 1b, 2b, 2c, 2d).
4. Demonstrate an understanding of ways personal characteristics and personal ethics can relate to the mediation process by
    a. identifying common mistakes in the mediation and conflict resolution process (1a, 1b);
    b. discussing the role of culture in the mediation and negotiation process (1a, 1b, 2c);
    c. identifying biases and personal attributes that can influence the mediation process (1a, 1b);
    d. explaining the ethical considerations in mediation (1a, 1b, 1c, 2c).

HRPO 1311 - Human Relations

Course Key
8987

Course Rubric	Course Number	Course Title
HRPO	1311	Human Relations

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Practical application of the principles and concepts of the behavioral sciences to interpersonal relationships in the business and industrial environment.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Evaluate human relations including diversity, attitudes, self-esteem, and interpersonal skills to promote career success; identify the causes and effects of stress in the workplace; identify individual and group communication and decision-making skills; and analyze how theories of motivation and human behavior impact strategies of change management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of human behavior and its influence on the work environment by
    a. describing the purpose and importance of understanding human behavior (1a, 1b);
    b. developing an understanding of self-esteem and its relationship between attitudes and values (1a, 1b);
    c. discussing ways to improve interpersonal skills (2a, 2b, 2c, 2e, 2f);
    d. describing how diversity impacts human behavior (2d, 2e, 3c, 3e).
2. Identify the causes and effects of stress by
    a. explaining how the effects and resistance to change create stress (1a, 1b, 3b, 3d);
    b. explaining how change can be managed to minimize the impact of stress on the individual (1a, 1b, 3b, 3c, 3d).
3. Demonstrate an understanding of the communication and decision-making process by
    a. explaining and analyzing the communication process (1b, 2c);
    b. identifying one's own personal communication style (1a, 1d, 1e);
    c. discussing similarities and differences in leadership and management (1b);
    d. explaining how a team utilizes leadership in decision making (2a, 2b, 2c, 2d, 2f);
    e. demonstrating the ability to communicate one-on-one and in groups (1a, 1b).
4. Demonstrate an understanding of motivation strategies that impact human behavior by
    a. analyzing and comparing the motivation cycle and theories (1a, 1b);
    b. identifying and analyzing internal and external motivators (1a, 1b);
    c. identifying motivational strategies for change management (1a, 1b).

Description
(3-3-0). Behavioral and legal approaches to the management of human resources in organizations.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the development of human resources management; explain current methods of job analysis, recruitment, selection, training/development, performance management, promotion, and separation; describe management's ethical, social, and legal responsibilities; explain methods of compensation and benefits planning; and describe the role of strategic human resources planning.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the importance of managing the human resources function by
    a. defining and applying human resources terminology (1a, 1b);
    b. identifying the human resource functions (1a, 1b);
    c. describing and explaining the alignment of the strategic human resource components (1a, 1b).
2. Explain business ethics and corporate social responsibility and how they influence the human resources function by
    a. defining and analyzing the importance of ethics (1a, 1b);
    b. identifying the role of ethics in corporate social responsibility (1a, 1b);
    c. identifying the various components of a diverse workforce (1a, 1b);
    d. explaining the major laws affecting equal employment opportunities (1a, 1b, 2c).
3. Demonstrate an understanding of job analysis, recruitment, and selection by
    a. explaining the value of job analysis as a basic human resources tool (1a, 1b);
    b. identifying the components of the recruitment process (1a, 1b);
    c. identifying the components of the selection process (1a, 1b);
    d. explaining downsizing, succession planning, and disaster planning in today's environment (1a, 1b, 2c).
4. Demonstrate an understanding of the importance of training and development by
    a. identifying the components of the training and development process (1a, 1b, 2c);
    b. describing management development, mentoring, and coaching (1a, 1b);
    c. demonstrating the ability to communicate one-on-one and in groups (1a, 1b, 2c).
5. Demonstrate an understanding of performance management, compensation, and benefits by
    a. identifying and analyzing the components of performance management (1a, 1b);
    b. identifying and analyzing the components of compensation and benefits (1a, 1b);
    c. describing the nature and role of a safe and healthy work environment (1a, 1b).

Description
(3-3-0) A study of employment issues including techniques for human resources forecasting, selection, and placement including interview techniques, pre-employment testing and other predictors. Topics include recruitment methods, the selection process, Equal Employment Opportunity (EEO), EEO recordkeeping, and Affirmative Action Plans.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify key legislation affecting the employment functions of human resource management; establish a recruitment plan; define job requisitions by matching skills to needed competencies; develop an employment policy related to recruitment and selection; and develop selection tools.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the field of Employee and Labor Relations, including relevant theories, laws, programs, and policies by
    a. identifying legislation affecting employment functions within human resources roles (1a, 1b);
    b. identifying how employment law is regulated in the United States through the following: Title VII of the 1964 Civil Rights Act; Affirmative Action; Race and Color, National Origin, Sexual, Age, and Disability Discrimination; Employee Rights and Benefit laws; and Labor laws (1a, 1b, 2c).
2. Demonstrate an understanding of the legal aspects of recruitment and selection by
    a. explaining the selection and placement aspects of the Equal Employment Opportunity Act (1a, 1b, 2c);
    b. identifying the anti-discrimination requirements for implementing the EEO and affirmative action plans (1a, 1b).
3. Demonstrate the ability to design effective recruitment strategies by
    a. defining job requisitions by matching skills to needed competencies (1a, 1b, 2c);
    b. developing an employment policy related to recruitment and selection (1a, 1b, 2b, 2c, 2d);
    c. identifying strategies to develop a diverse talent pool (1a, 1b).
4. Demonstrate an understanding of effective employee selection tools by
    a. identifying common and effective selection tools used in the recruiting and selection process (application forms, pre-employment testing, drug screening, medical examinations, etc.) (1a, 1b);
    b. describing proper interviewing techniques (1a, 1b, 2c);
    c. describing post-interview screening (1a, 1b, 3c);
    d. developing decision-making strategies to select candidates (1a, 1b, 2c, 2d).
5. Explain the importance of promoting a safe and healthy work environment by
    a. identifying the rights, responsibilities, and standards under the Occupational Safety and Health Administration (OSHA) (1a, 1b);
    b. identifying common workplace safety hazards (1a, 1b);
    c. developing strategies to foster and maintain physical and emotional health amongst employees (1a, 1b, 2c, 2b, 2d).

Description
(3-3-0) An examination of policies, practices, and issues required to build strong employee relations. Topics include communications, employee conduct rules, performance appraisal methods, Title VII, Family Medical Leave Act, Fair Labor Standards Act, and Americans with Disabilities Act updates.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify key legislation affecting the employee relations function of human resource management; and define the role of employee relations as it relates to organizational effectiveness.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the employee relations function of human resource management, including relevant theories, laws, and policies by
    a. identifying legislation affecting employment functions within human resources roles relating to Title VII, Family Medical Leave Act, Fair Labor Standards Act, and Americans with Disabilities Act (1a, 1b, 2c).
2. Explain the process by which unions organize workers under the National Labor Relations Act by
    a. identifying the economic, legal, and working conditions that led to labor laws encouraging union representation and negotiations within workplaces (1a, 1b);
    b. identifying collective bargaining laws and their amendments (1a, 1b);
    c. explaining the functions and issues surrounding trade unionism (1a, 1b, 2c);
    d. explaining how organizations ethically work to counter these organization drives (1a, 1b, 2c);
    e. describing strategies in labor/management contract negotiation (1a, 1b, 2c);
    f. developing strategies to assist companies in developing a workforce to prevent conflict and unionization (1a, 1b, 2a, 2b, 2c).
3. Explain the role of employee relations as it relates to organizational effectiveness by
    a. identifying effective external and internal workplace communication strategies (1a, 1b);
    b. identifying common barriers to workplace communication (1a, 1b);
    c. developing strategies to overcome common barriers to workplace communication (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of employee conduct by
    a. explaining the process by which employees are legally and ethically disciplined and terminated (1a, 1b, 2c);
    b. developing employee conduct guidelines and policies (1a, 1b, 2a, 2c, 2d);
    c. identifying and analyzing methods used to deal with unusual employment incidents and conflict (1a, 1b, 2c);
    d. explaining reasons for and methods of conducting workplace investigations (1a, 1b, 2c).
5. Explain how performance management increases organizational effectiveness by
    a. identifying strategies in creating an effective performance management system (1a, 1b);
    b. developing a performance management tool for an organization (1a, 1b, 2a, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe how human resources business functions link to human resources information systems; identify issues and benefits involved in creating, implementing, and maintaining human resources systems; describe key models such as staffing, employee development, position management, total compensation, outsourcing options, and professional development; and develop the plan to integrate human resources information with an HRIS.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain how human resources business functions connect with human resources information systems by
    a. explaining how by computerizing the human resources function managers can utilize HRIS in order to make important decisions (1a, 1b, 2c, 2d);
    b. examining how HRIS can be instrumental in making decisions on forecasting, compensation planning, management and career development, affirmative action programs, productivity measurement, and turnover analysis (1a, 1b, 2c, 2d);
    c. explaining the strategic value of HRIS and how it contributes to organizational success (1a, 1b, 2c, 2d);
    d. analyzing the basic concepts and principles of training in HRIS (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of challenges and benefits in creating, implementing, and maintaining HRIS by
    a. identifying basic systems and the criteria for success in using HRIS software in organizations (1a, 1b, 2c);
    b. explaining how an HRIS enhances productivity (1a, 1b, 2c);
    c. explaining potential challenges to implementing HRIS (1a, 1b, 2c);
3. Demonstrate an understanding of key models of HRIS related to human resources functions by
    a. identifying the leading HRIS software available in the industry (1a, 1b, 2c);
    b. identifying how information is entered as it relates to employees into a database to include key human resources roles and functions (1a, 1b, 2c);
    c. explaining the frameworks for the development and evolution of corporate universities and learning management systems in various organizations (1a, 1b, 2c, 2d);
    d. analyzing the role and function of e-learning and technology in the development of staff and talent (1a, 1b, 2a, 2c, 2e).
4. Demonstrate an understanding of the process by which human resources information is integrated into an HRIS by
    a. defining characteristics of current human resource information technology implementation strategies (1a, 1b, 2c, 2d, 2e);
    b. determining an integration plan for existing data into an HRIS (1a, 1b, 2c, 2d, 2e).

Workforce Education Course Manual (WECM)

Description
(3-3-0) An overview of employee compensation systems. Topics include compensation systems, direct and indirect compensation, internal and external determination of compensation, benefits administration, managing and evaluating for effectiveness, legal and regulatory issues, pay equity, job analysis affecting job compensation and competencies.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define a total compensation system; identify objectives of an organization's compensation system; discuss factors that affect compensation programs; discuss how a compensation system is linked to employee performance; identify the steps to establish a total compensation system; and identify key legislation affecting the benefits function of human resource management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of compensation systems by
    a. identifying the components of a compensation system (1a, 1b);
    b. discussing the differences between a compensation system and a non-compensation system (1a, 1b, 2c, 2d).
2. Explain an organization's compensation system objectives by
    a. identifying the various kinds of short-term incentives used by organizations (1a, 1b);
    b. discussing the various purposes for which organizations design short-term incentives (1a, 1b, 2c);
    c. summarizing the relationship between long-term incentive programs and the future lifestyles of employees (1a, 1b, 2c, 2d);
    d. identifying the various features of a long-term compensation (retirement) program (1a, 1b, 2d);
    e. identifying various components of executive compensation (1a, 1b, 2d).
3. Explain factors influencing compensation programs by
    a. discussing the design of pay grades and their relationship to internal worth and market value (1a, 1b, 2c, 2d);
    b. discussing the relationship between pay structure change and market conditions (1a, 1b, 2c);
    c. discussing challenges facing organizations in providing compensation to employees in foreign work sites (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of the connection between compensation systems to employee performance by
    a. discussing the importance of relating kinds and levels of employer-provided rewards to kinds and levels of employee contribution (1a, 2b, 2c);
    b. identifying the problems related to measuring and rating employee performance (1a, 1b, 2c);
    c. defining merit pay and discussing the critical need to relate pay to performance (1a, 1b, 2c, 2d);
    d. discussing the problems related to measuring and rating employee performance (1a, 1b, 2c);
    e. discussing the design of performance appraisal instruments (1a, 1b, 2c).
5. Demonstrate an understanding of the establishment of total compensation systems by
    a. identifying and discussing the steps in planning a job analysis program (1a, 1b, 2c);
    b. discussing the purpose and organizational use of a job description (1a, 1b, 2c);
    c. identifying strategies for the development and updating of job descriptions within acceptable cost limits (1a, 1b, 2a, 2c);
    d. discussing the reasons for implementing a job evaluation program (1a, 1b, 2c);
    e. discussing the importance of conducting pay surveys (1a, 1b, 2c);
    f. identifying the various kinds of survey methods (1a, 1b, 2c);
    g. identifying the design characteristics of a pay structure (1a, 1b, 2c, 2d).
6. Explain the legislation affecting the benefits function of human resources management by
    a. discussing the influence of wage and hour legislation on employment practices (1a, 1b, 2c, 2d);
    b. identifying pension reform legislation and the impact of ERISA on the pension plans of many organizations (1a, 2b, 2c);
    c. identifying the effects of legislation on health care benefits (1a, 1b, 2c);
    d. discussing the impact of tax retirement legislation on employee spendable income and employer profits (1a, 1b, 2c);
    e. listing antidiscrimination legislation and how it affects employment practices (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain organizational theory as it relates to management practices, employee relations, and structure of the organization to fit its environment and operation; analyze leadership styles and determine their effectiveness in employee situations; identify methods in resolving organizational problems; describe the impact of corporate culture on employee behavior; and analyze team dynamics, team building strategies, and cultural diversity.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of organizational behavior in today's business environment by
    a. describing the purpose and importance of organizational behavior concepts and their interrelationship (1a, 1b);
    b. identifying essential skills of management and their functions (1b);
    c. demonstrating an understanding of the organizational structure, culture, and design (1b, 2a, 2c);
    d. identifying and resolving ethical dilemmas that affect people in organization (1b).
2. Demonstrate an understanding of attracting, retaining, and promoting a diverse workforce by
    a. discussing the value of diversity within an organization and business environments (1b);
    b. recognizing and explaining the range of individual differences possessed by workers (1a, 2a);
    c. demonstrating understanding of what motivates workers (1b, 2a, 2b, 2c, 2e);
    d. explaining the multiple factors that affect worker performance (1a, 1b, 2a, 2f);
    e. explaining leadership skills, styles, and qualities (1a, 1b, 2a, 2b, 2e);
    f. identifying motivational strategies for change management (1a, 1b, 2a, 2b).
3. Demonstrate an understanding of using teams in organizations by
    a. understanding how to work collaboratively with others on interdependent tasks (1b, 1b, 2a, 2b, 2c, 2d);
    b. explaining how a team utilizes leadership in decision making and problem solving (2a, 2b, 2c, 2d);
    c. analyzing how leaders use motivational theories to improve performance (1b);
    d. identifying and analyzing the components of performance management (1a, 1b).
4. Demonstrate the ability to complete an organizational behavior project by
    a. presenting proposed project idea (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. presenting completed project to class (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the operation of basic hydraulic and pneumatic systems including associated instruments; interpret schematics; troubleshoot systems; and design a schematic drawing of a working system.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic concepts of fluid power by
    a. defining fluid power (1a, 1b, 2c);
    b. differentiating between the terms hydraulics and pneumatics (1a, 1b, 2a, 2c, 2e);
    c. explaining the history of the fluid power industry (1a, 1b, 2a, 2c, 2e);
    d. specifying the basic components of fluid power systems (1a, 1b, 2c, 2d, 2e);
    e. identifying the categories of personnel who are employed in the fluid power industry (1a, 1b, 2a, 2c, 2d, 2e).
2. Apply the physical properties of hydraulic fluids to hydraulic systems by
    a. defining the term fluid (1a, 1b, 2c, 2e);
    b. defining the terms specific weight, density, and specific gravity (1a, 1b, 2c);
    c. defining the terms pressure, head, and force (1a, 1b, 2c, 2d, 2e);
    d. differentiating between gauge pressure and absolute pressure (1a, 1b, 2a, 2d, 2e);
    e. calculating the force created by a pressure (1a, 1b, 2a, 2c, 2e);
    f. converting viscosity from one set of units to another (1a, 1b, 2a, 2c, 2d, 2e);
    g. explaining the difference between viscosity and viscosity index (1a, 1b, 2a, 2c).
3. Apply the principles of power and energy to the operation of hydraulic systems by
    a. defining the term efficiency (1a, 1b, 2c, 2d, 2e);
    b. explaining the conservation of energy principle (1a, 1b, 2a, 2c);
    c. calculating fluid flow rates and velocities using the equation of continuity (1a, 1b, 2c, 2d, 2e);
    d. determining the power delivered to a hydraulic cylinder (1a, 1b, 2c, 2d, 2e);
    e. describing the differences between elevation energy, pressure energy, and kinetic energy (1a, 1b, 2a, 2d, 2e);
    f. applying Bernoulli's equation to determine the energy transfer within a hydraulic system (1a, 1b, 2a, 2c, 2e);
    g. defining the terms elevation head, pressure head, and velocity head (1a, 1b, 2a, 2c, 2d);
    h. differentiating between the terms pump head, motor head, and head loss (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of how friction affects the flow of fluid in a hydraulic system by
    a. differentiating between laminar and turbulent flow (1a, 1b, 2a, 2c, 2d);
    b. determining the Reynolds number at any location in a pipeline (1a, 1b, 2c, 2d, 2e);
    c. explaining the term friction factor (1a, 1b, 2a, 2c, 2d);
    d. determining friction factors for laminar and turbulent flow (1a, 1b, 2c, 2d, 2e);
    e. evaluating the head loss in a pipeline undergoing laminar or turbulent flow (1a, 1b, 2c, 2d, 2e);
    f. calculating the frictional losses in valves and fittings (1a, 1b, 2c, 2d, 2e);
    g. explaining the meaning of the term K factor (1a, 1b, 2a, 2c, 2d);
    h. calculating the equivalent length of a pipeline (1a, 1b, 2c, 2d, 2e).
5. Demonstrate an understanding of the operation of hydraulic pumps by
    a. distinguishing between positive displacement and dynamic (non-positive displacement) pumps (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining the operation of gear, vane, and piston pumps (1a, 1b, 2c);
    c. determining the flow rate delivered by positive displacement pumps (1a, 1b, 2c, 2d, 2e);
    d. differentiating between axial and radial piston pumps (1a, 1b, 2a, 2c, 2d, 2e);

e. explaining the difference between fixed and variable displacement pumps (1a, 1b, 2c, 2d, 2e);

f. evaluating pump performance by determining the volumetric, mechanical, and overall efficiencies (1a, 1b, 2a, 2c, 2d);

g. explaining pump cavitation and ways to eliminate its effects (1a, 1b, 2a, 2c, 2d, 2e);

h. explaining the causes of pump noise and understanding how to express noise sound intensity levels in decibels (1a, 1b, 2a, 2c, 2d, 2e);

i. describing the sequence of operations used to select a pump for a given application (1a, 1b, 2a, 2c, 2d, 2e).

6. Describe the operation of hydraulic cylinders (linear actuators) and cushioning devices by

a. describing the construction and design features of hydraulic cylinders (1a, 1b, 2c);

b. identifying the various types of hydraulic cylinder mounting and mechanical linkages for transmitting power (1a, 1b, 2a, 2c, 2d);

c. calculating the load carrying capacity, speed, and power of hydraulic cylinders during the extending and retracting strokes (1a, 1b, 2c, 2d, 2e);

d. determining the maximum pressure developed by cushions at the ends of a hydraulic cylinder (1a, 1b, 2a, 2c, 2d);

e. explaining the operation of double rod and telescoping cylinders (1a, 1b, 2c, 2d, 2e);

f. explaining the purpose, construction, and operation of hydraulic shock absorbers (1a, 1b, 2a, 2c, 2d, 2e);

g. analyzing hydraulic cylinder piston rod forces from external loads (1a, 1b, 2c, 2e).

7. Demonstrate an understanding of the operation of hydraulic motors by

a. evaluating torque/pressure/displacement relationships for limited rotation hydraulic motors (1a, 1b, 2a, 2c, 2d, 2e);

b. explaining the operation of gear, vane, and piston hydraulic motors (1a, 1b, 2c, 2e);

c. evaluating the performance of hydraulic motors by determining the volumetric, mechanical, and overall efficiencies (1a, 1b, 2c, 2d, 2e);

d. comparing the various performance factors of gear, vane, and piston hydraulic motors (1a, 1b, 2a, 2c, 2d, 2e);

e. determining the torque and power delivered to hydraulic motors (1a, 1b, 2c, 2d, 2e).

8. Demonstrate an understanding of the operation of hydraulic valves by

a. describing the purpose, construction, and operation of two, three and four way directional control valves (1a, 1b, 2a, 2c, 2d, 2e);

b. identifying the graphic symbols used for directional, pressure, and flow control valves (1a, 1b, 2c, 2d, 2e);

c. explaining how valves are actuated using manual, mechanical, fluid pilot, and electrical solenoid methods (1a, 1b, 2a, 2c, 2d);

d. describing the purpose, construction, and operation of pressure control valves (1a, 1b, 2a, 2c, 2d, 2e);

e. differentiating between a pressure relief valve, a pressure reducing valve, a sequence valve, and an unloading valve (1a, 1b, 2c, 2d, 2e);

f. determining the cracking pressure and full pump flow pressure of pressure relief valves (1a, 1b, 2c, 2d, 2e);

g. calculating the power loss in pressure relief and unloading valves (1a, 1b, 2c, 2e);

h. describing the purpose, construction, and operation of flow control valves (1a, 1b, 2a, 2c, 2d, 2e);

i. analyzing how flow control valves can control the speed of hydraulic cylinders (1a, 1b, 2c, 2d, 2e);

j. describing the purpose, construction, and operation of mechanical hydraulic, electro hydraulic, and cartridge valves (1a, 1b, 2a, 2c, 2d, 2e).

9. Demonstrate the ability to design and analyze complete hydraulic circuits for various systems by

a. describing the schematic (graphic) symbols for all hydraulic system components (1a, 1b, 2a, 2c, 2d, 2e);

b. describing the operation of complete hydraulic circuits drawn using graphic symbols for all components (1a, 1b, 2a, 2c, 2d, 2e);

c. determining the operating speeds and load carrying capacities of regenerative hydraulic cylinders (1a, 1b, 2c, 2d, 2e);

d. explaining the operation of mechanical hydraulic servo systems (1a, 1b, 2c, 2e);

e. performing a complete analysis of hydraulic circuit operation, including the effects of frictional losses (1a, 1b, 2a, 2c, 2d, 2e);

f. analyzing the speed control of hydraulic cylinders (1a, 1b, 2c, 2d, 2e).

10. Demonstrate an understanding of the various hydraulic conductors and fittings used for hydraulic systems by

a. sizing conductors to meet flow rate requirements (1a, 1b, 2a, 2c, 2d);

b. explaining the pressure rating of conductors (1a, 1b, 2c, 2d, 2e);

c. differentiating between the terms burst pressure and working pressure (1a, 1b, 2c, 2d, 2e);

d. explaining how the tensile stress in the wall of a conductor varies with fluid pressure, pipe diameter, and wall thickness (1a, 1b, 2c, 2d, 2e);

e. determining the required wall thickness of a conductor to prevent bursting under operating fluid pressure (1a, 1b, 2c, 2d, 2e);

f. identifying the standard commercial sizes of steel pipe and tubing (1a, 1b, 2a, 2c);

g. describing the various types of fittings used to connect hydraulic components to conductors (1a, 1b, 2c, 2d, 2e);

h. identifying the construction features and functions of flexible hoses (1a, 1b, 2d, 2e).

11. Demonstrate an understanding of how ancillary hydraulic devices are used in hydraulic systems by

a. describing the purpose, construction and operation of accumulators (1a, 1b, 2c);

b. describing the operation of pressure intensifiers (1a, 1b, 2c, 2d, 2e);

c. explaining the design features of reservoirs and determining the proper reservoir size for a given hydraulic system (1a, 1b, 2c, 2d, 2e);

d. describing the ways in which the temperature of the fluid of a hydraulic system can be controlled by heat exchangers (1a, 1b, 2a, 2c, 2e);

e. describing the operation of flow measurement devices such as the rotameter and turbine flow meter (1a, 1b, 2c, 2d, 2e);

f. describing the operation of pressure measuring devices such as the Bourdon gauge and Schrader gauge (1a, 1b, 2c, 2d, 2e).

12. Perform maintenance procedures on hydraulic systems by

a. identifying the common causes of hydraulic system failures (1a, 1b, 2a, 2c, 2d, 2e);

b. discussing the various types of fire and foam resistance fluids (1a, 1b, 2a, 2c, 2d);

c. explaining the neutralization number of a hydraulic fluid (1a, 1b, 2c, 2d, 2e);

d. describing the operation of filters and strainers and specifying their location in hydraulic circuits (1a, 1b, 2c, 2d, 2e);

e. calculating the beta ratio and beta efficiency of filters (1a, 1b, 2c, 2d, 2e);

f. explaining the mechanism of the wear of moving parts of hydraulic components due to solid particle contamination of the fluid (1a, 1b, 2a, 2c, 2d, 2e);

g. describing the problems caused by gases in hydraulic fluids (1a, 1b, 2a, 2c, 2d, 2e);

h. explaining how to troubleshoot fluid power circuits effectively depending on the symptoms of the problems involved (1a, 1b, 2a, 2c, 2d, 2e).

13. Demonstrate an understanding of the basic fundamentals of the operation of pneumatic systems by

a. applying the perfect gas laws to determine the pressure, volume, and temperature of a gas (1a, 1b, 2c, 2d, 2e);

b. describing the purpose, construction, and operation of compressors (1a, 1b, 2a, 2c);

c. calculating the power required to drive compressors to satisfy system requirements (1a, 1b, 2c, 2d, 2e);

d. determining the size of air receivers for meeting system pressure and flow rate requirements (1a, 1b, 2c, 2d, 2e);

e. explaining the purpose and operation of fluid conditioners including filters, regulators, lubricators, mufflers, and air dryers (1a, 1b, 2a, 2c, 2d, 2e);

f. calculating the pressure losses in pneumatic pipelines (1a, 1b, 2c, 2d, 2e);

g. determining how the flow rate of air can be controlled by valves (1a, 1b, 2c, 2e);

h. describing the purpose, construction, and operation of pneumatic pressure control valves, flow control valves, and directional control valves (1a, 1b, 2a, 2c, 2d, 2e);

i. explaining the construction and operation of pneumatic cylinders and motors (1a, 1b, 2a, 2c, 2d, 2e).

14. Apply the principles of pneumatic circuits to the applications of pneumatic systems by

a. developing pneumatic circuit designs using graphical symbols (1a, 1b, 2c, 2d, 2e);

b. determining pressure losses in pipelines of pneumatic circuits (1a, 1b, 2c, 2d, 2e);

c. troubleshooting pneumatic circuits to determine the cause of system malfunctions (1a, 1b, 2a, 2c, 2d, 2e);

d. analyzing the operation of pneumatic vacuum systems (1a, 1b, 2a, 2c, 2d, 2e);

e. determining the size of gas loaded accumulators (1a, 1b, 2c, 2d, 2e).

15. Demonstrate an understanding of the basic electrical controls for fluid power circuits by

a. explaining the operation of the various electrical components used in electromechanical relay control systems (1a, 1b, 2a, 2c, 2d, 2e);

b. comprehending the operation of electrical ladder diagrams (1a, 1b, 2c, 2d);

c. interrelating the operation of electrical ladder logic diagrams with the corresponding fluid power circuits (1a, 1b, 2a, 2c, 2d, 2e);

d. troubleshooting basic electrohydraulic and electro pneumatic circuits for determining the causes of system malfunctions (1a, 1b, 2a, 2c, 2d, 2e).

16. Apply the principles of logic control to the operation of fluid power systems by

a. explaining the operating principles of moving part logic (MPL) devices (1a, 1b, 2a, 2c, 2d, 2e);

b. explaining how MPL is used to control fluid power systems (1a, 1b, 2a, 2c, 2d, 2e);

c. explaining MPL controlled fluid power circuit diagrams and the corresponding system operation (1a, 1b, 2c, 2d);

d. explaining the control functions and establish truth tables for OR/NOR, AND/NAND, NOT, EXCLUSIVE-OR/NOR, and FLIP-FLOP devices (1a, 1b, 2c, 2d, 2e);

e. performing the fundamental operations of Boolean algebra as related to the control of fluid power systems (1a, 1b, 2c, 2d, 2e);

f. applying Boolean algebra techniques to control fluid power systems (1a, 1b, 2c, 2e).

IBUS 1301 - Principles of Exports

General

Course Key
9606

Course Rubric	Course Number	Course Title
IBUS	1301	Principles of Exports

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Export management processes and procedures. Includes governmental controls and compliance, licensing of products, documentation, commercial invoices, and transportation. Emphasizes human and public relations, management of personnel, finance, and accounting procedures.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain documentation, logistics, and transportation of export management; and apply export processes and procedures to public, customer, and employee relationships, and to other functional areas.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of exports by
    a. identifying terms and definitions used in the export management process and procedures (1a, 1b, 2c);
    b. explaining government controls, compliance, and licensing of products (1a, 1b, 2c);
    c. explaining the details of documentation, commercial invoices, and transportation requirements (1a, 1b, 2c).
2. Demonstrate an understanding of how to apply export processes and procedures by
    a. identifying terms and definitions used in public, customer, and employee relationships (1a, 1b, 2c);
    b. identifying various local, state, and federal agencies that impact export operations (1a, 1b, 2c).
3. Demonstrate the ability to apply decision making techniques based on time, materials, and space by
    a. gathering all needed reference data to solve a complex export problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple step decision making process to solve an export problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to an export problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4). Exploration of the theory and application of quantity procedures for the operation of commercial, institutional, and industrial food services. Emphasis on quantity cookery and distribution. ServSafe Manager Certificate and approved application for enrollment is required. See program director for additional information. Required Prerequisite: DITA-1301, FDNS-1370 or CHEF-1301; and TSI Met in Math.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Required Prerequisite(s): DITA-1301, FDNS-1370 or CHEF-1301; and TSI Met in Math

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform mathematical calculations using U.S. and metric measurements; convert weights to measures and vice versa; enlarge recipes through formulas; plan menus for volume feeding; purchase and receive food supplies for large quantity functions; and prepare mockup or actual plates and serve in simulated or actual large quantity functions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Perform mathematical calculations using U.S. and metric measurements by
    a. converting weights to measures and vice versa (1a, 1b, 2c);
    b. calculating percent yields (1a, 1b, 2c);
    c. enlarging recipes through formulas (1a, 1b, 2c);
    d. calculating cost of an ingredient for a given recipe (1a, 1b, 2c);
    e. determining the total cost for a given recipe (1a, 1b, 2c);
    f. calculating utilizing decimal equivalents of a pound (1a, 1b, 2c);
    g. determining a recipe conversion factor (1a, 1b, 2c);
    h. applying critical thinking skills (KNDT 1.3) (1b, 2c).
2. Identify kitchen operations by
    a. selecting proper kitchen tools/equipment (1b, 2a);
    b. using kitchen tools/equipment properly (1b, 2a);
    c. showing proper receiving/storage procedures for food (1b, 1c, 2a);
    d. showing proper sanitation procedures for food (1b, 1c, 2a);
    e. preparing mockup and/or actual plates for a large quantity function (1b, 2b);
    f. applying safety and sanitation principles related to food, personnel, and consumers (KNDT 4.3) (1a, 1b, 2c);
    g. proposing and using procedures as appropriate to the practice setting to promote sustainability, reduce waste, and protect the environment (CNDT 4.7) (2a, 2d);
    h. performing supervisory functions for purchasing, production, and service of food that meets nutrition guidelines, cost parameters and health needs (CDNT 3.7) (1a, 1b, 2a, 2b);
    i. describing the processes involved in delivering quality food and nutrition services (KNDT 4.5) (1a, 1b, 2a, 2d);
    j. delivering nutrition services through quality improvement and customer satisfaction activities (CNDT 4.1) (1a, 1b, 2a, 2d).
3. Identify dining room operations for large quantity functions by
    a. identifying various styles of service: butler, American, French, buffet, English (1b);
    b. identifying various items of service ware (1b);
    c. identifying various styles of buffet setup according to amount of patrons (1b);
4. Plan menus for volume feeding by
    a. selecting proper foods for menu (1a, 1b, 2a);
    b. writing recipes in a block format (1a, 1b, 2c);
    c. creating a purchase order for a large quantity function (1a, 1b, 2c);
    d. creating a prep list (1a, 1b, 2a, 2c);
    e. creating a staffing schedule (1a, 1b, 2a, 2c);
    f. differentiating between a tested recipe and a standardized recipe (1a, 1b, 2c);
    g. preparing foods in actual and simulated large quantity functions (1b, 2b);
    h. serving in actual and simulated large quantity functions (1b, 1c, 2b);
    i. collecting performance improvement, financial, and productivity data (CNDT 1.3) (1a, 1b, 2c, 2d);
    j. evaluating event/personal performance after completion (1a, 1b, 1c, 2b);
    k. modifying recipes and menus for acceptability and affordability that accommodate the cultural diversity and health status of various populations, groups, and individuals (CNDT 3.8) (1a, 1b, 2a, 2c, 2d);
    l. Assisting with marketing clinical and customer services (CNDT 4.6) (1a, 1b, 1c, 2b).
5. Demonstrate professional attributes in all areas of practice (CNDT 2.8) by
    a. using clear and effective oral and written communication (CNDT 2.2) (1a, 1b);
    b. functioning as a member of inter-professional teams (CNDT 2.5) (1c, 2b);
    c. demonstrating how to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions related to the dietetics technician level of practice (KNDT 1.1) (1a, 2c, 2e);
    d. selecting and using appropriate information technologies to locate and apply evidence-based guidelines and protocols (KNDT 1.2) (1b, 2c, 2e);
    e. promoting team involvement and values the skills of each member (CNDT 5.5) (1a, 1b, 1c, 2b).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTC 1305
Required Corequisite(s): ARTC 1302

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify how the internet functions; apply design techniques in the creation and optimization of graphics and other embedded elements; demonstrate the use of World Wide Web Consortium (W3C) formatting and layout standards; and design and build a web site.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of internet terminology and tools by
    a. identifying markup language (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining file transfer protocol (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. defining email (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. describing internet access software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. identifying benefits of web development software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. operating color scanner (1a, 1b, 1c, 2a, 2b, 2c, 2e).
2. Demonstrate an understanding of effective web page design by
    a. analyzing effective and ineffective web design (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining linking pages (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. defining effective use of tables (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. defending use of frames (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. optimizing graphics for use on a webpage (1a, 1b, 1c, 2a, 2b, 2c, 2e).
3. Demonstrate the ability to compose web pages by
    a. identifying limitations of web development software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. reorganizing a nonworking website (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. securing website hosting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. registering domain names (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. demonstrating proficiency in use of forms (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. applying design principles in web page design (1a, 1b, 1c, 2a, 2b, 2c, 2e);

g. creating interactive web page (1a, 1b, 1c, 2a, 2b, 2c, 2e);

h. producing home page (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Required Prerequisite(s): ARTC 1302 and IMED 1316
Recommended Prerequisite(s): ARTC 1305 and ARTC 1453

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the use of World Wide Web Consortium (W3C) standards for style, accessibility, layout, and formatting; build web pages with dynamic customization capabilities; develop web sites designed for usability and cultural diversity; and utilize design strategies to increase the success of locating the site via search engines.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify advanced web design tools by
    a. describing the use of computer based software to create forms (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. defining the use of computer based software to create databases (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. identifying how databases are used to keep e-business websites current (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. explaining rollovers (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. analyzing creative use of .swf files (1a, 1b, 1c, 2a, 2b, 2c, 2e).

2. Implement effective web page design by
    a. applying professional visual design concepts to web page design (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating proficiency in use of digital imaging and editing software (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. creating client side image maps (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. implementing forms using templates (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. creating internal and external style sheets (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. demonstrating animated .swf files in websites (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. utilizing proficiency in use of frames (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    h. building complex interactive web pages (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    i. integrating interactive buttons with webpages (1a, 1b, 2c, 2d, 2e);
    j. creating websites accessible to disabled persons (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    k. optimizing web pages for search engines (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    l. demonstrating the use of cookies (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    m. building websites with dynamic customization capabilities (1a, 1b, 1c, 2a, 2b, 2c, 2e).

INEW 2434 - Advanced Web Programming

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). Web programming using industry-standard languages and data stores. Design, code, and implement a dynamic website; and develop connectivity between data store and website.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design, code, and implement a dynamic website; and develop connectivity between data store and website.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of server side technology by
    a. describing the components of a web server (1a, 2a, 2c);
    b. defining LAMP, WAMP, and WIMP (1a);
    c. comparing the differences between ASP.NET and other technologies such as PHP and Java (JSP and Servlets) (1a, 1b, 2a, 2d).
2. Develop a server side web application using PHP or ASP.NET (C# or Visual Basic) or Java (JSP and Servlets) without the use of a database by
    a. developing a one page web application using PHP or ASP.NET (C# or Visual Basic) or Java (JSP and Servlets) (1a, 1b, 2a, 2c, 2d, 2e);
    b. developing a multiple page web application using PHP or ASP.NET (C# or Visual Basic) or Java (JSP and Servlets) (1a, 1b, 2a, 2c, 2d, 2e).
3. Develop a server side database (MySQL or Microsoft SQL Server) web application using PHP or ASP.NET (C# or Visual Basic) or Java (JSP and Servlets) by
    a. developing a web application which gets information from a database (1a, 1b, 2a, 2c, 2d, 2e);
    b. developing a web application which inserts new information into a database (1a, 1b, 2a, 2c, 2d, 2e);
    c. developing a web application which edits information in a database (1a, 1b, 2a, 2c, 2d, 2e).
4. Develop secure websites by
    a. developing a web application which authenticates a user (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the process securing a website both internally and externally (1a, 1b, 2a, 2c, 2d, 2e).

INMT 1305 - Introduction to Industrial Mainentance

General

INMT

Course Number
1305

Course Title
Introduction to Industrial Maintenance

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Basic mechanical skills and repair techniques common to most fields of industrial maintenance. Topics include precision measuring instruments and general safety rules common in industry, including lock-out tag-out.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify various types of fasteners common to industrial maintenance; utilize various hand and power tools; utilize precision measuring instruments; and demonstrate proper lock-out/tag-out procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Understand the role and function of maintenance organization within an industrial environment (1a, 1b).
2. Describe the roles, responsibilities, and expectations of the maintenance technician (1a, 1b, 1c, 2d).
3. Identify the type and function of common equipment found within the process and energy industry (1a, 1b, 2e).
4. Define and demonstrate the use of measurement and dimension systems (1a, 1b, 2c, 2e).
5. Understand and demonstrate the function and use of basic hand tools and power tools (1a, 1b, 2e).
6. Identify and describe the function and limitations of common fastening systems and components (1a, 1b, 2e).
7. Identify and describe the use of different lubrication applications (1a, 1b, 2e).
8. Identify and describe the causes for bearing failures (1a, 1b, 2e).
9. Describe common mechanical drive systems and their components (1a, 1b, 2e).
10. Describe the primary failure modes for machinery and systems (1a, 1b, 2c, 2e).
11. Describe the elements of a successful preventative maintenance program (1a, 1b, 2b, 2c, 2d).
12. Describe the elements and application of predictive maintenance technologies (1a, 1b, 2b, 2c, 2d).

INMT 1370 - Composite Fundamentals

General

13738

Course Rubric
INMT

Course Number
1370

Course Title
Composite Fundamentals

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Technical Local Need

Description
(3-2-2) An introduction to composites with an emphasis on types, properties, processes, testing and assembly. Topics include material configuration and application, mechanical properties and testing methods, designs and prints, tooling and manufacturing, environmental control and other manufacturing practices.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Demonstrate an understanding of composite fabrication/bonding practices by
    a. interpreting composite fabrication drawings (1a, 1b, 2c, 2e);
    b. demonstrating and modeling safe composite working practices (1a, 1b, 1c, 2a, 2b);
    c. preparing composite molds and tools by applying release agents (1a, 1b, 2c, 2e);
    d. preparing fiber reinforcements, metal, and polymer resin systems for composite bonding (1a, 1c, 2a, 2c, 2e).
2. Demonstrate the ability to fabricate a composite or metal bonded structure by
    a. placing and positioning fiber reinforcements or metal facings on or in a mold (1a, 1b, 2c, 2e);
    b. preparing and placing core structures on a fiber reinforcement or metal facing (1a, 1b, 2c, 2e);
    c. demonstrating vacuum bagging on a composite article (1a, 1b, 2c, 2e).
3. Demonstrate the ability to cure/bond a composite article with heat by
    a. installing thermocouples on a composite article prior to curing/bonding (1a, 1b, 2c, 2e);
    b. configuring a heat source and a heat controller for composite curing/bonding (1a, 1b, 2c, 2e);
    c. operating a heat source and heat controller to cure a composite article (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of typical composite fabrication flaws such as, but not limited to, bridging, voids, porosity, and delamination found in a composite structure by
    a. performing and documenting the results of composite article final inspections (1a, 1b, 2c, 2e).

INMT 2345 - Industrial Troubleshooting

General

Requirements

Requirements
Required Prerequisite(s): CETT 1409 or CETT-1403 and CETT-1405

Recommended Prerequisite(s): INMT-1305 and HYDR-1345

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate a working knowledge of various troubleshooting techniques; properly troubleshoot hydraulic, pneumatic, and electrical systems using schematics and diagrams; troubleshoot mechanical drive systems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Demonstrate an understanding of workplace safety and methods by understanding the importance of personal protective equipment (1a, 1b, 2c, 2e).
2. Demonstrate proper lifting techniques, general electrical safety, proper methods of extinguishing a fire, and classifications (1a, 1b, 2c, 2e).
3. Demonstrate ability to apply lock out/tag out as needed in the workplace (1a, 1b, 2c, 2e).
4. Demonstrate an understanding and use of basic hand tools and fasteners, types of power tools, proper usage of these tools, and the importance of a tool inspection before use (1a, 2a, 2c, 2e).
5. Identify different types of fasteners and how to determine torque of a bolt and the importance of torque specifications (1a, 2a, 2c, 2e).
6. Demonstrate the ability to read and interpret dimensional drawings and schematics, including electrical drawings, piping systems, and welding schematics (1a, 1b).
7. Demonstrate an understanding of mechanical power transmission, including styles of belts and chains in drive systems (1a, 1b, 2c).
8. Demonstrate basic knowledge of gears and gearboxes (1a, 1b, 2c).
9. Perform speed calculations for belt drives, gear drives, and chain drives (1a, 1b, 2c).
10. Demonstrate an understanding of bearings to the relation of importance to mechanical systems, including types, proper installation and removal, and lubrication (1a, 1b, 2e).
11. Identify reasons for bearing failure (1a, 1b, 2e).
12. Demonstrate an understanding of lubrication, seals, and packing; and their importance to mechanical systems, including lubrication types, applications in industry, and basic terms (1a, 1b).
13. Demonstrate an understanding of pumps and compressors, including types and delivery (1a, 1b, 2c, 2e).
14. Identify common problems with troubleshooting pumps and compressors (1a, 1b, 2c, 2e).
15. Calculate volumetric efficiency and delivery (1a, 1b, 2c, 2e).
16. Demonstrate an understanding of fluid power fundamentals, including the effects of compressing air for a fluid power system, how force is transmitted through a hydraulic system, and explain methods and operation of valve actuation (1a,1b, 2e).
17. Demonstrate an understanding of electrical fundamentals, including terminology and symbols used, basic Ohm's law formulae, and ability to define electricity (1a, 1b, 2a, 2c, 2e).
18. Demonstrate proper usage of test equipment and importance of safety and wiring methods in relation to the National Electrical Code, basic industrial electronics, control, and controlled devices (1a, 1b, 2a, 2c, 2e).
19. Demonstrate an understanding of a transformer, including basic operation, and identifying single-phase and three-phase transformers (1a, 1b, 2e).
20. Demonstrate basic knowledge of power distribution systems (1a, 1b, 2e).
21. Demonstrate an understanding of electrical machinery, including different types of DC generators, DC motors, programmable logic controllers, and AC alternators and their functions (1a,1b, 2e).
22. Demonstrate knowledge of theory of operation of three-phase motors (1a,1b, 2e).
23. Demonstrate an understanding of motor control circuits and controlled devices, including types, proper usage, and how they control speed, reversing, braking, and stopping (1a,1b, 2e).
24. Demonstrate an understanding of lighting, including correctly wired types of ballasts, common types of lamps, LED's, and proper re-lamping procedures (1a, 1b, 2e).
25. Demonstrate an understanding of basic welding knowledge, including safety techniques in gas and arc welding, types of welds and joints, and proper startup and shutdown procedures (1a, 1b, 2e).
26. Demonstrate and develop a preventive maintenance (PM) program, understanding the importance of maintaining a history log, coordinating an effective PM inspection, and demonstrating proper procedures of work permits in correlation to safety hazards (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
27. Identify imminent failure and proper diagnosis of mechanical and electrical machinery in relation to producing PM (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate legal and ethical behavior, safety practices, interpersonal, and teamwork skills (1c, 2b, 2d).
3. Apply appropriate written and verbal communication skills using the terminology of the occupation and the business/industry (1a, 1b, 2b).
4. Obtain an OSHA 10-hour General Industry card upon completion of the course, to aid students with recognizing workplace hazards (1a, 1b, 2c).

Academic Course Guide Manual (ACGM)

Description
(1-1-0) A combined lecture/computer based course focusing on improvement of basic reading and writing skills. This is an Adult Education course and cannot be used to fulfill degree requirements or to qualify for federal aid, including VA educational benefits. It is designed to review basic skills and prepare students for INRW co-requisite courses.

Academic Course Guide Manual (ACGM)

Description
(3-3-0) This three-hour lecture performance-based course is a support course taken concurrently with ENGL 1301 or other TSI-dependent credit course and is not a stand-alone offering. If successfully completed, the course fulfills TSI requirements for reading and writing. This is a developmental course and cannot be used to fulfill degree requirements. Required Prerequisites: INRW-0090 with minimum grade of C (70%), or equivalent scores on an approved placement test. Required Co-Requisite: ENGL-1301 or other approved TSI-dependent credit course

Recommended Prerequisite(s): ITNW 1425, or consent of Department Chair

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Configure a small network using basic security; perform basic configuration on routers and switches; implement IP addressing schemes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Configure switches and end devices to provide access to local and remote network resources by
    a. explaining the advances in modern network technologies (1a, 1b, 2d);
    b. implementing initial settings including passwords, IP addressing, and default gateway parameters on a network switch and end devices (1a, 1b, 2c, 2d, 2e).
2. Explain how physical and data link layer protocols support the operation of Ethernet in a switched network by
    a. explaining how network protocols enable devices to access local and remote network resources (1a, 1b, 2d);
    b. explaining how physical layer protocols, services, and network media support communications across data networks (1a, 1b, 2d);
    c. explaining how media access control in the data link layer supports communication across networks (1a, 1b, 2d);
    d. explaining how Ethernet operates in a switched network (1a, 1b, 2d).
3. Configure routers to enable end-to-end connectivity between remote devices by
    a. explaining how routers use network layer protocols and services to enable end-to-end connectivity (1a, 1b, 2c, 2d);
    b. explaining how ARP and ND enable communication on a network (1a, 1b, 2d);
    c. implementing initial settings on a router and end devices (1a, 1b, 2a, 2c, 2d, 2e).
4. Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices by
    a. calculating numbers between decimal, binary, and hexadecimal systems (1a, 1b, 2c, 2d);
    b. calculating an IPv4 subnetting scheme to efficiently segment a network (1a, 1b, 2c, 2d);
    c. implementing an IPv6 addressing scheme (1a, 1b, 2c, 2d, 2e).
5. Explain how the upper layers of the OSI model support network applications by
    a. comparing the operations of transport layer protocols in supporting end-to-end communication (1a, 1b, 2c, 2d);
    b. explaining the operation of application layer protocols in providing support to end-user applications (1a, 1b, 2c, 2d).
6. Configure a small network with security best practices by
    a. configuring switches and routers with device hardening features to enhance security (1a, 1b, 2a, 2c, 2d, 2e);
    b. implementing a network design for a small network to include a router, a switch, and end devices (1a, 1b, 2a, 2c, 2d, 2e).
7. Troubleshoot connectivity in a small network by
    a. using various tools to test network connectivity (1a, 1b, 2a, 2c, 2d, 2e).

Recommended Prerequisite(s): ITCC 1414

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Configure, secure, and maintain routers and switches; resolve common issues with routing protocols, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks; configure WLANs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Configure VLANs and Inter-VLAN routing applying security best practices by
    a. configuring devices by using security best practices (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining how Layer 2 switches forward data (1a, 1b, 2c, 2d);
    c. implementing VLANs and trunking in a switched network (1a, 1b, 2a, 2c, 2d, 2e).
2. Troubleshoot inter-VLAN routing on Layer 3 devices (1a, 1b, 2a, 2b, 2c, 2d, 2e).
3. Configure redundancy on a switched network using STP and EtherChannel by
    a. explaining how STP enables redundancy in a Layer 2 network (1a, 1b, 2c, 2d);
    b. describing EtherChannel (1a, 1b, 2c, 2d);
    c. configuring EtherChannel (1a, 1b, 2a, 2c, 2d, 2e).
4. Troubleshoot EtherChannel on switched networks (1a, 1b, 2a, 2c, 2d, 2e).
5. Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols by
    a. implementing DHCPv4 to operate across multiple LANs (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining how FHRPs provide default gateway services in a redundant network (1a, 1b, 2c, 2d).
6. Configure dynamic address allocation in IPv6 networks (1a, 1b, 2a, 2c, 2d, 2e).
7. Configure WLANs using a WLC and L2 security best practices by
    a. explaining how WLANs enable network connectivity (1a, 1b, 2c, 2d);
    b. implementing a WLAN using a wireless router and WLC (1a, 1b, 2a, 2c, 2d, 2e).
8. Configure switch security to mitigate LAN attacks by
    a. explaining how vulnerabilities compromise LAN security (1a, 1b, 2c, 2d);
    b. implementing switch security to mitigate LAN attacks (1a, 1b, 2a, 2c, 2d, 2e).
9. Configure IPv4 and IPv6 static routing on routers by
    a. explaining how routers use information in packets to make forwarding decisions (1a, 1b, 2a, 2c, 2d);
    b. configuring IPv4 and IPv6 static routes (1a, 1b, 2a, 2c, 2d, 2e);
    c. troubleshooting static and default route configurations (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Configure advanced routing and switching protocols; resolve common issues with routing and switching protocols; identify threats and enhance network security; implement IPv4 Access Control Lists (ACLs); configure Network Address Translation (NAT) services; explain virtualization, software defined networking, and automation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Configure single-area OSPFv2 in both point-to-point and multiaccess networks by
    a. explaining how single-area OSPF operates in both point-to-point and broadcast multiaccess networks (1a, 1b, 2a, 2c, 2d);
    b. implementing single-area OSPFv2 in both point-to-point and broadcast multiaccess networks (1a, 1b, 2a, 2c, 2d, 2e).
2. Explain how to mitigate threats and enhance network security using access control lists and security best practices by
    a. explaining how vulnerabilities, threats, and exploits can be mitigated to enhance network security (1a, 1b, 2a, 2c, 2d);
    b. explaining how ACLs are used as part of a network security policy (1a, 1b, 2a, 2c, 2d).
3. Implement standard IPv4 ACLs to filter traffic and secure administrative access (1a, 1b, 2a, 2c, 2d, 2e).
4. Configure NAT services on the edge router to provide IPv4 address scalability (1a, 1b, 2a, 2c, 2d, 2e).
5. Explain techniques to provide address scalability and secure remote access for WANs by
    a. explaining how WAN access technologies can be used to satisfy business requirements (1a, 1b, 2a, 2c, 2d);
    b. explaining how VPNs and IPsec secure site-to-site and remote access connectivity (1a, 1b, 2a, 2c, 2d).
6. Explain how to optimize, monitor, and troubleshoot scalable network architectures by
    a. explaining the characteristics of scalable network architectures (1a, 1b, 2a, 2c, 2d);
    b. troubleshooting enterprise networks (1a, 1b, 2a, 2b, 2c, 2d).
7. Explain how networking devices implement QoS (1a, 1b, 2a, 2c, 2d).
8. Implement protocols to manage the network (1a, 1b, 2a, 2c, 2d, 2e).
9. Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks by
    a. explaining the purpose and characteristics of network virtualization (1a, 1b, 2a, 2c, 2d);
    b. explaining how network automation is enabled through RESTful APIs and configuration management tools (1a, 1b, 2a, 2c, 2d).

ITNW 1309 - Fundamentals of Cloud Computing

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s) or Corequisite(s): CPMT 1403

Course Learning Outcomes

Course Learning Outcomes
Explain the essential characteristics of cloud services; describe cloud deployment and service models; describe the organizational capabilities and implications for the successful adoption of cloud computing; describe cloud infrastructure and enabling technologies; create, manage, and scale a virtual server in a cloud environment; describe maintenance operations and security in the cloud; and identify business drivers for cloud computing.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the essential characteristics of Cloud services (1a, 1b, 2c).
2. Describe the steps for successful Cloud adoption (1a, 1b, 2c).
3. Describe data center infrastructure management (1a, 1b, 2c).
4. Identify business drivers for Cloud computing (1a, 1b, 2c).

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take cpmt-1403;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CPMT 1403

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Install and configure network clients; setup users, groups, policies, and profiles; configure hardware components and applications; set up and maintain logon security and security for files and printers; configure and optimize clients in multiple environments.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the client operating system by
    a. listing common client operating systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. discussing similarities and differences between a client operating system and a server operating system (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. describing the hardware requirements of the client operating system being used for the course (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of operations of the client operating system by
    a. installing and configuring network clients (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. installing the operating system (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. setting up users, groups, policies, and profiles (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. configuring hardware components and applications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. managing user accounts (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. demonstrating the installation of application software (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. identifying the requirements for antivirus protection (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    h. listing security measures to protect used data (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    i. setting up and maintaining a logon security and security for files and printers (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. demonstrating peer to peer networking practices (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    k. demonstrating the installation of a printer (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    l. describing backup procedure and common media (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    m. demonstrating common wireless networking (1a, 1b, 1c, 2a, 2c, 2d, 2e).
3. Demonstrate common troubleshooting by
    a. starting and stopping task (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. starting and stopping print services (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. demonstrating changing file access permissions (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. configuring and optimizing clients in multiple environments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take cpmt-1403;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CPMT 1403

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and use network transmission media; explain the OSI model; identify the characteristics of network topologies and protocols; identify the functions of a network operating system and distinguish between centralized, client/server, and peer-to-peer systems; and distinguish between Local Area Networks (LANs) and Wide Area Networks (WANs) and identify the components used to expand a LAN into a WAN.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify and use network transmission media by
    a. comparing network transmission media (1a, 2c, 2d, 2e);
    b. selecting the appropriate medium for a variety of networking environments (1a, 2c, 2d, 2e);
    c. comparing physical and data link networking standards such as ethernet and 802.11, including associated media, speeds, and limitations (1a, 2c, 2d, 2e).
2. Demonstrate an understanding of the OSI model by
    a. explaining the OSI model (1a, 2c, 2d, 2e);
    b. explaining why the OSI model is useful as a means of understanding and modeling networks (1a, 2c, 2d, 2e).
3. Demonstrate an understanding of the primary network topologies/protocols by
    a. comparing the primary network topologies (1a, 2c, 2d, 2e);
    b. determining the appropriate environment for each (1a, 2c, 2d, 2e).
4. Demonstrate the ability to identify the functions of a network operating system and distinguish between centralized, client/server, and peer-to-peer systems by
    a. comparing centralized client/server networks and peer-to-peer networks (1a, 2c, 2d, 2e);
    b. determining the appropriate use for each centralized client/server network and peer-to-peer network (1a, 2c, 2d, 2e).
5. Demonstrate an understanding of Local Area Networks (LANs) and Wide Area Networks (WANs), including identifying the components used to expand a LAN into a WAN by
    a. comparing local area networks (LANs) and wide area networks (WANs) (1a, 2c, 2d, 2e);
    b. explaining the architectures used by LANs and WANs (1a, 2c, 2d, 2e);
    c. selecting components used to expand a LAN into a WAN (1a, 2c, 2d, 2e).
6. Demonstrate an understanding of the TCP/IP basic architecture and its utilities, including demonstrating how to configure a node for TCP/IP by
    a. explaining the TCP/IP basic architecture (1a, 2c, 2d, 2e);
    b. comparing the TCP/IP basic architecture to the OSI model (1a, 2c, 2d, 2e);
    c. comparing the key TCP/IP protocol (1a, 2c, 2d, 2e);
    d. identifying each key TCP/IP protocol's place within the OSI model (1a, 2c, 2d, 2e).

7. Demonstrate an understanding of common network management tasks by
    a. performing account administration (1a, 1b, 2c, 2d, 2e);
    b. performing routine maintenance (1a, 1b, 2c, 2d, 2e);
    c. creating backups and restores (1a, 1b, 2c, 2d, 2e);
    d. performing troubleshooting (1a, 1b, 2c, 2d, 2e);
    e. configuring a node for a TCP/IP network (1a, 1b, 2c, 2d, 2e);
    f. identifying convergence technologies that combine multiple types of communication services into a single network (1a, 2c, 2d, 2e).
8. Demonstrate an understanding of basic network security concepts by
    a. explaining the importance of confidentiality, integrity, and availability (1a, 1b, 2c, 2d, 2e);
    b. describing basic threats to network security as well as basic techniques to combat those threats (1a, 1b, 2c, 2d, 2e).

Recommended Prerequisite(s): ITNW 1309

Course Learning Outcomes

Course Learning Outcomes
Assess and plan migration from on-premise to Cloud solution environment; identify methods and tools to maintain security and protect data; differentiate between the various storage, computing, and networking options; identify deployment and management options; deploy available services for scalability, reliability and high availability; use Cloud monitoring and auto-scaling services to scale infrastructure up and down.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Assess and plan migration from on-premise to Cloud solution environment (1a, 1b, 2c).
2. Identify methods and tools to maintain security and protect data adoption (1a, 1b, 2c).
3. Differentiate between the various storage, computing, and networking options; identify deployment and management options (1a, 1b, 2c).
4. Deploy available services for scalability, reliability and high availability (1a, 1b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITNW 1408

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Configure peripherals and devices; set up servers; configure directory replication; manage licensing; create and manage system policies and profiles; administer remote servers and disk resources; create and share resources; implement fault-tolerance; configure servers for interoperability; install and configure Remote Access Service (RAS); and identify and monitor performance bottlenecks and resolve configuration problems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of a server operating system by
    a. discussing similarities and differences in a server operating system with a client operating system (1a, 1b, 1c, 2a, 2d, 2e);
    b. listing common current server operating systems (1a, 1b, 1c, 2a, 2d, 2e);
    c. describing user accounts, administrative accounts, and group membership (1a, 1b, 1c, 2a, 2d, 2e).
2. Demonstrate installation and management of a server operating system by
    a. installing a current server operating system in a networked environment (1a, 1b, 1c, 2a, 2d, 2e);
    b. creating user accounts (1a, 1b, 1c, 2a, 2d, 2e);
    c. managing user accounts (1a, 1b, 1c, 2a, 2d, 2e);
    d. identifying how groups function and their characteristics (1a, 1b, 1c, 2a, 2d, 2e);
    e. implementing network services such as DHCP and DNS (1a, 1b, 1c, 2a, 2d, 2e);
    f. configuring network print services (1a, 1b, 1c, 2a, 2d, 2e);
    g. describing backup procedures (1a, 1b, 1c, 2a, 2d, 2e);
    h. identifying good disk storage management procedures (1a, 1b, 1c, 2a, 2d, 2e);
    i. demonstrating file sharing (1a, 1b, 1c, 2a, 2d, 2e);
    j. describing routine administrative tasks (1a, 1b, 1c, 2a, 2d, 2e).
3. Demonstrate common troubleshooting by
    a. starting and stopping task (1a, 1b, 1c, 2a, 2d, 2e);
    b. starting and stopping print services (1a, 1b, 1c, 2a, 2d, 2e);
    c. demonstrating changing file access permissions (1a, 1b, 1c, 2a, 2d, 2e).

ITNW 2427 - Advanced Cloud Concepts

Course Key
14911

Course Rubric
ITNW

Course Number
2427

Course Title
Advanced Cloud Concepts

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Focus on enterprise Cloud architecture, with advanced topics including multi-Cloud platforms inclusive of computing, networking, storage, monitoring and database. Recommended Prerequisite: ITNW-1436

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites/corequisites.
Type
Prerequisites

10
A Requirement block where all subrequirements are required

Take ITNW-1436;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITNW 1436

Course Learning Outcomes

Course Learning Outcomes
Design architectures to decouple infrastructure and reduce interdependencies; automate the deployment of Cloud resources; use Cloud provider tools to evaluate Cloud resource-based cost models and apply best practices to design for cost optimization; define and distinguish between Cloud infrastructure mechanisms such as virtual servers, Cloud-based security, storage, usage and monitoring; identify and differentiate between each of the multi-Cloud platform models.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Design architectures to decouple infrastructure and reduce interdependencies (1a, 1b, 2c).
2. Automate the deployment of Cloud resources (1a, 1b, 2c).
3. Use Cloud provider tools to evaluate Cloud resource-based cost models and apply best practices to design for cost optimization (1a, 1b, 2c).
4. Define and distinguish between Cloud infrastructure mechanisms such as virtual servers (1a, 1b, 2c).

ITSC 1416 - Linux Installation and Configuration

Prerequisite

10
A Requirement block where all subrequirements are required

#take CPMT-1403
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): CPMT 1403

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Install, administer, and manage a Linux system; demonstrate proficiency with Linux utilities, commands, and applications; identify and resolve security-based issues; and integrate a Linux system into an existing network.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the history of Linux (1a, 1b, 2a, 2c, 2d, 2e).
2. Identify the common distributions of Linux (1a, 1b, 2a, 2c, 2d, 2e).
3. Install, administer, and manage a Linux system (1a, 1b, 2a, 2c, 2d, 2e).
4. Organize and manage files within the Linux file system from a terminal window (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate proficiency with Linux utilities, commands, and applications from a terminal window (1a, 1b, 2a, 2c, 2d, 2e).
6. Combine Linux tools using features such as filters, pipes, redirection, and regular expressions from a terminal window (1a, 1b, 2a, 2c, 2d, 2e).
7. Identify and resolve security-based issues (1a, 1b, 2a, 2c, 2d, 2e).
8. Integrate a Linux system into a mixed (Windows and Linux) network using a virtual network environment (1a, 1b, 2a, 2c, 2d, 2e).
9. Write shell scripts (1a, 1b, 2a, 2c, 2d, 2e).
10. Create and add disk storage working in a virtual environment (1a, 1b, 2a, 2c, 2d, 2e).
11. Select the appropriate tool and edit text and configuration files (1a, 1b, 2a, 2c, 2d, 2e).

ITSC 2346 - Computer Center Management

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Assessment of needs of a computing center and general principles of hardware and software acquisition, maintenance, licensing, and improving usage scheduling. Emphasis on interpersonal communication and management skills.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Summarize the process of hardware/software selection and acquisition; describe the categories of software licenses; contrast the options available for software/hardware maintenance; develop a plan for scheduling hardware usage; and determine factors involved in successful workplace personnel interactions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the need of a growing company for new information systems to support their activities by
    a. assessing and/or grading through a project rubric (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of information systems concepts, methodologies, and technologies by
    a. describing the basic features of an information system (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. discussing the similarities and differences among different information systems and their features (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. explaining the basic features of an information system (1a, 1b, 1c, 2a, 2c, 2d, 2e).
3. Demonstrate the management of hardware and software acquisitions, licenses, and maintenance agreements in the form of a team project by
    a. identifying the process and steps for implementing a Technology Hardware and Software Copyright Agreement (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. differentiating between licenses and maintenance agreements (1a, 1b, 1c, 2a, 2c, 2d, 2e).

ITSC 2439 - Personal Computer Help Desk Support

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate rapport with users in problem-solving situations; analyze user problems and lead them through solutions; maintain problem logs; and formulate problem-solving methodologies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of personal computer help desk support concepts, methodologies, and technologies by
    a. describing the various introductory components of end user computing (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. discussing the similarities and aspects of computer user support (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. demonstrating the proper customer service skills for user support, given a scenario (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. explaining the common computer system installation aspects (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. comparing policies and procedures used with several different help desk systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. identifying the needs and methods in training computer users (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of personal computer help desk structures and procedures by
    a. identifying the process and steps in problem-solving situations with computer users (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. analyzing computer user problems and guiding them through to the appropriate solution (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. managing and maintaining problem logs (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. formulating problem-solving methodologies (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. evaluating end computer user documentation and problem logs (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. describing the major types of computer facilities and management and what a system administrator needs to know about the operating system design (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. identifying the different ways help desks are structured to provide support (1a, 1b, 1c, 2a, 2c, 2d, 2e).

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436 or ITSE 1479

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design, write, and test small interactive programs for mobile platforms. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the design process in developing a mobile application by
    a. describing current design tools (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. defining the various mobile architectures (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. defining appropriate user interfaces (1a, 1b, 2a, 2b, 2c, 2d, 2e).
2. Develop applications for mobile devices by
    a. using current development tools (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. creating a mobile user interface (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. writing code using proper programming logic (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    d. implementing graphics, audio, or video (1a, 1b, 2a, 2b, 2c, 2d, 2e).
3. Publish a mobile application by
    a. registering with the Play Stores (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. testing the release version of the application (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. packaging and deploying the application (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    d. developing marketing documents for the Play Stores (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Requirements
Recommended Prerequisite(s): COSC 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the use of markup and scripting languages; and create interactive web pages. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe basic internet concepts and terminology by
    a. describing the internet infrastructure (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining how the internet developed (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing how the internet functions (1a, 1b, 2a, 2c, 2d, 2e);
    d. defining internet and web terms (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing web page design techniques (1a, 1b, 2a, 2c, 2d, 2e).
2. Develop web pages and sites using current techniques by
    a. describing common web page formats (1a, 1b, 2a, 2c, 2d, 2e);
    b. creating web pages using the current standards of markup language (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing web site structures (1a, 1b, 2a, 2c, 2d, 2e);
    d. creating multipage web sites (1a, 1b, 2a, 2c, 2d, 2e);
    e. creating layouts using cascading style sheets (1a, 1b, 2a, 2c, 2d, 2e);
    f. creating graphical interfaces (1a, 1b, 2a, 2c, 2d, 2e).
3. Create interactive web pages and sites using current techniques by
    a. creating forms (1a, 1b, 2a, 2c, 2d, 2e);
    b. designing content rich web sites (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the use of dynamic markup language (1a, 1b, 2a, 2c, 2d, 2e);
    d. developing web page programs with a scripting programming language (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing problem solving techniques in correcting errors (1a, 1b, 2a, 2c, 2d, 2e).

ITSE 1430 - Introduction to C# Programming

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2). A study of C# syntax including data types, control structures, functions, syntax, and semantics of the language, classes, class relationships, and exception handling. Recommended Prerequisite: COSC-1436

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take COSC-1436;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Implement C# classes, objects, and class relationships; develop, write, and test programs applying Object Oriented principles using C#; create member functions, and demonstrate exception handling. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate problem solving skills in C# using a console application, using a Windows application, using a Windows Presentation Foundation (WPF), and using a web application (ASP.NET) by
    a. translating written material into a computer solution (1a, 1b, 2a, 2c, 2d, 2e);
    b. developing a program in C# for a console application, for a Windows application, for a WPF application, and for a web application (1a, 1b, 2a, 2c, 2d, 2e);
    c. using debugging techniques to solve errors (1a, 1b, 2a, 2c, 2d, 2e);
    d. using C# methods in programming (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the use of C# control structures (1a, 1b, 2a, 2c, 2d, 2e);
    f. demonstrating the use of C# comments (1c, 2b);
    g. using C# data types such as short, int, long, float, double, decimal, char, string, datetime, void, and bool (1a, 1b, 2a, 2c, 2d, 2e);
    h. demonstrating the use of constants in C# (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of object oriented programming in C# by
    a. developing a class in C# (1a, 1b, 2a, 2c, 2d, 2e);
    b. using Windows Form object in C# such as TextBox, Label, Button, ComboBox, RadioButton, CheckBox, and others (1a, 1b, 2a, 2c, 2d, 2e);
    c. using WPF objects in C# such as TextBox, Label, Button, and others (1a, 1b, 2a, 2c, 2d, 2e);
    d. using web form objects in C# such as TextBox, Label, Button, DropDownList, RadioButtonList, CheckBoxList and others (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of arrays and collections in C# by
    a. using a one dimensional array in a C# program (1a, 1b, 2a, 2c, 2d, 2e);
    b. developing a rectangular array in a C# program (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the use of a jagged array in a C# program (1a, 1b, 2a, 2c, 2d, 2e);
    d. demonstrating the use of a collection such as a List, SortedList, Queue, or Stack in a C# program (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate database programming using C# by
    a. using data sources in a C# program (1a, 1b, 2a, 2c, 2d, 2e);
    b. using a DataGridView or a Details view in a C# program (1a, 1b, 2a, 2c, 2d, 2e);
    c. using a bound control and parameterized queries in a C# program (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of reading and writing text and XML files by
    a. writing a C# program to read a text or XML file (1a, 1b, 2a, 2c, 2d, 2e);

b. writing a C# program to write a text or XML file (1a, 1b, 2a, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use system design tools; identify phases of the system design life cycle; develop a prototype; compare and contrast project management tools; and develop documentation for the system life cycle. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify phases of the system design life cycle by
    a. describing the system development life cycle (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the phases of the system development life cycle (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining fact finding techniques (1a, 1b, 2a, 2c, 2d, 2e);
    d. identifying the main components of an information system (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing the steps in a system project (1a, 1b, 2a, 2c, 2d, 2e);
    f. explaining the usages of feasibility studies (1a, 1b, 2a, 2c, 2d, 2e);
    g. describing data and process modeling (1a, 1b, 2a, 2c, 2d, 2e);
    h. evaluating alternative solutions (1a, 1b, 2a, 2c, 2d, 2e).
2. Use system design tools by
    a. discussing input and output design issues (1a, 1b, 2a, 2c, 2d, 2e);
    b. listing specific guidelines for user interface design (1a, 1b, 2a, 2c, 2d, 2e);
    c. designing source document controls (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing security and control issues (1a, 1b, 2a, 2c, 2d, 2e);
    e. using methodologies to describe the data relationships (1a, 1b, 2a, 2c, 2d, 2e);
    f. developing a plan for physical storage and management of data (1a, 1b, 2a, 2c, 2d, 2e);
    g. determining which system architecture is best to implement in a given scenario (1a, 1b, 2a, 2c, 2d, 2e);
    h. describing the processes in selecting a system architecture (1a, 1b, 2a, 2c, 2d, 2e).
3. Develop a prototype by
    a. explaining prototyping methods (1a, 1b, 2a, 2c, 2d, 2e);
    b. using case tool(s) to develop a system or design a prototype (1a, 1b, 2a, 2c, 2d, 2e);
    c. evaluating prototyping tools (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing the application development process (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining the importance of software quality assurance (1a, 1b, 2a, 2c, 2d, 2e).
4. Compare and contrast project management tools by
    a. explaining project planning, scheduling, monitoring, and reporting (1a, 1b, 2a, 2c, 2d, 2e);
    b. using the project development steps (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing popular scheduling tools (1a, 1b, 2a, 2c, 2d, 2e);
    d. discussing key project management concepts (1a, 1b, 2a, 2c, 2d, 2e);

e. evaluating popular project management software (1a, 1b, 2a, 2c, 2d, 2e).

5. Develop documentation for the system life cycle by

   a. discussing good system development documentation techniques (1a, 1b, 2a, 2c, 2d, 2e);

   b. developing effective documentation methods to use during system development (1a, 1b, 2a, 2c, 2d, 2e);

   c. identifying techniques for developing good user documentation (1a, 1b, 2a, 2c, 2d, 2e).

A Requirement block where all subrequirements are required

#Take BCIS-1305 or COSC-1301
A Subrequirement block where all groups are required

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Recommended Prerequisite(s): BCIS 1305 or COSC 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design programming solutions using scripting languages; write scripts; test and debug scripts; design solutions to real-world problems using a scripting language. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Use software development methodology in program problem solving by

   a. demonstrating competency in algorithm development (1a, 1b, 2c);

   b. writing programs using the techniques of structured programming (1a, 1b, 2a, 2c);

   c. writing programs using object-oriented techniques in multiple scripting environments, both client-side and server-side environments (1a, 1b, 2a, 2c).

2. Write program code using the scripting languages by

   a. describing the appropriate domain for a network-based problem (1b, 1b, 2a, 2c, 2d, 2e);

   b. defining a solution with the chosen problem domain (1b, 2c, 2d, 2e);

   c. writing programs using knowledge of variable data types and control structure concepts (1a, 1b, 2a, 2c);

   d. creating programs using methods that pass data between methods (1a, 1b, 2a, 2c);

   e. writing programs using arrays and lists (1a, 1b, 2a, 2c);

   f. writing code involving text and binary files (1a, 1b, 2a, 2c);

   g. implementing and using available libraries within the problem domain (1a, 1b, 2a, 2c, 2d, 2e);

   h. creating programs involving classes and the mechanisms associated with classes and objects (1a, 1b, 2a, 2c);

   i. demonstrating the idea of exception handling (1a, 1b, 2a, 2c);

   j. creating basic graphic user interfaces using the available tools within a problem domain (1a, 1b, 2a, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create and use client-side and server-side scripts to design and implement dynamic websites. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of web page and site construction using scripting techniques by

   a. developing a script (1a, 1b, 2a, 2c, 2d, 2e);

   b. declaring variables and data types (1a, 1b, 2a, 2c, 2d, 2e);

   c. using debugging techniques to solve errors (1a, 1b, 2a, 2c, 2d, 2e);

   d. writing functions (1a, 1b, 2a, 2c, 2d, 2e);

   e. demonstrating the use of control structures (1a, 1b, 2a, 2c, 2d, 2e).

2. Demonstrate an understanding of the object model by

   a. describing objects and the object model (1a, 1b, 2a, 2c, 2d, 2e);

   b. creating document objects (1a, 1b, 2a, 2c, 2d, 2e);

   c. applying event handlers to objects (1a, 1b, 2a, 2c, 2d, 2e);

   d. performing client side form validation (1a, 1b, 2a, 2c, 2d, 2e).

3. Demonstrate an understanding of dynamic content by

   a. defining the methods and properties of nodes (1a, 1b, 2a, 2c, 2d, 2e);

   b. applying node properties to create dynamic content (1a, 1b, 2a, 2c, 2d, 2e);

   c. manipulating the browser window (1a, 1b, 2a, 2c, 2d, 2e);

   d. creating dynamic menus (1a, 1b, 2a, 2c, 2d, 2e);

   e. creating interactive forms (1a, 1b, 2a, 2c, 2d, 2e).

ITSE 2310 - iOS Application Programming

(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Complete the procedures to become a registered Apple iOS developer. Design interfaces for iOS applications. Produce concept documentation. Create iOS applications in native Software Development Kit (SDK); and deploy applications for various iOS devices. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of iOS development by
    a. explaining the iOS SDK (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. defining the user interface (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. describing the technologies used in creating iOS apps (1a, 1b, 2a, 2b, 2c, 2d, 2e).
2. Develop iOS apps for iPhone/iPad by
    a. creating an iOS app using the current tools (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. creating an iOS app using Apple's current tools (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. developing a user interface with touch (1a, 1b, 2a, 2b, 2c, 2d, 2e).
3. Deploy iOS apps by
    a. registering the iOS application (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. submitting the iOS application (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. developing promotional materials for the iOS application (1a, 1b, 2a, 2b, 2c, 2d, 2e).

 # TAKE COSC-1436;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop database applications using a structured query language; create queries and reports from database tables; implement data integrity; optimize query performance; create and maintain indexes; and create appropriate documentation. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Develop database applications using a structured query language by
    a. organizing data for the design of a database (1a, 1b, 2a, 2c, 2d, 2e);
    b. designing relational databases and their components (1a, 1b, 2a, 2c, 2d, 2e);
    c. developing database objects using standard accepted practices (1a, 1b, 2a, 2c, 2d, 2e);
    d. developing databases conforming to normalization and database integrity rules (1a, 1b, 2a, 2c, 2d, 2e);
    e. grouping database content (1a, 1b, 2a, 2c, 2d, 2e).
2. Create queries and reports from database tables using a structured query language by
    a. developing structured query language queries (1a, 1b, 2a, 2c, 2d, 2e);
    b. producing optimal query performance (1a, 1b, 2a, 2c, 2d, 2e);
    c. creating and maintain indexes (1a, 1b, 2a, 2c, 2d, 2e);
    d. changing data from a database to a web document (1a, 1b, 2a, 2c, 2d, 2e);
    e. integrating the database with other programs (1a, 1b, 2a, 2c, 2d, 2e);
    f. designing logical expressions for advanced queries (1a, 1b, 2a, 2c, 2d, 2e);
    g. developing multi-table queries (1a, 1b, 2a, 2c, 2d, 2e).
3. Create appropriate documentation by
    a. developing forms and reports (1a, 1b, 2a, 2c, 2d, 2e);
    b. producing custom forms and reports (1a, 1b, 2a, 2c, 2d, 2e);
    c. creating user interfaces to database (1a, 1b, 2a, 2c, 2d, 2e);
    d. developing exception handling (1a, 1b, 2a, 2c, 2d, 2e);
    e. creating data and database security (1a, 1b, 2a, 2c, 2d, 2e).

take cosc-1436;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): COSC 1436

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Implement Java classes, objects, and class relationships; design, develop, test, and document programs applying object-oriented principles using Java; create member functions; and demonstrate exception handling. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Use software development methodology in program problem solving by
    a. demonstrating competency in algorithm development (1a, 1b, 2c);
    b. designing program logic with pseudocode or UML class and object diagrams (1a, 1b, 2a, 2c);
    c. writing programs using the techniques of structured programming (1a, 1b, 2a, 2c);
    d. writing programs using object orientated techniques of the UML (1a, 1b, 2a, 2c).
2. Write program code using the Java language by
    a. writing programs using knowledge of variable data types and control structure concepts (1a, 1b, 2a, 2c);
    b. creating programs using methods that pass data between methods (1a, 1b, 2a, 2c);
    c. writing programs using arrays and lists (1a, 1b, 2a, 2c);
    d. writing code involving text and binary files (1a, 1b, 2a, 2c);
    e. creating programs involving classes and the mechanisms associated with classes and objects (1a, 1b, 2a, 2c);
    f. writing programs involving inheritance and polymorphism (1a, 1b, 2a, 2c);
    g. demonstrating the idea of exception handling (1a, 1b, 2a, 2c);
    h. writing programs using the concept of recursion (1a, 1b, 2a, 2c);
    i. creating basic graphic user interfaces (applications and applets) using the AWT and Swing classes (1a, 1b, 2a, 2c);
    j. writing event driven programs for GUI applications (1a, 1b, 2a, 2c);
    k. demonstrating advanced Java techniques by using the Java Collections Framework (1a, 1b, 2a, 2c).
3. Demonstrate the ability to run, test, and debug programs by
    a. creating programs using problem solving skills to design, code, and test programs (1a, 2a, 2b, 2c);
    b. running programs (1a, 2a, 2c);
    c. using test data when running programs (1a, 2a, 2c);
    d. discovering debug techniques to use when needed to correct program errors (1a, 2a, 2c);
    e. explaining the importance of validating output (1a, 2a, 2c).

take bcis-1305 or cosc-1301;
A Subrequirement block where all groups are required

31
(SELECTED CRSES): Take 3 of the following courses...

Requirements
Recommended Prerequisite(s): BCIS 1305 or COSC 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and differentiate the application of relational and nonrelational databases; identify database terminology and concepts; plan, define, and design a database; design and generate tables, forms, and reports; and design and process queries. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the fundamental concepts needed to plan for, design, and create a database using an appropriate relational database software application by
    a. organizing data for the design of the database (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. creating tables to store the needed data (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. modifying table designs to accommodate data (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. setting field data types and formatting properties (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. establishing primary and foreign key fields (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. placing data into tables using a variety of methods (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. editing stored data (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    h. defining relationships needed in the database (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the processes needed to mine data in the database table by
    a. creating select queries using various selection criteria, multiple table queries, action queries, and advanced queries (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. running selected queries using various selection criteria, multiple table queries, action queries, and advanced queries (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. filtering data with prescribed parameters (1a, 1b, 1c, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the use and development of forms and reports by
    a. creating automated and custom forms using form design tools (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. creating automated and custom forms using report design tools (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. applying special formatting requirements to forms and reports (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. adding enhancement features to forms and reports that may include combo boxes, calculated controls, aggregate calculations, sorting, and grouping (1a, 1b, 1c, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of the use and implementations of a graphical user interface by
    a. automating tasks for the interface using macros (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. creating a switchboard (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. modifying a switchboard (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. adding command buttons to forms (1a, 1b, 1c, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of common database options for managing and securing a database by
    a. establishing a database password (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. splitting a database (1a, 1b, 1c, 2a, 2c, 2d, 2e);

c. using the linked table manager (1a, 1b, 1c, 2a, 2c, 2d, 2e);

d. setting database startup options (1a, 1b, 1c, 2a, 2c, 2d, 2e).

Required Prerequisite(s): ACNT-1313 BCIS-1305

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will:

1. Create and design macros. (C8, C19, F9, F12)
2. Use data analysis features. (C8, C18, C19, F9, F10, F12)
3. Develop solutions using linked worksheets. (C6, C8, C19, F9)
4. Create spreadsheets to organize, calculate, and summarize quantitative data using formulas, functions, pivot tables, and other tools. (C2, C6, C8, C18, C19, F3, F4, F9)
5. Create bank and credit card reconciliations using Excel functions. (C2, C6, C8, C19, F3, F4, F9)
6. Create advanced pivot tables and charts. (C6, C8, C19, F9) 7. Automate importing and cleaning datasets. (C8, C19, F9)
7. Use Power Query and manage multiple queries (C5, C6, C8, C19, F9)
8. Demonstrate practical experience working with accounting information through project-based learning including both individual and team settings. (C2, C6, C7, C8, C9, C18, C19, F3, F4, F9, F10, F12

ITSY 1300 - Fundamentals of Information Security

General

Course Key
10577

Course Rubric
ITSY

Course Number
1300

Course Title
Fundamentals of Information Security

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) An introduction to information security including vocabulary and terminology, ethics, the legal environment, and risk management. Identification of exposures and vulnerabilities and appropriate countermeasures are addressed. The importance of appropriate planning, policies and controls is also discussed.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Outline best practices for the information security goals of confidentiality, integrity and availability; explain ethical practices; define vocabulary/terminology related to information security; explain the importance of planning and administrative controls; identify security threats, vulnerabilities, and countermeasures; and identify procedures for security risk management. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of best practices for the information security goals of confidentiality, integrity, and availability by
    a. contrasting symmetric encryption and asymmetric (public key) encryption (1a, 1b, 2c, 2d, 2e);
    b. comparing current encryption algorithms (1a, 1b, 2c, 2d, 2e);
    c. explaining security awareness programs that enable end users to understand their part in information security (1a, 1b, 2b, 2c, 2d, 2e);
    d. explaining countermeasure best practices (1a, 1b, 2c, 2d, 2e);
    e. explaining issues related to access control (1a, 1b, 2c, 2d, 2e);
    f. evaluating software tools to help manage information security (1a, 1b, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate an understanding of ethical practices by
    a. explaining legal requirements associated with information security, including privacy and computer forensics (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating basic computer forensic processes (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate an understanding of vocabulary/terminology related to information security by
    a. comparing confidentiality, integrity, availability, authentication, and nonrepudiation (1a, 1b, 2c, 2d, 2e);
    b. explaining the operational model of computer security (1a, 1b, 2c, 2d, 2e);
    c. explaining how various security technologies and techniques fit within the operational model (1a, 1b, 2c, 2d, 2e);
    d. explaining vocabulary related to encryption and public key infrastructure (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of the importance of planning and administrative controls by
    a. explaining the impact of IT and software engineering project management and change management on information security (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating the ability to explain the importance of and to apply the concepts of least privilege and need to know in information security (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining the importance of disaster recovery and business continuity plans (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    d. identifying best practices for disaster recovery and business continuity plans (1a, 1b, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate an understanding of security threats, vulnerabilities, and countermeasures by
    a. comparing vulnerabilities and threats (1a, 1b, 2c, 2d, 2e);
    b. explaining common networking vulnerabilities, including wired and wireless networks (1a, 1b, 2c, 2d, 2e);
    c. identifying common malicious, environmental, and physical threats and the countermeasures used to combat them (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    d. identifying unintentional threats and the countermeasures used to combat them (1a, 1b, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate an understanding of procedures for security risk management by
    a. explaining the importance of risk management to information security (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    b. comparing qualitative and quantitative risk assessment (1a, 1b, 2a, 2b, 2c, 2d, 2e);
    c. explaining tools used in risk management (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Take ITSY-2400(6427) ITSY-2401;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITSY 2400 and ITSY 2401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Build IDS sensors and attach them to the network (hardware and software); install and manage a secure communication link between all sensors and the monitor; install and manage event database(s); analyze an event and trends; install, manage, and interpret syslog servers and system logs; identify legal and policy issues associated with system and network monitoring; and deploy, implement, and test IDS security plan. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe network security implementation strategies and the roles each can play within the security life cycle (1a, 1b, 2a, 2c, 2d, 2e).
2. Identify network security management best practices and strategies for responding when security measures fail (1a, 1b, 2a, 2c, 2d, 2e).
3. Evaluate available resources and trends in network security (1a, 1b, 2a, 2c, 2d, 2e).
4. Analyze how port scanning and fingerprinting are used by hackers (1a, 1b, 2a, 2c, 2d).
5. Identify and remove common types of malware from infected systems (1a, 1b, 2a, 2d, 2e).
6. Perform network traffic analysis and sniffing by using appropriate tools (1a, 2a, 2c, 2d, 2e).
7. Demonstrate an understanding of infrastructure system interoperability (1a, 1b, 2a, 2d, 2e).
8. Perform incident handling by using appropriate methods (1a, 1b, 2a, 2c, 2d, 2e).
9. Compare and contrast defensive technologies (1a, 1b, 2a, 2c, 2d, 2e).

ITSY 2341 - Security Management Practices

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop a security plan; establish suitable level of protection; determine legal issues; implement network security design; and revise risk analysis and security plan. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of organizational security models by
    a. developing a security plan (1a, 1b, 2a, 2c, 2d, 2e);
    b. establishing suitable level of protection (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining security program components (1a, 1b, 2a, 2c, 2d, 2e);
    d. distinguishing between military and commercial security requirements (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining security management responsibilities (1a, 1b, 2a, 2c, 2d, 2e);
    f. describing organizational layers of responsibility (1a, 1b, 2a, 2c, 2d, 2e);
    g. distinguishing between administrative, technical, and physical security controls (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of risk management, analysis, and mitigation techniques by
    a. identifying assets and their value (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying vulnerabilities and threats to confidentiality, integrity, and availability of data (1a, 1b, 2a, 2c, 2d, 2e);
    c. distinguishing between risk mitigation, transfer, avoidance, and acceptance (1a, 1b, 2a, 2c, 2d, 2e);
    d. creating quantitative and qualitative risk analyses and cost/benefit analyses (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing administrative, technical, and physical methods to mitigate risks (1a, 1b, 2a, 2c, 2d, 2e);
    f. creating a high level design for network security including firewalls and intrusion detection (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the legal, regulatory, and ethical environment under which businesses operate by
    a. explaining the complexities of cybercrime (1a, 1b, 2a, 2c, 2d, 2e);
    b. examining intellectual property laws (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing privacy issues (1a, 1b, 2a, 2c, 2d, 2e);
    d. discussing business liability and its ramifications (1a, 1b, 2a, 2c, 2d, 2e);
    e. describing incident response procedures in the context of the legal, regulatory, and ethical environment (1a, 1b, 2a, 2c, 2d, 2e).

4. Demonstrate an understanding of security documentation by
    a. demonstrating the ability to write and maintain a simple security plan (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating the ability to read, analyze, and summarize standards relevant to security management (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to create and document a security baseline for a system component (1a, 1b, 2a, 2c, 2d, 2e);
    d. writing a security guideline document for end users for a current security issue (1a, 1b, 2a, 2c, 2d, 2e);
    e. writing a standard operating procedure document to perform a technical activity (1a, 1b, 2a, 2c, 2d, 2e).

5. Demonstrate an understanding of business continuity and disaster recovery planning by
    a. describing the requirements for business continuity planning (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing a business impact analysis (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to select, develop, and implement disaster recovery and business continuity plans (1a, 1b, 2a, 2c, 2d, 2e);
    d. explaining the major issues concerning data backup and offset facilities (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining the types of drills and tests to evaluate the effectiveness of the business continuity and disaster recovery plans (1a, 1b, 2a, 2c, 2d, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ITSY 2400 and ITSY 2401

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify sources of attacks; restore the system to normal operation; identify and prevent security threats; perform a postmortem analysis; and identify computer investigation issues; and identify the roles and responsibility of the incident response team. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify sources of attacks by
    a. comparing the characteristics of internal or external attacks (1a, 1b, 2a, 2c, 2d, 2e).
2. Restore the system to normal operation by
    a. wiping or replacing infected drives (1a, 1b, 2a, 2c, 2d, 2e);
    b. reimaging or installing OS and Applications (1a, 1b, 2a, 2c, 2d, 2e).
3. Identify and prevent security threats by
    a. subscribing to security bulletins (1a, 1b, 2a, 2c, 2d, 2e);
    b. maintaining updated software (1a, 1b, 2a, 2c, 2d, 2e).
4. Perform a postmortem analysis by
    a. using forensics techniques and tools to analyze memory, processes, file systems, network activity, and disks (1a, 1b, 2a, 2c, 2d, 2e).
5. Identify computer investigation issues by
    a. applying best practice forensics techniques such as search and seizure procedures, chain of custody documentation, and maintaining integrity of evidence (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating knowledge of applicable laws and policies (1a, 1b, 2a, 2c, 2d, 2e);
    c. considering technical, legal, and business impact issues of a security incident (1a, 1b, 2a, 2c, 2d, 2e).
6. Identify the roles and responsibility of the incident response team by
    a. planning the organization, responsibilities, management, communications, and training of members of an incident response team (1a, 1b, 2a, 2c, 2d, 2e);
    b. create an Incident Response Plan (1a, 1b, 2a, 2c, 2d, 2e);
    c. compare and contrast the Incident Response Plan with the Disaster Recovery Plan and the Business Continuity Plan (1a, 1b, 2a, 2c, 2d, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ITSY 1300

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the ethical hacking process, identify attacks and malware, and implement defensive countermeasures. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate baseline technical competence in areas fundamental to security and ethical hacking by
    a. installing Linux and Windows virtual machines and configuring networking for an operating system in a virtual environment (1a, 1b, 2a, 2c, 2d, 2e);
    b. utilizing the Linux command line to perform basic directory navigation and file operations (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating an understanding of basic networking, the TCP/IP protocol, firewalls, intrusion detection systems, and network packet analysis (1a, 1b, 2a, 2c, 2d, 2e);
    d. demonstrating a basic understanding of cryptography, including symmetric and asymmetric encryption, hashing, the PKI, password cracking, and cryptanalysis (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of the typical stages in the hacking or ethical hacking process by
    a. explaining and demonstrating the major activities, tools, and techniques used in the footprinting stage (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining and demonstrating the major activities, tools, and techniques used in the scanning stage (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining and demonstrating the major activities, tools, and techniques used in the enumeration stage (1a, 1b, 2a, 2c, 2d, 2e);
    d. explaining and demonstrating the major activities, tools, and techniques used in the hacking stage (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the different types of network attacks by
    a. comparing, contrasting, and using the Internet to research documented instances of wireless attacks (1a, 1b, 2a, 2c, 2d, 2e);
    b. comparing, contrasting, and using the Internet to research documented instances of web and database attacks (1a, 1b, 2a, 2c, 2d, 2e);
    c. comparing, contrasting, and using the Internet to research documented instances of session hijacking (1a, 1b, 2a, 2c, 2d, 2e);
    d. comparing, contrasting, and using the Internet to research documented instances of denial of service (1a, 1b, 2a, 2c, 2d, 2e);
    e. comparing, contrasting, and using the Internet to research documented instances of social engineering (1a, 1b, 2a, 2c, 2d, 2e);
    f. comparing, contrasting, and using the Internet to research documented instances of intellectual property theft (1a, 1b, 2a, 2c, 2d, 2e);
    g. comparing, contrasting, and using the Internet to research documented instances of hacking for financial gain (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of the different types of malware by
    a. comparing, contrasting, and using the Internet to research documented instances of viruses (1a, 1b, 2a, 2c, 2d, 2e);
    b. comparing, contrasting, and using the Internet to research documented instances of worms (1a, 1b, 2a, 2c, 2d, 2e);
    c. comparing, contrasting, and using the Internet to research documented instances of Trojans (1a, 1b, 2a, 2c, 2d, 2e);
    d. comparing, contrasting, and using the Internet to research documented instances of backdoors (1a, 1b, 2a, 2c, 2d, 2e);
    e. comparing, contrasting, and using the Internet to research documented instances of keystroke loggers (1a, 1b, 2a, 2c, 2d, 2e);
    f. comparing, contrasting, and using the Internet to research documented instances of spyware (1a, 1b, 2a, 2c, 2d, 2e);
    g. comparing, contrasting, and using the Internet to research documented instances of adware (1a, 1b, 2a, 2c, 2d, 2e);
    h. comparing, contrasting, and using the Internet to research documented instances of scareware (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of defensive techniques by
    a. installing a firewall such as iptables or pfSense, configuring firewall rules, testing the firewall rules with fabricated packets, and analyzing firewall logs (1a, 1b, 2a, 2c, 2d, 2e);
    b. installing an IDS such as Snort, configuring the detection rules, testing the intrusion detection system with fabricated packets, and analyzing the IDS logs (1a, 1b, 2a, 2c, 2d, 2e);
    c. configuring network packet capturing and analyzing collected packets for evidence of malware (1a, 1b, 2a, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITSY 1300

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify network security risks, security design, and monitoring solutions; identify sources of computer threats, evaluate potential practices, tools, and technologies to protect individual network systems; establish and sustain an operating system security plan utilizing systems and application security tools; implement procedures to secure and monitor audit logs and set system administrator alerts; and develop an organizational operating system security plan that provides for periodic reviews of security policies, procedures, authorized users list, and software update patches. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of operating system hardening and vulnerability testing by
    a. configuring the operating system to make it less vulnerable to attack (1a, 1b, 2a, 2c, 2d, 2e);
    b. establishing a security baseline (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to design and implement a plan to apply patches and upgrades (1a, 1b, 2a, 2c, 2d, 2e);
    d. using local and remote tools to test the operating system and its services for vulnerabilities (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the ability to design and implement a file/folder backup and restore methodology (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of network operating system security by
    a. configuring TCP/IP networking (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating the ability to capture and analyze network packets (1a, 1b, 2a, 2c, 2d, 2e);
    c. configuring a basic firewall using port and protocol filtering (1a, 1b, 2a, 2c, 2d, 2e);
    d. configuring web browser security (1a, 1b, 2a, 2c, 2d, 2e);
    e. explaining the role of the Public Key Infrastructure and certificates in network security (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of operating system authentication mechanisms by
    a. explaining the purpose and importance of authentication (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing local authentication mechanisms (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing remote authentication mechanisms (1a, 1b, 2a, 2c, 2d, 2e);
    d. demonstrating the ability to configure and monitor user accounts and password policies (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the ability to monitor and analyze authentication events (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of file systems and their confidentiality and access control mechanisms by
    a. explaining the main features and capabilities of a file system (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing file system support for encryption (1a, 1b, 2a, 2c, 2d, 2e);
    c. implementing file system encryption (1a, 1b, 2a, 2c, 2d, 2e);
    d. describing file system support for access control (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating the ability to implement, test, and monitor file system access control mechanisms (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of auditing and logging by
    a. demonstrating the ability to enable, configure, monitor, and manage auditing and logging (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating the ability to enumerate and perform tasks that will generate audit and log entries (1a, 1b, 2a, 2c, 2d, 2e);
    c. demonstrating the ability to view and analyze audit and log entries (1a, 1b, 2a, 2c, 2d, 2e);
    d. correlating audit and log entries with other system data such as network packet captures (1a, 1b, 2a, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITSY 1300 and ITSY 2400

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate system security skills through firewall implementation and testing; use system tools, practices, and relevant technologies to implement a security plan; evaluate practices, tools, and technologies to identify security breaches, sources of attacks, and protect mission critical systems; establish an appropriate level of security based on an analysis of security logs; and use relevant tools to secure a network, respond to, and follow up on various types of attacks. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the elements of security policies, standards, and practices by
    a. defining management's role in the development, maintenance, and enforcement of information security policy, standards, practices, procedures, and guidelines (1a, 1b, 2c, 2d, 2e);
    b. identifying the major components of an information security blueprint (1a, 1b, 2c, 2d, 2e);
    c. discuss how an organization institutionalizes polices, standards, and practices using education, training, and awareness programs (1a, 1b, 2c, 2d, 2e);
    d. explaining contingency planning (1a, 1b, 2c, 2d, 2e);
    e. describing the relationships between incident response planning, disaster recovery planning, business continuity planning, and contingency planning (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of types of security threats and responses to security attacks by
    a. identifying the threats to information and network security and the common attacks associated with those threats (1a, 1b, 2c, 2d, 2e);
    b. identifying the standard responses to security attacks (1a, 1b, 2c, 2d, 2e);
    c. differentiating between threats to information within systems to attacks against information within systems (1a, 1b, 2c, 2d, 2e);
    d. describing the technologies used to implement intrusion detection and prevention systems (1a, 1b, 2c, 2d, 2e);
    e. defining honey pots, honey nets, and padded cell systems (1a, 1b, 2c, 2d, 2e);
    f. describing the technologies used to create honey pots, honey nets, and padded cell systems (1a, 1b, 2c, 2d, 2e);
    g. evaluating practices, tools, and technologies to identify security breaches, sources of attacks, and protect mission critical systems (1a, 1b, 2c, 2d, 2e).
3. Demonstrate an understanding of elements of firewall design by
    a. explaining what a firewall does (1a, 1b, 2c, 2d, 2e);
    b. discussing the types of firewall protection (1a, 1b, 2c, 2d, 2e);
    c. enumerating the components of a firewall (1a, 1b, 2c, 2d, 2e);
    d. identifying the limitations and strengths of firewalls (1a, 1b, 2c, 2d, 2e);
    e. identifying common misconceptions about firewalls (1a, 1b, 2c, 2d, 2e);
    f. explaining why a firewall is dependent on an effective security policy (1a, 1b, 2c, 2d, 2e);
    g. evaluating suitable hardware and software for a residential firewall application (1a, 1b, 2c, 2d, 2e);
    h. evaluating suitable hardware and software for a commercial firewall application (1a, 1b, 2c, 2d, 2e).
4. Demonstrate an understanding of common system and network vulnerabilities by
    a. listing common categories of vulnerabilities (1a, 1b, 2a, 2c, 2d, 2e);
    b. analyzing security logs (1a, 1b, 2a, 2c, 2d, 2e);
    c. accessing sources of information about emerging vulnerabilities (1a, 1b, 2a, 2c, 2d, 2e);
    d. identifying the names and functions of widely available scanning and analysis tools (1a, 1b, 2a, 2c, 2d, 2e).
5. Employ current technology and tools to test and secure a network by
    a. performing basic vulnerability testing using system tools, practices, and relevant technologies (1a, 1b, 2a, 2c, 2d, 2e);
    b. implementing technology, tools, and strategies to secure a network (1a, 1b, 2a, 2c, 2d, 2e).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITSY 2342

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify computer investigation issues; identify legal issues associated with computer investigations; collect document evidence and evaluate evidence; and evaluate network traffic. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of magnetic, optical, and solid state storage devices by
    a. describing the purpose, contents, and physical device location of boot records, partition tables, and file systems;
    b. describing what happens when a device is partitioned;
    c. describing what happens when a device is formatted;
    d. describing what happens when a bootable device is booted;
    e. describing what happens when a file system is mounted;
    f. describing the changes that occur to a file system when a file or directory is created;
    g. describing the changes that occur to a file system when a file or directory is deleted.
2. Demonstrate a working knowledge of classical forensic imaging techniques by
    a. sterilizing and verifying a device that will be used to store a forensic image;
    b. creating a forensic image of a device or partition to an image file or set of image files on a sterilized device;
    c. cloning a storage device to a similar sterilized device;
    d. restoring image file of a bootable device to a sterilized device and booting the restored image;
    e. imaging a device that is accessible via a network;
    f. discussing the role of write blockers and hashing when imaging.
3. Demonstrate a working knowledge of file recovery techniques by
    a. using appropriate tools to recover deleted files that are recoverable;
    b. using appropriate tools to recover slack and unallocated space into a file for later analysis;
    c. demonstrating an understanding of file signatures for common file formats;
    d. using appropriate tools to carve files from slack space and unallocated space;
    e. using appropriate tools to identify known files using hash databases;
    f. identifying operating system metadata files and application files that are forensically important;
    g. identifying unknown files that are suspicious and require further investigation.
4. Demonstrate a working knowledge of file analysis techniques by
    a. using appropriate tools to search files for text, binary strings, and grep patterns;
    b. using appropriate tools and viewers to examine nontext, compressed, or encrypted files;
    c. using appropriate tools to examine relevant files for evidence of web browsing activity;
    d. using appropriate tools to examine relevant files for evidence of email activity;
    e. identifying and examining operating system metadata files for evidence of suspicious activity;
    f. using file system timestamps to create a timeline of suspicious file system activity;
    g. examining log files for evidence pertinent to an investigation;
    h. examining suspicious executable files statically for evidence of malware.
5. Demonstrate a basic knowledge of live forensics analysis by
    a. comparing imaging of live and dead systems;
    b. using appropriate tools to capture volatile data from a live system;
    c. using appropriate tools to analyze volatile data from a live system;
    d. describing the tools and techniques used to analyze malware in a live environment;
    e. capturing and analyzing live network data.
6. Understand the role and environment of the forensic investigator by
    a. explaining constitutional and statutory limits on a forensic investigation;
    b. discussing the importance of chain of custody documentation;
    c. describing the role of forensics within the broader scope of incident response;
    d. writing a professional report documenting the results of a forensic investigation;
    e. discussing certifications applicable to the field of computer forensics.

ITSY 2459 - Security Assessment and Auditing

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): ITSY 2341 and ITSY 2400

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Appraise security plan to ensure appropriate level of protection; assess network security design; audit network system based on security design; use relevant tools to assure security requirements; and review security policies and procedures on a regular basis. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the three types of security controls by
    a. describing and giving examples of preventive controls (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing and giving examples of detective controls (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing and giving examples of reactive controls (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate an understanding of how security controls are implemented by
    a. describing and giving examples of administrative controls (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing and giving examples of technical controls (1a, 1b, 2a, 2c, 2d, 2e);
    c. describing and giving examples of physical controls (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate an understanding of the stages of a formal IT audit by
    a. discussing and giving examples that occur in the planning stage (1a, 1b, 2a, 2c, 2d, 2e);
    b. discussing and giving examples that occur in the fieldwork and documentation stage (1a, 1b, 2a, 2c, 2d, 2e);
    c. discussing and giving examples that occur in the issue discovery and validation stage (1a, 1b, 2a, 2c, 2d, 2e);
    d. discussing and giving examples that occur in the solution development stage (1a, 1b, 2a, 2c, 2d, 2e);
    e. discussing and giving examples that occur in the report drafting and issuance stage (1a, 1b, 2a, 2c, 2d, 2e);
    f. discussing and giving examples that occur in the issue tracking stage (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate an understanding of the various areas of IT security that are subject to auditing by
    a. explaining the techniques used to audit a data center's disaster recovery plan (1b, 2a, 2c, 2d, 2e);
    b. explaining the techniques used to audit switch, router, and firewall configuration (1b, 2a, 2c, 2d, 2e);
    c. explaining the techniques used to audit Windows operating systems (1b, 2a, 2c, 2d, 2e);
    d. explaining the techniques used to audit Unix/Linux operating systems (1b, 2a, 2c, 2d, 2e);
    e. explaining the techniques used to audit web servers (1b, 2a, 2c, 2d, 2e);
    f. explaining the techniques used to audit databases (1b, 2a, 2c, 2d, 2e);
    g. explaining the techniques used to audit applications (1b, 2a, 2c, 2d, 2e);
    h. explaining the techniques used to audit wireless and mobile devices (1b, 2a, 2c, 2d, 2e).
5. Demonstrate a basic knowledge of regulations and standards that may affect the auditing function by
    a. discussing the elements of the Sarbanes-Oxley Act (1b, 2a, 2c, 2d, 2e);
    b. discussing the elements of the Health Insurance Portability and Accountability Act (HIPPA) (1b, 2a, 2c, 2d, 2e);
    c. discussing the elements of Payment Card Industry (PCI) standard (1b, 2a, 2c, 2d, 2e);
    d. discussing the elements of the Control Objectives for Information and related Technology (COBIT) auditing framework (1b, 2a, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate an understanding of the library and information sciences profession by establishing a learning plan; demonstrate an understanding of the library catalog and classification system; perform the functions of an interlibrary loan transaction, charging, and discharging library materials, and troubleshooting equipment; demonstrate a knowledge of ethics, law, and regulations governing libraries.

1. Collaborate with a supervising librarian to establish a learning plan with goals and objectives (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Participate in a variety of activities and situations that are comparable to a paraprofessional position within a library or information agency (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Explain how materials are catalogued, classified, shelved, located, and processed in a library (1a, 1b, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate transactions performed in libraries by creating an interlibrary loan transaction (1c, 2a, 2b, 2c, 2d, 2e).
5. Illustrate the charging and discharging of library materials (2a, 2b, 2c, 2d, 2e).
6. Demonstrate troubleshooting equipment (1c, 2a, 2b, 2c, 2d, 2e).
7. Identify basic concepts of ethics, law, and regulations governing libraries and librarians, including the Library Bill of Rights, Code of Ethics, The Freedom of Information Act, copyright, and privacy issues (1a, 1b, 1c, 2a, 2c, 2d, 2e).
8. Analyze the use of changing technology and library resources (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate an understanding of the library and information sciences profession and job functions; identify major categories of reference materials; demonstrate a knowledge of how materials are cataloged and classified in a library; understand basic concepts of ethics, law, and regulations governing libraries, librarians, and transactions in libraries.

1. Describe the importance of libraries by identifying major events in library history and major types of libraries (1a, 2a, 2c).
2. Explain the roles and relationships between library functions, i.e. circulation, reference, collection development, and cataloging (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Describe job functions of select library personnel (1a, 1c, 2a, 2c).
4. Compare a database search and an internet search in selecting books for a collection and changing technology (1a, 1b, 2a, 2c, 2d, 2e).
5. Identify major categories of reference materials, i.e. almanacs, yearbooks, indexes, handbooks, and encyclopedias (1a, 1b, 2a, 2c).
6. Explain how materials are cataloged and classified in a library system (1a, 1b, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate an understanding of transactions performed in libraries, such as developing a bibliography or explaining a title page (1a, 1b, 2a, 2b, 2c, 2d, 2e).
8. Outline the basic concepts of ethics, law, and regulations governing libraries and librarians including the Library Bill of Rights, Code of Ethics, The Freedom of Information Act, copyright, and privacy issues (1a, 1b, 2a, 2c, 2d, 2e).

Required Corequisite(s): LGLA 1307

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Locate primary and secondary legal authorities; apply effective research strategies using available research tools; and analyze the ethical considerations of the paralegal's role relating to legal research.

1. Demonstrate an understanding of primary legal resources by
    a. examining all primary sources of law including case law, statutory law, and administrative law (1a, 1b, 2a);
    b. explaining the role of case law, statutory law, and constitutional law in legal research (1b, 2a, 2c);
    c. using all state and federal case reporters, including the Supreme Court Reporter, Federal Reporter (all series), Federal Supplement (all series), and Southwestern Reporter - Texas Cases (all series) (1a, 1b, 2a);
    d. determining the issues and rules of law in various cases (1a, 1b);
    e. explaining the purpose and function of pocket parts and advance sheets (1b, 2c);
    f. interpreting statutory law including the U.S. Code and the Texas Statutes and Codes and the U.S. and Texas Constitutions (1b, 2c);
    g. interpreting rules and regulations using all State and Federal sources in Administrative Law (1b, 2c);
    h. explaining the elements of legislative history and its use in statutory interpretation (1b, 2a, 2c).
2. Demonstrate an understanding of legal finding tools and their use in locating primary law by
    a. using the Supreme Court Digest and the Texas Digest to locate case law (1b, 2c);
    b. explaining the function of the West key number system in digests and reporters (1b, 2c);
    c. demonstrating skill in the use of Shepard's Citations in updating case law and statutory materials both state and federal (1b, 2c).
3. Demonstrate an understanding of secondary legal resources by
    a. locating information using legal dictionaries and legal directories (1a, 1b);
    b. demonstrating the use of American Law Reports in legal research (1b, 2c);
    c. employing legal encyclopedias, both state and federal, in the search for legal information (1b, 2c);
    d. analyzing current issues by the use of legal periodicals and their indexes (1b, 2c);
    e. interpreting model codes and uniform laws and their applicability (1b, 2c);
    f. applying information gleaned from the Texas Litigation Guide in the search for legal information (1b, 2c);
4. Demonstrate an understanding of legal research techniques including computer assisted research techniques by
    a. using proper citation form in preparing written work (1a, 1b);
    b. using legal vocabulary appropriately in the preparation and presentation of legal projects (1a, 1b, 2c);
    c. applying proper format in the preparation of case briefs and legal memoranda (1b, 2c);
    d. interpreting complex legal issues in the preparation of case briefs or legal memoranda (1b, 2a, 2c);
    e. applying Boolean logic and natural language searching techniques in conducting computer assisted legal research (1b, 2c, 2e);
    f. locating current legal materials, both primary and secondary, using provided access to computerized legal databases (1b, 2a, 2c, 2e);
    g. producing legal research results using traditional research techniques and computer assisted techniques to validate results (1b, 2a, 2c, 2e).

Course Learning Outcomes
End-of-Course Outcomes: Draft legal documents including case and fact analysis, citation formats, and legal writing styles; and analyzing the ethical considerations of the paralegal's role relating to legal writing.

1. Demonstrate an understanding of the legal system and the role of court opinions by
    a. explaining the role of case law in legal writing (1b, 2a, 2c);
    b. differentiating the role of primary and secondary authority (1a, 1b);
    c. identifying the facts key to the court's holding (1b, 2c);
    d. identifying the issues key to the court's holding (1b, 2c);
    e. identifying the law key to the court's holding (1b, 2c);
    f. discussing the role of judicial politics in case law (1b, 2c).
2. Demonstrate an understanding of the use of proper citation in preparing written work by
    a. locating and citing state court opinions (1b, 2a, 2c);
    b. locating and citing federal court opinions (1b, 2a, 2c);
    c. analyzing and discussing components of court cases (1b, 2c);
    d. analyzing the differences and similarities of judicial systems (1b, 2c).
3. Demonstrate an understanding of the briefing process by
    a. using proper format in preparing case briefs (1b, 2c);
    b. determining the proper components of a comprehensive brief (1b, 2c);
    c. determining the proper components of a thumbnail brief (1b, 2c);
    d. identifying the parties to a court opinion (1b, 2c);
    e. identifying the parties' objectives in a court opinion (1b, 2c);
    f. identifying the parties' theories in a court opinion (1b, 2c);
    g. identifying the history of a court opinion (1b, 2c);
    h. identifying the key facts of a court opinion (1b, 2c);
    i. identifying the issues and holdings of a court opinion (1b, 2c);
    j. identifying the court's reasoning in a court opinion (1b, 2c).
4. Demonstrate an understanding of the application of court opinions by
    a. differentiating the application of fact similarities, fact differences, and fact gaps (1a, 1b);
    b. identifying the 10 major rules of law applied in court opinions (1b, 2a);
    c. differentiating the rules of law applicable to a court opinion (1a, 1b);
    d. determining the length and comprehensiveness of case analysis (1b, 2c);
    e. identifying the proper use of primary and secondary authority in legal writing (1b);
    f. interpreting complex legal issues in preparation of legal memoranda (1b, 2a, 2c);
    g. using proper format in preparing legal memoranda (1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use legal terminology; explain fundamental legal concepts categorizing substantive areas of law and the federal and state judicial systems; and identify the ethical obligations of the legal professional in various practice areas with particular emphasis on the paralegal's role in the legal profession.

1. Demonstrate an understanding of the development of the law and the American Legal System and how to locate applicable legal materials by
    a. analyzing adopted principles of the common law tradition (1a, 1b);
    b. identifying the characteristics of procedural law (1a);
    c. identifying the characteristics of substantive law (1a);
    d. distinguishing between civil and criminal law and issues of each (1b);
    e. interpreting the roles of the branches of government and the separation of powers (1b, 2c);
    f. examining the effect of federalism on the judiciary (1b, 2c);
    g. identifying the legal terminology related to the American Legal system (1a);
    h. identifying the various types of legal research finding tools (1b, 2a, 2c);
    i. differentiating secondary authority and primary authority (2c).

2. Demonstrate an understanding of the judicial system and process, the role of the courts, judges, attorneys, paralegals, and the stages of the judicial process by
    a. examining the role of the court in disputes (1a, 1b);
    b. determining the role of the judge (1b, 2c);
    c. analyzing the steps required to comply with procedural due process (1b, 2c);
    d. defining the role of the court, prosecutor, and defense lawyers in the criminal justice system (1b, 2c);
    e. examining the stages of criminal and civil trials in both state and federal courts (1b, 2c);
    f. examining the stages of the Federal and Texas State Appellate process (1b, 2c);
    g. comparing jurisdiction, personnel, judges, and roles of the various Federal Courts and Texas State Courts (1b, 2c).

3. Demonstrate an understanding of the criminal justice system; the major areas of substantive civil law, including torts, contracts, real property, and wills and intestate succession; and methods of alternative dispute resolution by
    a. distinguishing between misdemeanors and felonies (1b);
    b. classifying different crimes (1b);
    c. categorizing the elements of various intentional torts, negligence, and strict liability torts (1a, 1b);
    d. explaining the elements of a contract, including quasi-contractual theory, contracts implied in fact, promissory estoppel, the parole evidence rule, and the statute of frauds (1a, 1b);
    e. describing the theories of tort and contract damages (1a, 1b);
    f. categorizing the types and elements of freehold estates, leasehold estates, and non-estates including easements, licenses, profits, and restrictive covenants (1a, 1b);
    g. categorizing the types of deeds (1a, 1b);
    h. explaining the law regarding mortgages and liens, eminent domain and condemnation, and adverse possession (1a);
    i. explaining the rules regarding equitable ownership, including trusts and equitable conversion (1a);
    j. analyzing the law regarding Texas intestate succession, wills, legacies, and devises (1a, 1b, 2c);
    k. categorizing the types and methods of alternative dispute resolution and their usage (1a, 1b).

4. Demonstrate an understanding of the ethical obligations of legal professionals in various practice areas by
    a. identifying the ethical rules governing the conduct of lawyers (1a, 1c);
    b. interpreting the ethical rules which govern the unauthorized practice and use of paralegals (1b, 1c);
    c. interpreting the rules governing pro bono, competence, impropriety, confidentiality, advertising, and solicitation of business (1b, 1c, 2c);
    d. interpreting the rules governing zealous representation within the bounds of the law (1a, 1c);
    e. explaining the paralegal's role in the legal system and the ethical constraints regarding the actions of paralegals (1a, 1b, 1c, 2d).

5. Demonstrate the ability to take oral instruction without visual aid and to produce accurate results utilizing information gleaned through oral instruction and research by
    a. producing appropriate responses to information requests received solely via oral instruction (1a, 1b, 2c);
    b. formulating insightful questions regarding the subject matter covered by all above listed substantive subjects (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use terminology relating to civil litigation; analyze sources relating to civil litigation and applicable court rules; draft documents used in civil litigation; analyze the ethical considerations of the paralegal in relating to civil litigation.

1. Demonstrate an understanding of the civil court process and the paralegal's role in litigation support by
    a. defining the term civil litigation (1a);
    b. explaining the structure of the Federal and State court systems (1a, 1b);
    c. differentiating the jurisdiction of State and Federal courts (1a, 1b);
    d. analyzing the difference between in personam and in rem jurisdiction (1b, 2c);
    e. determining the proper court for different types of litigation (1b, 2c);
    f. distinguishing different systems of file organization and identifying the paralegal's role in creating and maintaining appropriate filing and reminder systems during the litigation process (1a, 1b, 2a).

2. Demonstrate an understanding of the initial litigation process and procedures by
    a. examining pleading forms for initiating different types of State and Federal civil actions, including requests for damages and/or injunctive relief (1a, 1b);
    b. examining the different methods of service of process in the State and Federal systems (1a, 1b);
    c. preparing plaintiff's initial pleadings in a State or Federal civil case utilizing proper formatting appropriate for filing with a court (1b, 2c);
    d. developing defensive pleadings, including answers and/or counterclaims and cross claims, utilizing proper formatting appropriate for filing with a court (1b, 2c);
    e. examining pretrial motion practice and attacks on plaintiff's pleadings (1b, 2c);
    f. differentiating between actions for interpleader and impleader (1b);
    g. evaluating different types of prayers for relief (1b, 2c).

3. Demonstrate an understanding of the pretrial discovery process by
    a. explaining the different forms of discovery and the purpose of each (1b, 2c);
    b. producing discovery documents, including interrogatories, disclosures, requests for production, and requests for admissions using proper format (1b, 2c);
    c. producing discovery responses to the many different forms of discovery using proper format (1b, 2c);
    d. differentiating between the different forms of depositions, when they are used, and the forms used to initiate depositions (1b, 2c);
    e. examining the techniques for resisting discovery (1a, 1b);
    f. examining the rules regarding preservation of evidence (1a, 1b).

4. Demonstrate an understanding of the trial and post-trial process by
    a. examining the stages of jury trials and nonjury trials (1a, 1b);
    b. examining the use of expert witnesses and the orderly presentation of evidence during a trial (1b, 2c);
    c. examining the use of technology in the presentation of courtroom evidence through the use of multimedia and computer generated imaging (1b, 2e);
    d. explaining the steps for enforcement and collection of judgments (1b, 2c);

e. explaining the steps of the appeals process (1a, 1b, 2c).

5. Demonstrate an understanding of the use of form books, both traditional and electronic, in the preparation of all forms of legal documents by

   a. locating and preparing State and Federal pleading and practice forms using traditional research methods (1a, 1b, 2a);

   b. preparing State and Federal pleadings using ProDoc electronic forms (1b, 2c, 2e);

   c. distinguishing between boilerplate forms, whether traditional or electronic, and individualized pleadings (1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use terminology relating to wills, trusts, and probate administration; analyze sources relating to wills, trusts, and probate administration; draft documents commonly used in wills, trusts, and probate administration; and analyze the ethical considerations of the paralegal's role in wills, trusts, and probate administration.

1. Demonstrate an understanding of probate law and the estate planning process by

   a. defining the terms common to probate law;

   b. describing the origins of probate law;

   c. discussing the significance of the Texas Probate Code;

   d. determining proper venue as to estates of decedents;

   e. describing the general requirements of citation and/or notice;

   f. describing the methods of citation and/or notice;

   g. determining who inherits from a person who died intestate;

   h. classifying types of property ownership;

   i. differentiating between separate and community property;

   j. differentiating between per capita and per stirpes distribution;

   k. distinguishing between the degree of relationship by consanguinity and by affinity;

   l. identifying and assessing appropriate cases for use of an affidavit of heirship;

   m. identifying purposes and goals of estate planning;

   n. identifying the more common estate planning techniques;

   o. identifying common ethical problems in estate planning;

   p. applying the purposes and goals of estate planning to client situations;

   q. identifying the paralegal's role in estate planning;

   r. describing the common post mortem estate planning procedures.

2. Demonstrate an understanding of drafting, execution, and revocation of wills by

   a. listing the statutory requirements relating to the validity of a will;

   b. distinguishing between formal wills, holographic wills, and nuncupative wills;

   c. determining the competency of a witness to a will;

   d. defining self-proving affidavit;

   e. explaining how a will is revoked;

   f. listing and explaining the grounds of a will contest;

   g. describing the process by which wills are amended;

   h. identifying the nature and effect of standard will clauses;

   i. preparing basic estate planning documents, including wills;

   j. examining additional estate planning documents;

   k. discussing the benefits and drawbacks of durable powers of attorney;

   l. analyzing the requirements of a directive to physicians and a durable power of attorney for healthcare;

m. analyzing a designation of guardian and describing the benefits;

n. explaining the use of various marital agreements in connection with estate planning.

3. Demonstrate an understanding of the formation of different trusts by

a. describing the significance of the Texas Trust Code;

b. identifying the statutory and common law prerequisites to the creation of a valid trust;

c. listing the purposes and goals in creating trusts;

d. distinguishing between the various classifications of trusts;

e. identifying the required parties of trusts;

f. identifying the marital deduction and the exemption equivalent deduction in estate tax avoidance;

g. identifying the requirements of a will incorporating a contingent residuary trust for minor children;

h. distinguishing between a bypass trust and a QTIP trust;

i. describing the paralegal's role in gathering information necessary to prepare wills through client interviews and by requesting information from other sources;

j. describing the purpose and benefits of grantor living trusts;

k. describing the requirements necessary to create a living trust;

l. identifying the benefits of insurance trusts and grantor retained interests trusts;

m. identifying the benefits of children's or grandchildren's trusts;

n. identifying the benefits of charitable remainder trusts;

o. identifying the benefits of educational trusts.

4. Demonstrate an understanding of probate administration by

a. distinguishing between independent administration and dependent administration;

b. identifying the various applications filed to initiate independent administration;

c. identifying the steps required to begin independent administration;

d. identifying all relevant documents needed at the independent administration hearing;

e. identifying the information needed to prepare an inventory, appraisement, and listing of claims;

f. summarizing the steps necessary to close an estate;

g. identifying the various pleadings in filing a dependent administration;

h. identifying the steps required to begin dependent administration;

i. identifying all relevant documents needed at the dependent administration hearing;

j. summarizing the steps necessary to close a dependent administration;

k. distinguishing between the procedures for independent and dependent administrations with the alternative probate procedures;

l. determining when probate as a muniment of title is applicable to a client's fact situation;

m. listing the documents relevant to a determination of heirship;

n. determining when an estate may be settled by use of a small estate affidavit;

o. identifying postmortem elections and decisions applicable to estates;

p. identifying the steps necessary to effectuate the transfer of assets commonly owned by estates;

q. identifying documents relevant to the transfer of estate assets.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use terminology relating to family law; analyze sources relating to family law; draft documents used in family law; and analyze the ethical considerations of the paralegal in family law.

1. Demonstrate an understanding of the family law process by

a. describing the licensure requirements;

b. identifying the differences in a formal and an informal marriage;

c. identifying the differences in valid, void, voidable, and putative marriage;

d. identifying a meretricious relationship;

e. explaining the effect of prohibited degrees of consanguinity;

f. examining the effect of marriage on adult status;

g. analyzing recoveries of attorney's fees.

2. Demonstrate an understanding of the marriage dissolution process by

a. identifying appropriate cases for petition to declare marriage void, petitions for annulment, and petitions for divorce;

b. assessing appropriate cases for petition to declare marriage void, petitions for annulment, and petitions for divorce;

c. preparing pleading forms for initiating different types of actions utilizing proper formatting appropriate for filing with a court;

d. examining the requirements for service of process;

e. analyzing a petition for divorce and determining the proper response.

3. Demonstrate an understanding of property issues at the time of divorce by

a. identifying separate property;

b. identifying community property;

c. identifying commingled property including the issues associated with tracing property;

d. describing the options for property division at the time of divorce;

e. examining property agreements relating to marriage;

f. examining agreements incident to divorce;

g. examining division of debts upon divorce.

4. Demonstrate an understanding of issues related to children by

a. describing the best interest of the child standard;

b. identifying custodial concerns of the court in suits affecting the parent/child relationship;

c. differentiating among sole managing conservator, joint managing conservator, and possessory conservator;

d. analyzing the procedural requirements for termination of the parent/child relationship;

e. describing the procedural requirements for adoption;

f. analyzing guidelines concerning child support;

g. analyzing procedural steps in paternity suits.

5. Demonstrate an understanding of the issues related to enforcing court orders by
    a. explaining enforcement of custody orders;
    b. explaining enforcement of property division orders;
    c. explaining enforcement of child support orders;
    d. explaining enforcement of conduct related orders;
    e. explaining enforcement of visitation orders;
    f. explaining criminal sanctions for violations of court orders.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

1. Demonstrate the ability to conduct and track a job search from preparation of a resume to accepting a job offer and to manage all of the required functions of the cooperative education evaluation process by
    a. creating an effective resume and cover letter;
    b. arranging appointment for a job interview;
    c. preparing for a job interview;
    d. demonstrating sufficient skills in a job interview to be successful in the interview and receive an offer of employment;
    e. arranging for one or more office visits and evaluations by the course instructor and work station supervisor.
2. Display a professional demeanor, enthusiasm, and dependability in the performance of assigned tasks by
    a. demonstrating the ability to prioritize assignments, appropriately utilize law office policy, and complete assigned tasks accurately within a reasonable time;
    b. working with the work station filing system through opening new files, organizing active files, and/or closing files pursuant to the directions of the supervisor and subject to the needs of the work station;
    c. using the work station tickler system, including but not limited to accessing deadlines and/or adding new deadlines as directed by the supervisor and subject to the needs of the work station;
    d. demonstrating the ability to work cooperatively with other employees of the work station and responding appropriately to the direction of the supervisor, including demonstrating an understanding of the team approach to law office management and the paralegal's role within the system;
    e. acting appropriately in attendance at and participation in depositions, hearings, trials, or mediations as assigned by work station supervisor and pursuant to the availability of such experiences within the work station.
3. Demonstrate the ability to perform all assigned tasks of a paralegal with skill and knowledge and to communicate effectively orally and in writing by
    a. filing appropriate legal documents at the courthouse as directed by the work station supervisor, pursuant to the needs of the work station;
    b. utilizing word processing software and other computer software utilized by the work station to create drafts of assigned initial pleadings, motions, orders, correspondence, and transmittal letters as directed by the work station supervisor and pursuant to the specific needs of the work station;
    c. assembling pertinent case information including organizing files, preparing deposition summaries, organizing and cataloguing discovery responses, and preparing trial notebooks at the direction of the work station supervisor and pursuant to the specific needs of the workstation;
    d. demonstrating the ability to explain job skills and duties required during the work, following the program of duties designed by the student and the work station, and demonstrating improvement in performance in all facets of paralegal duties during the course of the work.

Course Learning Outcomes
End-of-Course Outcomes: Use terminology relating to tort and personal injury law; analyze sources relating to tort and personal injury law; draft documents used in tort and personal injury law; and analyze the ethical considerations of the paralegal's role in tort and personal injury law.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the law of torts by
   a. defining the terms tort and tortfeasor (1a);
   b. demonstrating the ability to locate, describe, and analyze sources of tort law (1a, 1b, 2c);
   c. distinguishing among negligence, intentional torts, and strict liability torts (1b);
   d. tracing the history of tort law (1a, 1b, 2c);
   e. describing the public policy objectives of tort law (1a, 1b, 2c);
   f. solving tort problems through identifying issues, rules of law, and conclusions in a given fact situation (1a, 1b, 2c);
   g. listing the basic steps in a civil case (1a, 1b);
   h. contrasting methods of alternative dispute resolution from litigation (1b, 2c);
   i. describing the role and ethical considerations of the paralegal in tort law (1a, 1b);
   j. displaying ability to draft documents used in tort law (1b, 2c, 2e).

2. Demonstrate an understanding of the issues related to negligence in tort law by
   a. defining the term negligence (1a);
   b. listing the elements of negligence (1a, 1b);
   c. describing the scope of duty and the standard of reasonable care in negligence actions (1a, 1b, 2c);
   d. describing the scope of foreseeability in negligence actions (1a, 1b, 2c);
   e. describing the scope of causation in negligence actions (1a, 1b, 2c);
   f. distinguishing between joint and several liability, contribution, and indemnity (1a, 1b, 2c);
   g. describing the scope of damages in negligence actions (1a, 1b);
   h. distinguishing among compensatory damages, hedonic damages, general damages, special damages, economic and noneconomic damages, nominal damages, and punitive damages (1a, 1b, 2c);
   i. defining the term vicarious liability (1a);
   j. describing the scope of respondent superior (1a, 1b);
   k. summarizing the duties property owners or occupiers of land owe to others on their land (1a, 1b, 2c);
   l. distinguishing among invitees, licensees, and trespassers (1b, 2c);
   m. listing the elements of negligent infliction of emotional distress (1a, 1b);
   n. describing the scope of negligence per se (1a, 1b);
   o. explaining defenses to negligence actions (1b, 2c);
   p. distinguishing among contributory negligence, comparative negligence, and assumption of risk (1b, 2c);
   q. identifying specific statutes of limitations to negligence actions (1b, 2c).

3. Demonstrate an understanding of the issues related to intentional acts in tort law by
   a. defining the term intentional tort (1a);
   b. explaining the concept of assault and battery (1b, 2c);
   c. explaining the concept of patient dumping (1b, 2c);
   d. explaining the concept of false imprisonment (1b, 2c);
   e. explaining the concept of sexual harassment (1b, 2c);
   f. explaining the concept of spoliation of evidence (1b, 2c);
   g. defining the term infliction of emotional distress (1a);
   h. explaining the legal concepts of fraud and misrepresentation (1b, 2c);
   i. explaining the legal concepts of malicious prosecution and abuse of process (1b);
   j. explaining the concept of invasion of privacy (1b, 2c);
   k. explaining the concept of defamation (1b, 2c);
   l. listing the elements of defamation (1a, 1b);
   m. explaining the tort of trespass to land (1b);
   n. listing the elements of trespass to land (1a, 1b);
   o. explaining toxic tort actions (1b);
   p. explaining the tort of trespass to chattel (1b);
   q. explaining the tort of conversion (1b);
   r. distinguishing among the torts of slander of title, commercial disparagement, and defamation by computer (1b);
   s. explaining defenses to intentional torts (1b);
   t. distinguishing between consent and self-defenses (1b, 2c);
   u. distinguishing between defenses of persons and defenses of property (1b, 2c);
   v. explaining the defenses of rightful possession (1a, 1b);
   w. distinguishing among the defenses of mistake, privilege, and necessity (1b);
   x. explaining the defenses of public immunity (1b);
   y. identifying the specific statutes of limitations to intentional torts (1b, 2c).

4. Demonstrate an understanding of the issues related to strict liability and product liability in tort law by
   a. identifying the tort actions of strict liability (1b, 2c);
   b. describing animal owners' liability (1a, 1b);
   c. distinguishing between liability for wild animals and liability for domesticated animals (1b, 2c);
   d. explaining tort liability for engaging in abnormally dangerous activities (1b);
   e. distinguishing between mass torts and class actions (1b, 2c);
   f. identifying the tort of products liability (1b, 2c);
   g. discussing the historical development of product liability (1b);
   h. identifying the claims of parties involved in product liability actions (1b, 2c);
   i. listing the elements of product liability actions (1a, 1b);
   j. explaining the defenses of product liability actions (1b);
   k. explaining the tort of bad faith (1b).

5. Demonstrate an understanding of the issues related to special tort actions, tort immunities, and tort investigation by
   a. distinguishing between private and public nuisances (1b);
   b. listing the remedies for nuisances (1a, 1b);
   c. describing the legal remedies of survival statutes and wrongful death statutes (1a, 1b);
   d. describing the tort of wrongful death (1a, 1b);
   e. explaining the immunities to tort actions (1b);
   f. distinguishing among sovereign immunity, immunity for public officers, family immunity, and workers' compensation immunity (1b, 2c);
   g. explaining the importance of tort case investigation (1b);
   h. describing witness interviewing techniques (1a, 1b);
   i. determining methods for locating defendants and witnesses (1a, 1b);
   j. explaining the need for documenting the scene of a tort injury (1b);
   k. examining the public and private sector resources of information (1a, 1b);
   l. distinguishing between investigating different types of tort action (1b, 2c).

LGLA 2311 - Business Organizations

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use terminology relating to business organizations; analyze sources of law relating to business organizations; draft documents required for the formation, operation, and termination of business entities; and ethical considerations of the paralegal relating to business entities.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. Demonstrate an understanding of the different business organizations by
    a. distinguishing between the three major types of business enterprises: sole proprietorships, partnerships, and corporations (1a, 1b, 2c);
    b. describing the rights, duties, and powers among partners (1a, 1b, 2c);
    c. explaining how general principles of agency law relate to partnerships and affect partners' liability and authority (1b, 2c);
    d. identifying events that result in the dissolution of a general partnership (1b, 2c);
    e. identifying events that result in the dissolution of a limited partnership (1b, 2c);
    f. describing the distribution of assets on dissolution of a general partnership (1b, 2c);
    g. describing the distribution of assets on dissolution of a limited partnership (1b, 2c);
    h. distinguishing between the formation of a limited partnership and the formation of a general partnership and the documents to form each (1b, 2c);
    i. identifying the rights and liabilities of a limited partner (1a, 1b, 2c);
    j. identifying characteristics of corporations (1a, 1b, 2c);
    k. explaining the steps involved in forming a corporation, including the documents to be prepared (1a, 1b, 2c, 2e);
    l. describing factors that cause courts to pierce the corporate veil (1a, 1b, 2c);
    m. summarizing the rights and duties of directors, officers, and managers (1a, 1b, 2c);
    n. describing the rights of shareholders (1a, 1b, 2c);
    o. distinguishing between mergers and consolidations (1b, 2c);
    p. explaining the effects of a corporation's purchase of all or substantially all of another corporation's assets, or the voting shares of another corporation's stock (1b, 2c);
    q. explaining the phases of termination of a corporation and the documents for termination (1a, 2c);
    r. evaluating the role and ethical considerations of the paralegal relating to the formation, operation, and termination of business entities (1a, 1b, 1c, 2a, 2c);
    s. displaying ability to research sources of law relating to business organizations (1a, 1b, 2c, 2e);
    t. using terminology relating to business organizations (1a, 1b);
    u. explaining the differences between stocks and bonds (1a, 2c);
    v. describing the provisions of the Securities Act of 1933, including the definition of a security, registration requirements, and exempt offerings and securities (1a, 2c);
    w. describing the provisions of the Securities Exchange Act of 1934, especially regulation of insider trading under Section 10(b), Rule 10b-S, and Section 16(b) (1a, 1c);
    x. explaining the features of state securities laws (1a, 2c).
2. Demonstrate an understanding of government regulation of business by
    a. describing the efforts of the Federal Trade Commission (FTC) against unfair and deceptive advertising and bait and switch advertising (1a, 1b, 2c);
    b. explaining regulation of credit in consumer transactions, including requirements under the Truth in Lending Act and other federal legislation (1a, 1b, 2c);
    c. explaining state regulation of consumer transactions, including regulation under the Texas Deceptive Trade Practices Act (1a, 1b, 2c).
3. Demonstrate an understanding of sales and lease contracts by
    a. describing the scope of UCC Article 2 including the definitions of sale, goods, and merchant (1a, 1b, 2c);
    b. describing the formation of a contract for a sale of goods, including the elements of offer, acceptance, and consideration (1a, 1b, 2c);
    c. explaining when a sales contract is enforceable despite the absence of a writing (1a, 2c);
    d. identifying when title to goods passes from seller to buyer and who risks a financial loss if goods are damaged, destroyed, or lost (1a, 2c);
    e. defining various contract terms that help to determine when the risk of loss passes from seller to buyer under the UCC (1a, 1b, 2c);
    f. explaining the seller's obligation under a contract within the UCC to tender delivery of conforming goods and the buyer's obligation to accept and pay for goods according to the contract (1a, 1b, 2c);
    g. describing the options available in cases of anticipatory repudiation of a sales contract within the UCC (1a, 2c);
    h. describing the remedies available to a buyer and to a seller when the other party is in breach under the UCC;
    i. defining express warranties, implied warranties of merchantability, fitness for a particular purpose, and implied warranties arising from a course of dealing or usage of trade (1a, 2c);
    j. distinguishing between negligence as the basis of liability in a product liability suit and the imposition of strict liability in a product liability context (1b, 2c).
4. Demonstrate an understanding of creditors' rights and bankruptcy law by
    a. defining security interest, secured party, debtor, security agreement, collateral, and other terms used in secured transactions (1a, 2c);
    b. stating what is necessary to create an enforceable security interest (1a, 1b, 2c);
    c. describing perfection and how it is accomplished by filing, by possession, and automatically (1a, 1b, 2c);
    d. explaining how a security agreement covers proceeds from the sale of collateral, after acquired property, and future advances (1a, 2c);
    e. describing how security agreements are enforced: how a creditor repossesses and disposes of collateral (1a, 1b, 2c);
    f. distinguishing between statutory and common law liens, including a mechanic's lien, an artisan's lien, and judicial liens (1a, 1b, 2c);
    g. describing what property is exempt from levy of execution or attachment (1a, 2c);
    h. describing suretyship and guaranty, including their differences and the similarities (1b, 2c);
    i. describing a Chapter 7 liquidation, that is, an ordinary or straight bankruptcy (1a, 2b);
    j. explaining what property constitutes a debtor's estate and what property is exempt (1a, 2c);
    k. distinguishing between Chapter 7, Chapter 11 proceedings, and Chapter 13 plans (1a, 1b, 2c).
5. Demonstrate an understanding of property laws by
    a. explaining ways in which real and personal property can be acquired (1a, 2c);
    b. identifying who has rights to property that has been mislaid, property that has been lost, and property that has been abandoned (1a, 1b, 2c);
    c. describing the three types of ordinary bailments and the rights and duties of a bailee under each type (1a, 2c);
    d. explaining when a bailee's negligence is presumed (1a, 2c);
    e. describing special features of specific bailments, including those involving warehouse companies, common carriers, and innkeepers (1a, 2c);
    f. distinguishing among different possessory and non-possessory interests in real property (1a, 2c);
    g. describing the transfer of ownership by sale, adverse possession, and eminent domain (1a, 2c);
    h. describing landlords' and tenants' liability for injuries occurring on leased property, including those caused by defects on the premises and those caused by crimes of third persons (1a, 2c);
    i. stating what happens when a landlord or tenant transfers his or her rights to leased property during the term of the lease (1a, 1b, 2c);
    j. explaining insurance concepts and terminology, including how insurance is classified and what an insurable interest is (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Display a professional demeanor, enthusiasm, and dependability in the performance of assigned tasks by
    a. demonstrating the ability to prioritize assignments, appropriately utilize law office policy, and complete assigned tasks accurately within a reasonable time (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. working with the work station filing system through opening new files, organizing active files, and/or closing files pursuant to the directions of the supervisor and subject to the needs of the work station (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. using the work station tickler system, including but not limited to accessing deadlines and/or adding new deadlines as directed by the supervisor and subject to the needs of the work station (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. demonstrating the ability to work cooperatively with other employees of the work station and respond appropriately to the direction of the supervisor, including demonstrating an understanding of the team approach to law office management and the paralegal's role within the system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. acting appropriately in attendance at and participation in depositions, hearings, trials, or mediations as assigned by work station supervisor and pursuant to the availability of such experiences within the work station (1a, 1c, 2a, 2b, 2c).
2. Demonstrate the ability to perform all assigned tasks of a paralegal with skill and knowledge and to communicate effectively orally and in writing by
    a. filing appropriate legal documents at the courthouse as directed by the work station supervisor, pursuant to the needs of the work station (1a, 1b, 1c, 2a, 2b, 2d);
    b. utilizing word processing software and other computer software utilized by the work station to create drafts of assigned initial pleadings, motions, orders, correspondence, and transmittal letters as directed by the work station supervisor and pursuant to the specific needs of the workstation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. assembling pertinent case information, including organizing files, preparing deposition summaries, organizing and cataloguing discovery responses, and preparing trial notebooks at the direction of the work station supervisor and pursuant to the specific needs of the work station (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. demonstrating the ability to explain job skills and duties required during the work, follow the program of duties designed by the student and the work station, and demonstrate improvement in performance in all facets of paralegal duties during the course of the work (1a, 1b, 1c, 2a, 2b, 2c).
3. Carry out all of the required functions of the internship evaluation process by
    a. arranging for one or more office visits and evaluations by the course instructor and work station supervisor (1a, 1c, 2a, 2b);
    b. demonstrating the ability to maintain regular and appropriate contact with course instructor and prepare required documents in conjunction with work station supervisor as required by course instructor (1a, 1b, 1c, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the terms and how they relate to the overall concept of logistics; explain the legal aspects and regulatory agencies as they relate to logistics management; and demonstrate ability to apply decision making techniques based on time, materials, and space.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of logistics by
    a. identifying terms and definitions used in logistics and supply chain management (1a, 1b, 2c);
    b. explaining the importance of logistics activities to performance of organizations (1a, 1b, 2c);
    c. explaining the details of proper performance measures in logistics (1a, 1b, 2c).
2. Demonstrate an understanding of the legal aspects and regulatory agencies as they relate to logistics management by
    a. identifying terms and definitions used to regulate logistics operations (1a, 1b, 2c);
    b. identifying various local, state, and federal agencies that impact logistics operations (1a, 1b, 2c).
3. Demonstrate the ability to apply decision making techniques based on time, materials, and space by
    a. gathering all needed reference data to solve a complex logistics problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple step decision making process to solve a logistics problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a logistics problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

LMGT 1323 - Domestic & International Transport Mgt

General

Course Rubric	Course Number	Course Title
LMGT	1323	Domestic and International Transportation Management

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) An overview of the principles and practices of transportation and its role in the distribution process. Emphasis on the physical transportation systems involved in the United States as well as on global distribution systems. Topics include carrier responsibilities and services, freight classifications, rates, tariffs, and public policy and regulations. Also includes logistical geography and the development of skills to solve logistical transportation problems and issues.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss principles and practices of the physical transportation system as they pertain to distribution; interpret U.S. and global distribution trends, public policy, and regulations; implement decisions based on logistical and transportation issues and problems; describe U.S. and world geography and how they impact transportation logistics; and solve transportation problems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of principles and practices of transportation and their role in the distribution process by
    a. identifying terms and definitions used in transportation and distribution (1a, 1b, 2c);
    b. explaining the importance of different modes of transportation as they apply to distribution of raw materials and finished goods (1a, 1b, 2c);
    c. explaining the details of proper performance measures in transportation (1a, 1b, 2c).
2. Demonstrate an understanding of U.S. and global distribution trends, public policy, regulations, geography, and their impact on transportation by
    a. identifying terms and definitions related to public policy and regulations (1a, 1b, 2c);
    b. explaining the importance of distribution trends to the performance of organizations (1a, 1b, 2c).
3. Demonstrate the ability to apply decision making techniques to solve transportation problems and implement those decisions by
    a. gathering all needed reference data to solve a complex transportation problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple step decision making process to solve a transportation problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a transportation problem in a group setting (1a, 1b, 2b, 2c, 2e).

Course Rubric	Course Number	Course Title
LMGT	1325	Warehouse and Distribution Center Management

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Emphasis on physical distribution and total supply chain management. Includes warehouse operations management, hardware and software operations, bar codes, organizational effectiveness, just-in-time manufacturing and continuous replenishment, and third party.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss total supply chain management and its function in the physical distribution system; identify and demonstrate current technology utilized in warehouse management operations; apply the technology utilized in organizational effectiveness including time and money management and acquisition procession; and interpret information with relationship to inventory management.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of total supply chain management and its function in the physical distribution system by
    a. identifying terms and definitions used in warehouse management (1a, 1b, 2c);
    b. explaining the importance of supply chain management as it applies to the distribution of raw materials and finished goods through a warehouse network (1a, 1b, 2c);
    c. explaining the details of proper performance measures in warehouse management (1a, 1b, 2c).
2. Identify current technology utilized in warehouse management operations and how to apply that technology to achieve organizational effectiveness measures by
    a. identifying terms and definitions related to warehouse technology (1a, 1b, 2c);
    b. explaining the importance of technology to the performance of organizations (1a, 1b, 2c).
3. Demonstrate the ability to apply decision making techniques to solve warehouse management problems related to inventory management by
    a. gathering all needed reference data to solve a complex warehouse management problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple step decision making process to solve a warehouse management problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a warehouse management problem in a group setting (1a, 1b, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain carrier costing and rate development; apply rate negotiation techniques to meet carrier and shipper needs; evaluate carrier and modal capabilities to meet delivery requirements; and prepare required shipping documentation. Analyze shipping patterns to ensure optimum negotiating position; describe recourse for lost or damaged goods; apply appropriate hazardous materials labeling, packaging, and notifications; and identify and apply state, federal, and international laws and policies governing the transportation industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terms and how they relate to the overall concept of traffic management by
    a. identifying terms and definitions used in traffic management (1a, 1b, 2c);
    b. explaining carrier costing and rate development, applying rate negotiation techniques, evaluating carrier and modal capabilities, and preparing shipping documents (1a, 1b, 2c).
2. Demonstrate an understanding of shipping activities to meet customer requirements by
    a. analyzing shipping patterns to ensure optimum negotiating position (1a, 1b, 2c);
    b. describing the recourse for lost or damaged goods; applying appropriate hazardous materials labeling, packaging, and notifications (1a, 1b, 2c);
    c. identifying and applying state, federal, and international laws and policies governing the transportation industry (1a, 1b, 2c).
3. Demonstrate the ability to apply decision making techniques based on time, materials, and space by
    a. gathering all needed reference data to solve a complex transportation problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. utilizing a multiple step decision making process to solve a transportation problem (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. presenting the solution to a transportation problem in a group setting (1a, 1b, 1c, 2b, 2c, 2e).

Required Prerequisite(s): LMGT 2334

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Determine individual's leadership styles; explain the effects of leadership styles in various supply chain environments; explain the essential leadership skills required in various logistics and supply chain systems; cite examples of leadership techniques in a working environment; and apply the principles of leadership.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a basic understanding of leadership concepts by
    a. defining leadership theories and terminology (1a, 1b, 1e);
    b. explaining the idea and importance of leadership (1a, 1b, 1e, 2a, 2b, 2e, 3e);
    c. contrasting a manager and leader (1a, 1b, 2b, 2c, 2e, 2f);
    d. defining and analyzing leadership styles, traits, skills, and competencies (1a, 1b, 2a, 2b, 2c, 2e, 2f).
2. Demonstrate how to apply leadership principles and motivate people to perform in various logistics and supply chain functions by
    a. determining organizational effectiveness and relationships in different logistics systems (1a, 1b, 2a, 2b, 2c, 2e, 2f);
    b. assessing effective leadership styles and strategies that apply to different logistics systems (1a, 1b, 2a, 2b, 2c, 2e, 2f);
    c. demonstrating leadership, communication, decision-making, and collaborative skills at a functional level (1a, 1b, 2a, 2b, 2c, 2e, 2f).
3. Demonstrate the ability to complete a capstone leadership project by
    a. presenting proposed project idea to the instructor (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f);
    b. presenting completed project to class and industry partners (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2d, 2e, 2f).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of current practices and systems used in warehousing, transportation, or other logistics functions while working in a job environment by
    a. utilizing academic concepts and theories studied in the classroom to provide perspectives on their use in the workforce (1a, 1b, 2c);
    b. identifying the basic concepts of the organization's work practices as they relate to concepts studied in the classroom (1a, 1b, 2c).
2. Demonstrate the ability to conduct research and analysis on issues in the logistics workforce by
    a. identifying problems and possible solutions (1a, 1b, 2c);
    b. evaluating solutions to determine the best course of action (1a, 1b, 2c);
    c. documenting key learnings and experience in a journal (1a, 1b, 2c);
    d. preparing written and oral reports based on the experience (1a, 1b, 2c);
    e. delivering the report in both oral and written format (1a, 1b, 2c).

LNWK 1301 - Orientation and Line Skill Fundamentals

General

Course Key
12916

Course Rubric
LNWK

Course Number
1301

Course Title
Orientation and Line Skill Fundamentals

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Examination of utility company operations. Topics include company structure, safety and distribution standards handbook, lineman's tools, vocabulary, and work procedures. Discussion of basic electrical systems including the history of power generation and distribution with emphasis on generating plants and substations.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe operations of a typical power company; describe customer relations; identify electrical systems, lineman's tools, and work procedures; illustrate system operation and design; and list safe and proper handling of all equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize correct utility terminology by
    a. listing proper personal protective equipment (PPE) (1a);
    b. listing different levels of voltage (1a);
    c. defining OSHA and its role (1a);
    d. explaining the importance of voltage levels (1b, 2c);
    e. explaining the risks of voltage and how to manage them (1b, 2c).
2. Demonstrate an understanding of voltage levels by
    a. identifying the location of labels on equipment listing voltage (1b, 2c);
    b. explaining the different classes of voltage (1b, 2c);
    c. interpreting how the different voltage classes are used (1b, 2c).
3. Demonstrate an understanding of OSHA regulations by
    a. identifying two OSHA standards the utility industry is regulated by (1b, 2c);
    b. explaining different information from other entities (ASTM and ANSI) (1b, 2c);
    c. interpreting the information retrieved from the standards about safety (1b, 2c).
4. Apply knowledge skills by
    a. listing common names of construction materials (1b, 2c);
    b. listing wire sizes and connection types (1b, 2c);
    c. recommending wire sizes for different service applications (1b, 2c, 2d);
    d. demonstrating proper climbing technique and proper use/care of climbing equipment (1c, 2a, 2e).
5. Perform basic voltage calculations by
    a. identifying and testing voltage for single phase use (1b, 2c);
    b. identifying and testing voltage for three phase use (1b, 2c);
    c. identifying and testing for phase rotation (1b, 2c).

LNWK 1311 - Climbing Skills

General

Course Key
14408

Course Rubric	Course Number	Course Title
LNWK	1311	Climbing Skills

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Theory and application of pole climbing. Includes safety, climbing techniques, tool inspection, poles inspection, personal protective equipment, and fall protection.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify hazards on and around poles; demonstrate required safety; and inspect and use personal protective equipment and climbing equipment. Inspect and test wood poles; demonstrate climbing techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize electric utility pole climbing equipment correctly by
    a. recognizing and identifying basic equipment used for climbing wooden poles (PPE) (1a);
    b. demonstrating the proper fit of a body belt (1a);
    c. defining OSHA and their regulations for climbing (1a);
    d. demonstrating the proper fit of climbers (1b, 2c);
    e. listing and explaining the basic components of a safety strap (1b, 2c).
2. Demonstrate use, maintenance, and inspection of climbing equipment by
    a. demonstrating the proper way to wear climbers (1b, 2c);
    b. demonstrating the techniques of sharpening gaffs (1b, 2c);
    c. demonstrating the process of inspecting fall restraint devices (1b, 2c).
3. Demonstrate knowledge of basic climbing techniques, Part 1, by
    a. demonstrating the basic guidelines for storing and attaching a safety strap (1b, 2c);
    b. explaining the basic techniques for belted climbing with fall restraint (1b, 2c);
    c. interpreting the information retrieved from the Standards about climbing safely (1b, 2c).
4. Apply knowledge skills by
    a. listing common names of construction materials (1b, 2c);
    b. listing wire sizes and connection types (1b, 2c);
    c. recommending wire sizes for different service applications (1b, 2c, 2d);
    d. demonstrating proper climbing technique and proper use/care of climbing equipment (1c, 2a, 2e).
5. Demonstrate basic climbing techniques by
    a. using basic techniques for maneuvering around the pole (1b, 2c);
    b. demonstrating the proper techniques for safetying-on and safetying-off (1b, 2c);
    c. demonstrating the basic techniques for maneuvering past an obstacle (1b, 2c).

LNWK 1331 - Transformer Connections

General

Course Key
12917

Course Rubric	Course Number	Course Title
LNWK	1331	Transformer Connections

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) An introduction to basic transformer connections and theory (including basic alternating current (AC) theory) and their direct application to single phase and three phase transformers. Students will study and practice basic transformer connections and fundamentals.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the theory and operation of distribution transformers including basic transformer polarity and impedance; demonstrate the ability to troubleshoot single-phase and three-phase transformer installations while following safety procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize correct transformer terminology by
    a. defining the term “transformer” and identifying some common types of overhead and underground distribution transformers (1a);
    b. describing the designations that are commonly used to identify primary and secondary bushings (1a);
    c. listing and explaining basic information found on transformer name plates (1a) (2c).
2. Demonstrate an understanding of primary systems by
    a. recognizing and explaining the difference between the delta and wye phasor diagrams commonly used to illustrate the two systems (1c, 2a, 2e);
    b. listing and explaining the basic requirements for connecting transformers to delta and wye systems (1b, 2c).
3. Demonstrate an understanding of single-phase transformer connections by
    a. demonstrating and explaining how single-phase transformers can be connected to supply single-phase service (1b, 2c).
4. Demonstrate an understanding of three-phase primary connections by
    a. demonstrating and explaining a three-phase delta primary connection using three single-phase transformers (1b, 2c);
    b. demonstrating and explaining a three-phase wye primary connection using three single-phase transformers (1b, 2c).
5. Demonstrate an understanding of delta secondary connections by
    a. demonstrating and explaining how to make delta secondary connections (1b, 2c).

Description
(3-2-4) A study of the theoretical and practical operation of electric utility distribution systems. Topics include customer service voltages, capacitors, and coordination of protection equipment.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate customer service voltage; calculate capacitance necessary to control voltage; coordinate protective equipment; describe equipment behavior under load; and identify various types of distribution systems and networks.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize correct utility terminology by
    a. listing proper personal protective equipment (PPE) (1a);
    b. listing different levels of voltage (1a);
    c. defining OSHA and its role (1a);
    d. explaining the importance of voltage levels (1b, 2c);
    e. explaining the risks of voltage and how to manage them (1b, 2c).
2. Demonstrate an understanding of voltage levels by
    a. identifying the location of labels on equipment listing voltage (1b, 2c);
    b. explaining the different classes of voltage (1b, 2c);
    c. interpreting how the different voltage classes are used (1b, 2c).
3. Demonstrate an understanding of OSHA regulations by
    a. identifying two OSHA standards the utility industry is regulated by (1b, 2c);
    b. explaining different information from other entities (ASTM and ANSI) (1b, 2c);
    c. interpreting the information retrieved from the standards about safety (1b, 2c).
4. Apply knowledge skills by
    a. listing common names of construction materials (1b, 2c);
    b. listing wire sizes and connection types (1b, 2c);
    c. recommending wire sizes for different service applications (1b, 2c, 2d);
    d. demonstrating proper climbing technique and proper use/care of climbing equipment (1c, 2a, 2e).
5. Perform basic voltage calculations by
    a. identifying and testing voltage for single phase use (1b, 2c);
    b. identifying and testing voltage for three phase use (1b, 2c);
    c. identifying and testing for phase rotation (1b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): LNWK 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate safe cover-up and equipment grounding; define all relevant safety rules and procedures; inspect rubber gloves and cover-up material; demonstrate the use of "ground to ground" rubber gloves and cover-up.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of identifying an electrical line condition by
    a. listing proper personal protective equipment (PPE) (1a);
    b. listing different levels of voltage and explaining back feed (1a);
    c. defining the terms "energized," "isolated," and "de-energized" (1a).
2. Explain equipotential grounding by
    a. defining the term "Zone of Equipotential" (1b, 2c);
    b. using OHM's Law to describe the current flow in a de-energized line during a ground fault condition (1b, 2c);
    c. describing how to use grounding equipment to create a zone of equipotential (1b, 2c).
3. Demonstrate an understanding of OSHA regulations by
    a. identifying two OSHA standards the Utility Industry is regulated by (1b, 2c);
    b. explaining different information from other entities (ASTM, ANSI) (1b, 2c);
    c. interpreting the information retrieved from the standards about safety (1b, 2c).
4. Apply knowledge skills by
    a. describing how to perform dielectric test on rubber gloves and other rubber protective equipment (1b, 2c);
    b. describing guidelines for visually inspecting rubber gloves, sleeves, and blankets (1b, 2c);
    c. describing the guidelines for inspecting line hose, rubber hoods, and mechanical jumpers (1b, 2c, 2d).
5. Demonstrate knowledge of fiberglass switching sticks by
    a. describing the safety features of most hot sticks (1b, 2c);
    b. describing the guidelines and steps for care, inspection, and dielectric testing of fiberglass hot sticks (1b, 2c).

A Requirement block where all subrequirements are required

Take LNWK-1311;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): LNWK 1311

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: List equipment and material needed from staking sheet information; describe safe work procedures and tailboard discussion; define framing specifications; and demonstrate pole framing. Demonstrate pole setting procedures, conductor and equipment installations; and all relevant safety rules and procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of planning a job task and conducting a "tailboard conference" by
    a. listing proper personal protective equipment (PPE) (1a);
    b. describing the basic tasks associated with the installation and removal of an electric utility distribution line (1a);
    c. identifying and describing some of the equipment used in distribution line installation (1a).
2. Demonstrate knowledge of safety procedures for hazards identified in the tailboard by
    a. describing the basic safety considerations associated with the four basic tasks of a distribution electric line installation and removal (1b, 2c).
3. Demonstrate an understanding of OSHA regulations by
    a. identifying two OSHA standards the Utility Industry is regulated by (1b, 2c);
    b. explaining different information from other entities (ASTM, ANSI) (1b, 2c);
    c. interpreting the information retrieved from the Standards about safety (1b, 2c).
4. Apply knowledge skills by
    a. describing how to read and understand an engineer print (1b, 2c);
    b. describing guidelines for visually inspecting job site for hazardous conditions (1b, 2c);
    c. describing the guidelines for calling and documenting 811 utilities facilities locating procedures before digging (1b, 2c, 2d).
5. Demonstrate an understanding of the order in which line construction tasks flow by
    a. describing and identifying the use of a Right of Way (1b, 2c);
    b. describing the difference between a subdivision developer Right of Way and a Right of Way obtained by eminent domain (1b, 2c).

LNWK 2324 - Troubleshooting Distribution Systems

General

Course Key
12923

Course Rubric	Course Number	Course Title
LNWK	2324	Troubleshooting Distribution Systems

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) Study of power outages and voltage complaints on distribution systems. Includes lockout-tagout procedures, safety grounds, backfeed, induced voltage, causes of outages, and analyzing voltage complaints.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe causes of power outages; illustrate lockout-tagout procedures; and describe step and touch potentials. Describe backfeed and induced voltages; and calculate service size from customer load. Explain causes of power outages and voltage problems; explain grounding procedures; and all relevant safety rules and procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand the purpose of troubleshooting by
    a. listing proper personal protective equipment (PPE) (1a);
    b. describing the basic tasks associated with troubleshooting (1a);
    c. identifying and describing some of the equipment used in distribution line troubleshooting (1a).
2. Demonstrate knowledge of safety procedures for hazards identified in troubleshooting tasks by
    a. describing the basic safety considerations associated with the four basic tasks of a distribution electric line troubleshooting (1b, 2c).
3. Demonstrate an understanding of OSHA regulations by
    a. identifying OSHA standards the Electric Utility Industry is regulated by (1b, 2c);
    b. explaining different information from other entities (ASTM, ANSI) (1b, 2c);
    c. interpreting the information retrieved from the Standards about safety (1b, 2c).
4. Apply knowledge skills by
    a. describing how to read and understand an engineer print (1b, 2c);
    b. describing guidelines for visually inspecting job site for hazardous conditions (1b, 2c);
    c. describing the guidelines for calling and documenting 811 utilities facilities locating procedures before digging (1b, 2c, 2d).
5. Demonstrate an understanding of the order in which line troubleshooting tasks flow by
    a. describing the typical layout of underground distribution systems (1b, 2c);
    b. describing how to troubleshoot, isolate, and use a URD loop system to maintain service when there is an underground cable fault (1b, 2c);
    c. demonstrating an understanding of how to read system-engineering prints to patrol, isolate, sectionalize, and test overhead lines when an outage occurs (1b, 2c);
    d. demonstrating an understanding of the meter and service structure, parts, and testing for causes of secondary outages (1b, 2c).

LTCA 1311 - Intro to Long Term Care Administration

Course Number
1311

Course Title
Introduction to Long-Term Care Administration

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An overview of the long term care industry. Includes a survey of the history and philosophy of long term care administration. Provides an introduction to regulatory standards and statutes.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe demographic factors driving the long term care industry; assess the continuum of health care in the United States; differentiate the types of long term care; integrate resident rights into care giving; and utilize community resources in meeting resident needs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the history and structure of the long term care industry by
    a. describing demographic factors driving the long term care industry (1a, 1b, 2c, 2d, 3e);
    b. discussing the continuum of health care in the United States (1a, 1b, 1c, 2c, 2d);
    c. identifying the principal stakeholders of nursing facilities (1a, 1b, 2a, 2c);
    d. identifying long term care administration terminology (1a, 1b);
    e. identifying marketing challenges affecting long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. proposing methods to improve market share and revenues of long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    g. describing the U.S. health delivery system, including its purpose, organization, and structure (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    h. tracing the major phases and historical milestones of the development of the long term care industry in the U.S. (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    i. describing the types of long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    j. explaining licensing requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Monitor and evaluate clinical assessment and intervention methods to facilitate quality of care; integrate resident rights into all aspects of resident care; implement strategies to promote compliance with applicable federal, state, and local standards and regulations; and develop strategies to promote resident quality of life.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand the processes and strategies required to deliver quality services to long term care residents by
    a. integrating resident rights as an underlying principle of resident care (1a, 1b, 1c, 2b, 2d);
    b. describing and discussing the effects of aging from a clinical perspective (1a, 1b, 2b, 2c, 2d);
    c. incorporating the resident assessment protocol to develop a comprehensive plan of care for residents (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. comprehending the use of quality indicators for clinical performance measurement (1a, 1b, 1c, 2a, 2b, 2d, 2e);
    e. examining issues impacting resident quality of life, quality of care, and treatment in the long term care facility (1a, 1b, 2a, 2c, 2d);
    f. defining laws regarding the Self-Determination Act and advanced directives (1a, 1b, 1c, 2a, 2b, 2d);
    g. describing the criteria for establishing a medical ethics committee (1a, 1b, 2a, 2c, 2d).

Required Prerequisite(s): LTCA 1311

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply principles of leadership and management to long term care facilities; develop an organizational structure for a long term care facility; apply communication principles in the long term care facility; and articulate the requirements for continued professional development.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of a human resources management system to operate a long term care facility by
    a. discussing the role of the administrator in providing oversight in the long term care facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. describing the functions of long term care departments in correlation to the overall operation of the long term care facility (1a, 1b, 2a, 2b, 2c, 2d);
    c. developing strategies to improve the workplace environment through the application of leadership principles and management practices (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. composing performance evaluations and make recommendations for improved employee proficiency (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. explaining components of effective leadership in a long term care environment (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare entities regulating the long term care facility; analyze compliance requirements impacting long term care facilities; implement strategies for legal protection; examine ethical considerations of resident care, particularly end-of-life decisions; and describe the processes by which regulatory and statutory changes are promulgated in the industry including political involvement.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Analyze required federal, state, and local statutes and regulations to operate a long term care facility by
    a. identifying the federal, state, and local licensing and regulatory agencies for long term care facilities and the statutory sources of their authority (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. developing strategies for risk management implementation in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. explaining the components necessary to negotiate a contract (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. applying regulatory requirements to leadership and management incidences in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. comprehending the role of law in the American society (1a, 1b, 1c, 2a, 2b, 2c);
    f. using legal terminology relevant in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c);
    g. defining federal and state entities that govern long term care facilities (1a, 1b, 1c, 2a);
    h. explaining interpretations of federal/state laws that govern the operation of long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    i. discussing the phases of the survey process (1a, 1b, 1c, 2a, 2b, 2c, 2d).

LTCA 2315 - Financial Mgt of Long Term Care Facility

General

Course Key
90

Course Rubric
LTCA

Course Number
2315

Course Title
Financial Management of Long-Term Care Facilities

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). A study of the techniques used in the financial management of the long-term care facility including special accounting requirements of Medicare, Medicaid, and other third-party payor sources. Also covers strategies to promote financial sustainability. Required Prerequisite: LTCA-1311

View Course Availability on MyTCCTrack

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take LTCA-1311;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): LTCA 1311

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply generally accepted accounting principles; construct a budget; manage a budget; implement operational decisions based on analysis of financial information; apply safeguards to ensure resident rights in the management of financial resources and information; and implement risk management strategies to promote financial sustainability.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Prepare a financial statement by
    a. defining basic accounting terms and principles (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating knowledge of the capital structure, operating cycle, necessary cash flows, and prospective payment considerations influencing nursing facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. distinguishing between the principal coverage, financing, and reimbursement systems for third party payor sources (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. explaining key financial and quantitative indicators essential for managing budgets to achieve optimal productivity and ensure the financial health of the long term care facility (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. describing the Generally Accepted Accounting Principles (GAAP) (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

(ALL COURSES): Take all of the following courses...

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply leadership principles and management practices designed to operate a long term care facility by
    a. tracking federal, state, and local regulatory updates for implementation (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. formulating tools for competency assessment (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. developing policies and procedures for departments to implement a quality assurance and assessment plan (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. explaining resident care management policies and procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. explaining administrative policies and procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. describing the role of guidelines in designing and evaluating resident care systems in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

1. Apply leadership principles and management practices designed to operate a long term care facility by
    a. explaining factors that undermine quality of care for residents in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. applying regulatory requirements to management situations in long term care facilities (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. analyzing financial data for decision making (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. developing action plans to address deficient regulatory practices within departments (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. demonstrating the ability to recognize problems within the scope of a long term care facility, seek out evidence based sources to compose solutions, and implement plans of action (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will:

1. Perform operations with whole numbers, solve problems using whole numbers, and use properties of whole numbers.
2. Understand and perform operations with fractions and mixed numbers.
3. Solve problems involving decimals, proportions, and percents.
4. Use geometry, measurement, and data analysis to solve problems.
5. Perform operations with real numbers and apply properties of real numbers.
6. Solve linear equations and inequalities.
7. Graph linear functions.

MATH 1332 - Contemporary Math (Quantitative Reason)

General

Course Key
16131

Course Rubric	Course Number	Course Title
MATH	1332	Corequisite Mathematics (Quantitative Reasoning)

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0) Intended for Non STEM (Science, Technology, Engineering, and Mathematics) majors. Topics include introductory treatments of sets and logic, functions, financial mathematics, probability and statistics with appropriate applications. Number sense, proportional reasoning, estimation, technology, and communication should be embedded throughout the course. Additional topics may be covered. Required Prerequisite(s): TSI MATH score of 910-949 with diagnostic score of 3-5 or credit in MATH-0090 Required Co-requisite(s): MATH-0132

Course Learning Outcomes

Course Learning Outcomes
Course goals and learning outcomes support the Foundational Component Areas defined by the Texas Higher Education Coordinating Board. Course goals are linked to the respective Core Curriculum Competencies: Critical Thinking Skills, Communication Skills, and Empirical and Quantitative Skills. Specific competencies are identified in designated course goals and learning outcomes.

Upon successful completion of this course, students will:

1. Apply the language and notation of sets by
    a. producing representations of sets with word description, roster, and set builder notation;
    b. identifying finite and infinite sets;
    c. explaining the meaning of the empty set and the universal set;
    d. determining the number of subsets and proper subsets of a given set;
    e. using Venn diagrams to find intersections, unions, and complements, and to solve problems.
2. Determine the validity of an argument or statement and provide mathematical evidence by
    a. identifying English sentences that are statements;
    b. converting between English statements and symbolic forms;
    c. writing negations of quantified statements;
    d. identifying compound statements;
    e. constructing truth tables to determine the logical values of compound statements.
3. Solve problems in mathematics of finance by
    a. computing simple and compound interest;
    b. solving problems involving installment buying and credit card loans;
    c. computing interest costs for a fixed rate mortgage;
    d. determining monthly mortgage payments using a formula.
4. Demonstrate fundamental probability/counting techniques and apply those techniques to solve problems by
    a. using the fundamental counting principle to determine the number of possible outcomes in a given situation;
    b. distinguishing between permutation and combination problems;
    c. solving problems using combination and permutation formulas;
    d. computing theoretical and empirical probabilities;
    e. computing probabilities of simple and compound events.
5. Interpret and analyze various representations of data by
    a. determining the mean, median, mode, and midrange for a data set;
    b. solving problems involving measures of central tendency.
6. Demonstrate the ability to choose and analyze mathematical models to solve problems from real-world settings, including, but not limited to, personal finance, health literacy, and civic engagement.
7. Recognize and apply algebraic relations, functions, and graphs by
    a. identifying algebraic relations and functions;
    b. obtaining information about a function from its graph.
8. Critical Thinking Skills: Demonstrate the ability to evaluate, synthesize, and perform inquiry and analysis of information in mathematical problems by
    a. differentiating between the different types of consumer loan formulas;
    b. applying an interest formula to a real-world problem.
9. Communication Skills: Demonstrate the ability to communicate orally, visually, and/or in writing using mathematical language and symbols by
    a. analyzing and interpreting Venn Diagrams;
    b. illustrating the steps in constructing a truth table.
10. Empirical and Quantitative Skills: Manipulate and analyze numerical data or observable facts in making informed conclusions by
    a. finding a measure of central tendency for a data set;
    b. calculating the theoretical probability of an event.

Course Learning Outcomes

Course Learning Outcomes
Course goals and learning outcomes support the Foundational Component Areas defined by the Texas Higher Education Coordinating Board. Course goals are linked to the respective Core Curriculum Competencies: Critical Thinking Skills, Communication Skills, and Empirical and Quantitative Skills. Specific competencies are identified in designated course goals and learning outcomes.

Upon successful completion of this course, students will:

1. Explain the use of data collection and statistics as tools to reach reasonable conclusions by
    a. defining statistics;
    b. distinguishing between qualitative and quantitative variables;
    c. distinguishing between discrete and continuous variables;
    d. explaining the difference between an observational study and an experiment.
2. Recognize, examine, and interpret the basic principles of describing and presenting data by
    a. constructing frequency and relative frequency distribution tables for a data set;
    b. constructing representations of data graphically using bar graphs, histograms, pie charts, and/or other types of statistical graphs;
    c. interpreting data presented in graphs.
3. Compute and interpret empirical and theoretical probabilities using the rules of probabilities and combinatorics by
    a. computing the probability of an event;
    b. computing probabilities using the complement rule;
    c. computing probabilities using the addition and multiplication rules.
4. Explain the role of probability in statistics.
5. Examine, analyze, and compare various sampling distributions for both discrete and continuous random variables by
    a. constructing a probability distribution;
    b. finding the mean, variance, standard deviation, and expected value for a discrete random variable;
    c. describing the properties of the normal distribution;
    d. finding probabilities for a normally distributed random variable;
    e. finding the z-scores that correspond to the probability of a normally distributed random variable.
6. Describe and compute confidence intervals by
    a. constructing a confidence interval about a population parameter;
    b. computing the required sample size for finding a confidence interval.
7. Solve linear regression and correlation problems by
    a. determining the mean, median, and mode for a data set;
    b. computing the range, variance, and standard deviation of a data set;
    c. computing measures of position such as z-scores, quartiles, and/or percentiles for a data set;
    d. computing the approximate mean, variance, and standard deviation for grouped data;
    e. computing the linear correlation coefficient;
    f. finding the least squares regression line.
8. Perform hypothesis testing using statistical methods by
    a. determining the null and alternative hypotheses for a hypothesis test;
    b. performing an appropriate hypothesis test;
    c. stating the appropriate conclusion for a hypothesis test.
9. Critical Thinking Skills: Demonstrate the ability to evaluate, synthesize, and perform inquiry and analysis of information in mathematical problems by
    a. identifying possible sources of bias in a statistical study and explaining how to reduce bias;
    b. demonstrating understanding of inferential statistics by constructing confidence intervals and/or performing hypothesis testing.
10. Communication Skills: Demonstrate the ability to communicate orally, visually, and/or in writing using mathematical language and symbols by
    a. constructing graphical representations of data;
    b. translating real-world problems into mathematics problems that involve statistics and probability.
11. Empirical and Quantitative Skills: Manipulate and analyze numerical data or observable facts in making informed conclusions by
    a. calculating measures of central tendency, variation, and position;
    b. computing empirical and theoretical probabilities.

Description
(3-2-4) A course that introduces the student to machining fundamentals. The student will use basic machine tools including the lathe, milling machine, drill press, power saw, and bench grinder. Machine terminology, theory, math, part layout, and bench work using common measuring tools is included. Emphasis is placed on shop safety, housekeeping, and preventative maintenance. Required Prerequisites: DFTG-1305 and DFTG-1409

View Course Availability on MyTCCTrack

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisites

10
A Requirement block where all subrequirements are required

 # Take DFTG-1305 DFTG-1409;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate setup and use of basic machine tools; apply good housekeeping, and employ proper safety; use precision instruments to perform bench work including part layout, drilling, reaming, tapping, employ drilling, reaming, hole machining processes; demonstrate tooling maintenance, and equipment maintenance.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the safety procedures for setup and operation of CNC machinery (lathes, mills, drills, saws, and grinders) by
    a. demonstrating required safety procedures for setup and operation of CNC machines (1a, 1b, 2d, 2e);
    b. demonstrating proper safety procedures for handling cutting tools on a CNC machine (1a, 1b, 2d, 2e);
    c. demonstrating proper safety procedures for handling materials used in a CNC machine (1a, 1b, 2d, 2e).
2. Demonstrate an understanding of the use of precision instruments by
    a. laying out parts (1a, 1b, 2d, 2e);
    b. locating hole centers and surfaces (1a, 1b, 2d, 2e);
    c. setting up power saw for cut off operation (1a, 1b, 2d, 2e);
    d. demonstrating tooling maintenance and handling of hazardous materials (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of the setup and operation of a CNC machine by
    a. setting up power saws, drill presses, and bench grinders (1a, 1b, 2d, 2e);
    b. demonstrating the setup of a lathe (1a, 1b, 2d, 2e);
    c. demonstrating the setup of a milling machine (1a, 1b, 2d, 2e);
    d. demonstrating proper preventive maintenance for the machines (1a, 1b, 2d, 2e);
    e. dry running a CNC program (1a, 1b, 2d, 2e);
    f. running a live CNC program (1a, 1b, 2d, 2e);
    g. checking part against blueprint specification (1a, 1b, 2d, 2e).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): DFTG 1305 and DFTG 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate operations of CNC machine controls; compare and contrast the differences between conventional and CNC machines; and utilize CNC machine equipment for machining operations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the safety procedures for setup and operation of CNC machinery by
    a. demonstrating required safety procedures for setup and operation of CNC machines (1a, 1b, 2d, 2e);
    b. demonstrating proper safety procedures for handling cutting tools on a CNC machine (1a, 1b, 2d, 2e);
    c. demonstrating proper safety procedures for handling materials used in a CNC machine (1a, 1b, 2d, 2e).
2. Demonstrate an understanding of the working environment of the CNC machine by
    a. labeling the axis of travel on a CNC machine (1a, 1b, 2d, 2e);
    b. explaining how the CNC code translates into movement on the CNC machine (1a, 1b, 2d, 2e);
    c. describing the EDM process (1a, 1b, 2d, 2e);
    d. describing the different materials used for cutting tools (1a, 1b, 2d, 2e).
3. Demonstrate an understanding of the setup and operation of a CNC machine by
    a. explaining part zero location and why it is important for setup and programming part shapes (1a, 1b, 2d, 2e);
    b. demonstrating the procedure for setting part zero (1a, 1b, 2d, 2e);
    c. setting tool length offsets (1a, 1b, 2d, 2e);
    d. demonstrating the ability to load and delete programs from a CNC machine (1a, 1b, 2d, 2e);
    e. dry running a CNC program (1a, 1b, 2d, 2e);
    f. running a live CNC program (1a, 1b, 2d, 2e);
    g. checking part against blueprint specification (1a, 1b, 2d, 2e).
4. Demonstrate an understanding of the basics of G and M code languages by
    a. explaining G and M code (1a, 1b, 2d, 2e);
    b. calculating proper feeds and speeds for given cutter (1a, 1b, 2d, 2e);
    c. calculating cutter position for cutting tool program (1a, 1b, 2d, 2e);
    d. explaining differences between incremental and absolute programming (1a, 1b, 2d, 2e);
    e. identifying codes used for part zero and TLO register pickup (1a, 1b, 2d, 2e);
    f. explaining canned cycles in CNC program (1a, 1b, 2d, 2e).
5. Demonstrate an understanding of CAD/CAM by
    a. explaining the major differences between computer-aided design and computer-aided manufacturing (1a, 1b, 2d, 2e);
    b. listing the major points in CAD (1a, 1b, 2d, 2e);
    c. listing the major points in CAM (1a, 1b, 2d, 2e).

Required Prerequisite(s): DFTG 1305

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Set up and operate CNC turning centers; set the tool and workpiece offsets for machining operations; and edit the program as required.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the safety procedures for setup and operation of CNC machinery by
    a. demonstrating required safety procedures for setup and operation of CNC machines (1a, 1b, 2d, 2e);
    b. demonstrating proper safety procedures for handling cutting tools on a CNC machine (1a, 1b, 2d, 2e);
    c. demonstrating proper safety procedures for handling materials used in a CNC machine (1a, 1b, 2d, 2e).
2. Learn to program and operate CNC based machines by
    a. operating CNC machine controls (1a, 1b, 2d, 2e);
    b. comparing and contrasting the differences between CNC based machines and conventional machines (1a, 1b, 2d, 2e);
    c. using a CNC machine to complete a project (1a, 1b, 2d, 2e);
    d. defining and discussing the different materials used for cutting tools (1a, 1b, 2d, 2e).
3. Learn how CNC languages work by
    a. taking a knowledge test on G code (1a, 1b, 2d, 2e);
    b. taking a knowledge test on M codes (1a, 1b, 2d, 2e);
    c. writing a complete CNC program (1a, 1b, 2d, 2e);
    d. demonstrating ability to load and delete programs from CNC machine (1a, 1b, 2d, 2e);
    e. demonstrating ability to dry run a CNC program (1a, 1b, 2d, 2e);
    f. demonstrating ability to run a live CNC program (1a, 1b, 2d, 2e);
    g. demonstrating ability to check part against blueprint specification (1a, 1b, 2d, 2e).
4. Learn basics of G&M code languages by
    a. identifying and explaining G&M code (1a, 1b, 2d, 2e);
    b. demonstrating ability to calculate proper feeds and speeds for given cutter (1a, 1b, 2d, 2e);
    c. demonstrating ability to calculate cutter position for cutting tool program (1a, 1b, 2d, 2e);
    d. explaining differences between incremental and absolute programming (1a, 1b, 2d, 2e);
    e. identifying codes used for part zero and TLO register pickup (1a, 1b, 2d, 2e);
    f. explaining canned cycles in CNC program (1a, 1b, 2d, 2e).
5. Learn how to set up and operate a CNC turning center by
    a. performing multi-angular setups (1a, 1b, 2d, 2e);
    b. setting up and performing gear cuts (spur gears and splined shaft) (1a, 1b, 2d, 2e);
    c. performing advanced indexing operations (1a, 1b, 2d, 2e).

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate caring behaviors toward self and others (1a, 1b, 1c, 2b).
2. Implement beginning communication skills with patients, families, and members of the interdisciplinary health care team (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to collaborate with other members of the health care team (1a, 1b, 1c, 2a, 2b, 2d, 2e).
4. Apply clinical reasoning skills in problem solving and decision making (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate knowledge and self-directed behaviors for client safety (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate the attitudes and values of the healthcare profession (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop time-management skills; apply study techniques; perform test-taking strategies for exams covering content of medical assisting courses.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Review and understand the content of previous medical assisting courses (1a, 1b).
2. Apply test-taking strategies and study techniques (1a, 1b, 2a, 2c).
3. Develop time management skills (1a, 1b, 2a, 2c).
4. Demonstrate knowledge of content and competencies in the medical assisting program (1a, 1b, 2c).

MDCA 1302 - Human Disease and Pathophysiology

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0)A study of anatomy and physiology with emphasis on human pathophysiology, including etiology, prognosis, medical treatment, signs and symptoms of common diseases of all body systems.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Distinguish between normal and abnormal physiologic functions of all body systems; identify etiology, signs, and symptoms of diseases of all body systems; and correlate the prognosis, medical treatment, and procedures with patient morbidity and mortality.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a basic understanding of the common diseases of the human body (1a, 1b).

2. Demonstrate an understanding of the etiology of diseases, the signs and symptoms of diseases, and the treatment of diseases (1a, 1b).

3. Understand the common laboratory and diagnostic tests used to diagnose common diseases (1a, 1b, 2a, 2c, 2e).

4. Understand the treatments of diseases or conditions (1a, 1b, 2a, 2c, 2e).

MDCA 1305 - Medical Law and Ethics

0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Instruction in principles, procedures, and regulations involving legal and ethical relationships among physicians, patients, and medical assistants in health care settings.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define general legal terms as they apply to the practice of medicine in ambulatory care settings; differentiate between sources and types of law; identify the role of the medical assistant; explain governmental healthcare guidelines including patient rights and advanced directives.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Examine general legal concepts applied to healthcare professions (1a, 1b, 2c, 2d).

2. Explain the rights and obligations with nursing's legal role (1a, 1b, 2c, 2d).

3. Identify potential liability (1a, 1b, 2c, 2d).

4. Explain the legal responsibility of health care professionals (1a, 1b, 2c, 2d).

5. Explore ethical issues in health care (1a, 1b, 2c, 2d).

6. Illustrate the steps in the ethical decision-making process (1a, 1b, 2c, 2d).

7. Examine ethical issues related to genetic testing and recording of genetic information (1a, 1b, 2c, 2d).

MDCA 1310 - Medical Asst Interpersonal/Comm Skills

Course Number
1310

Course Title
Medical Assistant Interpersonal and Communication Skills

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0)Emphasis on the application of basic psychological principles and the study of behavior as they apply to special populations. Topics include procedures for self-understanding and social adaptability in interpersonal communication with patients and co-workers in an ambulatory care setting.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain basic psychological principles and developmental stages of life; differentiate between verbal and non-verbal communication; identify behaviors that interfere with effective communication; identify elements of active listening; discuss the stages of grief; identify relationships among various health care professions; and describe and demonstrate professionalism of an effective health care worker.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain communication process (1a, 1b, 2a, 2b, 2c).

2. Apply strategies of coordination, collaboration, and communication to plan, deliver, and evaluate interdisciplinary health care (1a, 1b, 1c, 2a, 2b, 2c, 2d).

3. Demonstrate verbal and nonverbal communication skills that are relevant, accurate, clear, complete, timely, understandable, and therapeutic (1a, 1b, 1c, 2b, 2c).

4. Demonstrate written communication skills that are legible, relevant, accurate, complete, and meaningful (1a, 1b, 2c, 2d, 2e).

5. Demonstrate active listening, genuineness, observational skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b).

6. Maintain eye contact (when culturally appropriate) (1a, 1b, 1c, 2b).

1321

Course Title
Administrative Procedures

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Medical office procedures including appointment scheduling, medical records creation and maintenance, interpersonal communications, bookkeeping tasks, coding, billing, collecting, third party reimbursement, credit arrangements, and computer use in the medical office.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Schedule appointments; create, document, and maintain patient medical records; correlate coding, billing, and collecting; perform bookkeeping tasks; utilize computer software for basic office functions; and demonstrate interpersonal communication skills.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of administrative procedures in medical offices (1a, 1b, 2a, 2c, 2d, 2e).

2. Demonstrate knowledge of an electronic medical records system (1a, 1b, 2a, 2c, 2d, 2e).

3. Demonstrate knowledge of the basic principles charting and HIPAA compliance (1a, 1b, 2a, 2c, 2d, 2e).

4. Use terminology related to the medical office procedures (1a, 1b).

5. Perform medical office procedures for ICD-10-CM and CPT coding (1a, 1b, 2a, 2c, 2d, 2e).

MDCA 1343 - Medical Insurance

General

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Emphasizes medical office coding for payment and reimbursement by patient or third party payers for health care settings.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Code procedures and bill for services using both electronic and manual methods; compare and contrast insurance plans; describe the revenue cycle; and define common terms used to file third party reimbursement forms.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand the organization of a health care system (1a, 1b).

2. Create an awareness of the deficiencies in the minimal health insurance programs (1a, 1b, 2a, 2c).

3. Code health records using various classification systems (1a, 1b, 2a, 2c, 2d, 2e).

4. Execute reimbursement forms (1a, 1b, 2a, 2c, 2d, 2e).

5. Facilitate the development of an insurance claim (1a, 1b, 2a, 2c, 2d, 2e).

6. Interpret provider documentation to code for medical necessity (1a, 1b, 2a, 2c, 2d).

7. Examine the various methods of using private insurance to supplement the government health insurance programs (1a, 1b, 2a, 2c, 2d, 2e).

MDCA 1352 - Medical Assistant Lab Procedures

Workforce Education Course Manual (WECM)

Description
(3-2-3) Application of governmental health care guidelines. Includes specimen collection and handling, quality assurance and quality control in performance of Clinical Laboratory Improvement Amendments (CLIA)-waived laboratory testing.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate venipuncture and skin puncture technique; demonstrate compliance with Universal Standards and Precautions based on OSHA guidelines; perform CLIA-waived laboratory tests; label and handle all biologic specimens; use equipment including calibration, maintenance and troubleshooting; demonstrate quality assurance and quality control procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Examine basic concepts of asepsis (1a, 1b, 2a, 2c, 2d).

2. Obtain baseline vital sign information and compare it to normal values (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Demonstrate the ability to assist with minor surgery (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

4. Demonstrate how to use the electrocardiograph machine (1a, 1b, 1c, 2a, 2c, 2e).

5. Demonstrate skills necessary to work in a laboratory (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

MDCA 1409 - Anatomy and Physiology for Medical Asst

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Emphasis on structure and function of human cells, tissues, organs, and systems with overview of common pathophysiology.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and correlate cells, tissues, organs, and systems of the human body; differentiate normal from abnormal structure and function; and differentiate all body systems, their organs, and relevant pathophysiology.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify and apply the fundamental concepts and methods of a life or physical science (1a, 1b).

2. Explain interrelationships among molecular, cellular, tissue, and organ functions in each system (1a, 1b).

3. Use anatomical terminology to identify and describe locations of major organs of each system (1a, 1b).

4. Explain contributions of organs and systems to the maintenance of homeostasis (1a, 1b).

5. Understand and describe the basic physiological principles of circulatory/cardiovascular, respiratory, urinary, endocrine, reproductive, digestive, lymphatic, and integumentary systems (1a, 1b, 2c).

6. Understand, identify, and describe the basic anatomical structures associated with the circulatory/cardiovascular, respiratory, urinary, endocrine, reproductive, digestive, lymphatic, and integumentary systems (1a, 1b, 1c).

7. Use the tools of scientific discipline to carry out collaborative laboratory investigations (1a, 1b, 2a, 2b, 2c, 2d, 2e).

8. Gather, analyze, and interpret data and present it in an effective written laboratory or fieldwork report (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Emphasis on patient assessment, examination, and treatment as directed by physician. Includes vital signs, collection and documentation of patient information, asepsis, office clinical procedures, and other treatments as appropriate for health care settings.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Assist with routine and specialty office examinations and procedures including inventory control; perform medical and surgical asepsis and sterile techniques appropriate in health care settings; apply governmental health care guidelines; and respond to medical emergencies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate competency in theory of basic procedures (1a, 1b, 1c, 2a, 2b, 2c).

2. Demonstrate competency in procedures by

   a. performing hand hygiene (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   b. preparing for isolation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   c. performing surgical hand hygiene with preparing a sterile field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   d. performing the inventory control (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   e. collecting the specimen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   f. performing diagnostic tests (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   g. measuring intake and output (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   h. caring for patients with the following alterations in health: oxygen administration, tracheostomy care, catheterization and its care, and insertion of NG tube and its care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   i. administering nasogastric tube feeding (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   j. performing venipuncture and initiating IV therapy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

3. Discuss the delivery of basic procedures in a variety of health care settings (1a, 1b, 1c, 2a, 2b, 2c).

4. Demonstrate self-directed behaviors for client safety in a simulated environment (1a, 1b, 1c, 2a, 2b, 2c).

5. Demonstrate professional behavior by showing respect for others in a simulated environment (1a, 1b, 1c, 2a, 2b, 2c).

6. Apply clinical reasoning skills in problem solving and decision making, when providing care in a simulated environment (1a, 1b, 1c, 2a, 2b, 2c).

MDCA 1448 - Pharmacology/Administration Medications

General

Course Key
12928

Course Rubric	Course Number	Course Title
MDCA	1448	Pharmacology and Administration of Medications

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-2) Instruction in concepts and application of pharmacological principles. Focuses on drug classifications, principles and procedures of medication administration, mathematical systems and conversions, calculation of drug problems, and medico-legal responsibilities of the medical assistant.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Prepare, administer, and document oral and percutaneous medications; calculate drug dosages for administration by standard routes for adult and pediatric patients; demonstrate inventory handling and storage; and adhere to governmental health care guidelines and biohazard protocols.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Use terminology associated with pharmacology (1a, 1b, 1c, 2a, 2c).

2. Use appropriate sources of drug information to research prescribed medication (1a, 1b, 1c, 2a, 2c).

3. Apply the six rights of medication administration during the preparation, administration, and documentation of medication therapy (1a, 1b, 1c, 2a, 2c).

4. Demonstrate the ability to develop a drug profile for a prototype by

   a. developing a drug profile for drug action (1a, 1b, 1c, 2a, 2c);

   b. developing a drug profile for adverse reactions (1a, 1b, 1c, 2a, 2c);

   c. developing a drug profile for drug dosage forms (1a, 1b, 1c, 2a, 2c);

   d. developing a drug profile for recommended dosages and routes of administration (1a, 1b, 1c, 2a, 2c).

5. Use basic knowledge to deliver safe patient care while meeting the pharmacological needs of the patient (1a, 1b, 1c, 2a, 2c).

6. Use knowledge base to monitor the patient's response to drug therapy, collaborate with members of the health care team whenever needed to clarify orders, and report the individual's response to medication prescribed (1a, 1b, 1c, 2a, 2c).

7. Identify classifications of medications (1a, 1b, 1c, 2a, 2c).

8. Identify commonly prescribed medications and related information in each classification (1a, 1b, 1c, 2a, 2c).

9. Relate possible drug interactions for specific drugs (1a, 1b, 1c, 2a, 2c).

10. Evaluate the patient for possible adverse drug reactions (1a, 1b, 1c, 2a, 2c).

11. Demonstrate health teaching related to drug therapy (1a, 1b, 1c, 2a, 2b, 2c).

METL 1301 - Introduction to Metallurgy

METL

Course Number
1301

Course Title
Introduction to Metallurgy

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A comprehensive study of refining, mechanical, and physical properties of ferrous and non-ferrous materials including the theory of alloys, heat treatment and testing.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the physical and mechanical properties of ferrous and non-ferrous metals; describe the steel making process; describe methods of destructive and nondestructive testing; explain the effects of hot working, cold working, welding, machining, and heat treating on metal properties; define metallurgical terms and processes; and recognize defects and their causes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the physical and mechanical properties of ferrous and non-ferrous metals by

    a. explaining how alloying affects a metal (1a, 1b, 2c, 2d);

    b. explaining how grain size affects the metal (1a, 1b, 2c, 2d).

2. Demonstrate an understanding of the steel making process by

    a. explaining the types of equipment used during the steel making process (1a, 1b, 2c, 2d);

    b. explaining the pros and cons of each process (1a, 1b, 2c, 2d).

3. Demonstrate an understanding of methods of destructive and nondestructive testing by

    a. explaining the destructive tests that are performed to verify a metal's properties (1a, 1b, 2c, 2d);

    b. identifying what nondestructive tests are performed at each step in the process (1a, 1b, 2c, 2d).

4. Demonstrating an understanding of the effects of hot working, cold working, welding, machining, and heat treating on metal properties by

    a. describing how secondary processes affect the grain structure and strength of metals (1a, 1b, 2c, 2d).

5. Demonstrating an understanding of metallurgical terms and processes by

    a. describing the various processes involved in metallurgical examinations (1a, 1b, 2c, 2d);

    b. identifying and explaining the purpose of equipment used during metallurgical examinations (1a, 1b, 2c, 2d);

    c. explaining the meaning of various metallurgical terms (1a, 1b, 2c, 2d).

6. Demonstrate an understanding of defects and their causes by

    a. identifying common inherent defects (1a, 1b, 2c, 2d);

    b. explaining the cause of each common inherent defect (1a, 1b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of different types of corrosion by

    a. identifying pitting corrosion (1a, 1b, 2c);

    b. identifying erosion corrosion (1a, 1b, 2c);

    c. identifying fretting corrosion (1a, 1b, 2c).

2. Demonstrate an understanding of stress factors on structures by

    a. identifying locations with stress concentrations (1a, 1b, 2c);

    b. identifying areas with bending stresses (1a, 1b, 2c);

    c. identifying areas with torsional loading (1a, 1b, 2c);

    d. describing the effects of load frequency and temperature on a structure (1a, 1b, 2c).

3. Demonstrate an understanding of the appropriate NDT method for detecting fatigue or corrosion conditions by

    a. identifying which NDT methods are capable of detecting the corrosion or fatigue (1a, 1b, 2c).

Technical Local Need

Description
(2-2-0) A continuation of magnetic resonance imaging principles, physics, techniques, equipment, methodology, and safety in preparation for licensure examination in MRI. Emphasis is placed on mastery of topics presented. Required Prerequisite(s): Graduate of a 2-year accredited medical radiography program in ionizing radiation. Current, unsanctioned ARRT licensure in Radiography, Radiation Therapy, Nuclear Medicine Technology, or Sonography. Texas Medical Board - Medical Radiologic Technologist License (MRT)

Requirements

Requirements
Required Prerequisite(s): Graduate of a 2 year accredited medical radiography program in ionizing radiation Current, unsanctioned ARRT licensure in Radiography, Radiation Therapy, Nuclear Medicine Technology, or Sonography. Texas Medical Board Medical Radiologic Technologist License (MRT).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists' Content Specifications for the Examination in Magnetic Resonance Imaging, Joint Review Committee on Education in Magnetic Resonance Imaging (Professional Curriculum topics), and the American Society of Radiologic Technology's Magnetic Resonance Imaging Curriculum Guide.

End-of-Course Outcomes: Explain the operating principles of magnetic resonance imaging equipment, identify safety hazards, differentiate the methods of data acquisition, explain the reconstruction algorithms, and evaluate magnetic resonance image quality.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Prepare for the MRI Registry by

    a. reviewing principles and physics of MRI (1a, 1b, 2c, 2e);

    b. reviewing MRI equipment and methodology (1a, 1b, 2c, 2e);

    c. reviewing QA and safety procedures (1a, 1b, 2c, 2e);

    d. completing multiple mock registry exams of varying lengths to prepare for the ARRT MRI Registry Examination (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists' Content Specifications for the Examination in Magnetic Resonance Imaging, Joint Review Committee on Education in Magnetic Resonance Imaging (Professional Curriculum topics), and the American Society of Radiologic Technology's Magnetic Resonance Imaging Curriculum Guide.

End-of-Course Outcomes: Explain the operating principles of magnetic resonance imaging equipment; identify safety hazards; differentiate the methods of data acquisition; explain the reconstruction algorithms; and evaluate magnetic resonance image quality.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Summarize principles of electrodynamics by

    a. identifying scientists associated with MR discovery and use (1a, 1b, 2c, 2e);

    b. describing magnetism and magnetic properties (1a, 1b, 2a, 2e);

    c. describing the production and detection of an MR signal (1a, 1b, 2c, 2e);

    d. using the Larmor equation to determine resonant frequency, field strength, and gyromagnetic ratio (1a, 1b, 1c, 2c, 2e);

    e. explaining the concepts of resonance, excitation, and relaxation (1a, 1b, 2c, 2e).

2. Describe MRI signal formation by

    a. describing signal induction, sampling, and conversion (1a, 1b, 2c, 2e);

    b. explaining magnetic gradient functions in MR imaging (1a, 1b, 2c, 2e);

    c. discussing and comparing the characteristics and techniques of spin echo and gradient echo sequences (1a, 1b, 2c, 2e);

    d. explaining the role of parameter selection in MR weighting (1a, 1b, 2c, 2e);

    e. defining and describing data acquisition processes (1a, 1b, 2c, 2e).

3. Describe equipment and environmental safety by

    a. listing MR safety organizations and their roles (1a, 1b, 2c, 2e);

    b. listing and defining the 3 MR magnetic fields and their safety (1a, 1b, 2c, 2e);

    c. identifying equipment, environmental, personnel, and patient safety (1a, 1b, 2c, 2e);

    d. describing emergency situations and the necessary actions taken (1a, 1b, 2c, 2e).

4. Identify and analyze imaging artifacts by

    a. listing artifacts, their causes, and their appearance (1a, 1b, 2c, 2e);

    b. discussing ways to reduce, compensate for, or eliminate artifacts (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists' Content Specifications for the Examination in Magnetic Resonance Imaging, Joint Review Committee on Education in Magnetic Resonance Imaging (Professional Curriculum topics), and the American Society of Radiologic Technology's Magnetic Resonance Imaging Curriculum Guide.

End-of-Course Outcomes: Determine operating protocols for routine magnetic resonance imaging to include safety protocols and quality assurance; and analyze imaging artifacts.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand equipment and operation by

    a. describing the three basic types of clinical magnets, citing their advantages and disadvantages (1a, 1b, 2c, 2e);

    b. describing the functionality of RF, gradient, and shim systems in MRI (1a, 1b, 2c, 2e);

    c. demonstrating the use of ancillary equipment in MRI (1a, 1b, 2c, 2e).

2. Identify and discuss methodology in MRI by

    a. selecting appropriate parameters and imaging planes (1a, 1b, 2c, 2e);

    b. identifying positioning and procedural considerations (1a, 1b, 2c, 2e);

    c. discussing imaging options based on anatomic and/or pathological considerations (1a, 1b, 2c, 2e).

3. Identify pathology seen on MRI images by

    a. citing common pathologies seen in MRI (1a, 1b, 2c, 2e);

    b. recognizing signal characteristics and anatomical structure changes in size and shape indicating pathology (1a, 1b, 2c, 2e);

    c. describing the effect of contrast agents on visualizing pathology (1a, 1b, 2c, 2e).

4. Describe and understand quality assurance in MRI by

    a. describing field strength in relation to image quality (1a, 1b, 2c, 2e);

    b. listing and discussing quality assurance (QA) procedures that must be maintained in an MRI department (1a, 1b, 2c, 2e);

    c. defining imaging options used to optimize image quality (1a, 1b, 2c, 2e).

Course Rubric	Course Number	Course Title
MRIT	2355	Magnetic Resonance Imaging Physics

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of Magnetic Resonance Imaging (MRI) physics which includes principles of electrodynamics, pulse sequences, sequence parameters and options, and spin echo and gradient echo techniques.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists' Content Specifications for the Examination in Magnetic Resonance Imaging, Joint Review Committee on Education in Magnetic Resonance Imaging (Professional Curriculum topics), and the American Society of Radiologic Technology's Magnetic Resonance Imaging Curriculum Guide.

End-of-Course Outcomes: Summarize principles of electrodynamics; interpret pulse sequences and sequence parameters and options; discuss spin echo and gradient echo techniques; and utilize algebraic concepts to solve MRI physics and electrodynamics problems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe pulse sequences and sequence parameters by

    a. constructing and analyzing pulse sequence diagrams (1a, 1b, 2c, 2e);

    b. determining the appropriate pulse sequences for desired image contrast (1a, 1b, 2c, 2e);

2. Describe MRI image formation by

    a. describing image formation and post processing (1a, 1b, 2c, 2e);

    b. evaluating MRI image quality, including extrinsic and extrinsic contrast characteristics (1a, 1b, 2c, 2e);

    c. calculating scan time and image contrast specifics utilizing varying formulas (1a, 1b, 1c, 2c, 2e).

3. Define contrast media and its use in MRI by

    a. discussing the different types of contrast media and their mechanisms of action (1a, 1b, 2c, 2e);

    b. identifying contrast media effects in images and their safety characteristics (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists' Content Specifications for the Examination in Magnetic Resonance Imaging, Joint Review Committee on Education in Magnetic Resonance Imaging (Professional Curriculum topics), and the American Society of Radiologic Technology's Magnetic Resonance Imaging Curriculum Guide.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Function professionally under direct and indirect supervision by

   a. performing all general patient care activities, including venipuncture if needed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   b. demonstrating competence in performing routine MRI procedures of the head, neck, thorax, abdomen, lower, and upper extremities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

   c. performing requisition evaluation, patient assessment, and room preparation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Examine internal and external customer relationship management (CRM) strategies.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Define the important functions of Customer Relationship Management (1a, 2a).

2. Identify internal and external Customer Relationship Management behavior (1a, 1b, 1c, 2a, 2b).

3. Demonstrate techniques and strategies of successful Customer Relationship Management (1a, 1b, 1c, 2c, 2d).

4. Explain the value of effective verbal and nonverbal communication (1a, 1b, 1c, 2c, 2d).

5. Construct plans and campaigns to attract and retain customers (1b, 1c, 2a, 2b, 2c, 2d, 2e).

6. Explain the effects of electronic resources and changes in technology on customer relationships (1a, 1b, 1c, 2c, 2d, 2e).

7. Describe professional ethics and codes of behavior (1a, 1b, 1c, 2a, 2b, 2c).

8. Explain Customer Relationship Management and significance in a global economy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify consumer segments, environmental trends, and traditional and nontraditional retailing markets; explain the functions of retailing; and describe effective retailing techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the scope of the retail environment in an economic society (1a, 1b, 2a, 2b, 2c).

2. Outline careers and entrepreneurial opportunities retailing offers (1a, 1b, 1c, 2a, 2b).

3. Identify consumer segments and buying behavior characteristics (1a, 2a).

4. Describe site locations available to retailers and decisions regarding selections (1a, 2a, 2c, 2e).

5. List the elements of merchandise management in developing a merchandise plan (1b, 2a, 2b, 2c, 2d, 2e).

6. Compare and contrast factors associated with the operations policies, methods, and procedures used by successful retailers in a global economy (1a, 2a, 2e).

7. Explain retail image and promotional strategy by describing retail store layout, design, and visual merchandising (1b, 2a, 2b, 2c, 2d, 2e).

8. Demonstrate the use and influence of technology on creating effective retailing techniques (1b, 2a, 2b, 2c, 2d, 2e).

MRKG

Course Number
1311

Course Title
Principles of Marketing

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Introduction to the marketing mix functions and process. Includes identification of consumer and organizational needs and explanation of environmental issues.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the marketing mix components in relation to market segmentation; explain the environmental factors which influence consumer and organizational decision-making processes; and outline a marketing plan.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Define the role of marketing in societies by outlining the philosophies and timeline of marketing history (1a, 2c).

2. Explain the controllable and uncontrollable variables affecting issues in the marketing environment (1a, 1b, 2a, 2c).

3. Analyze the components of the consumer and business buyer decision-making processes (1a, 1b, 1c, 2a, 2b, 2c).

4. Describe cultural and social factors, individual and group influences, and effects of technology on buying behaviors (1a, 1b, 1c, 2a, 2b, 2c).

5. Evaluate the role of promotional campaigns, including advertising and public relations (1a, 1b, 1c, 2a, 2b, 2c).

6. Compute breakeven points, and evaluate the role and techniques of pricing in marketing (1a, 1b, 2a, 2b, 2c).

7. Explain distribution processes by defining types of channel intermediaries, their functions, strategies, and technology (1a, 1b, 2a, 2b, 2c, 2d, 2e).

8. Develop a marketing plan with the inclusion of the basic elements of the marketing mix (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform market analysis; develop e-Marketing goals; evaluate electronic communications; identify target audience; design and evaluate customer feedback techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Define different types of social media channels, along with key trends in this evolving medium (1a, 1b, 2a, 2c, 2d).

2. Demonstrate an understanding of how social media impacts the business and social environment (1a, 1b, 2a, 2c, 2d).

3. Understand the challenges and advantages of effective social media marketing (1a, 1b, 2a, 2c, 2d).

4. Identify and describe the various social media platforms available to small businesses (1a, 1b, 2a, 2c, 2d).

5. Develop social media marketing strategy in a small business setting (1a, 1b, 2a, 2b, 2c, 2d).

6. Evaluate the effectiveness of social media on enhancing branding and marketing strategies for the small business (1a, 1b, 2a, 2c, 2d).

7. Evaluate the purpose of various social media platforms (1a, 1b, 2a, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the selling process and its application to all forms of sales; identify the elements of the communication process between buyers and sellers in business; and examine ethical issues and legal restrictions of business.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Outline the steps in the selling process and application to the different forms of sales (1a, 1c, 2b, 2c).

2. Identify the elements of the communication process between buyers and sellers in business (1a, 2a, 2b, 2d).

3. Demonstrate verbal and nonverbal strategies in developing customer relationships (1b, 1c, 2a, 2b, 2c).

4. Explain ethical foundations for long term customer relationships (1b, 1c, 2b).

5. Develop customer-related product/service strategies with solution-based recommendations (1b, 2b, 2c).

6. Explain how to create a database of qualified prospects (2c, 2d, 2e).

7. Demonstrate the different types of effective presentation strategies using multidimensional technology (1b, 1c, 2a, 2b, 2d, 2e).

8. Demonstrate the management of a sales force by identifying leadership skills, and the selection, motivation, and retention of salespeople (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze marketing studies employing the problem solving process; utilize marketing research techniques to implement competitive marketing decisions; and interpret marketing research data to forecast industry trends and meet customer demands.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Outline the steps in the marketing research process (1a, 2c).

2. Explain quantitative and qualitative methodology in analyzing marketing research data (1a, 1b, 2b, 2c).

3. Outline basic sampling procedures involved in marketing research (1a, 1b, 2c, 2d, 2e).

4. Describe the components of a Marketing Information System (MIS) and how solutions are determined with MIS and other technological systems (1a, 1b, 2c, 2d, 2e).

5. Describe the elements of a well-designed questionnaire form and simple research instruments (1a, 1b, 2a, 2b, 2c).

6. Demonstrate an understanding of customer relationships in market-oriented strategic planning for research (1a, 1b, 1c, 2a, 2b).

7. Identify economic, social, legal, and ethical effects of marketing research (1a, 1b, 1c, 2a, 2b).

8. Differentiate global research needs from domestic needs in the challenges of marketing research (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Recognize the principles, practices, and use of multimedia in persuasive communication; establish promotional strategies, goals, and objectives within budget constraints and regulatory agencies; and create a multimedia campaign based on research for a specific product or service.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify components of advertising and how advertising fits into the marketing mix (1a, 1b, 2a, 2c).

2. Analyze the role of planning in advertising and creative advertising techniques (1a, 1b, 2a, 2c).

3. Trace the evolution of the ad agency and forms of agency compensation in the advertising industry (1a, 1b, 1c, 2a, 2b, 2c).

4. Compare and contrast advantages and disadvantages of media alternatives (1a, 1b, 2a, 2c).

5. Differentiate between the creative and technological aspects of an advertisement (1a, 1b, 2c, 2d, 2e).

6. Identify economic, social, and legal effects of advertising (1a, 1b, 1c, 2a, 2b, 2c, 2d).

7. Explain advertising strategies and effective promotional campaigns (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

8. Evaluate global advertising needs from domestic advertising needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Requirements

Requirements
Recommended Prerequisite(s): MRKG-1301 and MRKG-1311

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, the student will be able to:

- Utilize tools to measure and evaluate the effectiveness of digital-marketing campaigns
- Produce a digital media presentation
- Select digital media strategies for various delivery systems
- Examine digital media industry career opportunities

Upon successful completion of this course, students will:

1. Define different types of social media channels, along with key trends in this evolving medium (1a, 1b, 2a, 2c, 2d).
2. Demonstrate an understanding of how social media impacts the business and social environment (1a, 1b, 2a, 2c, 2d).
3. Understand the challenges and advantages of effective social media marketing (1a, 1b, 2a, 2c, 2d).
4. Identify and describe the various social media platforms available to small businesses (1a, 1b, 2a, 2c, 2d).
5. Develop social media marketing strategy in a small business setting (1a, 1b, 2a, 2b, 2c, 2d).
6. Evaluate the effectiveness of social media on enhancing branding and marketing strategies for the small business (1a, 1b, 2a, 2c, 2d).
7. Evaluate the purpose of various social media platforms (1a, 1b, 2a, 2c, 2d).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class.

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, the student will be able to:

1. Understand CRM Fundamentals
   Explain the purpose and benefits of Customer Relationship Management (CRM) in modern business environments. Identify key concepts, terms, and principles of CRM. Evaluate the role of CRM in improving customer satisfaction, retention, and business performance.
2. Analyze and Select CRM Tools
   Research and compare CRM software solutions based on features, pricing, and organizational needs. Develop a decision matrix to evaluate and select a business's most suitable CRM software. Apply best practices to avoid common CRM implementation mistakes.
3. Design and Implement CRM Strategies

   Create a comprehensive CRM system setup plan, including system architecture, staff training, and resource allocation. Develop strategies for capturing and managing leads through various channels, incorporating email marketing and automation tools.

   Design workflows and campaigns that leverage CRM software to improve marketing efficiency and customer engagement.
4. Organize Customer Data and Personas

   Build customer segmentation frameworks and personas based on data analysis.

   Develop story arcs and buyer journeys that align with customer personas and key touchpoints. Visualize CRM processes and data models using flowcharts or diagrams to ensure system integration and usability.
5. Evaluate CRM System Performance

   Establish performance metrics (KPIs) for CRM systems, including customer satisfaction, lead conversion, and operational efficiency. Collect and analyze feedback from customers and stakeholders to identify areas for improvement.

   Present a detailed evaluation report with actionable recommendations for optimizing CRM performance.
6. Navigate and utilize CRM tools, to build practical CRM skills.

   Demonstrate proficiency in CRM concepts and functionality.
7. Apply CRM to Real-World Scenarios

   Develop practical CRM implementation plans tailored to specific companies or organizations. Use CRM software to manage customer interactions, track leads, and automate marketing efforts. Integrate CRM strategies with project and event management tools to optimize business operations.
8. Embrace Continuous Learning and Certification

   Recognize the importance of continuous improvement and learning in CRM practices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class.

Requirements
Required Prerequisite(s): MRKG-1311, MRKG-2370, MRKG-2371, MRKG 2372

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, the student will be able to:

As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

- Gain practical experience in marketing.
- Enhance marketing-related skills.
- Integrate marketing knowledge in the workplace.

Program Competencies
An external learning experience is a competency-based learning experience that enhances lecture and laboratory instruction and is provided at work sites appropriate to the discipline. Time used to present or apply knowledge in a workplace setting is classified as an external learning experience. The integration of knowledge gained through the external experience with previously learned concepts or practices.

Applying Marketing Concepts
Demonstrate how to apply learned marketing principles to actual work situations.

Workplace Skills
Develop and showcasing professional skills in a marketing-related environment.

Integration of Theory and Practice
Showing the ability to combine classroom knowledge with practical experience.

Capstone Experience
Culminating in a capstone project or experience that demonstrates overall competency in marketing.

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

MUSI 1183 - Voice Class

General

Course Key
16172

Course Rubric
MUSI

Course Number
1183

Course Title
Voice Class

Semester Credit Hours
1

Lecture Hours
2

Lab Hours
1

Course Classification
Academic Course Guide Manual (ACGM)

Description
(1-2-1) Class instruction in the fundamentals of singing including breathing, tone production, and diction. Designed for students with little or no previous voice training. Does not apply to a music major degree.

NDTE 1340 - Electromagnetic Testing

General

Course Key
15251

Course Rubric
NDTE

Course Number
1340

Course Title
Electromagnetic Testing

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4) General principles of electromagnetic testing including theory, knowledge, and skills for basic examination; effects of material properties, probe types, calibration standards, and equipment selection.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify electromagnetic equipment, procedures, and applications; demonstrate calibration procedures; evaluate the signals for a basic electromagnetic testing.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate discipline-specific knowledge of equipment, procedures, and applications by
    a. explaining filter effects on rotating reference standards (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of calibration procedures by
    a. generating a Z-curve with Conductivity Standards (1a, 1b, 2c, 2d).
3. Demonstrate the ability to evaluate the signals for a basic Eddy Current examination by
    a. demonstrating liftoff effects (1a, 1b, 2c, 2d);
    b. demonstrating frequency effects (1a, 1b, 2c, 2d);
    c. demonstrating rotational and forward speed effect (1a, 1b, 2c, 2d).

NDTE 1371 - Introduction to Radiation Safety

General

Course Key
15538

Course Rubric
NDTE

Course Number
1371

Course Title
Introduction to Radiation Safety

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
4

Course Classification
Technical Local Need

Description
(3-2-4) This introductory industrial radiography class is tailored for individuals entering the field of industrial radiography. It serves as a fundamental training program to meet the needs of the State 40 Hour Radiation Safety. The course delves into common misconceptions related to industrial radiography, introduces the core principles of industrial radiography, offers insights into the science behind non-destructive testing, and emphasizes the crucial aspects of safety for both workers and the public. The course meets the requirements of the state 40 hours approved safety course, and Level I in accordance with NAS 410, and ASNT-TC-1A.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to calculate the radiation boundaries by
    a. calculating Radiation Area distance (1a, 1b, 2c, 2d);
    b. calculating High Radiation distance (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of radiation effects on the human body by
    a. describing the effects of different types of radiation on the human body (1a, 1b, 2c, 2d);
    b. describing methods of controlling radiation exposure (1a, 1b, 2c, 2d);
    c. calculating the permissible radiation doses for an individual (1a, 1b, 2c, 2d);
    d. explaining how to monitor radiation exposure levels (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of different types of radiation and how they occur by
    a. explaining how radioactive isotopes emit radiation (1a, 1b, 2c, 2d);
    b. explaining how X-Ray tubes generate radiation (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of safe handling of radioactive materials by
    a. explaining the various methods of detecting radiation (1a, 1b, 2c, 2d);
    b. demonstrating the use of a survey meter (1a, 1b, 2c, 2d, 2e);
    c. demonstrating a gamma radiation exposure (1a, 1b, 2c, 2d);
    d. demonstrating an X-Ray exposure (1a, 1b, 2c, 2d).
5. Demonstrate an understanding of handling and processing techniques for various film types by
    a. processing film using a film processor (1a, 1b, 2c, 2d);
    b. processing film manually (1a, 1b, 2c, 2d);
    c. processing digital film (1a, 1b, 2c, 2d).
6. Demonstrate an understanding of equipment startup procedures by
    a. performing X-Ray machine warm up techniques (1a, 1b, 2c, 2d).
7. Demonstrate the ability to perform exposure times calculations by
    a. performing an exposure time calculation for a Gamma source (1a, 1b, 2c, 2d);
    b. performing an exposure time calculation for an X-Ray source (1a, 1b, 2c, 2d).

NDTE 1372 - Intro to NDT/NAS Codes and Standards

General

Course Key
13833

Course Rubric
NDTE

Course Number
1372

Course Title
Introduction to NDT/NAS Codes and Standards

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Technical Local Need

Description
(3-3-0) Overview on the theory and principles of NDT testing methods to include Liquid Penetrant, Magnetic Particle, Radiographic, Eddy Current, and Ultrasonic. An extensive review of the Codes & Standards that apply to aviation and other industries.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of each NDT Method and how it is performed by
    a. explaining the theory of each NDT method (1a, 1b, 2c, 2d);
    b. explaining the basic operating procedures for each NDT method (1a, 1b, 2c, 2d).
2. Demonstrate an understanding of ASNT SNT-TC-1A and NAS410 by
    a. identifying the differences between SNT-TC-1A and NAS410 (1a, 1b, 2c, 2d);
    b. identifying which industries require each standard and why (1a, 1b, 2c, 2d);
    c. identifying the governing bodies for each standard (1a, 1b, 2c, 2d).
3. Demonstrate an understanding of Standards, Inspection Procedures, Service Manuals, Service Bulletins, Airworthy Directives and their development by
    a. identifying the issuing entity of a written instruction (1a, 1b, 2c, 2d);
    b. identifying the parts of a written instruction (1a, 1b, 2c, 2d);
    c. identifying the component and process to be performed (1a, 1b, 2c, 2d).
4. Demonstrate an understanding of the Vision Examination requirements required to perform NDT inspections by
    a. explaining the vision requirements for NDT technicians (1a, 1b, 2c, 2d);
    b. explaining how the Vision Examination is performed (1a, 1b, 2c, 2d).
5. Demonstrate the ability to implement auditing and documentation practices and verify traceability to the appropriate standard by
    a. identifying the necessary documentation for a report (1a, 1b, 2c, 2d);
    b. verifying that all documentation is correct by cross checking (1a, 1b, 2c, 2d).

NDTE 1405 - Introduction to Ultrasonics

General

Course Key
13714

Course Rubric
NDTE

Course Number
1405

Course Title
Introduction to Ultrasonics

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
6

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-6) Basic theory and applications of the ultrasonic techniques of materials testing covering the theoretical material from the certification test for Ultrasonic Level I American Society of Non-Destructive Testing.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the characteristics of metal with ultrasonic tests; outline the procedure for conducting ultrasonic tests; conduct a straight and angle beam examination; and conduct an ultrasonic test on metal samples. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the characteristics of metal with ultrasonic tests by
    a. determining the sound velocity of a sample using longitudinal, refracted longitudinal, and shear waves (1a, 1b, 2a, 2c, 2d, 2e);
    b. calculating the skip distance and leg length using refracted angle beam (1a, 1b, 2a, 2c, 2d, 2e);
    c. comparing a sample metal to a known reference standard (1a, 1b, 2a, 2c, 2d, 2e).
2. Demonstrate the procedure for conducting ultrasonic tests by
    a. preparing a part for inspection (1a, 1b, 2a, 2c, 2d, 2e);
    b. calibrating the inspection system (1a, 1b, 2a, 2c, 2d, 2e);
    c. performing the inspection (1a, 1b, 2a, 2c, 2d, 2e);
    d. documenting the test results (1a, 1b, 2a, 2c, 2d, 2e).
3. Conduct a straight and angle beam examination by
    a. determining the appropriate examination type (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying the equipment and standards required (1a, 1b, 2a, 2c, 2d, 2e);
    c. performing the inspection (1a, 1b, 2a, 2c, 2d, 2e);
    d. documenting the inspection results (1a, 1b, 2a, 2c, 2d, 2e).
4. Conduct an ultrasonic test on metal samples by
    a. determining the appropriate examination type (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying the equipment and standards required (1a, 1b, 2a, 2c, 2d, 2e);
    c. performing the inspection (1a, 1b, 2a, 2c, 2d, 2e);
    d. documenting the inspection results (1a, 1b, 2a, 2c, 2d, 2e).

NDTE 1410 - Liquid Penetrant/Magnetic Particle Test

General

Course Key
13715

Course Rubric
NDTE

Course Number
1410

Course Title
Liquid Penetrant/Magnetic Particle Testing

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3) A theoretical study and practical application of the non-destructive testing techniques of penetrant and magnetic particle testing required by quality assurance and test personnel including proper test technique, or combination of techniques and interpretation, evaluation of test results.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and select proper materials and equipment to perform a liquid penetrant test of a weldment; interpret the results of a liquid penetrant test to ascertain acceptability of the weldment; describe safety precautions relative to fire and toxic hazards; and identify and properly select equipment used in magnetic particle testing. Describe the principles of magnetic particle, magnetic fields, and the current requirements for testing and demagnetization; perform a magnetic particle examination on a weldment, following established procedures; and interpret the results of a magnetic particle test to ascertain acceptability of the weldment. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe safety precautions relative to fire and toxic hazards by
    a. demonstrating safe work habits in a lab situation (1b, 2c).
2. Demonstrate an understanding of the proper materials, equipment, and procedures used to perform a liquid penetrant test of a weldment or component by
    a. identifying the proper materials to be used in a liquid penetrant test (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying the proper equipment to be used in a liquid penetrant test (1a, 1b, 2a, 2c, 3d, 3e);
    c. explaining required process controls (1a, 2c, 2d, 2e);
    d. demonstrating proper surface preparation (2a, 2c, 2d, 2e);
    e. demonstrating proper application of inspection media (2a, 2c, 2d, 2e);
    f. demonstrating correct post inspection processing (1a, 1c, 2d, 2e).
3. Demonstrate proficiency in interpreting the results of a liquid penetrant test to ascertain acceptability of the weldment or component by
    a. describing the different types of indications possible (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying and describing common indications (1a, 1b, 2a, 2c, 2d, 2e);
    c. comparing the indication to the acceptance criteria of the standard in order to correctly determine acceptability or non-acceptability (1a, 1c, 2d, 2e).
4. Describe the principles of magnetic particle, magnetic fields, and the current requirements for testing and demagnetization by
    a. demonstrating establishment of a magnetic field of proper strength in a part (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the orientation of a magnetic field within a part (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining the field produced by each magnetizing method (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate an understanding of the equipment used in magnetic particle testing by
    a. identifying the proper materials to be used in a magnetic particle test (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying the proper equipment to be used in a magnetic particle test (1a, 1b, 2a, 2c, 2d, 2e);
    c. explaining required process controls (2a, 2c, 2d, 2e);
    d. demonstrating proper surface preparation (2a, 2c, 2d, 2e);
    e. demonstrating proper application of inspection media (2a, 2c, 2d, 2e);
    f. demonstrating correct post inspection processing (1a, 1c, 2d, 2e).
6. Demonstrate proficiency in performing a magnetic particle examination on a weldment or component following established procedures by
    a. identifying and correctly recording indications on a weldment (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying and correctly recording indications on a component (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate proficiency in interpreting the results of a magnetic particle test to ascertain acceptability of the weldment or component by
    a. describing the different types of indications possible (1a, 1b, 2a, 2c, 2d, 2e);
    b. identifying and describing common indications (1a, 1b, 2a, 2c, 2d, 2e);
    c. comparing the indication to the acceptance criteria of the standard in order to correctly determine acceptability or non-acceptability (1a, 1c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Write an ultrasonic test procedure to a code or standard; demonstrate the effects of test-piece shapes, grain structure, types of discontinuities, and how their orientation affects ultrasonic testing; use transducers, couplings, reference blocks, and instrument controls in the testing procedure; perform maintenance checks on instruments to assure accuracy; map transducer fields and test gain control; check resolution and calibrate sensitivity. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of inspection procedures by
    a. generating an inspection procedure when given the part and a standard to inspect it to (1a, 1b, 2c, 2d, 2e).
2. Demonstrate an understanding of the effects of test-piece shapes, grain structure, types of discontinuities, and how their orientation affects ultrasonic testing by
    a. performing an inspection on parts with various shapes to learn the effect part shape has on the sound beam (1a, 1b, 2c, 2d, 2e);
    b. performing an inspection on parts with various grain size (1a, 1b, 2c, 2d, 2e);
    c. explaining how different flaws and their orientation to the sound beam affect the display (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to use transducers, couplings, reference blocks, and instrument controls in the testing procedure by
    a. conducting an inspection from initial set up (1a, 1b, 2c, 2d, 2e).
4. Demonstrate the ability to perform maintenance checks on instruments to assure accuracy, map transducer fields, and test gain control; check resolution and calibrate sensitivity by
    a. demonstrating a vertical linearity check (1a, 1b, 2c, 2d, 2e);
    b. demonstrating a horizontal linearity check (1a, 1b, 2c, 2d, 2e);
    c. demonstrating an amplifier check (1a, 1b, 2c, 2d, 2e);
    d. performing a beam width measurement (1a, 1b, 2c, 2d, 2e);
    e. demonstrating a resolution check (1a, 1b, 2c, 2d, 2e);
    f. performing a sensitivity calibration using various calibration standards (1a, 1b, 2c, 2d, 2e).

NDTE 2473 - Industrial Radiography

Required Prerequisite(s): NDTE 1371

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to calculate various geometric factors present on radiographs by
    a. calculating geometric lack of sharpness (1a,1b, 2c, 2d, 2e);
    b. demonstrating the effects of changing the source to film distance (1a,1b, 2c, 2d, 2e);
    c. demonstrating the effects of changing the focal spot size (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to determine proper radiograph set up by
    a. demonstrating locations for placing identification (1a,1b, 2c, 2d, 2e);
    b. demonstrating location marker placement (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to identify flaws in a radiograph by
    a. evaluating radiographs of a casting (1a,1b, 2c, 2d, 2e);
    b. evaluating radiographs of a weld (1a,1b, 2c, 2d, 2e);
    c. evaluating radiographs of an aircraft structure (1a, 1b, 2c, 2d, 2e).
4. Demonstrate the ability to determine correct identification of radiographs by
    a. demonstrating radiograph identification techniques (1a, 1b, 2c, 2d, 2e);
    b. demonstrating correct data in the radiograph identification (1a, 1b, 2c, 2d, 2e).
5. Demonstrate the ability to determine if the radiograph meets the quality requirements by
    a. demonstrating proper film density measurement (1a,1b, 2c, 2d, 2e);
    b. demonstrating proper IQI sensitivity and placement (1a,1b, 2c, 2d, 2e);
    c. demonstrating film density measurement (1a, 1b, 2c, 2d, 2e).

NDTE 2474 - Emerging Technologies in NDTE

NDTE

Course Number
2474

Course Title
Emerging Technologies in Nondestructive Techniques

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
4

Course Classification
Technical Local Need

Description
(4-2-4) A study in advanced techniques for nondestructive testing and inspection of aircraft and components to include metallic and composite structures. Includes shearography, phased array and other emerging methods.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify defects in composite structures utilizing images produced using Laser Shearography by
    a. describing how to produce a Shearography image (1a, 1b, 2c, 2d, 2e);
    b. identifying unacceptable conditions in a Shearography image (1a, 1b, 2c, 2d, 2e);
    c. demonstrating knowledge of defects in a composite structure (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the calibration of MIA equipment and identify defects by
    a. identifying the proper MIA mode to use for a structure (1a, 1b, 2c, 2d, 2e);
    b. demonstrating calibration techniques on a calibration standard (1a, 1b, 2c, 2d, 2e);
    c. identifying defects in a composite structure (1a, 1b, 2c, 2d, 2e).
3. Demonstrate the ability to set up Acoustic Emission equipment and interpret results from structures by
    a. identifying locations for probe placement (1a, 1b, 2c, 2d, 2e);
    b. describing stress application techniques (1a, 1b, 2c, 2d, 2e);
    c. evaluating a nonmetallic structure using Acoustic Emission (1a, 1b, 2c, 2d, 2e);
    d. evaluating a metallic structure using Acoustic Emission (1a, 1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify flaw characteristics on various Eddy Current presentations by
    a. demonstrating the setup and calibration of an inspection system (1a, 1b, 2c, 2d, 2e);
    b. demonstrating a flaw signal from a surface indication (1a, 1b, 2c, 2d, 2e);
    c. demonstrating a flaw signal from a sub-surface flaw (1a, 1b, 2c, 2d, 2e);
    d. identifying flaws on various displays (1a, 1b, 2c, 2d, 2e).
2. Demonstrate the ability to identify the required information for an Eddy Current inspection procedure by
    a. writing a procedure having all of the required information to perform the inspection (1a, 1b, 2c).
3. Determine component acceptability to a procedure by
    a. demonstrating the comparison of a flaw's components to an inspection procedure acceptance criteria (1a, 1b, 2c).
4. Demonstrate the ability to perform an Eddy Current system check and calibration by
    a. completing an initial equipment setup and calibration in preparation for performing an inspection (1a, 1b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Maintain and operate nuclear medicine equipment (1a, 1b, 2a, 2b, 2c, 2e).
2. Maintain and operate auxiliary nuclear medicine equipment (1a, 1b, 2a, 2b, 2c, 2e).
3. Provide proper and appropriate nursing care during nuclear medicine procedures (1a, 1b, 1c, 2a, 2b, 2c, 2e).
4. Communicate effectively with the patient, patient's family, and staff (1a, 1b, 1c, 2a, 2b, 2c).
5. Provide safe and sanitary conditions (1a, 1b, 2a, 2b, 2c, 2e).
6. Recognize and respond to emergency conditions (1a, 1b, 1c, 2a, 2b, 2c, 2e).
7. Obtain pertinent patient history (when appropriate) and check procedural contraindications (1a, 1b, 2a, 2b, 2c).
8. Prepare the patient for their procedure (1a, 1b, 2a, 2b, 2c).
9. Select and administer the appropriate radiopharmaceutical via the proper route (1a, 1b, 2a, 2b, 2c).
10. Prepare proper equipment, computer, and auxiliary equipment and acquire images as indicated by protocol (1a, 1b, 2a, 2b, 2c, 2e).
11. Process and evaluate computer-generated data (1a, 1b, 2a, 2b, 2c, 2e).
12. Prepare and perform cardiac monitoring and/or stress testing (1a, 1b, 2a, 2b, 2c, 2e).
13. Prepare/administer interventional pharmacologic agents (1a, 1b, 2a, 2c, 2e).
14. Obtain samples for non-imaging studies (1a, 1b, 2a, 2c, 2e).
15. Calculate and evaluate results on non-imaging studies (1a, 1b, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Summarize the history and development of nuclear medicine; apply basic math and science concepts needed for the application of nuclear medicine in radiation safety and instrumentation; explain the principles and employ the methodologies of radiation safety and health physics; discuss studies and procedures performed in a nuclear medicine clinic. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss the biological effects of radiation (1a, 1b, 2c).
2. Perform laboratory surveys with a G.M. meter (1a, 1b, 2c, 2e).
3. Perform wipe test on area in the laboratory (1a, 1b, 2c, 2e).
4. Discuss NRC and Texas regulations governing the use of byproduct materials (1a, 1b, 2c).
5. Define and calculate TEDE, CDE, & TODE (1a, 1b, 2c).
6. Define and calculate the effect of time, distance, and shielding on radiation exposure (1a, 1b, 2c).
7. Position patients for various nuclear medicine studies (1a, 1b, 2c).
8. Discuss various nuclear medicine studies (1a, 1b, 2c).
9. Perform various patient care skills including IV, blood pressure, and patient transfer exercises (1a, 1b, 2c).
10. Apply and practice Joint Commission Standards in the healthcare environment (1a, 1b, 2c).
11. Apply and practice HIPPA regulations in the healthcare environment (1a, 1b, 2c).
12. Recognize the different information systems used in the healthcare environment and manage patient information appropriately (1a, 1b, 2c).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402, MATH 1314, and CHEM 1405

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the radioactive decay process and the interaction of ionizing radiation with matter and the operation of the electrical components of various radiation detection systems; relate the principles of operation of gas-filled detectors, scintillation detection systems, and liquid scintillation systems; determine a statistically accurate counting rate for a radiation detector; describe and differentiate the various imaging systems including scintillation cameras, multi-crystal cameras, and tomographic imaging systems; and discuss and apply the best quality control measures for continuous quality improvement. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss the interactions of radiation with matter (1a, 1b, 2c).
2. Discuss the operation of gas-filled detectors (1a, 1b, 2c).
3. Discuss the operation of scintillation detection systems (1a, 1b, 2c).
4. Describe the makeup of detection instruments (1a, 1b, 2c).
5. Maintain appropriate instrumentation quality control records to comply with regulatory requirements (1a, 1b, 2c, 2d).
6. Describe and/or perform various instrument calibrations and quality control checks (1a, 1b, 2c, 2d, 2e).
7. Determine the energy resolution on a scintillation detector (1a, 1b, 2c, 2d).
8. Analyze quality control images to determine if scintillation camera is operating satisfactorily (1a, 1b, 2c, 2d, 2e).
9. Assess performance of image recording equipment (1a, 1b, 2c, 2d, 2e).
10. Discuss the interactions of radiation with matter (1a, 1b, 2c, 2d, 2e).
11. Discuss the operation of gas-filled detectors (1a, 1b, 2c, 2d, 2e).
12. Discuss the operation of scintillation detection systems (1a, 1b, 2c, 2d, 2e).
13. Describe the makeup of detection instruments (1a, 1b, 2c, 2d, 2e).
14. Maintain appropriate instrumentation quality control records to comply with regulatory requirements (1a, 1b, 2c, 2d, 2e).
15. Describe and/or perform various instrument calibrations and quality control checks (1a, 1b, 2c, 2d, 2e).
16. Determine the energy resolution on a scintillation detector (1a, 1b, 2c, 2d, 2e).
17. Analyze quality control images to determine if scintillation camera is operating satisfactorily (1a, 1b, 2c, 2d, 2e).
18. Assess performance of image recording equipment (1a, 1b, 2c, 2d, 2e).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Solve problems using the different areas of mathematics applicable to nuclear medicine technology (1a, 1b, 2c).
2. Be familiar with units of measurement used within nuclear medicine physics (1a, 1b, 2c).
3. Diagram the atom and its constituent parts (1a, 1b, 2c).
4. Describe the historical aspects of radioactivity (1a, 1b, 2c).
5. Define radiation (1a, 1b, 2c).
6. Define and explain alpha, beta, and gamma radiations (1a, 1b, 2c).
7. Describe the properties of atoms, molecules, and matter (1a, 1b, 2c).
8. Be able to use a periodic table of the elements and a decay chart (1a, 1b, 2c).
9. Understand the various methods of radiation production and decay (1a, 1b, 2c).
10. Define natural and artificial radioactivity (1a, 1b, 2c).
11. Define average, effective, and physical half lives (1a, 1b, 2c).

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401 and BIOL 2402

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the most common reasons for ordering each study (pathology for which nuclear medicine procedures are of diagnostic value); list clinical findings that are consistent with the suspected pathology; describe the historical and current radiopharmaceuticals used for each study; cite any procedures and/or substances that may interfere with the performance of a valid test; explain any contraindications or adverse reactions associated with the study; and outline any associated patient preparation; specify equipment required for valid performance of the study; summarize the entire test procedure; discuss technical pitfalls associated with the study and methods of preventing and/or correcting technical problems associated with the study; relate possible alterations in the routine procedure; and identify normal and abnormal patterns of radiopharmaceutical distribution on typical studies. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss the anatomy, physiology, and pathology of various organs and/or systems (1a, 1b, 2c).
2. List the main indications for performing in-vivo procedures (1a, 1b, 2c).
3. List and explain the characteristics of radiopharmaceuticals used for various organ and/or system imaging (1a, 1b, 2c).
4. State the preparations for all in-vivo procedures (1a, 1b, 2c).
5. Discuss any procedures and/or substances that may interfere with the performance of a study (1a, 1b, 2c).
6. Discuss any contraindications or adverse reactions associated with a procedure (1a, 1b, 2c).
7. List and describe the equipment and ancillary equipment required to perform procedures (1a, 1b, 2c).
8. Describe the different techniques used to attain data for clinical procedures (including alternate procedures) (1a, 1b, 2c).
9. Set up the instrument correctly to attain in-vivo procedures (1a, 1b, 2c).
10. State the views to be acquired on imaging procedures (1a, 1b, 2c).
11. Recognize abnormal from normal pathology as seen on a nuclear medicine image (1a, 1b, 2c).
12. Explain the various radionuclide treatments available for abnormal pathology (1a, 1b, 2c).
13. Process nuclear medicine procedures (1a, 1b, 2c).

Requirements

Simple Requisites

See course descriptions for prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # TAKE BIOL-2401 BIOL-2402 MATH-1314 CHEM-1405;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402, MATH 1314, and CHEM 1405

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Synthesize professional skills, knowledge and attitudes; demonstrate entry level competencies for professional employment; and demonstrate skills for lifelong learning. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain and outline the concepts of radiation safety and protection (1a, 1b, 2c).
2. Explain and outline all aspects of the use of radiopharmaceuticals (1a, 1b, 2c).
3. Describe the use and operation of instrumentation used in nuclear medicine (1a, 1b, 2c).
4. Describe all of the imaging procedures listed in the task analysis (1a, 1b, 2c).
5. Identify and describe all in-vivo non-imaging studies listed in the task analysis (1a, 1b, 2c).
6. Register for and provide proof of registration for the NMTCB and/or the ARRT examinations (1a, 1b, 1c, 2c).

NMTT 2301 - Radiochemistry and Radiopharmacy

General

Type
Prerequisite

10
A Requirement block where all subrequirements are required

#Take BIOL-2401(12378) BIOL-2402 CHEM-1405 MATH-1314;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402, CHEM 1405, and MATH 1314

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the concepts of radiopharmacy; explain atomic structures and electronic configuration of atoms; describe various methods of radionuclide production and radiolabeling; interpret the mechanism of localization of various radiopharmaceuticals; cite quality control tests of various radiopharmaceuticals; identify radiation safety practices; and relate federal and state regulations governing the use of radiopharmaceuticals. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe methods of radionuclide production and identify the method of production for each of the radionuclides used in the clinical setting (1a, 1b, 2c).
2. Differentiate between diagnostic and therapeutic radiopharmaceuticals, and explain the characteristics of each (1a, 1b, 2c).
3. Explain the concept and process of radiolabeling (1a, 1b, 2c).
4. Describe the purpose and performance of various quality control tests used in the preparation of radiopharmaceuticals, and be able to perform and analyze the required mathematical calculations used in radiopharmacy (1a, 1b, 2c).
5. Explain the various mechanisms of uptake/localization of radiopharmaceuticals (1a, 1b, 2c).
6. Name and explain the use of non-radioactive pharmaceuticals used in specific studies (1a, 1b, 2c).
7. Identify the correct radiopharmaceutical to be used for a given procedure, the proper dose and route of administration, biodistribution, and physical characteristics that contribute to its usage (1a, 1b, 2c).
8. Identify and apply federal and state regulations governing the preparation, transportation, and use of radiopharmaceuticals (1a, 1b, 2c).
9. Identify pertinent information on a package insert from each radiopharmaceutical and non-radioactive pharmaceutical used in clinical practice (1a, 1b, 2c).

NMTT 2313 - Nuclear Medicine Methodology II

Simple Requisites

See course descriptions for prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # TAKE BIOL-2401 BIOL-2402 MATH-1314 CHEM-1405;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402, MATH 1314, and CHEM 1405

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the most common reasons for ordering each study (pathology for which nuclear medicine procedures are of diagnostic value); list clinical findings that are consistent with the suspected pathology; describe the historical and current radiopharmaceuticals used for each study; cite any procedures and/or substances that may interfere with the performance of a valid test; explain any contraindications or adverse reactions associated with the study; and outline any associated patient preparation; specify equipment required for valid performance of the study; summarize the entire test procedure; discuss technical pitfalls associated with the study and methods of preventing and/or correcting technical problems associated with the study; relate possible alterations in the routine procedure; and identify normal and abnormal patterns of radiopharmaceutical distribution on typical studies. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss the anatomy, physiology, and pathology of various organs and/or systems (1a, 1b, 2c).
2. List the main indications for performing in-vivo procedures (1a, 1b, 2c).
3. List and explain the characteristics of radiopharmaceuticals used for various organ and/or system imaging (1a, 1b, 2c).
4. State the preparations for all in-vivo procedures (1a, 1b, 2c).
5. Discuss any procedures and/or substances that may interfere with the performance of a study (1a, 1b, 2c).
6. Discuss any contraindications or adverse reactions associated with a procedure (1a, 1b, 2c).
7. List and describe the equipment and ancillary equipment required to perform procedures (1a, 1b, 2c).
8. Describe the different techniques used to attain data for clinical procedures (including alternate procedures) (1a, 1b, 2c).
9. Set up the instrument correctly to attain in-vivo procedures (1a, 1b, 1c, 2a, 2b).
10. State the views to be acquired on imaging procedures (1a, 1b, 2c).
11. Recognize abnormal from normal pathology as seen on a nuclear medicine image (1a, 1b, 2c).
12. Explain the various radionuclide treatments available for abnormal pathology (1a, 1b, 2c).
13. Process nuclear medicine procedures. (1a, 2c).

Requirements
Recommended Prerequisite(s): NMTT 1309
Required Prerequisite(s): BIOL 2401, BIOL 2402, MATH 1314, CHEM 1405

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the methodology of positron emission tomography and fusion technology; describe radiopharmaceuticals used; specify their patterns of biodistribution; identify instrumentation and quality control measures; and outline associated patient preparation. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the physics on which PET/CT are based, and discuss instrumentation (1a, 1b, 2c).
2. Describe quality control measures (acquisition and analysis) for both PET and CT that insure optimum image quality (1a, 1b, 2c).
3. Discuss the basic concepts of image reconstruction and fusion of images (1a, 1b, 2c).
4. Evaluate reconstructed images as to the quality of the image, and recognize artifacts (1a, 1b, 2c).
5. Name the PET radiopharmaceuticals and the studies they are used in; know how they are produced, physical characteristics, half-life, and method of uptake (1a, 1b, 2c).
6. Explain required preparation and exam information to a patient prior to their arrival (1a, 1b, 2c).
7. Describe in detail all patient care, including administration of the radiopharmaceutical and imaging procedure required to accomplish the study (1a, 1b, 2c).
8. Identify radiation safety issues in the PET/CT environment, and discuss how to achieve ALARA for the technologist and patient (1a, 1b, 2c).
9. Recognize normal and variant biodistribution of PET radiopharmaceuticals on an image (1a, 1b, 2c).

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402, and MATH 1314

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Maintain and operate nuclear medicine equipment (1a, 1b, 2a, 2b, 2c, 2e).
2. Maintain and operate auxiliary nuclear medicine equipment (1a, 1b, 2a, 2b, 2c, 2e).
3. Provide proper and appropriate nursing care during nuclear medicine procedures (1a, 1b, 1c, 2a, 2b, 2c, 2e).
4. Communicate effectively with the patient, patient's family, and staff (1a, 1b, 1c, 2a, 2b, 2c, 2e).
5. Provide safe and sanitary conditions (1a, 1b, 2a, 2b, 2c, 2e).
6. Recognize and respond to emergency conditions (1a, 1b, 1c, 2a, 2b, 2c, 2e).
7. Obtain pertinent patient history (when appropriate) and check procedural contraindications (1a, 1b, 2a, 2b, 2c).
8. Prepare the patient for their procedure (1a, 1b, 1c, 2a, 2b, 2c).
9. Select and administer the appropriate radiopharmaceutical via the proper route (1a, 1b, 2a, 2b, 2c).
10. Prepare proper equipment, computer, and auxiliary equipment and acquire images as indicated by protocol (1a, 1b, 2a, 2b, 2c, 2e).
11. Process and evaluate computer-generated data (1a, 1b, 2a, 2b, 2c, 2e).
12. Prepare and perform cardiac monitoring and/or stress testing (1a, 1b, 2a, 2b, 2c, 2e).
13. Prepare/administer interventional pharmacologic agents (1a, 1b, 2a, 2c, 2e).
14. Obtain samples for non-imaging studies (1a, 1b, 2a, 2c, 2e).
15. Calculate and evaluate results on non-imaging studies (1a, 1b, 2a, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Assist patients with activities of daily living. Utilize appropriate safety measures to prevent patient and self-injury. Assist nursing staff with admission, discharge, transfer, and transport of patients. Obtain and record patients' vital signs, heights, weights, intake and output. Perform basic skills and procedures. Maintain the comfort, privacy and confidentiality, and dignity of each patient. Learning outcomes are linked to SCANS REQUIREMENTS. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Analyze health promotion and injury prevention. (1a, 1b)
2. Describe the role of the patient care technician. (1a, 1b)
3. Describe professionalism and work ethics. (1a, 1b)
4. Demonstrate communication styles with the healthcare team and clients. (1a, 1b)
5. Explain differences in cultural competence, transcultural care and lifespan considerations. (1a, 1b, 2a, 2b)
6. Describe legal aspects of caring for the older adult and elder abuse. (1a, 1b)
7. Describe various methods of pain management. (1a, 1b)
8. Explain the value of comfort, rest and sleep regarding the client in pain. (1a, 1b)
9. Describe asepsis, healthcare-associated infections, and standard precautions. (1a, 1b, 2a, 2b, 2c)
10. Describe client safety, workplace safety, and body mechanics. (1a, 1b)
11. Demonstrate correct moving, positioning, and prevention of falls for clients. (2a, 2b)
12. Demonstrate correct measurement and recording vital signs. (1a, 1b, 2a, 2b, 2c, 2d, 2e)
13. Demonstrate aspects of proper hygiene of the client and bed making. (1a, 1b, 2a, 2b, 2c, 2d, 2e)
14. Assist with grooming and assisting with nutrition. (1a, 1b, 2a, 2b, 2c, 2d, 2e)
15. Demonstrate obtaining and monitoring an electrocardiogram. (1a, 1b, 2a, 2b, 2c, 2d, 2e)
16. Demonstrate blood and specimen collecting. (1a, 1b, 2a, 2b, 2c, 2d, 2e)
17. Explain differences in caring for clients with mental health needs. (1a, 1b)

Required Prerequisite(s): OPTS 1366

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the basic eye examination by
    a. obtaining and properly recording the patient history and visual acuity (2a, 2b, 2c, 2d);
    b. demonstrating proper use and maintenance of instruments in exam room for routine workups, including slit lamp, phoropter, acuity chart, etc. (2a, 2b, 2c, 2d);
    c. identifying proper maintenance and stocking of examination room, including ocular medications used in the routine examination (2a, 2b, 2c);
    d. reviewing and demonstrating proper charting in the electronic medical record (2a, 2b, 2c, 2d, 2e).
2. Demonstrate proper communication and use of diagnostic instruments by
    a. utilizing proper technique and identifying normal parameters for the following ophthalmic instruments used for diagnostic testing: such as the automated visual field, retinoscopy & refraction, motility, pupil assessment and tonometry (2a, 2b, 2c, 2d);
    b. explaining purpose of diagnostic testing performed during the eye examination (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. properly documenting ocular measurements and findings (2a, 2b, 2c);
    d. enhancing communication skills with clinic staff, physicians, and patients (1a, 1b, 1c).

(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): OPTS 1311

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Discuss the history of optics; describe the nature of the electromagnetic spectrum and the light relationship of colors and energy levels to wave lengths; calculate for image size, position, nature, and orientation using the thin lens formulas; and calculate for and trace light rays as they pass through prisms and lenses. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of optical results in the eye by
    a. identifying the optical structures that are responsible for good vision (1a, 1b, 1c, 2a, 2b, 2c);
    b. explaining accommodation and the effects of aging to the optical system of the eye (2b, 2c);
    c. recognizing the relationship between magnification using lenses for improving vision (2a, 2b, 2c);
    d. reviewing the effect of prisms and Prentice's Rule for vision assessment (2a, 2b, 2c, 2d).
2. Demonstrate knowledge of diagnostic testing to improve optical results for the patient by
    a. explaining refractive errors and methods to neutralize them (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. explaining purpose of diagnostic testing performed to assess vision during the eye examination (2a, 2b, 2c);
    c. analyzing induced prism via Prentice's Rule (2c, 2d, 2e);
    d. identifying appropriate lens needed to neutralize refractive errors (2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Describe the sense of vision, the development of the human eye from conception; define the major anatomical parts of the eye, the adnexa, and the visual system. Define and discuss refractive errors, disorders, diseases of the eye and their causes and treatments; list and describe various tests performed by ophthalmic personnel, instruments and devices utilized to facilitate the detection of ocular diseases and disorders.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe ocular structures by
    a. identifying the anatomy and its function in the eye (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. summarizing frequently diagnosed eye diseases affecting ocular anatomy (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate understanding of ocular testing and diagnostic instruments by
    a. demonstrating proper use of the slit lamp for viewing the anterior segment of the eye, and identifying the parts of the slit lamp (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. performing visual acuity testing (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. discussing additional ancillary testing such as: confrontational visual fields, stereo testing, color vision testing, and pupil assessment (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate effective communication skills by
    a. discussing eye diseases affecting ocular anatomy (1a, 1b, 2a, 2b, 2c);
    b. instructing peers or volunteer patients for ocular measurements and assessments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. properly documenting ocular measurements and findings (1a, 1b, 1c, 2a, 2b, 2c).
4. Demonstrate empirical and quantitative skills by
    a. utilizing instruments for evaluating ocular anatomy (1a, 1b, 2a, 2b, 2c);
    b. analyzing results of ocular assessments for risk factors (2a, 2b, 2c, 2d).
5. Demonstrate critical thinking skills by
    a. properly adjusting illumination and light on the slit lamp for viewing the eye (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. assessing ocular function via confrontational visual fields, stereo testing, color vision testing, and pupil assessment (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying normal versus abnormal results or findings on ocular examination and testing (2a, 2b, 2c, 2d).

OPTS 1315 - Basic Contact Lenses

14744

Course Rubric
OPTS

Course Number
1315

Course Title
Basic Contact Lenses

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
1

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-1) Introduction to contact lens theory and practice. Topics include the history, development, and manufacture of contact lenses; lens materials, designs, fitting, and care techniques; as well as skills necessary for the accurate measurement of lens parameters. This course will also introduce and compare similar concepts of spectacles. Required Prerequisite(s): OPTS-1311

Required Prerequisite(s): OPTS 1311

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: List major contributors, materials, and designs involved in the historical development of contact lenses; describe basic contact lens design and terminology; utilize contact lens instruments, tools, and gauges to determine lens parameters; list general fitting requisites, philosophies, rules for fitting contact lenses; and apply proper techniques to clean, disinfect, and sterilize contact lenses.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Review the origin of spectacles and contact lenses by
    a. describing the basic lens design for spectacles and contact lenses for single vision and multifocal options available (2a, 2b, 2c);
    b. defining key terms related to spectacles and contact lenses for the eye clinic and listing the required information for ordering contacts and spectacles (2a, 2b, 2c).
2. Demonstrate use of ophthalmic instruments used for assessment of contact lenses and spectacles by
    a. identifying proper techniques to clean and disinfect contact lenses, and instructing patients in personal care and use of contacts and spectacles (2a, 2b, 2c, 2d);
    b. demonstrating proper technique and identifying normal parameters for the ophthalmic instruments used for diagnostic testing, such as the lensometer, keratometer, slit lamp, etc. (2a, 2b, 2c, 2d, 2e).
3. Demonstrate effective communication skills by
    a. explaining purpose of diagnostic testing performed during the eye examination and/or selection of diagnostic contact lenses or spectacles (2b, 2c, 2d);
    b. properly documenting ocular measurements and findings (1a, 1b, 1c, 2a, 2b, 2c);
    c. communicating proper techniques to clean and disinfect contact lenses and to care for contact and spectacle lenses (2b, 2c).
4. Demonstrate empirical and quantitative skills by
    a. utilizing instruments for evaluating ocular anatomy and ocular functions (1a, 1b, 1c, 2a, 2b, 2c);
    b. analyzing results of ocular assessments for diagnostic lens options (1a, 1b, 1c, 2a, 2b, 2c, 2d).
5. Demonstrate critical thinking skills by
    a. applying proper technique to achieve accurate results during the eye exam (2a, 2b, 2c, 2d);
    b. identifying normal versus abnormal results or findings on ocular examination and testing (1a, 1b, 1c, 2a, 2b, 2c, 2d).

OPTS 1319 - Vision Care Office Procedures

General

Course Key
14745

Course Rubric
OPTS

Course Number
1319

Course Title
Vision Care Office Procedures

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Overview of procedures used in an optical, optometric, or ophthalmological, office. Instruction on government, third party, and other managed care insurance claim forms, maintenance of patient records, safety regulations, correspondences and ethics. An overview of procedures used in an eye clinic including pediatric vision screening will be covered.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Identify attitudes and values that contribute to effective work habits and customer service; process, store, and retrieve patient files/records; list and complete various government and other insurance claim forms; describe local, state, and national safety regulations applicable to the industry; and discuss legality of correspondences and appropriate professional conduct and ethics.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of pharmacology treatment options for ocular conditions and ocular effects due to systemic medications by
    a. describing the reason for treatment of patients with drops, ointment, and oral medications for specific conditions (2a, 2b, 2c);
    b. identifying systemic medications that can have a secondary ophthalmic effect (2a, 2b, 2c);
    c. instilling eye drops into the eyes of patients without injury or contamination (1a, 1b, 1c, 2a, 2b, 2c).
2. Identify important legal and ethical responsibilities in the eye clinic by
    a. reviewing medical law, economics, and medical ethics including HIPAA and the relationship of the patient and physician (1a, 1b, 1c, 2a, 2b, 2c);
    b. describing workplace safety and the role of OSHA and CDC (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Perform ophthalmic clinical skills by
    a. performing pediatric vision screening (1a, 1b, 1c, 2a, 2b, 2c);
    b. administering ancillary ophthalmic diagnostic testing and demonstrating use of the slit lamp, demonstrating proper steps for eye drop instillation, identifying vital signs and normal values, using proper ophthalmic abbreviations, and conducting triage for the eye clinic (1a, 1b, 1c, 2a, 2b, 2c, 2d).
4. Demonstrate effective communication skills for the eye clinic by
    a. explaining purpose of ocular medications (1a, 1b, 1c, 2a, 2b, 2c);
    b. instructing peers or volunteer patients for instillation of eye drops and for obtaining vital signs (1a, 1b, 1c, 2a, 2b, 2c);
    c. documenting ocular measurements and findings properly (1a, 1b, 1c, 2a, 2b, 2c, 2d).
5. Demonstrate proper use of instrumentation for the eye clinic by
    a. utilizing instruments for evaluating ocular anatomy and vital signs (2a, 2b, 2c);
    b. analyzing results of ocular assessments for risk factors (including pediatric vision screening) (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. applying proper safety protocol for eye drop instillation (2a, 2b, 2c);
    d. identifying normal versus abnormal results or findings on ocular examination and testing (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify elements of the routine eye exam by
    a. determining the elements of a complete patient history and properly documenting them (2a, 2b, 2c, 2d, 2e);
    b. obtaining and properly recording visual acuity (2a, 2b, 2c);
    c. identifying ophthalmic equipment and ocular medications used in the routine examination (2a, 2b, 2c);
    d. recognizing abbreviations used in the electronic medical record (2a, 2b, 2c, 2d, 2e).
2. Utilize instruments for evaluating ocular anatomy and ocular functions by
    a. demonstrating proper technique and identifying normal parameters for ophthalmic instruments used for diagnostic testing, such as the automated visual field, retinoscopy & refraction, motility, pupil assessment, and tonometry (2a, 2b, 2c);
    b. applying proper technique to achieve accurate results during the eye exam (2a, 2b, 2c, 2d).
3. Demonstrate effective communication skills by
    a. explaining purpose of diagnostic testing performed during the eye examination (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. properly documenting ocular measurements and findings (2a, 2b, 2c, 2d);
    c. enhancing communication skills observation with clinic staff (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of common eye diseases and ocular conditions by
    a. defining frequently encountered eye diseases involving ocular anatomy, and identifying the various types of glaucoma (2a, 2b, 2c);
    b. describing ocular manifestations seen in common systemic diseases (2a, 2b, 2c).
2. Recognize the importance of proper chart documentation by reviewing complete documentation of the ocular examination for billing and coding (2a, 2b, 2c, 2d, 2e).
3. Identify special testing conducted in the eye clinic by
    a. reviewing special ophthalmic testing such as ophthalmic imaging and photography, biometry, and supplementary tests (2a, 2b, 2c);
    b. conducting appropriate special testing procedures as needed based on ocular signs and symptoms (1a, 1b, 1c, 2a, 2b, 2c).

Required Prerequisite(s): OPTS 1315

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Utilize fitting criteria to evaluate the fit of soft, rigid, spherical, toric, and multi-focal contact lenses; use and match lens care and storage solutions with the proper contact lens material and symptomatology; recognize symptomatology of adverse contact lens wear and explain refitting techniques for these conditions; explain therapeutic and cosmetic contact lens application; describe problematic concerns and solutions associated with conditions such as aphakia and keratoconus.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of contact lens options and care by
    a. explaining contact lens types, wearing schedules, and care systems (2a, 2b, 2c);
    b. identifying contact lens options based on patient history (2a, 2b, 2c);
    c. reviewing surgical options to improve refractive status (2a, 2c).
2. Demonstrate knowledge of contact lens fitting by
    a. performing keratometry and properly recording measurements (2a, 2b, 2c, 2d);
    b. calculating proper contact lens prescription from the manifest refraction (2a, 2b, 2c, 2d);
    c. selecting the appropriate base curve based on the keratometry measurement (2a, 2b, 2c, 2d);
    d. determining proper fit of contact lens and documenting findings (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate effective communication skills during contact lens fitting by
    a. explaining proper installation and removal of contacts (2a, 2b, 2c);
    b. providing instruction on proper care of contact lenses (2a, 2b, 2c);
    c. reviewing follow up process for contact lens patients (2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Use proper patient care skills to communicate information and to solicit pertinent information; obtain and record patients' information to complete an accurate medical history; perform various diagnostic tests using ophthalmic equipment and instruments to assist the eye practitioner in assessing visual abnormalities; and assist the eye practitioner in the performance of eye examinations and treatments.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Obtain accurate information for the eye exam by
    a. identifying the elements of the basic eye exam (2a, 2b, 2c);
    b. demonstrating the ability to obtain accurate measurements for the basic eye exam (1a, 1b, 1c, 2a, 2b, 2c);
    c. properly obtaining a complete history (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Review and perform ancillary tests conducted in the eye clinic by
    a. obtaining ancillary test results for Amsler grid, color vision, etc. (2a, 2b, 2c);
    b. explaining the importance of visual field testing and assessment of the patient for both glaucoma and neurological exams (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying vital signs and normal values (2a, 2b, 2c);
    d. applying proper technique to achieve accurate results during the eye exam (2a, 2b, 2c);
    e. identifying normal versus abnormal results for findings on ocular examination and testing (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate effective communication skills by
    a. explaining purpose of diagnostic testing performed during the eye examination (2a, 2b, 2c);
    b. asking appropriate questions to complete a through patient history (1a, 1b, 1c, 2a, 2b, 2c);
    c. using proper ophthalmic abbreviations (2a, 2b, 2c);
    d. identifying triage tiers for the eye clinic (2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Perform required diagnostic procedures demonstrating various methods in obtaining end results; exhibit skills in therapeutic assisting in the management of the diagnostic patient; utilize principles and calculate outcomes; document diagnostic test results and coding.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of ophthalmic diagnostic testing and procedures by
    a. determining patient's refractive correction using retinoscopy and refraction skills (2a, 2b, 2c);
    b. explaining the importance of visual field testing and assessment to the patient for both glaucoma and neurological evaluations (2a, 2b, 2c, 2d);
    c. explaining advanced ophthalmic diagnostic tests and when used (2a, 2b, 2c, 2d);
    d. recognizing minor surgery setup procedure and identifying the steps to process pathology (2a, 2b, 2c);
    e. demonstrating proper technique and identifying normal parameters for the following ophthalmic instruments used for diagnostic testing, such as the automated visual field, retinoscopy & refraction, motility, pupil assessment, and tonometry (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate effective communication in the eye clinic by
    a. explaining purpose of diagnostic testing performed during the eye examination (2a, 2b, 2c);
    b. properly documenting ocular measurements and findings (2a, 2b, 2c, 2d);
    c. enhancing communication skills via resume development and interview preparation (1a, 1b, 1c).
3. Utilizing critical thinking skills in the eye clinic by
    a. applying proper technique utilizing ophthalmic instrumentation to achieve accurate results during the eye exam (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. identifying normal versus abnormal results or findings on ocular examination and testing (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: Scrub, prep a patient, and set up surgical trays for various surgical procedures; identify ophthalmic diagnostic and surgical instruments used in ophthalmic surgery; gown, glove, and identify areas of sterilization in an operating room setting; and assist the eye physician in the performance of preoperative tests.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of ophthalmic procedures by
    a. explaining pre-operative or pre-procedure protocol to prepare room and patient for procedure (2a, 2b, 2c, 2d);
    b. participating in informed consent process as a witness (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. assisting with setup, procedure, and sterilizing of instruments following procedure (2a, 2b, 2c, 2d);
    d. scheduling pre-operative and post-operative appointments and obtaining necessary measurements prior to procedure (2a, 2b, 2c, 2d).
2. Recognize safe practices for ophthalmic procedures by
    a. maintaining surgical asepsis and universal precautions (1a, 1b, 1c, 2a, 2b, 2c);
    b. defining hazardous and bio-hazardous waste and describing acceptable methods for waste disposal (2a, 2b, 2c);
    c. identifying when sterile technique is or is not met (1a, 1b, 1c, 2a, 2b, 2c);
3. Identify common ophthalmic procedures by reviewing common set up for ophthalmic procedures, instruments, and post-procedure protocols (2a, 2c).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate basic eye exam workup and documentation by
    a. determining the patient's refractive correction using retinoscopy and refraction (2a, 2b, 2c, 2d);
    b. performing properly visual field testing via automated and manual methods and documenting findings (2a, 2b, 2c, 2d);
    c. obtaining intraocular pressure measurement using applanation tonometry methods (2a, 2b, 2c, 2d);
    d. developing efficient basic workup process including documentation in the patient chart/electronic medical record (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. demonstrating proper technique and identifying normal parameters for the ophthalmic instruments used for diagnostic testing such, as the automated visual field, retinoscopy & refraction, motility, pupil assessment, and tonometry (2a, 2b, 2c, 2d).
2. Demonstrate effective communication skills by
    a. explaining purpose of diagnostic testing performed during the eye examination (1a, 1b, 1c, 2a, 2b, 2c);
    b. properly documenting ocular measurements and findings (1a, 1b, 1c, 2a, 2b, 2c);
    c. providing appropriate communication with clinic staff and patients (2a, 2b).
3. Demonstrate common diagnostic testing performed in the eye clinic by
    a. utilizing instruments for evaluating ocular anatomy and ocular functions (2a, 2b, 2c);
    b. analyzing results of ocular assessments for diagnostic testing (1a, 1b, 1c, 2a, 2b, 2c);
    c. applying proper technique to achieve accurate results during the eye exam and identifying normal versus abnormal results or findings on ocular examination and testing (1a, 1b, 1c, 2a, 2b, 2c).

OPTS 2367 - Clinic Practicum IV

OPTS	2367	Clinic Practicum IV

Semester Credit Hours	Lecture Hours	Lab Hours
3	0	21

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-0-21) Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This course will be a continuation of previous clinical experiences in patient care. Students will begin to develop autonomy in patient care, and basic skills will become more advanced. Additional training and observation in the following skill areas will also include: contact lens fitting & evaluation, ophthalmic photography & imaging, biometry, ocular motility, and minor procedures. Required Prerequisite: OPTS-2366

Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # Take OPTS-2366;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): OPTS 2366

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Standards from the International Council on Accreditation.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Obtain ocular measurements and properly document results by
    a. identifying proper technique for the following: contact lens fitting and evaluation, ophthalmic photography and imaging, biometry, and ocular motility (2a, 2b, 2c);
    b. demonstrating proper technique and identifying normal parameters for ophthalmic instruments used for diagnostic testing, such as the automated visual field, retinoscopy and refraction, motility, pupil assessment, and tonometry (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. communicating effectively by explaining purpose of diagnostic testing performed during the eye examination and properly documenting ocular measurements and findings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate proper care of ophthalmic instruments by
    a. demonstrating proper calibration, maintenance, and disinfection of the exam room and ophthalmic instruments (2a, 2b, 2c);
    b. recognizing proper preparation for minor ophthalmic procedures (2a, 2b, 2c, 2d).

OSHT 1305 - OSHA Regulations-Construction

General

Course Key
8007

Course Rubric	Course Number	Course Title
OSHT	1305	OSHA Regulations -Construction Industry

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). A study of Occupational Safety and Health Administration (OSHA) regulations pertinent to the construction industry.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the OSHA regulations, which apply to the construction industry; and demonstrate proficiency in retrieving specific information from Title 29 C.F.R. Part 1926 regulations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge and practice the safety/health issues and problems in the professional world (1a, 1b, 2c).
2. Show awareness of teamwork and individual problem solving (1a, 1b, 2a, 2b).
3. Demonstrate application of rules, standards, policies, and regulations directly related to safety/health fields (1a, 1b, 2a, 2c, 2e).
4. Show evidence of expertise and work philosophy consistent with that found in the approved subject matter (1a, 1b, 2a, 2c, 2e).
5. Show success in the assigned tasks in accordance with standard practice in the field (1a, 1b, 2a, 2c, 2e).

OSHT 1313 - Accident Prevention/Inspection/Investig

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the components of an effective accident investigation; analyze factors which contributed to accidents; recommend appropriate changes to prevent further accidents; and explain the components of an effective safety inspection and make appropriate recommendations to correct hazards identified by the inspection.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of safety/health issues and the topics presented by
    a. discussing the practice of safety/health issues and related problems in the professional world (1a, 1b, 2a, 2b, 2c);
    b. promoting the student's awareness of teamwork and individual problem solving (1a, 1b, 2a, 2b, 2c);
    c. practicing the application of rules, standards, policies, and regulations directly related to safety/health fields (1a, 1b, 2a, 2b, 2c);
    d. demonstrating expertise and work philosophy consistent with that found in the approved subject matter (1a, 1b, 2a, 2b, 2c);
    e. demonstrating success in the assigned tasks in accordance with standard practice in the field (1a, 1b, 2a, 2b, 2c).

OSHT 2309 - Safety Program Management

General

Course Key
8011

Course Rubric	Course Number	Course Title
OSHT	2309	Safety Program Management
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Examine the major safety management issues that affect the workplace including safety awareness, loss control, regulatory issues, and human behavior modification.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop and implement safety program; describe risk assessment or cost benefit analysis; summarize the basic components of human behavior modification; apply the components of the safety audit process including record keeping requirements.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of how to develop and implement a safety program; describe cost benefit analysis; summarize the basic components of human behavior modification; apply the components of the safety audit process including record keeping requirements by
    a. defining the different elements that compose a safety system (1a, 1b, 2b, 2c, 2d);
    b. describing the importance of system safety today (1a, 1b, 2b, 2c, 2d);
    c. describing the element of the system life cycle (1a, 1b, 2b, 2c, 2d);
    d. explaining how a system program is managed (1a, 1b, 2b, 2c, 2d);
    e. listing the different tools and techniques in the analysis of system safety (1a, 1b, 2b, 2c, 2d);
    f. explaining the concepts associated with motivation and safety (1a, 1b, 2b, 2c, 2d);
    g. differentiating between behavioral and goal directed theories of motivation (1a, 1b, 2b, 2c, 2d);
    h. explaining the principles associated with behavior modification and safety (1a, 1b, 2b, 2c, 2d);
    i. describing the importance of establishing a positive safety culture (1a, 1b, 2b, 2c, 2d);
    j. identifying the pitfalls inherent in safety incentive programs (1a, 1b, 2b, 2c, 2d);
    k. describing the benefits of employee empowerment and job enrichment (1a, 1b, 2b, 2c, 2d);
    l. defining related behavior safety terminology (1a, 1b, 2b, 2c, 2d);
    m. explaining how to implement behavioral safety processes (1a, 1b, 2b, 2c, 2d);
    n. describing techniques and benefits of safety coaching (1a, 1b, 2b, 2c, 2d);
    o. identifying best measures to track behavioral safety performance (1a, 1b, 2b, 2c, 2d);
    p. discussing success factors for improving safety performance (1a, 1b, 2b, 2c, 2d);
    q. explaining how to use behavioral approaches for continuous improvement (1a, 1b, 2b, 2c, 2d);
    r. identifying the high risk workplace environments experiencing workplace violence (1a, 1b, 2b, 2c, 2d);
    s. listing several occupations where workplace violence statistics indicate a problem of concern for the safety professional (1a, 1b, 2b, 2c, 2d);
    t. listing several factors that contribute to workplace violence (1a, 1b, 2b, 2c, 2d);
    u. explaining the importance of establishing a workplace violence prevention program (1a, 1b, 2b, 2c, 2d);
    v. describing some of the strategies that companies can use to prevent or minimize the effects of workplace violence (1a, 1b, 2b, 2c, 2d);
    w. understanding the compelling reasons for preparing for terrorist attack in business (1a, 1b, 2b, 2c, 2d);
    x. listing critical areas of concern that need to be addressed in terrorism preparation (1a, 1b, 2b, 2c, 2d);
    y. understanding the role of the safety and health professional in company terrorism planning activities (1a, 1b, 2b, 2c, 2d);
    z. developing lesson plans, teaching activities, and presentations (1a, 1b, 2b, 2c, 2d);
    aa. applying principles of learning methods and techniques of instruction to develop effective training (1a, 1b, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate, as a member of a team, an understanding of the dynamic nature of criminal justice issues and the need to stay current and informed of the ever changing environment by
    a. demonstrating an ability to provide practical perspectives on the academic concepts and theories studied in the classroom (1a, 1b, 2c);
    b. demonstrating the ability to locate an organization linked to the criminal justice field and model him/herself as an employee (1a, 1b, 2c);
    c. demonstrating an understanding of system thinking in the workforce (1a, 1b, 2c).
2. Demonstrate the ability to conduct research and analysis on issues within workforce by
    a. identifying problems and solutions (1a, 1b, 2c);
    b. documenting experiences in a journal (1a, 1b, 2c);
    c. preparing written and oral reports based on the information obtained from experience (1a, 1b, 2c);
    d. delivering the report in both an oral and written format (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use blueprint vocabulary and symbols; interpret piping drawings; and demonstrate basic sketching techniques for isometric and orthographic drawings of piping components.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify parts of a drawing by
    a. explaining the title block (1a, 1b, 1c, 2a, 2c);
    b. explaining scales and measurements (1a, 1b, 1c, 2a, 2c);
    c. explaining symbols and abbreviations (1a, 1b, 1c, 2a, 2c);
    d. explaining notes (1a, 1b, 1c, 2a, 2c).
2. Demonstrate the ability to identify various types of drawings by
    a. explaining plot plans (1a, 1b, 1c, 2a, 2c, 2d);
    b. explaining structural drawings (1a, 1b, 1c, 2a, 2c, 2d);
    c. explaining isometric drawings (1a, 1b, 1c, 2a, 2c, 2d).
3. Demonstrate the ability to make field sketches by
    a. making basic isometric sketches (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. making basic orthographic sketches (1a, 1b, 1c, 2a, 2c, 2d, 2e).

PFPB 1408 - Basic Pipefitting Skills

Description
(4-2-4) Mathematical operations necessary to calculate laying lengths of pipe fittings for fabrication. Identification and use of hand tools and power tools. Identification of pipe, pipefittings, flanges, and fasteners used in the trade.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply mathematical calculations applicable to pipefitting installations; demonstrate safe use of hand tools and power tools; and identify materials used in pipefitting.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of basic mathematics and plane figures by
    a. calculating angles and angular layout (1a, 1b, 1c, 2a, 2c, 2d);
    b. using calculator to calculate offsets of pipe runs (1a, 1b, 1c, 2a, 2c, 2d);
    c. demonstrating proper tool selection and procedures to lay out lateral joints (1a, 1b, 1c, 2a, 2c, 2d).
2. Demonstrate the ability to identify and use various hand and power tools by
    a. identifying and explaining how to use measuring tools (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining how to use various wrenches (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining how to use various types of saws (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying and explaining how to use various types of grinders (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to identify materials used in pipefitting by
    a. identifying and explaining various types of pipe (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. identifying and explaining various types of fittings and fasteners (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. identifying and explaining various flanges (1a, 1b, 1c, 2a, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and demonstrate the safe use of construction equipment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Define incidents and significant costs associated with them by
    a. explaining the title block (1a, 1b, 1c, 2a, 2c);
    b. explaining scales and measurements (1a, 1b, 1c, 2a, 2c);
    c. explaining symbols and abbreviations (1a, 1b, 1c, 2a, 2c);
    d. explaining notes (1a, 1b, 1c, 2a, 2c).
2. Demonstrate the ability to identify various types of drawings by
    a. explaining plot plans (1a, 1b, 1c, 2a, 2c, 2d);
    b. explaining structural drawings (1a, 1b, 1c, 2a, 2c, 2d);
    c. explaining isometric drawings (1a, 1b, 1c, 2a, 2c, 2d).
3. Demonstrate the ability to make field sketches by
    a. making basic isometric sketches (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. making basic orthographic sketches (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. identifying the common causes of incidents (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. identifying and describing proper use of personal protective equipment (1a, 1b, 1c, 2a, 2c, 2d, 2e).
4. Demonstrate the ability to describe safe work requirements for elevated work by
    a. identifying and describing various fall hazards (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and describing equipment used in fall prevention (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and describing safe use of ladders and scaffolds (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate the ability to identify and use various types of hand tools by
    a. identifying and explaining how to use hammers, chisels, screwdrivers, and wrenches (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining how to use measuring tools (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate the ability the identify and use various types of power tools by
    a. identifying and explaining how to use various types of drills (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining how to use various types of saws (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining how to use various types of grinders (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate the ability to identify and use various types of rigging equipment by
    a. identifying and explaining how to use various types of slings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. describing how to inspect various types of slings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining how to inspect common rigging hardware (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying and explaining how to use various types of hoists (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. identifying and explaining how to use basic rigging hitches (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. explaining related Emergency Stop hand signal (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Fabricate and install various types of pipe and pipe components.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to fabricate threaded types of pipe by
    a. identifying and explaining materials used in threaded piping systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. identifying and explaining pipe fittings (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. reading and interpreting screwed fitting drawings (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. identifying and explaining types of threads (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. determining pipe lengths between joints (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. threading and assembling piping and valves (1a, 1b, 1c, 2a, 2c, 2d, 2e).
2. Demonstrate the ability to fabricate socket weld piping systems by
    a. identifying and explaining types of socket weld piping materials (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. identifying and explaining socket weld fittings (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. reading and interpreting socket weld piping drawings (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. determining pipe lengths between socket weld fittings (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. fabricating socket weld fitting to pipe (1a, 1b, 1c, 2a, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify metallic and non-metallic pipe and tubing; interpret pipe specifications; describe various types of valves and fittings; and explain valve applications.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify various types of pipe by
    a. identifying and explaining different kinds of metallic pipe (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining different kinds of non-metallic pipe (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining different kinds of metallic tubing (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying and explaining different kinds of non-metallic tubing (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate the ability to interpret pipe specifications by
    a. identifying and explaining pipe pressure rating (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining pipe size and schedule (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining grades of pipe (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to identify different types of valves by
    a. identifying and explaining types of valves that start and stop flow (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    b. identifying and explaining valves that regulate flow (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    c. identifying and explaining valves that relieve pressure (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    d. identifying and explaining valves that regulate direction of flow (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    e. explaining factors that influence valve selection (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    f. interpreting valve markings and nameplate information (1a, 1b, 1c, 2b, 2c, 2d, 2e).

PFPB 2432 - Adv Pipefitting Standards/Spec/Install

General

Course Key
14723

Course Rubric
PFPB

Course Number
2432

Course Title
Advanced Pipefitting Standards, Specifications, and Installation

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) Skill development in motorized equipment, above-ground pipe installation valves, field routing and vessel trim, spring can supports, testing piping systems and equipment, basic plumbing, planning work activities, and Non-Destructive Testing (NDT).

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain safe use of manlifts, cable lifts, hydrostatic pumps, drain cleaners, side boom tractors, and construction trucks and trailers; identify and install valves; set up construction areas including specifications, erection equipment, and support needs; identify spring can supports and demonstrate their installation; outline the sequence for planning work activities; and explain types of NDT including hazards and preparations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to identify various lifts and drain cleaners by
    a. identifying and explaining types of manlifts (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining manlift safety rules and hazards (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining scissors-type manlifts (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying and explaining telescoping boom manlifts (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. identifying and explaining cable lifts (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. identifying and explaining the use of drain cleaners (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate the ability to set up construction areas by
    a. identifying and securing the work area (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. determining field run specifications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. determining required rigging equipment based on weight, location, and configuration (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. determining the load weight for erection equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to identify various spring can supports by
    a. identifying and explaining the types of spring can supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining the types of variable spring can supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying and explaining the types of constant spring can supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. explaining the storing and handling of spring can supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. explaining how to install spring can supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate the ability to perform non-destructive testing by
    a. explaining how to perform pretest requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining how to perform service and flow test (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining how to perform head pressure test (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. explaining how to perform hydrostatic tests (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. explaining how to perform steam blow test (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. explaining non-destructive examinations (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

PFPB 2433 - Pipefitt: Adv Fabrication/Installation

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) Advanced pipe fabrication and pipe alignment for rotating equipment. Includes identifying, describing, applying, and maintaining steam traps, in-line specialties, special piping, hot taps, and valves.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculating offsets and coils; fabricate miters, laterals, and dummy legs; align pipe to rotating equipment; install and troubleshoot steam traps; install in-line specialties; install flared, compression, solder, and brazed joints; install hot tap fittings; and demonstrate valve maintenance procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to calculating various offsets by
    a. calculating and explaining simple piping offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. calculating and explaining three-line, 45-degree, equal-spread offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. calculating and explaining three-line,45-degree, unequal-spread offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate the ability to identifying tank coils by
    a. identifying and explaining heating coil (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to lay out and fabricate pipe intersections and miters by
    a. performing and explaining mitering procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. laying out and explaining three- and four-piece mitered turns (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. laying out and explaining 45-degree laterals (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. fabricating dummy legs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. performing and explaining geometric layout of pipe laterals and supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate the ability to identifying various steam traps by
    a. identifying and explaining mechanical, thermostatic, and thermodynamic steam traps (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining how to install steam traps (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining how to troubleshoot steam traps (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate the ability to identifying in-line specialties by
    a. identifying and explaining hazards associated with in-line specialties (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining in-line specialties (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining how to store and handle in-line specialties (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate the ability to install various joints of tubing by
    a. installing and explaining flared and compression joints (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining and performing solder and braze joints (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate the ability to identifying hot taps by
    a. identifying and explaining hot tap safety (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying and explaining fittings used with hot taps (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate the ability to explaining valve maintenance by
    a. explaining the removal and installation of threaded and flanged valves (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining the replacement of valve stem O-rings and bonnet gaskets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining how to repack a valve (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Fabricate piping offsets; and develop and lay out templates of various pipe intersections and miters.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to calculate various offsets by
    a. calculating and explaining simple piping offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. calculating and explaining three-line, 45-degree, equal-spread offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. calculating and explaining three-line, 45-degree, unequal-spread offsets (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate the ability to develop and lay out various pipe intersections and miters by
    a. performing and explaining mitering procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. laying out and explaining three- and four-piece mitered turns (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. laying out and explaining 45-degree laterals, using references or a calculator (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. fabricating dummy legs and trunnions out of pipe, using references (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. performing and explaining geometric layout of pipe laterals and supports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Recommended Prerequisite(s): ARTS 2356

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Produce examples of photographic retouching, color corrections, copy, and photographic restoration; explain the hardware and software used in photography; and organize images.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basic functions associated with digital cameras by
    a. interpreting shutter speed and aperture settings (1a, 1b, 2c);
    b. describing the quantitative and qualitative effects of shutter speed and aperture settings (1a, 1b, 2c);
    c. manipulating camera focus to achieve visual emphasis (1a, 1b, 2c);
    d. manipulating white balance settings (1a, 1b, 2c);
    e. identifying available light qualities (1a, 1b, 2c).
2. Demonstrate the ability to identify and apply various basic artistic techniques in the completion of several shooting assignments by
    a. creating images that display a variety of lighting qualities (1a, 1b, 2c);
    b. creating images that explore spatial dimensions (1a, 1b, 2c);
    c. creating images that explore the concept of time and motion (1a, 1b, 2c);
    d. preparing a portfolio of digital images that explores a single visual idea (1a, 1b, 1c, 2c, 2e).
3. Demonstrate an understanding of digital imagery by
    a. describing digital file types (1a, 1b, 2c);
    b. demonstrating import and export of digital files (1a, 1b, 2c);
    c. summarizing the advantages of image editing software (1a, 1b, 2c);
    d. manipulating adjustment layers in image editing software (1a, 1b, 2c);
    e. demonstrating the use of filters in imaging editing software (1a, 1b, 2c);
    f. explaining image resolution (1a, 1b, 2c);
    g. demonstrating image output resolution (1a, 1b, 2c).
4. Demonstrate an understanding of scanning and printing digital images by
    a. producing a color and/or monochrome scan (1a, 1b, 2c);
    b. changing the mode of a digital file (1a, 1b, 2c);
    c. describing monitor calibration (1a, 1b, 2c);
    d. preparing a digital photographic file for printing (1a, 1b, 2c);
    e. creating a digital backup of a folder of digital photographs (1a, 1b, 2c);
    f. contracting with a photographic service bureau in the completion of a digital photographic print job (1a, 1b, 1c, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Exhibit creative visual thinking; perform and execute photographic practices that include traditional and nontraditional procedures; and interpret various types of photographic imagery.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate skill in applying photographic technology in the production of creative images by
    a. creating a photographic print transfer (1a, 1b, 2c, 2e);
    b. coating a handmade and/or printmaking paper with a photosensitive emulsion (1a, 1b, 2c);
    c. sequencing a series of photographic images (1a, 1b, 2c);
    d. demonstrating the use of good composition in image construction (1a, 1b, 2c, 2e);
    e. demonstrating the use of good color design in image construction (1a, 1b, 2c, 2e);
    f. constructing a three dimensional photographic object (1a, 1b, 2c, 2e);
    g. creating a digital large format negative (1a, 1b, 2c);
    h. drawing and/or painting on the surface of a photographic image (1a, 1b, 2c);
    i. incorporating text in a photographic image (1a, 1b, 2c);
    j. justifying various image size considerations (1a, 1b, 2c).
2. Demonstrate creative visual thinking to create a portfolio of alternative process photographic images by
    a. conceptualizing a nontraditional photographic project (1a, 1b, 2c);
    b. displaying professional craftsmanship in the production of a portfolio of nontraditional photographic images (1a, 1b, 2c, 2e);
    c. writing a concise artist's statement (1a, 1b, 2c);
    d. presenting a portfolio in group critique (1a, 1b, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Use a variety of basic lighting patterns; explain the principles of subject rapport and aesthetic posing methods; produce effective finished portraits; and utilize subject analysis.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the tools and terminology of portrait photography by
    a. explaining the historical backgrounds of photographic portraiture (1a, 1b, 2c);
    b. operating a professional light meter to obtain correct exposures (1a, 1b, 2c, 2e);
    c. demonstrating skill in the creation of candid portraits executed in available light (1a, 1b, 1c, 2c, 2e);
    d. creating an effective formal environmental portrait in natural and/or available light (1a, 1b, 1c, 2c, 2e);
    e. demonstrating an understanding of studio and natural lighting qualities (1a, 1b, 2c);
    f. manipulating lighting variables to create an effective portrait in a studio (1a, 1b, 2c, 2e);
    g. recognizing effective communication skills in the making of a portrait (1a, 1b, 1c, 2c).
2. Demonstrate creative and critical visual thinking to create a portfolio of photographic portraits by
    a. conceptualizing a portrait project (1a, 1b, 2c);
    b. writing a concise artist's statement regarding a project (1a, 1b, 2c);
    c. displaying professional craftsmanship in the production of a portfolio of portrait images (1a, 1b, 2c, 2e);
    d. matting a portfolio professionally for group critique (1a, 1b, 2c, 2e);
    e. presenting and justifying a portfolio in group critique (1a, 1b, 1c, 2c).

Requirements

Simple Requisites

See course description for prerequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

take arts-2356;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): ARTS 2356 or consent of the instructor

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate the use of perspective in architectural photography; exercise lighting techniques for interior and exterior exposures at different times of day; and create a portfolio on an approved architectural theme.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the tools and terminology of architectural photography by
    a. identifying the functions and components of the large format camera (1a, 1b, 2c);
    b. explaining the parts and operation of the large format lens (1a, 1b, 2c);
    c. manipulating large format lens and/or camera focus variables to achieve artistic effects (1a, 1b, 2c, 2e);
    d. demonstrating skill in the setup and use of a large format camera on a tripod in the field (1a, 1b, 2c, 2e);
    e. operating a professional light meter to obtain an accurate exposure in various lighting conditions (1a, 1b, 2c, 2e);
    f. processing images made with the large format camera successfully (1a, 1b, 2c, 2e);
    g. demonstrating the use of good composition in the making of an architectural photograph (1a, 1b, 2c, 2e);
    h. photographing a building professionally (1a, 1b, 2c, 2e);
    i. scanning a large format negative (1a, 1b, 2c, 2e).
2. Demonstrate creative and critical visual thinking to create a portfolio of architectural photographic images by
    a. conceptualizing an architectural photographic project (1a, 1b, 2c);
    b. writing a concise artist's statement regarding a project (1a, 1b, 2c);
    c. displaying professional craftsmanship in the production of a portfolio of architectural photographic images (1a, 1b, 2c, 2e);
    d. matting a portfolio professionally for group critique (1a, 1b, 2c, 2e);
    e. presenting a portfolio in group critique (1a, 1b, 1c, 2c).

PHTC 2343 - Portfolio Development

General

Course Key
8832

Course Rubric	Course Number	Course Title
PHTC	2343	Portfolio Development

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-4). A culmination experience for the evaluation of the student's photographic competencies. Includes association with a professional photographic organization, completion of portfolio, professional self-presentation, comprehensive exam, and seminars in areas of photographic interest.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop a portfolio or photographic work reflecting the student's strengths and capabilities; identify personal traits, mannerisms, dress, work performance, and human interaction for the primary purpose of obtaining and advancing in gainful employment; and examine opportunities in the professional community.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Modify projects for inclusion in a professional portfolio by
    a. analyzing previous class projects (1a, 1b, 2c);
    b. refining class projects (1a, 1b, 2c);
    c. categorizing projects (1a, 1b, 2c).
2. Create a professional resume for the commercial or gallery photographic community by
    a. identifying appropriate personal/professional accomplishments (1a, 1b, 2c);
    b. organizing relevant biographical and academic personal information (1a, 1b, 2c);
    c. creating a professional word processed resume document (1a, 1b, 2c).
3. Produce a personal artist's statement by
    a. describing his/her work (1a, 1b, 2c);
    b. analyzing the work's conceptual structure (1a, 1b, 2c);
    c. comparing the work to contemporary antecedents (1a, 1b, 2c);
    d. creating a word processed artist's statement document (1a, 1b, 2c).
4. Create a presentation portfolio by
    a. designing a portfolio project and producing a printed portfolio (1a, 1b, 1c, 2c);
    b. producing a web specific portfolio (1a, 1b, 2c);
    c. presenting a printed portfolio for critique (1a, 1b, 1c, 2c).
5. Evaluate peer portfolios by
    a. examining print portfolios (1a, 1b, 1c, 2b);
    b. justifying portfolio critiques (1a, 1b, 1c, 2c).

PHTC 2349 - Photo Digital Imaging II

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Produce photographs that illustrate advanced manipulation and enhancement techniques; utilize computers, various photographic input and output devices, and memory and software applications; and develop a body of work that illustrates photographic skills in digital mastery and personal expression.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of photographic digital imaging terminology and tools by
    a. demonstrating the ability to analyze and correct digital files for print output and web use (1a, 1b, 2c, 2e);
    b. manipulating digital image file types and sizes (1a, 1b, 2c, 2e);
    c. modifying color and contrast within a digital image for added effect (1a, 1b, 2c, 2e);
    d. demonstrating the ability to sharpen and restore photographic images within available imaging software (1a, 1b, 2c, 2e);
    e. creating a systematic digital workflow and archiving process (1a, 1b, 2c, 2e).
2. Demonstrate the ability to identify and apply various advanced artistic techniques associated with available digital imaging software in the completion of several assignments by
    a. creating a portrait utilizing natural and/or studio lighting (1a, 1b, 2c);
    b. constructing a collage and/or montage by combining a variety of digital files (1a, 1b, 2c, 2e);
    c. demonstrating the ability to scan objects and create a digitally manipulated image that deals with a specific concept, emotion, or idea (1a, 1b, 2c, 2e).
3. Demonstrate the ability to conceptualize and design a digital photographic project by
    a. utilizing critical thinking skills to analyze current trends in photography (1a, 1b, 2c);
    b. creating a unique proposal for a body of digitally produced images (1a, 1b, 2c);
    c. preparing a written proposal for the body of work (1a, 1b, 1c, 2c);
    d. creating a body of digital images that reflects the highest standards of professional practice (1a, 1b, 2e);
    e. writing a concise artist's statement to accompany the portfolio (1a, 1b, 2c).
4. Demonstrate the ability to solve problems and to build employability skills such as critical thinking, presentation, and a professional work ethic by
    a. using critical thinking skills to communicate ideas, feelings, and emotions through digital image production (1a, 1b, 2c);
    b. utilizing professional presentation skills in group critique (1a, 1b, 1c, 2b);
    c. utilizing communication skills to work as a team member in critiquing and completing class projects (1a, 1b, 1c, 2b);
    d. exhibiting professional principles by being punctual and completing projects on deadline (1a, 1b, 1c, 2c).

Lecture Hours
2

Lab Hours
1

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-1) Skill development in the performance of a variety of blood collection methods using proper techniques and standard precautions. Includes vacuum collection devices, syringes, capillary skin puncture, butterfly needles and blood culture, and specimen collection on adults, children, and infants. Emphasis on infection prevention, patient identification, specimen labeling, quality assurance, specimen handling, processing, accessioning, professionalism, ethics, and medical terminology.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate infection control and safety practices; describe quality assurance as it relates to specimen collection; explain the role of specimen collection in the overall patient care system; identify collection equipment, various types of additives used, special precautions necessary, and substances that can interfere in clinical analysis of blood constituents; demonstrate venipuncture and capillary puncture; techniques on adults, children, and infants; and explain requisitioning, transport and processing.

Learning outcomes are linked to SCANS REQUIREMENTS. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the health care delivery system and medical terminology. (1a, 1b)
2. Demonstrate knowledge of infection control and safety. (1a, 1b)
3. Demonstrate basic understanding of the anatomy and physiology of body systems and anatomic terminology in order to relate major areas of the clinical laboratory to general pathologic conditions associated with the body systems. (1a, 1b)
4. Distinguish between the different types of blood vessels and blood components, and describe structure and function of each. Be able to identify blood types and explain their importance, as well as to be able to trace the flow of blood throughout the circulatory system. (1a, 1b)
5. List personnel levels in the clinical analysis areas of the laboratory and the types of laboratory procedures performed in each of the areas; Be able to associate the major areas and departments of the clinical laboratory with the laboratory tests ordered to evaluate a patient's pathologic condition or illness. (1a, 1b)
6. Validate knowledge of collection equipment, various types of additives used, special precautions necessary and substances that can interfere in clinical analysis of blood constituents. (1a, 1b)
7. Explain the importance of Timed, Fasting, and Stat specimens as related to specimen integrity in the delivery of patient care. (1a, 1b)
8. Follow standard operating procedures to collect specimens via venipuncture and capillary puncture. (1a, 1b)
9. Describe signs and symptoms of phlebotomy complications and pre-analytical errors that can significantly alter results. Be able to explain the causes of phlebotomy complications. (1a, 1b)
10. Demonstrate understanding of requisitioning, specimen transport and specimen processing. (1a, 1b)
11. Exhibit understanding of quality assurance and quality control in phlebotomy. (1a, 1b)
12. Demonstrate understanding of the basic concepts of verbal and nonverbal communications, personal and patient interaction, stress management, professional behavior and legal implications of the workplace. (1a, 1b)

Take AERM-1254 PLTC-1303;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): AERM 1254 and PLTC 1303

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate composite fabrication/bonding practices by
    a. interpreting composite fabrication drawings (1a, 1b, 2c, 2e);
    b. demonstrating and modeling an understanding of safe composite working practices (1a, 1b, 1c, 2a, 2b);
    c. preparing composite molds and tools by applying release agents (1a, 1b, 2c, 2e);
    d. preparing fiber reinforcements, metal, and polymer resin systems for composite bonding (1a, 1c, 2a, 2c, 2e).
2. Fabricate a composite or metal bonded structure by
    a. placing and positioning fiber reinforcements or metal facings on or in a mold (1a, 1b, 2c, 2e);
    b. preparing and placing core structures on a fiber reinforcement or metal facing (1a, 1b, 2c, 2e);
    c. demonstrating vacuum bagging on a composite article (1a, 1b, 2c, 2e).
3. Cure/bond a composite article with heat by
    a. installing thermocouples on a composite article prior to curing/bonding (1a, 1b, 2c, 2e);
    b. configuring a heat source and a heat controller for composite curing/bonding (1a, 1b, 2c, 2e);
    c. operating a heat source and heat controller to cure a composite article (1a, 1b, 2c, 2d, 2e).
4. Demonstrate composite bonded repair techniques by
    a. removing damaged materials (1a, 1b, 2c, 2e);
    b. describing the procedure for removing moisture in a composite article (1a, 1b, 2c);
    c. preparing a surface for bonding (1a, 1b, 2c, 2e);
    d. fabricating repair materials (1a, 1b, 2c, 2e);
    e. bonding replacement materials (1a, 1b, 2c, 2e).
5. Demonstrate an understanding of the inspection process for a composite structure by
    a. performing and documenting the results of a composite article final inspection (1a, 1b, 2c, 2e).

Course Learning Outcomes
End-of-Course Outcomes: Describe polymer composites; list the methods of composite fabrications; and fabricate a composite article. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. List composite fabrication methods (1a, 1b, 2c).
2. Demonstrate composite fabrication practices by
    a. interpreting composite fabrication drawings (1a, 1b, 2c, 2e);
    b. demonstrating and modeling an understanding of safe composite working practices (1a, 1b, 1c, 2a, 2b);
    c. preparing composite molds and tools by applying release agents (1a, 1b, 2c, 2e);
    d. preparing fiber reinforcements and polymer resin systems for composite bonding (1a, 1c, 2a, 2c, 2e).
3. Fabricate a composite structure by
    a. placing and positioning fiber reinforcements on or in a mold (1a, 1b, 2c, 2e);
    b. preparing and placing core structures on fiber reinforcement (1a, 1b, 2c, 2e);
    c. demonstrating vacuum bagging on a composite article (1a, 1b, 2c, 2e).
4. Cure/bond a composite article with heat by
    a. installing thermocouples on a composite article prior to curing/bonding (1a, 1b, 2c, 2e);
    b. configuring a heat source and a heat controller for composite curing/bonding (1a, 1b, 2c, 2e);
    c. operating a heat source and heat controller to cure a composite article (1a, 1b, 2c, 2d, 2e).
5. Demonstrate composite post curing practices by
    a. trimming a composite to its net dimensions (1a, 1b, 22c, 2e);
    b. drilling holes in a composite article (1a, 1b, 2c, 2e).
6. Demonstrate secondary bonding on a composite structure by
    a. preparing a composite structure for bonding (1a, 1b, 2c, 2e);
    b. bonding specialty composite fasteners to a composite structure (1a, 1b, 2c, 2e).
7. Demonstrate an understanding of the inspection process for a composite structure by
    a. performing and documenting the results of a composite article final inspection (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify spreadsheet terminology and concepts; calculate data using formulas and functions; create and modify workbooks; insert graphics; generate charts and reports; and create and use special functions. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Produce a formatted workbook by
    a. identifying the components of a spreadsheet window (1a, 1b, 2c, 2e);
    b. scrolling through a worksheet (1a, 1b, 2c, 2e);
    c. navigating between worksheets (1a, 1b, 2c, 2e);
    d. entering text, numbers, and dates into a worksheet (1a, 1b, 2c, 2e);
    e. manipulating columns and rows (1a, 1b, 2c, 2e);
    f. using editing and formatting tools (1a, 1b, 2c, 2e);
    g. manipulating cells and cell ranges (1a, 1b, 2c, 2e);
    h. saving a workbook (1a, 1b, 2c, 2e);
    i. printing a workbook (1a, 1b, 2c, 2e);
    j. closing a workbook (1a, 1b, 2c, 2e).
2. Develop formulas and functions by
    a. constructing formulas using absolute, relative, and mixed cell references (1a, 1b, 2c, 2e);
    b. understanding the syntax of a function (1a, 1b, 2c, 2e);
    c. searching for a function (1a, 1b, 2c, 2e);
    d. constructing functions using Insert Function feature and keying functions directly into cells (1a, 1b, 2c, 2e);
    e. using AutoFill (1a, 1b, 2c, 2e).
3. Produce charts and graphics by
    a. comparing chart types (1a, 1b, 2c, 2e);
    b. choosing the right chart type (1a, 1b, 2c, 2e);
    c. selecting a chart type (1a, 1b, 2c, 2e);
    d. inserting a chart (1a, 1b, 2c, 2e);
    e. manipulating charts (1a, 1b, 2c, 2e);
    f. identifying chart elements (1a, 1b, 2c, 2e);
    g. applying a chart style and layout (1a, 1b, 2c, 2e);
    h. editing chart data (1a, 1b, 2c, 2e);
    i. inserting a graphic shape (1a, 1b, 2c, 2e);
    j. formatting a graphic shape (1a, 1b, 2c, 2e).

4. Produce tables, Pivot Tables, and PivotTable charts by
    a. planning a structured range of data (1a, 1b, 2c, 2e);
    b. planning a structured table (1a, 1b, 2c, 2e);
    c. creating a structured table (1a, 1b, 2c, 2e);
    d. formatting a table (1a, 1b, 2c, 2e);
    e. manipulating records in a table (1a, 1b, 2c, 2e);
    f. sorting data in a structured table (1a, 1b, 2c, 2e);
    g. filtering data in a structured table (1a, 1b, 2c, 2e);
    h. summarizing data in a table (1a, 1b, 2c, 2e);
    i. creating a PivotTable (1a, 1b, 2c, 2e);
    j. modifying a PivotTable (1a, 1b, 2c, 2e);
    k. applying PivotTable styles (1a, 1b, 2c, 2e);
    l. formatting a PivotTable (1a, 1b, 2c, 2e);
    m. sorting a PivotTable (1a, 1b, 2c, 2e);
    n. filtering a PivotTable (1a, 1b, 2c, 2e);
    o. creating a PivotTable chart (1a, 1b, 2c, 2e).

5. Manage multiple worksheets and workbooks by
    a. creating a worksheet group (1a, 1b, 2c, 2e);
    b. manipulating multiple worksheets at one time (1a, 1b, 2c, 2e);
    c. referencing cells and ranges in other worksheets (1a, 1b, 2c, 2e);
    d. printing a worksheet group (1a, 1b, 2c, 2e);
    e. understanding when to use linked workbooks (1a, 1b, 2c, 2e);
    f. linking multiple workbooks (1a, 1b, 2c, 2e);
    g. summarizing data from linked workbooks into one (1a, 1b, 2c, 2e);
    h. managing linked workbooks (1a, 1b, 2c, 2e);
    i. creating a hyperlink (1a, 1b, 2c, 2e);
    j. producing a custom template (1a, 1b, 2c, 2e).

6. Use advanced functions and filters by
    a. working with logical functions (1a, 1b, 2c, 2e);
    b. using functions to evaluate single and multiple conditions (1a, 1b, 2c, 2e);
    c. working with financial functions (1a, 1b, 2c, 2e);
    d. understanding what if analyses (1a, 1b, 2c, 2e);
    e. developing a complex formula (1a, 1b, 2c, 2e);
    f. identifying elements of a lookup table (1a, 1b, 2c, 2e);
    g. using lookup tables (1a, 1b, 2c, 2e);
    h. using advanced filters (1a, 1b, 2c, 2e).

7. Develop a spreadsheet application by
    a. planning a spreadsheet application (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply basic and advanced formatting skills and special functions to produce documents. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Produce a document using Word processing software by
    a. creating a Word document (1a, 1b, 2c, 2e);
    b. saving a Word document (1a, 1b, 2c, 2e);
    c. printing a Word document(1a, 1b, 2c, 2e);
    d. entering text in a document (1a, 1b, 2c, 2e);
    e. deleting text in a document (1a, 1b, 2c, 2e);
    f. editing text in a document (1a, 1b, 2c, 2e);
    g. using undo and redo commands (1a, 1b, 2c, 2e);
    h. closing a Word document (1a, 1b, 2c, 2e).

2. Produce a formatted document using word processing software by
    a. formatting text and paragraphs in a Word document (1a, 1b, 2c, 2e);
    b. inserting a picture/clipart(1a, 1b, 2c, 2e);
    c. formatting a picture/clipart (1a, 1b, 2c, 2e);
    d. choosing a font, typeface, and type size (1a, 1b, 2c, 2e);
    e. correcting errors in a document (1a, 1b, 2c, 2e);
    f. moving text in a document (1a, 1b, 2c, 2e);
    g. finding and replacing text (1a, 1b, 2c, 2e);
    h. sorting text (1a, 1b, 2c, 2e);
    i. indenting a paragraph (1a, 1b, 2c, 2e).

3. Create a research paper by
    a. implementing the MLA documentation style (1a, 1b, 2c, 2e);
    b. changing document settings (1a, 1b, 2c, 2e);
    c. changing line and paragraph spacing (1a, 1b, 2c, 2e);
    d. inserting header and footer (1a, 1b, 2c, 2e);
    e. modifying paragraph indentation (1a, 1b, 2c, 2e);
    f. adding a footnote to a document (1a, 1b, 2c, 2e);
    g. inserting a manual page break (1a, 1b, 2c, 2e);
    h. creating a bibliographical list of sources (1a, 1b, 2c, 2e).

4. Create a cover letter and resume by

a. formatting characters and paragraphs (1a, 1b, 2c, 2e);
b. setting tab stops (1a, 1b, 2c, 2e);
c. inserting symbols (1a, 1b, 2c, 2e);
d. using tab stops (1a, 1b, 2c, 2e);
e. inserting a current date (1a, 1b, 2c, 2e);
f. using a Word template (1a, 1b, 2c, 2e);
g. copying text using clipboard (1a, 1b, 2c, 2e);
h. pasting text using clipboard (1a, 1b, 2c, 2e);
i. inserting a table in a Word document (1a, 1b, 2c, 2e);
j. entering data in a table (1a, 1b, 2c, 2e).

5. Use advanced formatting features by
   a. inserting SmartArt graphic (1a, 1b, 2c, 2e);
   b. formatting SmartArt graphic (1a, 1b, 2c, 2e);
   c. creating character style (1a, 1b, 2c, 2e);
   d. applying character style (1a, 1b, 2c, 2e);
   e. inserting a watermark (1a, 1b, 2c, 2e);
   f. inserting a section break (1a, 1b, 2c, 2e);
   g. adding picture bullets (1a, 1b, 2c, 2e);
   h. drawing a table (1a, 1b, 2c, 2e).
6. Use shape and drawing canvas by
   a. inserting drawing canvas (1a, 1b, 2c, 2e);
   b. inserting a shape (1a, 1b, 2c, 2e);
   c. applying a shape style (1a, 1b, 2c, 2e);
   d. modifying a shape on a drawing canvas (1a, 1b, 2c, 2e);
   e. resizing a drawing canvas (1a, 1b, 2c, 2e).
7. Generate merge documents by
   a. creating form letter (1a, 1b, 2c, 2e);
   b. creating data source (1a, 1b, 2c, 2e);
   c. editing data source (1a, 1b, 2c, 2e);
   d. inserting merge fields (1a, 1b, 2c, 2e);
   e. creating multilevel list (1a, 1b, 2c, 2e);
   f. merging form letter (1a, 1b, 2c, 2e);
   g. creating mailing labels (1a, 1b, 2c, 2e);
   h. creating envelopes (1a, 1b, 2c, 2e);
   i. merging data record to directory (1a, 1b, 2c, 2e).
8. Create a professional newsletter by
   a. creating WordArt (1a, 1b, 2c, 2e);
   b. formatting WordArt (1a, 1b, 2c, 2e);
   c. inserting floating graphic (1a, 1b, 2c, 2e);
   d. formatting floating graphic (1a, 1b, 2c, 2e);
   e. creating a multicolumn document (1a, 1b, 2c, 2e);
   f. inserting column break (1a, 1b, 2c, 2e);
   g. creating a drop cap character (1a, 1b, 2c, 2e);
   h. inserting a text box (1b, 2c, 2e);
   i. adding a page border (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define desktop publishing terminology; manipulate text and graphics to create balanced and focused layout, and create fliers, brochures, and multiple page documents. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Create an office publication by
   a. defining desktop publishing (1a, 1b, 2c, 2e);
   b. describing the publisher window (1a, 1b, 2c, 2e);
   c. demonstrating the ability to create and design a flyer (1a, 1b, 2c, 2e);
   d. editing text, objects, and graphics (1a, 1b, 2c, 2e);
   e. demonstrating the ability to save and print publication (1a, 1b, 2c, 2e);
   f. demonstrating the ability to close, reopen, and modify publication (1a, 1b, 2c, 2e);
   g. converting the print publication to a web flyer (1a, 1b, 2c, 2e).
2. Create a newsletter by
   a. explaining the advantages of using a newsletter medium and identifying the steps in its design process (1a, 1b, 2c, 2e);
   b. using template with font and color schemes and specifying the page layout (1a, 1b, 2c, 2e);
   c. typing articles, importing articles, and continuing stories across pages (1a, 1b, 2c, 2e);
   d. demonstrating the ability to insert, delete, and navigate pages in newsletter (1a, 1b, 2c, 2e);
   e. demonstrating the ability to import graphics and resize objects (1a, 1b, 2c, 2e);
   f. creating captions, sidebars, and pull quotes (1a, 1b, 2c, 2e);
   g. inserting page numbers in headers and footers (1a, 1b, 2c, 2e);
   h. using correct cut, copy, and paste techniques (1a, 1b, 2c, 2e);
   i. proofing newsletter for spelling and design errors (1a, 1b, 2c, 2e);
   j. saving newsletter and printing using duplex printing (1a, 1b, 2c, 2e).
3. Create a trifold brochure by
   a. explaining the advantages of the brochure medium (1a, 1b, 2c, 2e);
   b. using brochure options (1a, 1b, 2c, 2e);
   c. using brochure template and specifying the layout options (1a, 1b, 2c, 2e);
   d. editing brochure template text boxes (1a, 1b, 2c, 2e);
   e. demonstrating the ability to create and edit signup form (1a, 1b, 2c, 2e);
   f. creating color scheme and style (1a, 1b, 2c, 2e);
   g. creating font style and formatting paragraphs (1a, 1b, 2c, 2e);
   h. creating and formatting logo (1a, 1b, 2c, 2e);
   i. creating WordArt object (1a, 1b, 2c, 2e);

j. using spell check to proof the brochure (1a, 1b, 2c, 2e);

k. using design checker to proof design (1a, 1b, 2c, 2e);

l. choosing appropriate printing services, paper, and color libraries (1a, 1b, 2c, 2e);

m. preparing the brochure for outside printing (1a, 1b, 2c, 2e).

4. Produce a business information set by

a. defining business information set (1a, 1b, 2c, 2e);

b. creating blank publication and specifying the page layout (1a, 1b, 2c, 2e);

c. creating business information set (1a, 1b, 2c, 2e);

d. creating letterhead (1a, 1b, 2c, 2e);

e. demonstrating the ability to insert and edit graphic image (1a, 1b, 2c, 2e);

f. saving edited graphic as picture file (1a, 1b, 2c, 2e);

g. demonstrating the ability to insert and format AutoShapes using fill effects (1a, 1b, 2c, 2e);

h. inserting a date that updates automatically (1a, 1b, 2c, 2e);

i. demonstrating the ability to create, edit, and format table (1a, 1b, 2c, 2e);

j. creating business card (1a, 1b, 2c, 2e);

k. closing publications without quitting (1a, 1b, 2c, 2e).

5. Generate merged publications and data by

a. demonstrating the ability to use letterhead template and specify the layout options (1a, 1b, 2c, 2e);

b. creating mailing list (1a, 1b, 2c, 2e);

c. creating form letter and merging the mailing list data (1a, 1b, 2c, 2e);

d. demonstrating the ability to create and print merged labels (1a, 1b, 2c, 2e);

e. printing publication (1a, 1b, 2c, 2e).

6. Create interactive website by

a. using website template options (1a, 1b, 2c, 2e);

b. editing navigation bar (1a, 1b, 2c, 2e);

c. demonstrating the ability to create and use bookmark (1a, 1b, 2c, 2e);

d. applying animated graphics and alternative text (1a, 1b, 2c, 2e);

e. setting web page options (1a, 1b, 2c, 2e);

f. using return data values (1a, 1b, 2c, 2e);

g. creating an HTML code fragment (1a, 1b, 2c, 2e);

h. using VBA to create message box (1a, 1b, 2c, 2e);

i. setting security level (1a, 1b, 2c, 2e).

7. Demonstrate software product integration by

a. incorporating parts of files or entire files as objects from one application to another application (1a, 1b, 2c, 2e);

b. using copy and paste, copy and embed, and copy and link (1a, 1b, 2c, 2e);

c. defining Object Linking and Embedding (OLE) (1a, 1b, 2c, 2e);

d. embedding worksheet in a publication (1a, 1b, 2c, 2e);

e. linking worksheet to a publication (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate basic keyboarding techniques. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to operate the keyboard by touch by

a. manipulating the alphabet keys (1a, 1c, 2c, 2e);

b. manipulating the number keys (1a, 1c, 2c, 2e);

c. manipulating the symbol keys (1a, 1c, 2c, 2e).

2. Demonstrate basic keyboarding skill through timed writings by

a. completing one minute timings (1a, 1b, 1c, 2a, 2e);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply the basic rules of grammar, spelling, capitalization, number usage, and punctuation; utilize terminology applicable to technical and business writing; develop proofreading and editing skills; and write sentences and paragraphs. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate correct grammar skills for business by
    a. identifying grammar errors, including spelling, capitalization, number usage, and incorrect punctuation (1a, 1b, 2c, 2e);
    b. correcting grammar errors, including spelling, capitalization, number usage, and incorrect punctuation (1a, 1b, 2c, 2e);
2. Demonstrate skill in business and technical vocabulary by
    a. identifying terminology applicable to technical and business writing (1a, 1b, 2b, 2c);
    b. utilizing terminology applicable to technical and business writing (1a, 1b, 2b, 2c);
3. Demonstrate proofreading and editing skills by
    a. identifying errors and utilizing proofreading marks to indicate corrections (1a, 1b, 2c, 2e);
    b. making editing corrections found while proofreading (1a, 1b, 2c, 2e);
    c. organizing paragraph sentences (1a, 1b, 2c, 2e);
    d. building coherent paragraphs (1a, 1b, 2c, 2e);
4. Demonstrate basic writing skills by
    a. composing effective sentences for business applications (1a, 1b, 2c, 2e);
    b. organizing paragraph sentences for business applications (1a, 1b, 2c, 2e);
    c. building coherent paragraphs for business applications (1a, 1b, 2c, 2e);

Description
(3-3-0). Introduction to basic records information management systems including manual and electronic filing.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the stages in the life cycle of a record; file and retrieve records using filing systems; and differentiate between manual and electronic filing. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to file and retrieve records using the alphabetic method of storage by
    a. explaining the need for indexing rules in alphabetic storage of records and the importance of following these rules consistently (1a, 1b, 1c, 2c);
    b. demonstrating the ability to index, code, and arrange personal and business names in indexing order (1a, 1b, 2c);
    c. demonstrating the ability to prepare and arrange cross references for personal and business names (1a, 1b, 1c, 2c);
    d. applying ten basic alphabetic indexing rules (1a, 1b, 1c, 2c);
    e. sorting records alphabetically (1a, 1b, 1c, 2c).
2. Demonstrate the ability to file and retrieve records using the subject method of storage by
    a. defining subject records management (1a, 1b, 2c);
    b. listing advantages and disadvantages of storing and retrieving records by subject method of storage (1a, 1b, 1c, 2c);
    c. comparing the dictionary and encyclopedic subject file arrangements (1a, 1b, 1c, 2c);
    d. demonstrating the ability to store and retrieve records following subject records procedures (1a, 1b, 1c, 2c).
3. Demonstrate an understanding of records using the numeric method of storage by
    a. explaining numeric records management, including reasons for its use (1a, 1b, 1c, 2c);
    b. identifying similarities and differences in consecutive, terminal digit, and middle digit numeric records storage (1a, 1b, 1c, 2c);
    c. identifying similarities and differences in block numeric, duplex numeric, decimal numeric, and alphanumeric coding (1a, 1b, 1c, 2c);
    d. defining chronologic records storage and explaining its use (1a, 1b, 1c, 2c).
4. File and retrieve records using the geographic records method of storage by
    a. identifying the kinds of businesses that might use the geographic method of storage (1a, 1b, 1c, 2c);
    b. comparing dictionary and encyclopedic arrangements of geographic records (1a, 1b, 1c, 2c);
    c. contrasting the lettered guide plan and the location name guide plan (1a, 1b, 1c, 2c);
    d. differentiating between indexing and coding for the geographic storage method and indexing and coding for the alphabetic storage method (1a, 1b, 1c, 2c);
    e. explaining how files are arranged using compass terms and how this method differs from general alphabetic filing (1a, 1b, 1c, 2c).
5. Demonstrate an understanding of electronic file management by
    a. differentiating between manual and electronic filing (1a, 1b, 1c, 2c, 2e);
    b. demonstrating the ability to enter, sort, and query data in an electronic database (1a, 1b, 1c, 2c, 2e);
    c. managing electronic information (1a, 1b, 1c, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate basic keyboarding techniques; apply proofreading and editing skills; and create basic business documents. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Operate the keyboard by touch by
    a. manipulating the alphabet keys by touch (1a, 1c, 2c, 2e);
    b. manipulating the number keys by touch (1a, 1c, 2c, 2e);
    c. manipulating the symbol keys by touch (1a, 1c, 2c, 2e).
2. Complete reports using word processing software by
    a. constructing business reports with side headings, paragraph headings, lists, multi-pages, footnotes, margins, headers, quotations, bibliographies, reference list pages, works cited pages, title page, and table of contents using basic proofreaders' marks (1a, 1b, 2a, 2c, 2e);
    b. constructing academic reports with lists, indented displays, author/year citations, hanging indent, tab set, and dot leaders (1a, 1b, 2a, 2c, 2e).
3. Complete business correspondence using word processing software by
    a. formatting business letters (both block and modified block) which include personal titles, complimentary closings, lists, enclosure notation, attachments, copy notations, and post script (1a, 1b, 2a, 2c, 2e);
    b. creating envelopes and labels (1a, 1b, 2a, 2c, 2e);
    c. constructing memorandums (1a, 1b, 2a, 2c, 2e);
    d. constructing personal business letters (1a, 1b, 2a, 2c, 2e).
4. Create tables by
    a. creating boxed tables (1a, 1b, 2a, 2c, 2e);
    b. creating open tables with titles and/or column headings (1a, 1b, 2a, 2c, 2e);
    c. creating tables with numbered columns (1a, 1b, 2a, 2c, 2e).
5. Produce employment documents using word processing software by
    a. creating traditional resumes (1a, 1b, 2a, 2c, 2e);
    b. creating electronic resumes (1a, 1b, 2a, 2c, 2e);
    c. creating letters of application (1a, 1b, 2a, 2c, 2e);
    d. creating follow up letters (1a, 1b, 2a, 2c, 2e).
6. Complete straight copy timed writings demonstrating basic keyboarding skill by
    a. completing one minute timings within given district speed and accuracy guidelines (1a, 1b, 1c, 2a, 2e);
    b. completing three or five minute timings within given district speed and accuracy guidelines (1a, 1b, 1c, 2a, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Develop time management techniques; demonstrate communication skills; and identify basic skills of an office professional. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of general office duties by
    a. demonstrating telephone techniques (1a, 1b, 2c, 2d, 2e);
    b. demonstrating mail procedures (1a, 1b, 2c, 2d, 2e);
    c. greeting visitors (1a, 1b, 2c, 2d, 2e);
    d. handling office correspondence (1a, 1b, 2c, 2d, 2e);
    e. demonstrating the ability to arrange and conduct meetings (1a, 1b, 2c, 2d, 2e);
    f. making travel arrangements (1a, 1b, 2c, 2d, 2e).
2. Demonstrate accepted office qualities that emulate professionalism by
    a. demonstrating responsibility, dependability, self-management, and integrity (1a, 1b, 1c, 2b);
    b. demonstrating leadership, respect for diversity, ability to change, and ability to handle stress (1a, 1b, 1c, 2b).
3. Demonstrate acceptable procedures for the employment process by
    a. preparing a resume (1a, 1b, 2a, 2c, 2e);
    b. preparing a cover letter (1a, 1b, 2a, 2c, 2e);
    c. preparing a follow up letter (1a, 1b, 2a, 2c, 2e).
4. Develop a portfolio that includes but is not limited to the student's interview documents, examples of class work, honors and recognitions received, community service involvement, letters of recommendation, certificates and degrees, transcripts, and licenses (1a, 1b, 1c, 2a, 2c, 2d, 2e).

Recommended Prerequisite(s): Basic Keyboarding skills

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Create effective business documents; evaluate business documents; and apply ethical communication practices. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the communication process by
    a. identifying the steps in the communication process (1a, 1b, 2c);
    b. identifying ways to improve listening skills (1a, 1b, 1c, 2c);
    c. identifying the role of nonverbal communication (1a, 1b, 2c);
    d. identifying examples of how differing cultures affect communication (1a, 1b, 2b, 2c).
2. Demonstrate skill in business style writing by
    a. writing using the You view (1a, 1b, 2b, 2c);
    b. writing using conversational, professional tone (1a, 1b, 2b, 2c);
    c. writing using positive and courteous language (1a, 1b, 2b, 2c);
    d. writing using inclusive language (1a, 1b, 2b, 2c);
    e. writing using easy to understand business language (1a, 1b, 2b, 2c).
3. Demonstrate good grammar skills acceptable for business by
    a. demonstrating the ability to identify and correct grammar errors including sentence faults (fragments, run on sentences, and comma splices), dangling and misplaced modifiers, nonparallel series, singular/plural disagreement, incorrect verb tenses, and incorrect punctuation (1a, 1b, 2c, 2e);
    b. demonstrating the ability to identify and correct business writing errors including flabby expressions, long lead ins, fillers, redundancies, trite phrases, jargon, slang, buried verbs, and vague words (1a, 1b, 2c, 2e);
    c. demonstrating proper use of active voice and passive voice (1a, 1b, 2c, 2e);
    d. organizing paragraph sentences (1a, 1b, 2c, 2e);
    e. building coherent paragraphs (1a, 1b, 2c, 2e).
4. Write effective business messages by
    a. composing effective email messages (1a, 1b, 2c, 2e);
    b. composing effective positive business messages using the direct pattern, correct grammar, and proper business formatting (1a, 1b, 2c, 2e);
    c. composing effective negative business messages using the indirect pattern, correct grammar, and proper business formatting (1a, 1b, 2c, 2e);
    d. composing effective persuasive business messages using the persuasive pattern, correct grammar, and proper business formatting (1a, 1b, 2c, 2e);
    e. composing an effective resume using correct grammar and formatting (1a, 1b, 1c, 2c, 2e).
5. Demonstrate the ability to research and write a documented business report and/or give an oral presentation by
    a. researching a chosen topic (1a, 1b, 1c, 2a, 2c, 2e);
    b. writing a report using acceptable business language (1a, 1b, 1c, 2a, 2c, 2e);
    c. correctly formatting the report (1a, 1b, 2c, 2e);
    d. documenting all sources correctly (1a, 1b, 1c, 2c, 2e);
    e. analyzing the topic and presenting findings, conclusions, and recommendations (1a, 1b, 1c, 2c, 2e);
    f. identifying good presentation skills (1a, 1b, 1c, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and explain baking terms, ingredients, equipment, and tools; scale and measure ingredients; convert and cost recipes; operate baking equipment and tools; prepare yeast products, quick breads, pies, tarts, cookies, various cakes, icings, and demonstrate fundamental decorating techniques; and produce commercially acceptable baked products. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of baking terms by
    a. differentiating between terms (1a, 1b);
    b. demonstrating baking terms correctly (1a, 1b, 2b).
2. Demonstrate an understanding of ingredients by
    a. differentiating between ingredients (1a, 1b);
    b. explaining functions of ingredients (1a, 1b);
    c. selecting proper ingredients (1a, 1b);
    d. preparing items (1a, 1b);
    e. demonstrating the ability to scale and measure ingredients (1a, 1b, 2b).
3. Demonstrate familiarity with equipment/tools by
    a. operating baking equipment and tools safely (1a, 1b, 2b);
    b. demonstrating proper sanitation and upkeep of equipment and tools (1a, 1b, 2b).
4. Demonstrate the ability to convert and cost recipes by
    a. converting recipes by increasing and decreasing amounts precisely (1a, 1b, 2c);
    b. preparing a recipe with conversions (1a, 1b, 2b);
    c. costing ingredients within a recipe, for the total recipe and per portion (1a, 1b).
5. Prepare various bakeshop products by
    a. preparing quick breads (1a, 1b, 2b);
    b. preparing pies (1a, 1b, 2b);
    c. preparing tarts (1a, 1b, 2b);
    d. preparing cookies (1a, 1b, 2b);
    e. preparing various cakes (1a, 1b, 2b);
    f. preparing icings (1a, 1b, 2b);
    g. producing commercially acceptable baked products (1a, 1b, 2b).
6. Demonstrate decorating techniques by
    a. demonstrating simple cake decorating techniques, to include rosette, shell and rope borders, rosebuds and drop flowers, leaves and stems, and writing on cakes (1a, 1b, 2b).

Course Learning Outcomes
End-of-Course Outcomes: Identify and explain baking terms, ingredients, equipment, and tools; scale and measure ingredients; convert and cost recipes; safely operate baking equipment and tools; and prepare yeast and quick breads and rolls to a commercially acceptable standard. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify volume measure containers (1a, 1b).
2. Describe volume/weight relationship of ingredients (1a, 1b, 2b).
3. Describe functions of ingredients of yeast products (1a, 1b).
4. Identify steps involved in yeast dough production and baking (1a, 1b).
5. Control texture and temperature in manual and mechanical mixing methods of doughs (1a, 1b).
6. Convert formulas using baker's percentages (1a, 1b, 2c).
7. Prepare a wide variety of baked goods to a commercially acceptable standard, including, but not limited to, yeast doughs and quick breads (1a, 1b, 2b).
8. Cost formulas manually and using a computer program (1a, 1b, 2c).
9. Utilize proper sanitation and safety techniques (1a, 1b, 2b).
10. Function in a group atmosphere (1a, 1b).
11. Realize the sense of urgency in a professional bakeshop (1a, 1b).

PSYC

Course Number
1300

Course Title
Learning Framework

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0) A study of the 1)research and theory in the psychology of learning, cognition, and motivation, 2)factors that impact learning, and 3)application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned.(NOTE: While traditional study skills courses include some of the same learning strategies - e.g.,note-taking, reading, test preparation etc. - as learning framework courses, the focus of study skills courses is solely or primarily on skill acquisition. Study skills courses, which are not under-girded by scholarly models of the learning process, are not considered college-level, and, therefore, are distinguishable from Learning Framework courses.)Students may NOT earn credit for both EDUC-1300 and PSYC-1300.)

PSYC 2306 - Human Sexuality

General

Course Key
16203

Course Rubric
PSYC

Course Number
2306

Course Title
Human Sexuality

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Academic Course Guide Manual (ACGM)

Description
(3-3-0) This course will provide an overview of the broad field of human sexuality. Topics will be covered from various perspectives - biological, sociological, anthropological, etc., but will focus primarily on the psychological perspective. The goal is for each student to learn factual, scientifically-based information that will provoke thought and contribute to his/her own decision-making on sexual issues outside of the classroom.

Requirements
Required Prerequisite(s): PSYC 2301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify decision making, goal setting, assertiveness, career development, and conflict resolution skills for personal and social adjustment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the concept of self and personal adjustment and demonstrate an increased personal awareness (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate an understanding of the nature of stress, major types of stress, coping mechanisms, and wellness strategies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate an understanding of the impact communication has on relationships and why it is important to adjustment (1a, 1b, 1c, 2a, 2b, 2c, 2d).
4. Understand the power of social pressure and persuasion (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate knowledge of life management skills, goal setting, and techniques to balance multiple roles (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Explain how thinking can influence feelings (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
7. Demonstrate reflective and critical thinking to apply course material to improve thinking, problem solving, and decision making (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

PSYT 2339 - Counseling Theories

General

Course Key
254

PSYT

Course Number
2339

Course Title
Counseling Theories

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An examination of evidence-based and contemporary counseling theories which may include psychodynamic, cognitive, behavioral and humanistic.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate among major theories and their approaches to counseling; and define and explain techniques relevant to the major theories.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the purpose and need for counseling theories by
    a. displaying ability to enumerate basic division of theories (1a, 1b, 1c, 2a, 2c);
    b. constructing a view of nature of man based on four major theories (1a, 1b, 2a, 2c);
    c. explaining the counselor's values and philosophy of life and relationship to therapeutic theory constructs (1a, 1b, 1c, 2a, 2c);
    d. explaining issues faced by beginning counselors in choosing and understanding various counseling theories to be applied (1a, 1b, 2a, 2c).
2. Demonstrate an understanding of a counselor as a therapeutic person by
    a. developing a diagram of a fully developed helper (1a, 1b, 1c, 2a, 2c);
    b. displaying competencies in multicultural counseling (1a, 1b, 2a, 2c);
    c. explaining empathy, including elements of empathic understanding and responding (1a, 1b, 2a, 2c);
    d. defining eight uses of empathy (1a, 1b, 2a, 2c);
    e. developing the art of probing (1a, 1b, 2a, 2c);
    f. developing the art of reflective listening and reproducing attending skills ladder (1a, 1b, 2a, 2c).
3. Demonstrate an understanding of the structure of personality based on Freud's theory, Erickson's theory, Rogers's theory, Adler's theory, Glasser's theory, Ellis's theory, Motivational Interviewing theory, and Transactional Analysis theory by
    a. explaining key concepts of each theory (1a, 1b, 2a, 2c);
    b. defining major techniques and procedures for each theory (1a, 1b, 2a, 2c);
    c. explaining similarities and differences in the client's experience in each theory (1a, 1b, 2a, 2c);
    d. identifying assessment techniques for each theory (1a, 1b, 2a, 2c);
    e. explaining the therapist's role in each theory (1a, 1b, 2a, 2c);
    f. explaining the relationship between client and therapist for each theory (1a, 1b, 2a, 2c);
    g. examining appropriateness for use of theory with children and adolescents in each theory (1a, 1b, 1c, 2a, 2c).

PSYT 2345 - Principles Behavior Mgt & Modification

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply behavioral management and cognitive theories to formulate various behavior management plans; and utilize behavioral techniques and strategies.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the definition and theoretical history of behavior therapy and cognitive theories by
    a. defining assigned terms related to behavior therapy (1a, 1b, 2c);
    b. writing behavioral management plan (1a, 1b, 2c);
    c. identifying effective therapy techniques (1a, 1b, 2c);
    d. explaining the treatment process based on experiments in behavior therapy research (1a, 1b, 2a, 2c);
    e. applying ethical principles to use of behavior therapy (1a, 1b, 1c, 2c);
    f. explaining Ellis' ABC theory (1a, 1b, 2c);
    g. describing learning, heredity, and biology as related to behavior therapy (1a, 1b, 2c);
    h. defining target behaviors and maintaining conditions (1a, 1b, 2c).
2. Demonstrate an understanding of positive and negative reinforcement and methods of administration of behavioral reinforcers by
    a. identifying positive and negative reinforcers (1a, 1b, 2c);
    b. describing methods for reinforcing behaviors to decelerate other behaviors (1a, 1b, 2a, 2c);
    c. describing methods of identifying reinforcers (1a, 1b, 2a, 2c);
    d. defining prompting and stimulus control (1a, 1b, 2a, 2c);
    e. describing case studies in behavior therapy research (1a, 1b, 2c).
3. Demonstrate an understanding of cognitive behavioral therapy and behavior management by
    a. defining prompting and stimulus control (1a, 1b, 2c);
    b. differentiating characteristics of behavioral assessment (1a, 1b, 2c);
    c. producing a behavioral management program (1a, 1b, 2a, 2c);
    d. describing a cognitive behavioral program (1a, 1b, 2a, 2c);
    e. describing learning, heredity, and biology related to behavior therapy (1a, 1b, 2a, 2c).

Course Rubric	Course Number	Course Title
PTHA	1201	The Profession of Physical Therapy

Semester Credit Hours	Lecture Hours	Lab Hours
2	2	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). Introduction to the profession of physical therapy and the role of the physical therapist assistant.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the history, purpose, and scope of physical therapy; identify the roles and responsibilities of the physical therapist assistant.

Upon successful completion of this course, students will:

1. Analyze the Texas Physical Therapy Practice Act and Rules by
    a. explaining the legal and ethical roles of the physical therapist (PT), physical therapist assistant (PTA), and physical therapy aide in clinical practice (1a, 1b, 2d);
    b. explaining initial and renewal licensure requirements (1a, 1b, 2d);
    c. identifying specific incidences where disciplinary action of licensees by the Texas Board of Physical Therapy Examiners can occur (1a, 1b, 2d);
    d. explaining procedures for reporting illegal and/or unethical practice to the Texas Board of Physical Therapy Examiners (1a, 1b, 2d).
2. Analyze the health care system by
    a. discussing medical and physical therapy reimbursement (1a, 1b, 2d);
    b. discussing fiscal responsibility in physical therapy practice (1a, 1b, 2d);
    c. discussing the health insurance industry, including Medicare and Medicaid (1a, 1b, 2d);
    d. identifying the systems found in a typical hospital (1a, 1b, 2d);
    e. discussing management issues and theories (1a, 1b, 2d).
3. Explore the practice of physical therapy by
    a. discussing the history of the field of physical therapy (1a, 1b, 2d);
    b. describing the practice settings for PTs and PTAs (1a, 1b, 2d);
    c. discussing the role of professional organizations such as the American Physical Therapy Association (1a, 1b, 2d).

PTHA 1225 - Communication in Health Care

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the theories and principles of effective communication; apply effective communication skills.

Upon successful completion of this course, students will:

1. Demonstrate awareness of skills required to accurately and effectively convey one's thoughts and emotions, verbally and in written communications by
    a. describing problems resulting from the ineffective use of communication (1a, 1b, 1c, 2c, 2d, 2e);
    b. demonstrating awareness of how to improve communication (1a, 1b, 1c, 2c, 2d, 2e);
    c. demonstrating the importance of ethics in communication (1a, 1b, 1c, 2c, 2d, 2e);
    d. giving examples of the importance of cultural competency in communication (1a, 1b, 1c, 2c, 2d, 2e);
    e. explaining the importance of nonverbal communication (1a, 1b, 1c, 2c, 2d, 2e);
    f. comparing conversational communication with patient communication (1a, 1b, 1c, 2c, 2d, 2e);
    g. applying the principles of medical documentation (1a, 1b, 1c, 2c, 2d, 2e);
    h. performing patient communication scenarios (1a, 1b, 1c, 2c, 2d, 2e);
    i. presenting a therapy program to another student (1a, 1b, 1c, 2c, 2d, 2e).
2. Present an effective, informative patient case report to an audience by
    a. locating appropriate supporting materials from written and electronic sources (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. using effective visuals (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. displaying effective delivery techniques (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. displaying professional behavior (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. using appropriate medical and physical therapy terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e).

PTHA 1321 - Pathophysiology for the PTA

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the etiology, pathogenesis, signs/symptoms, and treatments of selected diseases/conditions; identify the impact of the pathologies in physical therapy.

Upon successful completion of this course, students will:

1. Analyze the pathophysiology of certain human diseases/conditions as they relate to physical therapy treatment by
    a. identifying etiology and epidemiology of disease (1a, 1b, 2c, 2d);
    b. describing clinical signs and symptoms (1a, 1b, 2c, 2d);
    c. describing secondary complications (1a, 1b, 2c, 2d);
    d. identifying medical treatment (1a, 1b, 2c, 2d);
    e. describing physical therapy interventions and data collection (1a, 1b, 2c, 2d);
    f. explaining goals of physical therapy treatment (1a, 1b, 2c, 2d);
    g. defining and applying appropriate medical terminology (1a, 1b, 2c, 2d).
2. Present an effective informational speech to an audience by
    a. locating appropriate supporting materials from written and electronic sources (1a, 1b, 1c, 2b, 2c, 2e);
    b. using appropriate visuals effectively (1a, 1b, 1c, 2b, 2c, 2e);
    c. demonstrating appropriate public speaking behavior (1a, 1b, 1c, 2b, 2c, 2e);
    d. displaying effective delivery techniques (1a, 1b, 1c, 2b, 2c, 2e).
3. Compose an informational report on an assigned human disease/condition by
    a. locating appropriate supporting materials from written and electronic sources (1a, 1b, 1c, 2b, 2c, 2e);
    b. using appropriate medical terminology (1a, 1b, 1c, 2b, 2c, 2e);
    c. following the American Medical Association style guide (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe principles and techniques of patient handling and functional skills; demonstrate performance of basic patient handling and functional skills; demonstrate selected data collection techniques; and demonstrate communication skills.

Upon successful completion of this course, students will:

1. Demonstrate competency in physical therapy skills appropriate for a PTA by
    a. demonstrating select intervention skills in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating select data collection skills in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. displaying professional behavior in the laboratory setting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. operating physical therapy machinery and tools safely (1a, 1b, 1c, 2a, 2b, 2c, 2e).
2. Discuss patient care skills related to physical therapy by
    a. discussing gait training with assistive devices (1a, 1b, 2a, 2c);
    b. discussing basic wound management (1a, 1b, 2a, 2c);
    c. explaining infection control procedures (1a, 1b, 2a, 2c);
    d. discussing basic therapeutic exercise (1a, 1b, 2a, 2c);
    e. discussing patient transfers and bed mobility (1a, 1b, 2a, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Locate the musculoskeletal and neurological structures of the human body; differentiate between normal and abnormal movement.

Upon successful completion of this course, students will:

1. Explain basic principles of human movement by
    a. applying osteokinematic and arthrokinematic principles (1a, 1b, 2c);
    b. using appropriate anatomical terminology (1a, 1b, 2c);
    c. identifying the function and structure of muscles, ligaments, tendons, nerves, bones, joints, and other body tissues (1a, 1b, 2c).
2. Demonstrate palpation skills of anatomical structures using a laboratory partner by
    a. relating anatomical structures of the musculoskeletal system with surface anatomy landmarks (1a, 1b, 1c, 2b, 2c);
    b. comparing anatomical structures of varying body types (1a, 1b, 1c, 2b, 2c);
    c. displaying professional behavior (1a, 1b, 1c, 2b, 2c).

PTHA 1431 - Biophysical Agents

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the biophysical principles and efficacy of physical agents; relate knowledge of indications, contraindications and precautions to interventions; apply physical agents; demonstrate communication skills.

Upon successful completion of this course, students will:

1. Analyze the use of physical agents used in clinical practice by
    a. identifying indications and contraindications (1a, 1b, 2c);
    b. describing the physiological effects (1a, 1b, 2c);
    c. explaining appropriate parameters of treatment (1a, 1b, 2c);
    d. applying medical and physical therapy terminology (1a, 1b, 2c).
2. Demonstrate select physical agents using a laboratory partner by
    a. applying patient positioning and draping principles (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. using appropriate medical and physical therapy terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. operating physical therapy machinery and tools safely (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. selecting appropriate parameters of treatment (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. displaying professional behavior (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Perform data collection techniques; identify changes in data collected. Report results.

Upon successful completion of this course, students will:

1. Analyze human gait by
    a. identifying normal and abnormal gait components (1a, 1b, 1c, 2a, 2b, 2c);
    b. explaining phases and sub-phases of gait (1a, 1b, 1c, 2a, 2b, 2c);
    c. describing muscle actions during phases of gait (1a, 1b, 1c, 2a, 2b, 2c);
    d. identifying gait deviations in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c).
2. Explore human joint goniometry by
    a. identifying normal joint range of motion values (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. explaining pathological and non-pathological influences on joint motions (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. describing common goniometric procedures (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. demonstrating goniometric joint measurements in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c, 2e).
3. Explore muscle testing by
    a. explaining purposes of muscle testing (1a, 1b, 1c, 2a, 2b, 2c);
    b. comparing use of manual and mechanical testing (1a, 1b, 1c, 2a, 2b, 2c);
    c. explaining scales/grades used with manual muscle testing (1a, 1b, 1c, 2a, 2b, 2c);
    d. demonstrating manual muscle testing in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Prepare for licensure, employment, and professional development; identify legal, ethical, and professional behaviors.

Upon successful completion of this course, students will:

1. Prepare for taking the PTA Board Exam by
    a. producing a computerized, comprehensive exit exam (1a, 1b, 2a, 2c, 2e);
    b. determining weak areas of knowledge (1a, 1b, 2a, 2c, 2e);
    c. locating and using appropriate resources for preparation (1a, 1b, 2a, 2c, 2e);
    d. recalling and composing summaries of professional journal articles related to physical therapy (1a, 1b, 2a, 2c, 2e).
2. Prepare and give a continuing education program to fellow classmates by
    a. reviewing professional journal articles related to topic (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. creating appropriate program, considering content and audience (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. planning and scheduling the program within a specific timeframe (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. creating summary of attended programs given by peers (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Demonstrate professional attributes identified as essential to that required of an entry level PTA by
    a. seeking out learning opportunities (1a, 1b, 1c, 2a, 2b);
    b. recognizing fiscal obligations to facility and customers (1a, 1b, 1c, 2a, 2d);
    c. participating in own performance appraisal using the PTA MACS clinical grading tool (1a, 1b, 1c, 2d);
    d. following Texas Physical Therapy Practice Act and Rules (1b, 1c, 2b, 2d);
    e. respecting patient dignity and rights (1a, 1b, 1c, 2b, 2c, 2d);
    f. exhibiting professional behaviors (1a, 1b, 1c, 2b, 2c, 2d);
    g. applying appropriate communication skills (1a, 2b);
    h. following the American Physical Therapy Association's guide for ethical conduct (1a, 1b, 1c, 2a, 2b, 2d);
    i. developing positive working relationships with staff (1b, 1c, 2b);
    j. following facility policy and procedures (1a, 1b, 1c, 2b, 2d);
    k. demonstrating continuous self-assessment and improvement (1a, 1b, 1c, 2b).
2. Provide appropriate patient care and treatment by
    a. performing assigned duties of intern PTA under direction and supervision of a licensed physical therapist (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. reacting to normal and abnormal patient responses (1a, 1b, 1c, 2b, 2c);
    c. applying medical and physical therapy principles (1a, 1b, 2a, 2c);
    d. applying problem solving and critical thinking skills (1a, 1b, 2a, 2b, 2c, 2d);
    e. demonstrating selected interventions and data collection skills (1a, 1b, 2a, 2c, 2e);
    f. employing safe work practices (1b, 1c, 2b, 2d);
    g. applying classroom theory to clinical situations (1a, 2b, 2c);
    h. documenting patient treatment in medical record (1a, 1b, 2a, 2c, 2d, 2e);
    i. incorporating newly learned skills into practice (1a, 1b, 1c, 2a, 2c, 2d);
    j. modifying interventions within Plan of Care to fit patient needs (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the principles of therapeutic exercise; formulate a rationale for the implementation of therapeutic exercise; demonstrate techniques of therapeutic exercise and functional training; execute patient education; and demonstrate communication skills.

Upon successful completion of this course, students will:

1. Demonstrate competency in therapeutic exercise in a laboratory setting by
    a. demonstrating select intervention skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating select data collection skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. displaying professional behavior (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. operating physical therapy machinery and tools safely (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. identifying treatment contraindications (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. selecting effective treatment parameters (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. using appropriate medical and physical therapy terminology (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    h. applying principles of arthrokinematics and osteokinematics (1a, 1b, 1c, 2a, 2b, 2c, 2e).
2. Analyze the therapeutic exercises used with physical therapy patients who have select body disorders or dysfunctions by
    a. identifying treatment indications and contraindications (1a, 1b, 2c, 2e);
    b. describing the etiology and clinical manifestations of the disorders (1a, 1b, 2c, 2e);
    c. identifying effective treatment parameters (1a, 1b, 2c, 2e);
    d. comparing the various forms of therapeutic exercise (i.e. stretching, strengthening, and aerobic) (1a, 1b, 2c, 2e);
    e. creating a diagnosis specific exercise program (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the management of patients with neurological disorders; demonstrate rehabilitation techniques for neurological disorders; demonstrate communication skills.

Upon successful completion of this course, students will:

1. Analyze the physical therapy and medical treatment of select neurological disorders by
    a. explaining principles of motor learning and motor control (1a, 1b, 2c, 2d);
    b. describing the clinical manifestations of the disorders (1a, 1b, 2c, 2d);
    c. explaining the use of pharmacological agents with the disorders (1a, 1b, 2c, 2d);
    d. describing appropriate physical therapy interventions and data collection (1a, 1b, 2c, 2d);
    e. identifying neuroanatomical structures (1a, 1b, 2c, 2d).
2. Demonstrate competency in physical therapy skills in a laboratory setting by
    a. demonstrating select intervention skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating select data collection skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. displaying professional behavior (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. operating physical therapy machinery and tools safely (1a, 1b, 1c, 2a, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe physical therapy management of patients with selected diseases and disorders; demonstrate rehabilitation techniques for diseases and disorders; and demonstrate communication skills.

Upon successful completion of this course, students will:

1. Explore the use of physical therapy with women's health issues by
    a. discussing health issues related specifically to women (1a, 1b, 1c, 2a, 2b, 2c);
    b. discussing appropriate interventions and data collection (1a, 1b, 1c, 2a, 2b, 2c);
    c. demonstrating selected interventions and data collection skills in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c);
    d. displaying professional behaviors (1a, 1b, 1c, 2a, 2b, 2c).
2. Explore the use of medical prosthetics and orthotics by
    a. discussing the purpose for using a particular prosthetic/orthotic based on patient diagnosis and goal (1a, 1b, 1c, 2a, 2b, 2c);
    b. creating a patient education program (1a, 1b, 1c, 2a, 2b, 2c);
    c. describing pre-prosthetic and prosthetic therapy interventions and data collection (1a, 1b, 1c, 2a, 2b, 2c);
    d. describing common prosthetic/orthotic components (1a, 1b, 1c, 2a, 2b, 2c);
    e. demonstrating post-amputation wrapping techniques in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c).
3. Explore the use of electrotherapy in physical therapy by
    a. discussing indications, contraindications, and precautions for selected electrotherapy devices (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. demonstrating selected electrotherapy devices in a laboratory setting (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. applying knowledge of patient disease/condition in the selection and setup of an electrotherapy device (1a, 1b, 1c, 2a, 2b, 2c, 2e).
4. Analyze pain management by
    a. explaining theories of pain management (1a, 1b, 1c, 2c, 2d, 2e);
    b. comparing pain and well behaviors (1a, 1b, 1c, 2c, 2d, 2e);
    c. discussing specific physical therapy interventions used for pain management (1a, 1b, 1c, 2c, 2d, 2e);
    d. demonstrating, in a laboratory setting, specific therapy techniques for pain management (1a, 1b, 1c, 2c, 2d, 2e).
5. Examine advanced wound management by
    a. discussing the physical therapy modalities used in wound management (1a, 1b);
    b. discussing various wound dressings and their effects on wound healing (1a, 1b);
    c. determining barriers to wound healing (1a, 1b).
6. Explore aging theories by
    a. describing physiological and psychological changes (1a, 1b);
    b. describing communication changes (1a, 1b);
    c. explaining how the delivery of physical therapy procedures is modified with the geriatric patient (1a, 1b).
7. Examine chest physical therapy by
    a. demonstrating specific interventions in a laboratory setting (1a, 1b, 1c, 2b, 2c);
    b. describing normal lung function and structure (1a, 1b, 1c, 2b, 2c);
    c. showing chest wall movement using a laboratory partner (1a, 1b, 1c, 2b, 2c);
    d. explaining physical therapy interventions used with various respiratory conditions (1a, 1b, 1c, 2b, 2c).

PTRT 1313 - Industrial Safety

General

9955

Course Rubric	Course Number	Course Title
PTRT	1313	Industrial Safety

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) An overview for petroleum and manufacturing workers of state/federal regulations and guidelines which require industrial safety training. Topics include the 29 C.F.R. 1910, 1926 standards such as confined space entry, emergency action, lock out/tag out, and other work related subjects.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the basic components of safety, health, and environmental systems as applied to oil and gas operations.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the history and importance of industrial and personal safety within the workplace by
    a. presenting an overview of safety and the health movement to the class (1a, 1b);
    b. listing possible accidents and their effects (1a, 1b);
    c. proposing theories of accident causation (1a, 1b).
2. Demonstrate an understanding of the standards, certifications, liabilities, and compensation provided to injured workers by
    a. identifying the above as they relate to safety, health, and competition in the global marketplace (2a, 2c);
    b. identifying the above as they relate to national and state OSHA standards and liability (2a, 2c);
    c. identifying the above as they relate to the necessity for workman's compensation (2a, 2c).
3. Demonstrate an understanding of proper safety procedures towards his/her own personal work habits by
    a. explaining proper use of accident investigation and reporting (1b, 1c);
    b. listing product safety features and the manufacturer's liability (1b, 1c);
    c. explaining the problem of stress and poor safety habits (1b, 1c);
    d. explaining the need for proper safety and health training (1b, 1c).
4. Demonstrate an understanding of hazard assessment, prevention, and control by
    a. listing negative results of falling, impact, acceleration, lifting, and vision hazards (1b, 2c);
    b. describing the hazards of temperature extremes (1b, 2c);
    c. assessing the pressure, electrical, and fire hazards that apply to the workplace (1b, 2c).
5. Demonstrate an understanding of industrial hygiene in confined spaces by
    a. listing different toxic substances used along with their effects on workers (2a, 2c);
    b. explaining the effects of airborne toxins and carcinogens (2a, 2c);
    c. practicing the use of respirators (2a, 2c);
    d. developing a confined space management policy (2a, 2c).
6. Demonstrate an understanding of proper procedures to deal with radiation, noise, and vibration hazards by
    a. explaining how to respond to radiation exposure and the limitations of exposure time (1b, 2d);
    b. listing the different sources of radiation exposure harmful to humans (1b, 2d);
    c. identifying the proper signs and labels to warn of radiation exposure (1b, 2d);
    d. identifying the work areas where noise could prove harmful to employees (1b, 2d);
    e. developing a process to identify and assess hazardous noise conditions (1b, 2d);
    f. evaluating the results of vibration hazards (1b, 2d).
7. Develop a plan to deal with emergencies and terrorism by
    a. explaining the need to plan to prevent accidents and emergencies (1b, 2c);
    b. producing a safety manual to handle emergencies (1b, 2c);
    c. promoting safe working habits throughout all lab experiences (1b, 2c);
    d. employing the Environmental Safety and ISO 14000 in procedures to handle safety issues (1b, 2c).

QCTC	1341	Statistical Process Control

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Components of statistics including techniques of collection, presentation, analysis, and interpretation of numerical data as applied to statistical control. Stresses application of correlation methods, analysis of variance, dispersion, sampling, quality control, reliability, mathematical models, and programming.

Course Learning Outcomes

Course Learning Outcomes
Specific competencies are identified in designated course goals and learning outcomes. Describe the benefits and applications of statistical process control; use the seven tools of statistical process control; analyze data to calculate control limits; and identify out of control conditions.

Upon successful completion of this course, students will:

1. Demonstrate the use of seven tools of statistical process control by
    a. applying check sheet;
    b. applying histogram;
    c. applying pareto chart;
    d. applying cause-and-effect diagram;
    e. applying control chart;
    f. applying scatter diagram;
    g. applying stratification.
2. In Statistical Process Control (SPC), to calculate control limits by
    a. calculating the mean (average) of your sample data[
    b. estimating the standard deviation (sigma);
    c. adding and subtracting three times the standard deviation from the mean;
    d. determine the upper control limit (UCL) and lower control limit (LCL);
    e. constructing frequency and relative frequency distribution tables for a data set.
3. Statistical Process Control (SPC), an out of control condition, is identified by
    a. point falls outside the established control limits on a control chart;
    b. indicating a significant deviation from the expected process behavior;
    c. signifying a special cause variation requiring;
    d. representations of data.

RADR 1201 - Introduction to Radiography

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Radiography from the American Registry of Radiologic Technologists, the Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics), and the current Radiography Curriculum Guide from the American Society of Radiologic Technology.

End-of-Course Outcomes: Define basic medical terms; identify ethical and legal standards; explain basic radiation protection practices; and relate the role of radiography to health care.

Upon successful completion of this course, students will:

1. Use knowledge of the historical development of radiography as a basis for the demonstration of professional behavior and involvement by
    a. selecting the appropriate professional attitude/behavior in a given situation (1a, 1b, 1c, 2b, 2d);
    b. identifying actions that indicate continuous professional involvement (1a, 1b, 1c, 2c, 2d).
2. Demonstrate understanding of the cardinal principles of basic radiation procedures by
    a. identifying appropriate use of distance for radiation protection (1a, 1c, 2a, 2b, 2d);
    b. identifying appropriate use of shielding for patient, others, and self (1a, 1c, 2a, 2b, 2d);
    c. identifying appropriate use of time for radiation protection (1b, 1c, 2a, 2b, 2d).
3. Use introductory radiographic medical terms appropriately by
    a. defining the terms used to describe and/or explain positioning, procedure, and projection (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. defining the terms related to radiographic technical factors (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. identifying diagnostic radiographic equipment when presented with the appropriate term (1a, 1b, 1c, 2a, 2b, 2c, 2d).
4. Describe introductory ethical and legal terms and associated concepts for health care professionals appropriately by
    a. defining assigned ethical and legal terms (1a, 1b, 2a, 2b, 2c, 2d);
    b. stating the four elements of negligence (1a, 1b, 2a, 2b, 2c, 2d).
5. Demonstrate understanding of the orientation to the program by
    a. paraphrasing the program student handbook (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. recalling information provided in the DFWHC Student Orientation packet (1a, 1b, 1c, 2a, 2b, 2c, 2d).
6. Generalize an orientation to the health care system by
    a. listing sources of health care delivery (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. listing methods of health care payments (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. outlining a sample hierarchy of a health care facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. outlining a medical imaging department hierarchy (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. describing the composition of a health care team (1a, 1b, 1c, 2a, 2b, 2c, 2d).

RADR 1203 - Patient Care

8027

Course Rubric	Course Number	Course Title
RADR	1203	Patient Care

Semester Credit Hours	Lecture Hours	Lab Hours
2	2	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). An introduction in patient assessment, infection control procedures, emergency and safety procedures, communication and patient interaction skills, and basic pharmacology.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Radiography Content Specifications from the American Registry of Radiologic Technologists, the Curriculum Grid from the Joint Review Committee of Education in Radiologic Technology, the current Radiography Curriculum from the American Society of Radiologic Technology, and the Texas DSHS-MRT Division: Title 25 Texas Administrative Code, Chapter 140, Section 143.9.

End-of-Course Outcomes: Explain general safety in patient care practices; assess patient condition; describe infection control procedures; recognize and respond to emergency situations; identify relevant pharmaceuticals and their applications; and describe basic medical equipment operations.

Upon successful completion of this course, students will:

1. Demonstrate understanding of patient, other individuals of the health care team, communication, and interaction skills at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. explaining the need for efficient communication in order to deliver timely health care (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate understanding of patient assessment at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. applying the presented problem solving steps to a given situation (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. measuring vital signs (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate understanding of correct body mechanics to facilitate the moving and transferring of patients at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. identifying various body positions for safety, comfort, and/or examination procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d).
4. Demonstrate understanding of infection control procedures at the pre-clinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. stating the links in the chain of infection (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. explaining how to disrupt the links of the chain of infection (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. differentiating between hand washing and surgical scrubbing (1a, 1b, 1c, 2a, 2b, 2c, 2d).
5. Demonstrate understanding of basic clinical safety procedures in a medical as well as nonmedical emergent situation at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. stating the student role in case of a nonmedical emergent situation as well as in a medical emergent situation (1a, 1b, 1c, 2a, 2b, 2c, 2d).
6. Demonstrate understanding of basic pharmacology within the radiology department at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. stating the current six rights of the administration of medication (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Function under direct and indirect supervision by
    a. performing all general patient care activities except venipuncture (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating competence in routine designated radiologic procedures of the thorax, abdomen, and selected upper and lower extremities (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing requisition evaluation, patient assessment, and room preparation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Radiography from the American Registry of Radiologic Technologists www.arrt.org, Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics) www.jrcert.org, and the current Radiography Curriculum Guide and Practice Standards from the American Society of Radiologic Technology www.asrt.org.

End-of-Course Outcomes: Define radiographic positioning terms; manipulate equipment; perform basic level procedures in positioning; align anatomic structures and equipment; and evaluate images.

Upon successful completion of this course, students will:

1. Produce radiographic images and identify anatomy of selected areas of the upper extremity by
    a. producing images of the fingers and thumb (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the hand and wrist (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the forearm and elbow (1a, 1b, 1c, 2b, 2c, 2e).
2. Produce radiographic images and identify anatomy of selected areas of the lower extremity by
    a. producing images of the toes and foot (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the ankle and heel (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the tibia/fibula and knee (1a, 1b, 1c, 2b, 2c, 2e).
3. Simulate radiographic image production, identify anatomy of the chest, produce a radiographic image, and identify anatomy of the abdominal region by
    a. simulating producing images of the thorax (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing an image (KUB) of the abdomen (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Radiography from the American Registry of Radiologic Technologists, Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics), and the current Radiography Curriculum Guide from the American Society of Radiologic Technology.

End-of-Course Outcomes: Apply the basic principles of radiographic image acquisition to image quality; and analyze the effects of exposure variables upon image quality.

Upon successful completion of this course, students will:

1. Describe x-ray beam formation by
    a. describing basic operation of an x-ray machine (1a, 1b, 2c, 2e);
    b. describing x-ray production (1a, 1b, 2c, 2e).
2. Describe radiographic image formation by
    a. describing x-ray/patient interactions (1a, 1b, 2c, 2e);
    b. describing latent/visual image formation on film (1a, 1b, 2c, 2e);
    c. describing x-ray protection concepts/procedures (1a, 1b, 2c, 2e).
3. Describe radiographic image quality by
    a. describing primary exposure factors (1a, 1b, 2c, 2e);
    b. describing how exposure factors influence image quality (1a, 1b, 2c, 2e);
    c. describing how exposure factors are changed to alter image appearance (1a, 1b, 2c, 2e).

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Upon successful completion of this course, students will:

1. Demonstrate the ability to recall and apply previously learned didactic, lab, and clinical experiences by
    a. accomplishing initial competency documentation under direct supervision (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. accomplishing interim proficiency documentation under indirect supervision (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. accomplishing task items as listed on the ARRT Task Inventory (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Function under direct supervision within the surgical suite by
    a. operating the C-Arm for surgical/sterile procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. maneuvering around the sterile field and any medical lines, tubes, etc., in the procedural area (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Differentiate between conventional and digital equipment; explain the physics of x-ray production; describe x-ray circuits; and relate conventional and digital equipment components to the imaging process.

Upon successful completion of this course, students will:

1. Demonstrate understanding of radiographic equipment for x-ray production by
    a. defining assigned terminology (1a, 1b, 2a, 2b, 2c, 2d);
    b. describing characteristics of matter and energy (1a, 1b, 2a, 2b, 2c, 2d);
    c. identifying sources of ionizing radiation (1a, 1b, 2a, 2b, 2c, 2d).
2. Demonstrate understanding of the physics of x-ray production at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 2a, 2b, 2c, 2d);
    b. describing the general design of the x-ray tube (1a, 1b, 2a, 2b, 2c, 2d);
    c. discussing the interactions between projectile electrons and the x-ray target (1a, 1b, 2a, 2b, 2c, 2d).
3. Demonstrate understanding of the basic x-ray circuits at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. identifying the relationships between electricity and magnetism (1a, 1b, 2a, 2b, 2c, 2d);
    c. explaining the concept of electromagnetic induction (1a, 1b, 2a, 2b, 2c, 2d).
4. Demonstrate understanding of quality assurance at the preclinical entry level by
    a. defining assigned terminology (1a, 1b, 2a, 2b, 2c, 2d);
    b. describing the quality control tests and schedule for radiographic systems (1a, 1b, 2a, 2b, 2c, 2d).

Workforce Education Course Manual (WECM)

Description
(2-2-0). Effects of radiation exposure on biological systems. Includes typical medical exposure levels, methods for measuring and monitoring radiation, and methods for protecting personnel and patients from excessive exposure.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Radiography Content Specifications from the American Registry of Radiologic Technologists, the Curriculum Grid from the Joint Review Committee of Education in Radiologic Technology, the current Radiography Curriculum from the American Society of Radiologic Technology, and the Texas DSHSMRT Division: Title 25 Texas Administrative Code, Chapter 140, Section 143.9.

End-of-Course Outcomes: Describe the biophysical mechanisms of radiation damage on humans; indicate typical dose ranges for routine radiographic procedures; describe basic methods and instruments for radiation monitoring, detection, and measurement; and implement radiation protection practices.

Upon successful completion of this course, students will:

1. Demonstrate understanding of radiation exposure on biological systems by
    a. differentiating between short term and long term effects of radiation exposure (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. differentiating between effects of limited and total body exposures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Use knowledge of typical medical exposure levels in discussions with colleagues and to educate patients as needed by
    a. demonstrating understanding of current radioactivity units of measurements in light of historical development of radioactivity units of measurements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying dose equivalent units/limits for occupation and nonoccupational radiation exposure (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. measuring vital signs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Select the appropriate method for measuring and monitoring radiation in a given situation by
    a. identifying the advantages and disadvantages of the various personnel monitoring dosimeters (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying the advantages and disadvantages of the various radiation survey instruments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Apply various methods for protecting patients, personnel, and others from excessive exposure by
    a. justifying the need to minimize unproductive radiation exposure to humans (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. selecting appropriate method(s) to protect those involved in the procedure (and to use methods selected in clinic), in a given situation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. interpreting personnel monitoring reports (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the various specialized imaging modalities; and differentiate between images produced by different modalities and identify the anatomy demonstrated.

1. Demonstrate an understanding of the fundamentals of digital radiography by
    a. identifying computer science fundamentals (1a, 1b, 2b, 2c, 2d);
    b. describing advantages of computed radiography over screen film radiography (1a, 1b, 2b, 2c, 2d);
    c. identifying components of five digital radiographic modes and systems (1a, 1b, 2b, 2c, 2d).
2. Demonstrate an understanding of the image characteristics of digital images by
    a. defining digital imaging terminology as identified by the ASRT (1a, 1b, 2b, 2c, 2d);
    b. defining spatial resolution and contrast resolution (1a, 1b, 2b, 2c, 2d);
    c. discussing characteristics of digital imaging as related to patient dose (1a, 1b, 2b, 2c, 2d).
3. Demonstrate an understanding of the fundamentals of computed tomography by
    a. defining terminology associated with computed tomography (1a, 1b, 1c, 2b, 2c, 2d);
    b. identifying computed tomography system components and functions (1a, 1b, 1c, 2b, 2c, 2d);
    c. identifying the advantages of multi-slice spiral computed tomography (1a, 1b, 1c, 2b, 2c, 2d).

Description
(2-2-0). A capstone course focusing on the synthesis of professional knowledge, skills, and attitudes in preparation for professional employment and lifelong learning. Intermediate level information on pharmacology/drug administration/venipuncture included.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Radiography Content Specifications from the American Registry of Radiologic Technologists, the Curriculum Grid from the Joint Review Committee of Education in Radiologic Technology, the current Radiography Curriculum from the American Society of Radiologic Technology, as well as the Texas DSHS - MRT Division: Title 25 Texas Administrative Code, Chapter 140, Section 143.9.

End-of-Course Outcomes: Demonstrate entry level proficiency in knowledge, skills, and attitudes necessary for professional employment; and articulate the need for lifelong learning.

1. Synthesize professional knowledge, skills, and attitudes in preparation for professional employment by
    a. recalling learned information from previous semesters in the radiological sciences (1a; 1b);
    b. composing a workable resume (1a, 1b, 1c, 2c, 2e);
    c. preparing to take the national registry (1a, 1b, 1c, 2c).
2. Synthesize professional knowledge, skills, and attitudes in preparation for lifelong learning by
    a. explaining what lifelong learning is (1a, 1b, 1c);
    b. examining choices for lifelong learning in the radiologic sciences (1a, 1b, 1c, 2c).
3. Compare/contrast between radiologic science ethics and laws by
    a. explaining the differences between ethics and laws as they pertain to radiologic technology (1a, 1b, 1c);
    b. defining legal terms as they apply to radiologic technology (1a, 1b, 1c);
    c. examining and analyzing case studies about legal ethics in radiologic technology (1a, 1b, 1c).
4. Compare/contrast pharmacology and drug administration by
    a. classifying drugs in an operable order (1a, 1b, 1c);
    b. recalling the drugs and their usage in radiologic procedures (1a, 1b, 1c);
    c. explaining the contraindications of drugs used in radiological procedures (1a, 1b, 1c).
5. Explain and demonstrate venipuncture by
    a. recalling the steps involved in preparing a site for intravenous injection (1a, 1b, 1c, 2b);
    b. demonstrating the steps (with a mannequin) involved in intravenous injection (1a, 1b, 1c, 2b);
    c. performing a live intravenous stick (1a, 1b, 1c, 2b).

RADR 2301 - Intermediate Radiographic Procedures

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by current Content Specifications for the Examination in Radiography from the current American Registry of Radiologic Technologists, the Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics), and the current Radiography Curriculum Guide from the American Society of Radiologic Technology.

End-of-Course Outcomes: Manipulate equipment; perform intermediate level procedures in positioning; align anatomic structures and equipment; and evaluate images.

1. Produce radiographic images of selected areas of the upper extremity by
    a. producing images of the humerus (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the shoulder (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the shoulder girdle (1a, 1b, 1c, 2b, 2c, 2e).
2. Produce radiographic images of selected areas of the lower extremity by
    a. producing images of the femur (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the hip (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the pelvic girdle (1a, 1b, 1c, 2b, 2c, 2e).
3. Produce radiographic images of the thoracic and abdominal regions by
    a. producing images of the thorax (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the abdomen (1a, 1b, 1c, 2b, 2c, 2e).
4. Produce radiographic images of the spine by
    a. producing images of the cervical spine (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the thoracic spine (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the lumbar spine (1a, 1b, 1c, 2b, 2c, 2e);
    d. producing images of the sacrum/coccyx (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Radiography from the American Registry of Radiologic Technologists, Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics), and the current Radiography Curriculum Guide from the American Society of Radiologic Technology.

End-of-Course Outcomes: Analyze image quality; utilize procedures for minimizing patient exposure; and adapt technical variables to changing conditions.

1. Describe radiographic imaging technique formulation by
    a. describing the control of image density/brightness (1a, 1b, 2c, 2e);
    b. describing the control of image contrast/dynamic range (1a, 1b, 2c, 2e);
    c. describing the control of image detail/spatial resolution (1a, 1b, 2c, 2e);
    d. describing the control of image distortion (1a, 1b, 2c, 2e).
2. Describe radiographic image quality assurance by
    a. describing how to correct for over/under exposure (1a, 1b, 2c, 2e);
    b. describing how to change scale of contrast/dynamic range (1a, 1b, 2c, 2e);
    c. describing how to improve image detail/spatial resolution (1a, 1b, 2c, 2e);
    d. describing how to reduce image distortion (1a, 1b, 2c, 2e).
3. Describe radiographic equipment quality control by
    a. describing basic quality assurance/control (1a, 1b, 2c, 2e);
    b. identifying acceptable limits of various quality control procedures (1a, 1b, 2c, 2e);
    c. describing how exposure factors are changed to alter image appearance (1a, 1b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Radiography from the American Registry of Radiologic Technologists, the Joint Review Committee on Education in Radiologic Technology (Professional Curriculum topics), and the current Radiography Curriculum Guide and Practice Standards from the American Society of Radiologic Technology.

End-of-Course Outcomes: Perform advanced level procedures in positioning; align anatomic structures and equipment; and evaluate images.

1. Produce selected radiographic images of the extremities by
    a. producing images of the upper extremity (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the lower extremity (1a, 1b, 1c, 2b, 2c, 2e).
2. Produce radiographic images of the head by
    a. producing images of the skull (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the sinuses/facial bones (1a, 1b, 1c, 2b, 2c, 2e).
3. Describe digestive system radiography by
    a. identifying patient position/projection/view, anatomy, and pathology on UGI images (1a, 1b, 1c, 2b, 2c, 2e);
    b. identifying patient position/projection/view, anatomy, and pathology on LGI images (1a, 1b, 1c, 2b, 2c, 2e);
    c. performing enema tip insertion on a mannequin (1a, 1b, 1c, 2b, 2c, 2e).
4. Describe radiography of various body systems by
    a. recalling radiographic information of the urinary system (1a, 1b, 1c, 2b, 2c, 2e);
    b. recalling radiographic information of the reproductive system (1a, 1b, 1c, 2b, 2c, 2e);
    c. recalling radiographic information of the central nervous system (1a, 1b, 1c, 2b, 2c, 2e).
5. Describe radiography of various patient types by
    a. recalling pediatric patient information (1a, 1b, 1c, 2b, 2c, 2e);
    b. recalling geriatric patient information (1a, 1b, 1c, 2b, 2c, 2e).
6. Describe radiography in various settings by
    a. recalling trauma radiography information (1a, 1b, 1c, 2b, 2c, 2e);
    b. recalling mobile radiography information and performing mobile radiography in a simulated trauma scenario (1a, 1b, 1c, 2b, 2c, 2e);
    c. recalling surgical radiography information and maneuvering a C-Arm fluoroscopic unit in a simulated surgical scenario (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Examination in Computed Tomography from the American Registry of Radiologic Technologists, The Joint Review Committee on Education in Computed Tomography (Professional Curriculum topics), and the current Radiology Curriculum Guide and Practice Standards from American Society of Radiologic Technology.

End-of-Course Outcomes: Differentiate the various planar orientations used in medical imaging; and identify sectional anatomic structures viewed on medical images.

1. Produce radiographic (CT) images of the brain by
    a. producing images of cranium, facial, and sinus bones (1a, 1b, 1c, 2b, 2c, 2e, 5a, 5b, 5c);
    b. producing images of the brain and arteries (1a, 1b, 1c, 2b, 2c, 2e).
2. Produce radiographic (CT) images of the neck and spine by
    a. producing images of the C-spine (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the T-spine (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the L-spine (1a, 1b, 1c, 2b, 2c, 2e);
    d. identifying the differences of each level (1a, 1b, 1c, 2b, 2c, 2e);
    e. producing images of soft tissue of the neck (1a, 1b, 1c, 2b, 2c, 2a).
3. Produce radiographic (CT) images of the thorax by
    a. identifying the heart (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the lungs (1a, 1b, 1c, 2b, 2c, 2e);
    c. producing images of the heart (1a, 1b, 1c, 2b, 2c, 2e);
    d. producing images of the aorta and carotids (1a, 1b, 1c, 2b, 2c, 2e).
4. Produce radiographic (CT) images of the abdomen and identify which contrast is needed per exam by
    a. scanning the liver in a tri-phase scan (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing delay imaging (1a, 1b, 1c, 2b, 2c, 2e).
5. Produce images of the pelvis by
    a. producing images of a bony pelvis (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of a soft-tissue pelvis (1a, 1b, 1c, 2b, 2c, 2e).
6. Produce radiographic (CT) images of the extremities by
    a. producing images of the upper extremity (1a, 1b, 1c, 2b, 2c, 2e);
    b. producing images of the lower extremity (1a, 1b, 1c, 2b, 2c, 2e).

Course Learning Outcomes
Course content is guided by the current American Registry of Radiologic Technologists Radiography Content Specifications, the Joint Review Committee of Education in Radiologic Technology Curriculum Grid, the American Society of Radiologic Technology current Radiography Curriculum and Practice Standards, and the Texas DSHS-MRT division: Title 25 Texas Administrative Code Chapter 140, Section 143.9.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

1. Transfer previously learned experiences from one clinical location to a new clinical setting by
    a. completing competencies/interims (1a, 1b, 1c, 2b, 2c, 2d);
    b. performing basic patient care and protection (1a, 1b, 1c, 2b).
2. Function under direct and indirect supervision at an apprentice III level capacity by
    a. taking a more active role in the assessment of patients and procedural protocols (1a, 1b, 1c, 2a, 2c, 2d);
    b. performing procedures using contrast media (1a, 1b, 1c, 2c, 2d, 2e).

1. Demonstrate the ability to recall and apply previously learned experiences by
    a. completing any remaining category competencies (1a, 1b, 2b, 2c, 2d);
    b. performing basic patient care and protection (1a, 1b, 1c, 2b);
    c. performing final competency category testing (minimum of six) (1a, 1b, 1c, 2b, 2d, 2e).
2. Function at job entry level under indirect supervision by
    a. recalling routine procedures (1a, 1b, 1c, 2a, 2b, 2c);
    b. assessing patients for cooperation level (1a, 1b, 1c, 2a, 2b, 2c);
    c. operating an R/F room with minimum assistance (1a, 1b, 1c, 2b, 2c, 2d, 2e).

Course Rubric	Course Number	Course Title
RBTC	1351	Robotic Mechanisms

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). The application of principles and the calculation of practical problems involving four bar linkages, cams, gears, and gear trains. Topics include vector quantities, angular displacement, motion concepts, velocities, and motions. Recommended Prerequisite: MATH 1332.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Calculate stroke, path, and angular movement of various mechanisms; define and use scalar and vector quantities; solve simple problems involving relative motion, plane motion, plane rotation, angular displacement, and linear displacement; solve simple problems involving angular and linear velocity, instant center of rotation, relative velocity, and rolling and sliding velocity; and explain the various types of gears, gear trains, cams, ball bearings, lead screws, and their applications.

1. Demonstrate knowledge of the use of hand tools by
    a. identifying the various types of screwdrivers and explaining how they are used;
    b. identifying the various types of pliers and explaining how they are used;
    c. identifying the various types of wrenches and explaining how they are used;
    d. identifying the various socket tools and explaining how they are used;
    e. understanding how to use a torque wrench;
    f. identifying the various types of hammers and explaining how they are used;
    g. identifying the various types of punches and explaining how they are used;
    h. understanding how to use hacksaws;
    i. identifying the various types of files and explaining how they are used;
    j. understanding how to use different types of industrial measuring tools.
2. Understand how fasteners are used in mechanical systems by
    a. understanding the nomenclature associated with various screw thread designs;
    b. explaining the classes of bolt fit and bolt grades;
    c. identifying common industrial threaded fasteners;
    d. explaining how to remove damaged fasteners;
    e. cutting threads using taps and dies.
3. Apply the basic principles of mechanical systems to mechanical system designs by
    a. calculating forces using vectors;
    b. calculating torque;
    c. understanding and applying the concept of mechanical work;
    d. performing lever arm calculations;
    e. performing wheel and axle calculations;
    f. performing pulley calculations;
    g. performing inclined plane calculations;
    h. understanding the use of screws and wedges;
    i. performing mechanical efficiency calculations;
    j. performing mechanical rate calculations;
    k. calculating rotational speed;
    l. understanding and calculating mechanical resistance involving frictional forces;
    m. calculating mechanical power.
4. Understand how lubrication is used to protect mechanical systems by
    a. defining lubrication principles such as viscosity and additives;
    b. explaining the different types of industrial oils;
    c. understanding oil viscosity classifications;
    d. identifying the different types of greases and how they are used.
5. Explain how bearings are used in mechanical systems by
    a. understanding plain bearings and their lubrication;
    b. identifying rolling element bearings;
    c. explaining the use of ball bearings;

d. explaining the use of roller bearings;
e. explaining the use of needle bearings;
f. understanding how bearings are mounted;
g. knowing how to troubleshoot bearing problems.

6. Apply seals, gaskets, and packing to mechanical system applications by
   a. understanding the use of gaskets and elastomeric static seals;
   b. explaining the use of stuffing boxes;
   c. differentiating between automatic and molded packing;
   d. understanding and installing radial lip seals;
   e. understanding and installing mechanical seals;
   f. using labyrinth seals.

7. Understand the use of belt drives in mechanical systems by
   a. explaining standard and classical V-belt nomenclature;
   b. replacing V-belts;
   c. replacing sheaves;
   d. performing belt drive alignments;
   e. understanding V-belt installation and tensioning;
   f. performing V-belt maintenance;
   g. understanding timing belt installation and tensioning.

8. Understand the use of chain drives in mechanical systems by
   a. identifying the different types of roller chains;
   b. explaining the use of roller chain attachments;
   c. understanding inverted tooth (silent chain) drives;
   d. understanding chain sprocket hub design and mounting;
   e. calculating the proper chain design for a mechanical system;
   f. installing a chain drive;
   g. understanding how chain drives are lubricated;
   h. performing chain drive maintenance.

9. Understand the use of gears in mechanical systems by
   a. explaining gear terms and fundamentals;
   b. calculating gear dimensions;
   c. identifying the different types of gears;
   d. understanding how gears are lubricated;
   e. troubleshooting open gear problems;
   f. explaining enclosed gear drive terminology;
   g. identifying common enclosed gear drives and gearbox configurations;
   h. installing gearboxes;
   i. maintaining, rebuilding, or overhauling gearboxes.

10. Understand the use of couplings in mechanical systems by
    a. identifying the different types of rigid couplings;
    b. explaining the use of flexible couplings;
    c. identifying the different types of chain couplings;
    d. identifying the different types of gear couplings;
    e. understanding how elastomeric flexible couplings are applied to mechanical systems;
    f. installing couplings;
    g. using shims;
    h. explaining how to align couplings to compensate for run out and soft foot;
    i. understanding the different types of coupling misalignment and how to correct them.

11. Apply clutches and brakes to mechanical systems by
    a. understanding positive contact clutches;
    b. explaining the use of friction clutches;
    c. explaining the use of fluid clutches;
    d. understanding magnetic clutches and brakes;
    e. applying overrunning clutches to mechanical systems;
    f. identifying the different types of overrunning clutch configurations;
    g. maintaining and troubleshooting clutches and brakes.

12. Use rigging to solve mechanical system lifting and moving problems by
    a. estimating the weight of a mechanical system;
    b. calculating the center of gravity of a mechanical system;
    c. determining the optimal placement of rigging when lifting and moving mechanical systems;
    d. understanding the various types of fiber ropes and how they are used;
    e. tying different types of knots;
    f. explaining the different wire rope configurations;
    g. identifying the different chain link sizes;
    h. calculating sling forces for vertical and angled slings.

RBTC 1401 - Programmable Logic Controllers

General

Course Key
494

Course Rubric	Course Number	Course Title
RBTC	1401	Programmable Logic Controllers

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3). A study in programmable logic controllers (PLC). Topics include processor units, numbering systems, memory organization, relay type devices, timers, counters, data manipulators, and programming.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Recommended Prerequisite(s): MATH 1332

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Write a working PLC program using ladder logic; install and troubleshoot the program; and integrate PLCs into electro-mechanical systems.

1. Demonstrate an understanding of proper safety practices while working with significant voltages, tools, and equipment by
    a. working with 120v AC without causing injury to self or someone else;
    b. working properly with hand tools to install a new programmable controller;
    c. wiring the supply voltages for both the inputs and outputs used on a programmable controller properly.
2. Demonstrate an understanding of the functions and advantages of the main components of a programmable logic controller by
    a. listing the five main components, along with their functions, of each component;
    b. explaining the advantages of each of the different components in a PLC.
3. Demonstrate the ability to program the programmable controller and demonstrate this knowledge using ladder logic programming techniques by
    a. programming a PLC to operate the output devices in response to a controlled input;
    b. programming a PLC to use timing functions to control a manufacturing process;
    c. programming a PLC to use counters to control a simulation process;
    d. programming a PLC to use sequencers to control a predicted sequence of output functions.
4. Demonstrate an understanding of different number systems and the ability to apply that knowledge to different models of programmable controllers by
    a. converting from decimal number system to other number systems such as octal, hexadecimal, and binary;
    b. programming counters and timers with hexadecimal values;
    c. applying binary numbered inputs and outputs to various interface modules.
5. Apply the process of converting from relay logic symbols to ladder logic programming by
    a. identifying the relay logic symbols as electrical components;
    b. converting relay logic symbols to ladder logic programming;
    c. connecting input and output devices to the PLC that are representative of the relay logic symbols.
6. Demonstrate an understanding of the process of setting up a communication link between the programming computer and the PLC by
    a. setting up the communication link using RS-Linx or similar software;
    b. diagnosing a communication problem and reestablishing communication once it has been lost;
    c. choosing the proper port configurations when multiple PLC models are being programmed from the same computer.
7. Create ladder logic programs to solve multiple programming scenarios by
    a. programming the basic input and output ladder logic instructions;
    b. programming the use of timer, counter, and sequencer instructions;
    c. demonstrating the ability to program the math and compare instructions;
    d. programming the basic data manipulation and Boolean instructions.
8. Demonstrate an understanding of the different troubleshooting fundamentals by
    a. utilizing the proper methods of testing the operation of inputs and outputs;
    b. employing software analysis techniques needed to correct a PLC malfunction;
    c. utilizing the proper process for final system checkout.

RBTC 1447 - Electro-Mechanical Devices

Workforce Education Course Manual (WECM)

Description
(4-3-3). A study of electro-mechanical devices found in robotic systems. Includes transformers, switches, and solid state relays. Recommended Prerequisite: CETT-1409

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Install electro-mechanical devices; describe relay logic; and troubleshoot related electrical components found in automated systems.

1. Apply operational amplifiers to industrial process and control applications by
    a. describing the operation of an instrumentation amplifier;
    b. calculating the output voltage and gain of an instrumentation amplifier for a given input voltage;
    c. calculating the output voltage of a logarithmic amplifier;
    d. explaining the operation and calculating the output frequency of a Weinbridge oscillator;
    e. calculating the output voltages and gains of the inverting and non-inverting current differencing amplifier (CDA);
    f. calculating the trigger voltages and currents of the inverting and noninverting CDA comparators with and without hysteresis;
    g. explaining the operation and applications of the CDA window comparator;
    h. describing the operation of the operational trans-conductance amplifier (OTA) and identifying its schematic symbol;
    i. describing applications for the op amp current to voltage converter;
    j. defining the general procedures for troubleshooting op amps.
2. Apply integrated circuits to industrial applications by
    a. describing the function of a voltage to frequency converter (VFC) and calculating the output frequency for a given input voltage;
    b. calculating the capture and lock ranges of a phase locked loop (PLL);
    c. describing the function of a frequency to voltage converter (FVC) and calculating the output voltage for a given input frequency;
    d. explaining the analog to digital (A/D) and digital to analog (D/A) conversion process and describing the operation of A/D converters (ADCs) and D/A converters (DACs);
    e. describing the operation of an analog switch;
    f. defining current sourcing and sinking.
3. Demonstrate an understanding of the operation of wound field DC motors and generators by
    a. describing the operation of ideal, series, shunt, separately excited, and compound DC motors and generators;
    b. identifying the schematic diagrams of the series, shunt, separately excited, and compound DC motors and generators;
    c. determining the performance of DC motors and generators;
    d. giving examples of the use of each of the configurations of series, shunt, separately excited, and compound DC motors and generators.
4. Demonstrate an understanding of the operation of brushless and stepper DC motors by
    a. contrasting the permanent magnet (PM) DC motor with the wound field motor;
    b. describing the characteristics of the three types of magnets used in PM motors;
    c. calculating the factor of merit for a PM motor;
    d. identifying the parts and describing the operation of a brushless DC motor (BDCM);
    e. identifying the parts and describing the operation of the variable reluctance (VR) and PM stepper motors;
    f. describing the operation of an optical encoder;
    g. contrasting the incremental encoder with the absolute encoder.
5. Demonstrate an understanding of the operation of AC motors by
    a. identifying the schematic symbols for the wye and delta connections, and calculating the phase and line voltages and currents;
    b. defining power factor and explaining its relationship to AC motors;
    c. explaining the concepts and units of true, reactive, and apparent (total) power;
    d. classifying AC motors by horsepower and internal construction;
    e. explaining the concept of a rotating field motor and calculating its speed;
    f. explaining how torque is produced in an induction motor;

g. calculating the slip of an induction motor;

h. describing the different methods of starting single phase motors;

i. identifying the special starting methods for synchronous motors.

6. Apply control devices to specific applications of industrial control processes by

a. categorizing control devices into one of five areas;

b. explaining the operation of electromechanical, reed, and solid state relays and describing their advantages and disadvantages in various applications;

c. calculating the firing angle, junction temperature, and power dissipation of an AC thyristor circuit;

d. giving examples of applications of manually and mechanically operated switches;

e. listing four methods by which thyristors are triggered;

f. describing the operation and applications of a solenoid;

g. explaining the operation of motor protection circuits;

h. contrasting the operation and applications of thermal and magnetic overload relays;

i. contrasting the operation and applications of the electromagnetic and solid state relay.

7. Apply power control circuits to industrial process applications by

a. describing the concept of hysteresis and explain how it produces the snap on effect in phase control circuits;

b. describing the operation of the ramp and pedestal circuit, zero voltage switching, and chopper motor control;

c. describing open and closed loop motor control;

d. explaining motor speed control using pulse width modulation;

e. explaining the methods used to control the speed of an AC motor;

f. describing how different power levels are applied to a load using phase control circuitry;

g. describing the operation of a converter;

h. explaining the use of a phase locked loop (PLL) in controlling the speed of a DC motor;

i. explaining the use of transistors and power MOSFETs as power control devices.

8. Apply transducers to industrial process applications by

a. explaining the operation of a transducer in terms of input, conversion, and output;

b. explaining the transduction principle;

c. classifying transducers into one of seven basic areas;

d. calculating an unknown resistance using a bridge circuit;

e. calculating the sensitivity of a bridge circuit.

9. Demonstrate an understanding of the operation of optoelectronic devices by

a. describing the nature of light;

b. defining the terms photometry and radiometry;

c. explaining spontaneous and stimulated emission;

d. calculating the wavelength of a photon;

e. calculating the series resistance of an LED;

f. calculating the frequency difference between longitudinal modes, coherence length and number of wavelengths, divergence, focus beam spot radius, peak, and average power in a laser pulse train;

g. listing the four different types of lasers;

h. classifying lasers as either continuous wave (CW) or pulsed;

i. identifying the schematic symbols for optoelectronic components.

10. Apply the principles of process control to industrial process applications by

a. defining process control;

b. explaining the elements of a process control system;

c. defining process load, lag, and stability and describing how they relate to a process control system;

d. distinguishing between feedback and feed forward control systems;

e. describing the on/off, proportional, integral, and derivative (PID) control modes;

f. contrasting electric and pneumatic controllers;

g. distinguishing between the use of servos and other types of automatic controllers;

h. describing the operation of a synchro.

11. Demonstrate an understanding of the principles of pulse modulation as applied to industrial process applications by

a. defining pulse modulation;

b. determining the minimum sample rate for pulse modulation;

c. explaining the four types of analog modulation and demodulation;

d. listing the advantages and disadvantages of the pulse modulation types;

e. generating pulse code modulation (PCM);

f. demodulating pulse code modulation (PCM);

g. determining quantizing noise values for PCM;

h. explaining the use of a 555 timer to control the pulse width in pulse modulation circuits.

12. Demonstrate an understanding of the way telemetry and data communication are used in industrial process applications by

a. describing frequency division and time division multiplexing;

b. explaining the concepts of data bandwidth, frequency deviation, and modulation index;

c. listing the sources of errors in multiplexed transmission;

d. listing the methods used for data communication and recording on magnetic media;

e. identifying the most important circuits in the RS-232C serial interface standard;

f. calculating frame time, frame rate, sample time, and commutation rate for pulse modulation systems.

13. Apply sequential process control to industrial control applications by

a. defining sequential control;

b. distinguishing a batch process from a continuous process;

c. identifying batch process applications;

d. explaining ladder logic diagrams;

e. generating a ladder logic diagram from a pictorial diagram and sequential process description;

f. explaining the relay logic symbols for the digital functions AND, OR, NAND, NOR and NOT;

g. converting relay logic ladder diagrams to equivalent semiconductor logic diagrams and vice versa.

14. Apply programmable logic controllers (PLCs) to industrial process control by

a. stating the historical definition for the PLC;

b. explaining the parts and functional operation of PLCs;

c. determining the important factors to consider when selecting a PLC for a specific application;

d. identifying the symbols used in a PLC logic ladder diagram;

e. creating PLC logic ladder diagrams for specific control applications.

15. Apply robotics principles to industrial applications by

a. defining an industrial robot;

b. listing four requirements for an industrial robot;

c. explaining the function of the three basic parts of a robot;

d. explaining the concept of degrees of freedom;

e. contrasting the four different robot work envelopes;

f. differentiating between a servo and non-servo controlled robot.

RBTC 2445 - Robot Application, Set-up and Testing

General

Course Key

RBTC	2445	Robot Application, Set-Up and Testing

Semester Credit Hours	Lecture Hours	Lab Hours
4	3	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3). A capstone course that provides the student with laboratory experience in the installation, set-up, and testing of robotic cells. Topics include maintenance. Required Prerequisite(s): CETT-1409 or CETT-1403 and CETT-1405 Recommended Prerequisite(s): CETT-1449 and RBTC-1351

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Required Prerequisite(s): CETT-1409 or CETT-1403 and CETT-1405

Recommended Prerequisite(s): CETT-1449 and RBTC-1351

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Design and implement a robotic cell; troubleshoot and maintain the robotic cell to make it function in an automated environment; and apply design techniques to maintain set cycle times on an automated system.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a knowledge of the development and advancement of industrial and personal robots by
   a. listing the different types of robots (1a, 1b, 2a, 2c, 2d, 2e);
   b. explaining the different jobs that are performed by robots (1a, 1b, 2a, 2c, 2d, 2e);
   c. predicting how robots will be used in the future (1a, 1b, 2a, 2c, 2d, 2e).
2. Show comprehension of robot classification by
   a. classifying robots based upon arm geometry, power sources, applications, control techniques, and path control (1a, 1b, 2a, 2c, 2d, 2e);
   b. describing the motion of the Cartesian, cylindrical, spherical, and articulated robot arm configurations (1a, 1b, 2a, 2c, 2d, 2e);
   c. explaining the operation of the hydraulic, pneumatic, and electromotive force sources used in robotic systems (1a, 1b, 2a, 2c, 2d, 2e).
3. Analyze the effectiveness of automated work cells and CIM Systems by
   a. describing the 3 steps used to implement CIM (1a, 1b, 2a, 2c, 2d, 2e);
   b. evaluating the 6 manufacturing performance measures (1a, 1b, 2a, 2c, 2d, 2e); c. explaining the difference between flexible manufacturing cells and systems (1a, 1b, 2a, 2c, 2d, 2e).
4. Demonstrate a full understanding of End of Arm tooling by
   a. naming the 5 characteristics of good tooling design (1a, 1b, 2a, 2c, 2d, 2e);
   b. classifying all tooling into the proper gripper categories (1a, 1b, 2a, 2c, 2d, 2e);
   c. designing a vacuum gripper system using standard components (1a, 1b, 2a, 2c, 2d, 2e);
   d. describing the difference between multiple end effector systems and multiple gripper systems (1a, 1b, 2a, 2c, 2d, 2e).
5. Demonstrate a working knowledge of mechanical and electrical sensors as they apply to robots by
   a. designing and demonstrating sensors used as input devices on a robotic arm (1a, 1b, 2a, 2c, 2d, 2e);
   b. integrating mechanical sensors in design of a robotic arm (1a, 1b, 2a, 2c, 2d, 2e);
   c. contrasting the effectiveness of the mechanical and electrical sensors (1a, 1b, 2a, 2c, 2d, 2e).
6. Demonstrate an understanding of work cell support systems by
   a. describing the 5 tasks that vision systems perform in automated manufacturing (1a, 1b, 2a, 2c, 2d, 2e);
   b. explaining the components used in vision systems and image recognition (1a, 1b, 2a, 2c, 2d, 2e);
   c. describing the function and operation of an ASRS (1a, 1b, 2a, 2c, 2d, 2e);
   d. contrasting the 2 most popular bar code technologies (1a, 1b, 2a, 2c, 2d, 2e).
7. Demonstrate an ability to integrate robots into the manufacturing environment by
   a. describing the architecture and providing a system overview for the hardware and software found in a typical CIM system (1a, 1b, 2a, 2c, 2d, 2e);
   b. discussing the component integration issues with current PLCs used to control a multi-axis pneumatic robot (1a, 1b, 2a, 2c, 2d, 2e);
   c. implementing sensors into a CIM environment (1a, 1b, 2a, 2c, 2d, 2e);
   d. describing the function and operation of the enterprise data interface (1a, 1b, 2a, 2c, 2d, 2e).
8. Demonstrate a working knowledge of work cell programming by
   a. describing the 3 categories of work cell control software (1a, 1b, 2a, 2c, 2d, 2e);
   b. explaining the robot program language development and the classification process (1a, 1b, 2a, 2c, 2d, 2e);
   c. describing how PLCs are used to program non-servo robots (1a, 1b, 2a, 2c, 2d, 2e).
9. Develop a means of justification and applications of work cells by
   a. explaining how automation projects are justified using financial planning concepts (1a, 1b, 2a, 2c, 2d, 2e);
   b. performing the financial analysis for an automation project (1a, 1b, 2a, 2c, 2d, 2e);
   c. describing the typical robot automation application in areas such as welding, material handling, machine tending, paint spraying, assembly, and the process area (1a, 1b, 2a, 2c, 2d, 2e).
10. Demonstrate an understanding of proper safety procedures used within an automated work cell by
    a. identifying the organizations that set safety standards (1a, 1b, 2a, 2c, 2d, 2e);
    b. describing the procedures used to safeguard an automated work cell (1a, 1b, 2a, 2c, 2d, 2e);
    c. developing a safety cost justification (1a, 1b, 2a, 2c, 2d, 2e);
    d. listing the OSHA/ANSI guidelines for hazard control (1a, 1b, 2a, 2c, 2d, 2e).

Requirements

Requirements
Required Prerequisite(s) or Corequisite(s): RELE 1002

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the Broker-Lawyer Committee, including composition and purpose; demonstrate that a given action or statement constitutes the unauthorized practice of law and state the penalties for same; compare and contrast promulgated and approved forms; assess if the use of a form is within the Texas Real Estate Commission rules for use of forms; and utilize correct forms for a given scenario.

1. Demonstrate an understanding of the Texas Real Estate Commission contract forms and addenda by
   a. demonstrating the ability to use the proper form and addenda for a given case study;
   b. comparing and contrasting promulgated forms;
   c. understanding the rationale for each paragraph in the promulgated forms and addenda;
   d. identifying the current promulgated forms.
2. Demonstrate an understanding of the unauthorized practice of law by
   a. describing the rules relating to promulgated form usage;
   b. demonstrating an ability to prepare a contract without practicing law.
3. Demonstrate an understanding of the role of the Broker-Lawyer Committee by
   a. describing the Broker-Lawyer Committee, including role, duties, composition and purpose;
   b. understanding the commission rules regarding use of forms;
   c. describing the rationale for the Committee.

RELE	1303	Real Estate Appraisal

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). The central purposes and functions of an appraisal, social and economic determinants of value, appraisal case studies, cost, market data and income approaches to value estimates, final correlations, and reporting.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the functions of an appraisal; identify the three approaches to valuation estimates; describe both social and economic determinants of value; and complete a report that illustrates final correlations.

1. Demonstrate an understanding of the central purpose and function of appraisal by
    a. describing the concept of value;
    b. outlining the social and economic determinants of value;
    c. identifying external forces that influence value.
2. Demonstrate an understanding of the approaches to value estimation by
    a. determining value through the income approach;
    b. determining value through the cost approach;
    c. determining value through the market data approach;
    d. determining value through the sales comparison approach.
3. Demonstrate an understanding of the reporting of value by
    a. preparing appraisal case studies;
    b. producing final correlations;
    c. describing different types of appraisal reports;
    d. explaining professional standards and responsibilities.

RELE	1307	Real Estate Investments

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Characteristics of real estate investments. Includes techniques of investment analysis, time-valued money, discounted and non-discounted investment criteria, leverage, tax shelters, depreciation, and applications to property tax.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze real estate investments using cash flow analysis; estimate future value using proforma; determine the advantages and disadvantages of investments; explore the effects of tax shelters, depreciation and property tax.

1. Demonstrate an understanding of the fundamentals of investing in real estate by
    a. using techniques of investment analysis;
    b. outlining the characteristics of real estate investments;
    c. explaining tax shelter depreciation;
    d. computing property tax.
2. Demonstrate an understanding of the financial analysis of investments by
    a. explaining the concept of leverage;
    b. computing the time value of money;
    c. identifying discounted and non-discounted investment criteria.
3. Demonstrate an understanding of the feasibility of real estate investments by
    a. comparing diverse real estate investments;
    b. analyzing alternative real estate investment opportunities;
    c. evaluating the nature of the real estate market.
4. Demonstrate an understanding of the sources of funds for real estate investments by
    a. identifying sources of funds;
    b. outlining financing for real estate investments;
    c. contrasting real estate ownership interests;
    d. describing leverage.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss the elements of a contract; differentiate the legal effects of a contract; describe the statute of frauds; explain specific performance and remedies for breach; identify practices that would constitute unauthorized practice of law; and examine the owner disclosure requirements.

1. Demonstrate an understanding of the elements of a valid contract by
    a. using contract terminology;
    b. identifying legally competent parties;
    c. comprehending what constitutes consideration;
    d. outlining the process of offer and acceptance;
    e. explaining the concept of mutual agreement;
    f. describing the concept of legal objective.
2. Demonstrate an understanding of the rules and regulations of a valid contract by
    a. analyzing the impact of the Statute of Frauds;
    b. contrasting the difference between a void and voidable contract;
    c. contrasting the difference between an executory and executed contract;
    d. describing the remedies for breach of contract;
    e. describing the rules of construction;
    f. explaining the statute of limitations.
3. Demonstrate an understanding of the special requirements of a real estate contract by
    a. describing the methods used in legal descriptions;
    b. explaining the concept of earnest money;
    c. analyzing the use of special provisions;
    d. explaining the use of addenda;
    e. identifying time considerations in the closing process;
    f. analyzing the owner disclosure requirement;
    g. explaining the concept of title insurance.
4. Demonstrate an understanding of the rules relating to use of contract forms by
    a. explaining the rationale for the adoption of promulgated contract forms;
    b. outlining the unauthorized practice of law;
    c. explaining the Texas Real Estate Commission rules for contract forms;
    d. analyzing the priority rules for handwritten, typed, and preprinted provisions.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the agent/owner relationship; define the types of leasehold estates and elements of a valid lease; explain the landlord tenant relationship; and identify ways the Fair Housing Laws can be applied.

1. Demonstrate an understanding of the role of a property manager by
    a. using a management plan;
    b. outlining working relations with property owners;
    c. describing property management activities;
    d. evaluating property management.
2. Demonstrate an understanding of landlord policies by
    a. devising tenant regulations;
    b. distinguishing types of leases;
    c. evaluating negotiations with tenants;
    d. outlining the management of tenant relations.
3. Demonstrate an understanding of operational guidelines by
    a. comprehending maintenance procedures;
    b. outlining safety and environmental issues;
    c. identifying insurance requirements.
4. Demonstrate an understanding of the legal environment by
    a. comprehending eviction law and procedure;
    b. applying habitability laws;
    c. comprehending landlord and tenant codes;
    d. applying fair housing policies.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare various types of financing available to clients and customers; explain the function of the primary and secondary money markets; list the types of lenders and explain the types of loans they provide; evaluate the buyer and the property using lender guidelines; and calculate net sheets for both parties in a real estate transaction.

1. Demonstrate an understanding of the sources of funds for real estate lending by
    a. describing the monetary system;
    b. identifying primary and secondary markets;
    c. explaining the role of money in lending;
    d. tracing loan processing;
    e. describing mortgage theory;
    f. describing the Federal Reserve System.
2. Demonstrate an understanding of the lending programs available in real estate by
    a. describing the conventional loan programs;
    b. describing HUD-FHA loan programs;
    c. describing veteran loan programs;
    d. distinguishing non-institutional lenders;
    e. distinguishing primary mortgage lenders.
3. Demonstrate an understanding of the federal, state, and local laws and regulations relating to real estate finance by
    a. explaining Texas community property law;
    b. outlining the Texas Homestead Act;
    c. recalling the Real Estate Settlement Procedures Act;
    d. recalling Truth in Lending rules;
    e. tracing community reinvestment laws;
    f. outlining equal credit opportunity laws;
    g. explaining the role of the Texas Department of Housing and Community Affairs.
4. Demonstrate an understanding of the procedures for loan application by
    a. explaining the significance of interest rates;
    b. explaining the loan qualification process;
    c. identifying the required loan documents;
    d. tracing real estate closing procedures;
    e. determining closing costs.

RELE	1406	Principles of Real Estate

Semester Credit Hours	Lecture Hours	Lab Hours
4	4	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0) A complete overview of licensing as a broker or salesperson. Includes ethics of practice as a license holder; titles to and conveyance of real estate; legal descriptions, deeds, encumbrances and liens; distinctions between personal and real property; appraisal, finance and regulations; closing procedures, and real estate mathematics. Covers at least three hours of classroom instruction on federal, state, and local laws relating to housing discrimination, housing credit discrimination, and community reinvestment. Fulfills the 4 semester hours of Principles of Real Estate required for the salesperson license.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define the principles of real estate and how they apply to the real estate industry; describe titles to and conveyance of real estate; discuss legal descriptions, deeds, encumbrances and liens; discuss Texas Real Estate License Act (TRELA); distinguish differences between personal and real property; outline the federal, state, and municipal laws related to discrimination in the real estate; outline closing procedures; and list examples of laws relating to fair housing; describe appraisal, finance and regulations; and solve real estate mathematical problems.

1. Demonstrate an understanding of the forms of ownership for real property by
    a. using terminology of the ownership of real property;
    b. distinguishing between real and personal property;
    c. explaining legal descriptions;
    d. defining the types of individual ownership;
    e. defining the types of business ownership;
    f. explaining ad valorem taxes;
    g. identifying land use controls;
    h. defining the types of leasehold estates.
2. Demonstrate an understanding of the process through which ownership of real property is transferred by
    a. using terminology required to transfer real property;
    b. identifying elements of a real estate contract;
    c. tracing real property title records;
    d. explaining the organization of real property records;
    e. outlining steps in the foreclosure process;
    f. explaining closing procedures.
3. Demonstrate an understanding of the concepts of hypothecation and finance in a real property transaction by
    a. recalling mortgage theory;
    b. identifying elements of mortgage instruments;
    c. describing the appraisal processes;
    d. stating lending law and regulations;
    e. performing real estate payment calculations.
4. Demonstrate an understanding of the federal, state, and local laws and regulations relating to housing discrimination, housing credit discrimination, and community reinvestment by
    a. outlining the development and rationale of fair housing laws;
    b. describing the block busting concept;
    c. describing steering;
    d. identifying housing assistance programs.
5. Demonstrate an understanding of professional requirements of a real estate broker or salesperson by
    a. describing the licensing procedures for a real estate broker;
    b. describing the licensing procedures for a real estate salesperson;
    c. outlining the elements of the rules of ethics;
    d. explaining the rationale for The Real Estate License Act;
    e. identifying career opportunities in real estate.

RELE 2301 - Law of Agency

RELE

Course Number
2301

Course Title
Law of Agency

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Law of agency including principal-agent and master-servant relationships, the authority of an agent, the termination of an agent's authority, the fiduciary and other duties of an agent, employment law, deceptive trade practices, listing or buying representation procedures, and the disclosure of an agency.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify reasons for suspension or revocation of a real estate license; illustrate ways in which agency relationships can be created and terminated; describe the fiduciary relationship that exists between an agent and his principal; explain the Deceptive Trade Practices Act as it affects the real estate agent and the duties and obligations of the client, customer, and agent; distinguish between dual agency and intermediary relationships; and summarize the mandatory Sellers Disclosure of Property Condition form.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the agency relationship by
    a. using agency terminology to describe relationships (2a);
    b. tracing the history of agency (2a, 2c);
    c. explaining how agency relationships are created (1d, 2a, 2c);
    d. analyzing the different types of agency relationships (2a);
    e. explaining how agency relationships are terminated (2a, 2c);
    f. explaining the duty of care to the principal (2a, 2c);
    g. outlining the agent's authority (2a).
2. Demonstrate an understanding of agency relationships in real estate transactions by
    a. using agency terminology to describe real estate agency relationships (2a);
    b. describing agency risk control (2c);
    c. explaining an agent's obligation to third parties (1d, 2c);
    d. describing seller agency (2c);
    e. describing buyer agency (2c);
    f. explaining disclosure procedures for agency relationships (1d, 2c).
3. Demonstrate an understanding of the types of brokerage firms in real estate transactions by
    a. identifying the types of agency agreements (2a);
    b. describing buyer agency (1d, 2c);
    c. describing seller agency (1d, 2c);
    d. describing single agency (1d, 2c);
    e. outlining the use of multiple listing services (2a);
    f. identifying the employment relationships in real estate brokerage (2c).
4. Demonstrate an understanding of the federal, state, and local laws and regulations relating to agency relationships by
    a. outlining the Deceptive Trade Practices Act (2a);
    b. explaining promulgated contract forms as related to agency (2d);
    c. explaining the Real Estate Settlement Procedures Act as related to agency (2d);
    d. outlining agency rules for real estate licensure (2a);
    e. outlining the Texas Real Estate Commission rules on agency (2a).

RNSG 1105 - Nursing Skills I

General

Course Key
13617

Course Rubric
RNSG

Course Number
1105

Course Title
Nursing Skills I

Semester Credit Hours
1

Lecture Hours
0

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-3)Study of the concepts and principles necessary to perform basic nursing skills for the adult patient; and demonstrate competence in the performance of nursing procedures. Content includes knowledge, judgment, skills, and professional values within a legal/ethical framework. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate Degree nurse role assimilation is facilitated through the development of identified major concepts. Credit by Examination is available for Fast Track Option. Enrollment requires official acceptance into the Nursing Program. Required Prerequisites: BIOL-2401, BIOL-2402, BIOL-2420 and appropriate TSI Math placement score. Required Corequisites: RNSG-1413 and RNSG-1360 (If it is the second attempt at passing this course, then the co-requisite may be waived)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply concepts and principles necessary for the performance of basic nursing skills for the adult patient; and demonstrate competence/clinical reasoning in the performance of basic nursing procedures and practices. Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of standard protocols for nursing interventions, CDC guidelines, and universal precautions by
    a. recognizing standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. identifying CDC guidelines and universal precautions (1a, 1b, 1c, 2b);
    c. identifying principles of medical and surgical asepsis (1a, 1b, 1c, 2b);
    d. demonstrating medical aseptic hand washing (1a, 1b, 1c, 2a, 2b);
    e. demonstrating proper donning and removal of personal protective equipment (1a, 1b, 1c, 2b);
    f. demonstrating proper donning and removal of sterile gloves (1a, 1b, 1c, 2b).
2. Identify the principles of oral medication administration, including the six rights of medication administration by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. identifying routes of oral and non-parenteral medication administration (1a, 1b, 1c, 2b);
    c. recognizing appropriate equipment and supplies for oral and nonparenteral medication administration (1a, 1b, 1c, 2b);
    d. calculating medication dosage (1a);
    e. identifying patient safety needs, according to the six rights of medication administration (TCC uses the acronym TRAMPD) (1a, 1b, 1c, 2a, 2b);
    f. applying principles of medical and surgical asepsis during the preparation and administration of oral medication (1a, 1b, 1c, 2a, 2b);
    g. applying CDC guidelines and universal precautions during the preparation and administration of oral medication (1a, 1b, 1c, 2a, 2b);
    h. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);
    i. evaluating the patient's response to the administered medications (1a, 1b, 1c, 2b);
    j. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    k. defining desired effects, side effects, adverse reactions, anaphylactic reactions, toxic effects, aero chamber, metered-dose inhaler, sublingual, buccal, enteric coating, suppository, instillation, and unit-dose (1a, 1b, 1c, 2b).

3. Perform parenteral medication administration by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. identifying routes of parenteral medication administration (intradermal, subcutaneous, intramuscular, intravenous) (1a, 1b, 1c, 2b);
    c. identifying IM and SUB-Q injection sites and physical landmarks (1a, 1b, 1c, 2b);
    d. selecting appropriate equipment and supplies for parenteral medication administration (1a, 1b, 1c, 2b);
    e. calculating medication dosage (1a);
    f. demonstrating knowledge of patient safety needs according to the six rights (TRAMPD) (1a, 1b, 1c, 2a, 2b);
    g. educating the patient about the therapeutic levels, effects, side effects, and approximate onset of drug, during IM/Sub-Q performance evaluation (1a, 1b, 1c, 2b);
    h. applying principles of medical and surgical asepsis during the preparation and administration of parenteral medication (1a, 1b, 1c, 2b);
    i. applying CDC guidelines and universal precautions during the preparation and administration of parenteral medication (1a, 1b, 1c, 2b);
    j. applying clinical reasoning and nursing science as a basis for decision making (1a, 1b, 1c, 2b);
    k. identifying the nursing role in patient/family education (1a, 1b, 1c, 2b);
    l. identifying the patient's response to the medications administered (1a, 1b, 1c, 2b);
    m. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    n. individualizing and implementing teaching plans while delivering simulated nursing care (1a, 1b, 1c, 2b);
    o. documenting teaching interventions while delivering simulated nursing care (1a, 1b, 1c, 2b);
    p. demonstrating written and verbal communication skills that are legible, accurate, and complete (1a, 1b, 1c, 2b);
    q. defining injection, parenteral, ampule, vial, aspirate, Z-track, filter needle/straw, blunt cannula, intramuscular injection, subcutaneous injection, and intradermal injection (1a, 1b, 1c, 2b).

4. Perform nasogastric tube management by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. discussing the rationale/indications for nasogastric intubation (1a, 1b, 1c, 2b);
    c. identifying the various types of gastric/intestinal tubes (Levine, Salem Sump, Dobb Hoff, PEG) (1a, 1b, 1c, 2b);
    d. identifying methods of enteral feeding (bolus and continuous) (1a, 1b, 1c, 2b);
    e. selecting appropriate equipment and supplies for nasogastric tube insertion and discontinuation (1a, 1b, 1c, 2b);
    f. demonstrating patient assessment prior to nasogastric tube insertion and discontinuation (1a, 1b, 1c, 2b);
    g. demonstrating nasogastric tube insertion (1a, 1b, 1c, 2a, 2b);
    h. applying principles of medical and surgical asepsis during nasogastric intubation (1a, 1b, 1c, 2a, 2b);
    i. applying CDC guidelines and universal precautions during nasogastric intubation (1a, 1b, 1c, 2a, 2b);
    j. demonstrating self-directed behaviors needed for patient safety (1a, 1b, 1c, 2b);
    k. evaluating patient's response to nasogastric intubation (1a, 1b, 1c, 2b);
    l. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);
    m. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    n. defining aspirate, decompression, paralytic ileus, enteral feeding, nasogastric, nasointestinal, and PEG (1a, 1b, 1c, 2b).

5. Apply the principles of sterile technique while performing urinary catheterization by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. identifying the different types of urinary catheters (1a, 1b, 1c, 2b);
    c. selecting appropriate equipment and supplies for urinary catheterization (1a, 1b, 1c, 2b);
    d. discussing the indications for urinary catheterization (1a, 1b, 1c, 2b);
    e. demonstrating urinary catheter insertion (1a, 1b, 1c, 2b);
    f. applying the principles of medical and surgical asepsis during urinary catheter insertion (1a, 1b, 1c, 2a, 2b);
    g. applying CDC guidelines and universal precautions during urinary catheter insertion (1a, 1b, 1c, 2a, 2b);
    h. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);
    i. demonstrating self-directed behaviors needed for patient safety (1a, 1b, 1c, 2b);
    j. evaluating the patient response to urinary catheter insertion (1a, 1b, 1c, 2b);
    k. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    l. defining catheterization, indwelling catheter, straight catheter, suprapubic catheter, securement device, sterile technique, and sterile field (1a, 1b, 1c, 2b).

6. Apply the principles of sterile technique while performing sterile dressing change by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2b);
    b. following the steps for suture/staple removal (1a, 1b, 1c, 2a, 2b);
    c. identifying gravity and closed wound drainage systems (Hemovac, Jackson Pratt) (1a, 1b, 1c, 2b);
    d. identifying factors affecting wound healing (1a, 1b, 1c, 2b);
    e. identifying types of dressings (dry, moist, and transparent) (1a, 1b, 1c, 2b);
    f. stating the functions of a wound dressing (1a, 1b, 1c, 2b);
    g. performing sterile dressing change (1a, 1b, 1c, 2b);
    h. demonstrating patient and wound assessment prior to sterile dressing change (1a, 1b, 1c, 2a, 2b);
    i. applying principles of medical and surgical asepsis during sterile dressing change (1a, 1b, 1c, 2a, 2b);
    j. applying CDC guidelines and universal precautions during sterile dressing change (1a, 1b, 1c, 2a, 2b);
    k. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);
    l. demonstrating self-directed behaviors needed for patient safety (1a, 1b, 1c, 2b);
    m. evaluating the patient response to sterile dressing change (1a, 1b, 1c, 2b);
    n. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    o. defining debridement, erythema, granulation, maceration, sanguineous, sero-sanguineous, serous, purulent, hemorrhage, infection, dehiscence, evisceration, fistula, Penrose drain, and delayed wound closure (1a, 1b, 1c, 2b).

7. Identify proper administration and management of oxygenation therapy by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2a, 2b);
    b. discussing the rationale for promoting oxygenation (1a, 1b, 1c, 2b);
    c. discussing airway maintenance methods (oral airway, nasal airway, endotracheal tube, and tracheostomy) (1a, 1b, 1c, 2b);
    d. identifying types of oxygen delivery systems (nasal cannula, simple mask, venture mask, partial rebreather, and non-rebreather) (1a, 1b, 1c, 2b);
    e. identifying appropriate equipment and supplies needed for suctioning and tracheostomy care (1a, 1b, 1c, 2b);
    f. identifying types of suctioning procedures (nasopharyngeal, oropharyngeal, endotracheal, and tracheostomy) (1a, 1b, 1c, 2b);
    g. describing principles of medical and surgical asepsis during suctioning procedures (1a, 1b, 1c, 2b);
    h. describing CDC guidelines and universal precautions during suctioning procedures (1a, 1b, 1c, 2b);
    i. identifying the nursing role in patient/family education (1a, 1b, 1c, 2b);
    j. discussing tracheostomy care (1a, 1b, 1c, 2b);
    k. describing self-directed behaviors needed for patient safety (1a, 1b, 1c, 2b);
    l. summarizing the documentation of the nursing intervention(s) (1a, 1b, 1c, 2b);
    m. defining artificial airway, aspirate, atelectasis, bronchospasm, closed-system catheter, endotracheal tube, hypoxemia, hypoxia, hyperventilation, hypoventilation, intubation, nasal airway, oral airway, sputum, suction, suction catheter, chest tube, pneumothorax, hemothorax, and tracheostomy (1a, 1b, 1c, 2b).

8. Perform peripheral intravenous venipuncture by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2a, 2b);
    b. discussing the indications for peripheral intravenous venipuncture (1a, 1b, 1c, 2b);
    c. identifying various venous access devices (angiocath, protective cath, CVC, implanted infusion port, and PICC) (1a, 1b, 1c, 2b);
    d. identifying complications of peripheral intravenous venipuncture (1a, 1b, 1c, 2b);
    e. selecting appropriate equipment and supplies for peripheral intravenous venipuncture (1a, 1b, 1c, 2b);
    f. identifying venipuncture site dressings (opaque and transparent) (1a, 1b, 1c, 2b);
    g. performing patient assessment and preparation for peripheral intravenous venipuncture (1a, 1b, 1c, 2a, 2b);
    h. performing peripheral intravenous venipuncture (1a, 1b, 1c, 2a, 2b);
    i. applying principles of medical and surgical asepsis during insertion and discontinuation of peripheral intravenous venipuncture (1a, 1b, 1c, 2a, 2b);
    j. applying CDC guidelines and universal precautions during insertion and discontinuation of peripheral intravenous venipuncture (1a, 1b, 1c, 2a, 2b);
    k. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);
    l. demonstrating self-directed behaviors needed for patient safety (1a, 1b, 1c, 2b);
    m. evaluating the patient response to peripheral intravenous venipuncture (1a, 1b, 1c, 2b);
    n. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);
    o. defining intravenous, infiltration, phlebitis, central venous catheter, infusion port, injection cap, aspirate, patency, thrombosis, venipuncture, chevron, stabilization device, heparin lock, and saline well (1a, 1b, 1c, 2b).

9. Describe the principles of intravenous medication administration by
    a. applying standard protocols for nursing intervention(s) (1a, 1b, 1c, 2a, 2b);
    b. identifying rationale/indications for intravenous medication administration (1a, 1b, 1c, 2b);
    c. identifying intravenous medication administration methods (continuous, IV push, IV bolus, IV piggyback) (1a, 1b, 1c, 2b);
    d. identifying nursing responsibilities in management of heparin lock/saline lock (saline, saline-heparin, SAS, and SASH) (1a, 1b, 1c, 2b);
    e. selecting appropriate equipment and supplies for intravenous medication administration (1a, 1b, 1c, 2b);
    f. identifying IV pumps/controllers rationales and safety measures (1a, 1b, 1c, 2b);
    g. identifying IV solutions and solution administration sets (packaging and expiration dates) (1a, 1b, 1c, 2b);
    h. computing and regulating intravenous flow rate (1a);
    i. computing and regulating medication flow rate (1a);
    j. identifying patient safety needs, according to the six rights of medication administration (TRAMPD), and IV competencies (1a, 1b, 1c, 2a, 2b);

k. applying principles of medical and surgical asepsis during the preparation and administration of intravenous medication (1a, 1b, 1c, 2a, 2b);

l. applying CDC guidelines and universal precautions during the preparation and administration of intravenous medication (1a, 1b, 1c, 2a, 2b);

m. identifying the nursing role in patient/family education (1a, 1b, 1c, 2a, 2b);

n. evaluating the patient's response to the administered medication(s) (1a, 1b, 1c, 2b);

o. documenting the nursing intervention(s) (1a, 1b, 1c, 2b);

p. defining intravenous injection, IV bolus, IV push, keep vein open (KVO), macro drops, micro drops, isotonic, hypotonic, hypertonic, controlled volume sets, compatibility, diluent, solution set, IVPB, primary set, and secondary medication set (1a, 1b, 1c, 2b).

RNSG 1201 - Pharmacology

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) Introduction to the science of pharmacology with emphasis on the actions, interactions, adverse effects, and nursing implications of drug classifications. Content includes the roles and responsibilities of the nurse in safe administration of medications within a legal/ethical framework. This course lends itself to either a blocked or integrated approach. Required Prerequisite: RNSG-1413 Recommended Co-Requisite: RNSG-1441

View Course Availability on MyTCCTrack

Required Corequisite(s): RNSG 1413 and RNSG 1360

Course Learning Outcomes

Course Learning Outcomes
Upon successful completion of this course, students will: Identify the roles and responsibilities of the professional nurse in administering pharmacological agents; and explain the safe utilization of medications; identify ethical and legal principles to the administration of medication.

The student will be able to:

1. Use terminology associated with pharmacology (1a, 1b)
2. Use appropriate sources of drug information to research prescribed medication. (1a, 1b, 2a, 2c, 2d, 2e)
3. Apply the six right of medication administration during the preparation, administration and documentation medication therapy. (1a, 1b, 2a, 2c, 2d, 2e)
4. Develop a drug profile for each prototype as assigned: (1a, 1b, 2a, 2c, 2d)
    1. drug action
    2. adverse reactions
    3. drug dosage forms
    4. recommended dosages and routes of administration
    5. nursing intervention appropriate to alleviate or prevent drug adverse reaction
5. Use basic knowledge to be able to complete the nursing responsibilities needed to deliver safe patient care while meeting the pharmacological needs of the patient. (1a, 1b, 2a, 2b, 2c, 2d 2e)
6. Use knowledge base to monitor the patient's response to drug therapy and collaborate with members of the health care team whenever needed to clarify orders, and report the individual's response to medication prescribed. (1a, 1b, 2a, 2b, 2c, 2d 2e)
7. Use patient education resources designed to meet the health care needs of the individual, discuss the expectations of therapy and degree of symptom relief that can be anticipated, to evaluate the individual's response to the medication prescribed (1a, 1b, 2a, 2b, 2c, 2d 2e)
8. Identify classification of medications.
9. Identify commonly prescribed medications and related information in each classification. (1a, 1b, 2a)
10. Relate possible drug interactions for specific drugs. (1a, 1b, 2a, 2c)
11. Evaluate the patient for possible adverse drug. (1a, 1b, 2a, 2c)
12. Demonstrate health teaching related to drug therapy. (1a, 1b, 2a, 2c)
13. Demonstrate critical thinking and problem solving ability. (1a, 1b, 2a, 2c)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Safety: Demonstrate knowledge and self-directed behaviors for client safety

1. Implement measures to promote a safe environment for patients and others by
    a. identifying patients accurately (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. performing nursing procedures and skills correctly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. maintaining and monitoring for the chemical safety of the patient by stating the rationale for and the effects of medications and treatments and correctly administering the same (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2a, 2b, 2c);
    g. advocating for the patient/family (1a, 1b, 1c, 2a, 2b, 2c);
    h. implementing patient care according to legal and ethical, state, and national standards (1a, 1b, 1c, 2a, 2b, 2c).

Professionalism: Demonstrate the attitudes and values of the nursing profession

2. Demonstrate the attitudes and values of the nursing profession by
    a. demonstrating responsibility and accountability for the quality of nursing care provided to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. complying with policies and procedures of Tarrant County College, the Nursing Department, the course, and the clinical facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. complying with the professional, ethical, and legal standards of nursing (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. demonstrating evidence-based clinical practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. maintaining patient confidentiality and professional boundaries (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. interacting with patients, nursing faculty, and healthcare team in a professional manner (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    g. selecting learning experiences that enhance competence (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. organizing and completing assigned tasks in appropriate time (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Caring Approach: Demonstrate caring behaviors toward self and others

3. Demonstrate caring behaviors toward self and others by
    a. demonstrating caring behaviors in nursing process development and implementation (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. providing culturally sensitive healthcare to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. providing safe, compassionate, comprehensive nursing care to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. assisting the client in achieving optimum comfort and functioning (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. interacting with patients and others to build respect and trust (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Teaching: Identify teaching/learning principles to meet the basic needs of patients

4. Identify teaching/learning principles to meet the basic needs of patients by
    a. identifying learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. collaborating with patient and interdisciplinary health care team to develop individual teaching plans based upon patient/family learning style and needs by using best practice standards and other evidence based findings in developing teaching plans for patients/families (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. developing and implementing individualized patient and family teaching (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying appropriate teaching methods (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. documenting teaching interventions, patient, and family response (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Clinical Reasoning: Apply clinical reasoning skills in problem solving and decision making when providing basic nursing care

5. Apply clinical reasoning skills in problem solving and decision making when providing basic nursing care by
    a. applying clinical reasoning and nursing science as a basis for decision making in nursing practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. applying the systematic problem solving process to develop a comprehensive plan of care for patients with basic health care needs (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing and documenting assessments using a systematic approach (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. prioritizing and implementing components of the nursing process utilizing a holistic approach (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. evaluating the achievement of patient outcomes (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. modifying the plan of care as needed (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Communication: Implement beginning communication skills with patients, families, and members of the interdisciplinary healthcare team

6. Implement beginning communication skills with patients, families, and members of the interdisciplinary healthcare team by
    a. applying strategies of coordination, collaboration, and communication to plan, deliver, and evaluate interdisciplinary healthcare (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. demonstrating verbal and nonverbal communication skills that are relevant, accurate, clear, complete, timely, understandable, and therapeutic (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. demonstrating written communication skills that are legible, relevant, accurate, complete, and meaningful (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. demonstrating active listening, genuineness, observational skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. maintaining eye contact (when culturally appropriate) (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Collaboration: Demonstrate the ability to collaborate with other members of the healthcare team, while delivering basic nursing care

7. Demonstrate the ability to collaborate with other members of the healthcare team while delivering basic nursing care by
    a. identifying members of interdisciplinary team (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. functioning as a member of an interdisciplinary team (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. collaborating with the interdisciplinary health care team to implement quality patient care (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. identifying appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. following chain of command (1a, 1b, 1c, 2a, 2b, 2c, 2d).

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0) Introduction to the role of the professional nurse as provider of patient-centered care, patient safety advocate, member of health care team, and member of the profession. Content includes fundamental concepts of nursing practice, history of professional nursing, clinical reasoning processes and clinical judgment. Emphasis on knowledge, judgment, skills and professional values within a legal/ethical framework. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Credit by Examination is available for Fast Track Option. Enrollment requires official acceptance into the Nursing Program. Required Prerequisites: BIOL-2401, BIOL-2402 and BIOL-2420 and appropriate TSI Math placement score. Required Corequisites: RNSG-1105 and RNSG-1360 (if it is the second attempt at passing this course, then the co-requisite may be waived.)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes:

Describe the roles of the nurse in the delivery of health care; use basic nursing skills; examine the fundamental concepts of nursing practice; describe clinical reasoning processes and clinical judgment in professional nursing.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Review TCC's nursing program philosophy by
    a. differentiating major concepts of the program curriculum (1a, 1b, 2c);
    b. identifying roles of the AND graduate (1a, 1b, 2c).

2. Examine nursing's professional status by
    a. identifying historical events influencing nursing practice (1a, 1b, 2c);
    b. distinguishing among definitions of nursing (1a, 1b, 2c);

c. comparing nursing roles and functions in nursing practice (1a, 1b, 2c, 2d);

d. integrating accountability, autonomy, and authority in nursing practice (1a, 1b, 2c, 2d);

e. identifying standards of nursing practice and practice settings (1a, 1b, 2c, 2d);

f. explaining the functions and purposes of health care agencies (CDC, NIH, PHS, VA) (1a, 1b, 2c, 2d);

g. distinguishing among ADN, diploma, baccalaureate, and graduate education and their respective accrediting agencies (NLN) (1a, 1b, 2c, 2d);

h. comparing nursing career pathways (1a, 1b, 2c, 2d).

3. Evaluate current health care delivery trends by

a. identifying trends affecting nursing (1a, 1b, 2c, 2d);

b. explaining effects of current legislation on health care (1a, 1b, 2c, 2d).

4. Comprehend well/illness concept by

a. identifying well/illness models (1a, 1b, 2c);

b. defining illness and wellness behavior (1a, 1b, 2c);

c. defining mental health/illness (1a, 1b, 2c);

d. describing stages of illness (1a, 1b, 2c);

e. describing illness's impact on patient, clients, and family (1a, 1b, 2c);

f. distinguishing among primary, secondary, and tertiary prevention (1a, 1b, 2c);

g. identifying the role of genetic factors in maintaining health and preventing illness (1a, 1b, 2c).

5. Explain stress/adaptation concept by

a. defining stress, stressor, adaptation, coping, and homeostasis (1a, 1b, 2c);

b. identifying Selye's three stages of the stress response (1a, 1b, 2c);

c. explaining adaptive and maladaptive mechanisms of stress (1a, 1b, 2c);

d. describing the manifestation of stress (1a, 1b, 2c).

6. Apply critical thinking skills by

a. explaining critical thinking (1a, 1b, 2c, 2d);

b. describing critical thinking characteristics (1a, 1b, 2c, 2d);

c. explaining critical thinking attitudes and cognitive skills (1a, 1b, 2c, 2d);

d. distinguishing among inductive reasoning, deductive reasoning, problem solving, and decision making (1a, 1b, 2c, 2d).

7. Explain Maslow's Hierarchy by

a. describing physiological, safety/security, love/belonging, self-esteem, and self-actualization needs (1a, 1b, 2c, 2d);

b. describing factors affecting need satisfaction (1a, 1b, 2c, 2d);

c. explaining the relationship of human needs, stress, adaptation, and ADLs (1a, 1b, 2c, 2d).

8. Explain nursing process by

a. identifying the steps of the nursing process (1a, 1b, 2c, 2d);

b. comprehending assessment (1a, 1b, 2c, 2d);

c. comprehending nursing diagnosis (1a, 1b, 2c, 2d);

d. comprehending planning (1a, 1b, 2c, 2d);

e. comprehending implementation (1a, 1b, 2c, 2d);

f. comprehending evaluation (1a, 1b, 2c, 2d).

9. Examine the documentation process by

a. discussing nursing verbal reports (1a, 1b, 2c, 2d);

b. identifying legal aspects of recordkeeping (1a, 1b, 2c, 2d);

c. explaining nursing audit (1a, 1b, 2c, 2d);

d. examining patient/client records (1a, 1b, 2c, 2d).

10. Identify the various types of diagnostic testing by

a. discussing the nurses' roles for diagnostic testing (1a, 1b, 2a, 2c, 2d, 2e);

b. discussing the common blood tests (1a, 1b, 2a, 2c, 2d, 2e);

c. discussing the common specimen collection methods (1a, 1b, 2a, 2c, 2d, 2e);

d. discussing the common imaging procedures used in diagnostic testing (1a, 1b, 2a, 2c, 2d, 2e).

11. Examine teaching/learning process by

a. describing factors affecting learning (1a, 1b, 2a, 2b, 2c, 2d, 2e);

b. explaining teaching/learning domains (1a, 1b, 2a, 2b, 2c, 2d, 2e);

c. identifying teaching/learning guidelines (1a, 1b, 2a, 2b, 2c, 2d, 2e);

d. applying the nursing process as it relates to teaching/learning concepts (1a, 1b, 2a, 2b, 2c, 2d, 2e).

12. Examine communication principles by

a. explaining the communication model (1a, 1b, 2b, 2c, 2d);

b. identifying verbal and nonverbal behaviors (1a, 1b, 2b, 2c, 2d);

c. listing factors influencing communication process (1a, 1b, 2b, 2c, 2d).

13. Explain communication process by

a. distinguishing the difference among therapeutic/non-therapeutic/social communication (1a, 1b, 2b, 2c, 2d);

b. applying the nursing process as it relates to patient/client communication needs (1a, 1b, 2b, 2c, 2d).

14. Identify nurse/patient/client/ relationship by

a. describing the characteristics of a helping relationship (1a, 1b, 2b, 2c, 2d);

b. describing the phases of a helping relationship (1a, 1b, 2b, 2c, 2d);

c. identifying the sources of conflict in the nurse/patient/client relationship (1a, 1b, 2b, 2c, 2d).

15. Describe the concept of caring by

a. identifying definitions of caring (1a, 1b, 2b, 2c, 2d);

b. applying the nursing process as it relates to the concept of caring (1a, 1b, 2b, 2c, 2d).

16. Examine cultural diversity issues by

a. discussing cultural groups (1a, 1b, 2b, 2c, 2d);

b. identifying health care beliefs of various cultural groups (1a, 1b, 2b, 2c, 2d);

c. describing cultural conflicts in health care (1a, 1b, 2b, 2c, 2d);

d. describing culture shock principles (1a, 1b, 2b, 2c, 2d).

17. Describe self-concept issues by

a. describing the characteristics of positive/negative self-concept (1a, 1b, 2b, 2c);

b. explaining the nursing process as it relates to self-concept issues (1a, 1b, 2b, 2c).

18. Examine methods to assess patients/clients at risk for injury by

a. analyzing factors that affect an individual's safety (1a, 1b, 2c);

b. examining the use and legal implications of restraints (1a, 1b, 2c);

c. applying the nursing process as it relates to patients/clients at risk for injury (1a, 1b, 2c).

19. Examine activity/mobility needs by

a. describing factors affecting activity/mobility (1a, 1b, 2c);

b. explaining benefits of active/passive exercise (1a, 1b, 2c);

c. describing effects of immobility (1a, 1b, 2c);

d. applying nursing process as it relates to activity/mobility needs (1a, 1b, 2c).

20. Evaluate skin integrity needs by

a. describing risk factors and contributing factors for pressure ulcer formation (1a, 1b, 2c);

b. explaining pathogenesis of pressure ulcers (1a, 1b, 2c);

c. distinguishing between the four stages of pressure ulcer development (1a, 1b, 2c);

d. applying the nursing process as it relates to skin integrity needs (1a, 1b, 2c).

21. Explain gastrointestinal system needs by

a. listing factors affecting defecation (1a, 1b, 2c);

b. identifying fecal elimination problems (1a, 1b, 2c);

c. explaining classification of medications used in the treatment of gastrointestinal problems (1a, 1b, 2c);

d. applying the nursing process as it relates to gastrointestinal needs (1a, 1b, 2c).

22. Explain genitourinary system needs by

a. listing factors affecting voiding (1a, 1b, 2c);

b. identifying urinary elimination problems (1a, 1b, 2c);
c. explaining the classification of medications used in the treatment of genitourinary problems (1a, 1b, 2c);
d. applying the nursing process as it relates to genitourinary needs (1a, 1b, 2c).

23. Determine nutritional needs by
a. explaining essential nutrient characteristics (1a, 1b, 2c);
b. identifying factors influencing diet behavior (1a, 1b, 2c);
c. identifying recommended dietary guidelines (1a, 1b, 2c);
d. applying the nursing process as it relates to nutrition (1a, 1b, 2c).

24. Examine medication administration principles by
a. describing pharmacokinetic principles (1a, 1b, 2c);
b. identifying drug actions and interactions (1a, 1b, 2c);
c. comprehending the use of drug classifications (1a, 1b, 2c);
d. exploring legal aspects in medication administration (1a, 1b, 2c);
e. explaining developmental/cultural differences related to medications (1a, 1b, 2c);
f. identifying genetic factors related to the metabolism of medications (1a, 1b, 2c);
g. applying nursing process as it relates to administration of medications (1a, 1b, 2c).

25. Explain infection control by
a. describing human defenses against infection (1a, 1b, 2c);
b. identifying clients at risk for acquiring infection (1a, 1b, 2c);
c. examining the CDC guidelines for standard precautions and transmission based precautions (1a, 1b, 2a, 2c);
d. applying nursing process as it relates to problems with infection (1a, 1b, 2c);
e. explaining the classification of medications used in the treatment of infection (1a, 1b, 2c).

26. Explain HIV/AIDS by
a. distinguishing HIV and AIDS (1a, 1b, 2c);
b. identifying modes of transmission (1a, 1b, 2c);
c. describing the classification of medications used to treat HIV/AIDS (1a, 1b, 2c);
d. applying the nursing process as it relates to patients/clients with HIV/AIDS (1a, 1b, 2c).

27. Explain growth and development principles by
a. summarizing the central tasks within Erikson's stages of growth and development (1a, 1b, 2c);
b. describing health care problems in adult stages of growth and development (1a, 1b, 2c);
c. applying the nursing process as it relates to growth and development issues (1a, 1b, 2c).

28. Analyze oxygenation needs by
a. listing factors affecting oxygenation (1a, 1b, 2c);
b. identifying alterations in the respiratory system (1a, 1b, 2c);
c. explaining the classification of medications used in the treatment of oxygenation problems (1a, 1b, 2c);
d. applying the nursing process as it relates to oxygenation needs (1a, 1b, 2c).

29. Explain anemia by
a. listing characteristics of anemia (1a, 1b, 2c);
b. identifying relevant lab values related to anemia: Hgb, Hct, MCV, and RBC (1a, 1b, 2a, 2c);
c. explaining the classification of medications used in the treatment of anemia (1a, 1b, 2c);
d. applying nursing process to patient/clients with anemia (1a, 1b, 2c).

30. Explain rest/sleep needs by
a. describing sleep cycle (1a, 1b, 2c);
b. listing factors affecting sleep (1a, 1b, 2c);
c. describing sleep disorders (1a, 1b, 2c);
d. discussing the classification of medications used in the treatment of rest/sleep problems (1a, 1b, 2c);
e. applying the nursing process as it relates to rest/sleep needs (1a, 1b, 2c).

31. Examine sensory needs by
a. describing types of sensory alterations (1a, 1b, 2c);
b. describing orientation data (1a, 1b, 2c);
c. explaining levels of consciousness (1a, 1b, 2c);
d. applying the nursing process as it relates to sensory needs (1a, 1b, 2c).

32. Explain pain management by
a. defining pain, pain threshold, TENS, PCA, endorphins, and phantom limb pain (1a, 1b, 2c);
b. listing factors affecting pain threshold (1a, 1b, 2c);
c. discussing the gate control theory of pain (1a, 1b, 2c);
d. differentiating between acute and chronic pain (1a, 1b, 2c);
e. discussing physical and psychological responses to pain (1a, 1b, 2c);
f. examining the classification of medications used in the treatment of pain (1a, 1b, 2c);
g. applying the nursing process as it relates to pain management (1a, 1b, 2c).

33. Examine legal issues by
a. examining general legal concepts applied to nursing (1a, 1b, 2c, 2d);
b. explaining the rights and obligations of nursing's legal role (1a, 1b, 2c, 2d);
c. identifying potential liability (1a, 1b, 2c, 2d);
d. explaining the purpose of the Texas Nurse Practice Act of State of Texas (1a, 1b, 2c, 2d);
e. identifying other selected legal aspects (1a, 1b, 2c, 2d);
f. explaining the legal responsibility of nursing students (1a, 1b, 2c, 2d).

34. Explain ethical issues by
a. examining the use of the ANA Professional Code of Ethics within nursing practice (1a, 1b, 2c, 2d);
b. comparing ethical principles within nursing practice (1a, 1b, 2c, 2d);
c. exploring ethical issues in health care impacting nursing (1a, 1b, 2c, 2d);
d. illustrating the steps in the ethical decision making process (1a, 1b, 2c, 2d);
e. examining ethical issues related to genetic testing and recording of genetic information (1a, 1b, 2c, 2d).

35. Explain health care values by
a. describing the values clarification process (1a, 1b, 2c);
b. discussing examples of personal values appropriate for patient/client care (1a, 1b, 2c).

36. Explain fluid/electrolyte balance by
a. identifying factors affecting fluid/electrolyte and acid/base balance (1a, 1b, 2c);
b. describing physiology/pathophysiology of fluid/electrolyte and acid/base balance (1a, 1b, 2c);
c. giving examples of lab values pertinent to fluid/electrolyte and acid/base balance/imbalance (1a, 1b, 2c);
d. examining the classifications of medication used in the treatment of fluid/electrolyte and acid/base problems (1a, 1b, 2c);
e. applying the nursing process as it relates to fluid/electrolyte and acid/base balance (1a, 1b, 2c).

37. Explain sexuality issues by
a. discussing factors affecting sexuality (1a, 1b, 2c);
b. describing the impact of illness and patient care treatments on sexuality (1a, 1b, 2c);
c. applying the nursing process as it relates to the concept of sexuality (1a, 1b, 2c).

38. Evaluate spiritual/religious needs by
a. evaluating various spiritual/religious beliefs that impact patient/client care issues (1a, 1b, 2c);
b. applying the nursing process as it relates to spiritual/religious needs (1a, 1b, 2c).

39. Describe grief/loss process by
a. illustrating three types of loss (1a, 1b, 2c);
b. discussing factors influencing patient/client/family response to loss (1a, 1b, 2b, 2c);
c. explaining theories of grieving process (1a, 1b, 2b, 2c);
d. describing nursing process in the grief/loss process (1a, 1b, 2c).

40. Examine death and dying by
a. discussing responses to death and dying (1a, 1b, 2b, 2c);
b. discussing examples of the clinical signs of death (1a, 1b, 2c);
c. applying the nursing process as it relates to death and dying (1a, 1b, 2c).

41. Apply knowledge of normal aging process by
    a. summarizing the theories of aging (1a, 1b, 2c);
    b. describing the central tasks of aging (1a, 1b, 2c);
    c. identifying the normal physiological changes of aging (1a, 1b, 2c);
    d. identifying the normal psychological changes of aging (1a, 1b, 2c);
    e. explaining the functional assessment of the older adult (1a, 1b, 2c);
    f. applying the nursing process as it relates to normal aging patterns (1a, 1b, 2c).

42. Explain impaired cognition by
    a. distinguishing between dementia and delirium (1a, 1b, 2c);
    b. applying the nursing process as it relates to dementia and delirium (1a, 1b, 2c).

43. Explain the change process by
    a. describing the theory of the change process (1a, 1b, 2c);
    b. giving examples of strategies for dealing with change (1a, 1b, 2c).

44. Explain leadership/management principles by
    a. describing the relationship between the change process and leadership/management (1a, 1b, 2c, 2d);
    b. giving examples of leadership/management styles (1a, 1b, 2c, 2d);
    c. comprehending coordinator of care role (1a, 1b, 2c, 2d).

45. Examine health care groups by
    a. describing facilitating group roles (1a, 1b, 2c, 2d);
    b. giving examples of the types of health care groups (1a, 1b, 2c, 2d);
    c. identifying the main functions of effective group (1a, 1b, 2c, 2d).

46. Evaluate perioperative nursing by
    a. describing the phases of the perioperative period (1a, 1b, 2c);
    b. identifying the types of surgery according to urgency, risk, and purpose (1a, 1b, 2c);
    c. identifying essential aspects of preoperative assessment and preparation (1a, 1b, 2c);
    d. examining essential elements of perioperative teaching (1a, 1b, 2c);
    e. comparing various types of anesthesia (1a, 1b, 2c).

Description
(4-4-0) Basic integration of the role of the professional nurse as a provider of patient-centered care, patient safety advocate, member of health care team, and member of the profession. Study of the common concepts of caring for adult patients and families with medical-surgical health care needs related to body systems, emphasizing knowledge, judgment, skills, and professional values within a legal/ethical framework. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Required Prerequisites: RNSG-1413, RNSG-1360, and RNSG-1105 Required Corequisites: RNSG-1461 (If it is the second attempt at passing this course, then the co-requisite may be waived.)

A Requirement block where all subrequirements are required

Take RNSG-1461
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): BIOL 2401, BIOL 2402 and BIOL 2420 and appropriate TSI-Math placement score
Required Corequisite(s): RNSG 1105 and RNSG 1360

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the roles of the professional nurse in caring for adult patients and families; utilize clinical reasoning processes and clinical judgment in providing care for adult patients and families with common health needs.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the role of genetics in the etiology of selected medical-surgical disease processes by
    a. identifying disorders that are influenced by genetics (1a, 1b, 1c, 2a, 2c);
    b. planning care for patients with genetic disorders (1a, 1b, 1c, 2a, 2c).

2. Explain The Joint Commission's Performance/Accountability Measures by
    a. naming all Accountability Measures (1a, 1b, 1c, 2a, 2c);
    b. discussing the reason for the Performance/Accountability Measures initiation (1a, 1b, 1c, 2a, 2c);
    c. discussing nursing staff roles in Performance/Accountability Measures (1a, 1b, 1c, 2a, 2c).

3. Explain nursing management of patients with infections in each system by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
    h. explaining complications (1a, 1b, 1c, 2a, 2c).

4. Explain nursing management of patients with selected cardiac dysrhythmias including: bradycardias, tachycardia, and atrial

dysrhythmias, ventricular, warning, and deadly dysrhythmias by

a. describing risk factors complications for each disorder (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

5. Explain nursing management of patients with cardiovascular disorders including: hypertension, coronary artery disease, angina, myocardial infarction, and congestive heart failure by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

6. Explain nursing management of patients with peripheral vascular disorders including: peripheral arterial disease, deep vein thrombosis, thrombophlebitis, varicose veins, and venous ulcers by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c);
i. stating deep vein thrombosis and pulmonary embolism preventive measures and hospital protocols (1a, 1b, 1c, 2a, 2c).

7. Explain nursing management of patients with selected hematological disorders including: iron and aplastic anemia, polycythemia, and blood administration by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c);
i. defining hospital acquired conditions (HAC) as related to blood incompatibility dangers for each disorder (1a, 1b, 1c, 2a, 2c).

8. Explain nursing management of patients with diabetes mellitus by

a. describing risk factors (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
h. explaining complications (1a, 1b, 1c, 2a, 2c);
i. discussing hospital acquired conditions that relate to issues causing poor glycemic control (1a, 1b, 1c, 2a, 2c).

9. Explain nursing management of patients with acid-base disorders by

a. describing risk factors (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative, (inter-professional) care including medical, pharmacological, nutritional, laboratory, radiology, and other specific services (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
h. explaining complications (1a, 1b, 1c, 2a, 2c).

10. Explain nursing management of patients with selected disorders of the respiratory system including: rhinitis, influenza, sinusitis, acute bronchitis, pneumonia, tuberculosis, emphysema, chronic bronchitis, bronchiectasis, asthma, pleurisy, atelectasis, and environmental lung disease by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

11. Explain nursing management of patients with selected disorders of the musculoskeletal system including: gout, osteoporosis, carpal tunnel syndrome, fractures, amputations, joint problems, arthritis, back pain, and thermal injuries by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
h. explaining complications (1a, 1b, 1c, 2a, 2c).

12. Explain nursing management of patients with selected disorders of the neurological system including: the unconscious patient, increased intracranial pressure, cerebrovascular accident, headaches, and tetanus by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

13. Explain nursing care of patients with disorders of the sensory system including: glaucoma, cataracts, retinal detachment, eye trauma, ear trauma, ear foreign bodies, otosclerosis, Meniere's disease, and acoustic neuroma by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);
b. describing pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);
f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);
g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);
h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

14. Explain nursing management of patients with disorders of the gastrointestinal system including: nausea and vomiting, esophageal achalasia, gastric esophageal reflux disease, hiatal hernia, esophageal varices, appendicitis, polyps, peptic ulcers, gastritis, pernicious anemia, diarrhea, constipation, gastroenteritis, diverticulosis, hernias, bowel obstruction, ostomies, Crohn's, ulcerative colitis, hemorrhoids, nutritional disorders, and obesity by

c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);
d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);
e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

15. Explain nursing care of patients with disorders of the genitourinary system including: urinary tract infection, urinary tract calculi, urinary incontinence, urinary retention, urinary catheters, urinary diversion, and benign prostatic hyperplasia by

a. describing risk factors for each disease process (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disease process (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disease process (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disease process (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disease process (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disease process (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disease process (1a, 1b, 1c, 2a, 2c).

16. Explain nursing care of patients with hypersensitive reactions and anaphylactic shock by

a. describing risk factors (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c).

17. Explain nursing care of patients during a bioterrorism attack by

a. describing risk factors (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative (inter-professional) care including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);

h. explaining complications (1a, 1b, 1c, 2a, 2c).

18. Explain nursing care of patients with cancer by

a. describing the processes involved in the biology of cancer (1a, 1b, 1c, 2a, 2c);

b. describing the role of the immune system related to cancer (1a, 1b, 1c, 2a, 2c);

c. discussing the role of the nurse in the prevention, detection, and diagnosis of cancer (1a, 1b, 1c, 2a, 2c).

RNSG 1443 - Complex Concepts of Adult Health

General

Course Key
15231

Course Rubric
RNSG

Course Number
1443

Course Title
Complex Concepts of Adult Health

Semester Credit Hours
4

Lecture Hours
4

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0) Integration of previous knowledge and skills related to common adult health needs into the continued development of the professional nurse as a provider of patient-centered care, patient safety advocate, member of health care team, and member of the profession in the care of adult patients and families with complex medical-surgical health care needs associated with body systems. Emphasis on complex knowledge, judgments, skills, and professional values within a legal/ethical framework. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Recommended Prerequisite: RNSG-1441 Required Prerequisite(s): RNSG 2213, RNSG 2163, RNSG 2208, RNSG 2260, RNSG 2201, RNSG-2161 or Administrative Approval Required Corequisites: RNSG-2461 (If it is the second attempt at passing this course, then the co-requisite may be waived)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Integrate the roles of the professional nurse in the provision of care of adult patients and families; utilize clinical reasoning processes and clinical judgment in providing care for adult patients and families with complex health care needs.

The seven course concepts and outcomes include:

- Safety: Demonstrate the knowledge, skills, and attitudes that ensure culture of safety in practice.
- Professionalism: Demonstrate the attitudes and values of the nursing profession.
- Caring Approach: Provide patient care that is respectful of and responsive to individual patient preferences, needs, and values.
- Teaching: Implement teaching/learning principles to meet the needs of patients and families with complex health needs.
- Clinical Reasoning: Independently utilize clinical reasoning skills when providing care for patients with complex health needs.
- Communication: Initiate and facilitate effective communication with patients, families, and members of the interdisciplinary health care team.
- Collaboration: Collaborate with interdisciplinary teams to manage patients, families, and/or communities to achieve quality patient outcomes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Evaluate and analyze medications affecting the cardiovascular system, including: cardiac glycosides (digoxin), phosphodiesterase inhibitors, antidysrhythmic agents (sodium channel blockers, beta blockers, potassium channel blockers, and calcium channel blockers), vasoactive drugs, and anti-anginals (nitrates) by
    a. analyzing the mechanisms of action for each medication (1a, 1b, 1c, 2a, 2c);
    b. evaluating the effectiveness for each medication (1a, 1b, 1c, 2a, 2c);
    c. identifying nursing considerations for each medication (1a, 1b, 1c, 2a, 2c);
    d. explaining possible side effects/complications for each medication (1a, 1b, 1c, 2a, 2c).
2. Analyze nursing management of patients with structural and inflammatory disorders of the heart, including: aortic dissection, aortic aneurysm, cardiomyopathy, valve disorders, and inflammatory diseases by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
3. Analyze electrocardiographic dysrhythmias, including: junctional dysrhythmias, heart blocks, premature ventricular contractions, ventricular tachycardia, and ventricular fibrillation by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
4. Analyze nursing management of a patient with myocardial revascularization, including: various types of coronary artery bypass grafting (CABG) by
    a. describing risk factors for each intervention (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each intervention (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each intervention (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each intervention (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each intervention (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each intervention (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each intervention (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each intervention (1a, 1b, 1c, 2a, 2c).
5. Analyze nursing management of patients with shock pathologies, including: types of shock, systemic inflammatory response syndrome (SIRS), multiple organ dysfunction syndrome (MODS), and disseminated intravascular coagulation (DIC) by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
6. Explain and analyze aspects of hemodynamic monitoring by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. explaining collaborative care (1a, 1b, 1c, 2a, 2c);
    c. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    d. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
    e. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
    f. explaining complications (1a, 1b, 1c, 2a, 2c).
7. Analyze the nursing management of patients with selected disorders of the renal system, including: chronic renal failure, acute renal failure, and end stage renal failure by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (such as: hemodialysis, renal transplant) for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
8. Analyze nursing management of patients with endocrine disorders, including: disorders of the pituitary, thyroid, parathyroid, and adrenal glands by
    a. describing risk factors for each disorder for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
9. Analyze nursing care of patients with spinal cord disorders and injuries by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
10. Analyze nursing care of patients with shock, including neurogenic shock, by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
    h. explaining complications (1a, 1b, 1c, 2a, 2c).
11. Analyze nursing care of patients with head trauma and chest trauma by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);
    h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).
12. Analyze nursing care of patients with seizure disorders by
    a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

13. Analyze nursing management of patients requiring ventilator support by

a. describing risk factors (1a, 1b, 1c, 2a, 2c);

b. explaining collaborative care (1a, 1b, 1c, 2a, 2c);

c. explaining nursing care (1a, 1b, 1c, 2a, 2c);

d. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);

e. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);

f. explaining complications (1a, 1b, 1c, 2a, 2c).

14. Analyze nursing management of patients with pulmonary disorders, including: acute respiratory distress syndrome (ARDS) and pulmonary emboli (PE) by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

15. Analyze nursing management of patients with gastrointestinal disorders, including liver, gallbladder, and pancreatic disorders by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

16. Analyze nursing management of cancer patients including: head/brain, neck, lung, female, male, gastrointestinal, and renal cancers by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

17. Analyze nursing management of hematological complications (anemia, thrombocytopenia, and neutropenia), including: obstructive, metabolic, and infiltrative problems by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

18. Analyze nursing management of patients with hematological cancer, including: leukemia, Hodgkin's, Non-Hodgkin's, and multiple myeloma by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

19. Analyze nursing management of end-of-life issues by

a. describing physical and psychological aspects at the end of life (1a, 1b, 1c, 2a, 2c);

b. describing palliative care and hospice (1a, 1b, 1c, 2a, 2c);

c. discussing nursing care of dying persons and their families (1a, 1b, 1c, 2a, 2c);

d. outlining support for nurses caring for the dying (1a, 1b, 1c, 2a, 2c).

20. Analyze nursing management of patients with autoimmune/degenerative disorders, including: Guillain-Barre, Parkinson's disease, myasthenia gravis, multiple sclerosis, and system lupus erythematous by

a. describing risk factors for each disorder (1a, 1b, 1c, 2a, 2c);

b. describing pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

c. relating clinical manifestations to pathophysiology for each disorder (1a, 1b, 1c, 2a, 2c);

d. explaining collaborative care (inter-professional) including medical, surgical, pharmacological, nutritional, laboratory, radiology, rehabilitative, and other specific services for each disorder (1a, 1b, 1c, 2a, 2c);

e. explaining nursing care for each disorder (1a, 1b, 1c, 2a, 2c);

f. identifying nursing diagnoses for each disorder (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions for each disorder (1a, 1b, 1c, 2a, 2c);

h. explaining complications for each disorder (1a, 1b, 1c, 2a, 2c).

21. Analyze the Nurse Practice Act by

a. describing the significance of the Texas Nurse Practice Act (1a, 1b, 1c, 2a, 2c);

b. identifying the role of the Board of Nurse Examiners in regulating practice (1a, 1b, 1c, 2a, 2c);

c. identifying standards of professional nursing practice and unprofessional conduct (1a, 1b, 1c, 2a, 2c);

d. applying delegation rules to specific complex patient situations (1a, 1b, 1c, 2a, 2c).

22. Analyze nursing peer review and safe harbor peer review for the professional by

a. discussing the role of the nurse in safeguarding the public from harm (1a, 1b, 1c, 2a, 2c);

b. discussing the implications of peer review (1a, 1b, 1c, 2a, 2c);

c. discussing the rationale for declaring peer review safe harbor (1a, 1b, 1c, 2a, 2c).

RNSG 1461 - Clinical Registered Nursing/Nurse

General

Course Rubric	Course Number	Course Title
RNSG	1461	Clinical - Registered Nursing/Registered Nurse

Semester Credit Hours	Lecture Hours	Lab Hours
4	0	12

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-0-12) A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Required Prerequisites: RNSG-1413 RNSG-1360 and RNSG-1105 Required Corequisites: RNSG-1441 (If it is the second attempt at passing this course, then the co-requisite may be waived.)

Course Learning Outcomes

Course Learning Outcomes
The student is expected to apply knowledge and skills acquired in all previous courses. An asterisk (*) designates a Crucial Outcome. All Crucial Outcomes must be completed at an assisted level or higher in order to pass RNSG-1461. Performance will be satisfactory if demonstration, utilization, establishment, identification, formulation, implementation, application, or evaluation reflects linked student learning objectives and is consistent with required texts.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule. Upon successful completion of this course, students will:

1. *Demonstrate safe practice in the provision of care to patients and families by
    a. implementing measures to promote a safe environment for patients and others (1a, 1b, 2e);
    b. identifying patients accurately (1a, 1b, 2e);
    c. performing nursing procedures and skills correctly (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2c, 2d);
    e. maintaining and monitoring for the chemical safety of the patient (1a, 1b, 2a, 2c, 2d);
    f. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 2a, 2e);
    g. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2b);
    h. advocating for the patient/family (1a, 1b, 1c, 2a, 2b, 2c);
    i. implementing patient care according to legal, ethical, state, and national standards (1a, 1b, 1c, 2b, 2c, 2e);
    j. managing required patient care load (1a, 1b, 1c);
    k. recognizing appropriate nursing interventions to stabilize a patient's condition and/or prevent complications (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    l. recognizing inaccurate or contraindicated orders (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    m. locating the Texas Board of Nursing (BON) references related to safety (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    n. naming the Texas BON rules concerning medication administration and outlining the nursing process as defined by the BON (1a, 1b, 1d, 1e, 2a, 2c, 2e, 2f).

2. Demonstrate the attitudes and values of the nursing profession by
    a. referencing and conforming to the Texas Nursing Practice Act (1a, 1b, 1c, 2b, 2c, 2e);
    b. *adhering to policies and procedures of Tarrant County College, the Nursing Department, the course, and the clinical facility (1a, 1b, 1c, 2b, 2c, 2e);
    c. *demonstrating personal and professional responsibility and accountability (1a, 1b, 1c, 2b);
    d. acting independently as appropriate (1a, 1b, 1c, 2b);
    e. *recognizing and accepting ethical and legal responsibility for actions (1a, 1b, 2a, 2c);
    f. *demonstrating behaviors and attitudes indicating honesty, accountability, trustworthiness, reliability, and integrity (1a, 1b, 1c, 2b);
    g. recognizing personal strengths and limitations (1a, 1b, 1c, 2b);
    h. selecting learning experiences that enhance competency and promote professional and personal development (1a, 1b, 1c, 2b);
    i. maintaining patient confidentiality and professional boundaries (1a, 1b, 1c, 2b);
    j. comparing evidence-based clinical practice (1a, 1b, 1c, 2b, 2c, 2e);
    k. organizing and completing assigned tasks in appropriate time (1a, 1b, 1c, 2b);
    l. providing total patient care (1a, 1b, 1c, 2b);
    m. seeking and participating actively in self-directed learning experiences (1a, 1b, 1c, 2b, 2c, 2e).

3. The student will discuss the impact of accrediting bodies on healthcare facilities by
    a. describing OSHA (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    b. describing CMS (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    c. describing IHI (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    d. describing AHA (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    e. describing TJC, including the National Patient Safety Goals and how facilities comply (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f);
    f. discussing mandates from the accrediting bodies (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f).

4. Demonstrate caring behaviors toward self and others by
    a. demonstrating acceptance and consideration of the physical, emotional, social, spiritual, and cultural needs of the patient and others to achieve desired patient outcomes (1a, 1b, 1c, 2b);
    b. interacting with patients and others to build respect and trust (1a, 1b, 1c, 2b);
    c. demonstrating caring behaviors using comfort, compassion, concern, empathy, nurturing, touch, and support in assisting patient in coping process (1a, 1b, 1c, 2b);
    d. assisting the patient to achieve optimum comfort and functioning (1a, 1b, 1c, 2b).

5. Apply teaching/learning principles to meet the needs of adult patients and families by
    a. identifying learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b);
    b. assessing learning needs and readiness of patients and families (1a, 1b, 1c, 2b);
    c. developing, implementing, and evaluating teaching plans to meet the needs of patients and families (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. seeking opportunities actively to teach patients and families (1a, 1b, 1c, 2b);
    e. identifying teaching resources, including best practice standards and other evidence-based findings (1a, 1b, 1c, 2b);
    f. individualizing and implementing teaching plans (1a, 1b, 1c, 2b);
    g. identifying appropriate teaching methods (1a, 1b, 1c, 2b);
    h. documenting teaching interventions, patient, and family responses (1a, 1c);
    i. evaluating teaching goals and revising plan as needed (1a, 1b, 1c, 2b).

6. Demonstrate clinical reasoning skills when providing care for the adult with common health needs by
    a. utilizing the nursing process to provide individualized, goal-directed, evidence-based practice nursing care (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. performing and documenting comprehensive nursing assessments (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. determining nursing diagnoses that serve as the basis for care (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. developing a plan of care based on the assessment and nursing diagnoses (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. implementing nursing care (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. evaluating the patient's responses to nursing interventions (1a, 1b);
    g. modifying plan of care as needed (1a, 1b);
    h. demonstrating appropriate delegation skills (1a, 1b);
    i. naming the Texas Board of Nursing rules related to delegation (1a, 1b, 1d, 1e, 2a, 2b, 2c, 2e, 2f).

7. Apply principles of communication when interacting with patients, families, and members of the interdisciplinary healthcare team by
    a. demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic (1a, 1c, 2b);
    b. demonstrating written communication skills that are relevant, accurate, complete, timely, legible, and meaningful (1a, 1b, 2c, 2d, 2e);
    c. demonstrating active listening, genuineness, observation skills, physical attentiveness, and interviewing skills (1a, 1b, 1c,

2b);

d. recognizing and maintaining professional boundaries of the nurse/patient relationship (1a, 1b, 1c, 2b);

e. reporting and documenting accurately and completely patient status, nursing care provided, administration of medications and treatments, patient responses, and contact with health care team members concerning significant events (1a, 1b, 2b, 2c, 2d, 2e);

f. demonstrating spontaneous, non-defensive behaviors (1a, 1b, 1c, 2b).

8. Collaborate with interdisciplinary teams to coordinate care of adult families with common health needs by

a. describing the roles of interdisciplinary team members (1a, 1b, 1c, 2b);

b. functioning as a member of an interdisciplinary team (1a, 1b, 1c, 2b);

c. collaborating with the patient, health care team, and patient's family to coordinate care (1a, 1b, 1c, 2b);

d. collaborating with interdisciplinary teams to make referrals to appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
The student is expected to apply knowledge and skills acquired in all previous courses. Outcomes with a right-pointing triangle (►) are critical objectives and must be met with an Assisted (A) or higher score. ALL Crucial Outcomes must be completed at an Assisted (A) level or higher in order to pass RNSG 2161. Performance will be satisfactory if demonstration, utilization, establishment, identification, formulation, implementation, application, or evaluation reflects linked student learning objectives and is consistent with required texts.

1. The student will demonstrate the attitudes and values of the nursing profession. The student will be able to

a. Interact with patients, nursing faculty, and healthcare team in a professional manner (1a, 1b, 1c, 2b).

b. ►Demonstrate personal and professional responsibility and accountability (1a, 1b, 1c, 2b).

c. ►Adhere to policies and procedures of Tarrant County College, the Nursing Department, the course, the clinical facility, and the Texas Nurse Practice Act (1a, 1b, 1c, 2b, 2c, 2e).

d. ►Demonstrate professional behavior, appearance, and attitude (1a, 1b, 1c, 2b).

e. ►Demonstrate ethical-legal accountability for actions (1a, 1b, 1c, 2b).

f. Demonstrate preparedness for clinical (paperwork) (1a, 1b, 1c, 2c).

g. Select learning experiences that enhance competency; promote professional and personal development (1a, 1b, 1c, 2b).

h. Organize and complete assigned tasks in appropriate time and perform total patient care (1a, 1b, 1c, 2b).

i. Utilize evidence-based clinical practice (1a, 1b, 1c, 2b, 2c, 2e).

j. Actively seek and participate in self-directed learning experiences (1a, 1b, 1c, 2b, 2c, 2e).

2. ►The student will demonstrate the knowledge, skills, and attitudes to ensure a culture of safety in the practice of caring for children. The student will be able to

a. ►Implement measures to promote a safe environment for patients and others.

i. Identify patients accurately (1a, 1b, 2e).

ii. Correctly perform nursing procedures and skills (1a, 1b, 1c, 2a, 2b, 2c, 2e).

b. ►Implement and maintain measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2c, 2d).

c. ►Maintain and monitor for the chemical safety of the patient.

i. State the rationale for the effects of medications and treatments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

ii. Adapt medication knowledge (calculate patient's safe dose range, calculate correct dose, calculate and analyze

fluid requirements) (1a, 1b, 1c, 2a, 2c, 2e).

d. Maintain and monitor for the thermal safety of the patient (1a, 1b, 2a, 2e).

e. Assure the psychological safety of the patient by using therapeutic communication (1a, 1b, 1c, 2b).

f. Advocate for patient/family (1a, 1b, 1c, 2a, 2b, 2c).

g. Implement patient care according to legal and ethical, state and national standards (1a, 1b, 1c, 2b, 2c, 2e).

3. The student will initiate effective communication with children, caregivers, and members of the interdisciplinary health care team. The student will be able to

a. Demonstrate verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic.

i. Apply principles of communicating with children (1a, 1b, 1c, 2b).

b. Demonstrate written (electronic healthcare record [EHR] where available) communication skills that are relevant, accurate, complete, timely, legible, and meaningful (1a, 1b, 2c, 2d, 2e).

c. Demonstrate active listening genuineness, observation skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b).

d. Communicate learning needs to staff and instructors (1a, 1c, 2b).

4. The student will provide patient care that is respectful of and responsive to children and caregivers. The student will be able to

a. Demonstrate acceptance and consideration of the physical, emotional, social, spiritual, and cultural needs of the patient and others to achieve desired patient outcomes (1a, 1b, 1c, 2b).

b. Demonstrate caring behaviors using comfort, compassion, concern, empathy, nurturing, touch, and support in assisting the patient in the coping process (1a, 1b, 1c, 2b).

c. Deliver care in a non-judgmental and non-discriminating manner (1a, 1b, 1c, 2b).

5. The student will apply teaching/learning principles to meet the needs of patients and their families. The student will be able to

a. Assess learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b).

b. Collaborate with patient and interdisciplinary health care team to develop individual teaching plans based upon patient/family learning style and needs.

i. Use best practice standards and other evidence-based findings in developing teaching plans for patients/families (1a, 1b, 1c, 2b).

c. Develop and implement individualized patient and family teaching.

i. Demonstrate discharge teaching as available (with licensed personnel); include signs and symptoms of when to notify physician after discharge (1a, 1b, 1c, 2a, 2b, 2c, 2e).

d. Apply Erickson and Piaget stages of development; identify and implement individualized anticipatory guidance needs (1a, 1b).

e. Document teaching interventions, patient and family response (1a, 1c).

f. Evaluate teaching goals; revise plan as needed (1a, 1b, 2b, 2c).

6. The student will utilize clinical reasoning skills when providing care for children and caregivers. The student will be able to

a. Perform comprehensive assessment of patients and families.

i. Use data collection tools to obtain patient and family history (1a, 1b, 1c, 2a, 2b, 2c, 2e).

ii. Identify psychosocial, cultural, spiritual, environmental, and developmental needs (1a, 2b, 2c).

iii. Monitor changes in health status of patients and families (1a, 1b, 1c, 2b, 2c, 2e).

iv. Document comprehensive assessment data (1a, 1b, 2c, 2e).

b. Prioritize patient needs through plan of care.

i. Formulate plan of care showing cause/effect relationship and patient interventions based on evidence-based practice (1a, 1b, 2a, 2b, 2c, 2e).

ii. Incorporate Maslow's hierarchy (1a, 1b).

iii. Re-evaluate plan of care based on patient's response (1a, 1b).

c. Apply theory (lecture) information in practice settings (1a, 1b, 2c).

7. The student will collaborate with interdisciplinary teams to coordinate care of children, caregivers, and/or communities to achieve quality patient outcomes.

a. Collaborate with the patient, family, and interdisciplinary team to coordinate care (1a, 1b, 1c, 2b).

b. Collaborate with interdisciplinary team to make referrals to appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2b, 2c).

RNSG 2163 - Clinical-Registered Nursing/Reg Nurse

Course Rubric	Course Number	Course Title
RNSG	2163	Clinical - Registered Nursing/Registered Nurse

Semester Credit Hours	Lecture Hours	Lab Hours
1	0	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-3) A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Required Prerequisites: RNSG-1413, RNSG-1360, RNSG-1105, and PSYC-2301 or Administrative Approval Required Corequisites: RNSG-2213 (If it is the second attempt at passing this course, then the co-requisite may be waived.)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

COURSE OUTCOMES

Upon successful completion of this course, the student will:

1. Demonstrate safety in displaying knowledge, skills, and attitudes that ensure a culture of safety within the psychiatric/mental health environment by

- implementing measures to promote a safe environment for patients and others (1a, 1b, 1c, 2c and 2e)
- identifying patients accurately (1a, 1b, 1c, 2c and 2e)
- performing nursing procedures and skills correctly (1a, 1b, 1c, 2c and 2e)
- implementing and maintaining measures to prevent exposure to infectious pathogens (1a, 1b, 1c, 2c and 2e)
- maintaining and monitoring for the chemical safety of the patient (1a, 1b, 1c, 2a-e)
- stating the rationale for and the effects of medications and treatments (1a, 1b, 1c, 2a-e)
- maintaining and monitoring for the thermal safety of the patient (1a, 1b, 1c, 2b & e)
- assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, and 2a-e)
- advocating for patient/family (1a-c, 2a–e)
- implementing patient care according to legal, ethical, state, and national standards (1a-c, 2a–e)
- demonstrating therapeutic interaction with psychiatric/mental health patients and the interdisciplinary team (1a-c, 2a–e)

2. Demonstrate professionalism in displaying the attitudes and values of the nursing profession by

- demonstrating responsibility and accountability for personal and professional beliefs (1b, 1c, 2b, 2d and 2e)
- adhering to policies and procedures of TCC, the Nursing Department, the course, the clinical facility, and the Texas Nurse Practice Act (1a-c, 2a–e)
- following faculty instructions (1a, 1b, 2b and 2e)
- demonstrating professional behaviors, appearance, and attitude (1a-c, 2a–e)
- interacting with patients, nursing faculty, and the healthcare team in a professional manner (1a-c, 2a–e)
- complying with the professional, ethical, and legal standards of nursing (1a-c, 2a–e)

- maintaining patient confidentiality and professional boundaries (1a-c, 2a–e)
- demonstrating evidence based clinical practice (1a-c, 2a–e)
- demonstrating behaviors and attitudes indicating honesty, accountability, trustworthiness, reliability, and integrity (1a-c, 2b)

3. Demonstrate a caring approach in providing genuine and empathetic care with positive regard for self and others by
    - demonstrating caring behaviors in nursing process development and implementation (1a-c, 2a-e)
    - participating in interventions that reflect caring behaviors (1a-c, 2a and 2b)
    - providing culturally sensitive healthcare to patients and their families (1a-c, 2a-e)
    - providing safe, compassionate, comprehensive nursing care to patients and their families (1a-c, 2a-e)
    - facilitating wellness, coping mechanisms, and relapse prevention behaviors (1a-c, 2a-e)
    - assisting the patient to achieve optimum comfort and functioning (1a-c, 2a-e)
    - observing and identifying group process (1a-c, 2a-e)
    - demonstrating respect and acceptance of others (1c, 2b and 2d)
    - delivering care in a non-judgmental and non-discriminating manner
    - implementing holistic care (1c, 2b and 2d)
    - protecting patients' autonomy, dignity, and rights (1c, 2b and 2d)

4. Demonstrate teaching in using teaching/learning principles to meet the needs of the mental health patients and their families by
    - identifying learning needs of the patients and families related to risk reduction and health promotion, maintenance, and restoration (1c, 2b and 2d)
    - collaborating with patient and interdisciplinary healthcare team to develop teaching plans based upon patient/family learning styles and needs (1a-c, 2a-e)
    - using best practice standards and other evidence based findings in developing teaching plans for patients/families (1a-c, 2a-e)
    - assessing learning needs and readiness of patients/families (1a-c, 2a-e)
    - identifying appropriate teaching methods (1a-c, 2a-e)
    - documenting teaching interventions and patient/family responses (1a-c, 2a-e)
    - educating the patient and family about therapeutic level(s) and effects, possible side effects, and onset and duration of medication(s) (1a-c, 2a-e)
    - recognizing patient learning needs related to defense mechanisms and coping skills (1a-c, 2a-e)

5. Demonstrate clinical reasoning in recognizing maladaptive behaviors and utilize clinical reasoning skills when providing care for patients with mental health needs and their families by
    - applying clinical reasoning and nursing science as a basis for decision making in nursing practice (1a-c, 2a-e)
    - applying the systemic problem solving process to develop a comprehensive plan of care for patient with mental health care needs (1a-c, 2a-e)
    - performing and documenting assessments using a systematic approach (1a-c, 2a-e)
    - using data collection tools to obtain patient and family history (1a-c, 2a-e)
    - identifying psychosocial, cultural, spiritual, environmental, occupational, and developmental needs prioritizing and implementing components of the nursing process utilizing a holistic approach (1a-c, 2a-e)
    - evaluating the achievement of patient outcomes (1a-c, 2a-e)
    - modifying the plan of care as needed (1a-c, 2a-e)

6. Demonstrate effective and therapeutic communication with mental health patients, their families, and members of the interdisciplinary health care team by
    - demonstrating therapeutic relationships and therapeutic interactions with patients, families, and members of the health care team (1a-c, 2a-e)
    - observing verbal and nonverbal messages (1a-c, 2a-e)
    - seeking to clarify information (1a-c, 2a-e)
    - demonstrating congruency in thoughts, words, feelings, and body language (1a-c, 2a-e)
    - demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic (1a-c, 2a-e)
    - demonstrating written communications skills that are relevant, accurate, complete, timely, legible, and meaningful (1a-c, 2a-e)
    - demonstrating spontaneous and non-defensive behaviors (1a-c, 2a-e)
    - demonstrating active listening, genuineness, observational skills, physical attentiveness, and effective interviewing skills (1a, 1c and 2b)
    - maintaining eye contact when culturally appropriate (1a, 1c and 2b)
    - maintaining an open posture and leaning toward the patient when appropriate (1a, 1c and 2b)
    - reporting and documenting accurately and completely the patient's status including the diagnosis, nursing care provided, effects of medications and therapies including patient's responses, and interactions with the health care team (1a-c, 2a-e)
    - maintaining open communication (1a-c, 2a-e)
    - recognizing and maintaining professional boundaries of the nurse/patient relationship (1a-c, 2a-e)

7. Collaborate with the interdisciplinary team to implement the treatment plan of the mental health patients by
    - interacting with patients, nursing faculty, practicing nurses, and student nurses' colleagues in a professional manner (1a-c, 2a-e)
    - functioning as a member of the interdisciplinary (1a-c, 2a-e) team
    - working effectively in collaborative assignments (1a-c, 2a-e)
    - collaborating with the patient, the patient's family, and mental health team to coordinate the patient's care (1a-c, 2a-e)
    - collaborating with the interdisciplinary team to make referral to appropriate community agencies and mental health care resources to provide continuity of care (1a-c, 2a-e)
    - referencing and conforming to delegation rules of the Texas Nursing Practice Act (1a-c, 2a-e)
    - following chain of command (1a-c, 2a-e)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the roles of the professional nurse in caring for children and families; utilize clinical reasoning processes and clinical judgment for providing care for the child and the family; apply ethical and legal principles to the care of the child and the family.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the care of the hospitalized child by
    a. describing potential roles for a pediatric nurse in a variety of pediatric settings (1b, 2b, 2c);
    b. identifying principles the nurse may use in communicating and interviewing the child and their family (1a, 2b, 2c);
    c. identifying techniques used when communicating with children (1a, 2b, 2c);
    d. describing adaptation of nursing principles of CPR, medication administration, dosage calculation, and infection control (1a, 1b, 2b, 2c);
    e. identifying the stressors of illness in relation to each of the developmental stages (1b, 2b, 2c);
    f. developing nursing interventions to prevent or reduce stress (1b, 2b, 2c);
    g. applying the nursing process (1b, 2b, 2c);
    h. applying Maslow's theory to the care of children (1b, 2b, 2c);
    i. recalling teaching/learning principles (1b, 2b, 2c);
    j. formulating teaching specific to the level of development (1b, 2b, 2c);
    k. formulating discharge teaching needs (1b, 2b, 2c).
2. Modify physical assessment of the pediatric patient by
    a. differentiating pediatric differences in various systems (1b, 2c);
    b. identifying pertinent data and history collected by the nurse during admission (1a, 2b, 2e);
    c. applying an age-appropriate approach to the assessment process (1b, 2b, 2e);
    d. explaining the correct method of measuring and recording weight, height, and head circumference in infants and children (1a, 2b);
    e. explaining assessment of vital signs in children (1b, 2b, 2e);
    f. differentiating physical assessment of an infant and a child (1b, 2b, 2c);
    g. explaining some common abnormalities that may be assessed while examining an infant or child (1b, 2b, 2c);
    h. differentiating pain assessment in children (1b, 2b, 2c).
3. Apply growth and development concepts to the pediatric patient by
    a. recalling principles of growth and development for infant, toddler, preschool, school age, and adolescent (1b, 2c);
    b. identifying factors which influence growth and development (1b, 2c);
    c. identifying types and purpose of play (1b, 2c).
4. Demonstrate an understanding of childhood injury prevention issues by
    a. listing potential injurious situations by age group (1b, 2c);
    b. determining measures to promote safety (1b, 2c);
    c. identifying principles in emergency treatment of poisoning, including hydrocarbons, iron, corrosives, salicylates, acetaminophen, and lead poisoning (1b, 2c);
    d. developing nursing care for the child with poisoning (1b, 2c).
5. Demonstrate an understanding of pediatric cognitive and emotional impairment by
    a. describing general classification of cognitive impairment (1b, 2c);
    b. developing nursing care for a child with cognitive impairment (1b, 2c);
    c. identifying characteristics of autism (1b, 2c);
    d. developing nursing care for a child with autism (1b, 2c);
    e. identifying characteristics of Down Syndrome (1b, 2c);
    f. discussing genetic implications of Down Syndrome (1b, 2c);
    g. developing nursing care for a child with Down Syndrome (1b, 2c);
    h. describing factors involved with failure to thrive (1b, 2c);
    i. developing nursing care for a child with failure to thrive (1b, 2c);
    j. describing types of child abuse, including emotional neglect, emotional abuse, physical neglect, physical abuse, and sexual abuse (1b, 2c);
    k. explaining factors which precipitate abuse (1b, 2c);
    l. developing nursing care for an abused child (1b, 2c).
6. Summarize pediatric cardiac function and dysfunction by
    a. identifying cardiac structures and hemodynamics (1b, 2c);
    b. describing cardiac function in the child (1b, 2c);
    c. describing each type of heart defect, including ventricular septal defect (VSD), atrial septal defect (ASD), co-arctation of the aorta, patient ductus arteriosus (PDA), tetralogy of fallot (TOF), transposition of the great arteries (TGA), truncus arteriosus, and hypo-plastic left heart syndrome (HLHS) (1b, 2c);
    d. explaining hemodynamics for each heart defect, including VSD, ASD, coarctation of the aorta, PDA, TOF, TGA, truncus arteriosus, and HLHS (1b, 2c);
    e. describing multidisciplinary management (1b, 2c);
    f. describing diagnostic procedures (1b, 2c);
    g. determining medication used in congenital heart disease (1b, 2c);
    h. developing nursing care for a child with congestive heart failure, congenital heart defects, VSD, ASD, co-arctation, PDA, TOF, TGA, truncus arteriosus, HLHS, and cardiac catheterization (1b, 2c).
7. Demonstrate an understanding of respiratory alterations in the pediatric patient by
    a. describing respiratory differences in the infant and child (1b, 2c);
    b. listing conditions which can result from a respiratory alteration and/or dysfunction (1b, 2c);
    c. describing physiology for the listed condition, including upper respiratory tract infection (URI), lower respiratory tract infection (LRI), tonsillitis, otitis media (OM), acute otitis media (AOM), asthma/reactive airway disease (RAD), bronchopulmonary dysplasia (BPD), cystic fibrosis (CF), sudden infant death syndrome (SIDS), pneumonia, croup, epiglottitis, bronchiolitis/respiratory syncytial virus (RSV), and apnea of prematurity/infantile apnea (1b, 2c);
    d. describing clinical manifestation for the listed condition, including URI, LRI, tonsillitis, OM, AOM, asthma/RAD, BPD, CF, SIDS, pneumonia, croup, epiglottitis, bronchiolitis/RSV, and apnea of prematurity/infantile apnea (1b, 2c);
    e. determining medication used for the listed condition, including URI, LRI, tonsillitis, OM, AOM, asthma/RAD, BPD, CF, SIDS, pneumonia, croup, epiglottitis, bronchiolitis/RSV, and apnea of prematurity/infantile apnea (1b, 2c);
    f. discussing multidisciplinary management for each of the conditions, including URI, LRI, tonsillitis, OM, AOM, asthma/RAD, BPD, CF, SIDS, pneumonia, croup, epiglottitis, bronchiolitis/RSV, and apnea of prematurity/infantile apnea (1b, 2c);
    g. discussing genetic implications of cystic fibrosis (1b, 2c);
    h. developing nursing care for a child and his family who experiences an episode of URI, LRI, tonsillitis, OM, AOM, asthma/RAD, BPD, CF, SIDS, pneumonia, croup, epiglottitis, bronchiolitis/RSV, and apnea of prematurity/infantile apnea (1b, 2c).
8. Demonstrate an understanding of immune system alterations by
    a. explaining immune system function (1b, 2c);
    b. identifying special considerations in the pediatric patient (1b, 2c);
    c. determining medication used for immunologic alterations (1b, 2c);

d. developing nursing care for a child with Kawasaki Disease, rheumatic fever, and Steven-Johnson Syndrome (1b, 2c).

9. Demonstrate an understanding of prevention and treatment of communicable diseases by
    a. identifying types of immunity (1b, 2c);
    b. identifying needed immunizations for infants and children (1b, 2c);
    c. determining nursing measures related to immunizations (1b, 2c);
    d. describing communicable diseases (1b, 2c);
    e. describing control for each communicable disease, including mumps, measles/rubeola, chickenpox/varicella, rubella, pertussis, and fifth disease (1b, 2c);
    f. describing prevention of each communicable disease, including mumps, measles/rubeola, chickenpox/varicella, rubella, pertussis, and fifth disease (1b, 2c);
    g. developing a plan of care for a child and family with a communicable disease, including mumps, measles/rubeola, chickenpox/varicella, rubella, pertussis, and fifth disease (1b, 2c).

10. Demonstrate an understanding of pediatric oncology disorders by
    a. listing neoplastic disorders, including leukemia, neuroblastomas, Wilms tumor, and bone tumors (1b, 2c);
    b. describing the physiology in each condition, including leukemia, neuroblastomas, Wilms tumor, and bone tumors (1b, 2c);
    c. describing clinical manifestations for each condition, including leukemia, neuroblastomas, Wilms tumor, and bone tumors (1b, 2c);
    d. discussing overall use of medications for oncology patients (1b, 2c);
    e. describing multidisciplinary management for each condition, including leukemia, neuroblastomas, Wilms tumor, and bone tumors (1b, 2c);
    f. developing nursing care for a child with leukemia, neuroblastomas, Wilms tumor, and bone tumors (1b, 2c).

11. Demonstrate an understanding of pediatric hematological disorders by
    a. listing multidisciplinary conditions which cause hematological disorders (1b, 2c);
    b. describing the physiology in each condition, including sickle cell anemia and hemophilia (1b, 2c);
    c. describing clinical manifestations for each, including sickle cell anemia and hemophilia (1b, 2c);
    d. determining medication used for hematological disorders (1b, 2c);
    e. describing multidisciplinary management for sickle cell anemia and hemophilia (1b, 2c);
    f. discussing genetic implications of sickle cell anemia (1b, 2c);
    g. developing nursing care for a child with sickle cell anemia and hemophilia (1b, 2c).

12. Demonstrate an understanding of pediatric central nervous system (CNS) dysfunction by
    a. listing disorders which result in CNS dysfunction (1b, 2c);
    b. describing the physiology in each condition, including head injuries, submersion injury/near drowning, sepsis, bacterial meningitis, viral meningitis, seizures (including febrile), spina bifida, and hydrocephalis (1b, 2c);
    c. describing clinical manifestations for each condition, including head injuries, submersion injury/near drowning, sepsis, bacterial meningitis, viral meningitis, seizures (including febrile), spina bifida, and hydrocephalis (1b, 2c);
    d. determining medication used for selected conditions (1b, 2c);
    e. describing multidisciplinary management for each condition, including head injuries, submersion injury/near drowning, sepsis, bacterial meningitis, viral meningitis, seizures (including febrile), spina bifida, and hydrocephalis (1b, 2c);
    f. developing nursing care for a child with head injuries, submersion injury/near drowning, sepsis, bacterial meningitis, viral meningitis, seizures (including febrile), spina bifida, and hydrocephalis (1b, 2c).

13. Demonstrate an understanding of pediatric gastrointestinal alterations by
    a. describing the gastrointestinal tract in the infant and child (1b, 2c);
    b. listing conditions which can result from a gastrointestinal alteration and/or dysfunction (1b, 2c);
    c. describing the physiology for the listed conditions, including pyloric stenosis, celiac disease, intussusception, Hirschsprung Disease, gastroesophageal reflux (GER), cleft lip (CL), cleft palate (CP), esophageal atresia, tracheoesophageal fistula (TEF), biliary atresia, hernia, nutritional allergies, feeding problems, and colic (1b, 2c);
    d. describing clinical manifestations for each of the listed conditions, including pyloric stenosis, celiac disease, intussusception, Hirschsprung Disease, GER, CL, CP, esophageal atresia, TEF, biliary atresia, hernia, nutritional allergies, feeding problems, and colic (1b, 2c);
    e. determining medication used for each listed condition, including pyloric stenosis, celiac disease, intussusception, Hirschsprung Disease, GER, CL, CP, esophageal atresia, TEF, biliary atresia, hernia, nutritional allergies, feeding problems, and colic (1b, 2c);
    f. describing multidisciplinary management for each of the conditions, including pyloric stenosis, celiac disease, intussusception, Hirschsprung Disease, GER, CL, CP, esophageal atresia, TEF, biliary atresia, hernia, nutritional allergies, feeding problems, and colic (1b, 2c);
    g. developing nursing care for a child with pyloric stenosis, celiac disease, intussusception, Hirschsprung Disease, GER, CL, CP, esophageal atresia, TEF, biliary atresia, hernia, nutritional allergies, feeding problems, and colic (1b, 2c).

14. Demonstrate an understanding of fluid and electrolyte alterations in children by
    a. explaining fluid and electrolyte differences in children (1b, 2c);
    b. listing conditions which can result from a fluid and electrolyte alteration and/or dysfunction (1b, 2c);
    c. describing the physiology for the listed conditions, including dehydration and burns (1b, 2c);
    d. describing clinical manifestations for each of the conditions listed, including dehydration and burns (1b, 2c);
    e. determining medication used for selected conditions, including dehydration and burns (1b, 2c);
    f. describing multidisciplinary management for each of the conditions, including dehydration and burns (1b, 2c);
    g. developing nursing care for a child with dehydration and burns (1b, 2c).

15. Demonstrate an understanding of pediatric renal function by
    a. listing conditions which can result from a renal dysfunction (1b, 2c);
    b. describing the physiology for each condition, including vesicoureteral reflux (VUR), acute glomerulonephritis (AGN), nephrotic syndrome, hypospadias, and enuresis (1b, 2c);
    c. describing clinical manifestations for each of the conditions, including VUR, AGN, nephrotic syndrome, hypospadias, and enuresis (1b, 2c);
    d. determining medication used for selected conditions, including VUR, AGN, nephrotic syndrome, hypospadias, and enuresis (1b, 2c);
    e. discussing multidisciplinary management for each of the conditions, including VUR, AGN, nephrotic syndrome, hypospadias, and enuresis (1b, 2c);
    f. developing nursing care for a child with VUR, AGN, nephrotic syndrome, hypospadias, and enuresis (1b, 2c).

16. Demonstrate an understanding of pediatric integumentary alterations by
    a. listing integumentary disorders (1b, 2c);
    b. describing clinical manifestations for each condition listed, including diaper rash, atopic dermatitis/eczema, impetigo, acne, head lice, scabies, and cellulitis (1b, 2c);
    c. determining medications used for each condition, including diaper rash, atopic dermatitis/eczema, impetigo, acne, head lice, scabies, and cellulitis (1b, 2c);
    d. developing nursing care for a child with diaper rash, atopic dermatitis/eczema, impetigo, acne, head lice, scabies, and cellulitis (1b, 2c).

17. Demonstrate an understanding of pediatric musculoskeletal dysfunctions by
    a. listing disorders which result in musculoskeletal dysfunction (1b, 2c);
    b. describing the pathophysiology in each condition, including Duchenne Muscular Dystrophy (DMD), scoliosis, juvenile idiopathic arthritis (JIA), osteomyelitis, developmental dysplasia of the hip (DDH), clubfoot, and cerebral palsy (CP) (1b, 2c);
    c. describing clinical manifestations for each condition, including DMD, scoliosis, JIA, osteomyelitis, DDH, clubfoot, and CP (1b, 2c);
    d. determining medication used for each condition, including DMD, scoliosis, JIA, osteomyelitis, DDH, clubfoot, and CP (1b, 2c);
    e. describing traction and cast care (1b, 2c);
    f. describing multidisciplinary management for each condition, including DMD, scoliosis, JIA, osteomyelitis, DDH, clubfoot, and CP (1b, 2c);
    g. describing genetic implications of DMD (1b, 2c);
    h. developing nursing care for a child with DMD, scoliosis, JIA, osteomyelitis, DDH, clubfoot, and CP (1b, 2c).

RNSG 2208 - Maternal/Newborn Nursing/Women's Health

General

Course Key
14953

Course Rubric	Course Number	Course Title
RNSG	2208	Maternal and Newborn Nursing and Women's Health

Semester Credit Hours	Lecture Hours	Lab Hours
2	2	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) Concepts related to nursing care for childbearing families and women's health issues. Content includes knowledge, judgment, skill, and professional values within a legal/ethical framework. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Required Prerequisites: RNSG 1441, RNSG 1461, RNSG 2213, RNSG 2163, PSYC 2314, or Administrative Approval Required Corequisites: RNSG-2260 (If it is the second attempt at passing this course, then the co-requisite may be waived)

Take RNSG-2260
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): RNSG 1441, RNSG 1461, RNSG 2213, RNSG 2163, PSYC 2314, or Administrative Approval
Required Corequisite(s): RNSG 2161

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Investigate common needs and high risk changes which may be experienced by women and the childbearing family; utilize clinical reasoning processes and clinical judgment for the family during the prenatal, perinatal, and postnatal period, as well as caring for patients with women's health issues.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate skills necessary in maternal/newborn nursing by
    a. computing dosage calculations for medication/IV fluids used in labor/delivery, postpartum, nursery and Postoperative Gyn (1a, 1b);
    b. using problem solving in determining nursing care (1a, 1b);
    c. explaining labor/delivery and newborn procedures (1a, 1b, 2c);
    d. describing teaching plans for the laboring patient, the postpartum patient, the gynecological patient, and the newborn (1a, 1b, 2c);
    e. identifying safe, effective care (1a, 1b, 2c);
    f. discussing evidence-based practice (1a, 1b, 1c, 2c).
2. Analyze labor by
    a. explaining physiologic and psychological responses to labor (1a, 1b, 2b, 2c, 2d);
    b. comparing premonitory signs of labor (1a, 1b, 2b, 2c, 2d);
    c. distinguishing between true and false labor (1a, 1b, 2b, 2c, 2d);
    d. comparing the role of passage, passenger, powers, and psyche in the labor process (1a, 1b, 2b, 2c, 2d);
    e. identifying factors that can indicate a greater than normal risk to the mother and fetus during labor (1a, 1b, 2b, 2c, 2d);
    f. explaining the stages and phases of labor (1a, 1b, 2b, 2c, 2d).
3. Evaluate the intra-partum patient's needs by
    a. relating physiological, psychological, and cultural factors (1a, 1b, 2b, 2c, 2d);
    b. explaining oxytocin in the post delivery period (1a, 1b, 2b, 2c, 2d);
    c. developing a nursing care plan for the intra-partum patient (1a, 1b, 2b, 2c, 2d);
    d. computing an Apgar score (1a, 1b, 2b, 2c, 2d).
4. Analyze extra-uterine adaptation by
    a. explaining changes from fetal to newborn circulation (1a, 1b, 2b, 2c, 2d);
    b. explaining respiratory changes at birth (1a, 1b, 2b, 2c, 2d);
    c. comparing mechanisms and effects of heat loss after birth (1a, 1b, 2b, 2c, 2d);
    d. describing body system changes after birth to include the immune, hematologic, renal, endocrine, gastrointestinal, hepatic, and neurological systems (1a, 1b, 2b, 2c, 2d);
    e. describing signs and symptoms of respiratory distress, jaundice, hypoglycemia, hypothermia, hyperthermia, and birth injuries (1a, 1b, 2b, 2c, 2d);
    f. describing periods of reactivity and behavioral states (1a, 1b, 2b, 2c, 2d);
    g. describing initial assessment of the newborn (1a, 1b, 2b, 2c, 2d).
5. Analyze ongoing newborn needs by
    a. explaining ongoing assessment of the newborn (1a, 1b, 2b, 2c, 2d);
    b. explaining dietary and fluid needs (1a, 1b, 2b, 2c, 2d);
    c. describing neonatal pathogens and their effect on the newborn (1a, 1b, 2b, 2c, 2d);
    d. identifying common medications/vaccines used in the neonatal period to include Vitamin K, erythromycin, hepatitis B Vaccine, and hepatitis B immunoglobulin (1a, 1b, 2b, 2c, 2d);
    e. identifying appropriate circumcision and umbilical cord care (1a, 1b, 2b, 2c, 2d);
    f. identifying common laboratory studies performed on the newborn (1a, 1b, 2b, 2c, 2d);
    g. explaining the Texas newborn screening program (1a, 1b, 2b, 2c, 2d);
    h. examining methods to promote newborn safety in the hospital (1a, 1b, 2b, 2c, 2d, 2e);
    i. developing teaching plan for parents (1a, 1b, 2b, 2c, 2d).
6. Apply knowledge and skills to support breastfeeding newborns by
    a. analyzing the physiology of lactation (1a, 1b, 2b, 2c, 2d);
    b. explaining the benefits of breastfeeding for the mother and infant (1a, 1b, 2b, 2c, 2d);
    c. applying the nursing process in management of initial and continued breastfeeding (1a, 1b, 2b, 2c, 2d).
7. Analyze postpartum physiological needs by
    a. describing physiological changes and needs (1a, 1b, 2b, 2c, 2d);
    b. comparing cesarean birth and vaginal birth in terms of nursing assessments and care (1a, 1b, 2b, 2c, 2d);
    c. describing use of oxytocin, analgesics, Rh immune globulin, rubella vaccine, and methergine (1a, 1b, 2b, 2c, 2d);
    d. developing nursing care to support the physiologic well-being of the new mother during the postpartum period (1a, 1b, 2b, 2c, 2d).
8. Evaluate postpartum psychosocial needs by
    a. identifying parent behaviors that indicate bonding and attachment (1a, 1b, 2b, 2c, 2d);
    b. describing progressive phases of maternal adaptation (taking in, taking hold, letting go) (1a, 1b, 2b, 2c, 2d);
    c. explaining the process of family adaptation to the birth of a new infant (1a, 1b, 2b, 2c, 2d);
    d. developing nursing care to support the psychosocial needs of the family (1a, 1b, 2b, 2c, 2d);
    e. identifying maternal concerns of body image and postpartum blues (1a, 1b, 2b, 2c, 2d).
9. Explain pregnancy changes by
    a. differentiating presumptive, probable, and positive signs of pregnancy (1a, 1b, 2b, 2c, 2d);
    b. describing physiological changes which occur during pregnancy (1a, 1b, 2b, 2c, 2d);
    c. describing psychological changes which occur during pregnancy (1a, 1b, 2b, 2c, 2d);
    d. describing each component of initial prenatal visit (1a, 1b, 2b, 2c, 2d);
    e. describing each component of return prenatal visits (1a, 1b, 2b, 2c, 2d);
    f. determining rationales and normal values for prenatal laboratory studies (1a, 1b, 2b, 2c, 2d);
    g. identifying substances which have teratogenic effects (1a, 1b, 2b, 2c, 2d);
    h. explaining the nurse's role in prenatal care (1a, 1b, 2b, 2c, 2d);
    i. identifying teaching needs in pregnancy (1a, 1b, 2b, 2c, 2d);
    j. computing obstetrical history using 3 and 5 digit systems (1a, 1b, 2b, 2c, 2d);
    k. computing EDD using Naegele's rule (1a, 1b, 2b, 2c, 2d).
10. Analyze pregnancy needs by
    a. determining physiological, psychosocial, and cultural needs (1a, 1b, 2b, 2c, 2d);

b. identifying danger signs during pregnancy (1a, 1b, 2b, 2c, 2d);

c. developing nursing care for the ante-partal woman (1a, 1b, 2b, 2c, 2d).

11. Evaluate pregnancy nutritional needs by

a. identifying special nutritional needs (1a, 1b, 2b, 2c, 2d);

b. describing rationales for special nutritional needs (1a, 1b, 2b, 2c, 2d);

c. describing nutritional status on the course and outcome of pregnancy (1a, 1b, 2b, 2c, 2d);

d. describing fetal nutritional needs (1a, 1b, 2b, 2c, 2d);

e. analyzing weight gain (1a, 1b, 2b, 2c, 2d);

f. describing common methods of nutritional assessment (1a, 1b, 2b, 2c, 2d);

g. identifying appropriate nutritional supplements (1a, 1b, 2b, 2c, 2d);

h. developing nursing care to meet the nutritional needs of the pregnant patient (1a, 1b, 2b, 2c, 2d).

12. Compare methods of fetal surveillance during labor by

a. identifying the purposes of intrapartal fetal assessment (1a, 1b, 2b, 2c, 2d);

b. explaining types of equipment used (1a, 1b, 2b, 2c, 2d, 2e);

c. describing types of periodic patterns seen via electronic fetal monitoring (1a, 1b, 2b, 2c, 2d, 2e);

d. explaining the difference between reassuring and non-reassuring fetal heart rate patterns (1a, 1b, 2b, 2c, 2d);

e. analyzing appropriate nursing actions when non-reassuring fetal heart rate patterns occur (1a, 1b, 2b, 2c, 2d).

13. Evaluate intra-partal pain management by

a. describing unique pain factors during labor (1a, 1b, 2b, 2c, 2d);

b. describing factors that influence responses to pain (1a, 1b, 2b, 2c, 2d);

c. analyzing factors that affect the use of pharmacologic and nonpharmacologic pain management techniques during childbirth (1a, 1b, 2b, 2c, 2d);

d. explaining use of sedatives, analgesics, regional, and general anesthetics, anti-emetics, and opioid antagonists (1a, 1b, 2b, 2c, 2d, 2e);

e. explaining pharmacologic pain management methods in regard to body area affected, advantages, disadvantages, maternal effects, fetal effects, residual effects on the newborn, and methods to overcome adverse effects (1a, 1b, 2b, 2c, 2d);

f. developing nursing care to promote pain management (1a, 1b, 2b, 2c, 2d).

14. Analyze labor induction/augmentation by

a. identifying indications for induction or augmentation (1a, 1b, 2b, 2c, 2d);

b. identifying contraindications for induction or augmentation (1a, 1b, 2b, 2c, 2d);

c. describing methods and medications used to induce or augment labor (1a, 1b, 2b, 2c, 2d, 2e);

d. developing nursing care for the patient who is undergoing labor induction or augmentation (1a, 1b, 2b, 2c, 2d).

15. Examine operative obstetrical procedures by

a. describing operative obstetrical procedures (1a, 1b, 2b, 2c, 2d);

b. describing indications for cesarean birth, forceps and vacuum assisted births, episiotomy, amniotomy, and internal and external version (1a, 1b, 2b, 2c, 2d, 2e);

c. describing precautions and contraindications for mother and fetus (1a, 1b, 2b, 2c, 2d);

d. analyzing nurses role in operative obstetrical procedures (1a, 1b, 2b, 2c, 2d);

e. developing nursing care for the patient who has an operative obstetrical procedure (1a, 1b, 2b, 2c, 2d).

16. Explain postpartum complications by

a. identifying risk factors (1a, 1b, 2b, 2c, 2d);

b. describing multidisciplinary actions that can prevent postpartum complications (1a, 1b, 2a, 2b, 2c, 2d);

c. describing signs and symptoms of early and late postpartum hemorrhage, uterine sub-involution, hypovolemic shock, thromboembolic disorders, puerperal infection, and affective disorders (1a, 1b, 2b, 2c, 2d);

d. identifying appropriate medications used to treat the various postpartum complications (1a, 1b, 2b, 2c, 2d);

e. differentiating multidisciplinary management of postpartum complications (1a, 1b, 2a, 2b, 2c, 2d);

f. developing nursing care for the patient who has a postpartum complication (1a, 1b, 2b, 2c, 2d).

17. Analyze labor variations by

a. describing types of dysfunctional labor patterns (1a, 1b, 2b, 2c, 2d);

b. describing maternal and fetal risks during of prolonged labor to precipitous labor (1a, 1b, 2b, 2c, 2d);

c. explaining passage, passenger, and the powers in the pathophysiology of dysfunctional labor (1a, 1b, 2b, 2c, 2d);

d. developing nursing care for the patient experiencing dysfunctional labor (1a, 1b, 2b, 2c, 2d).

18. Analyze preterm labor by

a. defining preterm labor (1a, 1b, 2b, 2c, 2d);

b. identifying risk factors (1a, 1b, 2b, 2c, 2d);

c. explaining methods used to predict preterm labor (1a, 1b, 2b, 2c, 2d);

d. explaining multidisciplinary measures used to prevent/control preterm labor (1a, 1b, 2b, 2c, 2d);

e. comparing tocolytics, beta-adrenergic agents, and corticosteroids (1a, 1b, 2b, 2c, 2d);

f. developing nursing care for the patient who is experiencing preterm labor (1a, 1b, 2b, 2c, 2d).

19. Explain obstetrical emergencies by

a. describing uterine rupture, uterine inversion, prolapsed umbilical cord, amniotic fluid embolus, and trauma (1a, 1b, 2b, 2c, 2d);

b. identifying multidisciplinary management in obstetrical emergencies (1a, 1b, 2a, 2b, 2c, 2d);

c. developing nursing care for the patient who has an obstetrical emergency (1a, 1b, 2b, 2c, 2d).

20. Analyze ante-partal complications by

a. describing common ante-partal complications (1a, 1b, 2b, 2c, 2d);

b. describing pathophysiology of each complication (1a, 1b, 2b, 2c, 2d);

c. describing multidisciplinary management for each complication (1a, 1b, 2a, 2b, 2c, 2d);

d. comparing medications used to treat the various complications (1a, 1b, 2b, 2c, 2d);

e. explaining maternal and fetal risk associated with the complication (1a, 1b, 2b, 2c, 2d);

f. developing nursing care to meet the needs of the ante-partal patient who is experiencing an adolescent pregnancy, diabetes mellitus, hyperemesis gravidarum, domestic violence, substance abuse, Rh incompatibility, and infection (1a, 1b, 2b, 2c, 2d).

21. Analyze pregnancy induced hypertension by

a. listing characteristics (1a, 1b, 2b, 2c, 2d);

b. defining classifications of hypertension during pregnancy (1a, 1b, 2b, 2c, 2d);

c. explaining pathophysiology (1a, 1b, 2b, 2c, 2d);

d. determining genetic risk factors (1a, 1b, 2b, 2c, 2d);

e. identifying maternal and fetal risks (1a, 1b, 2b, 2c, 2d);

f. describing multidisciplinary management (1a, 1b, 2a, 2b, 2c, 2d);

g. explaining pharmacological agents used in treatment (1a, 1b, 2b, 2c, 2d);

h. developing nursing care for the patient who has PIH, or preexisting hypertension (1a, 1b, 2b, 2c, 2d).

22. Analyze pregnancy hemorrhagic conditions by

a. describing common hemorrhagic conditions during early pregnancy (1a, 1b, 2b, 2c, 2d);

b. describing common hemorrhagic conditions during late pregnancy (1a, 1b, 2b, 2c, 2d);

c. determining signs and symptoms for each condition (1a, 1b, 2b, 2c, 2d);

d. describing multidisciplinary management for each condition (1a, 1b, 2b, 2c, 2d);

e. developing nursing care for the woman who has a hemorrhagic condition (1a, 1b, 2b, 2c, 2d).

23. Explain newborn complications by

a. identifying newborns who are at risk (1a, 1b, 2b, 2c, 2d);

b. identifying the newborn problems associated with preterm and post-term birth (1a, 1b, 2b, 2c, 2d);

c. differentiating newborn complications related to small for gestational age, large for gestational age, cold stress, respiratory distress syndrome, transient tachypnea of the newborn, meconium aspiration syndrome, hyperbilirubinemia, infants of a diabetic mother, trauma, drug addiction, and neonatal sepsis (1a, 1b, 2b, 2c, 2d);

d. examining the impact on the family of having a newborn with complications (1a, 1b, 2b, 2c, 2d);

e. developing nursing care for the newborn with various types of complications (1a, 1b, 2b, 2c, 2d).

24. Analyze women's health promotion by

a. identifying common health promotion teaching needs (1a, 1b, 2b, 2c, 2d);

b. identifying health promotion practices to include breast exam, mammography, pap smears, vulvar examination, and pelvic examination (1a, 1b, 2b, 2c, 2d);

c. comparing health promotion at various life stages (1a, 1b, 2b, 2c, 2d);

d. describing the processes involved in the onset of menopause (1a, 1b, 2b, 2c, 2d);

e. developing nursing care for the women who are experiencing perimenopause/menopause (1a, 1b, 2b, 2c, 2d).

25. Analyze common disorders affecting women by

a. identifying risk factors for each disorder (1a, 1b, 2b, 2c, 2d);

b. identifying genetic risk factors for each disorder (1a, 1b, 2b, 2c, 2d);

c. describing pathophysiology of each disorder (1a, 1b, 2b, 2c, 2d);

d. describing multidisciplinary management of each disorder (1a, 1b, 2a, 2b, 2c, 2d);

e. examining medication used in the treatment of various disorders (1a, 1b, 2b, 2c, 2d);

f. developing nursing care for the woman with osteoporosis, pelvic floor disorders, menstrual cycle disorders, benign and malignant breast and reproductive tract disorders, PMS, cardiovascular disease, and infectious disorders of the reproductive tract (1a, 1b, 2b, 2c, 2d).

26. Examine induced abortion by

a. describing methods used for pregnancy termination (1a, 1b, 2b, 2c, 2d, 2e);

b. explaining physical and psychological needs of the patient prior to and after induced abortion (1a, 1b, 2b, 2c, 2d);

c. explaining post abortion teaching needs (1a, 1b, 2b, 2c, 2d);

d. developing nursing care of the woman who seeks to terminate pregnancy (1a, 1b, 2b, 2c, 2d).

27. Compare contraception methods by

a. describing various contraceptive methods (1a, 1b, 2b, 2c, 2d);

b. describing how each method prevents pregnancy (1a, 1b, 2b, 2c, 2d);

c. analyzing advantages, disadvantages, side effects, effectiveness, contraindications for, and cost of each method (1a, 1b, 2b, 2c, 2d);

d. developing nursing care for the individual who is seeking contraception (1a, 1b, 2b, 2c, 2d).

RNSG 2213 - Mental Health Nursing

General

Course Key

Course Rubric	Course Number	Course Title
RNSG	2213	Mental Health Nursing

Semester Credit Hours	Lecture Hours	Lab Hours
2	2	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) Principles and concepts of mental health, psychopathology, and treatment modalities related to the nursing care of patients and their families. This course lends itself to a blocked approach. Focus is on holistic human needs. Associate degree nurse role assimilation is facilitated through the development of identified major concepts. Required Prerequisites: RNSG-1413, RNSG-1360, RNSG-1105, PSYC-2301 or Administrative Approval Required Corequisites: RNSG-2163 (If it is the second attempt at passing this course, then the co-requisite may be waived.)

Required Corequisite(s): RNSG 2260

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the roles of the professional nurse in caring for patients and families experiencing mental health problems; use therapeutic communication; utilize clinical reasoning processes and clinical judgment for providing care to patients and families experiencing mental health problems.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the concepts of psychiatric mental health nursing by
   a. describing the continuum of mental health and mental illness (1b, 2c);
   b. explaining the parts and purpose of the mental status exam and DSM-VTR system (1b, 2c);
   c. describing practice settings (1b, 2c);
   d. defining contributions of various theorists (1b, 2c);
   e. describing therapeutic approaches in caring for patients with emotional or mental disorders (1b, 2c);
   f. explaining the nursing process and standards of care for psychiatric mental health nursing (1b, 2c);

2. Explain the nurse/patient relationship by
   a. describing the therapeutic relationship (1b, 2b);
   b. identifying therapeutic responses by the nurse to common patient behaviors (1b, 2b);
   c. describing techniques that enhance communication and techniques that obstruct communication (1b, 2b);
   d. describing the clinical interview (1b, 2b);

3. Explain the concepts of competence and confidentiality as they pertain to psychiatric mental health nursing by
   a. discussing the civil rights of mentally ill persons (1b, 2b);
   b. describing the legal aspects of admission and discharge procedures (1b, 2b);
   c. describing the rights of the hospitalized patient with mental illness (1b, 2b);

4. Explain psychopharmacology by
   a. discussing functions and cellular composition of the brain (1b, 2b);
   b. discussing interactions of neurotransmitters and receptors (1b, 2b);

c. discussing the major classes of psychotropic medications (1b, 2b);
d. correlating classes of psychotropic medications to patient diagnosis (1b, 2b);
e. identifying nursing interventions specific to psychotropic medications (1b, 2b);

5. Explain mental health disorders of children and adolescents by
   a. discussing predisposing and precipitating factors (1b, 2b);
   b. discussing assessment of development and functioning (1b, 2b);
   c. describing treatment modalities for children and adolescents (1b, 2b);
   d. discussing techniques for managing disruptive behaviors (1b, 2b);
   e. describing diagnoses relevant to disorders of children and adolescents (1b, 2b);
   f. examining medications used in the treatment of childhood and adolescent disorders (1b, 2b);

6. Explain the nursing care for the patient with anger and aggression problems by
   a. discussing assessment guidelines for anger and aggression (1b, 2b);
   b. describing nursing management strategies: psychosocial, pharmacological, and milieu management (1b, 2b);
   c. describing strategies for ensuring safety (1b, 2b);
   d. describing guidelines for use of mechanical restraints (1b, 2b);
   e. applying the nursing process for the care of the patient with anger and aggression problems (1b, 2b);

7. Explain self-destructive behavior by
   a. identifying risk factors and predisposing factors (1b, 2b);
   b. describing SAD PERSONS scale (1b, 2b);
   c. discussing primary, secondary, and tertiary interventions (1b, 2b);
   d. applying the nursing process for the care of the patient with suicidal ideation (1a, 1b);

8. Explain sexual abuse and family violence by
   a. exploring family and domestic violence and its impact on society (1b, 2b);
   b. examining nursing attitudes toward sexual abuse and family violence (1b, 2b);
   c. describing the three stages of domestic violence (1b, 2b);
   d. applying the nursing process for the care of victims of violence (1b, 2b);
   e. discussing documentation and reporting (1b, 2b);
   f. identifying primary, secondary, and tertiary nursing interventions for the care of victims of abuse and violence (1b, 2b);

9. Explain anxiety disorders by
   a. describing adaptive and maladaptive behaviors (1b, 2d);
   b. defining types of anxiety disorders and associated symptoms (1b, 2d);
   c. discussing treatment modalities for anxiety disorders (1b, 2d);
   d. designing patient and family teaching related to anxiety disorders (1b, 2d);
   e. applying the nursing process to the care of the patient with anxiety disorder (1b, 2d);

10. Explain depressive disorders by
    a. describing the types of depressive disorders (1b, 2d);
    b. identifying symptoms of the depressive disorders (1b, 2d);
    c. discussing etiological implications including genomics in the development of depression (1b, 2d);
    d. describing treatment modalities relevant to depressive disorders (1b, 2d);
    e. applying the nursing process to the patient with depression (1b, 2d);

11. Explain bipolar disorders by
    a. describing the types of bipolar disorders (1b, 2d);
    b. identifying symptoms of the bipolar disorders (1b, 2d);
    c. discussing etiological implications including genomics in the development of bipolar disorder (1b, 2d);
    d. discussing treatment modalities relevant to bipolar disorder (1b, 2d);
    e. applying the nursing process to the patient with a bipolar disorder (1b, 2d);

12. Explain substance-related disorders by
    a. defining abuse, dependency, intoxication, withdrawal, and tolerance (1b, 2d);
    b. discussing etiological implications including genomics in the development of a substance disorder (1b, 2d);
    c. describing symptoms of intoxication and withdrawal of the various substances of abuse (1b, 2d);
    d. describing major defense mechanisms of persons with a substance use disorder (1b, 2d);
    e. applying the nursing process to the patient with a substance-related disorder (1b, 2d);

13. Explain family therapy by
    a. defining family therapy (1b, 2b);
    b. identifying types of family therapy (1b, 2b);
    c. discussing psycho-education as a treatment option (1b, 2b);
    d. applying the nursing process to the care of the family (1b, 2b);

14. Explain schizophrenia and other psychotic disorders by
    a. identifying concepts of schizophrenia and related psychotic disorders (1b, 2d);
    b. discussing etiological implications including genomics in the development of schizophrenia and psychosis (1b, 2d);
    c. discussing treatment modalities for the patient with psychosis (1b, 2d);
    d. applying the nursing process to the patient with schizophrenia or psychosis (1b, 2d);

15. Explain therapeutic groups by
    a. discussing concepts relevant to therapeutic groups (1b, 2b);
    b. discussing curative factors that occur in groups (1b, 2b);
    c. describing the phases of group development (1b, 2b);
    d. identifying leadership styles (1b, 2b);
    e. identifying roles group members may assume (1b, 2b);
    f. describing the role of the nurse in group work (1b, 2b);

16. Explain personality disorders by
    a. identifying common features found in personality disorders (1b, 2d);
    b. describing developmental factors associated with personality disorders (1b, 2d);
    c. explaining nursing interventions relevant to aggressive or manipulative behaviors (1b, 2d);
    d. applying the nursing process to the patient with a personality disorder (1b, 2d);

17. Explain eating disorders by
    a. comparing and contrasting bulimia and anorexia (1b);
    b. describing etiological factors relevant to eating disorders (1b);
    c. describing treatment modalities relevant to eating disorders (1b);
    d. applying the nursing process to the patient with an eating disorder (1b);

18. Explain integrative care by
    a. describing complementary treatment modalities (1b, 2d);
    b. discussing implications of patient use of herbals with the possibility of drug interactions (1b, 2d);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the attitudes and values of the nursing profession by
    a. interacting with patients, nursing faculty, and healthcare team in a professional manner (1a, 1b, 1c, 2b);
    b. demonstrating personal and professional responsibility and accountability (1a, 1b, 1c, 2b);
    c. adhering to policies and procedures of Tarrant County College, the Nursing Department, the course, the clinical facility, and the Texas Nurse Practice Act (1a, 1b, 1c, 2b, 2c, 2e);
    d. demonstrating professional behavior, appearance, and attitude (1a, 1b, 1c, 2b);
    e. demonstrating ethical/legal accountability for actions (1a, 1b, 1c, 2b);
    f. selecting learning experiences that enhance competency and promote professional and personal development (1b, 2b);
    g. organizing and completing assigned tasks in appropriate time and performing total patient care (1a, 1b, 1c, 2b);
    h. utilizing evidence based clinical practice (1a, 1b, 2a, 2b, 2c, 2e);
    i. actively seeking and participating in self-directed learning experiences (1a, 1b, 1c, 2b, 2c, 2e);
2. Demonstrate the knowledge, skills, and attitudes that ensure a culture of safety in the practice of caring for women and childbearing families by
    a. implementing measures to promote a safe environment for patients and others (1a, 1b, 2e);
    b. identifying patients accurately (1a, 1b, 2e);
    c. performing nursing procedures and skills correctly (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2c, 2d);
    e. maintaining and monitoring for the chemical safety of the patient (1a, 1b, 2a, 2c, 2d);
    f. stating the rationale for and the effects of medications and treatments and correctly administering the same (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 2a, 2e);
    h. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2b);
    i. advocating for patient/family (1a, 1b, 1c, 2a, 2b, 2c);
    j. implementing patient care according to legal and ethical, state and national standards (1a, 1b, 1c, 2b, 2c, 2e);
3. Initiate effective communication with patients, families, and members of the interdisciplinary health care team by
    a. demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic (1a, 1b, 2b);
    b. demonstrating written/EHR (where available) communication skills that are relevant, accurate, complete, timely, legible, and meaningful (1a, 1b, 2c, 2d, 2e);
    c. demonstrating active listening, genuineness, observation skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b);
    d. communicating learning needs to staff and instructors (1a, 1c, 2b);
4. Provide patient care that is respectful and responsive to women and childbearing families by
    a. demonstrating acceptance and consideration of the physical, emotional, social, spiritual, and cultural needs of the patient and others to achieve desired patient outcomes (1a, 1b, 1c, 2b);
    b. demonstrating caring behaviors using comfort, compassion, concern, empathy, nurturing, touch, and support in assisting patient in coping process (1a, 1b, 1c, 2b);
    c. delivering care in a nonjudgmental and non-discriminating manner (1a, 1b, 1c, 2b);
5. Analyze teaching/learning principles to meet the needs of women and childbearing families by
    a. assessing learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b);
    b. collaborating with patient and interdisciplinary health care team to develop individual teaching plans based upon patient/family learning style and needs (1a, 1b, 1c, 2b);
    c. using best practice standards and other evidence based findings in developing teaching plans for patients/families (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. developing and implementing individualized patient and family teaching (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. implementing pain management, non-pharmacological techniques, coaching, breathing/relaxation techniques, positioning and electronic fetal monitoring (EFM) for the labor patient (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    f. implementing ambulation, nutrition, hygiene, elimination, incision care, self-care, pericare, involution, lochia, pain management, postpartum blues and breastfeeding for the postpartum patient (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    g. implementing thermoregulation, circumcision, nutrition, cord care, diapering, bathing, bulb suctioning, elimination, positioning, and immunizations for the newborn (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    h. documenting teaching interventions, patient and family response (1a, 1c);
    i. evaluating teaching goals and revising plan as needed (1a, 1b, 2b, 2c);
    j. demonstrating discharge teaching (with licensed personnel), including signs and symptoms of when to notify physician after discharge (1a, 1b, 1c, 2a, 2b, 2c, 2e);
6. Utilize clinical reasoning skills when providing care for women and childbearing families by
    a. performing comprehensive assessment to identify health needs of patient and families (1a, 1b, 1c, 2b);
    b. monitoring changes in health status of patients and families (1a, 1b, 2c, 2e);
    c. documenting comprehensive assessment data (1a, 1b, 2a, 2c, 2e);
7. Collaborate with interdisciplinary teams to coordinate care of women and childbearing families to achieve quality patient outcomes by
    a. collaborating with the patient, family, and interdisciplinary team to coordinate care (1a, 1b, 1c, 2b);
    b. collaborating with interdisciplinary team to make referrals to appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2b, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

The seven course concepts and outcomes include:

Safety: Demonstrate the knowledge, skills, and attitudes that ensure culture of safety in practice (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Professionalism: Demonstrate the attitudes and values of the nursing profession (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Caring Approach: Provide patient care that is respectful of and responsive to individual patient preferences, needs, and values (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Teaching: Implement teaching/learning principles to meet the needs of patients and families with complex health needs (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Clinical Reasoning: Independently utilize clinical reasoning skills when providing care for patients with complex health needs (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Communication: Initiate and facilitate effective communication with patients, families, and members of the interdisciplinary health care team (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Collaboration: Collaborate with interdisciplinary teams to manage patients, families, and/or communities to achieve quality patient outcomes (1a, 1b, 1c, 1d, 1e, 2b, 2c, 2e, 2f, 2a, 3a, 3d).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the knowledge, skills, and attitudes that ensure a culture of safety in practice by
   a. implementing measures to promote a safe environment for patients and others
   b. identifying patients correctly
   c. performing nursing procedures and skills correctly
   d. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions
   e. maintaining and monitoring for the chemical safety of the patient
   f. maintaining and monitoring for the thermal safety of the patient
   g. assuring the psychological safety of the patient by using stress control methods and therapeutic communication
   h. advocating independently on behalf of patients, families, self, and others
   i. implementing patient care according to legal and ethical state and national standards
   j. formulating goals and outcomes to reduce risk using evidence based guidelines
   k. practicing within the parameters of individual knowledge and experience
2. Demonstrate the attitudes and values of the nursing profession by
   a. demonstrating professional attitudes and behaviors in the health care setting
   b. demonstrating personal accountability and growth
   c. adhering to policies and procedures of Tarrant County College, the Nursing Department, the course, the clinical facility, and the Texas Nurse Practice Act
   d. adhering to the professional, ethical, and legal standards of nursing
   e. justify the value of ongoing educational activities to maintain competency and currency
   f. demonstrating behaviors and attitudes indicating honesty, accountability, trustworthiness, reliability, and integrity
   g. demonstrating proficiency in effective professional communication
   h. delineating and maintaining appropriate professional boundaries and patient confidentiality
   i. seeking and participating in self-directed learning experiences
   j. participating in community based clinical experiences
   k. applying previously learned knowledge
   l. participating in clinical self-evaluation with documentation of substantiating behaviors
   m. advocating for quality patient care
   n. acknowledging responsibility for lifelong learning
   o. integrating multiple resources into evidence based practice
   p. assuming responsibility for and accepting accountability for personal and professional beliefs and actions
3. Provide patient care that is respectful of and responsive to individual patient preferences, needs, and values by
   a. applying principles of culturally competent care throughout the implementation of the nursing process
   b. using caring behaviors in nursing process development and implementation
   c. assisting patient and significant support person(s) to cope with and adapt to stressful events and changes in health status
   d. demonstrating sensitivity to the physical, emotional, social, spiritual, and cultural needs of the patient
   e. promoting wellness behaviors in self and others
4. Implement teaching and learning principles to meet the needs of patients and families with complex health needs by
   a. assessing learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration
   b. collaborating with patient and interdisciplinary health care team to develop individual teaching plans based upon patient/family learning style and needs
   c. developing, implementing, and evaluating independently teaching plans to meet the needs of patients and families with complex health needs
   d. implementing individualized teaching/educational programs for individuals and families
   e. demonstrating effective teaching characteristics in teaching/learning situations
   f. performing teaching independently or interdependently as appropriate
   g. providing current and accurate information based on best practice standards and evidence-based findings
   h. using several methods of teaching to accommodate a variety of learning styles
   i. evaluating the patient and significant support person's progress toward achievement of identified learning outcomes, and modifying the teaching plan based on the evaluation
   j. documenting teaching interventions, patient, and family response
5. Independently utilize clinical reasoning skills when providing care for patients with complex health needs by
   a. demonstrating autonomy in collecting and analyzing physical, psychosocial, spiritual, cultural, occupational, and environmental data in a variety of health care settings

b. applying principles of culturally competent care throughout the implementation of the nursing process

c. prioritizing nursing diagnoses in caring for patients with complex health needs

d. developing individualized plans of nursing care for patients of various developmental levels to restore health, prevent disease, and support during end of life

e. planning and prioritizing the delivery of nursing care to multiple patients in a variety of health care settings

f. evaluating the achievement of patient outcomes and revising the plan of care as needed

g. basing decisions and practice on reason and objective evidence

h. recognizing social, political, and economic determinants of health status

6. Initiate and facilitate effective communication with patients, families, and members of the interdisciplinary health care team by

a. demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic

b. initiating and facilitating communication independently to meet the needs of patients and families

c. demonstrating communication skills as the leader of a student team

d. evaluating communication techniques utilized with the patient, family, significant others, and members of the health care team

e. demonstrating written communication skills that are relevant, accurate, complete, timely, legible, and meaningful

f. demonstrating active listening, genuineness, empathy, observation skills, physical attentiveness, and interviewing skills

g. recognizing and maintaining professional boundaries of the nurse/patient relationship

h. assisting patients and families in expression of feelings

i. displaying spontaneous, non-defensive behaviors

7. Collaborate with interdisciplinary teams to manage patients, families, and/or communities to achieve quality patient outcomes by

a. collaborating with the patient, significant support person(s), and interdisciplinary health care team to promote progress toward achievement of outcomes

b. coordinating the decision-making process with the patient, significant support person(s), and interdisciplinary healthcare team

c. using leadership skill in collaboration with others to achieve patient and organizational outcomes

d. delegating tasks and collaborating to achieve positive patient outcomes

e. supervising the health care personnel to whom aspects of care have been delegated

f. interacting creatively and openly with others to solve problems to achieve patient goals and outcomes

g. demonstrating collaboration in communication with instructor, staff, and peers

h. using appropriate channels of communication to achieve positive patient outcomes

RSPT 1101 - Introduction to Respiratory Care

General

Course Key

Course Rubric	Course Number	Course Title
RSPT	1101	Introduction to Respiratory Care
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
1	0	3

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-0-3). An introduction to the field of respiratory care. Topics include the history of respiratory care, hospital organization, medical malpractice, ethics, vital signs, body mechanics, basic cardiopulmonary assessment, infection control, and cardiopulmonary resuscitation (CPR). Recommended Corequisite: RSPT-1166

View Course Availability on MyTCCTrack

Requirements

Simple Requisites

See course description for prerequisite.
Type
Co- Requisite

10
A Requirement block where all subrequirements are required

take rspt-1166;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): RNSG 2213, RNSG 2163, RNSG 2208, RNSG 2260, RNSG 2201, RNSG 2161, or Administrative Approval
Required Corequisite(s): RNSG 1443

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Outline the history of the respiratory care profession; outline the organization and function of hospital departments; describe issues in medical malpractice and ethics; identify the respiratory therapist's role in performing basic vital signs, body mechanics, and cardiopulmonary assessment; and describe infection control techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Develop an introductory understanding and knowledge of the field of Respiratory Care (RC) by

a. identifying important historical figures and dates contributing to RC (1a, 1b, 2c);

b. identifying various RC organizations and listing their functions (1a, 1b, 2c);

c. identifying ethical and unethical practices (1a, 1b, 2c);

d. describing components of malpractice (1a, 1b, 2c);

e. listing hospital communication codes (1a, 1b, 2c);

f. defining normal vital signs (1a, 1b, 2c);

g. applying proper body mechanics when lifting (1a, 1b, 2c);

h. describing and identifying various structures of the respiratory system (1a, 1b, 2c);

i. defining lung volumes and capacities and drawing lung graphs (1a, 1b, 2c);

j. analyzing lung volumes and capacities and computing results (1a, 1b, 2c);

k. stating the importance and identifying various sections of a patient's chart (1a, 1b, 2c);

l. identifying the different types of physician orders (1a, 1b, 2c);

m. identifying various hospital terms and their hospital approved abbreviations (1a, 1b, 2c);

n. contrasting various types of medical data (1a, 1b, 2c);

o. describing patient history and interview techniques (1a, 1b, 2c);

p. describing four basic chest physical exam techniques (1a, 1b, 2c);

q. describing abnormal chest exam data (1a, 1b, 2c);

r. listing and defining normal and abnormal breath sounds (1a, 1b, 2c);

s. describing laboratory procedures used to identify microorganisms (1a, 1b, 2c);

t. describing different methods of disinfection and sterilization (1a, 1b, 2c);

u. identifying different isolation techniques (1a, 1b, 2c);

v. describing current methods of CPR (1a, 1b, 2c);

w. listing three ways to communicate with diverse populations in the hospital setting (1a, 1b, 2c);

x. describing and applying fundamental chemical principles as they relate to the behavior of matter and the periodic table (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the mode of action, clinical indications, dosages, hazards, and side effects of cardiopulmonary drugs; calculate drug dosages; and select optimal drugs used in the practice of respiratory care.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the mode of action, clinical indications, dosages, hazards, and side effects of cardiopulmonary drugs (1a, 1b, 2c).
2. Demonstrate competence in calculating drug dosages and selecting optimal drugs used in the practice of respiratory care by
    a. describing various terms used in respiratory pharmacology (1a, 1b, 2c);
    b. identifying cardiopulmonary medications, doses, uses, and side effects of these medications (1a, 1b, 2c);
    c. classifying cardiopulmonary medications (1a, 1b, 2c);
    d. determining which cardiopulmonary medication is appropriate (1a, 1b, 2c);
    e. evaluating which drug delivery device is most appropriate (1a, 1b, 2c);
    f. recognizing cardiopulmonary drugs by both product and generic names (1a, 1b, 2c);
    g. discriminating between two or more drugs that produce similar actions (1a, 1b, 2c);
    h. ensuring proper drug delivery is performed (1a, 1b, 2c);
    i. assessing the patient post pharmacologic therapy (1a, 1b, 2c);
    j. interpreting the overall therapeutic effects (1a, 1b, 2c).

A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Corequisite(s): RSPT 1101 and RSPT 1310

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select therapeutic modalities for home care and rehabilitation patients; identify equipment; describe assessment, treatment, and documentation; and apply patient education principles.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the basics of a home care program by
    a. describing the essentials of a home care program, including patient selection, equipment, and monitoring (1a, 1b, 2c);
    b. identifying problems with a home care program (1a, 1b, 2c);
2. Demonstrate an understanding of different home oxygen systems by
    a. describing the technique, indications, advantages, and complications of trans-tracheal oxygen (1a, 1b, 2c);
    b. explaining the advantages and disadvantages of liquid oxygen systems (1a, 1b, 2c);
    c. explaining the advantages and disadvantages of oxygen concentrators (1a, 1b, 2c);
    d. explaining the use and advantage of different types of oxygen conserving devices (1a, 1b, 2c);
    e. describing the proper use of home oxygen equipment (1a, 1b, 2c);
3. Demonstrate an understanding of the role of the RCP in a home care program by
    a. describing key elements involved with the home visit (1a, 1b, 2c);
    b. describing the respiratory care procedures commonly taught by the home care respiratory care practitioner (1a, 1b, 2c);
    c. identifying benefits for home care patients (1a, 1b, 2c);
    d. identifying different payment methods for home respiratory therapy equipment (Medicare, Medicaid, and insurance) (1a, 1b, 2c);
4. Demonstrate an understanding of the essentials of a pulmonary rehabilitation program by
    a. describing what is considered fitness for a COPD patient (1a, 1b, 2c);
    b. describing the when, where, and why essentials for a pulmonary rehabilitation program (1a, 1b, 2c);
    c. describing the various training techniques used in a pulmonary rehabilitation program (1a, 1b, 2c);
    d. defining pulmonary rehabilitation (1a, 1b, 2c);
5. Identify differences in pediatric home care by
    a. describing the role of the respiratory care practitioner in pediatric home care (1a, 1b, 2c);
    b. describing the types of home care equipment used for the pediatric patient (1a, 1b, 2c);
    c. identifying the anatomical, physiological, and psychosocial differences associated with pediatric patients (1a, 1b, 2c);
6. Demonstrate an understanding of the role of the respiratory care practitioner in the home care setting by
    a. identifying occupational hazards, risks, and appropriate precautions to protect caregivers (1a, 1b, 2c);
    b. describing the signs/symptoms and management strategies to review with the home care patient (1a, 1b, 2c);

c. describing home monitoring devices, training, and follow up for the monitored baby (1a, 1b, 2c);

d. identifying individuals at risk for infection, common sites of infection, and transmission of pathogens (1a, 1b, 2c);

7. Demonstrate an understanding of devices used in the home care and alternate sites for respiratory care by

a. explaining aerosol therapy (1a, 1b, 2c);

b. describing the advantages and disadvantages of different types of noninvasive home mechanical ventilation (NPPV, CPAP) (1a, 1b, 2c);

c. describing the devices used in home diagnostics and patient monitoring (1a, 1b, 2c);

d. identifying alternates sites for respiratory care (1a, 1b, 2c);

Recommended Prerequisite(s): RSPT 2210 and RSPT 2425

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to observe and to interact appropriately in the hospital workplace by

a. completing the AHA Basic Life Support Course (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. completing the orientation packet for each clinical affiliate (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

c. completing the required number of professional credits (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

Recommended Corequisite(s): RSPT 1101

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain advanced concepts of cardiopulmonary anatomy and physiology; describe the neurological control of breathing; differentiate ventilation/perfusion concepts, to include acid-base balance with classification; and summarize principles of gas transport.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an advanced understanding of the anatomy and physiology of the cardiovascular, renal, and pulmonary systems by

a. describing the mechanics of breathing (1a, 1b, 2c);

b. describing how the blood vessels remove gas from the lungs (1a, 1b, 2c);

c. describing how matching of gas and blood determine gas exchange (1a, 1b, 2c);

d. describing how gas exchange is regulated (1a, 1b, 2c);

e. describing renal anatomy and physiology (1a, 1b, 2c);

f. describing renal control of acid/base balance (1a, 1b, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize data related to patient assessment; utilize respiratory care equipment; perform therapeutic procedures including medical gas therapy, humidity and aerosol therapy, lung expansion therapy, bronchial hygiene therapy, and pulse oximetry; recommend modification of therapy; and maintain patient records.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of utilizing data for patient assessments, maintaining patient records, and utilizing respiratory care equipment (1a, 1b, 2c, 2e).
2. Demonstrate competence in therapeutic procedures, including medical gas therapy, humidity and aerosol therapy, lung expansion therapy, bronchial hygiene therapy, and pulse oximetry by
    a. describing the definition and behaviors of gas laws (1a, 1b, 2c);
    b. defining various terms used in physics (1a, 1b, 2c);
    c. defining various standard abbreviations utilized in medical science (1a, 1b, 2c);
    d. describing the properties of different medical gases (1a, 1b, 2c);
    e. describing the indications, precautions, hazards, and complications of oxygen therapy (1a, 1b, 2c);
    f. describing absolute humidity and relative humidity (1a, 1b, 2c);
    g. describing the indications, precautions, hazards, and complications of humidity and aerosol therapy (1a, 1b, 2c);
    h. explaining aerosol deposition (1a, 1b, 2c);
    i. comparing and contrasting pulse oximeters (1a, 1b, 2c);
    j. describing the indications, precautions, hazards, and complications of lung expansion therapy (1a, 1b, 2c);
    k. describing the primary responsibilities of the RCP when delivering lung expansion therapy (1a, 1b, 2c, 2e);
    l. describing the planning, implementation, follow up, and evaluation of lung expansion therapy (1a, 1b, 2c, 2e);
    m. describing normal airway clearance mechanisms and what can impair their function (1a, 1b, 2c);
    n. demonstrating directed coughing and related expulsion techniques (1a, 1b, 2c);
    o. demonstrating PEP therapy (1a, 1b, 2c);
    p. demonstrating incentive spirometry therapy (1a, 1b, 2c);
    q. demonstrating intermittent positive pressure breathing therapy (1a, 1b, 2c, 2e);
    r. completing the Mosby CPG Hyperinflation Therapy computer program (1a, 1b, 2c);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Set up equipment; describe concepts of mechanical ventilation; perform artificial airway insertion, airway management, manual resuscitation, suctioning, arterial sampling techniques, and blood gas analysis and interpretation; troubleshoot equipment; maintain patient records; and communicate relevant information to members of the health care team.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate competence in postural drainage and percussion, artificial airways, manual resuscitation devices, suctioning, bedside spirometry, arterial sampling techniques, and blood gas analysis and interpretation by
    a. comparing arterial and mixed venous blood gases (1a, 1b, 2c);
    b. describing how to assess the need for and select artificial airways (1a, 1b, 2c);
    c. listing the complications and hazards associated with insertion of artificial airways (1a, 1b, 2c);
    d. demonstrating how to perform orotracheal and nasotracheal adult intubation (1a, 1b, 2c);
    e. describing how to assess and confirm proper endotracheal tube placement (1a, 1b, 2c);
    f. describing how and why to perform a tracheotomy (1a, 1b, 2c);
    g. describing the types of damage caused by artificial airways (1a, 1b, 2c);
    h. describing how to properly maintain and troubleshoot artificial airways (1a, 1b, 2c);
    i. describing how to measure and adjust tracheal tube cuff pressure (1a, 1b, 2c);
    j. describing how to extubate a patient (1a, 1b, 2c);
    k. demonstrating how to perform endotracheal and nasotracheal suctioning (1a, 1b, 2c);
    l. describing how to assist the physician in setting up and performing bronchoscopy (1a, 1b, 2c);
    m. describing normal airway clearance mechanisms and what can impair their function (1a, 1b, 2c);
    n. listing diseases associated with abnormal clearance of secretions (1a, 1b, 2c);
    o. listing goals and indications for bronchial hygiene therapy (1a, 1b, 2c);
    p. demonstrating postural drainage therapy (1a, 1b, 2c);
    q. evaluating all components of oxygen delivery (1a, 1b, 2c);
    r. describing oxygen transport (1a, 1b, 2c);
    s. demonstrating high frequency compression/oscillation methods (1a, 1b, 2c);
    t. demonstrating mobilization and exercise (1a, 1b, 2c);
    u. describing how to monitor and evaluate patient response to bronchial hygiene therapy (1a, 1b, 2c);
    v. describing how to modify bronchial hygiene therapies based on the patient's response (1a, 1b, 2c);
    w. describing characteristics, limitations, proper usage, and criteria for resuscitator bags (1a, 1b, 2c);
    x. defining compensation arterial blood gases (1a, 1b, 2c);
    y. interpreting arterial blood gas values (1a, 1b, 2c);
    z. listing causes of arterial blood gas abnormalities (1a, 1b, 2c);
    aa. defining correction for arterial blood gases (1a, 1b, 2c);
    ab. defining introductory concepts of mechanical ventilation (1a, 1b, 2c, 2e);
    ac. completing the Mosby CPG Bronchial Hygiene computer program (1a, 1b, 2c);

ad. completing the PIP Chest Physiotherapy computer program (1a, 1b, 2c);

ae. completing the Mosby CPG Resuscitation computer program (1a, 1b, 2c);

RSPT 2131 - Simulations in RSPT Care

General

Course Key
14699

Course Rubric
RSPT

Course Number
2131

Course Title
Simulations in Respiratory Care

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0). Theory of clinical simulation examinations. Includes construction types, scoring, and mechanics of taking the computerized simulation examination. Recommended Prerequisites: RSPT-2210 and RSPT-2425

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for required prerequisites/corequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # Take RSPT-2210 RSPT-2425;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 1310

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Utilize clinical simulations to enhance information gathering and decision making skills.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Develop decision making skills through group discussion and individual practice by
    a. demonstrating decision making through group discussion (1a, 1b, 2b, 2c);
    b. demonstrating proficiency taking branching logic exam (1a, 1b, 2c);
    c. describing mechanics of taking branching logic exam (1a, 1b, 2c);
    d. describing scoring for branching logic exam (1a, 1b, 2c);
    e. describing basic format for branching logic exam (1a, 1b, 2c);
    f. demonstrating basic concepts of computer usage (1a, 1b, 2c, 2e);

RSPT 2139 - Advanced Cardiac Life Support

General

Course Key
14698

Course Rubric
RSPT

Course Number
2139

Course Title
Advanced Cardiac Life Support

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(1-1-0). Advanced Cardiac Life Support (ACLS) with an emphasis on airway management. Designed to develop skills for resuscitation of the adult. Includes strategies for managing and stabilizing the cardiopulmonary arrested patient. May include certification based on American Heart Association standards. Recommended Prerequisites: RSPT-1240

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for pre-requisite.
Type
Pre-requisite

10
A Requirement block where all subrequirements are required

 # TAKE RSPT-1240;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 2210 and RSPT 2425

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the principles, techniques, and complications of intravenous and electrical therapy, airway control, ventilation, and supplemental oxygen; analyze cardiac dysrhythmias; integrate basic life support with advanced cardiovascular life support interventions; and summarize airway management principles.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge of the elements of the course by
    a. describing the functional anatomy and physiology of the heart (1a, 1b, 2c);
    b. describing the electrical and chemical phenomena of the heart (1a, 1b, 2c);
    c. identifying static and dynamic tracings of arrhythmias (1a, 1b, 2c);
    d. describing the appropriate course of action to be taken for various ACLS algorithms (1a, 1b, 2c);
    e. describing the energy requirements for successful defibrillation (1a, 1b, 2c);
    f. listing the indications for a precordial thump (1a, 1b, 2c);
    g. describing the indications and proper technique for synchronized cardioversion (1a, 1b, 2c);
    h. describing the indications, mode of action, and dosage for ACLS drugs (1a, 1b, 2c);

RSPT 2147 - Specialties in Respiratory Care

A Requirement block where all subrequirements are required

Take RSPT-2210 RSPT-2425;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 1240

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Delineate the respiratory therapist's role in emerging and specialty practices.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe/define ECMO (1a, 1b, 2c).
2. Identify the routes of ECMO circuits (1a, 1b, 2c).
3. Classify the indications for using ECMO (1a, 1b, 2c).
4. Compare and break down the conditions that will exclude the baby from ECMO (1a, 1b, 2c).
5. List the hazards of ECMO (1a, 1b, 2c).
6. Describe and discuss the indications for HBO (1a, 1b, 2c).
7. Recall the two categories of HBO's physiological effect (1a, 1b, 2c).
8. Compare and contrast the two types of chambers used to deliver HBO (1a, 1b, 2c).
9. Classify and describe the hazards of HBO (1a, 1b, 2c).
10. Construct the process of a "dive" (1a, 1b, 2c).
11. List the contraindications for HBO (1a, 1b, 2c).
12. Classify and discuss the uses of hypobarics (1a, 1b, 2c).
13. Classify the timing of oxygen/CO2 analysis when a metabolic monitor is used (1a, 1b, 2c).
14. Recall the effect of decreased protein intake on the pulmonary diaphragm (1a, 1b, 2c).
15. Distinguish the effects of a carbohydrate overdose on the COPD patient (1a, 1b, 2c).
16. Classify five types of patients who should be considered for a metabolic study (1a, 1b, 2c).
17. Recall the indications/clinical situations in which NO is used (1a, 1b, 2c).
18. Explain the methods that are used to administer NO (1a, 1b, 2c).
19. List the hazards and side effects of NO (1a, 1b, 2c).
20. Compare and contrast NO and ECMO (1a, 1b, 2c).
21. State a definition of central, obstructive, and mixed sleep apnea (1a, 1b, 2c).
22. Summarize the factors that cause the pathophysiology that is associated with OSA & CSA (1a, 1b, 2c).
23. List and detail the parameters typically monitored during a polysomnogram (1a, 1b, 2c).
24. Evaluate the importance of identifying sleep-related breathing disorders in subjects with pre-existing lung disease (1a, 1b, 2c).
25. List and determine the types of subjects who need sleep studies (1a, 1b, 2c).
26. List the indications for exercise/stress testing (1a, 1b, 2c).
27. List the five cardiac parameters that are measured with exercise/stress testing (1a, 1b, 2c).

RSPT 2210 - Cardiopulmonary Disease

Type
Prerequisite

10
A Requirement block where all subrequirements are required

take rspt-2139 rspt-2414;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 2210 and RSPT 2425

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Analyze the etiology, pathophysiology, clinical manifestations, and management of cardiopulmonary disorders; and compare cardiopulmonary disorders.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the etiology, pathophysiology, clinical manifestations, and management of cardiopulmonary disorders and the ability to compare cardiopulmonary disorders by
    a. describing the process of obtaining patient history (1a, 1b, 2c);
    b. describing physical assessment techniques (1a, 1b, 2c);
    c. analyzing physical findings for various disease processes (1a, 1b, 2c);
    d. describing the normal chest x-ray (1a, 1b, 2c);
    e. analyzing radiographic findings for various disease processes (1a, 1b, 2c);
    f. describing normal values for fluids and electrolytes (1a, 1b, 2c);
    g. describing normal water balance (1a, 1b, 2c);
    h. analyzing signs and symptoms of volume excess/deficit (1a, 1b, 2c);
    i. analyzing signs and symptoms of electrolyte imbalance (1a, 1b, 2c);
    j. describing normal laboratory findings (1a, 1b, 2c);
    k. analyzing abnormal laboratory findings (1a, 1b, 2c);
    l. describing hemodynamic monitoring methods (1a, 1b, 2c);
    m. describing indications for hemodynamic monitoring (1a, 1b, 2c);
    n. describing hazards of hemodynamic monitoring (1a, 1b, 2c);
    o. analyzing hemodynamic findings for various disease processes (1a, 1b, 2c);
    p. defining various disease processes (1a, 1b, 2c);
    q. listing causes of various disease processes (1a, 1b, 2c);
    r. describing the pathophysiology of various disease processes (1a, 1b, 2c);
    s. describing the clinical picture of various disease processes (1a, 1b, 2c);
    t. describing the treatment of various disease processes (1a, 1b, 2c);
    u. completing four pulmonary pathology computer programs (1a, 1b, 2c);

Requirements

Requirements
Recommended Prerequisite(s): RSPT 2139 and RSPT 2414

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Prepare a detailed medical history including physical and radiological findings; outline the patient's disease process; describe the application of respiratory care to the case; and present a detailed case study.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to obtain and analyze the etiology, pathophysiology, clinical manifestations, and management of a cardiopulmonary disease and to present as a case study via an oral and visual presentation that includes PowerPoint by
    a. identifying appropriate medical research topics (1a, 1b, 2c, 2e);
    b. locating appropriate medical reference materials from a variety of media, one of which has to be from a peer reviewed internet source (1a, 1b, 2c, 2e);
    c. locating appropriate medical information from the patient's medical record while maintaining patient confidentiality (1a, 1b, 2c, 2e);
    d. analyzing physical findings for various disease processes (1a, 1b, 2c);
    e. analyzing radiographic findings for various diseases processes (1a, 1b, 2c);
    f. analyzing abnormal laboratory findings (1a, 1b, 2c);
    g. defining various disease processes (1a, 1b, 2c);
    h. listing causes of various disease processes (1a, 1b, 2c);
    i. describing the pathophysiology of a disease process (1a, 1b, 2c);
    j. describing the clinical picture of a disease process (1a, 1b, 2c);
    k. describing the treatment of a disease process (1a, 1b, 2c);
    l. composing a detailed medical case study (1a, 1b, 2c, 2e);
    m. presenting a detailed medical case study (1a, 1b, 2c, 2e);
    n. composing a detailed medical history (1a, 1b, 2c, 2e);
    o. presenting a detailed medical history (1a, 1b, 2c, 2e);
    p. composing a medical application to treat a disease process (1a, 1b, 2c, 2e);
    q. presenting a medical application to treat a disease process (1a, 1b, 2c, 2e);
    r. listening to other presentations throughout course (1a, 1b, 2c);
    s. questioning other presenters to promote group discussion (1a, 1b, 2c);
    t. composing questions to cover material presented (1a, 1b, 2c, 2e);

A Requirement block where all subrequirements are required

take rspt-1267;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate the ability to observe and interact in the hospital workplace by
    a. performing the steps for administering chest physiotherapy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating various breathing exercises (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing the steps for administering trachea care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. performing the steps for endotracheal suctioning (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. performing the steps for bedside pulmonary function testing (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. performing the steps for drawing arterial blood gases (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. performing the steps for arterial line sampling (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. performing manual resuscitation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
2. Describe the components to mechanical ventilation and apply it to the ventilated patient by
    a. performing the steps for ventilator monitoring (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. performing the steps for ventilator initiation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing the steps for ventilator change out (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. performing the steps for ventilator transport (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. describing the applications of PEEP (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. describing the applications of IMV and SIMV (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. describing the applications of CPAP (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
3. Complete all computer and book simulations assigned by
    a. completing clinical computer simulation #1-CPR (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. completing clinical computer simulation #2-ARDS (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. completing computer clinical simulation #3-Weaning (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. completing clinical computer simulation #4-Trauma (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. completing clinical computer simulation #7-Edema (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. completing clinical computer simulation #9-Post Op Care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. completing RTR book clinical simulation #1 (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. completing RTR book clinical simulation #3 (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    i. completing RTR book clinical simulation #4 (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. completing RTR book clinical simulation #10 (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    k. completing CAI program for the PB7200-options (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

l. completing CAI program for the PB7200-expanded keyboard (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

m. completing CAI program for the Servo 300 (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

4. Complete required training and professional credits for the hospital setting by
    a. completing the TCC CPR recertification (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. completing the required number of professional credits (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe fetal development and transition to extrauterine life; assess maternal and fetal history; modify therapy to neonatal/pediatric patients; describe the etiology, pathophysiology, clinical manifestations, and management of neonatal/pediatric disorders; and analyze, interpret, and apply patient data in selective patient care settings.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe all of the techniques used in the resuscitation of the newborn infant (1a, 1b, 2c).
2. Describe the etiology, clinical signs, pathophysiology, and treatment of assigned diseases and syndromes of the infant/pediatric patient (1a, 1b, 2c).
3. Describe the development of the fetal lung and the changes that occur at birth in fetal circulation (1a, 1b, 2c).
4. Describe the etiology, clinical signs, pathophysiology, and treatment of various cardiac anomalies (1a, 1b, 2c).
5. Describe clearance of fetal lung liquid and aeration of the lung at birth (1a, 1b, 2c).
6. Describe all of the possible techniques of assessing oxygenation in the newborn (1a, 1b, 2c).
7. Describe various changes that occur in the newborn during and after the delivery by
    a. describing the APGAR method on neonatal evaluation (1a, 1b, 2c);
    b. describing production and loss of body heat in the newborn (1a, 1b, 2c);
    c. describing periodic breathing and apnea (1a, 1b, 2c);
    d. describing postnatal growth and development of the lung (1a, 1b, 2c);
    e. describing pulmonary physiology as it applies to infants and neonates (1a, 1b, 2c);
8. Identify abnormal conditions and disorders in the newborn/infant by
    a. describing the causes and risk factors of hyperbilirubinemia (1a, 1b, 2c);
    b. describing the 5 most common signs of respiratory distress in the newborn (1a, 1b, 2c);
    c. describing normal and abnormal neurological conditions and development in the newborn (1a, 1b, 2c);
    d. describing the clinical signs and treatment of various metabolic disorders in the newborn infant (1a, 1b, 2c);
    e. describing the clinical signs and treatment for the 4 types of hypoxia (1a, 1b, 2c);
    f. describing the normal and abnormal infant chest x-ray (1a, 1b, 2c);
    g. describing the signs, risk factors, and treatment of infection in the newborn (1a, 1b, 2c);
9. Describe factors that determine high risk status and methods of treatment before and after birth (1a, 1b, 2c).
10. Describe services provided by level 1, 2, and 3 nurseries (1a, 1b, 2c).
11. Describe basic respiratory procedures performed on the infant/newborn patient by
    a. describing the technique of intubation of the infant (1a, 1b, 2c);
    b. describing the technique, equipment, and hazards of suctioning a newborn infant (1a, 1b, 2c);
    c. describing the techniques, indications, and hazards of CPT in the newborn infant (1a, 1b, 2c);
    d. describing the technique and hazards of different oxygen administration in the newborn infant (1a, 1b, 2c);
    e. describing the technique of transcutaneous monitoring of oxygen and CO2 in the newborn (1a, 1b, 2c);

f. describing the use of self-inflating and non-self-inflating resuscitator bags in infants (1a, 1b, 2c);

12. Identify and classify different types of ventilators by

a. defining what is meant by optimal CPAP (1a, 1b, 2c);

b. describing the use, set up, controls, and alarms on the Sechrist Ventilator (1a, 1b, 2c);

c. describing the setup, controls, and alarms on the Baby Bird Ventilator (1a, 1b, 2c);

d. describing the setup, controls, and alarms on the Infant Star Ventilator (1a, 1b, 2c);

e. describing the techniques, clinical application, monitoring, weaning, and hazards of C.D.P. and CPAP (1a, 1b, 2c);

f. describing various techniques, physiological effect, and the advantages of high frequency ventilators (1a, 1b, 2c);

13. Complete the assigned MEDED series in the CLC.

RSPT 2414 - Mechanical Ventilation

General

Course Key
14690

Course Rubric
RSPT

Course Number
2414

Course Title
Mechanical Ventilation

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3). The study of mechanical ventilation with emphasis on ventilator classification, methods, principles, and operational characteristics.
Recommended Prerequisites: RSPT-1240

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # Take RSPT-1240;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 2210 and RSPT 2425

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe procedures for mechanical ventilation as related to spontaneous and artificial ventilation with emphasis on ventilator classification, methods, principles, and operational characteristics; explain indications, complications, and physiologic effects/principles of mechanical ventilation; and apply initiation, management, and weaning of ventilatory support.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate competence in the theory and practice of mechanical ventilation, including indications, complications, and physiologic effects, ventilator classification, methods, principles, and operational characteristics. Emphasis will be placed on ventilator initiation, management, and weaning from ventilatory support by

a. listing indications for mechanical ventilation (1a, 1b, 2c);

b. defining respiratory failure (1a, 1b, 2c);

c. describing the physiology of respiratory failure (1a, 1b, 2c);

d. describing criteria for establishing CMV (1a, 1b, 2c);

e. describing the effects of CMV on different systems of the body (1a, 1b, 2c);

f. describing complications of CMV (1a, 1b, 2c);

g. determining when CMV is indicated in simulated situations (1a, 1b, 2c);

h. describing psychological considerations to be addressed in critically ill patients (1a, 1b, 2c);

i. confirming general care considerations to be addressed in critically ill patients (1a, 1b, 2c);

j. describing indications, actions, and side effects of drugs used during CMV (1a, 1b, 2c);

k. describing indications, hazards, and effects of various modes of ventilation (1a, 1b, 2c);

l. evaluating the weaning process (1a, 1b, 2c);

m. comparing different modes of weaning (1a, 1b, 2c);

n. determining when weaning is indicated in simulated situations (1a, 1b, 2c);

o. explaining monitoring procedures for I&O, weight, and temperature (1a, 1b, 2c);

p. explaining monitoring techniques employed with ventilation (1a, 1b, 2c);

q. demonstrating techniques for troubleshooting ventilator problems (1a, 1b, 2c);

r. demonstrating techniques for troubleshooting patient problems (1a, 1b, 2c);

s. demonstrating the ability to perform ventilator check (1a, 1b, 2c);

t. identifying various modes of ventilation (1a, 1b, 2c);

u. differentiating different types of ventilators (1a, 1b, 2c);

v. evaluating advantages and disadvantages of different types of ventilators (1a, 1b, 2c);

w. classifying ventilators (1a, 1b, 2c);

x. demonstrating the steps involved in assessing ventilator readiness (1a, 1b, 2c);

y. justifying appropriate ventilator settings in simulated situations (1a, 1b, 2c);

z. demonstrating the ability to calculate and evaluate volumetrics (1a, 1b, 2c);

aa. demonstrating the ability to calculate and evaluate effective compliance (1a, 1b, 2c);

ab. demonstrating the ability to assemble and operate selected ventilators (1a, 1b, 2c).

RSPT 2425 - Cardiopulmonary Diagnostics

Simple Requisites

See course description for prerequisites.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

 # Take RSPT-2139 RSPT-2414;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Recommended Prerequisite(s): RSPT 1240

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the methods, standards, and purpose of performing pulmonary function testing including use of equipment; identify common cardiac dysrhythmias; interpret patient data including physical, radiological, hemodynamic, laboratory, nutritional, and cardiopulmonary diagnostic assessment of the pulmonary patient; and apply data to evaluate cardiopulmonary disorders.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate competence in pulmonary function testing, blood gas analysis, quality control, and noninvasive monitors by
    a. identifying airway obstruction using FVC and FEV1 (1a, 1b, 2c);
    b. differentiating between obstruction and restriction as causes of reduced vital capacity (1a, 1b, 2c);
    c. distinguishing between large and small airway obstruction using flow volume curves (1a, 1b, 2c);
    d. determining whether there is significant response to bronchodilators (1a, 1b, 2c);
    e. recognizing abnormal values for airway resistance and compliance (1a, 1b, 2c);
    f. determining whether spirometry is acceptable and reproducible (1a, 1b, 2c);
    g. describing the measurement of lung volumes using the open and closed circuit methods (1a, 1b, 2c);
    h. explaining the advantages of measuring lung volumes using the body plethysmograph (1a, 1b, 2c);
    i. calculating residual volume, total lung capacity, functional residual capacity, and related lung volumes (1a, 1b, 2c);
    j. identifying uneven distribution of gas in the lungs by single or multiple breath nitrogen techniques (1a, 1b, 2c);
    k. explaining different diffusing capacity measurements made using single breath and steady state methods (1a, 1b, 2c);
    l. differentiating between obstructive and restrictive diseases as causes of decreased diffusing capacity (1a, 1b, 2c);
    m. listing indications, advantages, and complications of arterial lines (1a, 1b, 2c);
    n. demonstrating drawing and analyzing blood samples from arterial lines (1a, 1b, 2c);
    o. calculating A-vDO2 (1a, 1b, 2c);
    p. calculating shunt (1a, 1b, 2c);
    q. describing the parts, operation, types, and usage of spirometry equipment (1a, 1b, 2c);
    r. demonstrating obtaining, calculating, and interpreting tests of simple spirometry (1a, 1b, 2c);
    s. describing principles of operation of blood gas electrodes (1a, 1b, 2c);
    t. describing the quality assurance for blood gas machines (1a, 1b, 2c);
    u. defining minute ventilation (1a, 1b, 2c);
    v. defining minute alveolar ventilation (1a, 1b, 2c);
    w. calculating minute ventilation and minute alveolar ventilation (1a, 1b, 2c);
    x. describing the significance, normal values, and abnormal values for minute and alveolar ventilation (1a, 1b, 2c);
    y. calculating types of deadspace (1a, 1b, 2c);
    z. listing causes and significance of deadspace disease (1a, 1b, 2c);
    aa. describing normal values, significance, and pathologic changes for different types of V/Q units (1a, 1b, 2c);
    ab. calculating the VD/VT ratio (1a, 1b, 2c);
    ac. calculating the A-a gradient (1a, 1b, 2c);
    ad. calculating the a/A ratio (1a, 1b, 2c);
    ae. identifying normal and abnormal waveforms for end tidal CO2 (1a, 1b, 2c);
    af. calculating the anion gap to diagnose the cause of metabolic acidosis (1a, 1b, 2c);
    ag. identifying various radiological techniques to assess various pulmonary diseases (1a, 1b, 2c);
    ah. utilizing metabolic studies to assess nutritional status (1a, 1b, 2c);
    ai. describing normal function of the one, two, and three bottle chest drainage systems (1a, 1b, 2c);
    aj. troubleshooting the one, two, and three bottle chest drainage systems (1a, 1b, 2c).

RSTO 1304 - Dining Room Service

General

Course Key
9627

Course Rubric	Course Number	Course Title
RSTO	1304	Dining Room Service

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2). Introduces the principles, concepts, and systems of professional table service. Topics include dining room organization, scheduling, and management of food service personnel.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Recommended Prerequisite(s): RSPT 2139 and RSPT 2414

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and utilize equipment and supplies used in table service; specify the types of table service and the serving sequence for each type of service; properly prepare dining room and side station for service; explain the relationship of wait staff to customers and their perception of the establishment; and employ principles of dining room organization, scheduling, and management of food service personnel.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Acknowledge the importance of dining room service by
    a. identifying the sources of income for servers (1a, 1b);
    b. explaining the factors that affect a server's income (1a, 1b);
    c. explaining the relationship between wait staff and customers (1a, 1b);
    d. describing the laws of tip reporting (1a, 1b);
2. Describe the importance of sanitation and appearance in the dining room by
    a. demonstrating personal care sanitation principles for servers (1b, 2b);
    b. demonstrating side work (1b, 2b);
    c. demonstrating sanitation principles in dining room (1b, 2b);
    d. demonstrating sanitation principles for serving food (1b, 2b);
3. Demonstrate proper place/table settings by
    a. demonstrating a properly set table for any meal period (1b, 2b);
    b. demonstrating various napkin folds (1b, 2b);
    c. differentiating between various service and glassware (1b, 2b);
4. Demonstrate styles of service by
    a. demonstrating the service of food and beverages with the following styles of service: butler, American, English, French, and buffet (1b, 2b);
    b. demonstrating the sequence of service (1b, 2b);
    c. demonstrating preparation of the side station for service (1b, 2b);
5. Demonstrate proper beverage service by
    a. differentiating between various wines (1a, 1b);
    b. differentiating between proper serving temperatures of wines (1a, 1b);
    c. demonstrating proper opening, service of wines, and sparkling wine (1b, 2b);
    d. comprehending legal responsibilities of serving alcohol (1a, 1b, 1c);
6. Explain principles of dining room organization by
    a. creating a dining room staffing schedule (1a, 1b, 2a, 2d);
    b. explaining management handling of situations surrounding customers (1a, 1b, 1c);
    c. explaining management handling of situations surrounding dining room employees (1a, 1b, 1c);

RSTO 1313 - Hospitality Supervision

General

Course Key
11785

Course Rubric	Course Number	Course Title
RSTO	1313	Hospitality Supervision

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Fundamentals of recruiting, selection, and training of food service and hospitality personnel. Topics include job descriptions, schedules, work improvement, motivation, applicable personnel laws and regulations. Emphasis on leadership development.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss the role of the supervisor including obligations to owners, customers, and employees; apply management theories and principles to the hospitality environment; identify and discuss principles of communication; develop effective job descriptions, training plans, and evaluation instruments; and relate principles of leadership.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the role of the supervisor in hospitality operations (1a, 1b).
2. Demonstrate an understanding of the importance of effective communication (1a, 1b).
3. Demonstrate an understanding of the communication process—effective listening, speaking, and writing skills (1a, 1b).
4. Apply techniques to develop and enhance an effective discipline program, administering discipline, and progressive discipline programs (1a, 1b).
5. Identify supervisory concerns, labor shortage, Equal Opportunity laws, sexual harassment, substance abuse, and working with employee unions (1a, 1b).
6. Apply techniques to manage conflict (1a, 1b).
7. Develop effective job descriptions, training plans, and evaluation instruments (1a, 1b, 3c).
8. Apply effective time management techniques, analyzing time, delegating, and using management tools and weekly planning guides (1a, 1b).

RSTO 1319 - Viticulture and Enology

General

Course Key
12180

Course Rubric	Course Number	Course Title
RSTO	1319	Viticulture and Enology

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) A study of the growing regions, production, processing, and distribution of domestic and international wines. Topics include types of wine grapes, varieties of wine, proper storage procedures, and the techniques of proper wine service.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify types of wine grapes, their growing regions, and the wine varieties they produce; discuss the history of wine production; explain storage procedures for the different types of wines; recognize requisite pieces of equipment; and relate proper serving techniques.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand the importance of wine, how it is made, why all wines taste different, and the health aspects of wine (1a, 1b).
2. Analyze international grapes including Chardonnay, Pinot Noir, Cabernet, Syrah and Merlot (1a, 2a, 2e).
3. Understand and know the role of the sommelier, the dining room, and wine cellar management and research (1a, 1b, 1c).
4. Analyze sparkling wines and how they are made and stored (1a, 2a).
5. Understand the importance of wines made from black grapes (1a, 1b).
6. Know how spirits and liqueurs are made and what food to pair with them (1a, 1b).

RSTO 1325 - Purchasing for Hospitality Operations

General

Course Key
7532

Course Rubric	Course Number	Course Title
RSTO	1325	Purchasing for Hospitality Operations

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Study of purchasing and inventory management of foods and other supplies to include development of purchase specifications, determination of order quantities, formal and informal price comparisons, proper receiving procedures, storage, management, and issue procedures. Emphasis on product cost analysis, yields, pricing formulas, controls, and record keeping at each stage of the purchasing cycle. (Licensure/Certification Agency: American Culinary Federation Educational Institute, Council on Hotel, Restaurant, and Institutional Education)

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain market factors affecting cost and availability of goods including seasonality, supply and demand, distribution channel costs, and quality levels; describe the mechanics of purchasing including food and supply sources, formal and informal bid procedures, online computer purchasing, and legal and ethical considerations; explain inspection and grading of foods and the various designations of quality; and conduct yield and quality tests. Write effective purchase specifications; conduct proper receiving procedures assuring conformity of goods with specifications, prices with quotations, and quantities received with quantities ordered; and explain inventory management principles including stock rotation, proper storage conditions, and effective issue procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of foundational concepts of purchasing by
    a. defining purchasing (1a, 1b);
    b. explaining why purchasing is important (1a, 1b);
    c. listing objectives of effective purchasing (1a, 1b);
    d. identifying key purchasing tasks (1a, 1b);
    e. identifying the regulatory concerns that affect purchasing (1a, 1b);
    f. identifying the ethical concerns that affect purchasing (1a, 1b);

2. Demonstrate an understanding of the purchasing process by
    a. explaining the importance of accurately following purchasing procedures (1a, 1b);
    b. giving examples of quality requirements (1a, 1b);
    c. explaining the importance of purchasing the correct quantities (1a, 1b);
    d. identifying the methods of ordering product (1a, 1b);
    e. identifying procedures for selecting suppliers (1a, 1b);
    f. explaining the basics of proper receiving and storage (1a, 1b);

3. Demonstrate an understanding of the important elements to determine quality requirements by
    a. explaining the basic elements of quality requirements (1a, 1b);
    b. explaining the economics of quality (1a, 1b);
    c. defining purchase specifications (1a, 1b);
    d. explaining the role of the purchasing staff in purchase specifications (1a, 1b);
    e. explaining the role of suppliers regarding purchase specifications (1a, 1b);
    f. identifying contents of a purchase specifications (1a, 1b);
    g. defining the procedures for implementing a purchase specification (1a, 1b);

4. Demonstrate an understanding of the basics of determining purchasing quantities by
    a. explaining the importance of correctly purchasing the right quantities (1a, 1b, 2d);
    b. identifying the problems that can be caused by improper quantities (1a, 1b);
    c. defining the factors that affect purchase quantities (1a, 1b);
    d. identifying the traditional purchasing methods (1a, 1b);
    e. explaining the importance of understanding product yield (1a, 1b);
    f. creating a product yield analysis (1a, 1b, 2c);
    g. describing the concept of make or buy analysis and its effects on product cost (1a, 1b);
    h. identifying who is responsible for a make or buy analysis (1a, 1b);
    i. defining the steps in a make or buy analysis (1a, 1b);
    j. creating a make or buy analysis (1a, 1b, 1c, 2a, 2c);

5. Demonstrate an understanding of basic price considerations as they relate to purchasing by
    a. explaining what determines a seller's price (1a, 1b);
    b. describing the traditional buyer's regarding price (1a, 1b);
    c. explaining the less traditional buyer's views regarding price (1a, 1b);
    d. explaining the effects of price reductions on purchasing decisions (1a, 1b);
    e. distinguishing the different pricing formulas (1a, 1b);

6. Demonstrate an understanding of receiving by
    a. identifying the personnel involved in receiving (1a, 1b);
    b. explaining the concept of storage space as it is related to receiving (1a, 1b);
    c. explaining the basic receiving procedures (1a, 1b);

7. Demonstrate an understanding of proper storage by
    a. identifying the personnel that are involved in storage (1a, 1b);
    b. explaining the different types of storage areas (1a, 1b);
    c. explaining the tools and equipment that are involved with storages (1a, 1b);
    d. explaining the records that are utilized in storage (1a, 1b);

8. Demonstrate an understanding of accounting as it is related to the purchasing process by
    a. explaining the importance of documentation in the purchasing process (1a, 1b);
    b. explaining the importance of communication between accounting and suppliers (1a, 1b);
    c. describing various payment policies (1a, 1b);
    d. explaining the use of petty cash purchases (1a, 1b);

RTVB 1302 - Computer Applications Media Production

RTVB	1302	Computer Applications Media Production

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	4

Course Classification
Technical Local Need

Description
(3-2-4). Computer applications for audio, video, graphics, budgets, and scripts in media productions.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Operate computer workstations for audio/video editing systems and 2-D animation; outline a budget spreadsheet; and format a script.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the hardware and software components of a computer system by
    a. explaining computer terminology (1a, 1b, 2e);
    b. describing software operating systems and applications (1a, 2c, 2e);
    c. identifying peripherals (1a, 2c, 2e);
    d. distinguishing principles of computer components operations (1b, 2e);
    e. formulating a computer system based on software requirements (1a, 1b, 2a, 2c, 2d, 2e);
2. Operate computer applications by
    a. producing files (1a, 1b, 2a, 2c, 2e);
    b. saving files (1a, 1b, 2a, 2c, 2e);
    c. creating projects (1a, 1b, 2a, 2c, 2d, 2e);
    d. manipulating projects (1a, 1b, 2a, 2c, 2d, 2e);
    e. exporting projects to storage media (1a, 1b, 2a, 2c, 2e);
    f. demonstrating effective file management (1a, 1b, 2e);
    g. preparing projects for a variety of presentation formats (1a, 1b, 2c, 2e);
    h. practicing responsible internet security and management practices (1b, 1c, 2e);
3. Produce computer based word processing, spreadsheet, and presentation projects by
    a. preparing media business communication documents (1a, 1b, 2c, 2e);
    b. creating slide based presentation programs (1a, 1b, 2c, 2e);
    c. employing principles of basic graphic design (1a, 1b, 2c, 2e);
    d. manipulating images, animation, music, and audio (1a, 1b, 2c, 2e);
    e. explaining design process (1a, 1b, 2c, 2e);
    f. applying mathematical formulas (1a, 1b, 2a, 2c, 2e);
4. Edit audio and video projects by
    a. selecting images, footage, and audio elements for projects (1a, 1b, 2d, 2c);
    b. importing files into projects (1a, 1b, 2c, 2e);
    c. employing creative thinking to plan and create comprehensive visual and aural stories and editing footage appropriately, solving problems as they arise (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. editing clips and production elements (1b, 2c, 2d, 2e);
    e. manipulating clips and production elements (1b, 2c, 2d, 2e);
    f. exporting projects for media storage and presentation (1b, 2c, 2d, 2e);
5. Collaborate with others in a shared facility learning environment by
    a. managing computer resources in a shared lab environment (1b, 1c, 2a, 2b, 2c, 2e);
    b. cooperating with staff and other students to ensure equitable distribution of lab materials and available storage space (1b, 1c, 2a, 2b, 2c, 2e);
    c. sharing knowledge with other students and learning from others in a collaboration of ideas and techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. practicing responsible self-management to keep computer lab facilities and resources operational (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
6. Evaluate projects by
    a. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2c);
    b. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c);
    c. assembling a portfolio of completed projects (1a, 1b, 1c, 2a, 2b, 2c, 2e);

RTVB 1321 - TV/Video Field Production

General

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Set up and operate field cameras, tripods, audio equipment, field lighting instruments, and image acquisition; outline aesthetic concepts relating to visual images; classify and produce basic camera shots; summarize and demonstrate key concepts of lighting and audio; and edit storylines.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the process of creating television field productions by
    a. examining the TV field production system (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. identifying the jobs performed on a TV field production shoot (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. describing the process of creating television programs in the field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. identifying the principles of planning a television field production (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. developing time management skills to maximize field production time (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. explaining the steps in the production process (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
2. Demonstrate the skills necessary to operating equipment for single camera television production by
    a. operating TV field cameras (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. applying effective picture composition techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. identifying field camera mounting equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. applying effective camera movement techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. identifying field lighting instruments (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. operating field lighting instruments (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. identifying videotape and signal formats for field acquisition (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. operating field audio production equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    i. identifying battery and DC power formats for TV field equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. demonstrating proper camcorder operating techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    k. demonstrating proper field video monitor operating techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    l. assisting in the operation of all TV field equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
3. Demonstrate an understanding of the technical processes of audio and video signal applications by
    a. examining camcorder recording systems (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    b. describing how light is transduced into an electronic signal (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. explaining the function of white balance (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    d. explaining the function of gain in video and audio applications on the field camera (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    e. differentiate the qualities of light sources for the camera operator (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    f. examining field audio recording systems for the camera operator (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    g. examining techniques to control TV field sound recording (1a, 1b, 1c, 2a, 2c, 2d, 2e);
4. Perform the preproduction functions required for shooting single camera television programs in the field by
    a. preparing scripts for field television productions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. conceptualizing TV program ideas (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. applying creative field lighting techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. explaining the elements of a camera slate (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. describing the variety of shooting styles (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. writing a TV script (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. demonstrating the ability to properly check out and return field production equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. preparing materials to be used for a production or exercise (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    i. producing field television programs and exercises (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
5. Perform the production functions required for shooting single camera television programs in the field by
    a. practicing safe operations with equipment and personnel in the field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. serving as TV field crewmember in every position required using learned skills (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing as talent on television productions as necessary (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. operating camcorders properly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. operating audio equipment properly (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. directing field television productions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. serving as grip (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. communicating effectively with production team members (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
6. Complete single camera television field productions by
    a. analyzing television production program elements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. critiquing personal production performance as a director (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. critiquing personal production performance as a producer (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. delivering completed television field production assignments (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

(SELECTED CRSES): Take 3 of the following courses...

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply techniques of multitrack recording and editing; plan and execute live recordings; and display mastery of studio equipment operation.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of terminology and principles of acoustics, sound, and audio by
    a. explaining the physical characteristics of human hearing (1a, 1b, 1c);
    b. describing hearing loss and root causes of hearing loss (1a, 1b, 1c);
    c. identifying principles of the physics and psychophysics of sound (1a, 1b, 1c);
    d. distinguishing elements of acoustics and psychoacoustics (1a, 1b, 1c);
    e. exploring the principles of studio design (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. identifying the qualities of an ergonomic control room design (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
2. Demonstrate an understanding of audio acquisition equipment by
    a. explaining the performance characteristics of audio transducers (1b, 2e);
    b. defining the operating principles of microphones (1a, 1b, 2a, 2c, 2e);
    c. exploring the variety and classification of microphones (1a, 1b, 2b, 2d, 2e);
    d. explaining effective microphone placement (1a, 1b, 2b, 2d, 2e);
3. Produce audio projects by
    a. explaining audio signal flow (1a, 1b, 2b, 2d, 2e);
    b. exploring audio console and mixer design (1a, 1b, 2b, 2d, 2e);
    c. operating analog and digital audio recording equipment (1a, 1b, 2d, 2e);
    d. operating computer based audio editing software (1a, 1b, 2b, 2d, 2e);
    e. distinguishing between analog and digital audio sound (1a, 1b, 2b, 2d, 2e);
    f. applying principles for effective audio field production (1a, 1b, 2b, 2d, 2e);
    g. applying principles for music production (1a, 1b, 2b, 2d, 2e);
4. Use signal processing techniques to mix down recording projects by
    a. manipulating sound through signal processors for specific effects (1a, 1b, 2b, 2d, 2e);
    b. defining appropriate loudspeaker selection and placement for monitoring (1a, 1b, 2b, 2d, 2e);
    c. explaining the proper selection and use of headphones (1a, 1b, 2b, 2d, 2e);
    d. maintaining aesthetic perspective in mixing audio (1b, 2c, 2d, 2e);
    e. defining mixing techniques for a music, voice, film, and television applications (1b, 2c, 2d, 2e);
    f. applying criteria for evaluating a mix down project (1b, 2d, 2e);
5. Develop skills and techniques to create audio elements by
    a. explaining techniques of manual audio effects creation (1b, 2c, 2d, 2e);
    b. creating foley effects (1b, 2d, 2c);
    c. explaining principles of sound effects (1b, 2c, 2d, 2e);
    d. manipulating prerecorded sound effects (1b, 2c, 2e);
    e. defining the principles of using music in a production (1b, 2c, 2d, 2e);
    f. explaining the principles of musical underscoring (1b, 2c, 2d, 2e);
    g. employing music loops and music libraries (1b, 2c, 2d, 2e);
6. Demonstrate an understanding of the principles and practices of sound design by
    a. defining audio elements and variables for sound design (1a, 1b, 2d, 2c);
    b. manipulating audio elements for recording human speech (1b, 2c, 2d, 2e);
    c. creating appropriate sound images for a variety of production applications (1a, 1b, 2c, 2e);
    d. editing clips and production elements (1b, 2c, 2d, 2e);
    e. manipulating clips and production elements (1b, 2c, 2d, 2e);
    f. exporting projects for media storage and presentation (1b, 2c, 2d, 2e);
7. Develop critical listening skills to evaluate audio by
    a. evaluating sound qualities (1a, 1b, 2c, 2d, 2e);
    b. judging the audio elements of a production (1a, 1b, 2c, 2d, 2e);
    c. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2c);
    d. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c);
    e. determining appropriate remedies for audio problems (1a, 1b, 1c, 2a, 2b, 2c);

RTVB 1355 - Radio and Television Announcing

General

Course Key
475

Requirements

Requirements
Required Prerequisite(s): COMM 2303

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Examine the fields of radio and television announcing; perform as an announcer in situations including public service announcements, commercials, news, and scripts; and provide critical analysis of performances.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the role of the announcer in the media by
    a. identifying the scope of work the announcer performs for a variety of programs (1a, 1b, 1c, 2b, 2c, 2d);
    b. identifying the education and training the announcer undergoes to attain and master necessary announcing skills (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    c. assessing the career pattern of announcers (1a, 1b, 1c, 2b, 2c, 2d);
    d. identifying the ethical responsibilities of the announcer (1a, 1b, 1c, 2b, 2c, 2d);
    e. distinguishing the role of the announcer as communicator (1a, 1b, 1c, 2b, 2c, 2d);
2. Demonstrate an understanding of the major tools used by the announcer by
    a. analyzing broadcast copy (1a, 1b, 1c, 2a, 2b, 2c);
    b. analyzing written punctuation marks (1a, 1b, 1c, 2a, 2b, 2c);
    c. marking copy (1a, 1b, 1c, 2a, 2b, 2c);
    d. reading copy aloud (1a, 1b, 1c, 2a, 2b, 2c);
    e. employing characterization in announcing (1a, 1b, 1c, 2a, 2b, 2c);
    f. performing adlib announcements (1a, 1b, 1c, 2a, 2b, 2c);
3. Analyze voice for performance improvement by
    a. comparing how people speak (1a, 1b, 1c, 2a, 2b, 2c);
    b. defining speech personality (1a, 1b, 1c, 2a, 2b, 2c);
    c. performing diagnostic readings (1a, 1b, 1c, 2a, 2b, 2c);
    d. analyzing personal speech performance (1a, 1b, 1c, 2a, 2b, 2c);
    e. distinguishing pitch and inflection variations in speech (1a, 1b, 1c, 2a, 2b, 2c);
    f. distinguishing volume variations in speech (1a, 1b, 1c, 2a, 2b, 2c);
    g. distinguishing tempo variations in speech (1a, 1b, 1c, 2a, 2b, 2c);
    h. distinguishing vitality or energy variations in speech (1a, 1b, 1c, 2a, 2b, 2c);
    i. distinguishing voice quality variations in speech (1a, 1b, 1c, 2a, 2b, 2c);
    j. exploring breathing exercises for speech (1a, 1b, 1c, 2a, 2b, 2c);
    k. identifying remedies for common voice problems (1a, 1b, 1c, 2a, 2b, 2c);
    l. practicing speech personality improvement exercises (1a, 1b, 1c, 2a, 2b, 2c);
4. Explore pronunciation and articulation issues for the announcer by
    a. discovering regional variations in American speech (1a, 1b, 1c, 2a, 2b, 2c);
    b. defining pronunciation (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying causes of mispronunciation (1a, 1b, 1c, 2a, 2b, 2c);
    d. defining pronunciation guides (1a, 1b, 1c, 2a, 2b, 2c);
    e. exploring speech sounds of American English (1a, 1b, 1c, 2a, 2b, 2c);
    f. identifying phonetic transcription (1a, 1b, 1c, 2a, 2b, 2c);
    g. defining articulation (1a, 1b, 1c, 2a, 2b, 2c);
    h. identifying articulation problems (1a, 1b, 1c, 2a, 2b, 2c);
5. Distinguish the unique requirements of audio performance for the announcer by
    a. establishing audience rapport (1a, 1b, 1c, 2a, 2b, 2c);
    b. explaining microphone fright (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. developing microphone consciousness (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. discovering how to perform when technicians take a level (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. employing audio performance skills (1a, 1b, 1c, 2a, 2b, 2c);
    f. identifying hand signals for audio performance (1a, 1b, 1c, 2a, 2b, 2c);
6. Distinguish the unique requirements of video performance for the announcer by
    a. establishing on camera rapport (1a, 1b, 1c, 2a, 2b, 2c);
    b. defining microphone consciousness for camera performance (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. developing camera consciousness (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    d. discovering how IFB systems work (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    e. employing on camera performance skills (1a, 1b, 1c, 2a, 2b, 2c);
    f. identifying hand signals for video performance (1a, 1b, 1c, 2a, 2b, 2c);
7. Model a variety of vocal characterizations by
    a. exploring the role of announcer as actor (1a, 1b, 1c, 2a, 2b, 2c);
    b. analyzing copy for performance (1a, 1b, 1c, 2a, 2b, 2c);
    c. performing a variety of commercials (1a, 1b, 1c, 2a, 2b, 2c);
    d. performing a variety of announcements (1a, 1b, 1c, 2a, 2b, 2c);
    e. developing character voices appropriate to script copy (1a, 1b, 1c, 2a, 2b, 2c);
8. Demonstrate an understanding of the role of announcers on interview/talk programs by
    a. defining the principles of effective interview and talk programs (1a, 1b, 1c, 2a, 2b, 2c);
    b. determining how to prepare for interviews (1a, 1b, 1c, 2a, 2b, 2c);
    c. examining how to avoid bias in interviews (1a, 1b, 1c, 2a, 2b, 2c);
    d. discovering how to interact with guests (1a, 1b, 1c, 2a, 2b, 2c);
    e. exploring legal and ethical issues of talk programs (1a, 1b, 1c, 2a, 2b, 2c);
9. Demonstrate an understanding of the role of announcers in news programs by
    a. defining the principles of news programs (1a, 1b, 1c, 2a, 2b, 2c);
    b. determining how to prepare material for news programs (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying the announcing elements of news reports (1a, 1b, 1c, 2a, 2b, 2c);
    d. determining live audio reporting problems (1a, 1b, 1c, 2a, 2b, 2c);
    e. exploring how to work with a teleprompter (1a, 1b, 1c, 2a, 2b, 2c);
    f. examining TV weather reporting (1a, 1b, 1c, 2a, 2b, 2c);
    g. examining TV news anchoring (1a, 1b, 1c, 2a, 2b, 2c);
    h. examining live TV field reporting (1a, 1b, 1c, 2a, 2b, 2c);
    i. exploring sports announcing (1a, 1b, 1c, 2a, 2b, 2c);
    j. exploring issues of interviewing athletes (1a, 1b, 1c, 2a, 2b, 2c);
    k. examining the role of the play by play announcer (1a, 1b, 1c, 2a, 2b, 2c);
    l. examining the role of the play analyst (1a, 1b, 1c, 2a, 2b, 2c);
10. Demonstrate an understanding of the role of announcers in entertainment programs by
    a. exploring music radio announcing (1a, 1b, 1c, 2a, 2b, 2c);
    b. exploring alternate DJ opportunities (1a, 1b, 1c, 2a, 2b, 2c);
    c. examining entertainment show prep (1a, 1b, 1c, 2a, 2b, 2c);
    d. exploring announcing styles for various music formats (1a, 1b, 1c, 2a, 2b, 2c);

(ALL COURSES): Take all of the following courses...

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Apply script and storyboard to the editing process; apply post-production processes; critique the work of other editors; and use industry-standard editing equipment and software.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the role and function of the editor in media production by
    a. examining jobs in postproduction (1a, 1b, 2a, 2c, 2d, 2e);
    b. defining the work of the editor (1a, 1b, 2a, 2c, 2d, 2e);
    c. defining the work of the assistant editor (1a, 1b, 2a, 2c, 2d, 2e);
    d. exploring the job skills used in postproduction work (1a, 1b, 2a, 2c, 2d, 2e);
    e. examining career patterns of editing professionals (1a, 1b, 2a, 2c, 2d, 2e);
2. Identify the components of the nonlinear editing system by
    a. defining the hardware components required for a NLE system (1a, 1b, 2a, 2c, 2d, 2e);
    b. examining the software requirements for a NLE system (1a, 1b, 2a, 2c, 2d, 2e);
    c. exploring commonalities in graphical user interfaces of NLE software (1a, 1b, 2a, 2c, 2d, 2e);
    d. examining editing workflow using NLE software (1a, 1b, 2a, 2c, 2d, 2e);
3. Demonstrate an understanding of basic editing techniques by
    a. distinguishing appropriate project settings (1a, 1b, 2a, 2c, 2d, 2e);
    b. importing clips into the project (1a, 1b, 2a, 2c, 2d, 2e);
    c. managing clips in bins (1a, 1b, 2a, 2c, 2d, 2e);
    d. adding clips to the timeline (1a, 1b, 2a, 2c, 2d, 2e);
    e. trimming clips on the timeline (1a, 1b, 2a, 2c, 2d, 2e);
    f. managing functions in the project window (1a, 1b, 2a, 2c, 2d, 2e);
    g. editing projects using principles of effective editing (1a, 1b, 2a, 2c, 2d, 2e);
4. Demonstrate an understanding of advanced editing concepts by
    a. capturing video from a videotape source (1a, 1b, 2a, 2c, 2d, 2e);
    b. capturing audio from a videotape source (1a, 1b, 2a, 2c, 2d, 2e);
    c. manipulating audio files (1a, 1b, 2a, 2c, 2d, 2e);
    d. creating titles (1a, 1b, 2a, 2c, 2d, 2e);
    e. applying a variety of image effects (1a, 1b, 2a, 2c, 2d, 2e);
    f. applying a variety of audio effects (1a, 1b, 2a, 2c, 2d, 2e);
    g. employing color correction techniques (1a, 1b, 2a, 2c, 2d, 2e);
    h. editing projects using advanced editing techniques (1a, 1b, 2a, 2c, 2d, 2e);
5. Demonstrate an understanding of data storage and data management issues for NLE systems by
    a. saving projects to a variety of locations (1a, 1b, 2a, 2c, 2d, 2e);
    b. troubleshooting sync problems (1a, 1b, 2a, 2c, 2d, 2e);
    c. importing a variety of file formats (1a, 1b, 2a, 2c, 2d, 2e);
    d. exporting a variety of file formats (1a, 1b, 2a, 2c, 2d, 2e);
    e. managing issues related to HD projects (1a, 1b, 2a, 2c, 2d, 2e);
    f. identifying issues related to finishing a project on a NLE system (1a, 1b, 2a, 2c, 2d, 2e);
    g. identifying issues related to editing film source material on a NLE system (1a, 1b, 2a, 2c, 2d, 2e);
    h. determining techniques of presenting edited material in a variety of menu ordered disk formats (1a, 1b, 2a, 2c, 2d, 2e);
6. Demonstrate an understanding of the historical contributions of editing to the film and video industry by
    a. examining the origins of film editing (1a, 1b, 2a, 2c, 2d, 2e);
    b. examining film editing equipment (1a, 1b, 2a, 2c, 2d, 2e);
    c. exploring film editing workflow (1a, 1b, 2a, 2c, 2d, 2e);
    d. distinguishing between the narrative and documentary film traditions (1a, 1b, 2a, 2c, 2d, 2e);
    e. classifying basic editing transitions (1a, 1b, 2a, 2c, 2d, 2e);
    f. identifying advanced editing techniques (1a, 1b, 2a, 2c, 2d, 2e);
    g. examining the Kuleshov effect (1a, 1b, 2a, 2c, 2d, 2e);
    h. examining historical films for editing techniques and audience impact (1a, 1b, 2a, 2c, 2d, 2e);
7. Demonstrate an understanding of motion graphics applications for presenting edited material by
    a. examining motion graphics software applications (1a, 1b, 2a, 2c, 2d, 2e);
    b. applying principles of design to creating effective motion graphics (1a, 1b, 2a, 2c, 2d, 2e);
    c. manipulating images to creating edited effects (1a, 1b, 2a, 2c, 2d, 2e);
    d. applying motion graphics techniques to titles (1a, 1b, 2a, 2c, 2d, 2e);
8. Evaluate editing projects by
    a. analyzing historical films and programs for editing techniques (1a, 1b, 1c, 2a, 2b, 2c);
    b. critiquing student assignments (1a, 1b, 1c, 2a, 2b, 2c);
    c. justifying analysis (1a, 1b, 1c, 2a, 2b, 2c);
    d. assembling a portfolio of completed personal projects (1a, 1b, 1c, 2a, 2b, 2c, 2e);

RTVB 2343 - Commercial Recording Techniques

General

Course Key
14400

Course Rubric
RTVB

Course Number
2343

Course Title
Commercial Recording Techniques

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
1

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-1) Advanced concepts and practice in multi-track recording production for the commercial audio recording industry. Note: A granted petition is required for registration. Required Prerequisite(s): COMM-2303 and RTVB-1347

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisite/corequisite.
Type
Prerequisite

10
A Requirement block where all subrequirements are required

Take RTVB-1347(14398) comm-2303;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): RTVB 1302

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Operate audio production and editing equipment; and coordinate and direct music production projects from booking to post production.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Understand how to manage a successful commercial recording enterprise by
    a. attracting and acquiring clientele (1a, 1c, 2b);
    b. understanding bidding for contract work (1a, 1b, 1c, 2c);
    c. budgeting and scheduling recording sessions (1a, 1b, 1c, 2a, 2c);
2. Produce portfolio-worthy projects by
    a. operating tools used to record and edit audio productions (1a, 1c, 2a, 2c, 2d, 2e);
    b. maintaining equipment used in audio production (1a, 1b, 2a, 2c, 2d, 2e);
    c. working alongside clients to create quality productions (1a, 1b, 1c, 2b, 2c, 2d, 2e);

RTVB 2347 - Electronic Media Business Management

Requirements
Required Prerequisite(s): COMM 2303 and RTVB 1347

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe and analyze media business workflow and department functions including budgeting, facilities/equipment management, and content distribution.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the management challenges of electronic media by
    a. identifying the challenges and uniqueness of broadcast, corporate, and for profit production companies (1b, 2b, 2c);
    b. identifying the challenges and uniqueness of nonprofit production facilities (1b, 2b, 2c);
    c. describing the human relations aspect of managing people (1a, 1b, 1c, 2a, 2b, 2c);
    d. identifying the principles of organizational goals and mission (1a, 2c, 2d);
    e. distinguishing the principles of financial and operational success (1a, 1b, 2a);
2. Demonstrate an understanding of the major operations of a media facility by
    a. identifying the customer for media services (1a, 1b, 2a, 2c);
    b. describing the variety of audiences for media projects (1a, 1b, 2c, 2d);
    c. describing production facilities (1a, 1b, 2d);
    d. describing production equipment (1a, 1b, 2d);
    e. preparing organizational charts for media business models (1a, 1b, 2c, 2d);
    f. describing the relationship of the media department within an organization (1b, 1c, 2c, 2d);
3. Demonstrate an understanding of the process of operating a media business by
    a. preparing media business documents (1a, 1b, 2c, 2d, 2e);
    b. defining business recordkeeping (1a, 1b, 2c, 2d, 2e);
    c. examining basic insurance and liability issues (1a, 1b, 2c, 2d, 2e);
    d. creating budgets for a variety of applications (1a, 1b, 2c, 2d, 2e);
    e. exploring the operational expenses of a media facility (1a, 2a, 2c, 2d);
    f. differentiating equipment purchase versus lease options (1a, 2a, 2c, 2d);
    g. examining the legal responsibilities of a media business (1a, 1b, 2c, 2e);
    h. explaining employment practices (1a, 1b, 2c, 2e);
    i. defining meeting payroll and business accounting practices (2a, 2b, 2d);
4. Demonstrate an understanding of the role and function of sales in media operations by
    a. exploring the relationship between sales and profit (1a, 1b, 2a, 2d, 2c);
    b. creating contracts for production (1a, 1b, 2a, 2c, 2e);
    c. applying the principles of copyright and work for hire (1b, 2c, 2d, 2e);
    d. examining the principles of salesmanship (1b, 2c, 2d, 2e);
    e. explaining the law of contracts (1a, 1c, 2a);
    f. practicing the art of negotiating (1a, 1c, 2a);
    g. exploring the relationship between deadlines and fulfillment (1a, 1c, 2a);
5. Model the creation of a media business by
    a. exploring the process of starting a media business (1a, 1b, 1c, 2a, 2b, 2c);
    b. investigating tax obligations for small business (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. examining principles of business financing (1a, 1b, 1c, 2a, 2b, 2c, 2d);

d. defining intellectual property (1a, 1b, 2a);

e. identifying government contracting procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d);

6. Demonstrate an understanding of the role of ethics in media business operations by

a. defining ethical conduct in business (1a, 1b, 1c, 2a, 2b, 2c, 2d);

b. explaining the employment of legal, accounting, and professional services (1a, 1b, 1c, 2a, 2b, 2c, 2d);

c. examining the role of leadership in business (1a, 1b, 1c, 2a, 2b, 2c, 2d);

d. exploring conflict resolution as a business practice (1a, 1b, 1c, 2a, 2b, 2c);

e. defining criminal behavior in the business place (1a, 1b, 1c, 2a, 2b, 2c, 2d);

f. defining corrupt business practices (1a, 1b, 1c, 2a, 2b, 2c, 2d);

RTVB	2387	Internship - Radio and Television
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
3	0	14

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-0-14). A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. Required Prerequisite: Consent of Coordinator

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Plan the experiences to be gained from an internship by

a. identifying the skills required for a variety of jobs in broadcast, corporate, and for profit production companies (1b, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. identifying the opportunities available for internships in a variety of companies and facilities (1b, 1c, 2b, 2c, 2d);

c. determining the nature of an internship (1a, 1b, 1c, 2a, 2b, 2c);

d. developing an understanding of the relationship between the intern, the sponsoring organization, and the college (1a, 1b, 1c, 2c, 2d);

e. explaining the goals which can be achieved in an internship (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

2. Secure an internship opportunity by

a. identifying a likely internship that will meet the student's goals and requirements (1a, 1b, 1c, 2a, 2b, 2c);

b. applying for available internships (1a, 1b, 2c, 2d, 2e);

c. gaining interviews for appropriate internships (1a, 1b, 2a, 2b, 2c, 2d, 2e);

d. defining internship goals and interests to the internship host (1a, 1b, 2a, 2b, 2c, 2d);

e. arranging an internship schedule and semester plan (1a, 1b, 1c, 2a, 2c, 2d);

f. securing an internship within an organization (1a, 1b, 1c, 2a, 2b, 2c, 2d);

3. Perform on the job training assignments under supervision of a media professional by

a. maintaining a schedule of hours at the internship location (1a, 1b, 2a, 2b, 2c);

b. documenting day to day internship work experiences (1a, 1b, 2a, 2b, 2c);

c. determining how to maximize the internship experience (1a, 1b, 2a, 2b, 2c, 2d, 2e);

d. sharing learning experiences with other interns (1b, 2c, 2a, 2b, 2c, 2d);

e. performing a variety of tasks while working as an intern (1a, 2a, 2c, 2d, 2e);

f. determining how to improve personal job performance at assigned tasks (1a, 1b, 2a, 2b, 2c, 2d, 2e);

g. evaluating personal performance in order to determine how much progress is made toward internship plan goals (1a, 1b, 2c);

4. Demonstrate an understanding of the role and function of a variety of media jobs by

a. observing company employees at their host facility (1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. discussing employment practices at the host facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);

c. determining what skill sets are required for new hire employees (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

d. determining what skill sets are required to maintain certain jobs (1a, 1b, 1c, 2a, 2b, 2c, 2d);

e. determining what employee pay structures are common at the host facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);

f. exploring the possibilities for fulltime, part-time, and freelance employment at the host facility (1a, 1b, 1c, 2a, 2b, 2c, 2d);

5. Develop professional job seeking resources by

a. conducting a job search using networking and internet resources (1a, 1b, 1c, 2a, 2b, 2c);

b. developing a résumé (1a, 1b, 1c, 2a, 2b);

c. preparing a cover letter for a job application (1a, 1b, 1c, 2a, 2b);

d. determining the purpose and structure of a job interview (1a, 1b, 1c, 2a, 2b, 2c);

e. developing job interviewing skills (1a, 1b, 1c, 2a, 2b, 2c, 2d);

f. defining the ethics and legality of a variety of employment practices (1a, 1b, 1c, 2a, 2b, 2c, 2d);

6. Develop a long range career plan by
    a. formulating career goals (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. preparing a portfolio of media professional work (1a, 1b, 1c, 2a, 2c, 2d, 2e);
    c. evaluating personal performance skill set (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. determining the future opportunities available though contacts acquired during the internship (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. analyzing the progress made toward the internship goals (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. defining future career goals (1a, 1b, 1c, 2a, 2b, 2c, 2d);

A Requirement block where all subrequirements are required

#TAKE MATH-1314;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain and apply the concepts of measurements, standard units, kinematics, forces, and work as applicable to health fields; demonstrate knowledge of fluid dynamics, electric circuits, electricity and magnetism, optics and optical instrumentation applicable to health fields; describe and apply the relationship of electromagnetic radiation, nuclear radiation, and radioactivity as applied to health fields; and define radioactive isotopes and half-life and summarize their interaction with biological organisms.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Apply the concepts of measurements, standard units, kinematics, forces, and work as applicable to health related fields by
    a. solving problems involving measurements, standard units, kinematics, forces, and work as applicable to health-related fields (1a, 1b, 2c).
2. Demonstrate knowledge of fluid dynamics, electric circuits, electricity and magnetism, optics and optical instrumentation applicable to health related fields by
    a. calculating the answers to problems involving fluid dynamics, electric circuits, electricity and magnetism, optics, and optical instrumentation applicable to health-related fields (1a, 1b, 2c).
3. Describe and apply the relationship of electromagnetic radiation, nuclear radiation, and radioactivity as applied to health related fields by
    a. solving problems involving wavelength, frequency, and energy as they relate to radiation (1a, 1b, 2c);
    b. describing the forms of radiation with which technologists are concerned (1a, 1b, 2c).
4. Differentiate between the electrostatic forces (gravity/weak/strong) (1a, 1b, 2c).
5. Define matter, substance, mixture, compound, element, molecule, atom, subatomic particles, and nuclide (1a, 1b, 2c).
6. Label the locations of the atomic particles on a drawing of the Bohr model of the atom (1a, 1b, 2c).
7. Discuss the composition of the atom by
    a. describing the proton, neutron, electron, and other elemental particles (1a, 1b, 2c);
    b. describing atomic nomenclature (atomic number, mass number, neutron number, element, valence) (1a, 1b, 2c);
    c. identifying the component of the atom that determines its chemical properties (1a, 1b, 2c);
    d. describing electron shells and stability including orbitals/suborbitals, and energy states (1a, 1b, 2c).
8. Define atomic mass and atomic number (1a, 1b, 2c).
9. Name the component of the nucleus that differentiates one isotope of an element from another (1a, 1b, 2c).
10. Describe the properties of electromagnetic radiation (ions and ionization) (1a, 1b, 2c).
11. Differentiate between isotopes, isobars, isotones, and isomers (1a, 1b, 2c).
12. State the relationship of mass and energy in Einstein's equation (1a, 1b, 2c).
13. Demonstrate understanding of electron shells and stability (1a, 1b, 2c).

SCWK 1303 - Ethics for Social Service Professionals

General

15219

Course Rubric
SCWK

Course Number
1303

Course Title
Ethics for Social Services Professionals

Semester Credit Hours
3

Lecture Hours
3

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Ethical considerations based on social and human services standards. Includes comparison of ethical codes, confidentiality, dual relationships, guidelines for digital counseling, ethical considerations dealing with social media, diversity, and multiculturalism.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Compare and contrast various codes of ethics as they relate to multicultural populations; explain meaning of dual relationships; identify exceptions to confidentiality; and discuss guidelines for digital counseling practice and social media.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate a functional awareness of professional ethics and the necessity of adhering to these standards with clients by
    a. distinguishing and recognizing various professional codes of ethics and common themes (1a, 1b, 2a, 2c, 2d);
    b. defining six basic principles that form the foundation of functioning at the highest level of ethical standards (1a, 1b, 1c, 2a, 2c);
    c. identifying ethical decision-making steps and applying the steps in case examples (1a, 1b, 1c, 2b, 2c);
    d. performing a self-assessment to determine an inventory of attitudes and beliefs about ethical professional issues (1a, 1b, 1c, 2b);
    e. comparing and contrasting ethical actions and unethical actions as a human service professional (1b, 1c, 2b).
2. Demonstrate an understanding of values and the helping relationship by
    a. clarifying values and their role in the professional's work (1b, 1c, 2b, 2c);
    b. exemplifying an understanding of not imposing personal values on clients (1b, 1c, 2b);
    c. distinguishing the legal framework regarding values discrimination (1a, 1b, 2c);
    d. practicing management of value conflicts with clients (1b, 1c, 2b).
3. Demonstrate recognition of client rights and counselor responsibilities by
    a. describing the client's right to give informed consent (1a, 1b, 1c, 2b);
    b. defining and comprehending confidentiality, exceptions to confidentiality, privileged communication, and privacy (1a, 1b, 1c, 2b, 2c);
    c. developing an informed consent for clients being served in the human service arena (1b, 1c, 2a, 2b, 2c);
    d. comprehending the professional's responsibility in keeping adequate records (1a, 1b, 2a, 2c, 2d, 2e);
    e. identifying and dealing with unethical behavior of colleagues (1a, 1b, 1c, 2b).
4. Demonstrate an understanding of multicultural perspectives and diversity issues in the human service profession by
    a. comprehending the challenges of reaching a diverse client population and recognizing the needs of these populations (1a, 1b, 1c, 2b, 2c);
    b. summarizing ethics codes from a diversity perspective while recognizing cultural values and assumptions in helping professions (1a, 1b, 1c, 2b, 2c);
    c. identifying various clients' needs based on culture, ethnicity, sexual orientation, social class, spirituality, disability and age (1a, 1b, 1c, 2b, 2c).
5. Demonstrate an understanding of boundaries and dual relationships in the human services field by
    a. comprehending ethical boundaries between clients and professionals (1a, 1b, 1c);
    b. defining the ethics of dual/multiple relationships and describing how they pose a challenge to professionals (1a, 1b, 1c, 2d);
    c. identifying appropriate management of giving or receiving gifts in the human service relationship (1a, 1b, 1c, 2b);
    d. explaining ethical issues involving sexual attractions to and relationships with clients and legal ramifications of these relationships (1a, 1b, 1c, 2b).
6. Demonstrate an understanding of web counseling practice and broadcast media and the limits of this scope within the human services profession by
    a. evaluating privacy issues with telecommunication devices, social media, and other technological practices (1a, 1b, 1c, 2b, 2d);
    b. comparing direct care service methods to web counseling and defining implications of differences (1a, 1b, 1c, 2b, 2d);
    c. examining advantages and disadvantages of web counseling (1a, 1b, 2c, 2d).

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). Examination of the special needs of youth and their implications for social service workers delivering services to this population.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify family dynamics which impact youth; explain the psycho-social and physiological effects of different environmental settings on the developmental stages of youth to include social media; discuss the resources available for youth and their families; and demonstrate an awareness of confidentiality laws, client rights, code of ethics, and prevention and intervention modalities for minors.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the concept of juvenile delinquency by
    a. identifying many of the problems of youth in American culture (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. explaining why the treatment of children changed radically after the seventeenth century (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. defining status offender (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. explaining how uniform crime report data are gathered and used (1a, 1b, 2a, 2c);
    e. identifying recent trends in juvenile delinquency (1a, 1b, 1c, 2a, 2b);
    f. explaining the concept of the chronic offender (1a, 1b, 2a, 2c, 2d).
2. Demonstrate an understanding of different complex theoretical models of delinquent behavior by
    a. explaining the theory that delinquency is essentially caused by individual level factors, such as personal choices and decision making, or by psychological and biological factors (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. explaining social theories of delinquency that state that delinquency is caused by children's place in the social structure and/or their relationships with social institutions and processes (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. explaining the theory of delinquency that regards youthful misbehavior as a function of stigma and labeling (1a, 1b, 1c, 2a, 2b, 2c);
    d. explaining theories of delinquency that regard youthful misbehavior as a developmental process (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Demonstrate an understanding of the influences of social, community, and environmental relations on delinquency by
    a. explaining gender relations and their relationship to delinquency (1a, 1b, 2a, 2c);
    b. describing the link between family relationships and juvenile delinquency (1a, 1b, 2a, 2c);
    c. explaining the influence of peers on delinquency (1a, 1b, 1c, 2a, 2b, 2c);
    d. explaining the relationship between education and delinquency (1a, 1b, 1c, 2a, 2b, 2c);
    e. explaining the relationship between drug use and delinquency (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. differentiating between delinquency prevention and delinquency control (1a, 1b, 1c, 2a, 2b, 2c).
4. Demonstrate a general understanding of the juvenile justice system by
    a. tracing the history and development of juvenile justice (1a, 1b, 1c, 2a, 2b, 2c);
    b. explaining the responsibilities and key roles of the police in dealing with juvenile offenders (1a, 1b, 1c, 2a, 2b, 2c);
    c. explaining key issues of the pre-adjudicatory stage of juvenile justice (1a, 1b, 2a, 2b, 2c);
    d. differentiating between community treatment and institutional treatment for juvenile offenders (1a, 2a, 2b, 2c);
    e. explaining some of the different delinquency problems facing other regions of the world (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate simple, everyday, culturally appropriate communication with clients/co-workers who are deaf.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Utilize visualization skills and apply them to form and meaning of written and spoken texts with an emphasis on medical terminology (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Paraphrase propositions and discourse (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Identify main and supporting ideas (1a, 1b, 1c, 2a, 2b, 2c, 2d).
4. Retell written and spoken material (1a, 1b, 1c, 2a, 2b, 2c, 2d).
5. Demonstrate the use of working and long-term memory, cloze skills, and recognition of patterns (1a, 1b, 1c, 2a, 2b, 2c, 2d).
6. Demonstrate a broader vocabulary and cultural literacy in English and ASL (1a, 1b, 1c, 2a, 2b, 2c, 2d).

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): SGNL 1401 or equivalent

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify and demonstrate fingerspelled words and numbers; demonstrate lexicalized fingerspelling with accuracy, clarity, and fluency; and identify exercises and strategies for preventing repetitive motion injuries.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Summarize the rules associated with fingerspelling in American Sign Language by
    a. identifying appropriate use of fingerspelling (1a, 1b);
    b. utilizing proper techniques to avoid repetitive motion injury (1a, 1b);
    c. incorporating proper articulation to ensure clarity of production (1a, 1b);
    d. choosing the proper number form in a given context (1a, 1b).
2. Express accurately the letters, numbers, proper nouns, and lexicalized vocabulary of American Sign Language by
    a. differentiating the numbering conventions in American Sign Language (1a, 1b, 2b, 2c);
    b. demonstrating fluent production of fingerspelling (1a, 1b, 2b, 2c);
    c. integrating the rules for appropriate use of fingerspelling (1a, 1b, 2b, 2c);
    d. demonstrating the ability to correctly move from one letter to the next in a rhythmic fashion without extraneous movements or hesitation (1a, 1b, 2b, 2c);
    e. demonstrating the ability to mouth fingerspelled words without voicing (1a, 1b, 2b, 2c);
    f. reproducing the lexicalized form of fingerspelled words (1a, 1b, 2b, 2c);
    g. identifying commonly fingerspelled words and acronyms (1a, 1b, 2b, 2c).
3. Comprehend the letters, numbers, proper nouns, and lexicalized vocabulary of American Sign Language by
    a. incorporating a holistic method rather than relying on individual letters (1a, 1b, 2b, 2c);
    b. utilizing contextual clues to aid in closure, including signer's lip movements (1a, 1b, 2b, 2c);
    c. recognizing the lexicalized form of fingerspelled words (1a, 1b, 2b, 2c);
    d. identifying commonly fingerspelled words and acronyms (1a, 1b, 2b, 2c);
    e. increasing the rate at which fingerspelled concepts are recognized (1a, 1b, 2b, 2c).

SLNG 1215 - Visual/Gestural Communication

Course Number
1215

Course Title
Visual and Gestural Communication

Semester Credit Hours
2

Lecture Hours
2

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). Development of skills in non-verbal communications. Emphasizes the use and understanding of facial expression, gestures, pantomime, and body language.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Communicate using mime, body language, facial expression, classifiers, and other visual/gestural strategies; create and/or perform stories and narratives in a visual mode; and interact and respond appropriately to visual/gestural communications.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Interpret the use of visual and gestural communication as applied in working with a person that has little to no formal language by
    a. predicting how an individual with limited language will relate to his/her world (1a, 1b, 2c);
    b. comparing the experiences of an individual with limited language to his/her own experience with acquiring language (1a, 1b, 2c);
    c. contrasting teaching methods for an adult with limited language and an individual who has been exposed to language since birth (1a, 1b);
    d. examining the phenomenon of cultural isolation for an individual with limited language (1a, 1b);
    e. analyzing excerpts from text provided by the instructor (1a, 1b);
    f. reasoning the exceptional ability of a deaf individual to communicate effectively with an individual with limited language (1a, 1b).
2. Incorporate visual grammar to effectively communicate emotions and ideas by
    a. examining the use of natural gestures (1a, 1b, 1c);
    b. demonstrating appropriate mouth morphemes (1a, 1b, 1c);
    c. utilizing body posturing (1a, 1b, 1c);
    d. practicing conversational turn taking (1a, 1b, 1c, 2b).
3. Create two-dimensional objects using appropriate handshapes and facial grammar by
    a. manipulating line and shape configurations (1b, 2c);
    b. developing visual memory skills by reproducing predetermined line and/or shape patterns (1b, 2c);
    c. demonstrating how to show symmetrical/non-symmetrical configurations (1b, 2c);
    d. utilizing the appropriate hand configurations to show different textures while incorporating corresponding facial markers (1b, 2c);
    e. differentiating between symmetrical and nonsymmetrical configurations (1b, 2c).
4. Construct three dimensional objects using appropriate handshapes and facial grammar by
    a. describing a variety of balls, cones, cylinders, boxes, boards, and blocks (1b, 2c);
    b. manipulating hand configurations to indicate size and function of a variety of balls, cones, cylinders, boxes, boards, and blocks (1b, 2c);
    c. expanding application and placement of three dimensional shapes to describe spatial relationships (1b, 2c);
    d. describing salient features of architectural landmarks (1b, 2c);
    e. illustrating a given object or scene from various perspectives (1b, 2c);
    f. differentiating between symmetrical and nonsymmetrical configurations (1b, 2c).
5. Portray people and animals using appropriate handshapes and facial grammar by
    a. choosing from a variety of classifiers to correctly show body descriptors (1b, 2c);
    b. choosing from a variety of classifiers to indicate movement and spatial relationship (1b, 2c);
    c. altering classifiers to indicate plurality (1b, 2c).
6. Analyze various narratives by performing in front of class by
    a. developing visual memory skills through storytelling and skills (1b, 2a, 2b, 2c);
    b. incorporating non-manual markers in the scope of a gestured story (1b, 2a, 2b, 2c);
    c. reproducing a simple poem individually (1b, 2a, 2b, 2c);
    d. demonstrating a visual representation of several haiku with a group of peers (1b, 2a, 2b, 2c);
    e. employing classifiers for storytelling to limit action in the presentation (1b, 2a, 2b, 2c);

f. developing a complex visual representation of a common short story with a group of peers (1b, 2a, 2b, 2c).

7. Discriminate between sign language and visual gestural communication by

a. performing a variety of classroom activities that emphasize visual focus (1b, 2b, 2c);

b. employing gestural communication in lieu of sign language (1b, 2b, 2c);

c. monitoring his/her peers' use of gestural communication in lieu of sign language (1b, 2b, 2c).

SLNG 1321 - Intro To The Interpreting Profession

General

8049

Course Rubric	Course Number	Course Title
SLNG	1321	Introduction to the Interpreting Profession

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). An overview of the field of American Sign Language (ASL)/English interpretation. Provides a historical framework for the current principles, ethics, roles, responsibilities, and standard practices of the interpreting profession.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe standard practices, employment trends, compensation, and professional business practices in the current job market; explain the tenets of the Code of Professional Conduct and the Standards of Ethical Behavior and apply them to situational decision-making; analyze the history of ASL/English interpreting and its evolution to current practice; and describe issues of language, power, and control and their impact on the role of the interpreter and the goals of interpreting.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Summarize the history of Sign Language Interpreting as a profession by

a. recalling the history and purpose of RID (1a, 2b, 2c);

b. recalling the history and purpose of BEI (1a, 2b, 2c);

c. listing the current goals of RID (1a, 2b, 2c);

d. explaining the current roles and responsibilities of the BEI (1a, 2b, 2c);

e. outlining significant legislative initiatives affecting deaf people and interpreters (1a, 2b, 2c);

f. articulating the importance of holding state and/or national certification (1a, 1c, 2b, 2c);

g. describing the various certificates awarded by RID (1a, 2b, 2c);

h. describing the various certificates awarded by BEI (1a, 2b, 2c).

2. Apply understanding of the roles and responsibilities of a sign language interpreter by

a. describing the four historical service models of sign language interpreters (1a, 1b, 1c, 2b, 2c);

b. describing the emerging service models of sign language interpreters (1a, 1b, 1c, 2b, 2c);

c. exploring the variety of settings in which a sign language interpreter could work (1a, 1b, 1c, 2a, 2b, 2c, 2d);

d. defining intra-lingual skills and being able to discuss their application to the interpreting process (1a, 1b, 1c, 2b, 2c);

e. examining the range of manual communication methods between American Sign Language and English (1a, 1b, 1c, 2b, 2c);

f. demonstrating understanding of the concept of cross cultural communication (1a, 1b, 1c, 2b, 2c);

g. identifying how personal experiences and knowledge impact interpretation (1a, 1b, 1c, 2b, 2c, 2d);

h. discovering the traits that mark a professional (1a, 1b, 1c, 2b, 2c);

i. assessing the role of the interpreter as it relates to power and oppression (1a, 1b, 1c, 2b, 2c);

j. investigating the current job market, trends, and salary schedules (1a, 1b, 1c, 2a, 2b, 2c, 2d);

k. examining best business practices in the field of sign language interpreting (1a, 1b, 1c, 2a, 2b, 2c, 2d);

l. differentiating the role of sign language interpreter versus advocate (1a, 1b, 1c, 2a, 2b, 2c, 2d).

3. Interpret the RID Code of Professional Conduct by

a. comparing morals versus professional ethics (1a, 1b, 1c, 2a, 2b, 2c, 2d);

b. contrasting morals versus professional ethics (1a, 1b, 1c, 2a, 2b, 2c, 2d);

c. applying the RID Code of Professional Conduct to various interpreting scenarios (1a, 1b, 1c, 2a, 2b, 2c, 2d).

4. Refine English proficiency as it relates to the field of Sign Language Interpreting by

a. applying conceptual accuracy when making vocabulary choices (1a, 1b, 2a, 2b, 2c);

b. performing text analysis of English idioms (1a, 1b, 2a, 2b, 2c);

c. increasing understanding of higher level English vocabulary (1a, 1b, 2a, 2b, 2c);

d. building schema through study of unfamiliar topics (1a, 1b, 2a, 2b, 2c).

SLNG 1347 - Deaf Culture

General

599

Course Rubric	Course Number	Course Title
SLNG	1347	Deaf Culture

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Historical and contemporary perspective of American Deaf culture using a sociocultural model. Includes cultural identity and awareness, values, group norms, communication, language, and significant contributions made by deaf people to the world.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify Deaf culture and discuss situations that may be encountered; outline the historical roots of American Deaf culture and deaf education; and explain the values, norms, cultural identity, and rules of social interaction within the American Deaf community. Describe the experiences of diverse multicultural communities within the larger American Deaf community.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Relate mainstream experience to that of the Deaf Community and Culture by
    a. recognizing the existence of Deaf Culture (1a, 1b, 1c, 2b, 2c);
    b. identifying characteristics of the Deaf Community and Culture (1a, 1b, 1c, 2b, 2c);
    c. incorporating appropriate terminology to discuss members of the Deaf Community (1a, 1b, 1c, 2b, 2c);
    d. articulating the difference between a cultural and pathological view of Deafness (1a, 1b, 1c, 2b, 2c);
    e. exploring the effects of technology on the Deaf Community (1a, 1b, 1c, 2b, 2c);
    f. identifying cultural norms and mores of Deaf people (1a, 1b, 1c, 2b, 2c);
    g. describing the values and customs of Deaf Culture (1a, 1b, 1c, 2b, 2c);
    h. developing cultural sensitivity for the unique issues that Deaf people may encounter (1a, 1b, 1c, 2b, 2c);
    i. justifying personal views regarding controversial issues (1a, 1b, 1c, 2b, 2c).
2. Relate mainstream experience to the heritage of deaf people by
    a. identifying key events and people in the history of the Deaf Community (1a, 1b, 1c, 2b, 2c);
    b. discovering the important role the Deaf Community in Martha's Vineyard played in American Deaf History (1a, 1b, 1c, 2b, 2c);
    c. discussing the history of sign language and its role in the Deaf Community (1a, 1b, 1c, 2b, 2c);
    d. describing the significance of various Deaf organizations and clubs (1a, 1b, 1c, 2b, 2c);
    e. justifying personal views regarding controversial issues (1a, 1b, 1c, 2b, 2c).
3. Examine a variety of Deaf arts and entertainment by
    a. exploring the different forms of Deaf art including storytelling, poetry, performing arts, and visual arts (1a, 1b, 1c, 2b, 2c);
    b. contrasting the differences between mainstream and Deaf humor (1a, 1b, 1c, 2b, 2c);
    c. recognizing Deaf comedians (1a, 1b, 1c, 2b, 2c);
    d. recognizing the important role sports play in the Deaf Community (1a, 1b, 1c, 2b, 2c).
4. Explore Deaf Education from a global perspective by
    a. tracing the changing views of the ability of D/deaf people to be educated (1a, 1b, 1c, 2b, 2c);
    b. describing the impact of hearing loss on language development and cognition (1a, 1b, 1c, 2b, 2c);
    c. considering resolutions from the Milan Congress 1880 (1a, 1b, 1c, 2b, 2c);
    d. reconstructing the history of D/deaf Education (1a, 1b, 1c, 2b, 2c);
    e. identifying school placement options for parents of D/deaf children (1a, 1b, 1c, 2b, 2c);
    f. differentiating monolingual and bilingual approaches to teaching language (1a, 1b, 1c, 2b, 2c);
    g. describing the impact of multicultural issues in D/deaf Education (1a, 1b, 1c, 2b, 2c);
    h. justifying personal views regarding controversial issues (1a, 1b, 1c, 2b, 2c).
5. Outline key legislative events affecting the Deaf Community by
    a. listing specific legislation affecting Deaf people (1a, 1b, 1c, 2b, 2c);
    b. summarizing key points of the Vocational Rehabilitation Act of 1973 (1a, 1b, 1c, 2b, 2c);
    c. summarizing key points of the Individual of Disabilities Education Act (1a, 1b, 1c, 2b, 2c);
    d. summarizing key points of the Americans with Disabilities Act (1a, 1b, 1c, 2b, 2c).
6. Investigate the concept of oppression as it pertains to Deaf Culture by
    a. recognizing D/deaf people as a minority group that has experienced discrimination and oppression (1a, 1b, 1c, 2b, 2c);
    b. recognizing the diversity of the Deaf Community and resulting oppression (1a, 1b, 1c, 2b, 2c);
    c. discussing the impact being D/deaf has on different families including: hearing parents with deaf children, Deaf parents with Deaf children, and Deaf parents with hearing children (1a, 1b, 1c, 2b, 2c);
    d. recognizing how D/deaf people are often portrayed stereotypically in the media (1a, 1b, 1c, 2b, 2c);
    e. exploring how the interpreting profession can contribute to oppression (1a, 1b, 1c, 2b, 2c);
    f. justifying personal views regarding controversial issues (1a, 1b, 1c, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Participate in a state mandated practicum completing the remaining 240 required hours by
    a. demonstrating the ability to establish a good rapport with coworkers, supervisors, and clients (1a, 1c, 2b, 2c);
    b. participating with working interpreters in a variety of settings (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. applying the RID Professional Code of Conduct on each assignment using conflict resolution techniques (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. assessing the communication needs and preferences of clients (1a, 1b, 1c, 2a, 2b, 2c);
    e. evaluating critically the vocabulary choices, language, and application of the Professional Code of Conduct of working interpreters during observation (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. adapting to visual accessibility issues that could impact the communication dynamics of each assignment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. demonstrating understanding of cross-cultural mediation (1a, 1b, 1c, 2a, 2b, 2c).
2. Evaluate their own skill development by
    a. increasing vocabulary base in both American Sign Language and English (1a, 1b, 2a, 2c);
    b. identifying specific strengths in his or her own interpretation/transliteration between American Sign Language and English (1a, 1b, 1c, 2a, 2c, 2d);
    c. identifying specific weaknesses in his or her own interpretation/transliteration between American Sign Language and English (1a, 1b, 1c, 2a, 2c, 2d);
    d. exhibiting increasing fluency and rate of interpretation/transliteration without compromising message equivalency (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. assimilating all feedback provided by clients and cooperating interpreters (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. performing critically specific post assignment evaluation and analysis of work product (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    g. establishing a plan to target specific skill improvement using post assignment evaluation (1a, 1b, 1c, 2a, 2c, 2d);
    h. constructing language choices according to appropriate register (1a, 1b, 1c, 2a, 2c, 2d);
    i. attaining the individual set of objectives as established during Practicum I (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Establish a professional portfolio by
    a. applying the RID Professional Code of Conduct on all assignments (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. exhibiting appropriate interpersonal skills with clients and peers (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. dressing appropriately according to the needs of the interpreting assignment (1c, 2b);
    d. demonstrating punctuality and dependability for each assignment (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. following directions of cooperating interpreters and instructors (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. preparing adequately for all interpreting assignments by collecting materials and allotting sufficient time (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    g. maintaining membership in at least one of the professional interpreting organizations (1a, 1c, 2a, 2b, 2c);
    h. building a professional resume (1a, 1b, 1c, 2a, 2c, 2d);
    i. securing three formal letters of recommendation (1a, 1b, 1c, 2a, 2c, 2d);
    j. practicing successful interview skills (1a, 1b, 1c, 2a, 2c, 2d).

6335

Course Rubric	Course Number	Course Title
SLPS	1371	Introduction to Security Management

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0).An exploration of topics, which form the foundation of knowledge necessary in the field of security management. Specific content areas include: the history of private security, loss prevention, prevention programs, risk assessment, vulnerability assessment, and countermeasure selection. Other topics include internal and external relations, and financial management.

View Course Availability on MyTCCTrack

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the dynamic nature of security management issues and the need to stay current and informed of the ever changing environment by
    a. describing the historical development of security (1a, 1b, 1c, 2b, 2c);
    b. identifying the role of security (1a, 1b, 1c, 2b, 2c);
    c. explaining the need for internal and external controls (1a, 1b, 1c, 2b, 2c);
    d. discussing the role of the proprietary security organization (1a, 1b, 1c, 2b, 2c);
    e. discussing security education, training, certification, and regulation (1a, 1b, 1c, 2b, 2c).
2. Demonstrate an understanding of the security system thinking process, and its value in criminal justice by
    a. assessing the role of security management in the workplace (1a, 1b, 2b, 2c);
    b. explaining the value of security management as being proactive (1a, 1b, 2b, 2c).
3. Demonstrate the ability to conduct independent research on issues related to security management by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2c);
    b. synthesizing research in order to acquire knowledge (1a, 1b, 2a, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2a, 2c);
    d. delivering the reports in a simulated work environment (1a, 1b, 2a, 2c).
4. Demonstrate an understanding of risk and risk management strategies in the field of security management by
    a. determining why and what risks affect security management as a profession (1a, 1b, 2a, 2b, 2c);
    b. identifying strengths and weakness of security management (1a, 1b, 2a, 2b, 2c);
    c. preparing strategies for security management (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes
End-of-Course Outcomes: Learning outcomes/objectives are determined by local occupational need and business and industry trends.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the core topics related to the selected course theme by
    a. analyzing the nature of the current issues (1a, 1b, 2c);
    b. demonstrating critical reading and thinking as the issues are analyzed (1a, 1b, 2c);
    c. demonstrating the ability to identify problems, use problem solving skills, and communicate information gathered (1a, 1b, 2c).
2. Demonstrate the ability to conduct independent research on current issues related to professional law enforcement by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2b, 2c);
    b. synthesizing research in order to acquire knowledge (1a, 1b, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2c);
    d. delivering the reports in a simulated work environment (1a, 1b, 2a, 2b, 2c).

Course Learning Outcomes

Course Learning Outcomes
Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of physical security as a critical component of security management by
    a. analyzing the nature of current issues (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. identifying areas of risk assessments and management (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. identifying areas of crime prevention through security design (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. identifying the criteria for security surveys (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. identifying the influences of physical security (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. explaining homeland security issues in relation to business practices (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    g. explaining the need for building barriers, intrusion detection systems, and CCTV surveillance systems (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Demonstrate the ability to conduct independent research on issues related to criminal justice by
    a. identifying pertinent and legitimate resources (1a, 1b, 2a, 2c);
    b. synthesizing research in order to acquire knowledge (1a, 1b, 2a, 2c);
    c. preparing written and oral reports based on the research (1a, 1b, 2a, 2c);
    d. delivering the reports in a simulated work environment (1a, 1b, 2a, 2c).
3. Demonstrate an understanding of effective recruitment and selection strategies in the field of security management by
    a. explaining the need for security guards (1a, 1b, 1c, 2a, 2b, 2c);
    b. determining the importance of human resources and how they affect security management as a whole (selection of good security personnel) (1a, 1b, 1c, 2a, 2b, 2c);
    c. identifying strengths and weaknesses of current recruitment and selection systems (1a, 1b, 1c, 2a, 2b, 2c);
    d. preparing strategies for recruitment and selection (1a, 1b, 1c, 2a, 2b, 2c);
    e. analyzing employment trends in security management (1a, 1b, 1c, 2a, 2b, 2c).

SMFT 1211 - Vacuum Principles

General

Course Key
16541

Course Rubric	Course Number	Course Title
SMFT	1211	Vacuum Principles

Semester Credit Hours	Lecture Hours	Lab Hours
2	2	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0) An introduction to vacuum technology, vacuum principles, pumping systems, gauging, leak detection, and safety practices.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain vacuum principles; identify vacuum components; describe vacuum systems, leak detection techniques, and safety practices related to vacuum systems.

Upon successful completion of this course, students will

1. Development of vacuum science and vacuum technology an understanding of vacuum principles by:
   a. Boyle Robert.
   b. Galileo Galilern experiments;
   c. Evamgelista Torricelli experiments;
   d. Blaise Pascal experiments;
   e. Otto von Guerickey experiments.
   f. Joseph Louis experiments
   g. Jacques Charles experiments
2. Demonstrate an understanding of vacuum pumps by:
   a. characteristics of dry pumps;
   b. characteristics of diffusion pumps;
   c. characteristics of mechanical pumps.
3. Identify the types of vacuum regimes by
   a. understanding rough vacuum;
   b. understanding high vacuum;
   c. understanding ultrahigh vacuum.
4. Demonstrate of measurements by:
   a. calculating volume and surface area;
   b. calculating the converting units;
5. Determine the vacuum gauges by:
   a. vacuum pressure gauge;
   b. bourdon gauge;
   c. direct reading gauge;
   d. indirect reading gauge;
   e. pirani gauge.

SMFT 1343 - Semiconductor Manufacturing Technology

General

Course Key
16540

Course Rubric	Course Number	Course Title
SMFT	1343	Semiconductor Manufacturing Technology

Semester Credit Hours	Lecture Hours	Lab Hours
3	2	2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) A study of the processes, materials, and equipment used in the manufacturing of semiconductors, including an overview of the semiconductor industry, related terminology, and standard safety practice.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the processes, materials, and equipment used in semiconductor manufacturing; define and use semiconductor manufacturing terms; identify personal, industry, and environmental safety procedure standards related to semiconductor manufacturing technology; explain the relationship between the physical structure and the way a semiconductor device operates.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of characteristics of semiconductor materials by:
   a. atomic structure;
   b. ionic bonds;
   c. covalent bonds;
   d. classifying materials: conductors, insulators, and semiconductors;
   e. silicon: pure silicon, doped silicon, and pn junction;
   f. alternative semiconductor.
2. Demonstrate silicon wafer preparation by:
   a. understand crystal structure and orientation;
   b. understand monocrystal silicon growth;
   c. understand wafer preparation steps;
   d. identify quality measures.
3. Demonstrate chemicals in semiconductor fabrications by
   a. understand properties of materials;
   b. understand process chemicals;
   c. understand ultrahigh vacuum.
4. Identify contamination control in wafer FABs by:
   a. understand types of contamination;
   b. understand the source and control of contamination.
   c. understand wafer wet cleaning.
5. Determine metrology and defect inspection by:
   a. understand measurement equipment;
   b. understand the yield;
   c. understand quality measurement;
   d. understand analytical equipment.
6. Determine gas control in process chambers by:
   a. understanding vacuum piping components;
   b. understanding control valves;
   c. understanding feedthrough, elbows, coupling, seals, and flanges.
7. Demonstrate the process for the wafer by:
   a. explaining oxidation procedure;
   b. explaining deposition procedure;
   c. explaining metallization;
   d. explaining photolithography vapor prime, soft bake, alignment exposure, photoresist, and development;
   e. explaining etch
   f. explaining ion implant;
   g. chemical mechanical planarization.
8. Understand the process of testing wafer by
   a. explain ic electrical test;
   b. explain the in-line parameters test;
   c. explain the wafer sort;
   d. explain the yield sort;
   e. explain test quality measures and troubleshooting

SMFT 2335 - Vacuum Technology

General

Course Key
16539

Course Rubric
SMFT

Course Number
2335

Course Title
Vacuum Technology

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Skill development in vacuum technology, including vacuum principles, pumping systems, gauging, leak detection, and safety principles. Required Prerequisite: SMFT-1211

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Requirements
Required Prerequisite(s): SMFT-1211

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain vacuum principles; list vacuum components and their functions; describe vacuum systems and their industrial application; discuss leak detection techniques and system troubleshooting; demonstrate safety practices related to vacuum systems.

Upon successful completion of this course, students will

1. Demonstrate an understanding of vacuum technology by
   a. recognize vacuum systems;
   b. understanding pressure regime;
2. Identify the behavior of gases;
   d. recognize leak detection in vacuum systems
3. Calculate the gas load of the bulk gas present in a vacuum chamber before initiating a system pump down by
   a. analyze partial pressure analysis using residual gas analyzer;
   b. apply gas delivery and pressure control.
4. Identify the sources that contribute to gas load in rough and high vacuum regimes by
   a. understanding the first pressure regime;
   b. understanding the rough vacuum regime;
   c. understanding high-vacuum systems.
5. Draw a schematic diagram of a basic vacuum system using symbols commonly used to represent vacuum system components by
   a. identify the main components present in a vacuum system;
   b. identify and classify the types of vacuum pumps suitable for use in the rough vacuum and high vacuum regimes;
   c. identify and classify the types of gauges suitable for use in the rough vacuum and high vacuum regimes.
   d. describe other components used in the design of vacuum systems

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3) Physical vapor deposition (PVD), chemical vapor deposition (CVD), and related systems. Includes planning, repairing, maintaining, and testing various systems such as evaporators, electron guns, ion plating, direct current (DC) and radio frequency (RF) sputtering systems. The course is intended to enhance and apply knowledge gained in previous vacuum-related classes. Other topics include the planning, repairing, maintaining, and coating of various chemical depositions used as coatings in manufactured optics and semiconductors.

Description
(3-3-0) This course studies minority-majority group relations, addressing their historical, cultural, social, economic, and institutional development in the United States. Both sociological and social psychological levels of analysis will be employed to discuss issues including experiences of minority groups within the context of their cultural heritage and tradition, as well as that of the dominant culture. Core concepts to be examined include (but are not limited to) social inequality, dominance/subordination, prejudice, and discrimination. Particular minority groups discussed may include those based on poverty, race/ethnicity, gender, sexual orientation, age, disability, or religion.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend information given on surgical instrumentation by
    a. describing classifications, parts, and uses of basic surgical instruments (1a, 1b, 2c);
    b. identifying instruments and uses in multiple specialty instrument sets (1a, 1b, 2c);
    c. demonstrating proper technique for opening, closing, passing, and holding surgical instruments (1a, 1b, 2c);
    d. assembling various instrument sets (1a, 1b, 2c).
2. Describe names and uses of multiple surgical supplies by
    a. listing names and uses of all items on supply display boards (1a, 1b, 2c);
    b. identifying various types of surgical knife blades (1a, 1b, 2c).
3. Demonstrate proper technique for using hypodermic needles and syringes by
    a. assembling various needles and syringes (1a, 1b, 2c);
    b. performing proper technique for drawing up medications and solutions in circulating and scrub roles (1a, 1b, 2c);
    c. demonstrating safe one handed recapping technique (1a, 1b, 2c);
    d. demonstrating proper sharps disposal process (1a, 1b, 2c).
4. Demonstrate an understanding of the process for opening sterile supplies by
    a. explaining parameters checked before opening a supply (1a, 1b, 2c);
    b. showing proper technique for opening sterile supplies (1a, 1b, 2c);
    c. listing principles of aseptic technique involved in opening sterile supplies (1a, 1b, 2c).
5. Display proper technique for a surgical scrub, gowning, and gloving by
    a. performing a correct counted stroke method surgical scrub (1a, 1b, 2c);
    b. showing correct surgically clean hand drying technique (1a, 1b, 2c);
    c. performing proper self-gowning and assisted gowning (1a, 1b, 2c);
    d. performing proper closed gloving and open assisted gloving (1a, 1b, 2c).
6. Duplicate multiple surgical procedure set ups in appropriate time limits by
    a. demonstrating proper general, vaginal, and extremity procedure setups (1a, 1b, 2c);
    b. performing efficient surgical counts of sponges, sharps, and instruments (1a, 1b, 2c);
    c. displaying proper draping methods for each procedure set up (1a, 1b, 2c);
    d. performing proper instrument passing for each set up (1a, 1b, 2c);
    e. demonstrating proper postoperative surgical gown and glove removal (1a, 1b, 2c).
7. Analyze information presented on sutures and suture needles by
    a. explaining various types, sizes, and uses of surgical sutures (1a, 1b, 2c);
    b. demonstrating the ability to identify by sight and to name and use suture needles (1a, 1b, 2c);
    c. demonstrating proper loading of suture needle holders (1a, 1b, 2c);
    d. explaining various types of wound closures (1a, 1b, 2c).

8. Demonstrate multiple surgical patient positions by
    a. listing equipment needed for each surgical position (1a, 1b, 2c);
    b. identifying transport methods for surgical patients (1a, 1b, 2c);
    c. performing patient positioning on operating room beds for supine, sitting, prone, lateral, and lithotomy positions (1a, 1b, 2c);
    d. identifying safety precautions for each position (1a, 1b, 2c).

9. Display proper techniques for surgical preps and catheterizations by
    a. demonstrating proper open gloving technique (1a, 1b, 2c);
    b. performing proper surgical prep for abdominal, vaginal, and extremity procedures (1a, 1b, 2c);
    c. performing proper male and female urinary catheterization procedures (1a, 1b, 2c);
    d. showing proper post procedure glove removal technique (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend information given on surgical instrumentation by
    a. describing classifications, parts, and uses of basic surgical instruments (1a, 1b, 2c);
    b. identifying instruments and uses in multiple specialty instrument sets (1a, 1b, 2c);
    c. demonstrating proper technique for opening, closing, passing, and holding surgical instruments (1a, 1b, 2c);
    d. assembling various instrument sets (1a, 1b, 2c).

2. Describe names and uses of multiple surgical supplies by
    a. listing names and uses of all items on supply display boards (1a, 1b, 2c);
    b. identifying various types of surgical knife blades (1a, 1b, 2c).

3. Demonstrate proper technique for using hypodermic needles and syringes by
    a. assembling various needles and syringes (1a, 1b, 2c);
    b. performing proper technique for drawing up medications and solutions in circulating and scrub roles (1a, 1b, 2c);
    c. demonstrating safe one handed recapping technique (1a, 1b, 2c);
    d. demonstrating proper sharps disposal process (1a, 1b, 2c).

4. Demonstrate an understanding of the process for opening sterile supplies by
    a. explaining parameters checked before opening a supply (1a, 1b, 2c);
    b. showing proper technique for opening sterile supplies (1a, 1b, 2c);
    c. listing principles of aseptic technique involved in opening sterile supplies (1a, 1b, 2c).

5. Display proper technique for a surgical scrub, gowning, and gloving by
    a. performing a correct counted stroke method surgical scrub (1a, 1b, 2c);
    b. showing correct surgically clean hand drying technique (1a, 1b, 2c);
    c. performing proper self-gowning and assisted gowning (1a, 1b, 2c);
    d. performing proper closed gloving and open assisted gloving (1a, 1b, 2c).

6. Duplicate multiple surgical procedure set ups in appropriate time limits by
    a. demonstrating proper general, vaginal, and extremity procedure setups (1a, 1b, 2c);
    b. performing efficient surgical counts of sponges, sharps, and instruments (1a, 1b, 2c);
    c. displaying proper draping methods for each procedure set up (1a, 1b, 2c);
    d. performing proper instrument passing for each set up (1a, 1b, 2c);
    e. demonstrating proper postoperative surgical gown and glove removal (1a, 1b, 2c).

7. Analyze information presented on sutures and suture needles by
    a. explaining various types, sizes, and uses of surgical sutures (1a, 1b, 2c);
    b. demonstrating the ability to identify by sight and to name and use suture needles (1a, 1b, 2c);
    c. demonstrating proper loading of suture needle holders (1a, 1b, 2c);
    d. explaining various types of wound closures (1a, 1b, 2c).

8. Demonstrate multiple surgical patient positions by
    a. listing equipment needed for each surgical position (1a, 1b, 2c);
    b. identifying transport methods for surgical patients (1a, 1b, 2c);
    c. performing patient positioning on operating room beds for supine, sitting, prone, lateral, and lithotomy positions (1a, 1b, 2c);
    d. identifying safety precautions for each position (1a, 1b, 2c).

9. Display proper techniques for surgical preps and catheterizations by
    a. demonstrating proper open gloving technique (1a, 1b, 2c);
    b. performing proper surgical prep for abdominal, vaginal, and extremity procedures (1a, 1b, 2c);
    c. performing proper male and female urinary catheterization procedures (1a, 1b, 2c);
    d. showing proper post procedure glove removal technique (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Practice attitudes, work habits, and professionalism as presented in the Surgical Technology Student Code of Conduct by
    a. demonstrating respect for patients, hospital staff, and surgeons (1a, 1b, 1c, 2b, 2c);
    b. demonstrating respect for classmates and faculty (1a, 1b, 1c, 2b, 2c);
    c. practicing within limitations of professional scope of practice (1a, 1b, 2c);
    d. demonstrating the ability to consent to and accept constructive criticism (1a, 1b, 2c);
    e. demonstrating the ability to obtain assignments on time, dress in proper attire, and present self in an alert manner (1a, 1b, 2c).

2. Initiate proper preoperative processes by
    a. performing preliminary hand wash (1a, 1b, 2c);
    b. assembling supplies, equipment, and sutures needed (1a, 1b, 2c);
    c. displaying proper technique in scrubbing, gowning, and gloving (1a, 1b, 2c);
    d. performing proper procedure setup under direction of preceptor (1a, 1b, 2b, 2c);
    e. identifying sterile boundaries and areas (1a, 1b, 2c).

3. Display proper intraoperative techniques quickly by
    a. organizing surgical drapes in proper order of use (1a, 1b, 2c);
    b. performing proper instrument selection, passing, and anticipation during procedure (1a, 1b, 2c);
    c. reacting quickly and properly to breaks in sterile technique (1a, 1b, 2c);
    d. initiating surgical counts at appropriate times (1a, 1b, 2c);
    e. displaying strong surgical conscience at all times (1a, 1b, 2b, 2c).

4. Demonstrate the ability to perform proper postoperative procedures by
    a. displaying proper technique in application of wound dressing (1a, 1b, 2c);
    b. demonstrating removal of drapes using correct technique (1a, 1b, 2c);
    c. displaying proper handling of surgical specimens (1a, 1b, 2c);
    d. performing removal of dirty instruments to decontamination room (1a, 1b, 2c);
    e. following technique for proper disposal of sharps (1a, 1b, 2c);
    f. displaying initiative in preparing for next procedure (1a, 1b, 2c).

SRGT 1405 - Introduction to Surgical Technology

General

Course Rubric	Course Number	Course Title
SRGT	1405	Introduction to Surgical Technology
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
4	4	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0). Orientation to surgical technology theory, surgical pharmacology and anesthesia, technological sciences, and patient care concepts.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Explain the physical, interpersonal, and ethical aspects of the operating room environment; relate basic concepts of surgical pharmacology and anesthesia; identify basic concepts of technological sciences; and demonstrate patient care concepts.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the characteristics of professionalism, ethics, communication, and teamwork by
    a. citing the attributes of professionalism in surgical technology (1a, 1b, 2b, 2c);
    b. distinguishing between licensure and certification and the limitations of practice in each (1a, 1b, 2c);
    c. explaining surgical conscience and ethical behavior in the role of a surgical technologist (1a, 1b, 2c);
    d. demonstrating effective communication abilities (1a, 1b, 2c);
    e. explaining the importance of teamwork in surgical technology (1a, 1b, 2c).
2. Demonstrate an understanding of areas of potential legal liability for surgical technologists by
    a. identifying differences in civil and criminal liability (1a, 1b, 2c);
    b. listing protective safeguards against liability for the surgical technologist (1a, 1b, 2c).
3. Explain procedures for patient care in the operating room by
    a. identifying normal and abnormal lab values and vital signs of patients (1a, 1b, 2c);
    b. listing concerns and needs of special patient populations (1a, 1b, 2c);
    c. describing drugs and equipment used in surgery and anesthesia (1a, 1b, 2c);
    d. explaining the care of patients in specific emergency situations (1a, 1b, 2c).
4. Demonstrate basic patient positions for surgical procedures by
    a. indicating padding and equipment needed for safety in each position (1a, 1b, 2c);
    b. identifying position associated with each basic surgical procedure (1a, 1b, 2c).
5. Discuss guidelines and methods for surgical preps on and draping of surgical patients by
    a. identifying prepping solutions and their properties and indications for use (1a, 1b, 2c);
    b. describing areas to be prepped and special considerations for each (1a, 1b, 2c);
    c. stating methods of hair removal and issues with each (1a, 1b, 2c).
6. Describe care of specimens and safety factors for use of electrosurgery, x-ray and lasers by
    a. stating proper care of different types of surgical specimens (1a, 1b, 2c);
    b. identifying electrosurgical circuit and placement of inactive electrode (1a, 1b, 2c);
    c. citing precautions for use of different types of lasers (1a, 1b, 2c);
    d. explaining safety methods for use with radiation exposure (1a, 1b, 2c).

SRGT 1409 - Fund Perioperative Concepts/Techniques

General

Course Rubric	Course Number	Course Title
SRGT	1409	Fundamentals of Perioperative Concepts and Techniques
Semester Credit Hours	**Lecture Hours**	**Lab Hours**
4	4	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-4-0). In-depth coverage of perioperative concepts such as aseptic/sterile principles and practices, infectious processes, wound healing, and creation and maintenance of the sterile field.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate principles and practices of aseptic techniques; explain infectious processes and concepts of wound healing; and create and maintain a sterile field utilizing basic case preparation and procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of principles and practices of aseptic (sterile) technique by
    a. identifying rules of aseptic technique (1a, 1b, 2c);
    b. explaining concepts of universal precautions as they relate to the operating room (1a, 1b, 2c);
    c. describing purpose and use of personal protective equipment (PPE) (1a, 1b, 2c);
    d. listing pathogens commonly found in the operating room (1a, 1b, 2c);
    e. citing sources of contamination as concerns surgical personnel, patients, and the operating room (1a, 1b, 2c);
    f. listing conditions which increase the patient's risk of postoperative infection (1a, 1b, 2c).
2. Demonstrate an understanding of the principles of decontamination and sterilization by
    a. differentiating among antisepsis, disinfection, and sterility (1a, 1b, 2c);
    b. describing specific procedures used to decontaminate surgical equipment and supplies (1a, 1b, 2c);
    c. identifying hazards and precautions when using chemical disinfectants (1a, 1b, 2c);
    d. describing different types of sterilizers and listing advantages and disadvantages of each type (1a, 1b, 2c, 2e);
    e. reciting parameters (time, pressure, temperature, etc.) for each type of sterilizer (1a, 1b, 2c);
    f. stating necessary factors for wrapping and packaging items for sterilization (1a, 1b, 2c);
    g. naming various control monitors used in the sterilization process (1a, 1b, 2c, 2e).
3. Explain wound healing and wound closure by
    a. naming different types of surgical incisions and the procedures performed through each (1a, 1b, 2c);
    b. identifying mechanisms of wound healing and how wounds are classified (1a, 1b, 2c);
    c. listing functions of suturing materials (1a, 1b, 2c);
    d. differentiating among major types of suturing materials (1a, 1b, 2c);
    e. classifying suturing materials according to types (1a, 1b, 2c);
    f. listing most commonly used surgical needles and their uses (1a, 1b, 2c).

SRGT 1441 - Surgical Procedures I

Requirements
Required Prerequisite(s): SRGT 1405, SRGT 1409, and SRGT 1266

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Relate the specific anatomy and pathology to indications for selected surgical procedures; summarize patient preparation for selected surgical procedures; select instruments, equipment, and supplies and reconstruct the sequence for related surgical procedures; and identify expected outcomes and possible complications for surgical procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of surgical procedures of various specialties by
    a. describing various surgical specialties (1a, 1b, 2c);
    b. showing various surgical specialties (1a, 1b, 2c).
2. Demonstrate understanding of the indication for surgical interventions by
    a. explaining the indications for surgical interventions (1a, 1b, 2a);
    b. evaluating the indications for surgical interventions (1a, 1b, 2c).
3. Demonstrate understanding of surgical complications by
    a. explaining the various surgical complications (1a, 1b, 2c);
    b. determining the differences in surgical complications (1a, 1b, 2c);
    c. predicting the differences in surgical complications (1a, 1b, 2c).
4. Demonstrate understanding of instrumentation used in the operating room by
    a. identifying instrumentation in the operating room (1a, 1b, 2c);
    b. describing instruments in the operating room (1a, 1b, 2c).
5. Demonstrate understanding of the sequence involved in specialty procedures by
    a. identifying steps in specialty procedures (1a, 1b, 2c);
    b. describing steps in specialty procedures (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate job-seeking skills; and identify strengths and weaknesses in preparation for the certification examination.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify strengths and weaknesses in preparation for the national certification examination by
    a. recalling information from the exam study guide (1a, 1b, 2c);
    b. producing a passing grade on the national exam (1a, 1b, 2c).
2. Discuss professional liability insurance coverage by
    a. describing benefits of personal liability coverage (1a, 1b, 2c);
    b. prioritizing the importance of having personal liability insurance (1a, 1b, 2c).
3. Prepare a professional employment portfolio by
    a. producing an introductory cover letter (1a, 1b, 2c, 2e);
    b. building an analytical resume (1a, 1b, 2c, 2e);
    c. assembling a reference list (1a, 1b, 2c, 2e);
    d. creating a post interview follow-up letter (1a, 1b, 2c, 2e).
4. Explain job interviewing techniques and procedures by
    a. identifying different types of interviews (1a, 1b, 2c);
    b. establishing a list of potential interview questions and answers (1a, 1b, 2c).
5. Describe various concepts of death and the professional and personal implications by
    a. discussing methods of dealing with death in the operating room (1a, 1b, 2c);
    b. forming personal methods to deal with death (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Practice attitudes, work habits, and professionalism as presented in the Surgical Technology Student Code of Conduct by
    a. demonstrating respect for patients, hospital staff, and surgeons (1a, 1b, 1c, 2b, 2c);
    b. demonstrating respect for classmates and faculty (1a, 1b, 1c, 2b, 2c);
    c. practicing within limitations of professional scope of practice (1a, 1b, 2c);
    d. demonstrating the ability to consent to and accept constructive criticism (1a, 1b, 2c);
    e. demonstrating the ability to obtain assignments on time, dress in proper attire, and present self in an alert manner (1a, 1b, 2c).
2. Initiate proper preoperative processes by
    a. performing preliminary hand wash (1a, 1b, 2c);
    b. assembling supplies, equipment, and sutures needed (1a, 1b, 2c);
    c. displaying proper technique in scrubbing, gowning, and gloving (1a, 1b, 2c);
    d. performing proper procedure setup under direction of preceptor (1a, 1b, 2b, 2c);
    e. identifying sterile boundaries and areas (1a, 1b, 2c).
3. Display proper intraoperative techniques quickly by
    a. organizing surgical drapes in proper order of use (1a, 1b, 2c);
    b. performing proper instrument selection, passing, and anticipation during procedure (1a, 1b, 2c);
    c. reacting quickly and properly to breaks in sterile technique (1a, 1b, 2c);
    d. initiating surgical counts at appropriate times (1a, 1b, 2c);
    e. displaying strong surgical conscience at all times (1a, 1b, 2b, 2c).
4. Demonstrate the ability to perform proper postoperative procedures by
    a. displaying proper technique in application of wound dressing (1a, 1b, 2c);
    b. demonstrating removal of drapes, using correct technique (1a, 1b, 2c);
    c. displaying proper handling of surgical specimens (1a, 1b, 2c);
    d. performing removal of dirty instruments to decontamination room (1a, 1b, 2c);
    e. following technique for proper disposal of sharps (1a, 1b, 2c);
    f. displaying initiative in preparing for next procedure (1a, 1b, 2c).

SRVY 1301 - Introduction to Surveying

Course Rubric
SRVY

Course Number
1301

Course Title
Introduction to Surveying

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3). An overview of the surveying profession. The history of surveying and its impact on the world. Review of the mathematics used in surveying. Introduction to basic surveying equipment with emphasis on measurements. Instruction on surveying procedures and the limitation of errors. Calculation to determine precision and error of closure.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the surveying profession and its historical impact; apply basic surveying terminology, surveying equipment and measurements; list the steps required in performing a survey; apply mathematical principles and use scientific calculators to calculate survey error and adjustment.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate understanding of the basic concepts, principles, and fundamentals of surveying by
    a. discussing the history of surveying and its application (1a, 1b);
    b. identifying the different classification and types of surveying (1a, 1b).
2. Demonstrate an understanding of the basic math required in surveying by
    a. solving trigonometry and geometry problems (1a, 1b);
    b. applying principles of trigonometry to surveying problems (1a, 1b, 2b, 2c);
    c. calculating unit conversion used in surveying (1a, 1b).
3. Demonstrate an understanding of the scope and responsibilities of a field engineer by
    a. learning fieldworks basics such as safety, note keeping, and instrument care (1a, 1b, 1c, 2b, 2c);
    b. operating surveying equipment such as level, theodolite, total station, EDM, and surveying tape (1a, 1b, 1c, 2a, 2b, 2c, 2e).
4. Demonstrate an understanding of the different methods of determining errors in observations by
    a. differentiating precision and accuracy (1a, 1b);
    b. discussing the different source of errors (1a, 1b);
    c. calculating standard deviation as a means of determining limitation of errors (1a, 1b).
5. Demonstrate an understanding of the different methods of horizontal and vertical measurements by
    a. working with the equipment used in horizontal and vertical measurements (1a, 1b);
    b. applying the different methods of horizontal and vertical measurements (1a, 1b).
6. Demonstrate an understanding of the different methods of calculating areas by
    a. performing calculation of an area of a plot of land using different formulas (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. operating surveying equipment to determine observations to calculate area (1a, 1b, 1c, 2a, 2b, 2c, 2e).
7. Demonstrate an understanding of horizontal and vertical angle measurements by
    a. operating surveying equipment to determine vertical and horizontal measurement (1a, 1b);
    b. differentiating bearing and azimuth (1a, 1b);
    c. calculating latitude and departure (1a, 1b, 2c);
    d. differentiating open and closed traverse (1a, 1b);
    e. calculating areas of closed traverse (1a, 1b, 2c).
8. Demonstrate an understanding of evaluating site condition and topography for sustainable construction by
    a. evaluating a project site (1a, 1b, 2a, 2b, 2c);
    b. discussing the process of developing a project site (1a, 1b);
    c. identifying various remediation strategies of Brownfield site (1a, 1b).

STSC 0111 - Transition to College Success

General

Course Key

Course Rubric
STSC

Course Number
0111

Course Title
Transition to College Success

Semester Credit Hours
1

Lecture Hours
1

Lab Hours
0

Description
(1-1-0) Psychology of learning and success. Examines factors that underlie learning, success, and personal development in higher education. Topics covered include information processing, memory, strategic learning, self-regulation, goal setting, motivation, educational and career planning, and learning styles. Techniques of study such as time management, listening and note taking, text marking, library and research skills, preparing for examinations, and utilizing learning resources are covered. Includes courses in college orientation and developments of students' academic skills that apply to all disciplines. This is a developmental course and cannot be used to fulfill degree requirements.

Academic Course Guide Manual (ACGM)

Description
(3-2-2) A study of the child, family, community, and schools, including parent education and involvement, family and community lifestyles, child abuse, and current family life issues. Course content must be aligned as applicable with State Board for Educator Certification Pedagogy and Professional Responsibilities standards and coincide with the National Association for the Education of Young Children position statement related to developmentally appropriate practices for children from birth through age eight. Requires students to participate in field experiences with children from infancy through age 12 in a variety of settings with varied and diverse populations. The course includes a minimum of 16 hours of field experiences.

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Convert between decimals and fractions; use measuring tools; calculate ratios and proportions in a technical application; transpose linear equations to solve for unknowns.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of how basic arithmetic operations are used in the technical fields by
    a. demonstrating the ability to add, subtract, multiply, and divide integers (1a, 1b);
    b. solving technical applications and problems involving integers (1a, 1b, 2c).
2. Demonstrate an understanding of basic geometric operations by
    a. calculating geometric perimeter, area (not circles), and volume (1a, 1b, 2c);
    b. identifying types of angles and triangles (1a, 1b, 2c);
    c. solving technical application problems involving geometric concepts (1a, 1b, 2c).
3. Demonstrate an understanding of mathematic operations using fractions by
    a. converting improper fractions to mixed numbers (1a, 1b, 2c);
    b. converting mixed numbers into improper fractions (1a, 1b, 2c);
    c. reducing or simplifying fractions (1a, 1b, 2c);
    d. demonstrating the ability to add, subtract, multiply, and divide signed fractions (1a, 1b, 2c);
    e. simplifying complex fractions (1a, 1b, 2c);
    f. solving algebraic equations involving fractions (1a, 1b, 2c);
    g. solving application problems involving fractions (1a, 1b, 2c).
4. Demonstrate an understanding of mathematical operations using decimals by
    a. demonstrating the ability to add, subtract, and multiply signed decimals (1a, 1b, 2c);
    b. rounding decimals and whole numbers (1a, 1b, 2c);
    c. dividing decimals (1a, 1b, 2c);
    d. solving decimal applications involving technical problems (1a, 1b, 2c);
    e. converting fractions to decimals (1a, 1b, 2c);
    f. converting decimals to fractions (1a, 1b, 2c);
    g. ordering and comparing fractions to decimals (1a, 1b, 2c).
5. Demonstrate an understanding of ratios and proportions by
    a. stating ratios in reduced fractional form (1a, 1b, 2c);
    b. solving proportions and proportion applications (1a, 1b, 2c);
    c. solving technical application problems involving ratios and proportions, including converting numbers to different units of measurement (1a, 1b, 2c);
    d. converting English units to metric units and metric units to English units (1a, 1b, 2c).
6. Demonstrate an understanding of percentages by
    a. converting percent to decimal (1a, 1b, 2c);
    b. converting decimal to percent (1a, 1b, 2c);
    c. converting percent to fraction (1a, 1b, 2c);
    d. converting fraction to percent (1a, 1b, 2c);
    e. solving technical application problems involving percent (1a, 1b, 2c).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Solve technical math problems using addition, subtraction, multiplication, and division; convert between whole numbers, fractions, mixed numbers, and decimals; perform calculations involving percents, ratios, and proportions; and convert numbers to different units of measurement (standard and/or metric).

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of how basic arithmetic operations are used in the technical fields by
    a. demonstrating the ability to add, subtract, multiply, and divide integers (1a, 1b);
    b. solving technical applications and problems involving integers (1a, 1b, 2c).
2. Demonstrate an understanding of basic geometric operations by
    a. calculating geometric perimeter, area (not circles), and volume (1a, 1b, 2c);
    b. identifying types of angles and triangles (1a, 1b, 2c);
    c. solving technical application problems involving geometric concepts (1a, 1b, 2c).
3. Demonstrate an understanding of mathematic operations using fractions by
    a. converting improper fractions to mixed numbers (1a, 1b, 2c);
    b. converting mixed numbers into improper fractions (1a, 1b, 2c);
    c. reducing or simplifying fractions (1a, 1b, 2c);
    d. demonstrating the ability to add, subtract, multiply, and divide signed fractions (1a, 1b, 2c);
    e. simplifying complex fractions (1a, 1b, 2c);
    f. solving algebraic equations involving fractions (1a, 1b, 2c);
    g. solving application problems involving fractions (1a, 1b, 2c).
4. Demonstrate an understanding of mathematical operations using decimals by
    a. demonstrating the ability to add, subtract, and multiply signed decimals (1a, 1b, 2c);
    b. rounding decimals and whole numbers (1a, 1b, 2c);
    c. dividing decimals (1a, 1b, 2c);
    d. solving decimal applications involving technical problems (1a, 1b, 2c);
    e. converting fractions to decimals (1a, 1b, 2c);
    f. converting decimals to fractions (1a, 1b, 2c);
    g. ordering and comparing fractions to decimals (1a, 1b, 2c).
5. Demonstrate an understanding of ratios and proportions by
    a. stating ratios in reduced fractional form (1a, 1b, 2c);
    b. solving proportions and proportion applications (1a, 1b, 2c);
    c. solving technical application problems involving ratios and proportions, including converting numbers to different units of measurement (1a, 1b, 2c);
    d. converting English units to metric units and metric units to English units (1a, 1b, 2c).
6. Demonstrate an understanding of percentages by
    a. converting percent to decimal (1a, 1b, 2c);
    b. converting decimal to percent (1a, 1b, 2c);
    c. converting percent to fraction (1a, 1b, 2c);
    d. converting fraction to percent (1a, 1b, 2c);
    e. solving technical application problems involving percent (1a, 1b, 2c).

TRVM 1201 - Customer Sales and Service

Course Key
7816

Course Rubric
TRVM

Course Number
1201

Course Title
Customer Sales and Service

Semester Credit Hours
2

Lecture Hours
2

Lab Hours
0

Course Classification
Workforce Education Course Manual (WECM)

Description
(2-2-0). Practical information and techniques to create excellent customer sales and service unique to the travel public.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Define customer service; identify the elements and steps involved and how they relate directly to sales; define the principles of selling travel; list questions that qualify a client; and identify the process to close a successful sale. Explain the steps of problem solving to effectively handle customer challenges; and define internal and external customer service and how it impacts the success of a business and customer retention.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend the importance of customer service in the hospitality business by
    a. explaining the contribution of customer service as it relates to the traveling public (1a, 1b);
    b. identifying the internal customers in different hospitality businesses (1a, 1b);
    c. identifying the external customers in different hospitality businesses (1a, 1b);
    d. comprehending the difference between customer service and hospitality (1a, 1b).
2. Comprehend the different elements that contribute to customer service by
    a. identifying the service expectations for different segments of the hospitality industry (1a, 1b);
    b. giving examples of the customer service elements and how they directly relate to sales (1a, 1b);
    c. explaining how the different elements of a customer service experience are interrelated (1a, 1b);
    d. comprehending the effects of poor service (1a, 1b);
    e. identifying the benefits of superior service (1a, 1b).
3. Identify the important steps in effectively handling customer challenges by
    a. defining the different participants in customer service (1a, 1b);
    b. explaining the process of communication in customer service (1a, 1b);
    c. explaining how differences in expectations can take place in the hospitality industry (1a, 1b);
    d. comprehending the different methods of handling customer challenges (1a, 1b).
4. Comprehend the recruiting process and how it impacts customer service by
    a. explaining the steps in the recruiting process (1a, 1b);
    b. explaining the importance of forecasting staffing needs (1a, 1b);
    c. defining the factors that encompass a proper forecast (1a, 1b);
    d. identifying the benefits of different types of forecast related to recruiting (1a, 1b);
    e. explaining the benefits of recruiting from internal sources (1a, 1b);
    f. explaining the benefits of recruiting from external sources (1a, 1b).

Course Key
11786

Course Rubric	Course Number	Course Title
TRVM	1300	Introduction to Travel and Tourism

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0)An overview of the travel and tourism industry. Emphasis on travel careers and the impact on society.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the qualifications needed for the many careers in the travel and tourism industry; discuss the history and growth of travel and tourism and how they relate to the marketplace; define the role of governments in the travel industry and identify how tourism is an important source of revenue for a destination; describe types of geography as it relates to travelers, and identify types of travel and travelers; identify the components of the travel and tourism industry, define the channels of distribution, and discuss how the travel product is promoted and marketed.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Define key terms used in the travel business (1a, 1b).
2. Explain what each major segment of the travel industry represents (1a, 1b).
3. Describe how travel is typically sold (1a, 1b).
4. Analyze different kinds of consumers and what satisfies their travel needs (1a, 1b).
5. Define airline industry terminology (1a, 1b).
6. Explain how the various types of aircraft used in commercial aviation differ (1a, 1b).
7. Categorize airline types (1a, 1b).
8. Describe what factors affect air ticket prices (1a, 1b).
9. Decipher the codes of major airports (1a, 1b).
10. Describe airport procedures (1a, 1b).
11. Classify the many kinds of lodging (1a, 1b).
12. Define key terms used in the lodging industry (1a, 1b).
13. Explain the many factors that determine the cost of lodging (1a, 1b).
14. Describe how lodging is sold (1a, 1b).
15. Explain how the food services industry relates to hospitality, travel, and tourism (1a, 1b).
16. Explain why consumers use travel agents (1a, 1b).
17. Describe the different kinds of travel agencies (1a, 1b).
18. Contrast the skills of a leisure agent with one who deals primarily with business travelers (1a, 1b).
19. List the sources that agents use to obtain information (1a, 1b).
20. Describe the many kinds of tours that exist (1a, 1b).
21. Explain why tour manager jobs are in such demand (1a, 1b).
22. Determine what motivates people to take a tour (1a, 1b, 2c).
23. Explain how tours are priced and sold (1a, 1b).
24. Determine why people go on cruises (1a, 1b, 2c).
25. Describe different types of cruise lines and ships (1a, 1b).
26. Reveal what a cruise experience is like (1a, 1b).
27. Explain how cruises are priced and sold (1a, 1b).
28. Explain the motives behind renting cars and choosing rail travel (1a, 1b).
29. Describe the car rental and rail travel industries and experiences (1a, 1b).
30. Interpret how car rentals and train travel are priced (1a, 1b, 2c).
31. Identify the many types of destination marketing organizations and what they typically do (1a, 1b).
32. Describe how other suppliers fit into the travel industry landscape (1a, 1b).
33. Relate geographic principles to travel concerns (1a, 1b).
34. Define major geographic- and destination-related terms (1a, 1b).
35. Locate the world's significant tourist destinations (1a, 1b).
36. Identify where some of the world's great attractions are (1a, 1b).
37. Explain the different types of marketing and the six steps that the marketing cycle usually requires (1a, 1b).
38. Distinguish between transactional and consultative selling, and apply the steps that each entails (1a, 1b, 3a).
39. Describe how service is separate from, and overlaps, sales (1a, 1b).
40. Practice the seven steps necessary to achieve service excellence (1a, 1b).
41. Identify what CRS and GDS systems do and how these tools support the travel industry (1a, 1b).
42. Explain how the internet has changed the way people buy travel (1a, 1b).
43. Describe how social media has affected the relationship between customer and supplier (1a, 1b).
44. Clarify the many applications CRM programs have in the travel business (1a, 1b).
45. Explain the procedures and documents associated with border crossings (1a, 1b).
46. Interpret and apply the basic principles of currencies and exchange rates (1a, 1b).
47. Address customer health and safety concerns (1a, 1b).
48. Prepare for the changes in travel to come (1a, 1b).

TRVM 1327 - Special Events Design

General

Course Key
6424

Course Rubric	Course Number	Course Title
TRVM	1327	Special Events Design

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0). The development of a special event from the conceptual stage through completion. Emphasis on industry terminology, factors to consider when planning a special event, and contingency plans.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify key terms used in planning special events. Determine event objectives and budget requirements. Compare the differences in planning a special event and a convention/meeting. Identify suppliers including off-site venue, food and beverage providers, sanitation, entertainment, and security. Determine permits, insurance, liabilities associated with planning a special event.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend the roots and trends in the special event industry by
    a. comprehending and understanding the historic roots of celebration (1a, 1b);
    b. identifying the demographic changes affecting global event management growth (1a, 1b);
    c. identifying new and emerging career opportunities (1a, 1b);
    d. identifying industry certification programs (1a, 1b).
2. Identify the basic models utilized in special event planning by
    a. recalling the five phases of the modern event management process (1a, 1b, 2a);
    b. identifying a SWOT analysis (1a, 1b);
    c. comprehending the importance of a needs assessment (1a, 1b, 2a);
    d. identifying how stakeholders best receive information (1a, 1b, 2a, 2b);
    e. comprehending a gap analysis (1a, 1b).
3. Explain how to develop and implement the event plan by
    a. demonstrating how to conduct research for a special event (1a, 1b, 2c);
    b. comprehending how to design a program creatively (1a, 1b);
    c. identifying the methodology to develop an appropriate theme for an event (1a, 1b, 2d, 2e);
    d. comprehending how to establish and manage an effective strategic plan (1a, 1b).
4. Comprehend the role of event leadership through human resource and time management by
    a. identifying the contributions of human resources in the special event business (1a, 1b);
    b. identifying the leadership characteristics in an event leader (1a, 1b, 2c);
    c. comprehending how to overcome communication challenges (1a, 1b, 1c);
    d. recalling the proper procedures used for recruiting quality staff and volunteers (1a, 1b, 2d);
    e. comprehending how to develop effective organizational charts (1a, 1b);
    f. identifying how to improve time management (1a, 1b).
5. Comprehend basic financial administration by
    a. comprehending basic event management financial and accounting terminology (1a, 1b);
    b. recalling the importance of the event balance sheet and income statement (1a, 1b);
    c. comprehending the method of estimate break-even point for an event (1a, 1b, 2c);
    d. identifying how to develop a realistic budget (1a, 1b).
6. Comprehend how to manage vendors for a special event by
    a. recalling what an RFP is and how it is to be utilized with vendors (1a, 1b);
    b. comprehending how to source vendors (1a, 1b);
    c. demonstrating how to coordinate technical resources, including audio visual, lighting, sound, and special effects (1a, 1b);
    d. comprehending how to construct a production schedule (1a, 1b).
7. Identify the potential liabilities associated with different events by
    a. identifying the standard event regulations and procedures (1a, 1b);
    b. distinguishing the different types of legal agreements in the special event segment (1a, 1b);
    c. comprehending how to obtain the necessary permits for a special event (1a, 1b);
    d. comprehending how to develop and manage risk management procedures (1a, 1b).

Course Key
12993

Course Rubric	Course Number	Course Title
TRVM	2301	Introduction to Convention/Meeting Management

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Overview of the meetings and convention industry and the various aspects and skills involved in planning and managing meetings, conventions, and expositions. Emphasis on types of meetings, markets, industry suppliers, budget and program planning, site selection and contract negotiations, registration and housing, food and beverage requirements, function and meeting room setup, and audiovisual requirements.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Review basic site-selection factors; identify major aspects of contract negotiations; explain housing requirements and meeting registration procedures. Review basic food and beverage factors; identify basic meeting function set-ups and requirements; and analyze post-meeting evaluations.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Comprehend the roots and trends in the special event industry by
    a. comprehending and understanding the historic roots of celebration (1a, 1b);
    b. identifying the demographic changes affecting global event management growth (1a, 1b);
    c. identifying new and emerging career opportunities (1a, 1b);
    d. identifying industry certification programs (1a, 1b).
2. Identify the basic models utilized in special event planning by
    a. recalling the five phases of the modern event management process (1a, 1b, 2a);
    b. identifying a SWOT analysis (1a, 1b);
    c. comprehending the importance of a needs assessment (1a, 1b, 2a);
    d. identifying how stakeholders best receive information (1a, 1b, 2a, 2b);
    e. comprehending a gap analysis (1a, 1b).
3. Explain how to develop and implement the event plan by
    a. demonstrating how to conduct research for a special event (1a, 1b, 2c);
    b. comprehending how to design a program creatively (1a, 1b);
    c. identifying the methodology to develop an appropriate theme for an event (1a, 1b, 2d, 2e);
    d. comprehending how to establish and manage an effective strategic plan (1a, 1b).
4. Comprehend the role of event leadership through human resource and time management by
    a. identifying the contributions of human resources in the special event business (1a, 1b);
    b. identifying the leadership characteristics in an event leader (1a, 1b, 2c);
    c. comprehending how to overcome communication challenges (1a, 1b, 1c);
    d. recalling the proper procedures used for recruiting quality staff and volunteers (1a, 1b, 2d);
    e. comprehending how to develop effective organizational charts (1a, 1b);
    f. identifying how to improve time management (1a, 1b).
5. Comprehend basic financial administration by
    a. comprehending basic event management financial and accounting terminology (1a, 1b);
    b. recalling the importance of the event balance sheet and income statement (1a, 1b);
    c. comprehending the method of estimate break-even point for an event (1a, 1b, 2c);
    d. identifying how to develop a realistic budget (1a, 1b).
6. Comprehend how to manage vendors for a special event by
    a. recalling what an RFP is and how it is to be utilized with vendors (1a, 1b);
    b. comprehending how to source vendors (1a, 1b);
    c. demonstrating how to coordinate technical resources, including audio visual, lighting, sound, and special effects (1a, 1b);
    d. comprehending how to construct a production schedule (1a, 1b).
7. Identify the potential liabilities associated with different events by
    a. identifying the standard event regulations and procedures (1a, 1b);
    b. distinguishing the different types of legal agreements in the special event segment (1a, 1b);
    c. comprehending how to obtain the necessary permits for a special event (1a, 1b);
    d. comprehending how to develop and manage risk management procedures (1a, 1b).

TRVM 2345 - Advanced Topics in Tourism

General

Course Key

Course Rubric	Course Number	Course Title
TRVM	2345	Advanced Topics in Tourism

Semester Credit Hours	Lecture Hours	Lab Hours
3	3	0

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-3-0) Provides the students with an in-depth look into the aspects of concierge, destination management companies, incentives meeting and travel planning, attractions management, special event, festival planning, and eco-tourism. Included are field trips, guest speakers, and case studies.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: List the duties and responsibilities of a concierge; examine the role that destination management companies play in the tourist industry; explain the fundamentals of incentive travel planning and explain the fundamentals of special event planning and festivals; solve problems related to travel and event planning; and support eco-tourism development.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Analyze the debate on the acceptance of sustainable tourism, exploring barriers and recommended solutions by
    a. defining sustainable tourism (1a, 1b);
    b. identifying and exploring barriers to sustainable tourism (1a, 1b, 1c, 2a, 2d);
    c. recommending solutions for sustainable tourism (1b, 1c, 2c).
2. Define the differences in sustainable and eco-tourism, determine the role of ecology in sustainable tourism, and critically evaluate the impact this has had on the events industry by
    a. defining the differences in sustainable and eco-tourism (1a, 1b, 2d, 2c, 2d);
    b. understanding the role of eco-tourism on the events industry (1a, 1b, 2a, 2c, 2d);
    c. demonstrating the role of ecology in sustainable tourism (1a, 1b, 2a, 2d);
    d. evaluating critically the impact of eco-tourism on the events industry (1a, 1b, 2a, 2c).
3. Describe the stakeholders and their influence on tourism development, defining how this has shaped tourism policy by
    a. understanding who the stakeholders are by evaluating where they live and work (1a, 1b, 2b, 2d);
    b. evaluating the ethical considerations of policy within the development of tourism (1a, 1b, 2b, 2c);
    c. understanding the role of the stakeholder and their influence on tourism development in the city, state, and/or national arena (1a, 2a, 2d).
4. Report on and critique sustainable tourism among the different geographical areas by
    a. organizing and monitoring sustainable tourism practices in geographical areas (1a, 2a, 2d);
    b. understanding how climate change relates to sustainable tourism within each of the geographical areas (1a, 1b, 2a, 2c);
    c. acquiring and evaluating information with respect to the technologies available (1a, 1b, 2e).
5. Identify existing destination assets of a destination and determine its competitive advantage and sustainable principles by
    a. monitoring current trends, including advantages/disadvantages of the destination (1a, 1b, 2a, 2c);
    b. understanding sustainable principles within each geographic region (1a, 2a, 2c).
6. Identify and report on sustainable trends within major hospitality/tourism-based companies by
    a. organizing sustainable tourism trends by financial information (1a, 2a, 2d).
7. Analyze methods to reduce the negative impact to the environment of a host destination due to tourism development by
    a. understanding the local authorities and consumer agencies that could help a host destination reduce the negative impact of sustainable tourism (1a, 1c, 2a, 2d).
8. Evaluate ethical considerations of the environment and how they influence a host destination (1a, 1b, 2b, 2d).

VIRT 1310 - Principles Interventional Radiology I

Lecture Hours
2

Lab Hours
2

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-2) Introduction to the diagnostic procedures used in the interventional lab including patient preparation and monitoring, angiographic equipment set-up, and vascular procedures.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: Demonstrate the patient preparation for a vascular diagnostic procedure; describe the procedure for monitoring a patient during a vascular procedure; operate the angiographic equipment; and perform the setup of equipment and supplies for a vascular diagnostic procedure.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate ability to prepare patient by
    a. explaining procedure and radiation risks to the patient (1a, 1b, 1c, 2b, 2c, 2d);
    b. explaining selection and assessment of access site (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    c. explaining sterile cleansing and draping process of selected access site (1a, 1b, 1c, 2a, 2b, 2c, 2d).
2. Describe the procedure for monitoring a patient during a vascular procedure by
    a. connecting the patient to physiologic monitoring equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining the normal and abnormal physiologic monitoring values (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    c. explaining why and how these values may change during a procedure (1a, 1b, 1c, 2b, 2c, 2d, 2e).
3. Demonstrate understanding and ability to set up and operate angiographic equipment by
    a. explaining the application, advantages, and disadvantages of ceiling mounted, floor mounted and biplane units (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining operation of table side controls for table, detector, and electronic functions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining application of table side controls for table, detector, and electronic functions (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge of various supplies utilized in the interventional suite by
    a. describing types and characteristics of catheters, guidewires, needles, vascular access devices, accessory devices, and closure devices (1a, 1b, 1c, 2a, 2b, 2c).
5. Demonstrate ability to set up for vascular diagnostic procedures in the interventional lab by
    a. selecting appropriate supplies based upon procedure to be performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. selecting appropriate angiographic equipment, accessory equipment, and technical factors based upon procedure to be performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining process of creating and maintaining a sterile field throughout entire procedure (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: Describe the operation of interventional radiology equipment, define routine protocols used in basic vascular procedures; describe the basic principles used in the vascular interventional lab; and recall the electronics and instrumentation used in the vascular interventional lab.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate knowledge and understanding of the automatic pressure injector by
    a. identifying the parts and their functions (1a, 1b, 1c, 2b, 2c, 2d);
    b. describing application for intra-procedural use (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. selecting appropriate values for patient injection (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate knowledge and understanding of ultrasound equipment by
    a. identifying the parts and their functions (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    b. explaining probe selection, system controls, and cleaning (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate knowledge and understanding of interventional radiology imaging equipment by
    a. explaining the operation and application of the various types (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining the cleaning and preventive maintenance procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. explaining the mechanical functions and protocols for use (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. explaining the electronic functions, instrumentation, and protocols for use (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge of various supplies utilized in the interventional suite by
    a. describing types and characteristics of catheters, guidewires, needles, vascular access devices, accessory devices, and closure devices (1a, 1b, 1c, 2a, 2b, 2c).
5. Describe the principles of x-ray production and image acquisition by
    a. describing the functions that can be used to alter imaging (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity, or culture (1a, 1b, 1c, 2b, 2c, 2d).
2. Demonstrate competency while participating in interventional procedures under the supervision of qualified interventional radiology staff by
    a. applying principles of radiation protection to achieve ALARA (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. applying and maintaining the appropriate medical asepsis and sterile technique (1a, 1b, 1c, 2a, 2b, 2c);
    c. maintaining patient confidentiality standards and meeting HIPAA requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to recall and apply previously learned didactic, lab, and clinical experiences by
    a. accomplishing appropriate number of procedure repetitions as listed on the ARRT Vascular-Interventional Radiography Clinical Experience Requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. accomplishing task items as listed on the ARRT Vascular-Interventional Radiography Task Inventory (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: Perform the setup of advanced vascular diagnostic procedures in the interventional lab; perform quality assurance activities to ensure proper patient care, image quality, and equipment function; and demonstrate radiation safety practices required in the interventional lab.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate ability to play an active role in the performance of select vascular and nonvascular interventional procedures by
    a. explaining the roles and duties of each team member (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Identify and demonstrate ability to properly use radiation safety equipment to reduce dose for patients and staff by
    a. demonstrating donning appropriately sized lead apron and accessories (1a, 1b, 1c, 2a);
    b. demonstrating positions of mobile lead barriers (1a, 1b, 1c, 2a, 2b, 2d);
    c. explaining electronic radiation limiting devices (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate understanding and ability to position the patient and associated accessories to ensure intra-procedural patient care, image quality, and equipment function by
    a. describing the position of the patient based upon procedure being performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. describing location of monitoring leads and cables as to not interfere with sterile field and imaging equipment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. describing positioning aids used for patient safety and comfort (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Demonstrate knowledge of various supplies utilized in the interventional suite by
    a. describing types of catheters, stents, wires, and balloons associated with vascular and nonvascular advanced procedures (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
5. Demonstrate ability to set up for advanced diagnostic procedures in the interventional lab by
    a. selecting appropriate supplies based upon procedure to be performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining process of creating and maintaining a sterile field throughout the procedure (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. selecting appropriate angiographic equipment, accessory equipment, and technical factors based upon procedure to be performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: Perform the setup of both advanced and therapeutic vascular interventional procedures; demonstrate the use of advanced vascular equipment; and identify emerging applications of vascular interventional procedures.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate ability to play an active role in the performance of advanced and therapeutic vascular and nonvascular interventional procedures by
    a. explaining the roles and duties of each team member (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
2. Demonstrate ability to set up for advanced and therapeutic vascular and nonvascular interventional procedures by
    a. explaining selection of appropriate supplies based upon the procedure to be performed (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. explaining selection of appropriate accessory equipment based upon the procedure to be performed (1a, 1b, 1c, 2a, 2b, 2d, 2e).
3. Demonstrate knowledge and understanding of various advanced vascular equipment by
    a. describing construction, function, and application of atherectomy devices, stent grafts, thrombectomy devices, and neuro interventional supplies (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
4. Differentiate between older technology and newer emerging applications for procedures performed in the vascular interventional suite (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Description
(3-2-2) Study of advanced and independent patient care skills, to include management of tubes and lines, advanced pharmacology interactions, and evaluation of the overall pathophysiological process of the patient.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
Course content is guided by the current Content Specifications for the Vascular-Interventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: Perform advanced patient care skills; manage all tubes and lines found in or on patients that provide care and support; recognize pharmacologic interactions both wanted and adverse; and evaluate the patient for overall pathophysiologic process.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. List the required pre-procedural patient information required by
    a. describing lab values required and impact on procedure (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    b. describing vital signs required and impact on procedure (1a, 1b, 1c, 2b, 2c, 2d, 2e);
    c. describing allergies and pre-procedural treatment and impact on procedure (1a, 1b, 1c, 2b, 2c, 2d, 2e).
2. Demonstrate knowledge and understanding of infection control by
    a. defining terms related to infection control (1a, 1b, 1c, 2b, 2c, 2d);
    b. demonstrating use of proper personal protective equipment (PPE) for each type of isolation (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. defining and determining appropriate post procedural cleaning based on transmission method (1a, 1b, 1c, 2a, 2b, 2c, 2d).
3. Identify and describe specific types of tubes, lines, and collection devices; and appropriate management of each type (1a, 1b, 1c, 2b, 2c, 2d, 2e).
4. Describe contrast agent reactions and complications, and associated treatment (1a, 1b, 1c, 2b, 2c, 2d).
5. Demonstrate knowledge and understanding of medications used in the interventional lab by
    a. identifying types and routes (1a, 1b, 1c, 2b, 2c, 2d);
    b. describing indications and contraindications (1a, 1b, 1c, 2b, 2c, 2d);
    c. describing complications (1a, 1b, 1c, 2b, 2c, 2d).
6. Identify pathologies commonly seen in interventional radiology and explain the associated physiology (1a, 1b, 1c, 2b, 2c, 2d).

Course Learning Outcomes
Course content is guided by the current Content Specifications for the VascularInterventional Radiography Examination from the American Registry of Radiologic Technologists and Cardiac-Interventional and Vascular-Interventional Curriculum from the American Society of Radiologic Technologists.

End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity, or culture (1a, 1b, 1c, 2b, 2c, 2d).
2. Demonstrate competency while participating in interventional procedures under the supervision of qualified interventional radiology staff by
    a. applying principles of radiation protection to achieve ALARA (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. applying and maintaining the appropriate medical asepsis and sterile technique (1a, 1b, 1c, 2a, 2b, 2c);
    c. maintaining patient confidentiality standards and meeting HIPAA requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Demonstrate the ability to recall and apply previously learned didactic, lab, and clinical experiences by
    a. accomplishing appropriate number of procedure repetitions as listed on the ARRT Vascular-Interventional Radiography Clinical Experience Requirements (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. accomplishing task items as listed on the ARRT Vascular-Interventional Radiography Task Inventory (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the basic nutrients; discuss the role of nutrients in growth and development and health maintenance; and identify diet therapy associated with disease processes.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Discuss the role of the nurse in promoting good nutrition (1a, 1b, 2b, 2c).
2. Explain six elements of essential nutrients and the incorporation in nursing practice (1a, 1b, 2b, 2c).
3. Explain the process of digestion, absorption, and metabolism (1a, 1b, 2b, 2c).
4. Evaluate function, role, and food sources of protein, carbohydrate, fat, fiber, vitamins, and minerals (1a, 1b, 2b, 2c).
5. Discuss changes in nutrient needs throughout the life cycle, and suggest ideas to ensure adequate nutrition during each stage of life (1a, 1b, 2a, 2b, 2c).
6. Analyze factors affecting food habits (1a, 1b, 2a, 2b, 2c).
7. Explain dietary management for a patient with gastrointestinal disorders, heart diseases, diabetes, kidney disease, cancer, and HIV (1a, 1b, 2a, 2b, 2c).
8. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. D. Knowledge 1–3
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1, 4–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–9, 11–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
        8. H. Knowledge 2–4
    c. Patient Safety Advocate:
        1. A. Knowledge 1–6
        2. B. Knowledge 2–4
    d. Member of the Health Care Team:
        1. A. Knowledge 1, 4, 5
        2. B. Knowledge 1–3
        3. C. Knowledge 1–4, 6–8
        4. D. Knowledge 1
        5. E. Knowledge 2–3

Recommended Corequisite(s): VNSG 1432, VNSG 1234, VNSG 1462, and VNSG 1230

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe the role of the licensed vocational nurse in multidisciplinary settings inclusive of basic principles of leadership and management; discuss the role of professional organizations and regulatory agencies; explain the Texas Board of Nursing Rules and Regulations and the Nurse Practice Act; and identify criteria and appropriate resources for continuing education.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the roles of the licensed vocational nurse in multi-disciplinary settings (1a, 1b, 2c, 2d).
2. Summarize the basic principles of leadership and management as they relate to the vocational nurse (1a, 1b, 1c, 2a, 2b, 2c).
3. Complete application process for licensure and the NCLEX-PN (1a, 1b, 2a, 2c, 2e).
4. Pass the Texas Jurisprudence Exam (1a, 1b, 2a, 2c, 2e).
5. Discuss the role of health care organizations and regulatory agencies (1a, 1b, 2c, 2d).
6. Develop a plan to improve the health care system in the United States (1a, 1b, 2a, 2c, 2d).
7. Explain the function of each health care team member (1a, 1b, 2a, 2c, 2d).
8. Apply understanding of nursing theory, nursing practice, and the concepts of transcultural nursing (1a, 1b, 2a, 2c, 2d).
9. Summarize ethical and legal issues applicable to practice (1a, 1b, 2a, 2c, 2d).
10. Develop a plan to resolve challenges in the workplaces (1a, 1b, 1c, 2a, 2b, 2c, 2d).
11. Discuss several methods to maintain competence to practice nursing (1a, 1b, 2a, 2c, 2d, 2e).
12. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5
        4. D. Knowledge 1–4
        5. B. Clinical Judgement and Behaviors 1
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
        8. H. Knowledge 1–7
    c. Patient Safety Advocate:
        1. A. Knowledge 1–6
        2. B. Knowledge 1–4
        3. C. Knowledge 1–2
        4. D. Knowledge 1
        5. E. Knowledge 1–2
        6. F. Knowledge 1–2
    d. Member of the Health Care Team:
        1. A. Knowledge 1–5
        2. B. Knowledge 1–4
        3. C. Knowledge 1–8
        4. D. Knowledge 1–4

Recommended Corequisite(s): VNSG 1432, VNSG 1234, VNSG 1462, and VNSG 1219

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Discuss human reproduction and fetal development as related to the normal aspects of childbearing; identify common complications of the mother and newborn during prenatal, antenatal, and postnatal periods; and relate characteristics of the normal newborn and associated nursing interventions to meet identified health care needs utilizing the nursing process and clinical judgment model.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the roles and responsibilities of the practical nurse in caring for pregnant women and neonates in a variety of health care settings, including the effects of illness and medication in the pregnant woman, growing fetus, and the neonate (1a, 1b, 1c, 2b).
2. Analyze labor and explain physiologic and psychological responses to labor (1a, 1b, 1c, 2b).
3. Evaluate the intrapartum patient's needs and relate physiological, psychological, and cultural factors (1a, 1b, 1c, 2b).
4. Analyze extra-uterine adaptation and describe body system changes after birth to include the immune, hematologic, renal, endocrine, gastrointestinal, hepatic, and neurological systems (1a, 1b, 1c, 2b).
5. Analyze ongoing newborn needs including methods to promote newborn safety in the hospital (1a, 1b, 1c, 2b).
6. Apply knowledge and skills to support breastfeeding newborns (1a, 1b, 1c, 2b).
7. Analyze postpartum physiological and psychosocial needs (1a, 1b, 1c, 2b).
8. Describe physiological and psychosocial changes which occur during pregnancy (1a, 1b, 1c, 2b).
9. Compare methods of fetal surveillance during labor (1a, 1b, 1c, 2b).
10. Evaluate intrapartum pain management (1a, 1b, 1c, 2b).
11. Analyze labor induction/augmentation (1a, 1b, 1c, 2b).
12. Explain postpartum complications and risk factors (1a, 1b, 1c, 2b).
13. Explain obstetrical emergencies (1a, 1b, 1c, 2b).
14. Analyze antepartum complications (1a, 1b, 1c, 2b).
15. Explain newborn complications and risk factors (1a, 1b, 1c, 2b).
16. Identify common health promotion teaching needs (1a, 1b, 1c, 2b).
17. Compare contraception methods (1a, 1b, 1c, 2b).
18. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5
        4. D. Knowledge 1–4
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
        8. H. Knowledge 1–7
    c. Patient Safety Advocate:
        1. A. Knowledge 1–6
        2. B. Knowledge 1–4
        3. C. Knowledge 1–2
        4. D. Knowledge 1
        5. E. Knowledge 1–2
        6. F. Knowledge 1–2
    d. Member of the Health Care Team:
        1. A. Knowledge 1–5
        2. B. Knowledge 1–4
        3. C. Knowledge 1–8
        4. D. Knowledge 1–4
        5. E. Knowledge 1–3
        6. F. Knowledge 1–2, 4
        7. G. Knowledge 1–4

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify safety principles related to childcare; discuss primary nursing care of the pediatric patient and family during health and disease; and apply concepts of growth and development to the care of pediatric patients utilizing the nursing process and clinical judgement model.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe potential roles for a pediatric nurse in a variety of pediatric settings (1a, 1b, 1c, 2b).
2. Describe adaptation of nursing principles of CPR and mediation administration, math application, and infection control in the pediatric population (1a, 1b, 1c, 2b, 2c, 2e).
3. Differentiate pediatric differences in various systems (1a, 1b, 1c, 2b).
4. Apply an age-appropriate approach to the assessment process (1a, 1b, 1c, 2b).
5. Identify factors which influence growth and development (1a, 1b, 1c, 2b).
6. List potential injurious situations by age group and determine measures to promote safety (1a, 1b, 1c, 2b).
7. Demonstrate an understanding of pediatric cognitive and emotional impairment (1a, 1b, 1c, 2b).
8. Demonstrate an understanding of pediatric central nervous system or sensory dysfunction (1a, 1b, 1c, 2b).
9. Utilize basic understanding of pediatric cardiac function and dysfunction (1a, 1b, 1c, 2b).
10. Demonstrate basic understanding of respiratory alterations in the pediatric patient (1a, 1b, 1c, 2b).
11. Demonstrate an understanding of immune system, blood, and lymphatic alterations, identifying special considerations in the pediatric patient (1a, 1b, 1c, 2b).
12. Demonstrate an understanding of pediatric gastrointestinal alterations (1a, 1b, 1c, 2b).
13. Demonstrate an understanding of pediatric genitourinary function and alterations (1a, 1b, 1c, 2b).
14. Demonstrate an understanding of pediatric integumentary alterations and clinical manifestations (1a, 1b, 1c, 2b).
15. Identify disorders which result in musculoskeletal dysfunction (1a, 1b, 1c, 2b).
16. Comprehend pediatric communicable disease principles, including vaccination and health promotion/disease prevention (1a, 1b, 1c, 2b).
17. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the characteristics of mental health; identify common mental illness and maladaptive behaviors; describe trends in psychotherapeutic treatment; discuss the application of therapeutic communication skills; and assist in the formulation of a plan of care for the individual with mental illness or maladaptive behavior using clinical judgement.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Identify the roles and responsibilities of the practical nurse in caring for clients with alterations in their mental health/wellness.
2. Explain the concepts of psychiatric mental health nursing (1a, 1b, 2a, 2c).
3. Explain the nurse/patient relationship and describe techniques that enhance communication and techniques that obstruct communication (1a, 1b, 2a, 2c).
4. Demonstrate knowledge of psychopharmacologic agents and mental illness (1a, 1b, 2a, 2c).
5. Explain mental health disorders as they relate to children and adolescents (1a, 1b, 2a, 2c).
6. Comprehend nursing care for the patient with anger and aggression problems and explain the impact and implications of crisis in a patient, family, or community (1a, 1b, 2a, 2c).
7. Identify self-destructive (suicidal) behavior and assess for risk factors (1a, 1b, 2a, 2c).
8. Examine nursing attitudes toward sexual abuse and family violence and explore family and domestic violence and its impact on society (1a, 1b, 2a, 2c).
9. Define types of anxiety disorders and associated symptoms, as well as adaptive and maladaptive behaviors (1a, 1b, 2a, 2c).
10. Describe the types and identify symptoms of depressive disorders (1a, 1b, 2a, 2c).
11. Explain bipolar disorders (1a, 1b, 2a, 2c).
12. Understand substance and addictive-related disorders and define abuse, dependency, intoxication, withdrawal, and tolerance (1a, 1b, 2a, 2c).
13. Differentiate mood disorders, psychotic disorders, and personality disorders (1a, 1b, 2a, 2c).
14. Comprehend somatic and eating disorders (1a, 1b, 2a, 2c).
15. Explain the impact and implications of neurocognitive dysfunction to the individual, family, and community across the life span (1a, 1b, 2a, 2c).
16. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–4
        4. D. Knowledge 1–4
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
        8. H. Knowledge 1–7
    c. Patient Safety Advocate:
        1. A. Knowledge 1–5
        2. B. Knowledge 1–4
        3. C. Knowledge 1–2
        4. E. Knowledge 1–2
    d. Member of the Health Care Team:
        1. A. Knowledge 1–5
        2. B. Knowledge 1–4
        3. C. Knowledge 1–8
        4. D. Knowledge 1
        5. E. Knowledge 2–3

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify roles and legal, ethical, and professional responsibilities of a vocational nurse as a member of the health care team in a variety of health care settings; identify characteristics of a therapeutic nurse/patient relationship; examine positive nurse/patient mental health practices emphasizing cultural and spiritual diversity, and patient preference; relate the history of nursing to the present day; and describe the components of the nursing process using clinical judgement model.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Describe the purpose, role, and responsibilities of practical and vocational nursing (1a, 1b, 2a, 2b, 2c).
2. Discuss the legal and ethical aspects of nursing (1a, 1b, 2a, 2b, 2c).
3. Discuss the purpose of documentation and reporting (1a, 1b, 2b, 2c).
4. Explain the communication process (1a, 1b, 2a, 2b, 2c).
5. Use critical thinking in a systematic, problem-solving process (1a, 1b, 2a, 2b, 2c).
6. Explain the nursing process and its use in nursing practice (1a, 1b, 2a, 2b, 2c).
7. Explain cultural, religious, and spiritual influences in patient care (1a, 1b, 2a, 2b, 2c).
8. Explain infection prevention and control measures (1a, 1b, 2a, 2b, 2c).
9. Demonstrate personal accountability and responsibility for providing safe care (1a, 1b, 2a, 2b, 2c).
10. Explain pain management and rest/sleep needs (1a, 1b, 2a, 2b, 2c).
11. Explain the role of nurse in maintaining fluid/electrolytes and acid/base balance (1a, 1b, 2a, 2b, 2c).
12. Explain the role of nursing care during the grieving and dying processes (1a, 1b, 2a, 2b, 2c).
13. Analyze health promotion and disease prevention in the older adult patient (1a, 1b, 2a, 2b, 2c).
14. Practice activities that promote the development and practice of professional nursing (1a, 1b, 2a, 2b, 2c, 2d, 2e).
15. Incorporate clinical reasoning and knowledge based on associate nursing program of study and evidence-based practice outcomes as a basis for decision making in nursing practice (1a, 1b, 2a, 2b, 2c, 2d, 2e).
16. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5
        4. D. Knowledge 1–4
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
        8. H. Knowledge 1–7
    c. Patient Safety Advocate:
        1. A. Knowledge 1–6
        2. B. Knowledge 1–4
        3. C. Knowledge 1–2
        4. D. Knowledge 1
        5. E. Knowledge 1–2
        6. F. Knowledge 1–2
    d. Member of the Health Care Team:
        1. A. Knowledge 1–5
        2. B. Knowledge 1–4
        3. C. Knowledge 1–8
        4. D. Knowledge 1–4
        5. E. Knowledge 1–3
        6. F. Knowledge 1–4

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate safe and competent basic nursing skills; describe how each step of the nursing process and clinical judgement model relates to nursing care; and discuss the implementation of basic nursing skills in a variety of health care settings.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Demonstrate competency in theory of basic nursing skills (1a, 1b, 1c, 2a, 2b, 2c).
2. Demonstrate 100% competency in the following basic nursing skills:
    a. performing hand hygiene (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. preparing for isolation (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    c. performing surgical hand hygiene with preparing a sterile field (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    d. performing the physical assessment (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. collecting the specimen (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    f. performing diagnostic tests (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    g. measuring intake and output (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. surgical wound care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    i. administering medications (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    j. caring patients with alterations in health:
        1. oxygen administration (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
        2. tracheostomy care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
        3. catheterization and its care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
        4. insertion of NG tube and its care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
        5. performing colostomy, ileostomy, and urostomy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    k. administering nasogastric tube feeding (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    l. performing venipuncture and initiating IV therapy (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
3. Discuss the delivery of basic nursing skills in a variety of health care settings (1a, 1b, 1c, 2a, 2b, 2c).
4. Demonstrate self-directed behaviors for client safety in a simulated nursing environment (1a, 1b, 1c, 2a, 2b, 2c).
5. Demonstrate professional behavior by showing respect for others in a simulated nursing environment (1a, 1b, 1c, 2a, 2b, 2c).
6. Identify caring behaviors while delivering simulated nursing care (1a, 1b, 1c, 2a, 2b, 2c).
7. Identify the nursing role in patient/family education in a simulated nursing environment (1a, 1b, 1c, 2a, 2b, 2c).
8. Apply clinical reasoning skills in problem solving and decision making, when providing care in a simulated nursing environment (1a, 1b, 1c, 2a, 2b, 2c).
9. Implement beginning communication skills while delivering simulated nursing care (1a, 1b, 1c, 2a, 2b, 2c).
10. Demonstrate the ability to collaborate with other members of the healthcare team, while delivering simulated nursing care (1a, 1b, 1c, 2a, 2b, 2c).
11. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–4
        3. C. Knowledge 3
        4. D. Knowledge 1–3
    b. Provider of Patient-Centered Care:
        1. B. Knowledge 1–4
        2. C. Knowledge 1–2
        3. D. Knowledge 1–2
        4. E. Knowledge 1–2
        5. F. Knowledge 1–3
    c. Patient Safety Advocate:
        1. B. Knowledge 1–3
    d. Member of the Health Care Team:
        1. D. Knowledge 1–2
        2. E. Knowledge 1–3

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify properties, effects, and principles of pharmacotherapeutic agents; and explain nursing interventions associated with the various pharmacotherapeutic agents.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Use terminology associated with pharmacology (1a, 1b, 1c, 2a, 2c).
2. Use appropriate sources of drug information to research prescribed medication (1a, 1b, 1c, 2a, 2c).
3. Apply the six rights of medication administration during the preparation, administration, and documentation of medication therapy (1a, 1b, 1c, 2a, 2c).
4. Develop a drug profile for each prototype as assigned:
    a. drug action (1a, 1b, 1c, 2a, 2c);
    b. adverse reactions (1a, 1b, 1c, 2a, 2c);
    c. drug dosage forms (1a, 1b, 1c, 2a, 2c);
    d. recommended dosages and routes of administration (1a, 1b, 1c, 2a, 2c);
    e. nursing intervention appropriate to alleviate or prevent drug adverse reaction (1a, 1b, 1c, 2a, 2c).
5. Use basic knowledge to complete the nursing responsibilities needed to deliver safe patient care while meeting the pharmacological needs of the patient (1a, 1b, 1c, 2a, 2c).
6. Use knowledge base to monitor the patient's response to drug therapy and collaborate with members of the health care team whenever needed to clarify orders, and report the individual's response to medication prescribed (1a, 1b, 1c, 2a, 2c).
7. Identify classifications of medications (1a, 1b, 1c, 2a, 2c).
8. Identify commonly prescribed medications and related information in each classification (1a, 1b, 1c, 2a, 2c).
9. Relate possible drug interactions for specific drugs (1a, 1b, 1c, 2a, 2c).
10. Evaluate the patient for possible adverse drug reactions (1a, 1b, 1c, 2a, 2c).
11. Demonstrate health teaching related to drug therapy (1a, 1b, 1c, 2a, 2b, 2c).
12. Demonstrate critical thinking and problem solving ability (1a, 1b, 1c, 2a, 2c).
13. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 3
        4. D. Knowledge 1–3
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–12
        3. C. Knowledge 1–8
        4. D. Knowledge 1–5
        5. E. Knowledge 1–13
        6. F. Knowledge 1–3
        7. G. Knowledge 1–3
    c. Patient Safety Advocate:
        1. A. Knowledge 1–5
        2. B. Knowledge 2–4
        3. C. Knowledge 1–2
    d. Member of the Health Care Team:
        1. A. Knowledge 1, 4, 5
        2. B. Knowledge 1–3
        3. C. Knowledge 3–4, 6–8
        4. D. Knowledge 1
        5. E. Knowledge 2–3

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Caring Approach: Demonstrate caring behaviors toward self and others by
    a. demonstrating caring behaviors in nursing process development and implementation (1a, 1b, 1c, 2b);
    b. providing culturally sensitive health care to patients and their families (1a, 1b, 1c, 2b);
    c. providing safe, compassionate, comprehensive nursing care to patients and their families (1a, 1b, 1c, 2b);
    d. assisting the client to achieve optimum comfort and functioning (1a, 1b, 1c, 2b);
    e. interacting with patients and others to build respect and trust (1a, 1b, 1c, 2b);
2. Communication: Implement beginning communication skills with patients, families, and members of the interdisciplinary health care team by
    a. applying strategies of coordination, collaboration, and communication to plan, deliver, and evaluate interdisciplinary health care (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. demonstrating verbal and nonverbal communication skills that are relevant, accurate, clear, complete, timely, understandable, and therapeutic (1a, 1b, 1c, 2b, 2c);
    c. demonstrating written communication skills that are legible, relevant, accurate, complete, and meaningful (1a, 1b, 2c, 2d, 2e);
    d. demonstrating active listening, genuineness, observational skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b);
    e. maintaining eye contact (when culturally appropriate) (1a, 1b, 1c, 2b);
3. Collaboration: Demonstrate the ability to collaborate with other members of the health care team, while delivering basic nursing care by
    a. identifying members of interdisciplinary team (1a, 1b, 1c, 2b);
    b. functioning as a member of an interdisciplinary team (1a, 1b, 1c, 2b);
    c. collaborating with the interdisciplinary health care team to implement quality patient care (1a, 1b, 1c, 2b, 2c);
    d. identifying appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    e. following chain of command (1a, 1b, 1c, 2a, 2b, 2d);
4. Clinical Reasoning: Apply clinical reasoning skills in problem solving and decision making when providing basic nursing care by
    a. applying clinical reasoning and nursing science as a basis for decision making in nursing practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. applying the systematic problem-solving process to assist in determination of predictable health care needs of patient:
        1. prioritize and implement components of the nursing process utilizing a holistic approach (1a, 1b, 1c, 2a, 2b, 2c, 2d);
        2. evaluate the achievement of patient outcomes (1a, 1b, 1c, 2a, 2b, 2c, 2d);
        3. assist in modifying the plan of care as needed (1a, 1b, 1c, 2a, 2b, 2c, 2d);
5. Professionalism: Demonstrate the attitudes and values of the nursing profession by
    a. demonstrating responsibility and accountability for the quality of nursing care provided to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. complying with policies and procedures of Tarrant County College, the Nursing Department, the course, and the clinical facility (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. complying with the professional, ethical, and legal standards of nursing (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. demonstrating evidence-based clinical practice (1a, 1b, 1c, 2b, 2c, 2e);
    e. maintaining patient confidentiality and professional boundaries (1a, 1b, 1c, 2b);
    f. interacting with patients, nursing faculty, and health care team in a professional manner (1a, 1b, 1c, 2b);
    g. selecting learning experiences that enhance competence (1a, 1b, 1c, 2b);
    h. organizing and completing assigned tasks in an appropriate time (1a, 1b, 1c, 2a, 2c, 2d);
6. Teaching: Identify teaching/learning principles to meet the basic needs of patients by
    a. assisting in identifying learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b);
    b. collaborating with patient and interdisciplinary health care team to provide individual teaching plans based upon patient/family learning style and needs (1a, 1b, 1c, 2a, 2b, 2d);
    c. assisting in implementing individualized patient and family teaching (1a, 1b, 1c, 2a, 2b, 2d);
    d. identifying appropriate teaching methods (1a, 1b, 2a, 2c, 2d, 2e);
    e. documenting teaching interventions, patient, and family response (1a, 1b, 2a, 2c, 2d, 2e);
7. Safety: Demonstrate knowledge and self-directed behaviors for client safety by
    a. implementing measures to promote a safe environment for patients and others to identify patients accurately and correctly perform nursing procedures and skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2b, 2c, 2d);
    c. maintaining and monitoring for the chemical safety of the patient (1a, 1b, 2a, 2c, 2d);
    d. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 2a, 2b, 2e);
    e. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2b);
    f. advocating for patient/family (1a, 1b, 1c, 2a, 2b, 2c);
8. Demonstrate an understanding of the following DE's:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5
        4. D. Knowledge 1–4
        5. A. Clinical Behaviors/Judgements 1–3
        6. B. Clinical Behaviors/Judgements 2–9
        7. C. Clinical Behaviors/Judgements 1–6
        8. D. Clinical Behaviors/Judgements 1–5
    b. Provider of Patient-Centered Care:

1. A. Knowledge 1–4
2. B. Knowledge 1–12
3. C. Knowledge 1–8
4. D. Knowledge 1–5
5. E. Knowledge 1–13
6. F. Knowledge 1–3
7. G. Knowledge 1–3
8. H. Knowledge 1–7
9. A. Clinical Behaviors/Judgements 1–4
10. B. Clinical Behaviors/Judgements 1–9
11. C. Clinical Behaviors/Judgements 1–7
12. D. Clinical Behaviors/Judgements 1–3
13. E. Clinical Behaviors/Judgements 1–13
14. F. Clinical Behaviors/Judgements 1–6
15. G. Clinical Behaviors/Judgements 1–7
16. H. Clinical Behaviors/Judgements 1–4

c. Patient Safety Advocate:

1. A. Knowledge 1–6
2. B. Knowledge 1–4
3. C. Knowledge 1–2
4. D. Knowledge 1
5. E. Knowledge 1–2
6. F. Knowledge 1–2
7. A. Clinical Behaviors/Judgements 3–6
8. B. Clinical Behaviors/Judgements 1–9
9. C. Clinical Behaviors/Judgements 1–3
10. D. Clinical Behaviors/Judgements 1–3
11. E. Clinical Behaviors/Judgements 1–4
12. F. Clinical Behaviors/Judgements 1–3

d. Member of the Health Care Team:

1. A. Knowledge 1–5
2. B. Knowledge 1–4
3. C. Knowledge 1–8
4. D. Knowledge 1–4
5. E. Knowledge 1–3
6. F. Knowledge 1–4
7. G. Knowledge 1–4
8. A. Clinical Behaviors/Judgements 1–3
9. B. Clinical Behaviors/Judgements 1–5
10. C. Clinical Behaviors/Judgements 1–4
11. D. Clinical Behaviors/Judgements 1–7
12. E. Clinical Behaviors/Judgements 1–4
13. F. Clinical Behaviors/Judgements 1–3

Required Prerequisite(s): VNSG 1304, VNSG 1323, VNSG 1360, VNSG 1116, PSYC 2301
Recommended Corequisite(s): VNSG 1331, VNSG 1461, VNSG 1301

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify the components of the health-illness continuum; identify prevalent medical-surgical conditions affecting the adult; and utilize the nursing process and clinical judgment model to assist in developing a plan of care for selected medical-surgical conditions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the role of genetics in the etiology of selected medical-surgical disease processes by
    a. identifying disorders that are influenced by genetics (1a, 1b, 1c, 2a, 2c);
    b. planning care for patients with genetic disorders (1a, 1b, 1c, 2a, 2c);
2. Explain nursing management of the surgical patient (1a, 1b, 1c, 2a, 2c).
3. Explain nursing management of patients with selected medical-surgical disease processes related to integumentary system, musculoskeletal system, sensory system, endocrine system, gastrointestinal system, and urinary system by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care including medical, pharmacological, nutritional, laboratory, radiology, and other specific services (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
    h. explaining complications (1a, 1b, 1c, 2a, 2c);
4. Explain nursing management in home-health nursing, long-term care, and rehabilitation nursing (1a, 1b, 1c, 2a, 2c).
5. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1–4
        2. B. Knowledge 1–8
        3. C. Knowledge 1–5
        4. D. Knowledge 1–4

b. Provider of Patient-Centered Care:

1. A. Knowledge 1–4
2. B. Knowledge 1–12
3. C. Knowledge 1–8
4. D. Knowledge 1–5
5. E. Knowledge 1–13
6. F. Knowledge 1–3
7. G. Knowledge 1–3
8. H. Knowledge 1–7

c. Patient Safety Advocate:

1. A. Knowledge 1–6
2. B. Knowledge 1–4
3. C. Knowledge 1–2
4. D. Knowledge 1
5. E. Knowledge 1–2
6. F. Knowledge 1–2

d. Member of the Health Care Team:

1. A. Knowledge 1–5
2. B. Knowledge 1–4
3. C. Knowledge 1–8
4. D. Knowledge 1–4
5. E. Knowledge 1–3
6. F. Knowledge 1–4
7. G. Knowledge 1–4

Course Learning Outcomes

Course Learning Outcomes
End-Of-Course Outcomes:
Explain the components of the health-illness continuum; assess prevalent medical-surgical conditions affecting the adult client; and utilize the nursing process and clinical judgment model to assist in developing a plan of care for selected medical-surgical conditions.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Explain the role of genetics in the etiology of selected Medical-Surgical disease process by
    a. identifying disorders that are influenced by genetics (1a, 1b, 1c, 2a, 2c);
    b. planning care for patients with genetic disorders (1a, 1b, 1c, 2a, 2c).
2. Explain nursing management of patients with selected medical-surgical disease processes related to cardiovascular system, respiratory system, gallbladder, liver, biliary tract disorder, exocrine pancreatic system, neurological system, and reproductive system by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care including medical, pharmacological, nutritional, laboratory, radiology, and other specific services (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);
    g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);
    h. explaining complications (1a, 1b, 1c, 2a, 2c).
3. Explain nursing management of patients with cancer, blood disorders, lymphatic disorders, HIV/AIDS, and immune disorders by
    a. describing risk factors (1a, 1b, 1c, 2a, 2c);
    b. describing pathophysiology (1a, 1b, 1c, 2a, 2c);
    c. relating clinical manifestations to pathophysiology (1a, 1b, 1c, 2a, 2c);
    d. explaining collaborative care including medical, pharmacological, nutritional, laboratory, radiology, and other specific services (1a, 1b, 1c, 2a, 2c);
    e. explaining nursing care (1a, 1b, 1c, 2a, 2c);
    f. identifying nursing diagnoses (1a, 1b, 1c, 2a, 2c);

g. identifying nursing interventions (1a, 1b, 1c, 2a, 2c);

h. explaining complications (1a, 1b, 1c, 2a, 2c).

4. Explain nursing management of patients experiencing urgent alternations in health (1a, 1b, 1c, 2a, 2c).
5. Explain nursing management in hospice care (1a, 1b, 1c, 2a, 2c).
6. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1-4
        2. B. Knowledge 1-8
        3. C. Knowledge 1-5
        4. D. Knowledge 1-4
    b. Provider of Patient-Centered Care:
        1. A. Knowledge 1-4
        2. B. Knowledge 1-12
        3. C. Knowledge 1-8
        4. D. Knowledge 1-5
        5. E. Knowledge 1-13
        6. F. Knowledge 1-3
        7. G. Knowledge 1-3
        8. H. Knowledge 1-7
    c. Patient Safety Advocate:
        1. A. Knowledge 1-6
        2. B. Knowledge 1-4
        3. C. Knowledge 1-2
        4. D. Knowledge 1
        5. E. Knowledge 1-2
        6. F. Knowledge 1-2
    d. Member of the Health Care Team:
        1. A. Knowledge 1-5
        2. B. Knowledge 1-4
        3. C. Knowledge 1-8
        4. D. Knowledge 1-4
        5. E. Knowledge 1-3
        6. F. Knowledge 1-4
        7. G. Knowledge 1-4

Course Learning Outcomes

Course Learning Outcomes
End-Of-Course Outcomes:
As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Caring Approach: Demonstrate caring behaviors toward self and others by
    a. demonstrating acceptance and consideration of the physical, emotional, social, spiritual, and cultural needs of the patient and others to achieve desired patient outcomes (1a, 1b, 1c, 2b);
    b. interacting with patients and others to build respect and trust (1a, 1b, 1c, 2b);
    c. demonstrating caring behaviors using comfort, compassion, concern, empathy, nurturing, touch, and support in assisting patient in coping process (1a, 1b, 1c, 2b);
    d. assisting the patient to achieve optimum comfort and functioning (1a, 1b, 1c, 2b).
2. Communication: Apply principles of communication when interacting with patients, families, and members of the interdisciplinary health care team by
    a. demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic (1a, 1b, 1c, 2b, 2c);
    b. demonstrating written communication skills that are relevant, accurate, complete, timely, legible, and meaningful (1a, 1b, 2c, 2d, 2e);
    c. demonstrating active listening, genuineness, observation skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b);
    d. recognizing and maintaining professional boundaries of the nurse/patient relationship (1a, 1b, 1c, 2b);
    e. reporting and documenting accurately and completely patient status, nursing care provided, administration of medications and treatments, patient responses, and contact with health care team members concerning significant events (1a, 1b, 2b, 2c, 2d, 2e);
    f. demonstrating spontaneous, non-defensive behaviors (1a, 1b, 1c, 2b).
3. Collaboration: Collaborate with interdisciplinary teams to coordinate care of adult patients with common health needs by
    a. describing the roles of interdisciplinary team members (1a, 1b, 1c, 2b);
    b. functioning as a member of an interdisciplinary team (1a, 1b, 1c, 2b);

c. collaborating with the patient, health care team, and patient's family to coordinate care (1a, 1b, 1c, 2b);

d. collaborating with interdisciplinary teams to make referrals to appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2b, 2c);

e. following chain of command (1a, 1b, 1c, 2a, 2b, 2d).

4. Clinical Reasoning: Demonstrate clinical reasoning skills when providing care for the adult with common health needs by

a. applying clinical reasoning and nursing science as a basis for decision making in nursing practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

b. applying the systematic, problem-solving process to assist in determination of predictable health care needs of patient by prioritizing and implementing components of the nursing process utilizing a holistic approach, evaluating the achievement of patient outcomes, and assisting or modifying the plan of care as needed (1a, 1b, 1c, 2a, 2b, 2c, 2d).

5. Professionalism: Demonstrate the attitudes and values of the nursing profession by

a. demonstrating responsibility and accountability for the quality of nursing care provided to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);

b. complying with policies and procedures of Tarrant County College, the Nursing Department, the course, and the clinical facility (1a, 1b, 1c, 2a, 2b, 2c, 2e);

c. complying with the professional, ethical, and legal standards of nursing (1a, 1b, 1c, 2a, 2b, 2c, 2d);

d. demonstrating evidence-based clinical practice (1a, 1b, 1c, 2b, 2c, 2e);

e. maintaining patient confidentiality and professional boundaries (1a, 1b, 1c, 2b);

f. interacting with patients, nursing faculty, and health care team in a professional manner (1a, 1b, 1c, 2a, 2b);

g. selecting learning experiences that enhance competence (1a, 1b, 1c, 2);

h. organizing and completing assigned tasks in an appropriate time (1a, 1b, 1c, 2a, 2c, 2d).

6. Teaching: Apply teaching/learning principles to meet the needs of adult patients and families by

a. assisting in identifying learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b);

b. collaborating with patient and interdisciplinary health care team to provide individual teaching plans based upon patient/family learning style and needs (1a, 1b, 1c, 2a, 2b, 2d);

c. assisting in implementing individualized patient and family teaching (1a, 1b, 1c, 2a, 2b, 2d);

d. actively seeking opportunities to teach patients and families (1a, 1b, 1c, 2b);

e. identifying appropriate teaching methods (1a, 1b, 2a, 2c, 2d, 2e);

f. documenting teaching interventions, patient, and family response (1a, 1b, 2a, 2c, 2d, 2e).

7. Safety: Demonstrate safe practice in the provision of care to patients and families by

a. implementing measures to promote a safe environment for patients and others to identify patients accurately and correctly perform nursing procedures and skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);

b. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2b, 2c, 2d);

c. maintaining and monitoring for the chemical safety of the patient (1a, 1b, 2a, 2c, 2d);

d. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 2a, 2b, 2e);

e. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2b);

f. advocating for patient/family (1a, 1b, 1c, 2a, 2b, 2c);

g. recognizing inaccurate or contraindicated orders (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).

8. Demonstrate an understanding of the following DECs:

End-Of-Course Outcomes:
As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

8. Demonstrate an understanding of the following DECs:

a. Member of a Profession:

1. A. Knowledge 1-4
2. B. Knowledge 1-8
3. C. Knowledge 1-5
4. D. Knowledge 1-4
5. A. Clinical Behaviors/Judgements 1-3
6. B. Clinical Behaviors/Judgements 2-9
7. C. Clinical Behaviors/Judgements 1-6
8. D. Clinical Behaviors/Judgements 1-5

b. Provider of Patient-Centered Care:

1. A. Knowledge 1-4
2. B. Knowledge 1-12
3. C. Knowledge 1-8
4. D. Knowledge 1-5
5. E. Knowledge 1-13
6. F. Knowledge 1-3
7. G. Knowledge 1-3
8. H. Knowledge 1-7
9. A. Clinical Behaviors/Judgements 1-4
10. B. Clinical Behaviors/Judgements 1-9
11. C. Clinical Behaviors/Judgements 1-7
12. D. Clinical Behaviors/Judgements 1-3
13. E. Clinical Behaviors/Judgements 1-13
14. F. Clinical Behaviors/Judgements 1-6
15. G. Clinical Behaviors/Judgements 1-7
16. H. Clinical Behaviors/Judgements 1-4

c. Patient Safety Advocate:

1. A. Knowledge 1-6
2. B. Knowledge 1-4
3. C. Knowledge 1-2
4. D. Knowledge 1
5. E. Knowledge 1-2
6. F. Knowledge 1-2
7. A. Clinical Behaviors/Judgements 3-6
8. B. Clinical Behaviors/Judgements 1-9
9. C. Clinical Behaviors/Judgements 1-3
10. D. Clinical Behaviors/Judgements 1-3
11. E. Clinical Behaviors/Judgements 1-4
12. F. Clinical Behaviors/Judgements 1-3

d. Member of the Health Care Team:

1. A. Knowledge 1-5
2. B. Knowledge 1-4
3. C. Knowledge 1-8
4. D. Knowledge 1-4
5. E. Knowledge 1-3
6. F. Knowledge 1-4
7. G. Knowledge 1-4
8. A. Clinical Behaviors/Judgements 1-3
9. B. Clinical Behaviors/Judgements 1-5
10. C. Clinical Behaviors/Judgements 1-4
11. D. Clinical Behaviors/Judgements 1-7
12. E. Clinical Behaviors/Judgements 1-4

 # TAKE VNSG-1432 VNSG-1234 VNSG-1230 VNSG-1219;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): VNSG 1429, VNSG 1331, VNSG 1461, VNSG 1301
Recommended Corequisite(s): VNSG 1432, VNSG 1234, VNSG 1230, VNSG 1219

Course Learning Outcomes

Course Learning Outcomes
End-Of-Course Outcomes:
As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry; and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Learning outcomes are linked to SCANS requirements. Specific SCANS requirements are linked to the class schedule.

Upon successful completion of this course, students will:

1. Caring Approach: Provide patient care that is respectful of and responsive to individual patient preferences, needs, and values by
    a. demonstrating acceptance and consideration of the physical, emotional, social, spiritual, and cultural needs of the patient and others to achieve desired patient outcomes (1a, 1b, 1c, 2b);
    b. interacting with patient and others to build respect and trust (1a, 1b, 1c, 2b);
    c. demonstrating caring behaviors using comfort, compassion, concern, empathy, nurturing, touch, and support in assisting patient in coping process (1a, 1b, 1c, 2b);
    d. assisting the patient to achieve optimum comfort and functioning (1a, 1b, 1c, 2b);
    e. promoting wellness behaviors in self and others (1a, 1b, 1c, 2b).
2. Communication: Initiate and facilitate effective communication with patients, families, and members of the interdisciplinary health care team by
    a. demonstrating verbal and nonverbal communication skills that are relevant, accurate, complete, timely, clear, understandable, and therapeutic (1a, 1b, 1c, 2b, 2c);
    b. demonstrating written communication skills that are relevant, accurate, complete, timely, legible, and meaningful (1a, 1b, 2c, 2d, 2e);
    c. demonstrating active listening, genuineness, observation skills, physical attentiveness, and interviewing skills (1a, 1b, 1c, 2b);
    d. recognizing and maintaining professional boundaries of the nurse/patient relationship (1a, 1b, 1c, 2b);
    e. reporting and documenting accurately and completely patient status, nursing care provided, administration of medications and treatments, patient responses, and contact with health care team members concerning significant events (1a, 1b, 2b, 2c, 2d, 2e);
    f. demonstrating spontaneous, non-defensive behaviors (1a, 1b, 1c, 2b);
    g. initiating and facilitating independently communication to meet the needs of patients and families (1a, 1b, 1c, 2b, 2c).
3. Collaboration: Collaborate with interdisciplinary teams to manage patients, families, and/or communities to achieve quality patient outcomes by
    a. describing the roles of interdisciplinary team members (1a, 1b, 1c, 2b);
    b. function as a member of an interdisciplinary team (1a, 1b, 1c, 2b);
    c. collaborating with the patient, health care team, and patient's family to coordinate care (1a, 1b, 1c, 2b);
    d. collaborating with interdisciplinary teams to make referrals to appropriate community agencies and health care resources to provide continuity of care (1a, 1b, 1c, 2b, 2c);
    e. following chain of command (1a, 1b, 1c, 2a, 2b, 2d);
    f. delegating tasks and collaborating to achieve positive patient outcomes (1a, 1b, 1c, 2b, 2c);
    g. interacting creatively and openly with others to solve problems to achieve patient goals and outcomes (1a, 1b, 1c, 2b, 2c).
4. Clinical Reasoning: Independently utilize clinical reasoning skills when providing care for patients with complex health needs by
    a. applying clinical reasoning and nursing science as a basis for decision making in nursing practice (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. demonstrating autonomy in collecting and analyzing physical, psychosocial, spiritual, cultural, occupational and environmental data in a variety of health care settings (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    c. applying the systematic, problem-solving process to assist in determination of predictable health care needs of patient to prioritize and implement components of the nursing process utilizing a holistic approach (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. evaluating the achievement of patient outcomes (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    e. recognizing social, political, and economic determinants of health status (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    f. assisting in modifying the plan of care as needed (1a, 1b, 1c, 2a, 2b, 2c, 2d).
5. Professionalism: Demonstrate the attitudes and values of the nursing profession by
    a. demonstrating responsibility and accountability for the quality of nursing care provided to patients and their families (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    b. complying with policies and procedures of Tarrant County College, the Nursing Department, the course, and the clinical facility (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    c. complying with the professional, ethical, and legal standards of nursing (1a, 1b, 1c, 2a, 2b, 2c, 2d);
    d. demonstrating evidence-based clinical practice (1a, 1b, 1c, 2b, 2c, 2e);
    e. maintaining patient confidentiality and professional boundaries (1a, 1b, 1c, 2b);
    f. interacting with patients, nursing faculty, and health care team in a professional manner (1a, 1b, 1c, 2a, 2b);
    g. selecting learning experiences that enhance competence (1a, 1b, 1c, 2);
    h. organizing and completing assigned tasks in an appropriate time (1a, 1b, 1c, 2a, 2c, 2d).
6. Teaching: Implement teaching/learning principles to meet the needs of patients and families with complex health needs by
    a. assisting in identifying learning needs of patients and families related to risk reduction and health promotion, maintenance, and restoration (1a, 1b, 1c, 2b);
    b. collaborating with patient and interdisciplinary health care team to provide individual teaching plans based upon patient/family learning style and needs (1a, 1b, 1c, 2a, 2b, 2d);
    c. independently implementing individualized patient and family teaching (1a, 1b, 1c, 2a, 2b, 2d);
    d. actively seeking opportunities to teach patients and families (1a, 1b, 1c, 2b);
    e. identifying appropriate teaching methods (1a, 1b, 2a, 2c, 2d, 2e);
    f. documenting teaching interventions, patient, and family response (1a, 1b, 2a, 2c, 2d, 2e).
7. Safety: Demonstrate the knowledge, skills, and attitudes that ensure a culture of safety in practice by
    a. implementing measures to promote a safe environment for patients and others to identify patients accurately and correctly perform nursing procedures and skills (1a, 1b, 1c, 2a, 2b, 2c, 2e);
    b. implementing and maintaining measures to prevent exposure to infectious pathogens and communicable conditions (1a, 1b, 2a, 2b, 2c, 2d);
    c. maintaining and monitoring for the chemical safety of the patient (1a, 1b, 2a, 2c, 2d);
    d. maintaining and monitoring for the thermal safety of the patient (1a, 1b, 2a, 2b, 2e);
    e. assuring the psychological safety of the patient by using stress control methods and therapeutic communication (1a, 1b, 1c, 2b);
    f. advocating for patient/family (1a, 1b, 1c, 2a, 2b, 2c);
    g. recognizing inaccurate or contraindicated orders (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate an understanding of the following DECs:
    a. Member of a Profession:
        1. A. Knowledge 1-4
        2. B. Knowledge 1-8
        3. C. Knowledge 1-5
        4. D. Knowledge 1-4
        5. A. Clinical Behaviors/Judgements 1-3
        6. B. Clinical Behaviors/Judgements 2-9
        7. C. Clinical Behaviors/Judgements 1-6
        8. D. Clinical Behaviors/Judgements 1-5

b. Provider of Patient-Centered Care:
    1. A. Knowledge 1-4
    2. B. Knowledge 1-12
    3. C. Knowledge 1-8
    4. D. Knowledge 1-5
    5. E. Knowledge 1-13
    6. F. Knowledge 1-3
    7. G. Knowledge 1-3
    8. H. Knowledge 1-7
    9. A. Clinical Behaviors/Judgements 1-4
    10. B. Clinical Behaviors/Judgements 1-9
    11. C. Clinical Behaviors/Judgements 1-7
    12. D. Clinical Behaviors/Judgements 1-4
    13. E. Clinical Behaviors/Judgements 1-13
    14. F. Clinical Behaviors/Judgements 1-6
    15. G. Clinical Behaviors/Judgements 1-7
    16. H. Clinical Behaviors/Judgements 1-6

c. Patient Safety Advocate:
    1. A. Knowledge 1-6
    2. B. Knowledge 1-4
    3. C. Knowledge 1-2
    4. D. Knowledge 1
    5. E. Knowledge 1-2
    6. F. Knowledge 1-2
    7. A. Clinical Behaviors/Judgements 3-6
    8. B. Clinical Behaviors/Judgements 1-9
    9. C. Clinical Behaviors/Judgements 1-3
    10. D. Clinical Behaviors/Judgements 1-3
    11. E. Clinical Behaviors/Judgements 1-4
    12. F. Clinical Behaviors/Judgements 1-3

d. Member of the Health Care Team:
    1. A. Knowledge 1-5
    2. B. Knowledge 1-4
    3. C. Knowledge 1-8
    4. D. Knowledge 1-4
    5. E. Knowledge 1-3
    6. F. Knowledge 1-4
    7. G. Knowledge 1-4

e. A. Clinical Behaviors/Judgements 1-3

f. B. Clinical Behaviors/Judgements 1-5

g. C. Clinical Behaviors/Judgements 1-4

h. D. Clinical Behaviors/Judgements 1-7

i. E. Clinical Behaviors/Judgements 1-4

j. F. Clinical Behaviors/Judgements 1-3

k. G. Clinical Behaviors/Judgements 1-4

WIND 2459 - Wind Power Delivery System

General

Course Key
15120

Course Rubric
WIND

Course Number
2459

Course Title
Wind Power Delivery System

Semester Credit Hours
4

Lecture Hours
3

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-3-3). Components, equipment, and infrastructure used in the production and transmission of electricity as related to wind turbine power. Required Prerequisite: CETT-1409

View Course Availability on MyTCCTrack

Required Prerequisite(s): CETT 1409

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes:

Explain the operation of power production; describe power transmission components; identify the operational relationship between the generator and convertor; compare the authority of local area, state, and national jurisdiction as reacted to the electrical grid; and interpret grid schematics.

Upon successful completion of this course, students will:

1. Explain the operation of power production by
    a. explaining the process of measuring the wind speed (1a, 1b, 2a, 2b, 2c);
    b. describing the effects of atmospheric conditions (1a, 1b, 2a, 2b, 2c);
    c. explaining the components in choosing the proper site for a wind powered generator (1a, 1b, 2a, 2b, 2c).

2. Describe the different components in power transmission by
    a. listing the stages of power transmission (1a, 1b, 2a, 2b, 2c);
    b. listing the components used within each stage (1a, 1b, 2a, 2b, 2c);
    c. explaining the difficulties facing the power transmission industry (1a, 1b, 2a, 2b, 2c).

3. Explain the operational relationship between the generator and convertor by
    a. describing the methods of power generation by wind turbines (1a, 1b, 2a, 2b, 2c);
    b. contrasting the use of generator versus alternator in the wind turbine (1a, 1b, 2a, 2b, 2c);
    c. listing the components needed and their application in the process of power conversion (1a, 1b, 2a, 2b, 2c).

4. Discuss the need for agreements given by local, state, and national authorities by
    a. describing the application process to receive permission for the installation process (1a, 1b, 2a, 2b, 2c);
    b. listing the local and state contact persons and numbers (1a, 1b, 2a, 2b, 2c);
    c. explaining how the state and national authorities control the power grid (1a, 1b, 2a, 2b, 2c).

5. Demonstrate a knowledge of grid schematics by
    a. drawing a sample schematic for the user of a wind turbine (1a, 1b, 2a, 2b, 2c);
    b. explaining the use of national grid schematics (1a, 1b, 2a, 2b, 2c);
    c. interpreting the schematics being used to transfer power to large populated areas (1a, 1b, 2a, 2b, 2c);
    d. describing how the SMART Grid would benefit our society (1a, 1b, 2a, 2b, 2c).

WLDG 1312 - Intro to Flux Cored Arc Welding (FCAW)

General

Course Key
14931

Course Rubric
WLDG

Course Number
1312

Course Title
Introduction to Flux Cored Arc Welding (FCAW)

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) An overview of terminology, safety procedures, and equipment set-up. Practice in performing various joints using Flux Cored Arc Welding (FCAW) equipment.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate equipment safety checks; identify Flux Cored Arc Welding (FCAW) equipment parts, and demonstrate the procedures for welding various joints in various positions.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a);
    b. demonstrating operation of welding equipment safety (1a, 1b, 2a, 2d, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2a).
2. Choose correct filler electrode by
    a. identifying filler metal electrodes to AWS filler metal number system (1a, 1b, 2a, 2e);
    b. demonstrating selection of electrode size for 5 types of welded joints and metal thickness (1a, 1b, 2a, 2e).
3. Demonstrate the ability to set up and apply the theory of oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2e);
    b. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2e);
    c. explaining selection of cutting tips sizes (1a, 1b, 2a);
    d. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2d, 2e);
    e. making minor external repairs to mechanize OFC equipment and accessories (1a, 1b, 2a, 2d, 2e);
    f. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2d, 2e).
4. Demonstrate an understanding of proper setup of a FCAW welding station by
    a. performing safety inspection of FCAW equipment and accessories (1a, 2a, 2e);
    b. explaining CV welding voltage (1a, 1b, 2e);
    c. selecting correct wire speed for flux cored welding electrode (1a, 1b, 2a);
    d. demonstrating correct electrode stick out (1a, 1b, 2a, 2e).
5. Perform v-groove welded joints with the FCAW process by
    a. passing welder performance qualification test in the 1G position (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. passing welder qualification tests in the 2G, 3G, and 4G position on carbon steel plate (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate an understanding of types of preheat and post heat by
    a. identifying preheat (1a, 1b, 2e);
    b. identifying inter-pass temperature (1a, 1b, 2e);
    c. identifying post weld heat treatments (1a, 1b, 2e);
    d. identifying hold points (1a, 1b, 2e).

WLDG 1313 - Intro to Blueprint Reading for Welders

General

Course Key
14907

Course Rubric
WLDG

Course Number
1313

Course Title
Introduction to Blueprint Reading for Welders

Semester Credit Hours
3

Lecture Hours
2

Lab Hours
3

Course Classification
Workforce Education Course Manual (WECM)

Description
(3-2-3) A study of industrial blueprints. Emphasis placed on terminology, symbols, graphic description, and welding processes. Includes systems of measurement and industry standards. Also includes interpretation of plans and drawings used by industry to facilitate field application and production.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-course outcomes: Define terms and abbreviations; interpret views, lines, dimensions, detail drawings and welding symbols; identify structural shapes; demonstrate the proper use of measuring devices; and calculate dimensions.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of pictorial and orthographic projections by:
    a. Identifying the difference between pictorial and orthographic projections (1a,1b);
    b. Identifying the basic views in an orthographic projection (1a, 1b);
    c. Identifying isometric and oblique drawings (1a, 1b).
2. Recall and demonstrate an understanding of the usages of different types of lines used on prints by:
    a. Listing and identifying the types of lines used on prints (1a, 1b);
    b. Describing the proper usage of each type of line (1a, 1b);
    c. Sketching different types of views using correct line applications (1a, 1b).
3. Demonstrate measurement skills by:
    a. Identifying the difference between US Standard and metric measuring system (1a, 1b);
    b. Converting between US Standard measurements and metric units (1a, 1b);
    c. Converting between decimal fractions and common fractions (1a, 1b);
    d. Demonstrating the reading of a tape measure (1a, 1b);
    e. Identifying the different types of measurements and dimensioning used on prints (1a, 1b);
4. Demonstrate an understanding of common structural shapes used in steel construction by:
    a. Identifying different types of structural shapes (1a, 1b);
    b. Naming the parts of each structural shape (1a, 1b);
    c. Listing the advantages and disadvantages of each type of structural shape (1a, 1b, 2c);
    d. Identifying the bill of material designation of each type of structural shape (1a, 1b);
5. Demonstrate an understanding of types of welds and joints by:
    a. Identifying the five types of welding joints (1a, 1b);
    b. Explaining the application of fillet welds, groove welds, plug welds, slot welds and resistant welds (1a, 1b, 2c, 2e);
6. Demonstrate the ability to interpret welding symbols used on construction prints by:
    a. Drawing and labeling commonly used weld symbols (1a, 1b);
    b. Identifying all numerical and graphic labeling associated with welding symbols (1a, 1b);
7. Demonstrate an understanding of the importance of information on various parts of a print by:
    a. Explaining the usage of various views (1a, 1b, 2c);
    b. Identifying and explaining information in the 'bill of material' (1a, 1b, 2c);
    c. Identifying and explaining information in 'title block' (1a, 1b, 2c);
    d. Describing the importance of the 'notes' (1a, 1b, 2c);
8. Demonstrate an understanding of the relevance of various organizations, standards, and codes by:
    a. Describing the role of AWS (1a, 1b, 2a, 2c, 2d);
    b. Describing the role of ASME (1a, 1b, 2a, 2c, 2d);
    c. Describing the role of API (1a, 1b, 2a, 2c, 2d);
    d. Describing the role of AISC (1a, 1b, 2a, 2c, 2d);
    e. Describing the role of ISO (1a, 1b, 2a, 2c, 2d);

f. Describing the role of OSHA (1a, 1b, 2a, 2c, 2d);

Requirements
Required Prerequisite(s): WLDG 1313
Required Prerequisite(s) or Corequisite(s): WLDG 1428 or WLDG 1430

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Interpret welding symbols; utilize measuring instruments and tools for fabricating projects; define layout and fabrication terminology; and identify structural shapes and materials.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding lab by
    a. describing burns caused by the welding and cutting flames (1a, 1b, 2e);
    b. demonstrating operation of welding equipment safety (1a, 1b, 2e);
    c. describing proper clothing for welding and cutting (1a, 1b, 2a).
2. Demonstrate the ability to set up and apply the theory of oxygen/acetylene cutting system by
    a. explaining types of regulators (1a, 1b, 2a);
    b. demonstrating safe methods of handling and storing cylinders (1a, 1b, 2a);
    c. explaining selection of cutting tips sizes (1a, 1b, 2a);
    d. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2d, 2e);
    e. performing safety inspection of OFC track cutting torch (1a, 1b, 2e).
3. Demonstrate an understanding of welding symbols by
    a. drawing fillet weld symbols and groove weld symbols (1a, 1b, 2e);
    b. explaining fillet weld symbols and groove weld symbols (1a, 1b, 2e).
4. Demonstrate an understanding of measuring instruments and tools for fabrication by
    a. demonstrating proper layout of circles and squares in flat plate (1a, 1b, 2a, 2e);
    b. demonstrating proper straight line cutting (1a, 1b, 2a, 2e);
    c. performing bevel cutting with a hand torch (1a, 1b, 2a, 2e);
    d. performing bevel cutting with a track torch (1a, 1b, 2a, 2e);
    e. demonstrating proper layout with a combination square (1a, 1b, 2a, 2e);
    f. demonstrating proper layout with a pipe template (1a, 1b, 2a, 2d, 2e);
    g. demonstrating layout of a pipe template (1a, 1b, 2a, 2d, 2e);
    h. performing square cutting of pipe with a pipe wraparound (1a, 1b, 2a, 2d, 2e);

i. performing square cutting of structural shapes (1a, 1b, 2a, 2e).

5. Identify structural load, stress, and strain by
    a. defining structural loads (1b, 2a, 2d, 2e);
    b. defining structural stresses (1a, 1b, 2a, 2d, 2e);
    c. defining structural strain on members (1a, 1b, 2e).
6. Demonstrate an understanding of AISC tables by
    a. estimating weld weight and cost (1a, 1b, 2e);
    b. computing weights and cost of steel (1a, 1b, 2e).
7. Estimate time and cost of weld repair by
    a. selecting proper tools and welding processes for repairs (1a, 1b, 2a, 2d, 2e);
    b. performing welding repairs on equipment (1a, 1b, 2a, 2e).
8. Demonstrate understanding of basic mathematics and plane figures by
    a. calculating angles and angular layout (1a, 1b, 2a);
    b. using calculator to calculate welding offsets of pipe runs (1a, 1b, 2a, 2e).
9. Demonstrate understanding of 45 degree lateral and 90 degree branch connections by
    a. demonstrating proper tool selection and procedures to lay out lateral joints (1a, 1b, 2a, 2e);
    b. demonstrating proper tool selection and procedures to lay out 90 degree branch connections (1a, 1b, 2a, 2e).

WLDG	1421	Welding Fundamentals

Semester Credit Hours	Lecture Hours	Lab Hours
4	2	4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) An introduction to the fundamentals of equipment used in oxy-fuel and arc welding, including welding and cutting safety, basic oxy-fuel welding and cutting, basic arc welding processes and basic metallurgy.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate safety procedures associated with oxy-fuel and arc process; perform basic welds using oxy-fuel and arc welding equipment; and identify various metals.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a, 2e);
    b. demonstrating proper inspection and operation of equipment used for each welding process (1a, 1b, 2a, 2d, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2e).
2. Demonstrate the ability to set up and apply the theory of oxygen/acetylene cutting system by
    a. explaining types of regulators (1a, 1b, 2a, 2e);
    b. demonstrating safe methods of handling and storing cylinders (1a, 1b, 2a, 2e);
    c. explaining selection of cutting tips sizes (1a, 1b, 2e);
    d. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2d, 2e).
3. Demonstrate an understanding of the proper setup of various arc welding stations by
    a. performing safety inspection of equipment and accessories (1a, 1b, 2a, 2e);
    b. explaining open circuit voltage (1a, 1b, 2e);
    c. selecting correct current for welding process (1a, 1b, 2a, 2e).
4. Perform various welds with various processes by
    a. demonstrating single and multi-pass fillet and groove welds on mild steel in various positions with multiple electrodes (1a, 1b, 2a, 2e);
    b. demonstrating visual inspection and quality control (1a, 1b, 2e).

WLDG 1428 - Intro Shielded Metal Arc Welding (SMAW)

General

Course Key
14927

Course Rubric
WLDG

Course Number
1428

Course Title
Introduction to Shielded Metal Arc Welding (SMAW)

Semester Credit Hours
4

Lecture Hours

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Select electrodes and amperage settings for various thicknesses of materials and welding positions; define principles of arc welding; explain electrode classifications; perform SMAW operations utilizing various positions electrodes and joint designs.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a, 2e);
    b. demonstrating proper inspection and operation of equipment used for each welding process (1a, 1b, 2a, 2d, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2e);
    d. demonstrating proper use and inspection of personal protection equipment (PPE) (1a, 1b, 2a, 2c, 2d, 2e);
    e. demonstrating proper use and inspection of ventilation equipment (1a, 1b, 2e);
    f. demonstrating proper hot zone operation (1a, 2a, 2d, 2e);
    g. demonstrating proper work actions for working in confined spaces (1a, 1b, 2a, 2d, 2e);
    h. demonstrating proper use of precautionary labeling and MSDS information (1a, 1b, 2a, 2e).
2. Choose correct filler electrodes by
    a. identifying filler metal electrodes to AWS filler metal number system (1a, 1b, 2a, 2e);
    b. demonstrating selection of electrode size for 5 types of welded joints (1a, 1b, 2a, 2d, 2e).
3. Demonstrate the ability to set up and apply the theory of oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2d, 2e);
    b. explaining types of regulators (1a, 1b, 2a, 2e);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2e);
    d. explaining selection of cutting tips sizes (1a, 1b, 2e);
    e. demonstrating setup and manual cutting of straight and bevel edge (1a, 1b, 2a, 2d, 2e);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2e);
    g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2e).
4. Demonstrate an understanding of the proper setup of a SMAW welding station by
    a. performing safety inspection of SMAW equipment and accessories (1a, 1b, 2a, 2e);
    b. explaining open circuit voltage (1a, 1b, 2e);
    c. selecting correct current for welding electrode (1a, 1b, 2a, 2e).
5. Perform fillet and square groove welds with the SMAW process by
    a. demonstrating single and multi-pass fillet welds on 3/16", ¼", ½", and ¾" mild steel in all positions with E6010, E6013, E7024, and E7018 electrodes (1a, 1b, 2a, 2e);
    b. demonstrating visual inspection and quality control (1a, 1b, 2e).
6. Perform v-groove welded joints by
    a. demonstrating AWS bend tests in the horizontal 2G, 3G, and 4G position (1a, 1b, 2a, 2d, 2e);
    b. performing visual inspection of v- groove joints to AWS D1.1 welding code (1a, 1b, 2a, 2e).

WLDG 1430 - Intro to Gas Metal Arc Welding (GMAW)

General

Course Key

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) Principles of gas metal arc welding, set-up and use of Gas Metal Arc Welding(GMAW) equipment, and safe use of tools and equipment. Instruction in various joint designs.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe welding positions with various joint designs; describe the effects of welding parameters in GMAW; apply safety rules; troubleshoot equipment used, perform visual inspection; weld various types of structural material; diagnose welding problems.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a, 2e);
    b. demonstrating operation of welding equipment safety (1a, 1b, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2a).
2. Choose correct filler electrodes by
    a. identifying filler metal electrodes to AWS filler metal number system (1a, 1b, 2a, 2e);
    b. demonstrating selection of electrode size for 5 types of welded joints and metal thickness (1a, 1b, 2a, 2d, 2e).
3. Demonstrate the ability to set up and apply the theory of an oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2d, 2e);
    b. explaining types of regulators (1a, 1b, 2a, 2e);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2e);
    d. explaining selection of cutting tips sizes (1a, 1b, 2e);
    e. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2c, 2e);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2e);
    g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a).
4. Demonstrate an understanding of the proper setup of a GMAW welding station by
    a. performing safety inspection of GMAW equipment and accessories (1a, 1b, 2e);
    b. explaining CV welding voltage (1a, 1b, 2e);
    c. selecting correct wire speed for GMAW welding (1a, 1b, 2e);
    d. demonstrating correct electrode stick out (1a, 1b, 2d, 2e).
5. Perform fillet and v-groove welded joints with the GMAW process by
    a. passing welder qualification tests in the 2F, 3F, and 4F position on 16 gauge to 3/16" steel (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. passing welder performance qualification tests in the 2G, 3G, and 4G position on carbon steel plate (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
6. Demonstrate an understanding of spray arc transfer by
    a. demonstrating skills using spray arc transfer in the 1G position (1a, 1b, 2d, 2e);
    b. listing the GMA processes' major limitations (1a, 1b, 2d, 2e);
    c. explaining shielding gases used in short circuiting transfer and spray transfer (1a, 1b, 2d, 2e).
7. Demonstrate an understanding of types of preheat and post heat by
    a. identifying preheat (1a, 1b, 2e);
    b. identifying inter-pass temperature (1a, 1b, 2e);
    c. identifying post weld heat treatments (1a, 1b, 2e);
    d. identifying hold points (1a, 1b).
8. Demonstrate an understanding of the cause of hydrogen found in welds by
    a. identifying causes of hydrogen formation in welds (1a, 1b, 2a, 2c, 2e);
    b. identifying types of hydrogen formation in welded joints (1a, 1b, 2c).

(4-2-4) Principles of gas tungsten arc welding (GTAW), including set-up, GTAW equipment. Instruction in various positions and joint designs.

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Describe various joint designs; describe safety rules and equipment; and describe the effects of welding parameters in GTAW; weld various structural materials.

Upon successful completion of this course, students will:

1. Demonstrate an understanding of the operation of welding equipment safety by
    a. setting up welding station (1a, 1b, 2a);
    b. describing burns (1a, 1b);
    c. describing proper clothing (1a, 1b);
    d. distinguishing ultraviolet light types (1a, 1b).
2. Demonstrate an understanding of the correct methods of setting up a gas tungsten arc power supply for basic welding of low carbon steel by
    a. grinding tungsten (1a, 1b, 2e);
    b. selecting filler material (1a, 1b, 2e);
    c. setting gas flow (1a, 1b);
    d. setting correct welding current and voltage (1a, 1b, 2e);
    e. preventing contamination of welded joint (1a, 1b, 2e);
    f. selecting proper backing shielding gases (1a, 1b, 2e).
3. Demonstrate an understanding of the correct procedure for preparation of a weld joint by
    a. preparing the weld joint for low carbon steel welded joints (1a, 1b, 2d, 2e);
    b. selecting the proper welding current for low carbon steel welding (1a, 1b, 2d, 2e).
4. Demonstrate the procedure for welding the fillet welds on carbon steel joints by
    a. describing the 5 basic joints used in GTAW of carbon steel (1a, 1b, 2d, 2e);
    b. setting proper welding amperage (1a, 1b, 2e);
    c. identifying and interpreting problem in running fillet welds on 1/16" and 11 gauge carbon steel in all positions (1a, 1b, 1c, 2d, 2e);
    d. distinguishing proper stop and restart (1a, 1b, 2e);
    e. running filler passes (1a, 1b, 1c, 2a, 2d, 2e).
5. Demonstrate the procedure for testing to ASME welding qualification of welded joints by
    a. laying out and machine testing bends (1a, 1b, 2e);
    b. performing visual examination of test plates (1a, 1b, 2e);
    c. testing to ASME Section 9 welding code (1a, 1b, 1c, 2a, 2c, 2c, 2d, 2e).
6. Produce groove welds on 1/16" and 11 gauge carbon steel in the 1G, 2G, 3G, and 4G position by
    a. demonstrating root passes in 1G, 2G, 3G, and 4G position (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    b. laying out, fitting up, and interpreting welding symbols (1a, 1b, 2a, 2d, 2e).
7. Perform stainless steel fillet welds on 1/16 gauge thickness by
    a. performing butts, laps, and tees with backing shield gas (1a, 1b, 2a, 2c, 2d, 2e);
    b. performing butt weld qualification in the 1G position (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e).
8. Demonstrate an understanding of the welding classifications and the weld ability of stainless steel by
    a. explaining the classifications of 201, 304, and 410 stainless steel (1a, 1b, 2a, 2d, 2e);
    b. demonstrating the proper selection of filler metal for welding stainless steel in the 300 and 400 series (1a, 1b, 2a, 2d, 2e);
    c. explaining steps to control distortion in stainless steel (1a, 1b, 2d, 2e).

9. Demonstrate an understanding of the welding of aluminum with the GTAW process by
    a. selecting proper filler metal for each classification of aluminum (1a, 1b, 2a, 2c, 2d, 2e);
    b. explaining proper methods of cleaning of aluminum oxide from surface of weld joint (1a, 1b, 2a, 2c, 2d, 2e);
    c. selecting proper current for welding of aluminum alloys (1a, 1b, 2a, 2e);
    d. selecting proper tungsten shape for welding aluminum alloy (1a, 1b, 2a, 2e);
    e. welding fillet and groove joints in the 1F, 2F, 3F, 1G, 2G, and 3G positions (1a, 1b, 1c, 2a, 2c, 2d, 2e).

Course Learning Outcomes
End-of-Course Outcomes: Describe equipment utilized; demonstrate required pipe preparation and perform welds using various positions and electrodes.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a, 2c);
    b. demonstrating proper inspection and operation of equipment used for each welding process (1a, 1b, 2a, 2b, 2c, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2c);
    d. demonstrating proper use and inspection of personal protection equipment (PPE) (1a, 1b, 1c, 2c);
    e. demonstrating proper use and inspection of ventilation equipment (1a, 1b, 2d);
    f. demonstrating proper hot zone operation (1a, 1b, 2a, 2c, 2d);
    g. demonstrating proper work actions for working in confined spaces (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. demonstrating proper use of precautionary labeling and MSDS information (1a, 1b, 2a, 2c).
2. Choose the correct filler electrode by
    a. identifying filler metal electrodes to AWS filler metal number systems (1a, 1b, 2a, 2c);
    b. selecting electrode size for five types of welded joints (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate the ability to set up and apply the theory of an oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2c);
    b. explaining types of regulators (1a, 1b, 2c, 2d);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2c, 2d);
    d. explaining selection of cutting tips sizes (1a, 1b, 2a, 2c);
    e. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2c, 2d);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2c, 2d, 2e);
    g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2e).
4. Demonstrate an understanding of proper setup of a SMAW welding station by

a. performing safety inspections of SMAW equipment and accessories (1a, 1b, 2a);

b. explaining open circuit voltage (1a, 1b, 2c, 2e);

c. selecting correct current for welding electrode (1a, 1b, 2a).

5. Perform v-groove welded joints by

a. demonstrating AWS bend tests in the horizontal 1G and 2G positions (1a, 1b, 1b, 1c, 2a, 2e);

b. performing visual inspection of v-groove joints at AWS D1.1 welding code (1a, 1b, 2a, 2c, 2e).

6. Perform 1G rolled pipe welds by

a. demonstrating 1G pipe welds using E6010 electrode downhill (1a, 1b, 2a, 2c, 2d, 2e);

b. demonstrating 1G pipe welds using E6010 and E7018 electrodes uphill (1a, 1b, 2a, 2c, 2e).

7. Perform 2G pipe welds on sch.40 and sch.60 pipe by

a. demonstrating 2G pipe welds using E6010 electrode downhill (1a, 1b, 2a, 2c, 2e);

b. demonstrating 2G pipe welds using E6010 and E7018 electrodes uphill (1a, 1b, 2a, 2d, 2e).

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Identify proper safety equipment and tools; select the proper welding process for a given application; demonstrate skills using more than one approved welding process; analyze situations and make decisions concerning safety and electrode selections.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by

a. describing burns caused by the welding arc (1a, 1b, 2a, 2c);

b. demonstrating proper inspection and operation of equipment used for each welding process (1a, 1b, 2a, 2b, 2c, 2e);

c. describing proper clothing for welding safety (1a, 1b, 2c);

d. demonstrating proper use and inspection of personal protection equipment (PPE) (1a, 1b, 1c, 2c);

e. demonstrating proper use and inspection of ventilation equipment (1a, 1b, 2d);

f. demonstrating proper hot zone operation (1a, 1b, 2a, 2c, 2d);

g. demonstrating proper work actions for working in confined spaces (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);

h. demonstrating proper use of precautionary labeling and MSDS information (1a, 1b, 2a, 2c).

2. Choose the correct filler electrode by

a. identifying filler metal electrodes to AWS filler metal number systems (1a, 1b, 2a, 2c);

b. selecting electrode size for 5 types of welded joints (1a, 1b, 2a, 2c, 2d, 2e).

3. Demonstrate the ability to set up and apply the theory of an oxygen/acetylene cutting system by

a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2c);

b. explaining types of regulators (1a, 1b, 2c, 2d);

c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2c, 2d);

d. explaining selection of cutting tips sizes (1a, 1b, 2a, 2c);

e. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2c, 2d);

f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2c, 2d, 2e);

g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2e).

4. Demonstrate an understanding of proper setup of SMAW welding station by

a. performing safety inspections of GTAW equipment and accessories (1a, 1b, 2a);

b. explaining open circuit voltage (1a, 1b, 2c, 2e);

c. selecting correct current for welding electrode (1a, 1b, 2a).

5. Perform v-groove welded joints by

a. demonstrating AWS bend tests in the horizontal 1G and 2G positions (1a, 1b, 1b, 1c, 2a, 2e);

b. performing visual inspection of v-groove joints at AWS D1.1 welding code (1a, 1b, 2a, 2c, 2e).

6. Perform 1G rolled pipe welds by
    a. demonstrating 1G pipe welds using ER70S-5 electrode uphill (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating 1G pipe welds using ER308L electrodes uphill (1a, 1b, 2a, 2c, 2e).

7. Perform 2G pipe welds on sch. 40 and sch. 60 pipe by
    a. demonstrating 2G pipe welds using ER70S-5 electrode uphill (1a, 1b, 2a, 2c, 2e);
    b. demonstrating 2G pipe welds using ER308L electrodes uphill (1a, 1b, 2a, 2d, 2e).

    a. identifying filler metal electrodes to AWS filler metal number system (1a, 1b, 2a, 2e);
    b. demonstrating selection of electrode size for 5 types of welded joints (1a, 1b, 2a, 2d, 2e).

3. Demonstrate the ability to set up and apply the theory of oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2d, 2e);
    b. explaining types of regulators (1a, 1b, 2a, 2e);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2e);
    d. explaining selection of cutting tips sizes (1a, 1b, 2e);
    e. demonstrating setup and manual cutting of straight and bevel edge (1a, 1b, 2a, 2d, 2e);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2e);

4. Demonstrate an understanding of the proper setup of a SMAW welding station by
    a. performing safety inspection of SMAW equipment and accessories (1a, 1b, 2a, 2e);
    b. explaining open circuit voltage (1a, 1b, 2e);
    c. selecting correct current for welding electrode (1a, 1b, 2a, 2e).

5. Perform fillet and square groove welds with the SMAW process by
    a. demonstrating single and multi-pass fillet welds on 3/16", ¼", 3/8, and ¾" mild steel in all positions with E6010, E6013, and E7018 electrodes (1a, 1b, 2a, 2e);
    b. demonstrating single and multipass fillet welds on ¼", 3/8", and ¾" mild steel in the 2F position with E7024 electrodes (1a, 1b, 2e);
    c. demonstrating visual inspection and quality control (1a, 1b, 2e).

6. Perform v-groove welded joints with backing and with open root by
    a. demonstrating AWS bend tests in the 2G, 3G, and 4G position (1a, 1b, 2a, 2d, 2e);
    b. performing visual inspection of v-groove joints to AWS D1.1 welding code (1a, 1b, 2a, 2e).

WLDG 2451 - Advanc Gas Tungsten Arch Welding (GTAW)

General

Course Key
14919

Course Rubric
WLDG

Course Number
2451

Course Title
Advanced Gas Tungsten Arc Welding (GTAW)

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) Advanced topics in GTAW welding, including welding in various positions and directions. Required Prerequisite: WLDG-1434 or approval of Program Coordinator

View Course Availability on MyTCCTrack

Find out if you can earn credit for this course through Prior Learning Assessment (PLA)

Requirements

Simple Requisites

See course description for prerequisites
Type
Required

10
A Requirement block where all subrequirements are required

#Take WLDG-1434;
A Subrequirement block where all groups are required

30
(ALL COURSES): Take all of the following courses...

Requirements
Required Prerequisite(s): WLDG 1434 or approval of Program Coordinator

Course Learning Outcomes

Course Learning Outcomes
End-of-Course Outcomes: Demonstrate GTAW in various welding positions; describe safety rules and equipment used; and describe the effects of welding parameters in GTAW; weld various joint designs; diagnose welding problems; and perform visual inspection.

Upon successful completion of this course, students will:

1. Demonstrate safety in the welding station by
    a. describing burns caused by the welding arc (1a, 1b, 2a, 2c);
    b. demonstrating proper inspection and operation of equipment used for each welding process (1a, 1b, 2a, 2b, 2c, 2e);
    c. describing proper clothing for welding safety (1a, 1b, 2c);
    d. demonstrating proper use and inspection of personal protection equipment (PPE) (1a, 1b, 1c, 2c);
    e. demonstrating proper use and inspection of ventilation equipment (1a, 1b, 2d);
    f. demonstrating proper hot zone operation (1a, 1b, 2a, 2c, 2d);
    g. demonstrating proper work actions for working in confined spaces (1a, 1b, 1c, 2a, 2b, 2c, 2d, 2e);
    h. demonstrating proper use of precautionary labeling and MSDS information (1a, 1b, 2a, 2c).
2. Choose the correct filler electrode by
    a. identifying filler metal electrodes to AWS filler metal number systems (1a, 1b, 2a, 2c);
    b. selecting electrode size for 5 types of welded joints (1a, 1b, 2a, 2c, 2d, 2e).
3. Demonstrate the ability to set up and apply the theory of an oxygen/acetylene cutting system by
    a. performing safety inspection of manual OFC equipment and accessories (1a, 1b, 2a, 2c);
    b. explaining types of regulators (1a, 1b, 2c, 2d);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2c, 2d);
    d. explaining selection of cutting tips sizes (1a, 1b, 2a, 2c);
    e. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2c, 2d);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2c, 2d, 2e);
    g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2e).
4. Demonstrate an understanding of proper setup of SMAW welding station by
    a. performing safety inspections of GTAW equipment and accessories (1a, 1b, 2a);
    b. explaining open circuit voltage (1a, 1b, 2c, 2e);
    c. selecting correct current for welding electrode (1a, 1b, 2a).
5. Perform v-groove welded joints by
    a. demonstrating AWS bend tests in the horizontal 1G and 2G positions (1a, 1b, 1b, 1c, 2a, 2e);
    b. performing visual inspection of v-groove joints at AWS D1.1 welding code (1a, 1b, 2a, 2c, 2e).

6. Perform 1G rolled pipe welds by
    a. demonstrating 1G pipe welds using ER70S-5 electrode uphill (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating 1G pipe welds using ER308L electrodes uphill (1a, 1b, 2a, 2c, 2e).

7. Perform 2G pipe welds on sch. 40 and sch. 60 pipe by
    a. demonstrating 2G pipe welds using ER70S-5 electrode uphill (1a, 1b, 2a, 2c, 2e);
    b. demonstrating 2G pipe welds using ER308L electrodes uphill (1a, 1b, 2a, 2d, 2e).

WLDG 2453 - Advanced Pipe Welding

General

Course Key
14918

Course Rubric
WLDG

Course Number
2453

Course Title
Advanced Pipe Welding

Semester Credit Hours
4

Lecture Hours
2

Lab Hours
4

Course Classification
Workforce Education Course Manual (WECM)

Description
(4-2-4) Advanced topics involving welding of pipe using the shielded metal arc welding (SMAW) process. Topics include electrode selection, equipment setup, and safe shop practices. Emphasis on weld positions 5G and 6G using various electrodes. Required Prerequisite: WLDG-2443 or approval of Program Coordinator

View Course Availability on MyTCCTrack

    b. explaining types of regulators (1a, 1b, 2c, 2d);
    c. demonstrating safe method of handling and storing cylinders (1a, 1b, 2a, 2c, 2d);
    d. explaining selection of cutting tips sizes (1a, 1b, 2a, 2c);
    e. demonstrating setup and manual cutting of straight and bevel edges (1a, 1b, 2a, 2c, 2d);
    f. making minor external repairs to mechanized OFC equipment and accessories (1a, 1b, 2a, 2c, 2d, 2e);
    g. demonstrating bevel cutting of pipe with pipe beveling machine (1a, 1b, 2a, 2e).

4. Demonstrate an understanding of proper setup of SMAW welding station by
    a. performing safety inspections of SMAW equipment and accessories (1a, 1b, 2a);
    b. explaining open circuit voltage (1a, 1b, 2c, 2e);
    c. selecting correct current for welding electrode (1a, 1b, 2a).

5. Perform v-groove welded joints by
    a. demonstrating AWS bend tests in the horizontal 1G and 2G positions (1a, 1b, 1b, 1c, 2a, 2e);
    b. performing visual inspection of v-groove joints at AWS D1.1 welding code (1a, 1b, 2a, 2c, 2e).

6. Perform 1G rolled pipe welds by
    a. demonstrating 1G pipe welds using E6010 electrode uphill (1a, 1b, 2a, 2c, 2d, 2e);
    b. demonstrating 1G pipe welds using E6010 and E7018 electrodes uphill and downhill (1a, 1b, 2a, 2c, 2e).

7. Perform 6G pipe welds on sch. 40 and sch. 60 pipe by
    a. demonstrating 6G pipe welds using E6010 electrode downhill (1a, 1b, 2a, 2c, 2e);
    b. demonstrating 6G pipe welds using E6010 and E7018 electrodes uphill (1a, 1b, 2a, 2d, 2e).

Course Sets

Math Elective - Information Technology (3 Semester Credit Hours)

Complete ANY:

- MATH 1314 College Algebra
- MATH 1316 Plane Trigonometry
- MATH 1332 Contemporary Math - Quant Reas
- MATH 1342 Elementary Statistical Methods
- MATH 2412 Pre-Calculus Math
- MATH 2413 Calculus I

Social and Behavioral Science (3 Semester Credit Hours)

Complete ANY:

- ANTH 2346 General Anthropology
- ECON 2301 Principles of Macroeconomics
- ECON 2302 Principles of Microeconomics
- GEOG 1301 Physical Geography
- GEOG 1302 Human Geography
- GEOG 1303 World Regional Geography
- PSYC 2301 General Psychology
- SOCI 1301 Introduction to Sociology

Government and Political Science (3 Semester Credit Hours)

Complete ANY:

- GOVT 2305 Federal Government
- GOVT 2306 Texas Government

Elective (1 Semester Credit Hour)

- POFT 1127 Introduction to Keyboarding
- AERM 1101 Introduction to Aviation
- FDNS 1103 Introduction to Dietetics
- RSPT 1166 Practicum-Respiratory Therapy
- RSPT 1101 Intro to Respiratory Care

Civil Engineering Elective (3 Semester Credit Hours)

Complete ANY:

- ENGR 2302 Engineer Mechanics-Dynamics
- ENGR 2332 Mechanics of Materials
- HIST 1302 United States History II
- MATH 2320 Differential Equations

Freshman Ensemble Course (1 Semester Credit Hour)

- MUEN 1122 Jazz Ensembles
- MUEN 1123 Band
- MUEN 1124 Orchestra
- MUEN 1132 Combo
- MUEN 1133 Chamber Winds
- MUEN 1134 Chamber Strings
- MUEN 1135 Guitar Ensemble
- MUEN 1141 Large Choral Ensembles
- MUEN 1151 Chamber Singers

Fire Protection Technology Elective (3 Semester Credit Hours)

Complete ALL:

- FIRS 1301 Firefighter Certification I
- FIRS 1313 Firefighter Certification III
- FIRS 1319 Firefighter Certification IV
- FIRS 1323 Firefighter Certification V
- FIRS 1329 Firefighter Certification VI
- FIRT 1371 Intro to Emergency Management
- FIRT 2309 Firefight Strategy & Tactics I

Human Resources Management Elective (3 Semester Credit Hours)

- BMGT 1301 Supervision
- BMGT 1305 Communications in Management

- BMGT 2309 Leadership
- BUSG 1315 Small Business Operations
- BUSG 1341 Small Business Financing
- MRKG 1311 Principles of Marketing
- BUSG 1302 E-Business Management
- MRKG 1301 Customer Relationship Mgt

Horticulture Elective (3 Semester Credit Hours)

Complete ANY:

- HALT 2307 Horticultural Food Crops
- HALT 1309 Interior Plants
- HALT 1311 Shrubs, Vines, & Groundcovers
- HALT 1317 Trees
- HALT 1333 Landscape Irrigation
- HALT 1353 Landscape Computer Design
- HALT 1422 Landscape Design
- HALT 2301 Arboriculture
- HALT 2308 Greenhouse Management
- HALT 2314 Plant Propagation
- HALT 2315 Landscape Management
- HALT 2320 Nursery Production & Mgt
- AGCR 1304 Intro to Sustainable Agri
- HALT 1324 Turfgrass Sci and Mmgt
- HALT 2321 Small Farming

Industrial Engineering Elective (3 Semester Credit Hours)

Complete ALL:

- ENGR 2301 Engineering Mechanics-Statics

- ENGR 2302 Engineer Mechanics-Dynamics
- ENGR 2308 Engineering Economics
- GOVT 2306 Texas Government
- HIST 1302 United States History II
- ENGL 2311 Technical & Business Writing
- MATH 2320 Differential Equations

Social Work Directed Elective (3 Semester Credit Hours)

Complete ANY:

- BIOL 1406 Biol Scien Maj I (Lec/Lab)
- BIOL 1407 Biol Science Maj II (Lec/Lab)
- BIOL 2401 Anatomy & Physiology I
- PSYC 2301 General Psychology
- PSYC 2315 Psychology of Adjustment
- SOCI 1301 Introduction to Sociology
- MATH 1342 Elementary Statistical Methods

Sophomore Ensemble Course (1 Semester Credit Hour)

- MUEN 2122 Jazz Ensembles
- MUEN 2123 Band
- MUEN 2124 Orchestra
- MUEN 2132 Combo
- MUEN 2133 Chamber Winds
- MUEN 2134 Chamber Strings
- MUEN 2135 Guitar Ensemble
- MUEN 2141 Large Choral
- MUEN 2151 Chamber Singers

Cooperative Education Requirement

Complete ANY:

- LGLA 2380 Coop Education-Legal Ast/Para
- Complete ALL:
    - LGLA 2281 Coop Educ-Legal Assistant
    - LGLA 2288 Internship-Legal Assistant

Composition (Code 010)

Complete ANY:

- ENGL 1301 Composition I

Accounting Information Management Elective (4 Semester Credit Hours)

- POFT 1127 Introduction to Keyboarding
- POFT 1319 Records & Info Management
- BMGT 1301 Supervision

- ARTS 2357 Photography II
- ARTS 2389 Academic Cooperative

Component Area Option (3 Semester Credit Hours)

Complete ANY:

- ENGL 1302 Composition II
- ENGL 2311 Tech & Busi Writing Honors

Culinary Arts Elective (3 Semester Credit Hours)

Complete ANY:

- CHEF 1340 Meat Preparation and Cooking
- CHEF 2302 Saucier
- CHEF 2336 Charcuterie
- CHEF 2341 Advanced Culinary Competition
- HAMG 1321 Intro to Hospitality Industry
- HAMG 2305 Hospitality Mgt & Leadership
- HAMG 2307 Hospitality Marketing & Sales
- PSTR 1206 Cake Decorating I
- PSTR 1305 Breads and Rolls
- PSTR 1310 Pies, Tarts,Teacakes & Cookie
- PSTR 1442 Quantity Bakeshop Production

- PSTR 2207 Cake Decorating II
- PSTR 2331 Advanced Pastry Shop
- TRVM 1201 Customer Sales and Service

Life and Physical Sciences (4 Semester Credit Hours)

Complete ANY:

- BIOL 1406 Biol Scien Maj I (Lec/Lab)
- BIOL 1407 Biol Science Maj II (Lec/Lab)
- BIOL 1408 Biol Non-Sci Maj I (Lec/Lab)
- BIOL 1409 Biol Non-Sci Maj II (Lec/Lab)
- BIOL 2401 Anatomy & Physiology I
- BIOL 2402 Anatomy & Physiology II
- BIOL 2406 Environmental Biol (Lec/Lab)
- BIOL 2421 Microbiology Sci Maj (lec/lab)
- CHEM 1405 Intro Chemistry I (Lec/Lab)
- CHEM 1411 General Chemistry I (Lec/Lab)
- CHEM 1412 General Chemistry II
- CHEM 2423 Organic Chemistry I (Lec/Lab)
- CHEM 2425 Organic Chem II (Lec+Lab)
- GEOL 1401 Earth Sc Non-Sci Mj (Lec/Lab)
- GEOL 1402 Earth Sci Non-Sc II (Lec/Lab)
- GEOL 1403 Physical Geology (Lec/Lab)
- GEOL 1404 Historical Geology (Lec/Lab)
- GEOL 1405 Enviro Science (lec/lab)
- GEOL 1445 Oceanography (Lec/Lab)
- GEOL 1447 Meteorology (Lec/Lab)
- PHYS 1401 College Physics I (Lec/Lab)
- PHYS 1402 College Physics II (Lec/Lab)
- PHYS 1403 Stars and Galaxies (Lec/Lab)
- PHYS 1404 Solar System (Lec/Lab)
- PHYS 1415 Physical Science I (Lec/Lab)
- PHYS 2425 University Physic I (Lec/Lab)
- PHYS 2426 University Phys II (Lec/Lab)

Child Development Elective (3 Semester Credit Hours)

Complete ANY:

- CDEC 1323 Observation and Assessment
- CDEC 2307 Math/Science Early Childhood
- CDEC 2324 CDA III
- CDEC 2326 Admin of Prog for Children I
- CDEC 2328 Admin of Progs for Children II
- CDEC 2341 The School Age Child

Engineering Elective (3 Semester Credit Hours)

Complete ALL:

- ENGL 2311 Technical & Business Writing
- GOVT 2306 Texas Government
- HIST 1302 United States History II
- ENGR 1304 Engineering Graphics I
- ENGR 2301 Engineering Mechanics-Statics
- ENGR 2302 Engineer Mechanics-Dynamics
- ENGR 2305 Electrical Circuits I
- ENGR 2308 Engineering Economics
- ENGR 2332 Mechanics of Materials
- MATH 2320 Differential Equations
- MATH 2318 Linear Algebra

Kinesiology Activity (1 Semester Credit Hour)

- KINE 1102 Aerobic Fitness - Beginning
- KINE 1104 Bowling - Beginning
- KINE 1105 Camping/Backpacking - Beg
- KINE 1107 Conditioning - Beginning
- KINE 1113 Kickboxing - Beginning
- KINE 1116 Recreational Sports - Begin
- KINE 1117 Sailing - Beginning
- KINE 1119 Self Defense-Beginning
- KINE 1121 Swim Conditioning - Beginning
- KINE 1122 Swimming - Beginning
- KINE 1125 Tennis - Beginning
- KINE 1128 Volleyball - Beginning
- KINE 1129 Walk/Jog - Beginning
- KINE 1131 Water Aerobics - Beginning
- KINE 1132 Water Exercise - Beginning
- KINE 1133 Weight Training - Beginning
- KINE 1134 Yoga - Beginning
- KINE 1304 Personal and Community Health
- KINE 1306 First Aid
- KINE 2102 Aerobic Fitness - Intermediate
- KINE 2104 Bowling - Intermediate
- KINE 2107 Conditioning - Intermediate
- KINE 1148 Pilates - Beginning
- KINE 2113 Kickboxing - Intermediate
- KINE 2117 Sailing - Intermediate
- KINE 2121 Swim Conditioning - Intermed
- KINE 2122 Swimming - Intermediate
- KINE 2123 Swimming - Advanced
- KINE 2125 Tennis - Intermediate
- KINE 2128 Volleyball - Intermediate
- KINE 2129 Walk/Jog - Intermediate
- KINE 2131 Water Aerobics - Intermediate
- KINE 2132 Water Exercise - Intermediate
- KINE 2133 Weight Training - Intermediate
- KINE 2134 Yoga - Intermediate
- KINE 2148 Pilates - Intermediate
- KINE 1308 Sports Officiating
- KINE 1321 Coaching/Sports/Athletics I
- KINE 1301 Foundations of Kinesiology
- KINE 2119 Self Defense-Intermediate
- KINE 2356 Care and Prevent Athl Injuries
- KINE 1338 Concepts of Physical Fitness
- KINE 1149 Fencing - Beginning
- KINE 2149 Fencing - Intermediate
- KINE 2127 Pickleball - Intermediate
- KINE 1127 Pickleball - Beginning

PSYC/SOCI Elective (3 Semester Credit Hours)

- PSYC 2306 Human Sexuality
- SOCI 1301 Introduction to Sociology
- PSYC 1300 Learning Framework
- PSYC 2314 Life Span Growth/Development
- PSYC 2316 Psychology of Personality
- PSYC 2301 General Psychology
- PSYC 2308 Child Psychology
- PSYC 2315 Psychology of Adjustment
- PSYC 2301 Corequisite General Psychology
- SOCI 1301 Corequisite Intro to Sociology
- PSYC 2319 Social Psychology
- PSYC 2317 Statistical Methods in Psych
- PSYC 2320 Abnormal Psychology
- PSYC 2330 Biological Psychology

Kinesiology Specialization (3 Semester Credit Hours)

Complete ANY:

- HECO 1322 Nutrition and Diet Therapy
- KINE 1301 Foundations of Kinesiology
- KINE 1304 Personal and Community Health
- KINE 1306 First Aid
- KINE 1308 Sports Officiating
- KINE 1321 Coaching/Sports/Athletics I
- KINE 1338 Concepts of Physical Fitness
- KINE 2356 Care and Prevent Athl Injuries

Child Care Administration Elective (3 Semester Credit Hours)

Complete ANY:

- CDEC 1323 Observation and Assessment
- CDEC 1356 Emergent Literacy Early Child
- CDEC 2307 Math/Science Early Childhood
- CDEC 2324 CDA III
- CDEC 2341 The School Age Child
