College of Arts and Sciences

Dean: Joseph P. Ward
Location: Eccles Science Learning Center Suite 245
Phone: (435) 797-1195 | **FAX:** (435) 797-1092
Website: **https://artsci.usu.edu/**

Executive Associate Dean: Rebecca Walton – ESLC 245J / (435) 797-0289 / **rebecca.walton@usu.edu**

Associate Dean for Faculty Success: Julia M. Gossard – ESLC 245H / (435) 797-3653 / **julia.gossard@usu.edu**

Associate Dean for Research & Graduate Studies: Sean Johnson – ESLC 245K / (435) 797-2089 / **sean.johnson@usu.edu**

Associate Dean for Undergraduate Studies – Recruiting and Outreach: Brynja Kohler – ESLC 245L / (435) 797-2826 / **brynja.kohler@usu.edu**

Associate Dean for Undergraduate Studies – Majors, Minors, and Certificates: Susie Tibbitts – ESLC 245M / (435) 797-1563 / **susie.tibbitts@usu.edu**

Advising Director: Tom Liljegren, ESLC 245Q / (435) 797-3883 / tom.liljegren@usu.edu

Director, Caine School of the Arts: Nick Morrison - (435) 797-3506 / nicholas.morrison@usu.edu

Director, Infrastructure Planning: Michelle Baker - (435) 797-7131 / michelle.baker@usu.edu

Director, Experiential Learning Strategy: Cree Taylor - cree.taylor@usu.edu

Director, Global Learning: Shannon Peterson - (435) 797-6631 / shannon.peterson@usu.edu

The College of Arts and Sciences includes the following:

We offer over 180 degrees across our departments and centers: A full listing of available academic programs can be found in the **USU Degree Finder.**

Departments

- Art + Design
- Biology
- Chemistry & Biochemistry
- Communication & Media
- English
- History, Cultures & Ideas
- Mathematics & Statistics
- Music
- Physics
- School of Social Sciences
- Social Work
- Theatre Arts
- World Languages & Cultures

Other Units

- Aerospace Studies/Air Force ROTC
- Bingham Research Center
- Caine School of the Arts
- Center for Anticipatory Intelligence
- Center for Intersectional Gender Studies and Research
- Center for the Study of American Constitutionalism
- Community and Natural Resources Institute
- Data Science and Artificial Intelligence Center
- Heravi Peace Institute
- I-System Institute for Transdisciplinary Studies
- Military Science/Army ROTC
- Mountain West Center for Regional Studies
- Production Services
- Transforming Communities Institute
- Utah Public Radio

Overview

The College of Arts & Sciences is at the heart of Utah State University's land- and space-grant mission. Through transformative learning experiences, we serve learners at all levels of post-secondary education including concurrent enrollment students, undergraduates, graduate students, and lifelong learners. We foster discovery and creativity through rich academic experiences that prepare students to meet tomorrow's challenges, drive innovation in research and the arts, and make meaningful contributions to our communities.

The College of Arts & Sciences is a vibrant hub where students are inspired to explore, lead, and make an impact. At the heart of Utah State University's land- and space-grant mission, the college brings together science, humanities, and the arts to empower students with durable skills, hands-on experiences, and lifelong knowledge. Through transformative learning opportunities, we serve learners at all levels—concurrent enrollment students, undergraduates, graduate students, and lifelong learners—fostering discovery, creativity, and a spirit of collaboration. Our faculty, staff, and students advance knowledge, spark innovation, and pursue artistic excellence while engaging meaningfully with our communities. Together, we prepare students to face tomorrow's challenges and chart their own unique paths forward.

Academic Support

Academic Advising

Academic advisors in ArtSci provide personalized support to help students navigate their academic journey. They assist with course planning, degree progress, and connecting students to experiential learning opportunities such as internships, research, and study abroad. Academic advisors also guide students in exploring career paths, accessing campus resources, and overcoming challenges to ensure their success from enrollment through graduation. To schedule an appointment with an academic advisor, please go to this website: https://artsci.usu.edu/advising/.

Financial Support

Scholarships

The College of Arts and Sciences offers more than **450 scholarships** annually to undergraduate and graduate students. More information can be found on the College's scholarships website at **https://artsci.usu.edu/student-resources/scholarships/**.

Experiential Learning

The College of Arts and Sciences excels in experiential learning through studio and lab work, capstone projects, internships, practicums, service learning, and study abroad opportunities that promote global engagement. These experiences deepen students' understanding, foster professional and transferable skills, enhance engagement, and strengthen career readiness. For more information on these opportunities please visit: **https://artsci.usu.edu/student-resources/scholarships/experiential-learning/**

Admission and Graduation Requirements

Students accepted in good standing by the university are eligible for admission to the college containing the arts and sciences. Because of limitations of faculty or space, a few departments within the college, such as **Graphic Design, Interior Architecture and Design**, limit enrollment in their professional programs. See the departmental sections in this catalog and the department head for information regarding these limitations and/or requirements in addition to the university graduation requirements.

Mission Statement & Goals

The College of Engineering fosters a creative and inclusive learning environment where students and faculty are empowered with the knowledge and experience to become the leaders in engineering who will improve tomorrow's economy, environment, and society by:

- Developing as ethical professionals who understand engineering in its societal context
- Learning modern engineering/science principles and their application in conducting experiments and analyzing data
- Gaining experience in working on engineering problems and designing solutions to meet desired needs
- Acquiring skills in communicating effectively and working in teams
- Understanding the importance of lifelong professional development and learning

Accreditation and Assessment

The College of Engineering is committed to assessing the quality of its academic departments and programs to prepare graduates to enter critical STEM fields in the global workforce. Faculty members in the College are committed to ensuring their students obtain the knowledge and skills needed for success in their chosen fields.

Assessment of student learning, with a focus on continuous improvement, enables the College to implement programmatic and curricular actions to improve the quality of students' educational experience.

The College of Engineering is accredited by subject to ABET accreditation policies.

1.0 Academic Departments and Programs

Founded over 100 years ago, the College of Engineering at Utah State University (hereafter referred to as USU or university) is recognized throughout the Intermountain West as a leader in teaching, research, and innovation. Through rigorous academic programs, cutting-edge research opportunities, and professional development activities, students gain the vision and skills to advance society, drive economic progress, and improve the quality of life across the nation and the world. The College offers 6 ABET-accredited undergraduate degrees and 21 graduate degree programs. Students experience hands-on application of engineering and design principles through industry partnerships and world-class labs and facilities. The faculty and staff in the College of Engineering are committed to students' success by providing exceptional teaching, research, advising, and mentorship opportunities for students.

The College of Engineering has five academic departments with four-degree levels: Bachelor of Science (B.S.), Master of Science (M.S.), Master of Engineering (M.E.), and Doctor of Philosophy (Ph.D.). For specific programs, see the table below:

Department	BS	Minors	MS	ME	PhD
Engineering Education			X		X
Biological Engineering					
Biological Engineering	X		X	X	X
Biomanufacturing			X		
Civil and Environmental Engineering

Data Science			X		

1.1 Undergraduate Programs

An undergraduate education in engineering is based on a strong foundation in math and science. Coursework in the social sciences and humanities provides an interdisciplinary approach enabling students to make informed decisions, become creative problem solvers, and expand their vision of design in their given field. Students working toward undergraduate degrees receive unparalleled classroom education, research experience, and mentorship from nationally and internationally renowned faculty.

1.1.1 Undergraduate Requirements

Standards and requirements ensure students can successfully progress in their designated programs. It is the responsibility of the student to understand and follow all current standards necessary to fulfill degree requirements. The advisors in the Engineering Advising Center in the College of Engineering can help students understand how to meet all academic requirements.

1.1.2 Undergraduate Advising

The academic advisors in the College of Engineering provide personalized guidance for developing and achieving meaningful educational and professional goals. The advising team is committed to helping students plan their academic path for successful and timely graduation. Students are encouraged to meet with their designated academic advisor annually or more frequently for course selection, program planning, and fulfilling academic and graduation requirements.

Undergraduate students are encouraged to visit the Advising Center website for information or to schedule an appointment.

2.0 Admission to the College of Engineering

Students are evaluated based on previous academic performance and assigned their academic standing in the College of Engineering after applying to USU. A student may be accepted into an academic department in the College of Engineering in either the:

- Engineering Foundations Program or
- Pre-Professional Program

See program-specific information in the Engineering Foundations Program Admission and Pre-Professional Program Admission sections below.

NOTE: Students not meeting admissions requirements of the university or College of Engineering may be denied admission. If a student is concerned their standing in the College has been incorrectly assigned, they should contact the Engineering Advising Office. The College of Engineering follows the university policy for academic appeals (Student Standards of Conduct).

2.1 Admission for First-Year Students

Incoming, first-year students will be admitted directly into the Engineering Foundations Program when admitted to USU. To help you in choosing the right major, all incoming engineering students have a common first-year experience. The yearlong Engineering Foundations program is unique to USU. This new curriculum better prepares students to find the engineering degree path that fits their goals. If during the program you decide to change your engineering major, there is no penalty for changing your mind, and you won't have to start over with a new set of classes.

In order to complete the Engineering Foundations Program during your first 2 semesters, students will need to have experience in algebra, geometry, trigonometry, chemistry, physics, English and be prepared to enroll in calculus. Students not prepared to enroll in calculus can take a summer semester following their first year that consists of taking MATH 1220/Calculus II and PHYS 2210/Physics 1 in order to stay on a 4-year track.

Students can earn university credits by receiving appropriate scores on the College Level Examination Program (CLEP) tests or through Advanced Placement (AP) exams.

Coursework (including transfer credit) that is more than 10 years old and is required by the major may be disallowed by the student's department.

2.2 Admission for Transfer Students

Students transferring to an engineering major from another USU program or other institute of higher education will be placed into different engineering majors depending on their completion status of the engineering foundation courses and status of their GPA. The table below shows where students will be placed based on completion status of foundational courses and different GPA categories:

TABLE 2.2			
ENGINEERING *FOUNDATIONS OR PRE-PROFESSIONAL COURSES STATUS	**ADMISSION STATUS**		
Foundations courses incomplete	Admitted to College of Engineering		
Foundational courses completed but do not meet required **foundations GPA	Admitted to College of Engineering		
Foundational courses completed and met required **foundations GPA	Admitted to Pre-Professional Engineering Program		
Pre-Professional courses completed but do not meet required ***pre-professional GPA	Admitted to Pre-Professional Engineering Program		
Pre-Professional courses completed and met required ***pre-professional GPA	Admitted to Pre-Professional Engineering Program until 15 credits are completed at USU within the required GPA (does not apply to current USU students)		

*Foundations Courses: ENGR1010 ENGR EXPLORATION, ENGR1400 ENGR COMPUTER PROGRAMMING, MATH1210 CALCULUS I (QL), MATH1220 CALCULUS II (QL), CHEM1210 PRIN OF CHEMISTRY I, CHEM1215 CHEMICAL PRINCIPLES LAB I, PHYS2210 PHYS SCI AND ENGR I (QI)(BPS), PHYS2215 PHYS SCI AND ENGR LAB 1

**Foundations GPA: Required admission GPA for the pre-professional program can be referred to on table 2.2

***Pre-Professional GPA: Required admission GPA for the professional program can be referred to on table 4.1

2.2.1 Articulation of Transfer Credits

After students are accepted into the Engineering Program, transfer credits are evaluated according to the articulation agreements in place for most universities. If the course material covered is not the same, transfer credits may not be accepted as engineering courses even if the number of credits for courses are the same. In the event no articulation agreement is in place, the USU department responsible for the course evaluates and assigns the transfer credits. Courses taken on the quarter system are evaluated according to the university policy for quarter credit conversion; credits transferred from a quarter calendar system will receive 0.667 semester credits for every quarter credit earned. Coursework (including transfer credit) that is more than 10 years old and is required by the major may be disallowed by the student's department. The final decision on accepting credits for a degree resides with the academic department that awards the degree.

Transfer students coming to USU with an Associate of Science degree from a regionally accredited institution may be deemed as having satisfied the General Education portion of USU's University Studies Requirements. In general, transfer students will still need to satisfy the Depth Education portion of University Studies. In addition, since not all Associate of Science degrees granted by institutions outside of Utah include an American Institutions course (a State of Utah requirement), students may need to complete a Breadth American Institutions (BAI) course while at USU.

2.2.2 Acceptance into the Professional Program for Transfer Students

The Professional Engineering Program refers to the major-specific courses in the junior and senior years of each degree program. Transfer students must apply to the Professional Engineering Program using the Admission/Permission Application for the Professional Program. A final decision on admission into the Professional Engineering Program will not be made until after the applicant has completed at least 15 semester credits of acceptable engineering, math, and science coursework at USU with the required GPA. Some of this coursework may include upper-division classes taken by permission. Transfer students who have completed the Pre-Professional Engineering Program courses at another institution may apply to the Professional Engineering Program after they have been accepted into the Pre-Professional Engineering Program.

3.0 The Engineering Foundations Program

All incoming, first-year students to USU will begin in the foundations program. This is designed to help students choose the right major and have a common first-year experience. This new curriculum better prepares students to find the engineering degree path that fits their goals.

Any student who has been accepted to Utah State University can enroll in the Engineering Foundations first-year experience. You can find Utah State University's admission requirements here: Apply to Utah State University | Admissions | USU

In order to complete the Engineering Foundations Program during your first 2 semesters, students will need to have experience in algebra, geometry, trigonometry, chemistry, physics, English, and be prepared to enroll in calculus. Students not prepared to enroll in calculus can take a summer semester following their first year that consists of taking MATH 1220/Calculus II and PHYS 2210/Physics 1 in order to stay on a 4-year track.

No matter your field of study you plan to go into within the college of engineering, the foundational courses are the same. The requirements to move on from the engineering foundation courses are the same for each department and are as follows:

- 2.80 overall GPA within the foundations courses (foundations GPA)
- C- or better in all foundations courses
- Completion of all foundations courses: ENGR1010 ENGR EXPLORATION, ENGR1400 ENGR COMPUTER PROGRAMMING, MATH1210 CALCULUS I (QL), MATH1220 CALCULUS II (QL), CHEM1210 PRIN OF CHEMISTRY I, CHEM1215 CHEMICAL PRINCIPLES LAB I, PHYS2210 PHYS SCI AND ENGR I (QI)(BPS), PHYS2215 PHYS SCI AND ENGR LAB 1

Students in the Engineering Foundations Program who have completed the Foundations Courses listed above and have met the minimum requirements listed may apply to the Pre-Professional Engineering Program. Students not meeting the minimum requirements will not be able to enroll in sophomore engineering courses and will need to repeat courses until all minimum requirements are met. If a student does not wish to continue to reach the minimum requirements or continue in the program they are invited to declare an alternate major. If students disagree with the denial, they may file and academic appeal. The college of Engineering follows the Utah State University's policy for academic appeals (Student Standards of Conduct).

3.1 Academic Intervention Plan for Engineering Foundations Students

Students who are not making progress in the Foundations Courses or do not meet the minimum Foundations Courses GPA or who need to repeat any individual Foundations Course more than two times will need to meet with their advisor to develop an Academic Intervention Plan before moving forward. The Academic Intervention Plan is intended to help the student attain technical competency before progressing any further in their major. The plan may require the student to take fewer courses in the subsequent semester and postpone enrolling in particular engineering courses.

4.0 The Pre-Professional Engineering Program

The Pre-Professional Engineering Program is designed to help students obtain the academic knowledge and skills to be successful during the junior and senior years of their degree program. Courses in the Pre-Professional Engineering Program include math, science, and fundamental engineering courses. Each engineering major has distinct Pre-Professional Engineering Program requirements that must be satisfied to qualify for the Professional Engineering Program. Department-specific requirements are described in the engineering degree maps found in the USU Catalog.

The College of Engineering has additional standards beyond the university's minimum academic standards. Satisfying university requirements does not guarantee students are meeting Pre-Professional Engineering Program requirements. Students in good standing according to university requirements (maintain a USU GPA of 2.0 or higher) must also meet the departmental entrance requirements for admission into a Professional Engineering Program.

4.1 Academic Intervention Plan for Pre-Professional Engineering Students

Students who are not making progress in the Pre-Professional program or do not meet the minimum Pre-Professional GPA or who need to repeat any individual Pre-Professional course more than two times will need to meet with their advisor to develop an Academic Intervention Plan before moving forward. The Academic Intervention Plan is intended to help the student attain technical competency before progressing any further in their major. The plan may require the student to take fewer courses in the subsequent semester and postpone enrolling in particular engineering courses.

4.2 Admission to the Professional Engineering Program from the Pre-Professional Engineering Program

To apply for admission into the Professional Engineering Program, students must complete all Pre-Professional Engineering Program courses and meet the major-specific admission requirements identified in the table below and described in the engineering degree maps. Only students currently in the Pre-Professional Engineering Program can apply to the Professional Program, and they may only apply to the Professional Engineering Program that is consistent with their current declared major. To be considered for the Professional Engineering Program, students must complete the Admission/Permission Application for the Professional Program. After their application is evaluated, students are notified of acceptance or denial into the Professional Engineering Program.

If students disagree with the denial, they may file an academic appeal. The College of Engineering follows the university policy of academic appeals (Student Standards of Conduct). The College will not entertain more than one academic appeal per student for admission into the Professional Engineering Program. Students should contact their designated academic advisor for questions and assistance in applying to the Professional Engineering Program. Transfer students who have completed the Pre-Professional Engineering Program courses at another institution may apply to the Professional Engineering Program after they have been accepted into the Pre-Professional Engineering Program.

Students should apply to the Professional Engineering Program midway through the semester they will complete all Pre-Professional Engineering Program courses. Students may request permission to take a limited number (not to exceed 15 credits) of upper-division (junior and senior) courses if they:

- are within 10 credit hours of completing the necessary Pre-Professional Engineering Program requirements
- have submitted a Professional Engineering Courses application for permission
- have 0.20 above the major's minimum required GPA
- are registered for all remaining Pre-Professional Engineering courses

Students requesting authorization to take upper-division (junior/senior) courses must have a Pre-Professional Engineering Program GPA at least 0.20 points higher than their major's minimum required Pre-Professional Engineering Program GPA. The final decision for granting permission to take upper-division (junior/senior) classes before formal admission to the Professional Engineering Program rests with the designated academic advisor and the Associate Dean of Engineering for Academics.

TABLE 4.1 REQUIREMENTS FOR ADMISSION TO THE PROFESSIONAL ENGINEERING PROGRAM FROM THE PRE-PROFESSIONAL PROGRAM			
Department	Minimum Pre-Professional GPA*	Number of Allowable Repeats in the Pre-Professional Engineering Program**	Minimum Allowable Grade in Pre-Professional Engineering Program Courses
Biological Engineering	2.30	3	C-
Civil & Environmental Engineering	2.50	3	C-
Electrical & Computer Engineering	2.80	3	C-
Mechanical & Aerospace Engineering	2.80	3	C-
School of Computing	2.50	3	C-

*Department catalog pages list the courses included in the Pre-Professional Engineering Program and the courses used to calculate the Pre-Professional Engineering Program GPA. Although ENGL 2010, Intermediate Writing, is required in the Pre-Professional Engineering Program, it is not used to calculate the Pre-Professional Engineering Program GPA for all majors except Civil & Environmental Engineering. A final decision on admission into the Professional Engineering Program will not be made until after the applicant has completed at least 15 semester credits of acceptable engineering, math, and science coursework at USU with the required GPA. Some of this coursework may include upper-division classes taken by permission. After a student enrolls in courses at USU, only USU coursework is included when calculating engineering-specific GPAs. Non-USU engineering coursework continues to factor into repeat and minimum grade requirements.

**The repeated course requirement includes courses that are audited or receive a Passing grade. Retaking a course multiple times counts as multiple repeats. If a student surpasses the number of repeated courses, they will need to enter an academic intervention plan (refer to 4.1)

5.0 Professional Engineering Program

The Professional Engineering Program refers to the major-specific courses in the junior and senior years of each degree program. The Professional Engineering Program includes required courses and technical elective courses on advanced engineering topics. The Professional Engineering Program curriculum of each major has been designed by department faculty to meet the expectations of ABET accreditation standards, graduate programs, and professional societies.

Enrollment in upper-division engineering courses (3000-level and above) is available only to students who have been accepted into the Professional Engineering Program or an appropriate graduate program. Once admitted, students in engineering majors are assigned a faculty mentor who can help them select technical elective courses and identify areas of interest appropriate to a student's career goals.

Engineering courses are also available to students in majors outside of the College of Engineering if their major includes engineering courses as part of the required curriculum. Before these students can be authorized to take the required engineering course(s), they must pass the course prerequisites with a C- or better.

The minimum upper-division GPA, the allowable number of repeated courses, and an allowable number of credits with a "D" grade vary for each Professional Program Engineering major. Department requirements are listed below:

TABLE 5.0 DEPARTMENTAL ACADEMIC REQUIREMENTS FOR THE PROFESSIONAL ENGINEERING PROGRAM				
	Allowable Credits with a "D" Grade	Allowable Number of Repeats	Minimum Allowable Professional Program GPA**	Number of Allowable Courses with "P" Grade
Biological Engineering	0	3	2.00	0
Civil & Environmental Engineering	10	3	2.00	0
Electrical & Computer Engineering	10	3	2.00	0
Mechanical & Aerospace Engineering	0	1 per course	2.00	0
School of Computing	0	No Limit	2.50	0

*The allowable repeated course requirement includes courses that are audited or receive a Passing grade. Retaking a course multiple times counts as multiple repeats.

**Courses taken for Pre-Professional Engineering Program requirements and University Studies courses are not included in this GPA calculation.

5.1 Professional Engineering Program Intervention and Ineligibility

A student may be required to develop an Academic Intervention Plan in the Professional Program for the following reasons:

- The student exceeded the allowed hours of D for their specific major
- The student exceeded the allowed number of repeats for their specific major
- The student's Professional Program GPA dropped below the required minimum allowable professional program GPA

A hold is added to the student's account to prevent them from registering in future semesters. To have the hold removed, students must meet with their engineering advisor to review Professional Program requirements and make a plan to correct the existing academic standard violations and return to good standing in the Professional Engineering Program.

Students in the Professional Engineering Program who are no longer eligible for graduation have their status changed to preparatory engineering until they declare a new major.

6.0 Graduation Requirements

Students are eligible for graduation when the following criteria are met:

- Completion of all Professional Engineering Program requirements
- Completion of all university degree requirements university degree requirements

- Successful completion of the FE Exam (Civil & Environmental Engineering and Biological Engineering only)

Students may apply for graduation anytime during their senior year; however, to be considered for graduation for a specific semester, students must apply by the deadline specified on the Registrar's Office website. It is recommended students meet with their advisor at least two semesters before graduation to verify the correct courses will be completed in the final year.

7.0 Undergraduate Scholarships

Utah State University offers a variety of scholarships specifically for incoming students, both first-year and transfer students. Some scholarship opportunities for incoming students do not require any action on the student's part to be considered. When students apply to the university for admission, they are automatically considered for these awards, which are generally based on academic performance such as GPA and ACT scores. Other awards may require a separate application for consideration.

Additionally, the College of Engineering awards endowed scholarships annually on a competitive basis to first-year students as well as current and transfer students. Online applications are accepted each year between January 1 and January 31.

8.0 Undergraduate Research Opportunities

Utah State University's Undergraduate Research Program is the second oldest in the nation. Students have the opportunity to work closely with research faculty and to pursue their own research projects. College of Engineering students are encouraged to obtain research experience through the Undergraduate Research Fellows Program (URF), Undergraduate Research & Creative Opportunities Grants (URCO), and Engineering Undergraduate Research Program (EURP). For information on these research programs, visit the Undergraduate Research Opportunities website. Additionally, faculty members often accept undergraduate research assistants to assist on funded research projects, and students are encouraged to contact faculty directly regarding participation in research projects.

See the Research Centers and Labs section for more information.

9.0 Undergraduate Student Resources

The College of Engineering provides specialized academic, extra-curricular, and hands-on resources free of charge to help ensure academic and professional success.

9.1 Engineering 360°

Engineering 360° is an innovative program designed to enrich a student's engineering education and equip them with the skills needed for a standout professional career. It serves as a comprehensive guide to enhance the engineering student's academic journey and prepare them for the future.

9.2 Student Clubs and Organizations

College of Engineering students are encouraged to enhance their leadership, communication, and teamwork skills by participating in college-wide and departmental student clubs and organizations. Participation in student clubs provides opportunities for networking, research, professional development, and regional/national conferences and competitions.

Additionally, over 100 USUSA Clubs provide service, involvement, and academic opportunities to students across campus.

9.3 Student Success Resources

The College of Engineering enhances students' skill development and academic success through no-cost access to academic support services and hands-on facilities including the:

- Open-Access Computer Lab: Provides poster printing services and over 75 technical software programs.
- IDEA Factory: Through access to specialized equipment and machines, students can work with consultants in a hands-on environment to create personal and class-related projects.
- Metal Factory: Students can work on senior design and class projects through access to a wide variety of tools including fabrication tools, grinders, hand power tools, lathes, mills, presses, and welders. A conference room is also available for reservation.
- Engineering Tutoring Center: Engineering tutors with knowledge of a variety of math and engineering subjects provide one-on-one assistance to students through online or in-person appointments.
- Engineering Writing Center: Through one-on-one writing consultations, students refine their technical writing skills for class-related projects and homework.
- Engineering Design Lab: Provides access to 3D printing and over 75 technical software programs. Reservations can be made for an event or club use.
- Engineering Math Resource Center: The Math Resource Center is intended to provide resources to students for learning the principles of mathematics that will be essential for future careers in engineering.

9.4 Notice of Non-Discrimination

In its programs and activities, including in admissions and employment, Utah State University does not discriminate or tolerate discrimination, including harassment, based on race, color, religion, sex, national origin, age, genetic information, sexual orientation, gender identity, or expression, disability, status as a protected veteran, or any other status protected by university policy, Title IX, or any other federal, state, or local law.

Utah State University is an equal opportunity employer and does not discriminate or tolerate discrimination including harassment in employment including in hiring, promotion, transfer, or termination based on race, color, religion, sex, national origin, age, genetic information, sexual orientation, gender identity or expression, disability, status as a protected veteran, or any other status protected by university policy or any other federal, state, or local law.

Utah State University does not discriminate in its housing offerings and will treat all persons fairly and equally without regard to race, color, religion, sex, familial status, disability, national origin, source of income, sexual orientation, or gender identity. Additionally, the university endeavors to provide reasonable accommodations when necessary and to ensure equal access to qualified persons with disabilities.

For further information regarding non-discrimination, please visit the Office of Equity or contact the university's Title IX Coordinator.

---

10. Concurrent Bachelor's/Master's Program

The Concurrent Bachelor's/Master's (BS/MS) Program allows engineering students to begin taking graduate-level classes during the final year of their undergraduate program, which permits students to complete requirements for both the BS degree and the MS degree simultaneously. Since many graduate courses are taught during alternate years, students in this program have a greater selection of graduate courses. After completing BS degree requirements, students in the Concurrent Program can

earn a Master of Science degree in one additional year. Both the Bachelor of Science and the Master of Science degree can generally be earned with 150-156 total credits, although a Plan C MS degree requires 3 additional credits. During the second year of the Concurrent Program when the student is within 21 credits of completing both degrees, students will pay graduate tuition and fees. Students in the Concurrent Program are eligible for loans but not grants.

Each College of Engineering department has unique requirements for Concurrent Program eligibility. To be considered for admission into the Concurrent Program, students must:

- Complete a bachelor's degree graduation application
- Contact the department to determine eligibility (see the department graduate program coordinator for assistance with the application process)
- Apply and be admitted to the USU School of Graduate Studies
- Take the GRE and submit scores to the School of Graduate Studies
- Submit the Program of Study to the graduate committee and School of Graduate Studies for approval
- Submit a Split Registration Form each semester enrolled in the Concurrent Program
- Select an approved faculty advisor to determine the coursework in the Program of Study
- Select a graduate committee, which must be approved by the School of Graduate Studies

Once admitted to the Concurrent Program, students must maintain a 3.00 or higher GPA in courses approved for the Concurrent Program. If the student's GPA falls below the 3.00 GPA requirement, the student is ineligible for the Concurrent Program and cannot enroll in graduate courses.

11. Graduate Programs

Through involvement in cutting-edge research and participation in courses taught by nationally recognized faculty, students who earn graduate degrees in engineering become world-class leaders and researchers in high-level, specialized positions in their chosen fields of study. Faculty are committed to the success of their graduate students and work closely with them as mentors in both research pursuits and career advisement.

The College of Engineering offers 21 graduate programs leading to Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. Master of Science degrees have three plans:

- Plan A: Research, Thesis, and Coursework
- Plan B: Project, Report, and Coursework
- Plan C: Coursework Only

The following table outlines the graduate program offerings in the College of Engineering. Please see the departmental graduate program coordinator for more information regarding program requirements.

GRADUATE PROGRAMS					
	Master of Science (MS) Plan A	Master of Science (MS) Plan B	Master of Science (MS) Plan C	Master of Engineering (ME) Plan C	PhD
Biological Engineering					
Biological Engineering	X	X	-	X	X
Biomanufacturing	X	X			
Civil & Environmental Engineering					
Civil & Environmental Engineering	X	X	-	X	X
Irrigation Engineering	X	X	X	-	X
Electrical and Computer Engineering					
Electrical Engineering	X	X	-	X	X
Computer Engineering	X	X	-	X	-
Space Systems Engineering	-	-	X	-	-
Electrical and Computer / Master of Business Administration (MBA)	-	-	-	X	-
Engineering Education	X	X	-	-	X
Mechanical and Aerospace Engineering					
Mechanical Engineering	X	X	X	-	X
Aerospace Engineering	X	X	X	-	X
Space Systems Engineering	X	-	-	-	-
Composite Materials and Structures	-	-	X	-	-

For information about graduate programs and specific admission requirements, see the following departmental websites:

- Biological Engineering
- Civil and Environmental Engineering
- Electrical and Computer Engineering
- Engineering Education
- Mechanical Engineering, Aerospace Engineering, and Space Systems Engineering

11.1 Application Deadlines

Graduate school application deadlines are department or program specific. Once received by Utah State University, the time to process an application may take six to eight weeks. When an application is complete, it is forwarded to the department or program for review. To apply for admission to a graduate program, students must submit their completed application by the following deadlines. Incomplete applications will not be considered for admission.

APPLICATION DEADLINES BY DEPARTMENT, COLLEGE OF ENGINEERING*				
	Fall Enrollment/Admission		Spring Enrollment/Admission	
	Domestic Applicants	International Applicants	Domestic Applicants	International Applicants
Biological Engineering	March 15	February 15	July 15	June 15
Civil and Environmental Engineering	January 15	January 15	October 1	October 1
Electrical and Computer Engineering	January 1 (1st review) May 1 (2nd review)	January (1st review) May 1 (2nd review)	July 1 (1st review) Sept 1 (2nd review)	July 1 (1st review) Sept 1 (2nd review)
Engineering Education	February 1	February 1	n/a	n/a
Mechanical and Aerospace Engineering	Last Day of February	Last Day of February	August 30	August 30

*Application dates listed are for full funding consideration.

11.2 Graduate Admission Requirements

For admission to a graduate program, potential students are required to:

- Complete the online application and pay the non-refundable $55 fee through the School of Graduate Studies
- Possess a BS degree OR a MS/ME degree from an accredited college or university
- Meet departmental requirements for minimum GPA for the student's last 60 credit hours (identified below by academic department)
- Provide official transcripts from previously attended colleges or universities, including Utah State University
- Take the Graduate Record Examination (GRE) and submit scores. NOTE: some degree programs have eliminated the GRE requirement; see the table below for GRE requirements
- Submit three letters of recommendation that address the applicant's potential for success in the proposed graduate program
- Provide a statement of purpose (as required by the specific department

Specific departmental requirements are identified in the table below:

MS/ME AND PHD ADMISSION REQUIREMENTS (X INDICATES REQUIRED ITEMS)						
	Minimum GPA for last 60 semester credit hours*	Official Transcripts	GRE	Letters of Recommendation (3)	Statement of Purpose	Resume/Curriculum Vitae (CV)
Biological Engineering	3.00	X	-	X	X	-
Civil and Environmental Engineering	3.00	X	-	X	-	-
Electrical and Computer Engineering	3.00	X	-	X**	X	X
Engineering Education	3.00	X	-	X	X	-
Mechanical and Aerospace Engineering	3.30	X	-	X**	-	-

*For courses taken on the quarter system, the last 90 credit hours are evaluated.

**Letters of recommendation are not required for students with a BS in Engineering from USU.

***Letters of recommendation are not required for students with a BS in Mechanical Engineering from USU.

11.3 International Student Graduate Admission Requirements

In addition to the admission requirements listed in the table above and other department-specific requirements, all applicants whose native language is not English must provide university-level English proficiency. Students who have completed two years of college in one of the countries listed below and at an institution in which instruction was in English are considered proficient in the English language and will not be required to provide additional evidence of English language proficiency:

- Australia
- Canada (except Quebec Province)
- New Zealand
- United Kingdom
- United States

The School of Graduate Studies' English language requirement may be satisfied in several ways (see below). Test scores must be sent to the School of Graduate Studies by the testing agency.

- TOEFL score of at least 79 (Internet-based), 213 (computer-based), or 59 (paper based)
- International English Language Testing System (IELTS) score of at least 6.0 overall
- Pearson Test of English (PTE) overall score of at least 53
- Completion of a degree from a university in an English-speaking country
- Utah State University's Intensive English Language Institute (IELI) placement exam score of at least 146.

NOTE: English proficiency test scores are valid for two years. Proof of English language proficiency is rarely waived.

11.4 Financial Aid and Graduate Assistantships

Utah State University provides options to help students finance their education through graduate tuition awards and graduate assistantships, fellowships, and scholarships. Graduate students may be eligible to receive graduate tuition awards for the resident and/or nonresident portion of tuition through the following graduate tuition awards:

- Alumni Legacy Waiver
- Research Nonresident Tuition Waiver
- Nonresident Tuition Waiver

Other financial aid opportunities include:

- Supplemental Language Tuition assistance for graduate students who are required to take language credits
- Federal College Work-Study (FAFSA application required)
- GI Bill benefits (for information, visit the USU Veteran's Affairs website

Graduate students in research-oriented degree programs may have the opportunity to work on paid, part-time research projects with the College of Engineering faculty. Research Assistantships are awarded on a competitive basis from the individual grants of major professors. For more information on research assistantships, scholarships, fellowships, and grants, visit the departmental websites below:

- Biological Engineering
- Civil and Environmental Engineering
- Electrical and Computer Engineering (contact the departmental Graduate Program Coordinator for funding information)
- Engineering Education
- Mechanical and Aerospace Engineering

11.5 Graduate Advising

Graduate program coordinators (GPCs) play a key role in supporting the success of graduate students throughout their program of study. GPCs are a critical link between students' academic department and the School of Graduate Studies. GPCs assist graduate students with deadlines, program of study completion, and thesis/dissertation requirements. Graduate program coordinators work with graduate students from program acceptance to graduation and are the first point of contact for questions or concerns.

11.6 Major Professor and Graduate Committee

Once admitted to a graduate program, the student selects a major professor and graduate committee, which must be approved by the School of Graduate Studies. The proposed master's program of study must be approved by both the student's graduate committee and the School of Graduate Studies. The student's major professor acts as a mentor and provides guidance through the graduate program. Major professors can:

- Recommend courses to include in the program of study
- Help define research projects and research questions
- Provide feedback on written materials
- Assist in preparation of proposals, theses, dissertations, and dissertation defenses
- Assist in preparation for comprehensive exams (Ph.D. students only)

The student and major professor should identify prospective graduate committee members based on their potential contributions to the student's academic and research program. The graduate committee will approve the program of study, direct comprehensive exams (if required), supervise and provide feedback on research, and conduct the student's defense. It is the responsibility of the student to approach potential committee members regarding their participation and role within the committee as well as the student's proposed work.

11.7 Student Registration Status

A full-time matriculated graduate student must be one of the following:

- Registered for 9 or more graduate credits
- Registered for 6 or more graduate credits if employed as a graduate assistant for 15 hours per week or more
- Registered for 3 graduate credits with all required coursework completed and only the research component of the degree remaining (the student's Program of Study must have been submitted to the School of Graduate Studies)
- Registered for at least 3 graduate credits during the semester of the final thesis/dissertation defense or, in a non-thesis degree program, the last semester of coursework required on the student's Program of Study

11.8 Program Academic Rules and Policies

Graduate students are expected to know the requirements and standards of their specific program and to assume full responsibility for meeting the following requirements:

- All students are required to maintain an overall GPA of 3.00 or better for all courses listed on their official program of study
- Graduate students must also maintain at least an overall 3.00 GPA for ALL courses taken at Utah State University, including any extra courses of personal interest and required make-up courses
- Make-up courses must be taken for a grade and cannot be taken for pass/fail
- If at any time a student's overall GPA for those courses listed on the official program of study falls below a 3.00, the student will be placed on academic probation by the USU School of Graduate Studies
- In any semester while the student is on probation, if the GPA for that semester falls below 3.00, the student may be suspended as a candidate for an advanced degree
- No USU scholarship funding or tuition waiver will be available during the suspension
- Reinstatement to the degree program or a change from non-degree to degree seeking status will require a petition to the Department Head for approval
- Pass (P) grades are accepted only for seminars, special problems, interdisciplinary workshops, theses or dissertation research, and continuing graduate advisement
- Students must have authorization from their academic major advisor to enroll in more than 18 credits a semester

11.9 Program Forms

Graduate students are responsible for the timely submission of all program forms at specific points in the program of study. All academic forms for Master of Science degrees (Plans A, B, and C) as well as Doctoral degrees can be found on the School of Graduate Studies website. Submission instructions are on each form. Forms must be submitted and approved at the appropriate time or authorization to defend a thesis or dissertation will not be granted. For information about academic forms, students should contact their graduate program coordinator.

Students are required to submit a Program of Study (POS) form to the School of Graduate Studies by the end of the second semester for Master of Science degrees and by the end of the third semester for Doctoral degrees. The Program of Study is a contract between the student, the student's graduate committee, and the School of Graduate Studies outlining the courses the student will take to meet the School of Graduate Studies requirements and complete the degree program. Revisions to a Program of Study can be made by contacting the Graduate Program Coordinator who will update the courses; major professors and department heads will receive the revision for approval.

11.10 Residency Requirements

Utah law requires students who have not previously acquired a residency at a Utah school of higher education to maintain a physical presence in Utah for 12 continuous months and meet other criteria as outlined on the Admissions website. The following alternatives and exemptions may apply:

A 12-month physical presence in Utah is not the only route to gaining residency. Alternatives to the Utah law are identified on the admissions website.

Exemptions exist for students who are active duty U.S. Military service members or veterans OR are a dependent of active duty U.S. Military service members or veterans. An online application must be submitted

Deadlines and instructions are found on the admissions website. The Admissions Office also hosts Information sessions to answer questions about the residency process.

11.11 Transfer Credits

Provided Utah State University residency requirements are or will be met, a student's graduate committee may recommend the transfer of graduate credits earned at another accredited institution under the following conditions:

- The credits **must not** have been used for another degree
- No more than 12 semester credits taken at Utah State University or another institution prior to matriculation at Utah State University may be used in a program of study for a graduate program at Utah State University
- Credits with Pass (P) grades may be transferred only with committee approval; some College of Engineering departments do not allow credits with a P grade
- Transfer credits do not count toward required residency credits
- Transfer credits are subject to approval of the supervisory committee and the Vice Provost of Graduate Studies
- Transfer credits are subject to the same time limit as Utah State University course credits
- Transfer credits will be shown on official Utah State University transcripts upon completion of the degree

11.12 Waiving Courses

Students who have previously taken a course similar to a core course in the program of study at a different institution may petition to waive that course to take another course. Prior approval must be obtained by the:

- Student's major professor
- Instructor of the course at Utah State University
- Students' graduate committee

Students must submit the following documents in consideration of the waiver:

- Syllabus of previous course taken, which is reviewed against the syllabus of the core course. The course instructor determines if the two classes are similar enough to qualify for a waiver
- Documentation of the final grade from the course. Student must have obtained a minimum grade of B for the class to qualify
- Supplemental materials as requested

Please note the following requirements regarding course waivers:

- Courses waived must be made up with a core class
- Students who are granted waivers must still earn the total credit hours required for their academic program
- Courses such as special topics and independent study will not be accepted
- Two course waivers maximum are allowed per student

11.13 Auditing Courses

Admitted students may register to audit a class, dependent on space, resource availability, and instructor approval. No credit or grade points will be granted. The regular tuition and course fees will be assessed. At no future time may students request or receive credit for the audited course by any other means than by officially registering for the course and doing the required work. Audit requests, approved by the instructor, must be submitted to the Registrar's Office, and tuition and fees must be paid before class attendance is permitted. Students are not permitted to register as auditors prior to the first day of classes for any given semester. The instructor's authorization must be submitted within three business days of being signed.

Students who are registered for a class and would like to change to an audit registration may do so through the Adding Classes deadline, which also coincides with the **Last Day to Drop without Notation on Transcript**. Students who drop after this period must receive a W (withdrawal) grade and may not register as an auditor.

11.14 Continuous Graduate Registration

Graduate students using university facilities or faculty time must be registered for a minimum of 3 graduate credits every semester (except summer semester) until completion of all degree requirements, except, in some cases, the semester of final thesis or dissertation approval (see below). Students employed as graduate assistants or graduate instructors during all semesters, except for summer semester, must be registered as full-time matriculated students. More than 3 credits of continuous registration may be required by a department. Continuous registration may be met with courses, seminars, independent study, research credit, or 6990 or 7990 (Continuing Graduate Advisement). The continuous registration requirement goes into effect the semester a student matriculates in the School of Graduate Studies.

A graduate student who is not using university facilities or faculty time may meet the continuous registration requirement by paying the Continuous Registration Fee of $100 per semester (not necessary for summer semester). This alternative requires a written request from the department head, including verification that the student is not using university facilities and/or faculty time. International students usually do not qualify to pay the Continuous Registration Fee because of immigration regulations.

The semester a student defends (or redefends) a thesis, Plan B paper, or dissertation or takes final oral examinations, he or she must be registered for at least 3 credits. Doctoral and master's Plan A, Plan B, and Plan C students will be given until the last day of the next semester (known as a "grace" semester) following the defense to finish degree requirements, and Plan C students will be given until the last day of the next semester after coursework completion to finish degree requirements. If a student has

not completed all degree requirements by the end of the grace semester, the student must pay a $100 Late Completion Fee for each semester following the grace semester. If working with faculty involves more than routine submission of the thesis or dissertation to the assistant dean, registration for 3 or more credits is required. After one year, re-defense may be required.

11.15 Academic Honesty and Research Misconduct

Maintaining the highest standards of academic honesty and research ethics is especially important at the graduate level, where students are expected to do original, scholarly work in preparation for future professional and academic roles. Academic dishonesty is defined in The Code of Policies and Procedures for Students at Utah State University (revised September 2009) Article VI, Section 1 to include cheating, falsification of information, and plagiarism. Violations of this policy will subject the offender to the university disciplinary procedures as outlined in Article VI, Section 3 of the Student Code, with the penalties or disciplinary measures to include one or more of the following:

- Probation: continued participation in an academic program predicated upon the student satisfying certain requirements as specified in a written notice of probation. Probation is for a designated period of time and includes the probability of more severe disciplinary penalties if the student does not comply with the specified requirements or is found to be committing academic integrity violations during the probationary period. The student must request termination of the probation in writing.
- Performance of community service.
- Suspension: temporary dismissal from an academic program or from the university for a specified time, after which the student is eligible to continue the program or return to the university. Conditions for continuance or readmission may be specified.
- Expulsion: permanent dismissal either from an academic program or from the university.
- Assigning a designation with a course grade indicating a violation involving academic integrity. Conditions for removal may be specified, but the designation remains on the student's transcript for a minimum of one year provided, however, once the student's degree is posted to the transcript, the designation may not be removed thereafter.
- Denial or revocation of degrees.

Research is a vital part of the education of any graduate student, and appropriate scientific and research conduct is required. An allegation of scientific misconduct involving funded research is handled through the Office of Research. If the research is not externally sponsored, the allegation is handled following The Code of Policies and Procedures for Students at Utah State University.

Research misconduct may be determined during a student's program or after the program is completed. If a student is found guilty of research misconduct, the penalty may include correction and reanalysis of data and/or rewriting of the thesis or dissertation, with resubmission and re-defense of the thesis or dissertation, and/or loss of financial assistance. If the misconduct is found to have been knowingly or deliberately committed, the penalty may include dismissal from a program or revocation of an awarded degree.

11.16 Time Limit

A Master of Science degree must be completed within six years of entering the degree program; a PhD degree must be completed within eight years of entering the degree program. Coursework that is more than eight years old may not be used for a graduate degree unless it is revalidated. If permitted by the departmental or interdepartmental degree program policy, a supervisory committee may allow revalidation, following a plan developed by the supervisory committee and approved by the Vice Provost of Graduate Studies. The results must be verified in writing to the Vice Provost by the student's major professor or other person(s) responsible for the revalidation. Work experience cannot be substituted for out-of-date coursework or used for revalidation, except where that work experience can be documented to have involved the use of current knowledge and application of material currently covered in the course.

Graduate credits from another institution that exceed the eight-year limit at the time of degree completion may be transferred to a Utah State University graduate degree only if the student's supervisory committee provides justification acceptable to the Vice Provost of Graduate Studies. The revalidation procedures described above will apply.

11.17 Institutional Training

Graduate students are required to complete specific training and have access to other opportunities to enhance academic and professional skills while networking with professors and peers outside the classroom. Graduate program coordinators and the School of Graduate Studies can provide more information regarding these trainings, including required trainings.

- New Graduate Student Orientation (required): Orientation may be held face-to-face or in the form of a Canvas course.
- Research Scholars Orientation: Typically occurs a week before the beginning of classes in the fall semester and immediately following the New Graduate Student Orientation. If in-person attendance is not possible, students can watch a video through Canvas and take a quiz.
- Fall Research Scholars Forum: Typically occurs during the fall semester. A Canvas video and quiz are available for students not able to attend in person.
- Spring Research Scholars Forum: Typically occurs in the spring semester. A Canvas video and quiz are available for students not able to attend in person.
- Responsible Conduct of Research Module (online): provided by the Collaborative Institutional Training Initiative (CITI).
- FERPA Training: Graduate students who will be participating as a teaching assistant in a course and will be handling grades are required to complete the online FERPA training.
- Student Sexual Misconduct Prevention Training: All incoming graduate students are required to take this online course during their first semester at USU.
- Employee Sexual Harassment Prevention Training. Graduate students who are Teaching Assistants or otherwise employed at the university are required to complete an online employee sexual harassment prevention training.
- USU 7920 Teaching Assistant Workshop for Graduate Teaching Assistants: This workshop is a zero-credit course mandatory for all graduate teaching assistants. Students must be registered before their funding will be processed. This class is online and is offered every semester. Graduate TAs are required to take this course only once.
- USU 6900 Research Integrity for Graduate Research Assistants and Undergraduate Researchers: The Research Integrity course provides an introduction to key topics of Responsible Conduct of Research, which helps students and researchers understand their responsibilities related to proper research conduct and the regulations that ensure research is scientifically sound, ethical, and safe. This understanding is critical for any career in scholarly research, whether in academics, government, or industry. The following students are required to complete the Research Scholars Certification program:
    - Graduate and undergraduate students as well as postdoctoral fellows who are supported through National Science Foundation funding
    - Trainees supported by some categories of grants from NIH, including training grants, development grants, and dissertation grants
    - Trainees supported through NIFA grants administered by the USDA

11.18 Degree Completion

It is the responsibility of each student to ensure that all degree requirements have been met and procedures are complete for their degree to be awarded. Graduate requirements vary based on the specific graduate degree and are time sensitive. Students are encouraged to work closely with their major professor and graduate program coordinator to ensure submission of forms, defense deadlines, and thesis or dissertation requirements are met.

12. Student Resources

The College of Engineering provides specialized academic, extra-curricular, and hands-on resources free of charge to help ensure academic and professional success.

12.1 Research Centers and Labs

The College of Engineering supports USU's mission as one of the nation's premier land-grant and space-grant universities through extensive groundbreaking research and innovation. Undergraduate and graduate students have the opportunity to work with acclaimed faculty in cutting-edge, funded research across all engineering departments. Research Centers and laboratories include the:

- Utah Water Research Laboratory (UWRL): Located on the Logan River, the UWRL provides research, testing, and training related to hydraulics, modeling, water resources planning, and management, and environmental and natural systems engineering.
- ASPIRE Engineering Research Center: ASPIRE, the only active ERC in Utah, is meeting the nation's electrified transportation challenges by facilitating electrification across all vehicle classes.
- Sustainable Waste-to-Bioproducts Engineering Center: The Center's goal is to develop new bio-based sustainable engineering technologies that convert waste into bioproducts
- Utah Transportation Center: One of 22 federal funded Tier II University Transportation Centers in the nation, the Center works to advance the understanding of transportation systems and infrastructure using state-of-the-art design tools and best practices in planning, design, operations, and management.
- Center for Space Engineering: Comprised of a multidisciplinary group of faculty who conduct research and engineering development through the Space Dynamics Laboratory (SDL), a unit of the USU Research Foundation. SDL works with the Department of Defense, scientific community, and industry in providing powerful remote and in situ sensing solutions as well as supporting NASA's vision to "reveal the unknown for the benefit of humankind."
- Thermohydraulics and Material Properties (TMP) Research Center: USU's TMP Center plays a major role regionally in nuclear engineering research and education through 11 active research faculty with interests in materials characterization and thermal hydraulics.
- Center for Advanced Imaging LADAR: A multidisciplinary team of faculty from engineering and physics conducts research and development of techniques to exploit imaging LADAR data.
- Sant Innovation Laboratories: This 44,000 square-foot space houses up to 20 state-of-the-art engineering labs, a class-1000 clean room, and USU's premier makerspace, the IDEA Factory.

13. Notice of Non-Discrimination

In its programs and activities, including in admissions and employment, Utah State University does not discriminate or tolerate discrimination, including harassment, based on race, color, religion, sex, national origin, age, genetic information, sexual orientation, gender identity, or expression, disability, status as a protected veteran, or any other status protected by university policy, Title IX, or any other federal, state, or local law.

Utah State University is an equal opportunity employer and does not discriminate or tolerate discrimination including harassment in employment including in hiring, promotion, transfer, or termination based on race, color, religion, sex, national origin, age, genetic information, sexual orientation, gender identity or expression, disability, status as a protected veteran, or any other status protected by university policy or any other federal, state, or local law.

Utah State University does not discriminate in its housing offerings and will treat all persons fairly and equally without regard to race, color, religion, sex, familial status, disability, national origin, source of income, sexual orientation, or gender identity. Additionally, the university endeavors to provide reasonable accommodations when necessary and to ensure equal access to qualified persons with disabilities.

For further information regarding non-discrimination, please visit the Office of Equity or contact the university's Title IX Coordinator.

FACULTY - College of Engineering Faculty

College of Veterinary Medicine

Location: Veterinary Medical Education (VME), Room 271 Administrative Suite
UMC: 5605
Phone: (435) 797-2515

Utah Veterinary Diagnostic Laboratory
https://www.usu.edu/uvdl/

The College of Veterinary Medicine (CVM) was approved by the state legislature in 2022 and admitted its inaugural cohort of 42 veterinary students in August 2025, at which time the college became provisionally accredited by the American Veterinary Medical Association-Council on Education. In the summer of 2026, the college moved into the new Veterinary Medical Education (VME) building, allowing the class size to increase to 80 veterinary students. The objective of the CVM is to positively impact every Utahn, and its mission to do that is clear and ambitious: To provide a state-of-the-art professional veterinary medical education leading to completion of the Doctor of Veterinary Medicine (DVM) degree; engage in leading-edge basic and clinical biomedical research; and serve the public and veterinary profession through continuing education, disease control, and outreach to serve the needs of animals and people in Utah and beyond. The CVM is dedicated to graduating exceptional veterinarians who are not only skilled practitioners but also compassionate professionals ready to take on the challenges of animal health with confidence and competence.

The CVM aims to serve the veterinary profession by addressing the state's evolving animal and public health needs. CVM graduates will bring their training and expertise to every corner of the state (and beyond), ensuring that both urban and rural communities benefit from advanced veterinary care. Rural development and sustainability are at the heart of its mission. By fostering veterinary skills and knowledge, the CVM will support the livestock production and equine industries, ensuring these important sectors continue to thrive and contribute to our state's economy and deeply rooted heritage. In addition, with its commitment to innovative veterinary and biomedical research, the CVM and USU more broadly will be increasingly involved in discoveries that improve animal health, advance medical knowledge, and contribute to Utah's growing biomedical industry. Through its Department of Veterinary Clinical and Life Sciences (VCLS), the CVM offers MS and PhD degrees in Biomedical Sciences, and graduate students in those programs engage in cutting-edge research across 7 different areas. Guided by their major professor, graduate students in the program work on research projects that include clinical investigation, basic research and development, and other related activities to prepare them for career options in a variety of scientific fields. In collaboration with the S.J. & Jessie E. Quinney College of Agriculture & Natural Resources, the CVM offers a fully online Master of Public Health (MPH) degree with an emphasis in Veterinary Public Health.

Through the Utah Veterinary Diagnostic Laboratory (UVDL), which is a partnership with the Utah Department of Agriculture and Food, the CVM is on the front lines of protecting animal health throughout Utah and the broader Intermountain Region. The purpose of the UVDL is to provide timely, in-depth, cost-efficient, veterinary diagnostic services to safeguard animal health, protect the agricultural economy, and shield the public against zoonotic diseases (diseases transmissible from animals to humans). By fulfilling those roles, the UVDL serves practicing veterinarians, personnel in regulatory state and federal governmental positions, public health officials, and animal owners.

FACULTY - College of Veterinary Medicine Faculty

Emma Eccles Jones College of Education and Human Services

Dean: Alan L Smith
Location: Emma Eccles Jones Education Building, Room 109
Phone: (435) 797-0634 | **E-mail:** amber.summers@usu.edu
Website: cehs.usu.edu

Executive Associate Dean: Shawn Whiteman, Education 109, (435) 797-9184, shawn.whiteman@usu.edu
Associate Dean for Research: Stephanie Borrie, Education 453A, (435) 797-1388, stephanie.borrie@usu.edu
Associate Dean for Graduate Studies: Jody Clarke-Midura, Education 213, (435) 797-0571, jody.clarke@usu.edu
Associate Dean for Faculty Development and Clinical Programs: Gretchen Peacock, SCCE 457, (435) 797-0721, gretchen.peacock@usu.edu
Associate Dean for Accreditation and Undergraduate Studies: Sylvia Read, Education 101, (435) 797-2714, sylvia.read@usu.edu

Academic Departments and Degrees

The Emma Eccles Jones College of Education and Human Services has the following departments, which offer the degrees shown:

Human Development and Family Studies - CERT, BS, BA, MS, MHDFS, MMFT, PhD
Kinesiology and Health Science - BS, MS, MEd, MHP, MFP, MPH, PhD
Instructional Technology and Learning Sciences - BS, MA, MEd, MS, EdS, PhD
Nursing - CERT, AAS, BSN, RN to BSN (online program)
Psychology - BS, BA, MEd, MS, EdS, PhD
Speech and Hearing Sciences - BS, BA, MS, MA, MEd, AuD, PhD
Special Education and Rehabilitation Counseling - BS, BA, MEd, MS, MRC, EdS, EdD, PhD
Teacher Education and Leadership, School of - CERT, BS, BA, MEd, MS, EdS, EdD, PhD

In addition, the college offers the following degrees:

General Studies - Human Services Major - BS, BA
Interdisciplinary Human Services Studies Major - BS, BA

The Emma Eccles Jones College of Education and Human Services provides preparation programs for prospective teachers, counselors and other professional personnel in education, and professionals in human services areas as well as corporate settings. Students are urged to refer to the more detailed descriptions of departmental programs, majors, and areas of specialization contained in this catalog.

The Emma Eccles Jones College of Education and Human Services participates in the Interdisciplinary Studies Major and General Studies Major, which offers flexibility for qualifying students who cannot identify an existing degree that meets their needs.

Accreditation

Utah State University is accredited by the Association for Advancing Quality in Educator Preparation and approved by the Utah State Board of Education. Students who are licensed to teach in the State of Utah may qualify for licensure in other states and the District of Columbia. Additional program accreditations include: Accreditation Commission for Education in Nursing, American Psychological Association, Commission on Accreditation for Marriage and Family Therapy Education, Council on Academic Accreditation in Audiology and Speech-Language Pathology, Council for the Accreditation of Counseling and Related Educational Programs, and Council on Education for Public Health.

University Studies Requirements

All students graduating from the Emma Eccles Jones College of Education and Human Services must complete the USU University Studies Depth Requirements.

Admission Requirements to Teacher Education

Students wishing to enter the teacher education programs at Utah State University must formally apply for admission and be approved by the Office of the Associate Dean of Accreditation and Undergraduate Studies as well as by the department in which the teaching major is being offered. All applicants are required to pass a criminal background check, meet minimum course grades for prerequisites and throughout the program and exit with a 3.00 overall GPA. Individual departments may also have additional admission requirements. Students are not permitted to enroll in the teacher education professional core classes prior to being admitted to a teacher education program.

Detailed information about admission to teacher education programs should be obtained from a departmental advisor or from the Office of the Associate Dean for Accreditation and Undergraduate Studies.

Teacher Licensing

The Dean of the Emma Eccles Jones College of Education and Human Services is assigned responsibility for the development, approval, and administration of teacher licensing requirements for students.

The Emma Eccles Jones College of Education and Human Services currently offers preservice teacher preparation leading to licensure in over 40 different areas, including early childhood education, elementary education, secondary education, and special education. In addition, advanced programs leading to professional licensure are available for administrators, supervisors, school counselors, school psychologists, school library media specialists, speech-language pathologists, audiologists, educators of the deaf, and specialists in special education. In addition, early childhood, elementary, and special education candidates must take the Utah Foundations of Reading test order to be recommended for licensure.

Facilities

The Edith Bowen Laboratory School is an elementary charter school on the university campus, serving as a research, demonstration, and teacher preparation site. The school enrolls approximately 300 K-6 children annually.

The Emma Eccles Jones Early Childhood Education and Research Center provides educational experiences and resources for teachers and parents that reflect the most current understanding of the social, emotional, physical, and cognitive needs of children in pre-kindergarten, kindergarten, and the primary grades.

Sound Beginnings at Utah State University is an early education program that provides home and center-based services to children with a diagnosed hearing loss whose families want their children to learn to listen and speak.

The Sorenson Legacy Foundation Center for Clinical Excellence (SCCE) provides services for mental health, speech and hearing, and developmental assessment and treatment. It also houses the ASSERT preschool program, the Up to 3 program, the Aggies Elevated program, and housing and financial counseling programs. Integration of clinics and laboratories strengthens interdisciplinary research and enables clinical training as well as supporting clinical services.

The Institute for Disability Research, Policy, and Practice is Utah's university center for excellence in developmental disabilities. Its programs offer students opportunities to participate in multidisciplinary education, research, and service. Students complete clinical and field experiences and may receive financial support through assistantships, internships, stipends, or employment.

The Center for the School of the Future collaborates with education, business, and government to influence policy and practice with the goal of equity for student learning outcomes. The Center also serves as a clearinghouse for validated practices, research findings, educational services, and teaching resources for the improvement of education in pre-kindergarten, kindergarten, and the primary grades.

Academic Departments

The Jon M. Huntsman School of Business includes the academic departments listed below. Information about degrees and curriculum options are listed in the departmental sections of this catalog.

Data Analytics and Information Systems Department
Economics and Finance Department
Management Department
Marketing and Strategy Department
School of Accountancy

Degrees Offered

Majors: Bachelor of Science (BS) and Bachelor of Arts (BA) in Accounting, Data Analytics, Economics, Finance, Information Systems, Management, and Marketing.

Undergraduate Minors: Accounting, Business, Consulting, Economics, Entrepreneurship, Finance, Hotel Management, Human Resource Management, International Business, Leadership and Management, Management Information Systems, Marketing, Marketing Design, Operations and Supply Chain Management, People and Organizations, Personal Financial Planning, Quantitative Finance, Real Estate, and Technical Sales Management.

Graduate Programs: Master of Accounting (MAcc), Master of Business Administration (MBA), Master of Data Analytics (MDATA), Master of Science in Economics (MSE), Master of Financial Economics (MFE), Master of Human Resource (MHR), and Master of Management Information Systems (MMIS).

Student Opportunities (Experiential Learning and Clubs)

The Huntsman School provides students a wide variety of opportunities to gain business experience, make meaningful connections, and put their ever-increasing knowledge to the test outside the classroom. Students benefit from participating in Huntsman School clubs, engaging with some of the many programs, centers, and experiences offered in the Huntsman School, attending Focused Friday events, and completing internships which provide valuable hands-on experience.

Accreditation

Huntsman School of Business programs in business and accounting are accredited by AACSB International—The Association to Advance Collegiate Schools of Business. AACSB is the premier accrediting association for business and accounting programs.

Assessment

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found here.

Mission

Our mission is to develop leaders of distinction in commerce and public affairs.

Vision

As we make strategic decisions in the Jon M. Huntsman School of Business, we aspire to see our investments pay off in the lives of our students. When our students graduate, they will be prepared to add immediate value to the organizations where they work and to practice ethical and responsible leadership in the organizations and community where they choose to serve.

Our students will be identified by the following:

- A strong commitment to ethical leadership
- A sense of purpose and place engendered by global vision
- An ability to create and leverage value through their understanding of entrepreneurial processes
- A mastery of applied and conceptual analytical frameworks

Purpose

Our purpose is to be an engine of growth for our community, the state, the nation, and the world, and to be a career accelerator for our students.

Financial Assistance

The Huntsman School offers a variety of scholarships to undergraduate students. Each graduate program has unique scholarships, fellowships, assistantships, and waivers that are available. Details about offerings are available at http://huntsman.usu.edu/scholarships

Undergraduate Program Requirements

Admission and Graduation Requirements

First-Year and Transfer Students can be admitted to the Huntsman School of Business based on USU's Admission Requirements.

Current USU students in good standing qualify for admission to the Huntsman School of Business and to majors within the Huntsman School.

Huntsman School Admission Details: https://huntsman.usu.edu/undergraduate/apply

Enrollment Restrictions

Many Huntsman School courses have prerequisites and other restrictions requiring adherence. Before registering for courses within the Huntsman School, students should refer to course listings in this catalog or consult with their advisor to ensure they have completed the necessary prerequisites.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School of Business credits required for a Huntsman School of Business degree must be taken from the Utah State University Huntsman School of Business or its departments, which include: Data Analytics and Information Systems Department; Economics and Finance Department; Management Department; Marketing and Strategy Department; and School of Accountancy.

Optional P/D+, D, F Grade Restriction

This option is not available for any required courses for majors and minors in the Huntsman School of Business.

Huntsman School of Business Stop-out Policy

Students with a break in attendance of Huntsman School of Business programs in excess of one year will be subject to the Huntsman School and departmental requirements in effect at the time of their return.

Graduation

To earn a bachelor's degree in a Huntsman School of Business major, a student must have a C or better in HSB business acumen courses and an overall GPA of 2.0 and a 2.5 major GPA. In addition, at least 50 percent of the required Huntsman School of Business credits must be earned from coursework taken from the Utah State University Huntsman School of Business. Students must satisfy all university, Huntsman School, and departmental major requirements to be eligible for graduation. Refer to appropriate sections of this catalog for details.

Minors in Other Business Subjects

Minors are available in other business subjects, as indicated in departmental sections of this catalog.

Section 13. USU Graduate School Deadlines

Section 14. Graduation Application Requirement

Section 15. Reasons Graduate Students Will Be Denied for Graduation

Section 16. Graduation

Section 1. Graduate School Admissions Policies

It is expected that all graduate admissions applications submitted by the program's deadline will be reviewed by the department.

1.1 Application Requirements

The following items **must** be received by the School of Graduate Studies before an applicant's graduate admission application (this application process is the same for graduate certificates) will be considered complete:

A Bachelor's Degree

A bachelor's degree (or, for some doctoral programs, a master's degree), that is or will be completed before the student matriculates in the academic department, from an accredited U.S. college or university or a similarly recognized international university is required for admission to a graduate program.

Three-year bachelor's degrees from accredited or similarly recognized institutions are accepted with the approval of the academic department and the School of Graduate Studies Admissions Director.

Note for International Applicants: The School of Graduate Studies does not accept Higher National Diplomas (HNDs).

A 3.0 or Higher Grade-Point Average

The School of Graduate Studies will calculate GPAs based on the applicant's **cumulative undergraduate GPA**. 30 graduate credits will be taken from an earned graduate degree or degree in progress. **NOTE**: We do not use post-baccalaureate credits to calculate a GPA.

Application Fee

The School of Graduate Studies requires a **$55 ($25 for graduate certificates) nonrefundable application fee** that must be paid electronically via debit/credit card at the time of the application submission. Any other payment method **will not** be accepted.

Refunds are not given for incomplete applications or for non-admittance to a graduate program.

NOTE: Paying the application fee does not guarantee admission to a graduate program.

Application fees will be waived for McNair Scholars and active USU Honors students.

Application Fee Waivers

The School of Graduate Studies does not give out application fee waivers to applicants.

Supplemental Application Materials:

Three Letters of Recommendation

If the applicant has been enrolled in school during the last five years, at least two of the letters must come from individuals who are familiar with and can make an authoritative assessment of the applicant's recent academic performance. The School of Graduate Studies cannot fill out or edit a letter of recommendation request form. The School of Graduate Studies must receive letters of recommendation from the recommender directly and cannot accept copies submitted by the applicant.

Official Transcripts

For admission, the School of Graduate Studies requires official transcripts from each previously attended college and/or university (except Utah State University).

This includes official college transcripts for any concurrent enrollment credit earned if it is not already on the applicant's undergraduate transcript.

Transcripts are considered official when they are:

Sent directly to the USU School of Graduate Studies by mail (see mailing address below) from the applicant's previous institution(s). Sent directly to the USU School of Graduate Studies by email from the applicant's previous institution(s) to graduateadmissions@usu.edu

Submitting Official Transcripts

If an applicant is accepted into a program and matriculates at USU, official copies sent directly from each issuing institution to the School of Graduate Studies will be required within the first semester of attendance. Any student that does not provide official transcripts within the allotted timeframe will have a hold put on their student account by the end of their first semester, preventing future course registration. **This hold will be removed when the School of Graduate Studies receives the student's official transcript with the degree verification.**

Note for International Applicants: Transcripts **not in English** must be accompanied by a notarized translation.

The USU School of Graduate Studies will need a copy sent to us from the applicant's institution, and if the institution does not translate them, then the applicant will need to have a copy sent to a certified translation company.

Companies such as WES and SPANTRAN are frequently used by International Applicants for notarized translation and certifications. Applicants cannot submit transcripts that they translated by themselves, or that were not translated by their school, or a certified translation company and have them considered official.

USU alumni do not need to provide USU transcripts; the School of Graduate Studies will pull them for the applicant.

Any exceptions to the official transcript policy will be based on a departmental review of the applicant's circumstances and materials.

Methods to Submit Official Transcripts

Official transcripts from the applicant's previous institution(s) can be sent to **Utah State University School of Graduate Studies** through mail or email. The applicant or student may also have their official transcripts submitted through the electronic clearinghouse or the official transcripts may be dropped off in person by the applicant or student in a sealed, unopened envelope from the previous institution(s) (see below).

Official transcripts can be mailed to:

Utah State University

School of Graduate Studies
0900 Old Main Hill
Logan, UT 84322-0900

Official transcripts can be emailed to:

graduateadmissions@usu.edu

If by electronic clearinghouse:

Please select: Utah State University School of Graduate Studies Logan, UT, U.S.

Official transcripts may be brought in person by the applicant or student:

The official transcripts in a **sealed, unopened envelope from the previous institution(s)** may also be dropped off by the applicant or student in person, to the School of Graduate Studies Office in the Old Main Building, room 164.

For questions regarding official transcripts, please contact the Utah State University Graduate Admissions Office at graduateadmissions@usu.edu

English Language Proficiency for International Applicants

International applicants are required to submit proof of proficiency in the English language.

Applicants who have completed two or more years of college in one of the countries listed on the Graduate Admissions Policies & Procedures website, and the primary language of instruction is English, are considered proficient in the English language and will not be required to provide additional evidence of English language proficiency.

For applicants that did not attend a minimum of two years in one of the countries listed on the website, the English proficiency requirement can be fulfilled in a few ways:

Applicants that attended schools in countries outside of the list that have English as the official language of instruction may request a letter from their previous institution's registrar's office and have it sent directly to the School of Graduate Studies.

This requirement can also be fulfilled if English is clearly listed as the language of instruction on an official transcript.

Applicants can take one of the approved English Proficiency exams listed below. Applicants should request that the testing agency send official exam scores directly to Utah State University.

TOEFL internet-based (iBT) exam score of 79 or paper-based exam score of 550.

The institution school code for Utah State University is 4857. *

IELTS score of 6.5 overall band score with a minimum of 5.0 on each subscale. *

The Michigan English Test (MET) score of 55.

Cambridge English Exam results of B2 First, C1 Advanced, or C2 Proficiency score of 176.

The School of Graduate Studies accepts Duolingo English test scores as a measurement of English language proficiency. NOTE: Duolingo English Test (DET) score of at least 105.

*All language scores must be official and sent to Utah State University from the testing center where the student took the exam. The Office of Global Engagement and the School of Graduate Studies Admissions Team will be able to access it from there. Scores more than 2 years old are not accepted.

Note on I-20 Applications (International Applicants):

The process for the I-20 begins with the Office of Global Engagement **after** a student is admitted and accepts their offer of admission through their application portal. Because of immigration regulations, international students cannot be admitted to provisional matriculation.

Please contact the Office of Global Engagement with further questions about the I-20.

NOTE: Some degree programs may have additional application requirements. Applicants should refer to their intended program for questions about any required tests, minimum required scores, statement of purpose, any accepted test score alternatives (such as a portfolio), and any other required application materials.

1.2. Application Deadlines

Graduate admissions application deadlines are program specific.

1.3. Application Procedures

Graduate admissions applications are submitted online in the application portal.

1.4 Application Edits

Edits to a graduate admissions application **can only be made before** an application is sent to the department for review. To make changes, applicants can send an email to graduateadmissions@usu.edu. **NOTE:** Once the application has been sent to the department, the School of Graduate Studies is no longer able to make changes to the application.

1.5. Closing Inactive Applications

Applications that have had no activity for 90 days (approximately three months) after the application due date are considered inactive and will be closed. Once an application is closed, it cannot be reopened or considered for future application seasons.

If for any reason an application will not be complete within the three-month period, applicants should contact graduate admissions to ask for a deferment of their application.

It is the applicant's responsibility to defer their application in order to keep it open for another term.

1.6. Using Old Application Materials

The School of Graduate Studies requires all applicants to submit new application materials for each application submitted. This includes transcripts, letters of recommendation, and test scores. **NOTE:** Only official transcripts will be transferred if they are within two years of being submitted to the School of Graduate Studies.

1.7. Deferment

Deferments are available for students who 1.) need to delay their admission to the university or for 2.) those who need to extend their application period.

Students who have accepted their offer of admission and have been admitted to the university have the option to defer their start date. General acceptance into a program may be deferred for up to 1 year. Any amount of time beyond that is subject to approval by the Department, and the Vice Provost for the School of Graduate Studies.

Note for International Applicants: Please be aware that deferment for more than one year may require you to obtain a new I-20. For questions about a deferment as an international student, please contact the Office of Global Engagement.

To obtain a start-date deferral, students must contact their graduate program coordinator. Students have until the end of the semester of their entry term to defer their start date. If they do not take classes or request a deferral before this date, they will have to reapply in the next application cycle for a USU graduate program. Unfinished applications are closed 90 days after the end of the desired entry term. Once an application has been closed, applicants are required to reapply.

Leaves of absence are also available for students who have already completed classes at USU but need to take a break from their graduate program.

Section 2. Graduate Assistantships

A variety of assistantship opportunities are available to graduate students, and all are offered through individual colleges and departments. Students should check with their department to see what assistantships are available. All graduate assistantships entail a stipend and typically includes tuition support, and they are classified as P03 positions within the university employment system. However, different types of assistantships have differing elements, detailed below. Minimum stipend and compensation requirements are determined by the School of Graduate Studies.

2.1. Graduate Assistantship Position Overview

Graduate Assistantships are broken down into a few different positions:

Graduate Research Assistant

Graduate Trainee (Clinical, Library)

Graduate Teaching Assistant

Graduate Instructor

These positions are defined as follows:

Graduate Research Assistant

A graduate research assistant is a graduate student assigned to work under faculty guidance on one or more research projects. Research assistantships are granted through departments. Payment is a living stipend for the period of training. It is not an hourly rate or compensation for work.

Responsibilities:

Work on research projects under faculty guidance. Responsibilities cannot include clinical work or those expected of a teaching assistant, instructor, or grader.

Payment Structure and Performance:

Lump sum stipend disbursed according to the university pay schedule. RAs demonstrating poor performance may be evaluated negatively. Supervisors must provide clear feedback on problematic performance and provide guidance for performance improvement. RAs cannot have their stipend or tuition support rescinded, cancelled, or modified, regardless of absences or performance quality. Further, work associated with a research assistantship cannot be required past the semester of assistantship. However, a research assistantship does not need to be renewed following a semester of poor performance.

If a GRA resigns or otherwise voluntarily initiates termination of their assistantship prior to the scheduled date of position completion for the semester, disbursement of stipend will stop on the date that the resignation or student-initiated termination takes effect. Beginning on the effective date, the student will no longer be considered a trainee, so their total stipend awarded to support living expenses during the training period will be recalibrated to reflect their proportionate participation.

Absence Policy:

Excused absences mirror university hourly employee leave standards. A 0.5 FTE GRA is entitled to 12 hours of excused absences per semester. A 0.25 FTE GRA is entitled to 6 hours of excused absences per semester. Additional absences may be excused at the discretion of the supervisor provided that such decisions are made equitably for all assistants reporting to the supervisor.

Stipulations:

Complete required trainings, including Responsible Conduct of Research.

Health insurance (auto-enrolled in subsidized plan). Limited to 20 work hours per week during the academic year, unless granted a waiver by SGS up to 10 additional hours per week.

Required Terms:

Semester-based appointments only (Fall, Spring, Summer). First day of work = first day of semester; last day of work = last day of semester. NOT obligated to work during non-academic periods or university holidays. May choose to work more than required hours at own volition but cannot be negatively evaluated for choosing not to do so. Assistantship time and effort are separate from activities for which academic credit is received. Time and effort allocated to writing for publication may or may not be considered part of the assistantship. This should be determined in advance by the supervisor and the student.

Graduate Trainee

A Graduate Traineeship (GTR) is for a student to apply theoretical knowledge to real-world practice and gain hands-on experience. Work is done under the direction of an experienced faculty member. Payment is a living stipend for the period of training. It is not an hourly rate or compensation for work.

Responsibilities:

Work is done under the direction of an experienced faculty member in a clinical setting for which supervised professional experience is a foundational component of training in the profession.

Responsibilities cannot include research or the duties of a teaching assistant, instructor, or grader.

Payment Structure and Performance:

Lump sum stipend disbursed according to the university pay schedule.

Trainees demonstrating poor performance may be evaluated negatively. Supervisors must provide clear feedback on problematic performance and provide guidance for performance improvement. In consultation with the department head, trainees with extremely poor performance or poor performance that persists after good faith efforts at feedback and remediation by the supervisor are complete may not have their assistantship renewed for the following semester. Students do not need to repay either tuition or stipend.

If a GTR resigns or otherwise voluntarily initiates termination of their traineeship prior to the scheduled date of position completion for the semester, disbursement of stipend will stop on the date that the resignation or student-initiated termination takes effect. Beginning on the effective date, the student will no longer be considered a trainee, so their total stipend awarded to support living expenses during the training period will be recalibrated to reflect their proportionate participation.

Absence Policy:

Excused absences mirror university hourly employee leave standards. A 0.5 FTE GTR is entitled to 12 hours of excused absences per semester. A 0.25 FTE GTR is entitled to 6 hours of excused absences per semester. Additional absences may be excused at the discretion of the supervisor provided that such decisions are made equitably for all assistants reporting to the supervisor.

Stipulations:

Complete required trainings. Health insurance (auto-enrolled in subsidized plan). Limited to 20 work hours per week during the academic year, unless granted a waiver by SGS up to 10 additional hours per week.

Terms:

The Department has discretion over start and end dates. May be required to start before semester and/or continue work after the semester. Start dates for a semester may be no earlier than the day following the last day of the prior semester, and end dates may be no later than the day prior to the first day of the following semester (e.g., a GTR for Fall semester can encompass, at maximum, dates from the day after the close of the preceding Summer semester to the day before first day of the Spring semester).Must report during assigned employment period. All university holidays apply.

Graduate Teaching Assistant

A graduate teaching assistant (GTA) is a graduate student assigned to assist one or more faculty with instruction. A GTA may lecture in a course occasionally, tutor students, or assist in some other teaching capacity, such as teaching a lab or recitation session under faculty supervision. A position that entails only grading without instructional responsibilities (i.e., grader) is not eligible to be a GTA.

Responsibilities:

Assist faculty with instruction. Lectures occasionally, tutor students. Leads lab/recitation sessions under faculty supervision. Helps to prepare courses before semester begins. Responsibilities cannot include those of a research assistant or trainee.

Payment Structure and Performance:

Paid according to the university pay schedule as an employee. TAs demonstrating poor performance may be evaluated negatively. Supervisors must provide clear feedback on problematic performance and provide guidance for performance improvement. In consultation with the department head, TAs with extremely poor performance or poor performance that persists after good faith efforts at feedback and remediation by the supervisor are complete may be removed from their position. Removal will entail a stop in pay, but tuition support cannot be rescinded. Students do not need to repay either compensation already received or tuition in the event of termination.

Absence Policy:

Excused absences mirror university hourly employee leave standards. A 0.5 FTE GTA is entitled to 12 hours of excused absences per semester. A 0.25 FTE GTA is entitled to 6 hours of excused absences per semester. Additional absences may be excused at the discretion of the supervisor provided that such decisions are made equitably for all assistants reporting to the supervisor.

If absences are able to be anticipated (i.e., not used for illness or emergent medical issue), then they must be scheduled in advance with the supervisor and coordinated to ensure TAs' responsibilities are met to the greatest extent possible. If absences are not able to be anticipated (e.g., due to illness or other emergency), TAs will communicate with their supervisor as soon as possible to inform them of the absence and anticipated return.

Assistantship Stipulations:

Complete required trainings, including CEUS 7901 and 7902.

Health insurance (auto-enrolled in subsidized plan). Limited to 20 work hours per week during the academic year, unless granted a waiver by SGS up to 10 additional hours per week.

Terms:

The Department has discretion over start and end dates. May be required to start before semester (e.g., for class preparation). Start dates for a semester must be after the last day of the prior semester, and end dates must be no later than the deadline for submitting course grades.

Must report during assigned employment period. Teaching Assistant Consensual Relationship Policy applies (see below). All university holidays apply. Can be suspended or terminated.

Graduate Instructor

A graduate instructor (GI) is a graduate student who is the instructor of record for one or more courses for an entire semester.

Responsibilities:

Teaches a course (1) at the undergraduate level; or (2) at the master's level if, and only if, the instructor holds a master's degree at the time of instruction. Responsibilities cannot include those of a research assistant or graduate trainee.

Payment Structure and Performance:

Paid according to the university pay schedule as an employee. Graduate instructors demonstrating poor performance may be evaluated negatively. Supervisors must provide clear feedback on problematic performance and provide guidance for performance improvement. In consultation with the department head, graduate instructors with extremely poor performance or poor performance that persists after good faith efforts at feedback and remediation by the supervisor are complete may be removed from their position. Removal will entail a stop in pay, but tuition support cannot be rescinded. Students do not need to repay either compensation already received or tuition in the event of termination.

Absence Policy:

Excused absences mirror university hourly employee leave standards. A 0.5 FTE GI is entitled to 12 hours of excused absences per semester. A 0.25 FTE GI is entitled to 6 hours of excused absences per semester. Additional absences may be excused at the discretion of the supervisor provided that such decisions are made equitably for all assistants reporting to the supervisor.

If absences are able to be anticipated (i.e., not used for illness or emergent medical issue), then they must be scheduled in advance with the supervisor and coordinated to ensure GIs' responsibilities are met to the greatest extent possible. If absences are not able to be anticipated (e.g., due to illness or other emergency), GIs will communicate with their supervisor as soon as possible to inform them of the absence and anticipated return.

Assistantship Stipulations:

Complete required training, including CEUS 7901, 7902, and 7903.

Health insurance (auto-enrolled in subsidized plan). Limited to 20 work hours per week during the academic year, unless granted a waiver by SGS up to 10 additional hours per week.

Terms:

The Department has discretion over start and end dates. May be required to start before semester (e.g., for class preparation). Start dates for a semester must be after the last day of the prior semester, and end dates must be no later than the deadline for submitting course grades.

Must report during assigned employment period. Teaching Assistant Consensual Relationship Policy applies (see below). All university holidays apply. Can be suspended or terminated.

2.2. Eligibility

To be eligible for a 20 hour/week (0.5 FTE) assistantship, full-time enrollment is required (6+ credits during coursework; 3+ after coursework with Full Time at 3 Credits form).

To be eligible for a 10 hour/week (0.25 FTE) assistantship, full-time enrollment is not required.

2.3. Conditions & Stipulations

Students with Multiple Assistantships

Students may hold multiple assistantships at once as long as the total hours per week across all positions does not exceed 20 (or 30 with a waiver from the School of Graduate Studies). Each assistantship must be processed separately with its own Electronic Personnel Action Form (EPAF). For example, a student with both 0.25 FTE (10 hours weekly) of GRA and 0.25 FTE (10 hours weekly) of GTA would have two separate EPAFs submitted by the supervising department(s)—one for the GRA and one for the GTA.

Graduate Student Health Insurance

All graduate students on a 0.5 FTE assistantship are required to have health insurance. Utah State University automatically enrolls students on a 0.5 FTE assistantship in a subsidized health insurance plan. Students may request to waive out of the subsidized graduate insurance if they have their own insurance coverage that has been approved by the Student Health Insurance Coordinator.

Students who do not opt out by the deadline will be required to pay the premiums for the duration of the plan. Please contact the Student Health Insurance Coordinator at ship@usu.edu for more information.

All Graduate Research Assistants, Graduate Trainees, Graduate Teaching Assistants, and Graduate Instructors must work at least one month during the semester to qualify for the graduate health insurance plan. If a student's assistantship or traineeship ends before the completion of one month, the student does not qualify for the plan, and no premium is assessed to either the student or the department. Once a student meets the 1month minimum, they are eligible for coverage for the entire semester, and both the student and the hiring department are responsible for the full semester premium. If a department terminates a GTA or graduate instructor before the end of the semester, the department remains responsible for its full portion of the premium. If a student resigns or self-terminates before the end of the term, the department is still obligated to pay the full departmental share for that semester.

Departments that require students to sign a Subsidized Graduate Insurance Agreement may recover the departmental portion directly from the student; however, the School of Graduate Studies does not collect these funds on behalf of departments.

Credit Limit

Graduate students with assistantships cannot register for more than 12 credits per semester.

Teaching Assistant Consensual Relationship Policy

Based on USU Policy 4006.9.1, the university's educational mission is promoted by professionalism. Professionalism is fostered by an atmosphere of mutual trust and

respect. Actions that harm this atmosphere undermine professionalism and hinder fulfillment of the university's educational mission. Trust and respect are diminished when those in positions of authority abuse or appear to abuse their power. Those who abuse or appear to abuse their power in such a context violate their duty to the university community.

Graders, graduate teaching assistants, and graduate instructors exercise power over students, whether in giving them praise or criticism, evaluating them, making recommendations for their further studies or their future employment, or conferring any other benefits on them. Amorous relationships between graders, graduate teaching assistants, or graduate instructors and other students are not acceptable to the university when the grader, graduate teaching assistant, or graduate instructor has professional responsibility for the student. Such situations greatly increase the chances that the grader, graduate teaching assistant, or graduate instructor will abuse their power and sexually exploit the student. Voluntary consent by the student in such a relationship is suspect, given the fundamentally asymmetric nature of the relationship. Moreover, other students and faculty may be affected by such unprofessional behavior because it places the grader, graduate teaching assistant, or graduate instructor in a position to favor or advance one student's interest at the expense of others and implicitly makes obtaining benefits contingent on amorous or sexual favors. Therefore, the university will view it as unprofessional conduct if graders, graduate teaching assistants, or graduate instructors engage in amorous relations with students in certain situations, even when both parties appear to have consented to the relationship.

No grader, graduate teaching assistant, or graduate instructor shall have an amorous

relationship (consensual or otherwise) with a student who is enrolled in a course in which the grader, graduate teaching assistant, or graduate instructor has responsibilities related to any of those roles.

Section 3. Student Classifications

3.1. Matriculated Graduate Students

Matriculated Graduate Students are those accepted by a department, with the approval of the Vice Provost of Graduate Studies, into a graduate degree program. A student may be accepted on a **conditional** basis.

Conditional acceptance is granted when a student has prerequisites that need to be addressed.

The conditions and deadline for satisfying these requirements must be provided to the student by the department to which the student is accepted. Failure to meet these conditions may result in termination from the program.

A **full-time matriculated graduate student** must be one of the following:

Registered for 9 or more graduate credits.

Registered for 6 or more graduate credits if employed as a graduate assistant for 15 hours or more per week.

Registered for 3 graduate credits* meeting one of the following:

- All coursework is complete, with only the research component (thesis or dissertation) remaining.
- The semester of final thesis, Plan B paper/project, or dissertation defense.
- The last semester of coursework required on the student's Program of Study for non-thesis students.

***Students registered for 3 credits must have an approved Program of Study and an approved Full-Time at 3 Credit (FT3) form.**

A graduate student on academic warning or probation has failed to make adequate progress in their degree program. Individual departments are responsible for determining and communicating the specific conditions and timeline for correcting the academic deficiencies.

This information will be provided to the student in writing and must be approved by the department head. Failure to meet these conditions by the specified deadline may result in the student's removal from the degree program.

3.2. International Graduate Students

An international student must be admitted to a degree program and hold a valid F-1 or J-1 visa before enrolling in classes at Utah State University. A student on an F-1 or J-1 visa must maintain full-time student status throughout the degree program. For more information, please contact the Office of Global Engagement.

Section 4. General Regulations for Graduate Study

Each graduate student and graduate program coordinator/director are responsible for knowing and following the policies, regulations, procedures, and timelines of the School of Graduate Studies and of their program. The School of Graduate Studies is responsible for communicating any new or updated policies or procedures to both graduate program coordinators/directors and students. Graduate program coordinators/directors are responsible for ensuring that up-to-date information regarding policies and procedures is communicated to their graduate students. Students are responsible for understanding any new and updated information.

4.1. Required Sexual Misconduct Prevention Training

All Utah State University students **are required** to complete the Student Sexual Misconduct Prevention Training each academic year.

NOTE: If students are also employed on campus, then they must complete the required employee sexual misconduct prevention training, **in addition to** the student sexual misconduct prevention training.

New graduate students can sign up for a training in Learn Blue.

Continuing graduate students can access the training directly on the training website.

Students who do not complete this training will receive a **registration hold** and will not be able to register for the following semester. **NOTE:** The hold will be removed once the training has been completed. Please contact the Civil Rights & Title IX Office at training@usu.edu with any questions regarding this required training and its deadline.

4.2. Grades, Credits, & Course Number Acceptability

4.2.1. Course-Level Numbering and Acceptability

7000-7989 are doctorate-level courses. With supervisory committee and instructor approval they may be used in a master's program.

6000-6989 are master's-level courses. With supervisory committee approval they may be used in a doctoral program. A minimum of 18 credits may be used on an approved program of study.

5000-5990 are advanced, upper-division courses. A maximum of 12 credits may be used on an approved program of study.

4.2.2. Auditing Courses

For information regarding auditing a course, please review the Auditing Classes section of the USU General Catalog.

4.2.3. Special Topics & Independent Study Courses

Departments may create their own policies regarding special topics and independent study courses, provided they do not conflict with any University or Graduate School policies.

4.2.4. Semester Credit Limit

Students must have authorization from their department to enroll in more than 18 credits a semester and submit the Registration Action Form request for approval.

4.2.5. Minimum Grades and Credit Acceptability

Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree. Programs have the right to require a higher minimum grade. Please review individual program catalog pages for minimum grade requirements.

4.2.6. Incomplete (I) - Grade Policy

Incomplete (I) Grade policy information can be referenced directly in the USU General Catalog.

4.2.7. Temporary (T) - Grade Policy

Temporary (T) Grade policy information can be referenced directly in the USU General Catalog.

4.2.8. Pass (P) - Grade Policy

Pass (P) will be accepted only for seminars, special problems, thesis, or dissertation research, and continuing graduate advisement.

4.2.9. Correspondence Course Credits

Distance Education correspondence (independent study) courses are not accepted for graduate degrees.

4.3. Split Form Policy

Undergraduate students at Utah State University who, are in good academic standing and intend to pursue a graduate degree, may file a Split Form. **NOTE:** This form requests to reserve up to **12 semester credits** from their undergraduate record for a future graduate degree.

4.3.1. Split Form Eligibility and Requirements

To get a Split Form approved, a student must a.) apply for undergraduate graduation, b.) be enrolled in at least one required undergraduate class. c.) have a cumulative undergraduate GPA of 3.0 or higher in the semester the form is submitted. d.) apply and pay the application fee to the School of Graduate Studies (see SGS Catalog Section 1: Graduate Admissions Policies above). e.) receive the instructor's permission to register for graduate courses.

4.3.2. Important Considerations

Graduate Admission is Not Guaranteed: Approval of a Split Form does not guarantee admission into the School of Graduate Studies.

Graduate Matriculation: A transitional student will not be officially matriculated into a graduate program until their bachelor's degree has been completed.

No Double-Counting: A course cannot be applied toward the undergraduate and graduate degree.

Deadline: The Split Form must be submitted **before** the student's bachelor's degree is completed and officially posted on their transcript.

4.3.3. Split Form Course Transcripts

By default, undergraduate courses (0010–4990) are posted to the undergraduate transcript.

Graduate courses (6000–7990) are posted to the graduate transcript. The posting of 5000-5990 level courses will not count towards a graduate degree unless it is included on an approved split form and the course level has been changed by the Office of the Registrar.

4.3.4. Requesting the Split

Undergraduate students who meet the qualifications must submit a Split Form to the School of Graduate Studies to specify which courses should be "split out" for their graduate degree.

4.4. Transfer and Nonmatriculated Credits

4.4.1. Transferring Graduate Credits

Credit Limit: Master's and doctoral students may transfer **a maximum of 12 graduate** semester credits from other accredited institutions into a graduate program at Utah State University.

Source: These credits may include those earned with a "P" grade.

Transfer Restrictions: Credits cannot have been used toward another degree.

Approval Process: All transfer credits require approval from both the student's supervisory committee (major professor if a supervisory committee is not required) and the Vice Provost of Graduate Studies. For credits with a "P" grade, committee approval is specifically required.

Transcript Display: Approved transfer credits will appear on the official Utah State University transcript upon completion of the degree.

4.4.2. Transferred Nonmatriculated Credits

These stipulations apply to transferred nonmatriculated credits: **no more than 12 semester credits taken at Utah State University or another institution prior to matriculation at Utah State University may be used in a program of study, if approved by the student's supervisory committee**. **NOTE:** This is not applicable to certificates.

4.5. Concurrent Graduate Degrees

Students may pursue concurrent master's degrees or concurrent master's and doctoral degrees. This requires approval from the cooperating departments and the Vice Provost of Graduate Studies.

4.5.1. Admissions Process

Apply to the First Program: A student must first submit a standard application (see SGS Catalog Section 1: Graduate Admissions Policies) and be admitted into their first graduate degree program.

Apply for Concurrent Status: Once admitted to the first program, the student may apply for a second degree program by submitting a Concurrent Degrees form to the School of Graduate Studies.

Meet the Deadline: For the degrees to be considered concurrent, admission to the second degree program must be finalized before the end of the second semester in the first degree program.

4.5.2. Concurrent Degree Credit Overlap Limit

A **maximum of 9 credits** may overlap between the two degree programs **with departmental approval**. This overlap allows a student to complete both degrees with up to 9 fewer total credits for the second degree than would otherwise be required for two separate degrees.

4.5.3. Credit Application

Allocated courses will not be applied to both degrees. Shared (concurrent) credits may not be applied to both degrees. The first degree will be awarded upon completion of its full minimum credit requirement. The second degree will reflect the approved credit overlap, and the shared coursework will not be listed on its Program of Study.

4.5.4. Concurrent Master's-Master's Degree Programs

In special cases, a student may concurrently complete the requirements for two master's degrees, in the same or in different departments, with fewer than the total credits required, provided that the following conditions are met:

· The student must submit a Concurrent Degrees request and be accepted into the second program or prior to completing 50% of the credits required for the first program.

· For students doing two professional degrees or one professional degree and one research degree (M.S. or Ph.D.) there are no special rules for the construction of supervisory committees beyond what is normal in each program.

· Students doing concurrent research degrees will have two supervisory committees, one for each program.

· The major professor for one degree program must be a member on the committee for the other degree program.

· The other committee members for the two supervisory committees need only follow SGS and program guidelines and faculty may serve on both supervisory committees. *

***The Supervisory Committee form and Program of Study must be in accordance with the School of Graduate Studies and program requirements.**

For questions about policies regarding Supervisory Committees, please review SGS Catalog Section 6 below.

4.5.5. Concurrent Doctoral-Master's Degree Programs

In special cases, a student may complete concurrently all requirements for a doctoral degree and a master's degree with fewer than the total credits required by both programs, provided that the following conditions are met:

· The student must submit a Concurrent Degrees request and be accepted into the second program or prior to completing 50% of the credits required for the first program.

· For students doing two professional degrees or one professional degree and one research degree (M.S. or Ph.D.) there are no special rules for the construction of supervisory committees beyond what is normal in each program.

· Students doing concurrent research degrees will have two supervisory committees, one for each program.

· The major professor for one degree program must be a member on the committee for the other degree program.

· The other committee members for the two supervisory committees need only follow SGS and program guidelines and faculty may serve on both supervisory committees. *

***The Supervisory Committee form and Program of Study must be in accordance with the School of Graduate Studies and program requirements.**

For questions about policies regarding Supervisory Committees, please review SGS Catalog Section 6 below.

4.5.6. Concurrent Doctoral-Doctoral Degree Programs

Students are not permitted to enroll concurrently in two doctoral programs when both programs require the completion of a dissertation.

· Two scholarly dissertations would place overlapping demands on research, scholarly output, and faculty oversight that are not compatible with the institution's expectations for original, independent doctoral-level work. However, a capstone project with an applied emphasis for a professional doctorate and a traditional dissertation with a scholarly emphasis reflect complementary rather than overlapping objectives.

· Students are permitted to enroll concurrently in two doctoral programs when one program requires a dissertation and the other requires a practicum or capstone, provided that the following conditions are met:

· In these cases, the nature of the practicum or capstone—being applied, supervised professional practice rather than a major research study—does not conflict with the scholarly requirements of producing an original dissertation. The scope and objectives of the practicum/capstone and the dissertation may not overlap.

· The student must submit a Concurrent Degrees request and be accepted into the second program or prior to completing 50% of the credits required for the first program.

· Students doing concurrent doctoral degrees will have two supervisory committees, one for each program.

· The major professor for one degree program must be a member on the committee for the other degree program.

· The other committee members for the two supervisory committees need only follow SGS and program guidelines and faculty may serve on both supervisory committees. *

***The Supervisory Committee form and Program of Study must be in accordance with the School of Graduate Studies and program requirements.**

For questions about policies regarding Supervisory Committees, please review SGS Catalog Section 6 below.

4.6. Graduate Student Leave of Absence

A leave of absence may be granted under the following conditions:

· Illness, required military service, and other extenuating circumstances acceptable to the department head and the Vice Provost of Graduate Studies.

· Lack of availability of courses.

· Participation in a planned program based primarily on summer semester courses.

· For the second or third condition to apply, the student must have an approved Program of Study.

To request a leave of absence, a Leave of Absence request must be approved by the department head and submitted to the School of Graduate Studies. A leave of absence may be the basis for extending the time limit to complete a degree, but not to extend the time limit for course validity. A student needing to extend an approved Leave of Absence should contact their Graduate Program Coordinator.

Should the reason for leave change, a new submission and approvals are required. **International students should note** that taking a leave of absence will affect their immigration status. For questions, international students should contact the Office of Global Engagement.

Students who take a leave of absence from the university should note that this will affect the status of their federal or private student loan status. Students will need to contact their loan servicer for more information.

Prior to requesting a leave of absence, students are responsible for dropping courses in accordance with all university calendar deadlines and procedures. All students on a leave of absence will maintain their IT access for one year beginning the semester that they take a leave of absence.

Any additional time after the allotted one year will need special permission from the student's home department and the School of Graduate Studies. **Time spent on a leave of absence does not count toward the six-year time limit for completing a master's degree, as set by the School of Graduate Studies.** The duration of the leave will be subtracted from the time calculated from the original matriculation date.

Example: If a student begins their master's program in Fall 2020 and takes a one-year leave of absence from Fall 2022 to Fall 2023, their six-year completion window will be extended to Fall 2027 instead of Fall 2026.

NOTE: This policy does not apply to the eight-year revalidation policy, which is outlined separately in SGS Catalog Section 4.10.2. below.

4.7. Continuous Enrollment

· To maintain full-time status graduate students are required to be registered for the appropriate number of credits in both fall and spring semesters. Graduate students are considered to be active in summer even when not registered for credits.

· **Note for International Students:** Summer is considered a vacation semester for students who were enrolled in spring and intend to enroll the following fall semester. International students must be enrolled full-time in the summer if summer is their first or last semester.

· Full-time enrollment can mean different things: 9 credits (at least 6 of which must be in-person for international students), 6 credits with a .37 - .5 FTE assistantship, at least 3 of which must be in-person, or 3 credits with an approved Full Time at 3 Credits (FT3) form, all of which must be in-person.

· If less than 3 credits are needed to graduate, then international students who need full-time status must enroll in a minimum of 1 in-person credit with an approved Reduced Course Load (RCL) form.

· A Reduced Course Load (RCL) form cannot be used after the completion of the grace semester (for more information about the grace semester, please see SGS Catalog Section 4.8. below).

· If International Students have any questions about the Full-Time at 3 Credits (FT3) form or the Reduced Course Load (RCL) form, they should contact the Office of Global Engagement.

4.8. Grace Semester

Doctoral and master's students will be given until the last day of the next semester (spring, summer or fall) following a successful defense to complete remaining degree requirements. This is the "grace semester" and does not require students to be registered for credits unless needed to remain compliant with F-1 or J-1 visa criteria.

If a student has not completed all degree requirements by the end of the grace semester, the student must register for at least one (1) credit in any semester during which degree requirements will be completed, including a second defense. International students should consult with the Office of Global Engagement regarding SEVIS regulations to determine how many credits they are required to take to remain compliant with F-1 or J-1 visa criteria.

If all degree requirements, including the submission of a final thesis, Plan B paper/project, or dissertation to USU Libraries, are not complete by the conclusion of the grace semester, then the student must defend the thesis, Plan B paper/project, or dissertation a second time. See definitions of minor and major revisions and their relationship to the need to defend a second time described in SGS Catalog Section 12.5: During the Final Defense. The major professor, with support of all members of the supervisory committee, may submit an appeal to the Vice Provost of Graduate Studies, justifying why the student should not be required to defend the thesis, Plan B paper/project, or dissertation a second time.

4.9. Complete Withdrawal from the University

4.9.1. For Matriculated and Enrolled Graduate Students

To initiate a complete withdrawal from a graduate program, email the School of Graduate Studies at gradforms@usu.edu, the student's A-number will be needed. The withdrawal date is in accordance with the registration calendar.

4.9.2. For Newly Admitted Students

If the student has not yet registered for courses or have only applied, they must contact graduateadmissions@usu.edu to withdraw. To re-enroll, these students must formally reapply to the School of Graduate Studies and resubmit all supplementary documents for departmental review.

4.9.3. Prior to Withdrawing

Students are responsible for dropping their individual courses in compliance with university deadlines and procedures. This is required before the university will process a complete withdrawal.

Note for International Students: International students should note that taking a complete withdrawal from the university will affect their immigration status. For questions, international students should contact the Office of Global Engagement.

NOTE: Students who take a complete withdrawal from the university should note that this will affect the status of their federal or private student loan status. Students will need to contact their loan servicer for more information.

4.9.4. Deadlines

Once final examinations for a semester have begun, a complete withdrawal is no longer possible. Students who do not complete the withdrawal process by the deadline will receive grades and academic credit earned for their courses, which will be included on their transcript.

4.9.5. Readmission

A student who completely withdraws must be formally readmitted to the university before re-enrolling.

4.10. Graduate Degree Time Limit & Coursework Revalidation

4.10.1. Graduate Degree Time Limit

Master's Degrees

A master's degree must be completed **within six years** of entering the degree program.

Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.

Doctoral Degrees

A doctorate degree must be completed **within eight years** of entering the degree program.

Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.

4.10.2. Coursework Revalidation

· Coursework **more than eight years old** at the time of degree completion may not be used for a graduate degree unless it is revalidated.

· If permitted by the departmental or interdepartmental degree program policy, a supervisory committee may develop and submit a revalidation plan to the Vice Provost of Graduate Studies for approval. Revalidation entails some activity which demonstrates the student's current knowledge of the full scope of the course's content as specified in the syllabus.

· Committees have wide latitude in the types of activities proposed for revalidation (e.g., essay, project, oral exam). However, no program benchmark assessment (e.g., qualifying exam, comprehensive exam, thesis/Plan B paper or project/dissertation proposal) may be used for revalidation.

· The plan and determination must be verified in writing and include the Vice Provost of Graduate Studies and the student's major professor or other person(s) responsible for the revalidation. Work experience cannot be substituted for out-of-date coursework or used for revalidation, except where current work experience can be documented to have involved the use of current knowledge and application of material currently covered in the coursework, as documented in the original course syllabus.

· Graduate credits from another institution exceeding the eight-year limit at the time of degree completion may be transferred to a Utah State University graduate degree only if the student's supervisory committee provides a justification acceptable to the Vice Provost of Graduate Studies.

· The revalidation procedures described above apply.

4.11. Academic Nepotism

A faculty member is not to participate in admission or graduate assistant employment decisions, serve as major professor, or serve on the supervisory committee of a relative, including a person with whom the faculty member has or has had an amorous relationship. Graduate students may enroll in classes taught by a relative only under special conditions. For information, contact the department head or the School of Graduate Studies.

4.12. GPA Policy & Low-GPA Notification for Graduate Students

Graduate students are required to maintain at least a 3.0 GPA for degree-program courses.

It is a department's right to require a higher GPA. Please check the program's catalog for specific GPA requirements. The School of Graduate Studies will notify GPCs, GPDs, and/or Department Heads of students whose cumulative or overall GPA is below 3.0 at the completion of fall and spring semesters. The department will then notify and coordinate with the students to ensure their future success. If a student's institution GPA remains below 3.0 for two consecutive semesters, the student may be placed on probationary status, and their graduate program may be terminated.

4.13. Matriculation of Faculty

Except under unusual circumstances, it is the policy of the university not to grant graduate degrees to its own faculty members, where the degree satisfies a prerequisite for appointment or advancement in rank. Requests for exceptions must be individually considered and approved by the provost based on appropriate recommendations. Please see Faculty Policies for more information.

4.14. Monitoring of Progress

The student's department and the School of Graduate Studies monitor the progress of graduate students. For continued participation in a graduate program, a student must complete all requirements in a timely manner. In reviewing a student's progress, several factors will be considered, including demonstrated ability to develop a thesis proposal, independence in the conduct of research, performance on comprehensive examinations, GPA, and special program requirements. Satisfactory progress also involves maintaining the standards of professional ethics and integrity expected in the student's discipline.

Section 5. Research and Intellectual Property

5.1. Regulatory Approval & Responsible Conduct

All University research involving human subjects, animal subjects, radiation materials, recombinant DNA, biohazardous materials, certain highly toxic chemicals, restricted foreign parties, or export-controlled items must be reviewed and approved by the appropriate University committee(s) before the research is started.

Graduate students are, with the assistance of their advisors, responsible for obtaining the necessary approval for their research. Verification of regulatory approval must be submitted to the School of Graduate Studies before the student's master's Thesis/Project Approval Form or doctoral Application for Candidacy can be approved.

For further information, please contact Research Integrity and Compliance.

5.1.1. Responsible Conduct of Research (RCR)

· All research degrees (doctoral, MS/A, and MFA) are required to complete the Responsible Conduct of Research course offered on the CITI website. Doctoral degrees include Ph.D., Au.D., Ed.D., and DVM.

· RCR training is also required for any students who are supported by funding from some federal agencies (NSF, USDA-NIFA).

· Graduate students who are supported by funding from the NIH are required to complete a face-to-face component through the Division of Research Integrity and Compliance.

· If a Master's Plan B paper/project requires research, the student's Committee will require completion of the RCR CITI Training.

· Completion of RCR training is required as part of the initial Supervisory Committee Approval (SCAF) form for master's and doctoral students (for more information, please review SGS Catalog Section 6: Supervisory Committees below).

For more information about the Responsible Conduct of Research Training, please check out the USU RCR website.

5.2. Academic Honesty and Research Misconduct

Maintaining the highest standards of academic honesty and research ethics is especially important at the graduate level, where students are expected to do original, scholarly work in preparation for future professional and academic roles.

Academic dishonesty is defined in The Code of Policies and Procedures for Students at Utah State University Article VI, Section 1 to include cheating, falsification of information, and plagiarism. Students who violate any item of the above policy will be subject to the University disciplinary procedures as outlined in Article VI, Section 3 of the Student Code.

5.2.1. Research Misconduct

Research misconduct is defined as fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results.

Fabrication means making up data or results and recording or reporting them.

Falsification means manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.

Plagiarism The appropriation of another person's ideas, processes, results, or words without giving appropriate credit. Plagiarism includes the unattributed verbatim or nearly verbatim copying of sentences and paragraphs from another's work that materially misleads the reader regarding the contributions of the author. It does not include the limited use of identical or nearly identical phrases that describe a commonly used methodology. Plagiarism does not include self-plagiarism or authorship or credit disputes, including disputes among former collaborators who participated jointly in the development or conduct of a research project.

Research Misconduct does not include honest errors, differences of opinion, or publication disputes. Research is a vital part of graduate education; therefore, appropriate scientific and research conduct is not only expected, but required.

Allegations of research misconduct involving funded research are handled through the Office of Research. If the research is not externally sponsored, allegations are handled following The Code of Policies and Procedures for Students at Utah State University. Research misconduct may be determined either during or after a student's program.

Students found guilty of research misconduct may face penalties including:

· (1) correction and reanalysis of data

· (2) and/or rewriting of the thesis or dissertation, with resubmission and a new defense required,

· (3) and/or loss of financial assistance.

· If the misconduct is found to have been knowingly or deliberately committed, the penalty may include dismissal from a program or revocation of an awarded degree.

5.2.2. Reporting Suspected Research Misconduct

USU employees or students who learn of potential Research Misconduct are encouraged to submit a claim for appropriate review.

Claims can be submitted through:

USU's Research Integrity and Compliance Office

435-797-0485

compliance@usu.edu

USU's Ethics & Compliance Hotline

A Dean, Director, or Department Head, who has a duty to pass the claim to the Research Integrity & Compliance Office

5.2.3. How are Research Misconduct Allegations Reviewed?

The Research Integrity & Compliance Office maintains Research Misconduct Procedures.

These procedures meet federal standards and are reviewed and approved by the Office of Research Integrity within Health & Human Services. All allegations will undergo an assessment phase as soon as possible, and if sufficient credible evidence is present, will move to an inquiry and/or investigation phase. **NOTE:** Because the definition of Research Misconduct is narrow, not all allegations may fall under Research Misconduct. Non-Research Misconduct improprieties will be referred to other offices on campus as appropriate (Human Resources, Provost, etc.).

5.3. Appeals Procedure

Graduate students with grievances relating to academic matters may appeal to the Vice Provost of Graduate Studies following the steps and procedures outlined in The Code of Policies and Procedures for Students at Utah State University.

NOTE: For any questions related to Responsible Conduct of Research (RCR) and Research Misconduct, please contact the Research Integrity & Compliance Team.

Section 6. Supervisory Committees

All full-time faculty and staff at USU eligible to serve on Supervisory Committees must be members in good standing of the USU graduate faculty.

Individuals who are affiliated with other institutions or have limited USU affiliations (e.g., adjunct instructors, emerita and emeritus faculty) can be appointed to serve as committee members on an ad hoc basis through a separate process, which requires approval from the appropriate Department Head and the Vice Provost for Graduate Studies.

6.1. Master's Plan A and Plan B

A completed initial Supervisory Committee Approval form should be submitted to the School of Graduate Studies for final approval **by the end of the student's second semester**.

· As part of the initial Supervisory Committee Approval (SCAF) form, completion of Responsible Conduct of Research (RCR) CITI Training is required for all MS/A (thesis), MA, and MFA students.

· It is also required for all students funded by NIH, NSF, or USDA-NIFA.

· If a Plan B paper/project requires research, the student's Committee will require completion of the RCR CITI Training.

· The School of Graduate Studies does not require proposal defenses for Plan B papers/projects **that do not include empirical research**

· Additionally, the training may be recommended for any master's student if their committee determines it is appropriate for the student's thesis or project.

· RCR CITI Training must be completed **before** the initial SCAF form is submitted.

· **NOTE:** If the SCAF form does not have all required committee roles filled and the completed RCR training (if required), it will be denied.

See SGS Catalog Section 5.1.1., for further information about the Responsible Conduct of Research requirement or contact Research Integrity and Compliance.

A master's degree supervisory committee must include **at least three members** who hold a master's degree or higher and are members of the USU Graduate Faculty. If the degree is a Plan A, all members must have completed a thesis or dissertation.

· **The major professor must be from within the student's department. At least one member** must represent the student's area of specialization, **and at least one member** must be from outside the home department or specialization area and a member of the USU Graduate Faculty in good standing.

· **NOTE:** For special accommodations, the department must receive approval from the Vice Provost of Graduate Studies.

· It is permissible for one member of the committee to be affiliated with an outside institution, affiliated with USU on a part-time basis (e.g., adjunct faculty), or an emeritus or emerita; this individual can only be added to a committee with the permission of the appropriate Department Head and the Vice Provost for Graduate Studies.

While it is the expectation that all members of a thesis or Plan B paper/project committee uphold these values, the specific role of the outside member of a thesis or Plan B paper/project committee is to ensure the success of the thesis/Plan B paper or project process for the student with regard to three primary goals:

· A fair, ethical, and humane process for the student.

· Rigorous academic and intellectual experience that yields meaningful insights accessible to the disciplinary and broader communities.

· And safeguarding against "group think" or tacit expectations that may not be intuitive or evident to the student.

Within School of Graduate Studies and departmental requirements, the supervisory committee for a master's degree does the following:

· Determines courses for the student's Program of Study.

· Conducts any required departmental qualifying examinations.

· Supervises the student's thesis research, Plan B paper/project, or other degree project.

· Conducts the defense or final examination.

NOTE: The defense or final examination must be scheduled through the School of Graduate Studies. The major professor, who serves as the chairperson of the committee, usually directs the thesis, Plan B paper/project, or other degree project.

· A faculty member should not serve on a supervisory committee if, for any reason, they will not be available for committee meetings.

· All committee members must attend the defense at the date and time registered with the School of Graduate Studies.

· Members of the committee are permitted to participate remotely with both audio and video interaction. Students should work with their committee members to arrange defense participation and details prior to submitting an Appointment for Thesis/Project/Dissertation Defense form.

· Changes to a supervisory committee must be documented and approved by submitting a Supervisory Committee Revision form to the School of Graduate Studies and **cannot be made during the six weeks prior to the defense** without a written request from the Department Head and approval of the Vice Provost of Graduate Studies.

· No committee member should agree to proceed with a defense until they have carefully read and approved the thesis or Plan B paper/project.

· Co-Advisors can be from any department but cannot also serve as the committee member from outside the department or specialization area.

· After the final defense of a Plan A thesis, the student should submit their finalization paperwork and finished manuscript to the School of Graduate Studies for review.

· Plan B papers/projects **are defended but are not formally reviewed** by the School of Graduate Studies, nor signed by the Vice Provost of Graduate Studies. Instead, they must be submitted directly to USU Libraries and uploaded to the **institutional repository**. See Plan B Report/Creative Project Submission Form. Once accepted, **USU Libraries personnel will notify** both the student and the School of Graduate Studies.

· Once approved, the manuscript will either be uploaded to USU's institutional repository or, if the student wishes to embargo their work, submit their physical manuscript to USU Libraries. USU Libraries personnel will notify the student and the School of Graduate Studies once the manuscript is accepted.

6.2. Doctoral Degrees

A completed initial Supervisory Committee Approval form should be submitted to the School of Graduate Studies for approval **by the end of the student's third semester**.

· As part of the initial Supervisory Committee Approval (SCAF) form, completion of Responsible Conduct of Research (RCR) CITI Training is required for all doctoral students and any master's student whose committee deems it appropriate for their student to take.

· It is also required for all students funded by NIH, NSF, or USDA-NIFA.

· RCR CITI Training must be completed **before** the initial SCAF form is submitted.

· **NOTE:** If the SCAF form does not have all required committee roles filled and the completed RCR training will be denied.

See SGS Catalog Section 5.1.1., for further information about Responsible Conduct of Research requirement or contact Research Integrity and Compliance.

· A doctoral supervisory committee must include **at least five members** who hold a terminal degree (e.g., Ph.D., other doctorate, or terminal master's degree such as an M.F.A.). The committee must consist of a major professor from inside the student's department, and at least **three members from within the student's department** and **at least one member who is a member of the USU Graduate Faculty with an appointment outside either, the department or, interdepartmental degree-granting program, in which the student is enrolled; all of these individuals must be members in good standing of the USU graduate faculty.**

· **NOTE:** For special accommodations, the department must receive approval from the Vice Provost of Graduate Studies.

· It is permissible for one member of the committee to be affiliated with an outside institution, affiliated with USU on a part-time basis (e.g., adjunct faculty), or an emeritus or emerita; this individual can only be added to a committee with the permission of the appropriate Department Head and the Vice Provost for Graduate Studies.

· All committee members must have completed a dissertation or thesis requirement similar to that which the graduate student is completing.

While it is the expectation that all members of a dissertation committee uphold these values, the specific role of the outside member of a dissertation committee is to ensure the success of the dissertation/thesis process for the student with regard to three primary goals:

· A fair, ethical, and humane process for the student.

· Rigorous academic and intellectual experience that yields meaningful insights accessible to the disciplinary and broader communities.

· And safeguarding against "group think" or tacit expectations that may not be intuitive or evident to the student.

Within the School of Graduate Studies and departmental requirements, the doctoral supervisory committee does the following:

· Determines courses for the student's Program of Study.

· Oversees any qualifying examinations and comprehensive examination, unless another departmental or program procedure is in place. *

· Approves the dissertation proposal.

· Supervises the student's research and preparation of the dissertation.

· Participates in or conducts departmental annual reviews.

· Conducts the final oral examination.

NOTE: The major professor is the chairperson of the committee and usually directs the student's research. Continuation in a doctoral program is contingent upon the availability of a major professor.

*Some departments or interdepartmental programs administer qualifying examinations. Each program has the responsibility of administering comprehensive examinations. The School of Graduate Studies does not have a policy regarding the nature of student comprehensive exams. Departments may dictate their own policies on this matter, provided that they do not violate University and School of Graduate Studies policies.

· A faculty member should not serve on a supervisory committee if, for any reason, they will not be available for committee meetings. All committee members must attend the defense at the date and time registered with the School of Graduate Studies.

· Members of the committee are permitted to participate remotely with both audio and video interaction. Students should work with their committee members to arrange defense participation and details prior to submitting an Appointment for Thesis/Project/Dissertation Defense form.

· Changes to a supervisory committee must be documented and approved by submitting a Supervisory Committee Revision form to the School of Graduate Studies and **cannot be made during the six weeks prior to the defense** without a written request from the Department Head and approval of the Vice Provost of Graduate Studies.

· No committee member should agree to proceed with a defense until they have carefully read and approved the dissertation.

· After the final defense of a dissertation, the student should submit their finalization paperwork and finished manuscript to the School of Graduate Studies for review.

· Once approved, the manuscript will either be uploaded to USU's institutional repository or, if the student wishes to embargo their work, submit their physical manuscript to USU Libraries. USU Libraries personnel will notify the student and the School of Graduate Studies once the manuscript is accepted.

6.3. Concurrent Research Degrees and Supervisory Committees

· Students doing concurrent graduate degrees will have two supervisory committees, one for each program (please see SGS Catalog Section 4.5.4. for concurrent master's-master's degree programs, Section 4.5.5. for concurrent doctoral-master's degree programs, and Section 4.5.6. for concurrent doctoral-doctoral degree programs, for further information about concurrent degree programs and supervisory committees).

· The major professor for each degree program must be a member of the supervisory committee for the other program. The other committee members for the two supervisory committees need only follow SGS and program guidelines and faculty may serve on both supervisory committees.

· The Supervisory Committee form and Program of Study must be in accordance with the School of Graduate Studies and program requirements.

6.4. Committee Members from Outside of the Department

It is the expectation that all members of a thesis/Plan B paper or project/dissertation committee uphold these values, the specific role of the committee member from outside of the department is to ensure the success of the thesis/Plan B paper or project/dissertation process for the student with regard to three primary goals:

· A fair, ethical, and humane process for the student.

· A rigorous academic, and intellectual experience that yields meaningful insights accessible to the disciplinary and broader communities.

· And safeguarding against "group think" or tacit expectations that may not be intuitive or evident to the student.

NOTE: The role of committee members from outside the department can only be filled by a member of the USU graduate faculty in good standing. While an individual from outside USU may be added to the committee, they are not eligible to fulfill the formal "outside committee member" role. All committee members, including members from outside of the department, must be approved by the Dean of the College, Department Head, and the Vice Provost of the School of Graduate Studies.

6.5. Committee Members from Outside the University

Committee members from outside the university may serve as a member at large of the committee. They are not eligible to serve as a committee chair or outside member. All committee members, including members outside the university, must be approved by the Dean of the College, Department Head, and the Vice Provost of the School of Graduate Studies.

6.6. Adjunct Faculty

An adjunct faculty member may serve as a member at large of the committee with approval from the Dean of the College, Department Head, and the Vice Provost of the School of Graduate Studies. Adjunct faculty may not fill the role of "Outside Committee Member."

6.7. Emerita/Emeritus Faculty

Emerita/emeritus faculty may continue to serve as committee members or major professors on any committee on which they serve at the time they become emeritus. Emerita/emeritus faculty may shift from chair to member after they leave their normal faculty role, but they may not shift from member at large to chair or shift from member at large to outside member. They may serve as committee members on committees formed after they become emeritus, but not as major professor or outside member.

NOTE: The Department is responsible for ensuring that Emeritus/Emerita faculty retain an A# and IT access.

6.8. Faculty Who Leave Utah State University for Another Academic Institution or Job

Faculty who leave USU for another institution may continue to serve as committee members on graduate student committees upon the request of the department and with approval from the Vice Provost of Graduate Studies. The faculty member is responsible for updating their email in Banner, in order to receive notifications.

On graduate student committees where the departing member is the major professor, there must be a new major professor or a co-major professor who is a member of the graduate faculty in good standing at USU.

Section 7. Program of Study (POS)

7.1. Purpose

The Program of Study (POS) is a formal document outlining the student's graduate coursework. It must meet specific credit requirements based on the student's degree and prior education.

7.2. Program of Study Requirements

Credit Requirements:

Doctoral (with a prior master's degree): At least 18 semester credits at the 6000-level or above.

Doctoral (without a prior bachelor's degree): At least 30 semester credits at the 6000-level or above.

Master's: At least 18 semester credits at the 6000-level or above.

NOTE: A Program of Study is not required for Graduate Certificates.

For questions about graduate degree requirements, please refer to SGS Catalog Section 8 for master's degrees and Section 10 for doctoral degrees.

Coursework Restrictions:

Excluded Credits: Courses below the 5000-level, undergraduate prerequisites, and audited courses cannot be included.

Non-Acceptable Credits: The following are not acceptable for a graduate degree program:

· Continuing graduate advisement

· Individual home study

· Military science

Audited Courses: These cannot count towards a degree program or full-time status.

7.3. Submission Deadline

Master's Degrees: A master's student's Program of Study should be submitted to the School of Graduate Studies for approval **by the end of the second semester, after the Supervisory Committee Form (SCAF) has been submitted and approved**. **NOTE:** Master's Plan C Students do not submit Supervisory Committee Forms.

Doctoral Degrees: A doctoral student's Program of Study should be submitted to the School of Graduate Studies for approval **by the end of the third semester, after the Supervisory Committee form has been submitted and approved**.

7.4. Approval

The student's major professor, department head, committee members, and the School of Graduate Studies will receive an email notification from USU's ServiceNow to review and approve the Program of Study. Once all approvals are obtained, the student and their GPC will receive a final email from ServiceNow with confirmation that the Program of Study was approved.

7.5. Revisions

All changes to the Program of Study (POS) must go through the Program of Study revision approval process. If a student needs assistance with revising their Program of Study, they should contact their Graduate Program Coordinator.

For questions about how to create or revise a Program of Study, students should contact their Graduate Program Coordinator.

NOTE: Students should not wait until their final semester to submit required forms, as doing so may delay graduation. Timely submission is essential to ensure all degree requirements are met without complications.

Section 8. Master's Degree Requirements

Master's Degree Plan Types:

Plan A: The Master's Plan A option requires students to prepare and defend a thesis, which is a significant piece of original research or a new perspective on existing knowledge.

Plan B: The Master's Plan B option requires the completion and defense of a paper or project, depending on the specific department and program requirements.

Plan C/Professional: The Master's Plan C/Professional may be required to enroll in research credits, but thesis credits are not accepted on a Program of Study or applied towards a degree.

Credit Hours Requirement:

The minimum requirement for a master's degree is **30 semester credits**. Certain programs may have higher credit requirements for some master's degrees.

Residency Requirement:

The School of Graduate Studies does not have any academic residency requirements for graduate students, but departments and colleges may impose residency requirements in their programs as they see fit.

Thesis Requirements:

Master's Plan A: Students must complete **a minimum of 6 and a maximum of 15 semester credits** of thesis research (course 6970) as part of their Program of Study.

Master's Plan B: Master's Plan B students must complete **a minimum of 2 semester credits** of thesis research (course 6970); however, **no more than 3 semester credits of thesis research credits** may be included in an approved Program of Study.

Some degree programs may require **creative project credits** in addition to, or instead of, research credits.

NOTE: Registration for thesis credits should correspond with the semesters during which the research is actively conducted, and faculty supervision is provided.

Plan B Paper or Project Overview:

The Plan B paper/project is typically a **literature review**, developed through:

- Conceptualizing an area of inquiry.
- Planning a systematic search.
- Analyzing or critiquing the gathered information.

The resulting summary and conclusions should **enhance the student's understanding of the discipline.**

Publication Policy for Degree Completion:

- The School of Graduate Studies recognizes that scholarly publications are a vital component of graduate training and may be essential for post degree success. Publications or manuscripts of which the student is a co-author may be included if the committee determines that the student made a substantial intellectual contribution to the work.
- Permission to include a publication or manuscript in a thesis/project does not depend on the order of authorship.
- Any included publication or manuscript must be a logical component of the overarching theme or themes addressed by the entire thesis, which, as a whole, must represent the student's individual and original effort.
- The student is responsible for obtaining reprint permission from the copyright holder for any published works included as part of the thesis.
- A program or faculty mentor may require manuscripts to be submitted for publication as part of its degree completion requirements. However, because publication timelines are often subject to external factors, actual acceptance/publication of a manuscript cannot be a degree requirement, and time to degree cannot be extended to accommodate publication of a manuscript.

8.1. Receive Approval on Thesis or Plan B Paper/Project Research Proposal

Students should finalize their thesis or Plan B paper/project topic and present a formal research proposal to their supervisory committee for review and approval.

Action: Students should schedule a proposal meeting with their committee once their topic and research plan are clearly defined.

NOTE: Approval of the thesis or Plan B paper/project proposal is required before significant research or data collection begins.

8.2. Thesis/Project Proposal Approval (TPA) Form

Purpose

· All Master's Plan A and Plan B students should submit a Thesis/Project Approval (TPA) form to confirm they have successfully defended their thesis or Plan B paper/project proposal with committee approval before the final defense. The School of Graduate Studies does not require proposal defenses for Plan B papers/projects **that do not include empirical research**.

· This form is also used to document that the student has obtained any necessary regulatory approval (IRB, IACUC, etc.) (see SGS Catalog Section 5.1 above) and completed any safety trainings necessary. The form should therefore be submitted after the student's committee approves the thesis/project research proposal, and prior to the student conducting their research.

· For updates on IRB regulations and to determine whether a student's research requires IRB approval, view USU's IRB webpage.

· The student, their major professor, committee members, Department Head, and IRB/IACUC (if needed) will receive an email notification from ServiceNow, to review and approve the Thesis/Project Approval form. Once all signatures are obtained electronically, all parties will receive a final email from Service Now with a completed form.

· The student's thesis or Plan B paper/project defense is scheduled after the Thesis/Project Proposal Approval form is accepted **(see SGS Catalog Section 12.2 below for more information about all required forms needed prior to a student's thesis or Plan B paper/project proposal defense)**.

Submission Deadline

· Master's students are encouraged to submit the Thesis/Project Approval (TPA) form **by the end of their second semester, after submitting and receiving approval for the Supervisory Committee Approval Form (SCAF) and the Program of Study (POS),** (see SGS Catalog Section 6.1., for information about the SCAF form, and SGS Catalog Section 7.3., for information about submitting the POS form)**, a successful thesis/project proposal defense, all regulatory approval is in place, and any other required forms for the proposal defense have been submitted and accepted.**

· Verification of regulatory approval must be submitted to the School of Graduate Studies before the student's Thesis/Project Proposal Approval can be approved.

Section 9. Post-Master's Professional Degrees & Graduate Interdepartmental Degrees and Certificates

Post-Master's Professional Degrees:

Educational Specialist (EdS) programs, are designed for students who seek to improve their professional skills and knowledge beyond the master's degree. The minimum requirement for each of these degrees is 30 semester credits beyond the master's degree and 60 credits beyond a bachelor's degree.

Graduate Interdepartmental Degrees and Certificates:

Utah State University offers a number of interdepartmental graduate degrees. A full list of interdepartmental degrees and certificates is available through the School of Graduate Studies Degree Finder.

Section 10. Doctoral Degree Requirements

Credit Hours Requirement:

30 to 60 academic credits beyond a master's degree. **60 to 90 academic credits** beyond a bachelor's degree.

Specific credit-hour requirements vary by department. Students should consult their department for detailed program expectations.

Residency Requirement:

The School of Graduate Studies will not have any academic residency requirements for graduate students, but departments and colleges may impose residency requirements in their programs as they see fit.

Dissertation Credit Requirements:

A minimum of **12 dissertation credits (7970)** for students entering **with a master's** degree.

A minimum of **18 dissertation credits (7970)** for students entering **with a bachelor's** degree.

Dissertation credits should be taken during the semesters when the actual dissertation work is being conducted, and faculty supervision is provided.

Publication Policy for Degree Completion:

The School of Graduate Studies recognizes that scholarly publications are a vital component of graduate training and may be essential for post degree success. Publications or manuscripts of which the student is a co-author may be included if the committee determines that the student made a substantial intellectual contribution to the work.

· Permission to include a publication or manuscript in a dissertation does not depend on the order of authorship.

· Any included publication or manuscript must be a logical component of the overarching theme or themes addressed by the entire dissertation, which, as a whole, must represent the student's individual and original effort.

· The student is responsible for obtaining reprint permission from the copyright holder for any published works included as part of the dissertation.

· A program or faculty mentor may require manuscripts to be submitted for publication as part of its degree completion requirements. However, because publication timelines are often subject to external factors, actual acceptance/publication of a manuscript cannot be a degree requirement, and time to degree cannot be extended to accommodate publication of a manuscript.

Professional Doctoral Degrees – Au.D., Ed.D., and DVM

In addition to research-based doctoral degrees (e.g., Ph.D.), the university offers professional doctoral degrees such as:

· **Doctor of Audiology (Au.D.)**

· **Doctor of Education (Ed.D.)**

· **Doctor of Veterinary Medicine (DVM)**

These degrees differ from traditional research doctorates in the following ways:

· **Focus:** Professional doctorates emphasize advanced practice, clinical training, and application of knowledge in professional settings, rather than original research.

· **Capstone Requirements:** Instead of a dissertation, these programs may require a clinical project, portfolio, or other culminating experience.

· **Credit Requirements:** Credit requirements vary by program and may not follow the same dissertation credit model as Ph.D. programs.

· **Timeline:** Professional doctorates may follow a different academic calendar or progression model, often with integrated internships or residencies.

· Students pursuing Au.D., Ed.D., or DVM degrees should consult their program's handbook and Graduate Program Coordinator for detailed requirements, timelines, and completion procedures specific to their degree.

10.1. Comprehensive Examinations

Some departments or interdepartmental programs may require qualifying examinations in addition to comprehensive examinations.

Action: Students should check with their program for specific exam requirements and timelines.

Passing comprehensive exams is a major, required milestone toward candidacy and **should generally be completed by the end of the second year**. The School of Graduate Studies does not have a policy regarding the nature of student comprehensive exams, but it does require them. Departments may dictate their own policies on this matter, provided that they do not violate University and School of Graduate Studies policies.

10.1.1. Receive Approval on Dissertation Research Proposal

Students should finalize their dissertation topic and present a formal research proposal to their supervisory committee for review and approval.

Action: Students should schedule a proposal meeting with their committee once their topic and research plan are clearly defined.

NOTE: Approval of the dissertation proposal is required before significant research or data collection begins.

10.1.2. Application for Candidacy Submission and Approval

Purpose

· Submission of the Application for Candidacy (ACCD) Form is a significant point in the doctoral student's program because the Major Professor, Supervisory Committee, and Department Head thereby attest that the student is ready to conduct independent dissertation research—although successful completion is not guaranteed.

· This form is also used to document that the student has obtained any necessary regulatory approval (IRB, IACUC, etc.) (see SGS Catalog Section 5.1 above) and completed any safety trainings necessary. The form should therefore be submitted after the student's committee approves the dissertation research proposal, and prior to the student conducting their research.

· For updates on IRB regulations and to determine whether a student's research requires IRB approval, view USU's IRB webpage.

· Students are permitted to enroll in dissertation credits in their last semester of coursework after they have successfully passed their comprehensive exams and received final approval for their application for candidacy.

Submission Deadline

- Doctoral students are encouraged to submit this form **by the end of their second year, as soon as their dissertation proposal is approved, all regulatory approval is complete, the student passes their comprehensive exams, and any other required forms for the proposal defense have been submitted and accepted** (see SGS Catalog Section 12.2 below for more information about all required forms needed prior to a student's dissertation proposal defense). **NOTE:** The Supervisory Committee Approval Form (SCAF) and the Program of Study (POS), should already be submitted and approved **by the end of the doctoral student's third semester** (see SGS Catalog Section 6.2., for information about the SCAF form, and SGS Catalog Section 7.3., for information about submitting the POS form).
- Verification of regulatory approval must be submitted to the School of Graduate Studies before the student's Application for Candidacy can be approved.
- The student, their Major Professor, Committee Members, Department Head, and IRB/IACUC (if needed) will receive an email notification from ServiceNow, to review and approve the Application for Candidacy form. Once all signatures are obtained electronically, all parties will receive a final email from Service Now with a completed form.
- **NOTE:** The Application for Candidacy (ACCD) Form should be submitted **at least three months prior to the student's final defense.**

Section 11. Graduate Certificates

11.1. Definition

· A graduate certificate is a post-bachelor's or post-master's certificate which must be less than 30 credits per Policy R402. It is stackable if, after its completion, it is eligible to meet degree completion requirements for a subsequent graduate degree or certificate. Students enrolled in a graduate certificate (i.e., post-bachelor's or post-master's certificate) program are considered graduate students under Utah State University policy.

11.2. Graduate Certificates

· These certificates are either post-bachelor's or post-master's credentials and include only courses at the 5000 level or above. Students must hold a bachelor's degree prior to admission into the certificate program. These certificates may be stacked into a graduate degree or certificate if designated as stackable. Degree programs that accept stackable graduate certificates to meet degree requirements must specify which certificates they accept and how each will count toward degree requirements. However, stackable certificates cannot offset more than the total number of credits in the certificate at or above the 6000-level plus up to 12 credits at the 5000-level. Certificate programs are subject to same policies, procedures, and standards as graduate degree programs, including all university admissions and awarding policies (e.g., GPA, degree verification, program of study). Certificate programs may adopt more stringent GPA requirements than the School of Graduate Studies requires.

11.3. Graduate Certificate Stackability

· Every graduate certificate must be officially designated as either "stackable" or "not stackable" in the R401. If it is stackable: Every student must go through a separate admissions process, unless currently enrolled in the certificate program at the time of adoption of this policy. If it is not stackable: Students do not need to apply separately if they are already enrolled in a graduate degree program at the university (concurrent enrollment form required).

· If a student wishes to apply a stackable graduate certificate to a graduate degree, it must be applied to the degree's program of study within six years of certificate completion. Course revalidation requirements apply only prior to certificate completion. Once the certificate is awarded, revalidation does not apply.

· Once a graduate certificate is awarded, the certificate may be included on a program of study toward a degree which names the certificate. Courses can be applied to a degree individually only before the certificate is completed (e.g., a student chooses to matriculate into a graduate degree program without completing the certificate and applies the courses to the degree's program of study). The date of completion is the date the credential is posted to the transcript.

· Graduate courses included in a program of study for a degree program may be simultaneously applied to a non-stackable certificate.

Section 12. Thesis, Dissertation, Plan B Paper or Project

A graduate student does not automatically graduate with their degree once they defend or submit their thesis, dissertation, or Plan B paper/project. All other program and university requirements must be successfully fulfilled (for reference, please see SGS Catalog Section 8 for Master's Degrees or Section 10 for Doctoral Degrees). The deadline for completing degree requirements is the last day of the semester at 5:00pm. Students with further questions, may contact their Graduate Program Coordinator.

12.1. Publication Requirements

Before beginning work on a thesis, dissertation, or Plan B paper/project, graduate students should review the School of Graduate Studies Publication Guide and are encouraged to attend a Thesis and Dissertation Information Session, held in-person and via Zoom.

Master's Plan A and PhD students need to have a citation style guide/formatting guide/target journal for the overall paper or for each chapter. A citation style guide/manual is contingent on academic discipline. It dictates the information necessary for a citation and how the information is ordered, as well as punctuation and formatting.

Theses, projects, or dissertations may be prepared in either monograph or multiple-paper format.

· **Monograph Format:** This, the 'traditional' format, consists of a multi-chapter document that uses the same style throughout.

· **Multiple-Paper Format:** A thesis or dissertation using this format consists of at least two chapters, typically written as independent papers, preceded by an introductory chapter that sets the context for the research, and followed by a summary and conclusions chapter that integrates all the studies.

The content of a thesis, project, or dissertation must be approved by the student's supervisory committee in two (2) stages: a proposal defense and a final defense.

· A thesis/project/dissertation proposal delineates the scope of scholarly work for a thesis, project, or dissertation. Once the committee approves the proposal in the proposal defense, the document is considered a binding agreement between the student and the committee regarding expectations for the final thesis, project, or dissertation.

· A final thesis/project/dissertation defense consists of a student delivering a presentation on the substance of their final thesis, project, or dissertation document and responding to questions or concerns raised by the committee. Following a successful defense, only minor edits to the document might be expected.

· As thesis/project/dissertation proposals and final documents are developed, drafts of sections should be submitted periodically to the major professor for critique.

· Committee members should be consulted, especially on sections that involve their special expertise.

Preparation of a Plan A thesis, Plan B paper/project, or dissertation is the culminating learning experience for a graduate student.

· The quality of the manuscript or project, which should represent the student's own best work, is the responsibility of the student.

· Monitoring the quality of the Plan A thesis, Plan B paper/project, or dissertation and mentoring the student in writing are responsibilities of the major professor, with the assistance of the supervisory committee.

· Editing by anyone other than the major professor and the supervisory committee should be limited to mechanics, such as spelling and grammar.

Publications or manuscripts of which the student is a co-author may be included if the committee determines that the student made a substantial intellectual contribution to the work.

· Permission to include a publication or manuscript in a thesis, project, or dissertation does not depend on the order of authorship.

· Any included publication or manuscript must be a logical component of the overarching theme or themes addressed by the entire thesis, project, or dissertation, which, as a whole, must represent the student's individual and original effort.

· When reprint permission is required, the student is responsible for obtaining said permission from the copyright holder for any published works included as part of the thesis, project, or dissertation, and the manuscript must adhere to stated attribution and citation requirements.

· A program may require manuscripts to be submitted for publication as part of its degree completion requirements. However, actual publication of a manuscript cannot be a degree requirement, and time to degree cannot be extended to accommodate publication of a manuscript.

12.2. Proposal Defense Requirements

Any proposal defense held without following the proper procedures as listed in this catalog may be invalid. All committee members **must** attend the proposal defense at the date and time registered with the School of Graduate Studies. While in-person defense is preferred and recommended, members of the committee may participate remotely with both audio and video interaction.

Students should work with their committee members to arrange defense participation and details prior to submitting an Appointment for Thesis/Project/Dissertation Proposal Defense (AFP) form. **The form must be submitted at least 10 workdays prior to their proposal defense.**

· If the Appointment for Thesis/Project/Dissertation Proposal Defense (AFP) is not fully approved before the date of defense, the defense is not official and will need to be rescheduled.

· If necessary, an appeal can be made to the Vice Provost for Graduate Studies.

· Once an Appointment for Thesis/Project/Dissertation Proposal Defense (AFP) has been approved by the committee and the School of Graduate Studies, any changes to the date, time, and/or location require the submission and approval of a new Appointment for Thesis/Project/Dissertation Proposal Defense (AFP).

A proposal defense must include a vote to either pass or fail a proposal. Any changes made to the scope of the proposal during the proposal defense must be recorded in writing prior to the vote of the committee. If the proposal passes, it is considered to include the written change of scope. The student and all members of the committee must retain a copy of the text documenting a change in scope.

Proposal defenses cannot be suspended or cancelled once underway. The only possible outcomes of the proposal defense are a pass or fail decision by the committee. If the student fails the proposal defense, they may schedule a second defense in coordination with their major professor once the feedback from the supervisory committee during the first defense is addressed in a revised proposal document.

The results of the proposal defense and any additional requirements are recorded on the Record of Thesis/Project/Dissertation Proposal Defense (ROP) form, which is submitted to the School of Graduate Studies by the student's Graduate Program Coordinator.

All **Master's Plan A and Plan B students** should submit a Thesis/Project Approval (TPA) form to confirm they have successfully defended their thesis or Plan B paper/project proposal with committee approval before the final defense. **NOTE:** The School of Graduate Studies does not require proposal defenses for Plan B papers/projects **that do not include empirical research**.

· This form is also used to document that the student has obtained any necessary regulatory approvals (IRB, IACUC, etc.) (see SGS Catalog Section 5.1 above) and completed any safety trainings necessary. The form should therefore be submitted after the student's committee approves the thesis/project research proposal, and prior to the student conducting their research.

· For updates on IRB regulations and to determine whether a student's research requires IRB approval, view USU's IRB webpage.

· Verification of regulatory approval must be submitted to the School of Graduate Studies before the student's Thesis/Project Approval (TPA) can be approved.

· The student, their major professor, Committee Members, Department Head, and IRB/IACUC (if needed) will receive an email notification from ServiceNow, to review and approve the Thesis/Project Approval form. Once all signatures are obtained electronically, all parties will receive a final email from Service Now with a completed form.

· The student's thesis or Plan B paper/project defense is scheduled after the Thesis/Project Proposal Approval form is accepted.

Master's Plan A and Plan B students are encouraged to submit the Thesis/Project Approval (TPA) form **by the end of their second semester, after submitting and receiving approval for the Supervisory Committee Approval Form (SCAF) and the Program of Study (POS)** (see SGS Catalog Section 6.1., for information about the SCAF form, and SGS Catalog Section 7.3., for information about submitting the POS form)**, a successful thesis/project proposal defense, all regulatory approval is in place, and any other required forms for the proposal defense have been submitted and accepted.**

For **doctoral students**, the submission of the Application for Candidacy (ACCD) Form is a significant point in the student's program because the Major Professor, Supervisory Committee, and Department Head thereby attest that the student is ready to conduct independent dissertation research—although successful completion is not guaranteed.

· This form is also used to document that the student has obtained any necessary regulatory approvals (IRB, IACUC, etc.) (see SGS Catalog Section 5.1 above) and completed any safety trainings necessary. The form should therefore be submitted after the student's committee approves the dissertation research proposal, and prior to the student conducting their research.

· For updates on IRB regulations and to determine whether a student's research requires IRB approval, view USU's IRB webpage.

· Verification of regulatory approvals must be submitted to the School of Graduate Studies before the student's Application for Candidacy can be approved.

· Students are permitted to enroll in dissertation credits in their last semester of coursework after they have successfully passed their comprehensive exams and received final approval for their application for candidacy.

Doctoral students are encouraged to submit this form **by the end of their second year, as soon as their dissertation proposal is approved, all regulatory approval is complete, the student passes their comprehensive exams, and any other required forms for the proposal defense have been submitted and accepted. NOTE:** The Supervisory Committee Approval Form (SCAF) and the Program of Study (POS), should already be submitted and approved **by the end of the doctoral student's third semester** (see SGS Catalog Section 6.2., for information about the SCAF form, and SGS Catalog Section 7.3., for information about submitting the POS form).

· The student, their Major Professor, Committee Members, Department Head, and IRB/IACUC (if needed) will receive an email notification from ServiceNow, to review and approve the Application for Candidacy form. Once all signatures are obtained electronically, all parties will receive a final email from Service Now with a completed form.

· **NOTE:** The Application for Candidacy (ACCD) Form should be submitted **at least three months prior to the student's final defense.**

12.3. Final Defense Requirements

Any final defense held without following the proper procedures as listed in this catalog may be invalid. Full-time students must be registered for **at least 3 credits** during the semester in which they defend their thesis, dissertation, or Plan B paper/project.

Domestic students may be registered for 1 credit during their defense semester; however, they will hold part time status. Students receiving financial aid are likely to be required to maintain full time status, so it is strongly advised to check with the Office of Student Financial Support before electing to take only 1 credit.

International students must be registered for 3 credits if they defend in Fall or Spring semesters with an approved Full-Time at 3 Credits (FT3) form. However, they may register for 1 credit if they are defending in the summer semester with an approved Reduced Course Load (RCL) form in their SEVIS record, and their program's policy allows for it.

· **NOTE: A Reduced Course Load (RCL) form can only be used one time and therefore cannot be used after the completion of the grace semester (see SGS Catalog Section 4.8.).**

· If International Students have any questions about the Full-Time at 3 Credits (FT3) form or the Reduced Course Load (RCL) form, they should contact the Office of Global Engagement.

When the final defense is scheduled during a semester break, the student must enroll for at least 3 credits the following semester.

All defenses are public. All committee members **must** attend the defense at the date and time registered with the School of Graduate Studies. While in-person defense is preferred and recommended, members of the committee may participate remotely with both audio and video interaction. Students should work with their committee members to arrange defense participation and details prior to submitting an Appointment for Thesis/Project/Dissertation Defense (AFD) form.

Students should review their official committee to make sure it is correct. Changes in the membership of a supervisory committee **cannot be made during the six weeks prior** to the defense without a written request from the department head and approval of the Vice Provost of Graduate Studies. For questions about Supervisory Committees, please review SGS Catalog Section 6 above.

No committee member should agree to proceed with a defense until they have carefully read and agreed with the defensibility of the dissertation. The final defense should be scheduled by the student after all courses and the thesis, Plan B paper/project, or dissertation are completed.

12.4. Before the Final Defense

Students should determine when they need to have their degree in hand. The student should work with their Major Professor, Committee, and GPC, to determine a timeline for their thesis, Plan B paper/project, or dissertation completion. The submission deadline and the degree conferral date can be reviewed on the Graduate School Deadlines page.

· In order to meet the deadlines, students should submit their documents no later than 3 weeks before the last day of the semester.

· We cannot guarantee that paperwork will be processed in time to award a degree in the current semester if all materials are not submitted in final form by the submission deadline.

· All graduate degrees will be awarded within 45 days of the degree conferral date.

Students should submit their thesis, plan B paper/project, or dissertation to each committee member at least 4 weeks prior to their defense date for review.

Students should meet with their GPC to review and do the following:

· Conduct a final review of their official forms to make sure they are correct.

· SCAF and POS forms are approved and accurate.

· Discuss any departmental requirements.

· Review their official degree and plan type and ensure they are correct in Banner.

· Discuss how the defense room is reserved.

· Reserve a room.

Students must submit their Appointment for Thesis/Project/Dissertation Defense (AFD) form **at least 10 workdays prior to their defense.**

· When students fill out the AFD form, they will need to review their official committee to make sure that it is correct.

· Students should check on the progress of approvals for their AFD follow up with GPC and/or committee members to make sure it is approved in a timely manner.

· If the Appointment for Thesis/Project/Dissertation Defense (AFD) is not fully approved before the date of defense, the defense is not official and will need to be rescheduled. If necessary, an appeal can be made to the Vice Provost for Graduate Studies.

· Once an Appointment for Thesis/Project/Dissertation Defense (AFD) has been approved by the committee and the School of Graduate Studies, any changes to the date, time, and/or location require the submission and approval of a new Appointment for Thesis/Project/Dissertation Defense (AFD).

12.5. During the Final Defense

Students must be registered for at least 3 credits the semester they first defend a thesis, Plan B paper/project, or dissertation, or take final oral examinations.

The oral examination of the thesis, Plan B paper/project, or dissertation is a defense of a final document.

· Only minor changes, usually editorial, should be required following the defense. These changes must be completed by the end of the grace semester. Changes that take longer than the duration of the grace semester to complete will be assumed to be major and require a new defense.

· If all revisions are not complete by the end of the grace semester following a successful defense, then the major professor, with support of all members of the supervisory committee, may submit an appeal to the Vice Provost of Graduate Studies, justifying why the student should not be required to defend the thesis, Plan B paper/project, or dissertation a second time.

· If major changes are required, a defense of the revised document should be held. The student must be registered for at least 1 credit during the semester of a new defense.

During the defense, the student defends their thesis, Plan B paper/project, or dissertation and answers questions about the research or related topics.

· The results of the defense and any additional requirements are recorded on the Record of Thesis/Project/Dissertation Defense (ROD) form, which is submitted to the School of Graduate Studies by the student's Graduate Program Coordinator.

· All members of the supervisory committee must approve and sign the thesis, Plan B paper/project, or dissertation. In the event of lack of unanimity, the matter is taken to the Vice Provost of Graduate Studies.

Any final examination held without following the proper procedures may be invalid.

· If all degree requirements are not complete by the end of the grace semester following a successful defense, then the major professor, with support of all members of the supervisory committee, must submit an appeal to the Vice Provost of Graduate Studies, justifying why the student should not be required to defend the thesis, Plan B paper/project, or dissertation a second time.

· Students must register for at least 1 credit the semester of their second defense.

12.5.1. Votes on Graduate Student Supervisory Committees

To be considered successful, it is expected that all members of a supervisory committee will approve the Ph.D. dissertation proposal or M.S. thesis proposal during a proposal defense. Likewise, it is expected that all members of the supervisory committee will approve the final Ph.D. dissertation, M.S. thesis, or Plan B paper/project for the final defense to be considered successful. However, for the final defense of a doctoral dissertation, a defense can be successful with a vote of 4 members in favor and 1 against or abstaining.

In all cases, the vote of each member of the committee during the defense constitutes their approval or disapproval of the proposal, thesis, Plan B paper, or dissertation. All members of the committee are required, as a condition of committee membership, to sign the forms associated with a successful defense, regardless of the member's individual vote. Committee members' signatures reflect concurrence that all policies and procedures of the thesis, Plan B paper/project, or dissertation proposal or final process were followed.

Any instances of a thesis or Plan B paper/project receiving only 2 votes in favor (out of 3) or a dissertation receiving 3 votes in favor (out of 5) that cannot be resolved by discussion of the committee shall be referred to the Vice Provost of Graduate Studies for resolution.

12.6. After the Proposal or Final Defense

The student should be informed of the defense results at the conclusion of the defense. The major professor or designated committee member should inform the GPC of the results of the defense as soon as possible. The GPC will then submit the Record of Thesis/Project/Dissertation Proposal Defense (ROP) or Record of Thesis/Project/Dissertation Defense (ROD) in ServiceNow, and the committee will verify the results of the defense. The student should discuss the ownership of data and authorship rights with their committee. Master's Plan A and Doctoral students should review and submit the Format & Style form and Authorship & Copyright form, and Title Page.

12.6.1. Grace Semester

Master's and doctoral students will be given until the last day of the next semester (spring, summer or fall) following a successful defense to complete remaining degree requirements.

This is the "grace semester" and does not require students to be registered for credits unless needed to remain compliant with F-1 or J-1 visa criteria. **NOTE:** International students who have questions about F-1 or J-1 visa criteria, should contact the Office of Global Engagement.

For more information about the grace semester, please review SGS Catalog Section 4.8. above.

12.7. Thesis & Dissertation Review and Submission Process

Following the successful final defense of a thesis or dissertation, the student is responsible for completing any necessary edits, proofreading, and having it read and approved by the department before it is submitted to the School of Graduate Studies for review or, if it is a Plan B paper/project, deposited in the institutional repository. When the student is completely done editing their thesis/dissertation, they should have their GPC or departmental reviewer submit it for review to the School of Graduate Studies.

Once the document has been approved by the School of Graduate Studies, a final copy, including a title page that has been signed by all committee members, must be submitted online to the School of Graduate Studies for the Vice Provost's signature.

After the defense, the following forms should be submitted in Service Now:

(All forms can be found on the Service Now platform)

- Dissertation/Thesis Format and Style/ETD form
- Authorship and Copyright form
- Embargo Request form (optional)
- Title Page

The student's paper cannot be checked into the School of Graduate Studies queue for review until all the required forms are submitted and approved, their GPC has uploaded their completed thesis/dissertation to their review file, and their GPC has emailed the Graduate School Thesis/Dissertation Reviewer indicating that everything is in their file.

Students should also review final semester information for other deadlines and requirements.

Emails generated through Service Now will be sent to the student/GPC indicating when the forms have been completed, when to upload the student's paper, when the student has been added to the queue, and when the student's paper has been processed by USU Libraries.

- All papers in the queue are processed in the order in which they are added. **NOTE:** Requests for expedited reviews will be reviewed on a case-by-case basis with no guaranteed approval.
- Students should allow at least three weeks for the initial review of their thesis or dissertation once it has been added to the queue (time to the initial review will vary based on the number of papers in the queue).
- If the student formatted chapters in accordance with a particular journal, please also submit to the School of Graduate Studies a sample(s) of target journal styles in PDF format.

Once a student's thesis, dissertation, or Plan B paper/project has been finalized by the School of Graduate Studies and/or approved for deposit in USU's institutional repository, the School of Graduate Studies will verify that all degree requirements have been met.

NOTE: Absolutely no changes will be accepted to the thesis or dissertation after it is accepted for deposit into USU's institutional repository.

Students requesting an embargo are required to deposit a physical copy of their paper with USU Libraries. The student will receive an email from USU Libraries (**sent to their official USU email address**) with instructions to complete this step. USU Libraries will notify the student and the School of Graduate Studies once the manuscript is accepted. The School of Graduate Studies will contact the student to let them know if anything on the Completion Checklist is incomplete. **Theses and dissertations must be submitted at least 3 weeks before the end of the semester.** Please review the School of Graduate Studies Submission Deadlines.

12.8. Plan B Project Submission Process

Plan B papers/projects must:

- Follow **the same format specifications** as theses and dissertations (see Section 12.1. above).
- Reflect equivalent standards of scholarship, though they may be less intensive and not require the same level of originality as a Plan A thesis.
- Following the defense, some departments and programs require students to deposit Plan B papers/projects into the institutional repository. Major advisors are required to review and approve the submission, but the paper is not formally reviewed by the School of Graduate Studies or signed by the Vice Provost for Graduate Studies.
- Once a student's Plan B paper/project has been finalized by the School of Graduate Studies and/or approved for deposit in USU's institutional repository, the School of Graduate Studies will verify that all degree requirements have been met.
- **NOTE:** Absolutely no changes will be accepted to the Plan B paper/project after it is accepted for deposit into USU's institutional repository.
- Students requesting an embargo are required to deposit a physical copy of their paper with USU Libraries. The student will receive an email from USU Libraries (**sent to their official USU email address**) with instructions to complete this step.
- USU Libraries will notify the student and the School of Graduate Studies once the manuscript is accepted.

Submission and Review

- Plan B papers/projects **are defended but are not formally reviewed** by the School of Graduate Studies, nor signed by the Vice Provost for Graduate Studies.
- Instead, they must be submitted directly to USU Libraries and uploaded to the **institutional repository**. See Plan B Report/Creative Project Submission Form.
- **Plan B papers/projects, must be submitted at least 3 weeks before the end of the semester.** Please review the School of Graduate Studies Submission Deadlines.
- Once accepted, **USU Libraries personnel will notify** both the student and the School of Graduate Studies.

12.9. Embargo Policy

If a student elects to embargo their work, they must submit an embargo request form to initiate the process, and the form and all additional steps must be complete by the School of Graduate Studies degree completion deadlines. An embargo means that the student's work will be unavailable to read online for 5 years.

- A thesis, Plan B paper/project, or dissertation must not contain material that cannot be disclosed publicly. However, it is occasionally in the University's best interest to delay disclosure of the contents of a thesis, Plan B paper/project, or dissertation while patenting and/or commercial development possibilities are investigated or for a period of report review by a funding agency.
- In such cases, electronic publication of a thesis, Plan B paper/project, or dissertation through submission to the institutional repository and to ProQuest (UMI) may be delayed without delaying awarding the student's degree.
- Embargo of a thesis, Plan B paper/project, or dissertation must be approved by the student's advisor, department head, and the Vice Provost of Graduate Studies.

· In addition, a printed copy of the thesis, Plan B paper/project, or dissertation must still be submitted to USU Libraries in accordance with the School of Graduate Studies degree completion deadlines.

· A copy of the publication delay policy and the procedure for requesting an embargo may be found on the USU Libraries website and the Merrill-Cazier Library website.

· If a student is unsure whether to embargo or not, please have them contact USU Libraries via email at digitalcommons@usu.edu.

Section 13. USU Graduate School Deadlines

For submission deadlines, and degree conferral dates, please review the Graduate School Deadlines page.

Section 14. Graduation Application Requirement

All graduate students – regardless of plan type – must complete a graduation application for the correct semester in which they intend to graduate. **Note:** A $15 fee must be paid when the graduation application is submitted for each degree program.

Reminder: Graduate students may submit only one graduation application per program.

14.1. Graduation Date Adjustments

Graduation dates will be manually updated by the Graduate School Registrar when the student's degree is finalized. If a student has the wrong semester listed, the Graduate Program Coordinator must provide a list to the Graduate School Registrar so corrections can be made.

14.2. Diploma & Degree Awarding

In order to officially graduate and receive a diploma, graduate students must:

· Complete all graduate degree requirements. **NOTE:** To review graduate degree requirements, please see SGS Catalog Section 8 for Master's degrees and Section 10 for Doctoral degrees.

· Submit a graduation application.

Once all graduation requirements have been met, students can expect to have their degree awarded **within 45 days of the degree conferral date**.

Section 15. Reasons Graduate Students Will Be Denied for Graduation

To ensure timely graduation, students must meet all academic and administrative requirements. Below is a list of common reasons a student may be denied graduation:

15.1. Missing Requirements

Unmet degree or credit requirements. To be awarded a graduate degree, students must fulfill all degree requirements. No verified degree from previous institution(s). Official transcripts must show degree earned and conferral date.

NOTE: Official transcripts should be received by the School of Graduate Studies (SGS) no later than the student's first semester to avoid a hold on their account (see SGS Catalog Section 1: Graduate Admissions Policies).

Missing Required Forms – Master Plan A

· Supervisory Committee (SCAF) Form

· Program of Study

· Appointment for Thesis/Project/Dissertation Proposal Defense (AFP)

· Thesis/Project Approval (TPA)

· Record of Thesis/Project/Dissertation Proposal Defense (ROP)

· Appointment for Thesis/Project/Dissertation Defense (AFD)

· Authorship & Copyright

· Format and Style

· Title Page

· Graduation Application

· Record of Thesis/Project/Dissertation Defense (ROD)

Missing Required Forms – Master Plan B

· Supervisory Committee (SCAF) Form

· Program of Study

· Appointment for Thesis/Project/Dissertation Proposal Defense (AFP)

· Thesis/Project Approval (TPA)

· Record of Thesis/Project/Dissertation Proposal Defense (ROP)

· Appointment for Thesis/Project/Dissertation Defense (AFD)

· Plan B Report/Creative Project Submission Form

· Graduation Application

· Record of Thesis/Project/Dissertation Defense (ROD)

Missing Required Forms – Master Plan C

· Program of Study

· Graduation Application

Missing Required Forms – Doctorate

- Supervisory Committee (SCAF) Form
- Program of Study
- Appointment for Thesis/Project/Dissertation Proposal Defense (AFP)
- Application for Candidacy (ACCD)
- Record of Thesis/Project/Dissertation Proposal Defense (ROP)
- Appointment for Thesis/Project/Dissertation Defense (AFD)
- Authorship & Copyright
- Format and Style
- Title Page
- Graduation Application
- Record of Thesis/Project/Dissertation Defense (ROD)

For more information about required academic forms, please visit the Academics and Forms page on the School of Graduate Studies website.

15.2. Registration Issues

The student is registered for classes in the following semester

15.3. Thesis/Plan B Paper or Project/Dissertation Issues

Thesis, Plan B Paper/Project, or Dissertation not defended (see SGS Catalog Section 12., for information about requirements related to a thesis, Plan B paper/project, or dissertation defense).

15.4. Grade Issues

- GPA below 3.0 on the Program of Study.
- Unresolved Temporary (T) grades – must be changed by Faculty.
- Unresolved Incomplete (I) grades – must be changed by Faculty.

For questions about graduate degree requirements, please review SGS Catalog Section 8 for Master's degrees, and Section 10 for Doctoral degrees.

Section 16. Graduation

16.1. Commencement Participation

Graduate students who graduate during the summer semester are eligible to participate in spring commencement of that academic year. For questions about commencement and convocation, please review the Utah State University Commencement page.

16.2. Graduate Student Diplomas

Diplomas for degrees conferred by the School of Graduate Studies are prepared by the main Utah State University Registrar's Office at the end of each semester once degrees are awarded. For further questions, please review the Frequently Asked Questions (FAQs) Page on the USU Registrar's website.

16.3. Graduate School Transcripts

The School of Graduate Studies does not issue official or unofficial copies of transcripts. Students and alumni may request their transcript records through the main Utah State University Registrar's Office.

16.4. Letters of Completion

Graduate students who have fulfilled all degree requirements before the end of the semester may request a letter from the School of Graduate Studies verifying degree completion for employment purposes.

Students may request a letter of completion by emailing the Graduate Registrar. A request for a letter of completion may take up to 24-48 work hours to complete. **NOTE:** Letters of completion will not be issued until a student's thesis/dissertation has been reviewed by the SGS Thesis/Dissertation Reviewer and is ready to be transferred to USU Libraries for final processing. Master's Plan B Students must have submitted their paper/project to USU Libraries.

S.J. & Jessie E. Quinney College of Agriculture and Natural Resources

Interim Dean: Dr. Grant Cardon
Location: Stan L. Albrecht Agricultural Sciences Building (AGRS) 427
Phone: (435) 797-1520
Fax: (435) 797-3268
Email: grant.cardon@usu.edu
Website: qanr.usu.edu

Associate Dean for Strategic Academic Initiatives:
Dr. Peter Howe — AGRS 429 | (435) 797-9457 | peter.howe@usu.edu

Associate Dean for Academic Programs and Student Services:
Dr. Mateja R. Savoie Roskos — AGRS 415 | (435) 797-5777 | mateja.savoie@usu.edu

Associate Dean for Graduate Student Services:
Dr. Kara Thornton-Kurth — AGRS 428 | (435) 797-7696 | kara.thornton@usu.edu

Associate Dean for Research:
Dr. Juan Villalba — AGRS 434 | (435) 797-2539 | juan.villalba@usu.edu

Departments and Academic Programs

The **S.J. & Jessie E. Quinney College of Agriculture and Natural Resources** offers over 200 academic programs in the following 12 departments: A full listing of available academic programs can be found in the USU Degree Finder.

- Animal, Dairy, and Veterinary Sciences (ADVS)
- Applied Economics (APEC)
- Applied Sciences, Technology, and Education (ASTE)
- Aviation Technology (AVTE)
- Environment and Society (ENVS)
- Geosciences (GEO)
- Landscape Architecture and Environmental Planning (LAEP)
- Nutrition, Dietetics, and Food Sciences (NDFS)
- Plants, Soils, and Climate (PSC)
- Technology, Design, and Technical Education (TDTE)
- Watershed Sciences (WATS)
- Wildland Resources (WILD)

Overview

The S.J. & Jessie E. Quinney College of Agriculture and Natural Resources (QANR) at Utah State University embodies the university's land-grant mission through its commitment to education, research, and community engagement. With more than 250 faculty members, the college provides outstanding educational opportunities in over 200 degree and certificate programs across the Logan campus and statewide system. The Quinney College's academic offerings are unusually diverse for a single college, spanning agriculture, natural resources, and applied sciences, yet every department shares a commitment to innovative experiential learning, hands-on research, and interdisciplinary collaboration.

The Quinney College integrates applied research, teaching, and outreach to prepare students to address complex local and global challenges in a wide range of areas including sustainable agriculture, ecosystem management, water and land management, food security, technological innovation, and much more. Faculty and students collaborate through programs such as USU Extension and the Utah Agricultural Experiment Station, translating research into practical solutions for communities throughout the state. Through immersive field experiences, internships, and research opportunities, students gain the skills and knowledge necessary to become leaders in their fields. By fostering innovation, service, and sustainability, the Quinney College continues to advance Utah State University's land-grant mission and shape the next generation of professionals who will improve lives, protect natural resources, and support resilient communities locally, nationally, and globally.

Admission Requirements

Undergraduate students accepted in good standing by Utah State University are eligible for admission to the Quinney College. Certain professional programs, including Professional Pilot, Outdoor Product Design and Development (OPDD), and Dietetics, among others, have limited enrollment and specific admission requirements. Applicants should consult individual program listings in the USU Catalog for detailed admission criteria and graduation requirements.

Academic Support

Academic Advising

Academic advisors in the Quinney College provide personalized support to help students navigate their academic journey. They assist with course planning, degree progress, and connecting students to experiential learning opportunities such as internships, research, and study abroad. Academic advisors also guide students in exploring career paths, accessing campus resources, and overcoming challenges to ensure their success from enrollment through graduation. To schedule an appointment with an academic advisor, please go to this website: https://qanr.usu.edu/advising/

Financial Support

Scholarships

The Quinney College provides more than **$1.5 million in scholarships** annually to undergraduate and graduate students. Additional funding opportunities are available through assistantships, **internships and experiential learning programs** supported by the college, state agencies, and federal partners. More information can be found on the College's scholarships website at https://qanr.usu.edu/students/scholarships.

Graduate Assistantships

Graduate students may receive financial assistance through **research and teaching assistantships** awarded by individual departments. Students are encouraged to contact their **major professor** or **graduate program coordinator** for details regarding available opportunities.

Graduate Fellowships

Fellowships and tuition waivers are awarded to incoming graduate students on a competitive basis. Interested students should consult their **major professor** or **department office** for specific information.

Student Opportunities

Undergraduate Research

The Quinney College provides an outstanding environment for **undergraduate research**. Students interested in pursuing research projects should consult their **academic advisor**, a **faculty mentor**, or an **associate dean** to identify opportunities aligned with their interests.

Student Leadership and Engagement

Beyond coursework and research, the Quinney College places a strong emphasis on leadership development and community engagement. Undergraduate students have opportunities to serve as College Ambassadors or participate in the College Student Council, while graduate students can get involved through the Graduate Student Council. The College also encourages students to join student clubs and professional organizations, offering valuable avenues for professional growth, networking, and service.

Aerospace Studies Department

Aerospace Studies

Department Head: Lieutenant Colonel Jessica Mathews
Location: Military Science Building, Room 107
Phone: (435) 797-8723
FAX: (435) 797-8677
E-mail: afrotc.det860@usu.edu
Website: afrotc.usu.edu

Undergraduate Programs

Objectives

Air Force ROTC provides educational experiences that develop skills and attitudes vital to the career of an Air Force officer. The purpose of the courses within AFROTC is to give an understanding of the mission and the global responsibilities of the United States Air Force. The academic phase develops background in national and international affairs to help understand and evaluate world events.

In addition, the curriculum includes experiences designed to stimulate and develop an interest in the Air Force (e.g., orientation flights and visits to Air Force bases); opportunities to apply the principles of leadership, human relations, management, and staff work in practical situations; and other related experiences.

Upon completion of an undergraduate degree of the student's choosing and the Air Force ROTC program, the cadet will commission as an officer into the Air Force or Space Force.

Requirements

GPA Requirements
All previous coursework attempted will be used to calculate the ROTC institution GPA. Cadets must have an institution GPA of 2.0 or greater to remain as an active cadet in Air Force ROTC. In order to be nominated for scholarship, to compete for an enrollment allocation or to contract, institution GPA must be above a 2.5.

Physical Fitness, Mental, and Medical
All students must meet the physical fitness standards provided by the Air Force and medical standards for general military service through the Department of Defense Medical Examination Review Board before being selected for Field Training.

Age Limitations
Pilot and navigator category applicants must enter undergraduate flying training prior to age 32. Other applicants must receive an enrollment allocation before reaching age 39. The maximum age restriction may be waived for individuals scheduled for commissioning after age 39, but prior to age 42. By law, scholarship recipients must be under age 30, as of December 31 of the calendar year during which commissioning is scheduled. **Title 10, *United States Code*, Section 2107 does *not* provide for waivers.**

Veterans

Veterans may apply for the Air Force ROTC program if they meet the academic, physical, medical and age qualifications.

Commitment

Most officers have a four-year commitment. However, pilots have a commitment of ten years after pilot training, and combat systems operators, air battle managers and remotely piloted aircraft pilots have a commitment of six years after their training. Cadets are not committed to joining the Air Force unless they have finished Field Training (Summer after Sophomore year) or receive an AFROTC scholarship.

Future Educational Benefits

During their senior year, a cadet may request a delay to active duty to continue studies toward a graduate degree. The length of the delay depends upon the student's request and the Air Force needs.

Through a variety of Air Force programs, officers may continue their education after going on active duty. Most bases have extensive on base graduate college programs. ROTC graduates may be eligible for the Montgomery GI Bill®, *the post 9/11 GI Bill*® and/or the Tuition Assistance Program to pursue a graduate degree.

The Air Force Institute of Technology provides full-time graduate study for selected officers. Some classes are taught in residence at the institute's campus at Wright-Patterson Air Force Base in Ohio, and others are taught at civilian universities.

Many officers make the Armed Forces their career, but some use the skills and training obtained in military service for civilian jobs. Most private businesses and government agencies require the same basic skills that are needed for jobs in military service. Air Force training and experience provide excellent leadership skills and can be a valuable asset in obtaining civilian employment.

Additional Information

For additional details about requirements for the Aerospace Studies program, see the official AFROTC Detachment 860 webpage at usu.edu/aerospace/

Scholarships and Financial Opportunities

Air Force ROTC scholarships are available on a competitive basis in four-, three-, and two-year awards. These scholarships provide up to full tuition, laboratory and incidental fees, plus a $900-per-year allowance for textbooks. The High School Scholarship Program (HSSP) for high school students is announced annually through the Air Force ROTC website at: afrotc.com. This website contains information regarding eligibility requirements and application procedures, as well as an online application.

In College Scholarship Program (ICSP) (2.5 GPA): The ICSP is open to college freshmen and sophomores. This is open to students enrolled in the Air Force ROTC program. The detachment commander nominates eligible applicants for this scholarship. Nominees are rank-ordered based on their leadership abilities, grades, fitness, and overall participation in the Air Force ROTC program.

All students on contract (either on an Air Force ROTC scholarship or contracted in the Professional Officer Course) receive a tax-free stipend of $250-$500 for each month during the school year.

Uniforms and Texts

All Air Force ROTC texts and uniforms are furnished at no expense to the student.

Miscellaneous Information

Career Opportunities

To meet the challenges, keep up with technological advancements, and explore the opportunities of the ever-broadening horizons in the aerospace age, officers possessing a variety of skills are required by the Air Force. Interested students should contact the Aerospace Studies Department for information on the Air Force career opportunities related to their academic major.

**GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at benefits.va.gov/gibill.*

Overview

The Department of Animal, Dairy and Veterinary Sciences (ADVS) offers comprehensive educational programs at the certificate, associate, baccalaureate, master's, and doctoral levels. Our degree programs span diverse areas, including animal and dairy science, biotechnology, veterinary science, and equine science and management, with specialized graduate training in fields such as reproduction, nutrition, molecular genetics, and animal health and disease. Students benefit from hands-on, experiential learning opportunities in cutting-edge laboratories, research facilities, and field settings, preparing them for careers in agriculture, animal health, veterinary medicine, and beyond. Through integration of teaching, research, and Extension, the ADVS department fosters innovation, industry collaboration, and lifelong learning to meet local, national, and global challenges in animal and veterinary sciences.

Degrees Offered

Academic Certificates in Applied Animal Reproduction, Beef Cattle Management, Biotechnology, Dairy Cattle Management, Foundations in Animal Science, Humans and Animal-Assisted Interventions, Livestock Extension, and Sheep and Wool Production

Bachelor of Science (BS) in Animal and Dairy Science, BS in Biotechnology, BS in Equine Science and Management, and BS in Veterinary Science

Certificate of Completion (CC) in Ranch Horse Management

Institutional Certificate of Proficiency (ICP) in Equine-Assisted Services

Bachelor of Science (BS) in Animal and Dairy Science, BS in Biotechnology, BS in Equine Science and Management, and BS in Veterinary Science

Master of Public Health (MPH) in Veterinary Public Health

Master of Science (MS) and Doctor of Philosophy (PhD) in Animal, Dairy and Veterinary Sciences with graduate specializations: Animal Health and Disease, Animal Management, Animal Molecular Genetics, Animal Nutrition, and Reproduction and Development

Post-Bachelor's Certificate in Humans and Animal-Assisted Interventions

Undergraduate Minors in Animal Biotechnology, Animal and Dairy Sciences, Veterinary Science, and Equine Science

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://qanr.usu.edu/advs/assessment/.

ADVS Vision and Mission

Our mission is to advance animal, dairy, and veterinary sciences by integrating exceptional education, innovative research, and impactful Extension services. We provide experiential, hands-on learning opportunities that prepare students for diverse careers in animal-related fields. We foster a collaborative environment where undergraduates and graduate students engage in research that drives discovery and knowledge generation. Our applied research programs integrate with Extension outreach to address stakeholder needs, ensuring that the latest advancements in animal science benefit our community. By integrating research, teaching, and outreach, we contribute to lifelong learning, support industry growth, and foster community well-being, all while aligning with Utah State University's broader mission.

Our vision is to cultivate an environment where students, faculty, and industry partners work together to tackle the most pressing challenges in animal agriculture and veterinary science. We seek to inspire and equip the next generation of scientists and professionals with the skills and knowledge needed to lead the field while driving innovation in sustainable practices, animal health, animal models for human health, and community well-being. By integrating cutting-edge research, education, and outreach, we aim to shape the future of agriculture, contributing solutions that benefit Utah, the nation, and beyond.

Undergraduate Programs

Objectives

Our goal is to prepare students for success through exceptional, experiential, and inclusive learning opportunities that inspire growth and career readiness. To accomplish this objective, we will:

- Nurture a passion for animal, dairy, and veterinary sciences through dynamic learning experiences,
- Support students in identifying and achieving diverse career goals,
- Deliver forward-thinking curricula that address past, present, and future challenges across species and disciplines, and
- Enhance hands-on learning through internships, labs, and real-world experiences.

Description of Undergraduate Programs

Bachelor of Science Degree Programs

Our ADVS department offers four distinct Bachelor of Science degrees, each providing focused, hands-on training and academic preparation for careers in the dynamic fields of animal, dairy, and veterinary sciences. These programs are tailored to meet industry needs, prepare students for graduate or professional school, and develop future leaders who can drive innovation in animal science and agriculture.

B.S. in Animal and Dairy Science: The Animal and Dairy Science degree prepares students for diverse careers in animal and dairy agriculture, emphasizing sustainable practices through hands-on laboratory experiences and faculty-mentored research at USU's livestock facilities. Graduates are equipped for roles in production, government agencies, and agribusiness or can pursue advanced degrees in genetics, reproductive biology, nutrition, and management, aligning with our mission to advance agriculture through impactful education and research.

B.S. in Biotechnology: The Biotechnology degree combines theoretical and practical training, preparing students for diverse careers in biotechnology, including roles in healthcare, agriculture, pharmaceuticals, research, and government. Graduates gain a strong foundation to lead in biotechnological advancements or pursue advanced degrees.

B.S. in Equine Science and Management: The Equine Science and Management B.S. combines foundational science with specialized equine studies, offering students both classroom and hands-on learning in areas such as equine health, nutrition, management, and training. Guided by experienced faculty, students gain practical skills and industry connections, preparing them for diverse careers in the equine industry and supporting community well-being and economic growth through expertise in equine science.

B.S. in Veterinary Science: The B.S. in Veterinary Science is designed for students aiming to apply to veterinary schools, offering tailored coursework to meet diverse veterinary college requirements and optimize acceptance chances. This program also prepares graduates for careers in veterinary and animal healthcare or for advanced study in fields such as biological and healthcare sciences. Academic advising ensures each student's study plan aligns with their career goals and interests.

Undergraduate Certificate Programs

Undergraduate certificate programs are designed to provide students with focused, career-oriented skills and knowledge in a specific field, enhancing their employability and supporting workforce development.

Certificate of Completion in Ranch Horse Management: This certificate teaches students essential skills in equine care, ranching techniques, and stock handling, emphasizing safety, low-stress methods, and building effective horse-human partnerships for work in the ranching industry.

Institutional Certificate of Proficiency in Equine-Assisted Services: The Equine-Assisted Services Institutional Certificate of Proficiency (ICP) provides a foundational overview of the field of Equine-Assisted Services (EAS) in which horses are used in various therapies, learning environments, and adaptive equine sports and/or recreational lessons to benefit humans' mental, physical, and/or emotional health.

Applied Animal Reproduction – Academic Certificate: The Applied Animal Reproduction Academic Certificate equips students with specialized knowledge in reproductive anatomy, physiology, and technologies, including artificial insemination and breeding soundness exams, through hands-on coursework and experiential learning opportunities such as internships or research projects in applied animal reproduction.

Beef Cattle Management – Academic Certificate: The Beef Cattle Management Academic Certificate provides students with specialized training in beef production practices, nutrition, business management, and animal health, offering hands-on experience through in-person coursework and preparing them for careers in Utah's thriving beef cattle industry and related agricultural sectors.

Biotechnology – Academic Certificate: The Biotechnology Certificate provides students with specialized knowledge and hands-on experience in molecular biology and biotechnology techniques, including cell culture, molecular cloning, microscopy, and ethical considerations, preparing graduates for careers in agriculture, biotechnology, health sciences, and pharmaceutical industries.

Dairy Cattle Management – Academic Certificate: The Dairy Cattle Management Certificate provides students with specialized training in dairy production practices, herd health, nutrition, business management, and artificial insemination, offering hands-on experience to prepare graduates for careers in Utah's dairy industry and related agricultural sectors.

Foundations in Animal Science – Academic Certificate: The Foundations in Animal Science Academic Certificate provides students with a foundational understanding of animal science, including animal nutrition, livestock production systems, and hands-on management practices, offering a flexible entry point into animal agriculture careers or further education without committing to a full bachelor's degree.

Humans and Animal-Assisted Interventions – Academic Certificate: The Humans and Animal-Assisted Interventions Academic Certificate provides students with a strong foundation in the human–animal bond, animal welfare, and best practices for implementing animal-assisted interventions with diverse populations, preparing them for careers in mental health, social work, education, and allied health fields.

Livestock Extension – Academic Certificate: The Livestock Extension Academic Certificate prepares students for careers in Extension by providing specialized training in livestock production, management, leadership, and community programming, equipping them to effectively support Utah's agricultural communities through hands-on learning and real-world Extension practices.

Sheep and Wool Production – Academic Certificate: The Sheep and Wool Production Academic Certificate provides students with specialized training in sheep production practices, wool technology, animal nutrition, business management, and hands-on experience at a working sheep ranch, preparing them for successful careers in Utah's robust sheep and small ruminant industry.

Requirements for B.S. Degrees

Departmental Admission Requirements

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Departmental Standards

1. Attain a grade point average of at least 2.50 across all ADVS courses.
2. Courses required for the major may *not* be taken for a *pass/fail* grade, except for courses that are only offered as pass/fail.
3. Attain a GPA of at least 2.25 for all required courses for the major.

Undergraduate Program Assessment

The ADVS department assessment plan defines learning objectives for each of its undergraduate majors and certificates. These learning objectives are mapped to each of the required courses in each emphasis, so that they may be evaluated for their contribution to the program goals. Outcome measures have also been defined for each major and certificate, and a process has been implemented to conduct exit interviews with all graduating students in Animal, Dairy and Veterinary Sciences. Rate of admission to a professional veterinary medical program has been identified as a key critical outcome measure for the veterinary science major.

The ADVS department Undergraduate Curriculum Committee (UCC) oversees the assessment process, with input from the ADVS faculty annually. The UCC reports its assessment findings to the ADVS department head, as well as to faculty members, and incorporates these findings in its regular ongoing and periodic comprehensive reviews and revisions of the ADVS department undergraduate degrees and certificates.

Learning Outcomes for B.S. Degrees

Animal and Dairy Science, B.S. degree

Disciplinary knowledge

- Demonstrate foundational knowledge of core animal science concepts by identifying and explaining the anatomy, physiology, reproduction, nutrition, genetics, and health of common livestock species.
- Identify, apply, and analyze primary scientific literature to inform decisions associated with the latest advancements and best practices in animal production and management.
- Integrate knowledge of animal science disciplines and best management practices to optimize livestock production and enhance operational efficiency.

Skills and career competencies

- Apply critical thinking and problem-solving skills to address current and future challenges in animal science.
- Communicate effectively in written and oral formats and collaborate with peers to advocate for agricultural practices.
- Engage in exploratory and practical learning experiences, building competencies applicable to careers in animal science and related fields.

Biotechnology, B.S. degree

Disciplinary knowledge

- Apply fundamental knowledge of biological systems, physiology, genetics, biochemistry, and molecular biology to solve problems in biotechnology within animal agriculture and health sciences.
- Explain and evaluate the scientific principles underlying genetic engineering, molecular cloning, and cell culture techniques.
- Identify, apply, and analyze primary scientific literature to assess advancements in biotechnology applications in animal agriculture and health sciences.

Skills and career competencies

- Apply critical thinking and problem-solving skills to address ethical issues in biotechnology.
- Apply molecular, cellular, and microscopy techniques and evaluate their effectiveness in various research and industry settings.
- Collaborate and communicate effectively in written and oral formats on current biotechnology issues.
- Engage in exploratory and practical learning experiences, building skills applicable to careers in biotechnology for animal and human health sciences.

Equine Science and Management, B.S. degree

Disciplinary knowledge

- Demonstrate knowledge of core animal science concepts, focusing on equids, including anatomy, physiology, reproduction, nutrition, genetics, health, and welfare, with applications in equine science.
- Identify, apply, and analyze scientific literature on advancements in equine science to inform operations and implement best practices in equine management.
- Integrate knowledge of equine science and management practices to enhance horse production efficiency and operational outcomes.

Skills and career competencies

- Apply critical thinking and problem-solving skills to address current challenges in equine health, welfare, and management.
- Communicate effectively and collaborate with peers to promote sound equine management principles.
- Engage in practical learning experiences to develop skills applicable to careers in equine science and management.

Veterinary Science, B.S. degree

Disciplinary knowledge

- Demonstrate foundational knowledge in veterinary science by identifying and explaining the anatomy, physiology, reproduction, nutrition, genetics, and health of common companion animal and livestock species.
- Identify, apply, and analyze primary scientific literature to assess advancements in veterinary science and animal health, fostering an evidence-based approach to understanding complex issues in the field.
- Gain essential knowledge in veterinary science that prepares them to meet the academic demands of a doctoral veterinary medicine program.

Skills and career competencies

- Apply critical thinking and problem-solving skills to address challenges in veterinary science.
- Communicate effectively in written and oral formats and collaborate with peers to advocate for veterinary science practices.
- Exhibit professionalism, ethical integrity, and empathy, prioritizing animal health and welfare while respecting diverse perspectives within veterinary science.
- Engage in exploratory and practical learning experiences, building competencies applicable to careers in veterinary science and related fields.

Undergraduate Research Opportunities

Students interested in pursuing undergraduate research opportunities in the ADVS department should contact Tami Spackman (Agricultural Science 419, tami.spackman@usu.edu, 435-797-2150), for information and referrals.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Safety and Liability in Classes and Laboratories

Certain classes and laboratories involve a risk of bodily injury or of damage to clothing. Students should take appropriate precautions and wear suitable protective clothing. Some of the risks include handling or being near animals, slick floors or corrals, use of toxic or corrosive substances, and the use of sharp or breakable instruments and equipment. Students should take precautions to avoid fainting during demonstrations or work with animal tissues or operative procedures. Students must assume their

own liability protection for travel to and from classes, laboratories, and field trips. The university and its employees assume no liability in the performance of classroom or laboratory instruction or on scheduled field trips, or for other dangerous activities. The student, by voluntarily participating in these classes and activities, agrees to assume the risk and not hold USU or its staff liable.

Financial Support

In addition to the scholarships and other financial aid available through the university, the department awards designated scholarships to qualified students. The department employs students on a part-time basis to assist with its research and operate its animal facilities. The department also coordinates cooperative education and internship employment opportunities for students. For more information, contact the department.

Graduate Programs

Graduate Programs Director: Dr. Lee Rickords
Location: Agricultural Science 248B
Phone: (435) 797-2195
Fax: (435) 797-2118
Email: lee.rickords@usu.edu

Admission Requirements

Prior to applying, the potential applicant must have a qualified ADVS faculty member agree to accept them into their laboratory and be their major (supervisory) professor. Contact Dr. Lee Rickords with questions.

Applications are processed as received and are reviewed on an ongoing basis. It is highly recommended that applicants submit all materials early in the year if they will also be applying for a departmental assistantship, the separate application for which is due March 15 (see Financial Assistance section below). Accepted students may begin their program in fall, spring, or summer semester.

General Requirements

All prospective graduate students must apply through the School of Graduate Studies. Refer to the School of Graduate Studies website for admission requirements. Please note that all applicants must meet the following general admission requirements:

- A bachelor's degree from an accredited college
- A 3.0 GPA as calculated by the School of Graduate Studies. An official transcript must be sent directly to the School of Graduate Studies from each college or university previously attended (except USU).
- Student recommendation request forms (included in application materials) should be used to request three people to submit letters of recommendation directly to the graduate school. At least one letter of recommendation should be from a faculty member from whom the applicant has taken course work.
- International Students: Please visit the School of Graduate Studies website for requirements.

Department Requirements

Applicants must secure an ADVS faculty member to be their major professor before being accepted into a graduate program. The department strongly recommends the following:

- Applicants for a graduate program in ADVS should have completed a BS undergraduate program with courses similar to the science core of the USU Animal and Dairy Science BS degree. This background includes the following courses and their prerequisites:
    - BIOL 1610 and 1620 or their equivalents
    - CHEM 1210 and 1220 or their equivalents
    - MATH 1050 and STAT 2000 or their equivalents
- Applicants with deficiencies in these areas may be admitted to the graduate program subject to the completion of remedial course work specified by the department. Other preparatory courses may be specified by the student's supervisory committee.

Graduate Program Assessment

Our graduate program is dedicated to cultivating scholars and professionals who demonstrate academic excellence, research innovation, and professional competence. Our comprehensive assessment plan ensures students receive the support and resources needed to achieve their academic and career goals, from orientation through to graduation and beyond.

Orientation and Mentorship

New students participate in a structured orientation to familiarize themselves with program expectations, resources, and policies. A Memorandum of Understanding (MOU) outlines roles and responsibilities, establishing a foundation for success. Throughout their studies, students engage in a formal mentorship agreement that is reviewed annually to align academic, research, and career objectives.

Academic and Research Progress

Students follow a tailored Program of Study, completing coursework and seminars designed to build both foundational and specialized knowledge. Annual meetings with their Supervisory Committee, supported by progress reports and self-assessments, provide structured feedback on academic, research, and professional development milestones.

Skill Development and Evaluation

Graduate students refine their presentation skills through mandatory seminar participation and presentations at the ADVS Student Research Symposia. Doctoral and MS Plan A students undergo rigorous evaluations through candidacy exams, dissertation or thesis presentations, and committee assessments, demonstrating readiness for independent research and professional roles.

Professional Engagement and Career Readiness

We encourage students to present at conferences and publish in peer-reviewed journals, promoting scholarly impact and professional growth. Career placement data and alumni surveys inform our program's effectiveness in preparing graduates for diverse careers in academia, industry, and public service.

Our holistic assessment plan ensures continuous improvement and demonstrates our commitment to excellence in graduate education, guiding our students to meet and exceed the ultimate criteria for success.

Learning Outcomes for Graduate Degrees

PhD Students in Animal, Dairy, and Veterinary Sciences

1. **Scholarly Work**

- Demonstrate mastery of fundamental and advanced concepts in the field by effectively applying them to analyze and address complex research questions.
- Access, synthesize, and integrate information to produce a comprehensive overview of current knowledge and trends in the field.
- Critically evaluate the contributions, validity, and impact of foundational and current published literature in the field.
- Formulate an original research question and apply innovative study design and data collection methodologies to address it.
- Interpret data accurately, assess methodological limitations, and draw evidence-based conclusions supported by research findings.

2. **Contribution to the Discipline**

- Conduct research that advances understanding or generates new insights in the field, demonstrating a meaningful contribution to scholarly knowledge.
- Produce high-quality research with the potential for publication in leading scientific journals, with the goal of achieving multiple publications derived from dissertation findings.
- Engage in research that addresses significant questions in the discipline, contributing to the broader scientific community's knowledge base and advancing relevant discourse.

3. **Quality of Communication**

- Communicate complex concepts clearly and persuasively through high-quality scientific and technical writing.
- Produce logically organized written content with clear structure, appropriate grammar, mechanics, and spelling.
- Deliver clear, informative presentations that effectively convey key findings, using visual aids to enhance audience understanding.
- Present confidently, engaging audiences with enthusiasm for the topic and effectively using presentation tools.

4. **Breadth and Depth of Knowledge**

- Synthesize foundational and advanced knowledge in the discipline by integrating current literature and seminal works, demonstrating a comprehensive understanding of key concepts and theories.
- Defend, clarify, and expand upon dissertation research, demonstrating deep expertise and insight into specialized topics within the discipline.
- Integrate dissertation research with broader field topics, situating findings within the context of past and present studies and articulating key scientific principles.

5. **Quality of the Oral Defense**

- Provide insightful, accurate, and well-articulated responses to questions during the oral defense, demonstrating critical thinking and a deep understanding of the research.
- Demonstrate critical awareness of methodological limitations and interpretive boundaries, recognizing the scope and constraints of their knowledge.
- Defend research by effectively addressing examiner questions with confidence and authority, demonstrating both knowledge and the ability to synthesize and apply concepts from the field.

Master's Students in Animal, Dairy, and Veterinary Sciences

1. **Scholarly Work**

- Demonstrate mastery of fundamental knowledge by applying essential concepts to analyze and address specific research topics within the field.
- Access and integrate information effectively to provide a cohesive overview of current scholarly literature, including seminal works foundational to the field.
- Develop a clear research problem and articulate well-defined objectives or hypotheses, as appropriate.
- Utilize appropriate methodologies for data collection and analysis, critically assessing any limitations or weaknesses in data interpretation.
- Draw reasoned conclusions that are clearly based on research findings, providing thoughtful discussion and appropriate recommendations.

2. **Contribution to the Discipline**

- Conduct relevant research that addresses practical questions and contributes meaningfully to the field of animal, dairy, and veterinary sciences.
- Produce work that has the potential for dissemination through publication in quality journals or presentations at scholarly conferences.

3. **Quality of Communication**

- Write clearly and effectively at a professional level, demonstrating an ability to convey complex scientific concepts convincingly.
- Organize written content logically and cohesively, using well-constructed sentences with appropriate grammar, mechanics, and spelling.
- Create professional presentations with organized content and clear communication of research data, ensuring complex findings are conveyed effectively.
- Present confidently, engaging the audience with clear explanations, well-paced delivery, and effective use of presentation resources.

4. **Breadth and Depth of Knowledge**

- Demonstrate confidence and competence in defending, clarifying, and expanding upon the written thesis during the presentation.

- Show a high-level understanding of the field, appropriately synthesizing the thesis topic with broader concepts and effectively explaining key scientific principles.

5. **Quality of Responses to Questions**

- Demonstrate confidence and competence in defending, clarifying, and expanding upon thesis research findings during the presentation.
- Demonstrate a high-level understanding of the field by synthesizing the thesis topic with relevant broader concepts and effectively explaining key scientific principles.
- Respond professionally to probing questions, demonstrating awareness of the work's implications and reflecting on its broader impact within the field.

Research

The ADVS department conducts a broad range of basic and applied research in the areas of animal reproduction, animal nutrition, livestock and dairy management, animal health and disease, virology, parasitology, toxicology, and molecular genetics. Department facilities include over 30 research laboratories on campus and at local and regional animal research facilities. There are research herds and flocks of beef and dairy cattle, sheep, and swine housed close to the university. Research in the department is funded by a multi-million dollar budget derived from support by the Utah Agricultural Experiment Station and by substantial outside contracts and grants. Cooperation with other departments and research centers of the university and with federal collaborators enhances the ADVS research and graduate programs. Significant in this regard are the university Center for Integrated BioSystems, the Utah State Animal Disease Diagnostic Laboratories, the Laboratory Animal Research Center, the Institute for Antiviral Research, and the on-campus USDA Poisonous Plant Laboratory.

Financial Assistance

Both departmental and research grant support are available to matriculated graduate students on a competitive basis.

The department funds graduate assistantships, which are available on a competitive basis to matriculated graduate students. Completion of the Graduate Record Examination (GRE) is required to be considered for a departmental assistantship. Applications for graduate assistantships for the following academic year must be submitted by March 15. Students interested in departmental assistantships may contact the graduate programs director.

Acceptance to graduate study in the ADVS department does not constitute a guarantee of financial assistance.

Degree Programs

The ADVS department offers MS and PhD degrees with the following specializations:

- Animal Health and Disease
- Animal Management
- Animal Molecular Genetics
- Animal Nutrition
- Reproduction and Development

BS to MS degree requires a minimum of 30 credit hours
BS to PhD degree requires a minimum of 70 credit hours
MS to PhD degree requires a minimum of 42 credit hours
DVM to PhD degree requires a minimum of 42 credit hours

The department offers a Master of Public Health (MPH) in Veterinary Public Health. The MPH degree requires a minimum of 42 credit hours.

Finally, ADVS has a post-bachelor's certificate in Humans and Animal-Assisted Interventions. This certificate offers professionals advanced training in the human-animal bond, ethical considerations of animal welfare, and evidence-based methods for integrating animal-assisted interventions into mental health, social work, education, and allied health practices, providing the foundational knowledge needed to pursue certification as an Animal-Assisted Intervention Specialist.

Career Opportunities

MS and PhD Degree Programs (Specializations)

***Animal Health and Disease*:** Career opportunities in this area exist in research, management, and sub management positions in public and private health research and testing organizations, and in commercial industries in the health field. Graduates from the MS program may seek admission to advanced degree programs in the biological sciences or veterinary medicine.

***Animal Management*:** Career opportunities exist in Extension, private consultation firms, farm and ranch management, sales and service to agricultural producers, agricultural finance, and international programs.

***Animal Molecular Genetics*:** Career opportunities exist in Extension, university and private research, commercial animal breeding and genetic engineering enterprises, and international programs.

***Animal Nutrition*:** Career opportunities exist in Extension, university and private research, the commercial animal feedstuffs industry, private consulting firms, and international programs.

***Reproduction and Development*:** Career opportunities exist in Extension; university and private research; the pharmaceutical, embryo transfer, and artificial insemination industries; private consultation; and international programs.

Master of Public Health in Veterinary Public Health

Potential positions include public health veterinarian, veterinary epidemiologist, animal food safety specialist, wildlife public health specialist, and research and management positions. These positions can be found in a variety of governmental, academic, nonprofit, and for-profit settings, including colleges and universities, healthcare organizations, agricultural and food industries, international agricultural and development organizations, and local, state, and federal health and environmental agencies.

Programs

Academic Certificate

- Applied Animal Reproduction
- Beef Cattle Management

- Biotechnology
- Dairy Cattle Management
- Foundations in Animal Science
- Humans and Animal-Assisted Interventions
- Livestock Extension
- Sheep and Wool Production

Associate of Science (AS)

- Veterinary Technology - AS

Bachelor of Science (BS)

- Animal and Dairy Science - BS
- Biotechnology - BS
- Equine Science and Management - BS
- Veterinary Science - BS

Certificate of Completion (CC)

- Ranch Horse Management - Certificate of Completion

Doctor of Philosophy (PhD)

- Animal, Dairy and Veterinary Sciences - PhD

Institutional Certificate of Proficiency (ICP)

- Equine Assisted Services - Institutional Certificate of Proficiency

Master of Public Health (MPH)

- Veterinary Public Health - MPH

Master of Science (MS)

- Animal, Dairy and Veterinary Sciences - MS

Minor

- Animal and Dairy Sciences - Minor
- Animal Biotechnology - Minor
- Equine Science - Minor
- Veterinary Science - Minor

Post-Bachelor's Certificate

- Humans and Animal-Assisted Interventions – Post-Bachelor's Certificate

Faculty - S.J. & Jessie E. Quinney College of Agriculture & Natural Resources

Programs

Applied Animal Reproduction - Certificate
Animal, Dairy and Veterinary Sciences - MS
Animal, Dairy and Veterinary Sciences - PhD
Animal Biotechnology - Minor
Animal and Dairy Sciences - Minor
Animal and Dairy Sciences - BS
Beef Cattle Management - Certificate
Biotechnology - BS
Biotechnology - Certificate
Dairy Cattle Management - Certificate
Equine Assisted Services - Institutional Certificate of Proficiency
Equine Science and Management - BS
Equine - Minor
Foundations in Animal Science - Certificate
Humans and Animal-Assisted Interventions - Post-Bachelor's Certificate
Humans and Animal-Assisted Interventions - Certificate
Livestock Extension - Certificate
Master of Public Health: Veterinary Public Health Specialization - MPH
Ranch Horse Management - Certificate
Sheep and Wool Production - Certificate
Toxicology - Animal, Dairy and Veterinary Sciences - MS (NOT CURRENTLY OFFERED)
Toxicology - Animal, Dairy and Veterinary Sciences - PhD (NOT CURRENTLY OFFERED)
Veterinary Science - Minor
Veterinary Science - BS
Veterinary Technology - AS

Courses

ADVS1050 - Animal, Dairy and Veterinary Science Academic and Career Orientation I - 1 - Credits
ADVS1060 - Animal, Dairy, and Veterinary Science Academic and Career Orientation II - 1 - Credits
ADVS1100 - Small-Scale and Specialty Animal Production - 3 - Credits
ADVS1110 - Introduction to Animal Science (BLS) - 3 - Credits

Applied Economics Department

Applied Economics

Department Head: Ryan Bosworth
Location: AGRS 220B
Phone: (435) 797-0594 | **FAX**: (435) 797-0402
WWW: http://apec.usu.edu/

Graduate Program Director: Man-Keun Kim, AGRS 220 A, (435) 797-2359, mk.kim@usu.edu

Undergraduate Advisor: Lisa Allen, Agricultural Science 416, (435) 797-0454, lisa.allen@usu.edu

Degrees offered:
Bachelor of Science (BS) in Agribusiness
BS in Applied Economics
Master of Science (MS) in Applied Economics
MS in Economics and Statistics
MS in Agribusiness
Doctor of Philosophy (PhD) in Economics

Students can also obtain the following Minors:
Agribusiness
Agriculture and Natural Resources Pre-Law
Applied Economics
Community Development Economics
Environmental and Natural Resource Economics
Small Firm Management

Institutional Certificate of Proficiency (ICP): Small Firm Management-Institutional Certificate of Proficiency

Graduate specializations: *MS in Applied Economics*—Agricultural Economics, Natural Resource Economics, and Regional Economic Development

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at apec.usu.edu/assessment.

Undergraduate Programs

Objectives

Economics is the study of allocating our scarce resources among humankind's seemingly endless variety of needs and wants. This places economists and economic analysis at the center of virtually every important discussion and debate about how nations, firms, and people should organize resources to address these needs and wants. As a result, economics offers an exciting and dynamic field of study and research for students, preparing them well to become tomorrow's decision makers.

Undergraduate economics provides students with the basic intellectual framework to understand and analyze economic problems and to make informed decisions. A basic understanding of economics is essential to becoming a well-informed citizen, as well as a successful business or public leader.

Admission Requirements

First-year students who meet the admission requirements and are accepted in good standing by the university are eligible for admission to the Department of Applied Economics. All transfer students, whether transferring from within Utah State University or from other colleges and universities, must have an overall minimum GPA of 2.5 to be accepted as majors in the department. Additional requirements may apply for students who seek to be admitted to a dual major.

New students wishing to major in the Department of Applied Economics may do so by listing one of the departmental majors on their application when they apply for admission to USU. Students enrolled at USU who may want to change to a departmental major should contact the Undergraduate Advisor in the Department of Applied Economics.

Graduation Requirements

To receive a bachelor's degree in Agribusiness or Agricultural Economics, students must complete all university requirements and the college and departmental requirements for their specific major.

Four-year Degree Plans (8 semesters)

Four-year degree plans for majors offered by the Department of Applied Economics are available in the department.

Students will need to meet with their advisor periodically to ensure all requirements are being met.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Financial Support

The Department of Applied Economics and the College of Agriculture and Applied Sciences award scholarships in addition to those available through the University Financial Aid Office. Information and application forms may be obtained from the college or departmental offices.

Additional Information

For more information about undergraduate programs in the Department of Applied Economics, see the major requirement sheets, available from the Undergraduate Advisor.

Graduate Programs

The MS in Applied Economics, the MS in Economics and Statistics, the MS in Agribusiness and the PhD in Economics are offered by the Department of Applied Economics.

Objectives

Graduate training in the Department of Applied Economics emphasizes economic theory, critical thinking, and quantitative analysis. This foundation is a means to an end, not an end in itself: theory and quantitative methods are tools used in applied courses, in theses and dissertations, and in other research and extension activities carried out in the department.

The **MS in Applied Economics** and the **MS in Agribusiness** are terminal degrees that prepare students for positions in industry; private consulting firms; local, regional, and national policy-making agencies; private not-for-profit organizations; and community/regional economic planning and development agencies. The **MS in Economics and Statistics** is a degree that would prepare student to pursue a PhD degree. The **Doctor of Philosophy in Economics** is intended to prepare students for faculty and research positions.

Admission Requirements

Applicants must have earned a bachelor's degree from an accredited college or university, maintained a grade point average of at least 3.0 for the last 60 semester credits earned, and score in at least the 40th percentile on the Graduate Record Exam (GRE) or the Graduate Management Admission Test (GMAT). In addition, international applicants from non-English-speaking countries must score at least 550 on the Test of English as a Foreign Language (TOEFL). Satisfaction of these minimum admission requirements does not guarantee admission. Applications for graduate study from students trained in disciplines other than economics are welcomed. However, all applicants are expected to have: (1) an understanding of intermediate microeconomic and macroeconomic theory, (2) preparation in mathematical economics, and (3) preparation in probability and statistics. In addition, applicants are expected to have strong written and oral communications skills.

Research

The Department of Applied Economics maintains an active and productive research program. The results of this research are published in professional journals, books, and technical reports. Financial support for the departmental research program is provided by the Utah Agricultural Experiment Station, the College of Agriculture and Applied Sciences, the Office of the Vice President for Research, and by a combination of public and private extramural sources. Graduate students are an integral part of departmental research programs.

Financial Assistance and Assistantships

The Department of Applied Economics offers teaching and research assistantships to qualified graduate students. These are awarded on a competitive basis, and all accepted students are considered eligible. However, while the department makes every effort to assist students in obtaining financial assistance, acceptance into department programs does not guarantee financial assistance.

Financial assistance is not provided to PhD students who fail to pass the written qualifying exam nor to graduate students who fail to make satisfactory progress toward completion of their degrees.

Applied Sciences, Technology and Education Department

Applied Sciences, Technology and Education

Department Head: Rebecca G. Lawver
Location: Agricultural Systems Technology and Education 101C
Phone: (435) 797-2230 | **Fax:** (435) 797-4002
E-mail: rebecca.lawver@usu.edu
Website: aste.usu.edu

Overview

The Applied Sciences, Technology and Education Department provides instruction to students seeking certificate, associate, baccalaureate, or graduate degrees. These innovative degree programs allow students to gain expertise in the fields of agriculture, applied sciences, machinery and technology. Teacher licensure in Agricultural Education, Business Education, Family and Consumer Sciences Education, and Technology and Engineering Education are available.

The Applied Sciences, Technology and Education Department is accessible to students throughout Utah with faculty located at Utah State University campus, in Logan and online. Students are encouraged to enhance their education through the hands-on application using specialized classrooms and laboratories.

Degrees Offered:

Certificate: Agricultural Machinery Technology; Fashion Studies; Global Agriculture, Leadership and Education

Associate of Applied Science (AAS): Agricultural Machinery Technology; Agricultural Production and Automated Processing Technology

Bachelor of Science (BS): Agricultural Systems Technology and Agribusiness (Composite); Agricultural Systems Technology; Agricultural Education; Business Education; Family and Consumer Sciences Education; Technology and Engineering Education

Undergraduate Emphases: Agricultural Machinery and Technology; Agricultural Operations; Community Based Agricultural Education; School Based Agricultural Education; Community Based Family and Consumer Science Education; School Based Family and Consumer Science Education

Undergraduate Minors: Agricultural Systems Technology; Non-formal and Community Education

Master of Education (M.Ed.): Career and Technical Education

Master of Science (M.S.): Agricultural Extension and Education; Family and Consumer Sciences Education; Technology and Engineering Education

Doctorate of Philosophy (Ph.D.): Career and Technical Education

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at aste.usu.edu/assessment.

ASTE Mission Statement

The Department of Applied Sciences, Technology and Education (ASTE) fulfills Utah State University's land-grant mission by developing human potential and strengthening communities through education, research, application, and service. Rooted in a strong land-grant foundation, our work connects learning with real-world impact, preparing individuals to lead, innovate, and serve across Utah and beyond. Students are prepared for impactful careers in both formal (K-12 and higher education) and non-formal (Extension, outreach, and community) education through applied research, experiential learning, and strong partnerships. As a land-grant department, ASTE empowers future leaders and strengthens communities through education with lasting impact.

Undergraduate Programs

ASTE offers both a **one-year technology certificate** and an **Associate of Applied Science** degree in **Agricultural Machinery Technology**. The one-year certificate program is designed to familiarize students with the agricultural equipment industry, and the associate degree serves as a second-year continuation of the certificate program. This degree may transition into the bachelor's program in agricultural systems technology or agricultural education if desired.

The **Associate of Applied Science** degree in **Agricultural Production and Automated Processing** provides a foundation for establishing a rewarding career within the agricultural production and processing industry through hands-on practical training in equipment management, testing, diagnosis, and retailing of agricultural production and automation processing technologies. Students completing the AAS in Agricultural Production and Automated Processing Technology may stack credits into a Bachelor of Science degree in Agricultural Systems Technology.

The **Agricultural Systems Technology** (BS) degree prepares individuals to manage agricultural systems and agribusinesses with the application of sound technical, economical, and environmental practices. The focal point of the program is on the management, use, and troubleshooting of agricultural technology. Students' coursework typically involves a broad foundation through real-world instruction in power and machine systems, natural resources conservation, electricity and electronics, precision agriculture technologies, and agricultural structural systems.

The **Agricultural Education** Bachelor of Science program prepares students for careers as educators in agriculture. The **School Based Agricultural Education emphasis** (BS) prepares students for teacher licensure in Agricultural Education. Students choosing this emphasis must also be admitted to the Secondary Teacher Education Program (STEP) administered by the College of Education and Human Services and complete student teaching. The **Community Based Agricultural Education emphasis** (BS) prepares students to teach and communicate the importance of the agriculture, food, and natural resource industry in nonformal and community-based education settings, including but not limited to Extension education, government agencies, non-government organizations, and private and corporate agriculture and natural resource entities. In addition to education courses, students take courses in technical agriculture areas, including agricultural economics; agricultural mechanization; animal, dairy, and veterinary sciences; plant and soil science; and natural resources. The certificate program in Global Agriculture, Leadership, and Education equips students with knowledge and skills to effect positive change by blending instruction in agriculture, leadership principles, and education strategies with a focus on global and international agricultural systems.

The **Business Education** program is delivered at our Statewide campuses. The **Business Education** (BS) combines the fundamentals of business with skill in teaching those principles to Junior High and High School students. Students are prepared in topics such as accounting, management, business, web design, and image and video editing. Students explore and apply concepts in the business field through clinical and student teaching experiences. Students choosing this major must also be admitted to the Secondary Teacher Education Program (STEP) administered by the College of Education and Human Services.

Family and Consumer Sciences Education prepares students for family life, work life, and careers in family and consumer sciences by providing learning opportunities and experiences to develop the knowledge, skills, attitudes, and behaviors needed for living and working in a global society. The **School Based Family and Consumer Sciences emphasis** (BS) prepares students to be middle and secondary educators. Students choosing this major must also be admitted to the Secondary Teacher Education Program (STEP) administered by the College of Education and Human Services. The **Community Based Family and Consumer Sciences emphasis** (BS) prepares students in nonformal and community education including but not limited to Extension education, government agencies, and private and corporate educators. A certificate program in **Fashion Studies** introduces students to the apparel and fashion industry through textile science, apparel construction, sustainability, and product design and development.

A Bachelor of Science degree in **Technology and Engineering Education** prepares students to become highly qualified high school or middle school Technology and Engineering teachers who can help students develop the technological literacy and technical skills that are increasingly necessary in our changing world. Technology and Engineering Education students develop their ability to use technological tools, processes, and systems safely and effectively in a laboratory setting by taking classes in a

wide variety of technical areas, including Manufacturing, Automation/Robotics, Construction, Information Technology, Agricultural Technology, Transportation/Logistics, and more. Options are also available for students who wish to teach a specific trade, such as welding, automotive mechanics, manufacturing, and more. Graduates may work as teachers of Career & Technical Education courses in these areas at the high school or post-high school level.

Academic Advising

Successful completion of an undergraduate degree program in the ASTE department requires that a very close student-academic advisor relationship be established and continued through each student's bachelor's degree program. Each student must take the responsibility of establishing this close working relationship with their advisor. Doing this soon after a student's acceptance into the department can keep academic problems to a minimum.

Undergraduate Academic Advisors:

Allie East
Agricultural Systems Technology, Agricultural Machinery Technology, Agricultural Production and Automated Processing
AGRS 418, (435) 797-2194, allie.east@usu.edu

Caisa Shoop
Agricultural Education, Business Education, Family and Consumer Sciences Education, Technology and Engineering Education
AGRS 416, (435) 797-4275, caisa.shoop@usu.edu

Advising appointments can be made at: caas.usu.edu/advising or call (435) 797-2282

Requirements

Admission Requirements

Admission requirements for the Department of Applied Sciences, Technology and Education are the same as those described for the university for incoming freshman and most transfer students. See individual program listings for additional information and requirements.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For further information about undergraduate programs and requirements, visit the website: aste.usu.edu

Graduate Programs

The graduate programs in the Applied Sciences, Technology, and Education department focus on a wide range of teaching and learning skills for application in formal and nonformal educational settings. The goals of these degree programs are to increase effectiveness as an educator, increase earning potential, and expand career options. The graduate programs in ASTE are 100% Online.

Graduate Program Coordinator:

Tanesha Holliday | 435-797-2722 | Tanesha.Holliday@usu.edu

Graduate Degrees Offered:

Master of Education (M.Ed.): Career and Technical Education

Master of Science (M.S.): Agricultural Extension and Education; Family and Consumer Sciences Education; Technology and Engineering Education

Doctorate of Philosophy (Ph.D.): Career and Technical Education

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at aste.usu.edu/assessment.

Admission Requirements

The admission requirements for the graduate program for the Master of Education, Master of Science, and Doctorate of Philosophy in the ASTE department are found at ASTE Graduate Admissions. Applications must be completed and submitted to the School of Graduate Studies.

Research

The ASTE Department conducts a broad range of basic, applied (action), and evaluation social-science research in the areas of agricultural communication, agricultural literacy, agricultural safety, agricultural systems technology, career and technical education, curriculum and instruction, environmental quality, leadership, non-formal education, Science Technology, Engineering, and Math (STEM), and teaching and learning. In addition to state and federal agencies that support research in the Applied Sciences, Technology and Education Department, the Utah Agricultural Experiment Station, a component of the College of Agriculture and Applied Sciences, supports research in several areas.

Financial Assistance

On-campus teaching or research assistantships may be available through faculty members who have ongoing projects with the Utah Agricultural Experiment Station or who hold special research grants from the university, private companies, or state-federal agencies. Students on a graduate assistantship must be admitted to the program and be based at the Logan campus. Additional departmental or formal grant support may be available to graduate students and is awarded on a competitive basis to students.

Acceptance to pursue graduate study does not guarantee the student financial assistance.

Students interested in graduate assistantships may contact Dr. Michael Pate Michael.Pate@usu.edu. Applications for graduate assistantships for the following academic year must be submitted by March 1.

Requirement Changes

Graduation requirements described in this catalog are subject to change. Students should check with their academic advisor concerning possible changes.

FACULTY - College of Agriculture and Applied Sciences

Programs

Advanced Fashion Studies - Certificate
Agricultural Education - BS
Agricultural Education - Community-Based Emphasis - BS
Agricultural Education - School-Based Emphasis - BS
Agricultural Extension and Education - MS
Agricultural Machinery Technology - AAS
Agricultural Machinery Technology - Certificate
Agricultural Production and Automated Processing Technology - AAS
Agricultural Systems Technology and Agribusiness (Composite) - BS
Agricultural Systems Technology - Minor
Agricultural Systems Technology - Agribusiness Emphasis - BS
Agricultural Systems Technology - Agricultural Operations Emphasis - BS
Agricultural Systems Technology - Agricultural Machinery and Technology Emphasis - BS
Aviation Education - Post-Bachelor's Certificate
Business Education - BS
Career and Technical Education Teaching Academy - ICP
Career and Technical Education - PhD
College Teaching - Post-Bachelor's Certificate
Career and Technical Education - MEd
Extension Education - Post-Bachelor's Certificate
Fashion Studies - Institutional Certificate of Proficiency
Family and Consumer Sciences Education - Community-Based Emphasis - BS
Family and Consumer Sciences Education - School-Based Emphasis - BS
Family and Consumer Sciences Education and Extension - MS
Global Agriculture, Leadership and Education - Institutional Certificate of Proficiency
Livestock Extension - Certificate
Nonformal and Community-Based Education - Minor
Precision Agriculture Technology - Institutional Certificate of Proficiency
Precision Agriculture Technology - Post-Bachelor's Certificate
Patternmaking – Certificate
Technology and Engineering Education - Minor
Technology and Engineering Education - BS
Technology and Engineering Education - MS

Courses

ASTE1006 - Exploring Teaching for Careers and Communities - 1 - Credits
ASTE1008 - Exploring Agricultural Systems, Machinery, and Management - 1 - Credits
ASTE1010 - Introduction to Agricultural Systems Technology - 3 - Credits
ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2 - Credits
ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3 - Credits
ASTE1610 - Agricultural and Construction Machinery Power - 4 - Credits
ASTE1625 - Agricultural Machinery Power Trains Laboratory - 3 - Credits
ASTE1640 - Introduction to Welding - 3 - Credits
ASTE1710 - Introduction to Agricultural Communication - 3 - Credits
ASTE1800 - Leadership and Human Flourishing - 3 - Credits
ASTE2100 - Personal and Team Leadership - 3 - Credits
ASTE2250 - Occupational Experience in Agriculture - 1 - 6 Credits
ASTE2450 - Domestic Study Experience - 1 - 5 Credits
ASTE2500 - Education Forum in Career and Technical Education - 1 - Credits
ASTE2710 - Orientation to Agriculture Education - 2 - Credits
ASTE2810 - Introduction to Cooperative Extension - 2 - Credits
ASTE2900 - Food Matters: Ethics, Economics, and the Environment (BSS) - 3 - Credits
ASTE2910 - Sustainability Through Global Citizenship - 3 - Credits
ASTE2930 - Individualized Projects in Agriculture Mechanics - 1 - 3 Credits
ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3 - Credits
ASTE3050 - Technical and Professional Communication Principles (CI) - 3 - Credits
ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3 - Credits
ASTE3090 - Graphic Design in Agriculture and Media Industries - 3 - Credits
ASTE3240 - Teaching in Laboratory Settings (CI) - 3 - Credits
ASTE3300 - Clinical Experience in Agricultural Education - 1 - Credits
ASTE3440 - Science, Technology, and Modern Society (DSC) - 3 - Credits
ASTE3500 - Teaching Apprenticeship in Agricultural Education - 2 - Credits
ASTE3600 - Data Management of Agricultural Systems (QI) - 3 - Credits
ASTE3620 - Managing the FFA and SAE Programs - 2 - Credits
ASTE3625 - Youth Development Education - 2 - Credits
ASTE3720 - Electrical Power Systems for Agricultural Applications - 4 - Credits
ASTE3730 - Agricultural Machinery Auxiliary Systems and Diagnosis - 3 - Credits
ASTE3900 - Special Problems in Agricultural Systems Technology and Education - 1 - 6 Credits
ASTE4090 - Website Design in Agricultural Communications - 3 - Credits
ASTE4100 - Agricultural Structures and Environment (QI) - 3 - Credits
ASTE4150 - Methods of Teaching Agriculture (CI) - 3 - Credits
ASTE4155 - Nonformal Teaching Methods - 3 - Credits
ASTE4210 - Cognition and Evaluation of Student Learning in Career and Technical Education - 3 - Credits
ASTE4215 - Community Programming and Evaluation - 3 - Credits
ASTE4250 - Occupational Experiences in Agriculture - 1 - 6 Credits
ASTE4300 - Clinical Experience II in Agricultural Education - 1 - Credits
ASTE4400 - Advising Applied Technology Education Student Organizations - 1 - Credits
ASTE4900 - Senior Project Research and Creative Opportunity - 1 - 6 Credits

Art and Design Department

Art and Design

Department Head: Kathy Puzey
Location: Fine Arts Visual 122 (FAV)
Phone: (435) 797-3460 | **FAX:** (435) 797-3412
E-mail: art@usu.edu
Website: https://artsci.usu.edu/art-design/

Assistant Head and Art Program Director: TBD

Academic Advisors:
ART, IAD - Angela Neff, FAC 127F, (435) 797-8096, angela.neff@usu.edu
ART - Brooke Lambert, FAC 127G, (435) 797-9499, brooke.lambert@usu.edu

Art Education Undergraduate Advisor:
Tamryn McDermott, FAV 128, (435) 797-9915, tamryn.mcdermott@usu.edu

Degrees offered: Bachelor of Arts (BA) in Art, Bachelor of Arts (BA) in Art History, Bachelor of Science (BS) in Art, Bachelor of Fine Arts (BFA) in Art, Bachelor of Interior Architecture & Design (BIAD), Master of Fine Arts (MFA) in Art

Undergraduate emphases: Art Education, Ceramics, Drawing & Painting, Graphic Design, Photography, Printmaking, Sculpture

Graduate specializations: Ceramics, Drawing & Painting, Graphic Design, Interior Architecture and Design, Photography, Printmaking, Sculpture

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://artsci.usu.edu/art-design/assessment.

Undergraduate Programs

Objectives

The Department of Art and Design's primary goal is to prepare undergraduate students for careers in art history, art education, studio art, graphic and interior architecture & design. Requirements in seven different emphasis areas address the specific needs of each career. The Department of Art and Design also serves the university community by offering courses in the University Studies program and by offering training for students in related degree programs.

Departmental Admission Requirements

Admission to the Art & Design major is competitive. There are four ways an undergraduate student may be admitted to the Department.

1. Following admission to USU, freshman and transfer students (with less than 30 credits) may be coded as pre-art. Pre-Art students are not admitted to a specific degree program.

2. Transfer students and current USU students in other majors may be admitted to the BS degree following a portfolio review. Admission to the degree requires a minimum 2.75 GPA in addition to passing the portfolio review.

3. Students enrolled in the BS degree may be admitted to the BFA degree in a specific emphasis area after successfully passing a portfolio review. Admission to the BFA degree requires a minimum 2.75 GPA in addition to passing the portfolio review.

4. Acceptance to the BA program in Art History is limited to students with a minimum 3.0 GPA who have interviewed with the Art History area coordinator.

Sample Four-year Plans

Sample semester-by-semester four-year plans for students working toward a bachelor's degree are available online.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (www.usu.edu/honors/) for more information.

Additional Information

For additional information about undergraduate requirements in the Department of Art and Design, see the department website at: https://artsci.usu.edu/art-design/

Graduate Programs

The Department of Art and Design offers one graduate degree, the Master of Fine Arts (MFA). The Department of Art and Design also cooperates with the Emma Eccles Jones College of Education and Human Services on a Master of Education (MEd) with a specialization in art which is offered through the Emma Eccles Jones College of Education and Human Services.

Application Procedures

Completed applications must include: (1) completed application forms; (2) a letter of intent; (3) transcripts of all previous graduate and undergraduate work; (4) three letters of recommendation from qualified professionals; (5)-a portfolio of recent work (20 digital images combined into a single PDF) submitted electronically; and (7) the $55 application fee.

These materials must be sent directly to the School of Graduate Studies. When complete, applications will be forwarded by the School of Graduate Studies to the Art and Design Department for review.

Completed applications and portfolios (in PDF format only) must be received by **February 1**. Students should note that applications will be considered *only* at this time, and *only* completed applications will be reviewed. Admission will *only* be considered for fall semester. The deadlines for financial aid may be earlier than the admissions deadline. For further information about financial aid, visit the Financial Aid Office in Taggart Student Center 106; write to: Financial Aid Office, Utah State University, 1800 Old Main Hill, Logan UT 84322-1800; or phone (435) 797-0173.

Applications are reviewed by the Art and Design Department faculty. Candidates are selected primarily on the basis of their **portfolio**, which should demonstrate a level of development beyond the need of classroom instruction and encouragement. The faculty will also look in the portfolio for evidence of significant personal exploration.

Secondary to the portfolio, but important nonetheless, the applicant's **letter of intent** and **letters of recommendation** will also be given careful consideration. In reviewing these letters, the faculty will look for, among other things, indications that the applicant will be capable of prolonged and concentrated effort, guided by realistic personal goals. Letters should address both academic and artistic accomplishments, as well as potential for further growth in both of these areas.

Applicants are strongly encouraged to visit the USU campus and meet with the faculty in their proposed field of study *well in advance* of the February 1 application deadline.

Important Note. Please note that the graduate programs in the Department of Art and Design have limited enrollment; admission is *very* competitive. There is no guarantee that applicants who meet minimum admission requirements will be accepted into the graduate programs.

Financial Assistance

Departmental support is available to graduate students on a competitive basis. Students requesting financial support should apply to the department by February 1. Other assistance is available through the university Financial Aid Office. Students should note that applications for Federal work-study should be mailed during the first week of February.

Aviation Technology Department

Aviation Technology

Department Head: Bruce Miller
Location: Industrial Science 112E
Phone: (435) 797-2232 | **Fax:** (435) 797-2567
E-mail: bruce.miller@usu.edu
Website: caas.usu.edu/avte/index

Undergraduate Advising Appointments: https://caas.usu.edu/advising/index or 435-797-2282
Logan- Lisa Hunsaker, AGRS 414, lisa.hunsaker@usu.edu, appointments: caas.usu.edu/advising or call (435) 797-2282
Logan- Janet Blad-Wilson, AGRS 420, (435) 797-1795 janet.blad-wilson@usu.edu, appointments: caas.usu.edu/advising or call (435) 797-2282
Logan- Maranda Garvin, AGRS 417, maranda.garvin@usu.edu, appointments: caas.usu.edu/advising or call (435) 797-8434
Price- Brinley Bradley, (435) 613-5298, brinley.bradley@usu.edu, appointments: caas.usu.edu/advising or call (435) 797-2282

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at caas.usu.edu/avte/assessment.

Overview

The Aviation Technology Department provides instruction to students seeking an aviation related certificate, associate of applied science, baccalaureate and/or master degree.

The Aviation Technology Department prides itself in applying cutting-edge technology with exceptional training to produce high quality professionals that the aviation industry needs.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at http://caas.usu.edu/avte/assessment.

Undergraduate Programs
Mission Statement

Our mission is to prepare and inspire the next generation of aviation professionals by providing innovative education and training in aviation technology. We strive to cultivate a comprehensive understanding of aviation technology, maintenance, operations, and unmanned aircraft systems. Through a combination of cutting-edge technology, hands-on learning, an experiential education, we aim to develop skilled and knowledgeable individuals who are committed to the highest standards of safety, efficiency, and professionalism in the aviation industry.

Admission Requirements

Admission requirements for most programs in the Aviation Technology Department are the same as those described for the university for incoming freshman and most transfer students. See individual program listings and advisors for additional information and requirements.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Graduate Programs

Admission Requirements

See general admission requirements. Applications will be considered throughout the year. However, students who wish to be considered for financial aid must apply by February 1 for the coming academic year. No application will be considered until all required information arrives at the office of the School of Graduate Studies.

Requirement Changes

The graduation requirements described in this catalog are subject to change. Students should check with their advisors concerning possible changes.

Additional Information

For further information about undergraduate programs and requirements, visit the following website: caas.usu.edu/avte/index.

Programs

Aircraft Maintenance Technician - Airframe & Powerplant - AAS
Airport Management - Post-Bachelor's Certificate
Aviation Technology - Maintenance Management - BS
Aviation Technology - Professional Pilot: Accelerated Fixed Wing Emphasis - BS
Aviation Technology - Professional Pilot: Fixed Wing Emphasis - BS
Aviation Technology - Professional Pilot: Rotorcraft Emphasis - BS
Air Traffic Control - Minor
Aviation Dispatch - Minor
Aviation Education - Post-Bachelor's Certificate
Aviation Technology - Aviation Management: Aviation Operations Emphasis - BS
Aviation Management - Post-Bachelor's Certificate
Aviation Technology - Aviation Management - Unmanned Aircraft Systems Emphasis - BS
Master of Aviation Science - MAS
Aviation Safety Management - Post-Bachelor's Certificate
Small Business Operations - AAS
Unmanned Aircraft Systems - Minor
Unmanned Aircraft Systems - Certificate

Courses

AV1000 - Private Pilot Introduction - 1 - Credits
AV1100 - The Aviation Profession - 1 - Credits
AV1125 - The Aviation Profession - 1 - Credits
AV1130 - Flight Principles - 3 - Credits
AV1140 - Aircraft Components and Principles - 3 - Credits
AV1150 - Aircraft Components and Principles II - 3 - Credits
AV1170 - Aircraft Structures - 3 - Credits
AV1200 - Professional Development for Aviation Careers - 3 - Credits
AV1210 - Introduction to Airfield Operations - 3 - Credits
AV1220 - Introduction to Landside Operations - 3 - Credits
AV1240 - Aircraft Maintenance - 3 - Credits
AV1710 - Air Traffic Control Fundamentals - 3 - Credits
AV1905 - Intro to Unmanned Aerial Systems (without FAA Exam) - 2 - Credits
AV2000 - Aerodynamics for Aviators - 3 - Credits
AV2040 - Aviation Weather - 3 - Credits
AV2050 - History of Aviation - 3 - Credits
AV2100 - Aircraft Reciprocating Powerplants and Accessories - 3 - Credits
AV2110 - Aircraft Reciprocating Powerplants and Accessories Lab - 3 - Credits
AV2140 - Aircraft Turbine Powerplants and Maintenance Operations - 3 - Credits
AV2150 - Aircraft Turbine Powerplant Maintenance Operations Lab - 3 - Credits
AV2160 - Aircraft Systems for the Professional Pilot - 3 - Credits
AV2170 - Aircraft Systems - 2 - Credits
AV2175 - Robinson Helicopter Systems - 2 - Credits
AV2180 - Aircraft Hydraulic and Pneumatic Systems - 2 - Credits
AV2190 - Aircraft Systems Lab - 1 - Credits

AV2200 - Aircraft Hydraulics and Pneumatics Systems Lab - 1 - Credits
AV2250 - Internship - 1 - 4 Credits
AV2300 - Fundamentals of Electricity and Aircraft Electronics - 4 - Credits
AV2310 - ROTC Flight 1 - 0.5 - Credits
AV2320 - Intro to Private Pilot Requirements - 3 - Credits
AV2330 - Private Pilot Ground School - 4 - Credits
AV2335 - Private Pilot Ground School Helicopter - 4 - Credits
AV2350 - Private Pilot Certification - 3 - Credits
AV2355 - Private Pilot Helicopter Stage I Certification - 3 - Credits
AV2365 - Private Pilot Helicopter Stage II Certification - 3 - Credits
AV2401 - Cross Country Ground School - 1 - Credits
AV2430 - Aircraft Electrical Systems and Components - 2 - Credits
AV2440 - Aircraft Electrical Systems Laboratory - 2 - Credits
AV2450 - Cross Country - Commercial Stage 1 - 3 - Credits
AV2451 - Challenge Cross Country - Commercial Stage 1 - 3 - Credits
AV2500 - Flight Time Building I - 1 - Credits
AV2504 - Flight Time Building II - 1 - Credits
AV2505 - Flight Time Building III - 1 - Credits
AV2510 - IFR and Commercial Regulations and Procedures - 3 - Credits
AV2520 - Instrument Pilot Ground School - 4 - Credits
AV2525 - Instrument Pilot Ground School Helicopter - 4 - Credits
AV2530 - Instrument Flight Rules, Regulations and Procedures - 4 - Credits
AV2540 - Instrument Pilot Certification - 3 - Credits
AV2545 - Instrument Helicopter Certification - 3 - Credits
AV2555 - Instrument Pilot Helicopter Certification II - 1 - Credits
AV2620 - Commercial Pilot Ground School - 3 - Credits
AV2625 - Commercial Pilot Ground School Helicopter - 4 - Credits
AV2630 - Commercial Pilot Regulations and Procedures - 2 - Credits
AV2655 - Commercial Helicopter Advanced Cross-Country - 3 - Credits
AV2660 - Advanced Maneuvers - Commercial Stage 2 - 3 - Credits
AV2665 - Commercial Helicopter Stage I Certification - 3 - Credits
AV2670 - Commercial Multi-Engine Certification - 3 - Credits
AV2675 - Commercial Helicopter Stage II Certification - 3 - Credits
AV2710 - Basic Control Tower Operations - 3 - Credits
AV2800 - Flight Lab 1 (141 Instrument and Commercial Training) - 3 - Credits
AV2810 - Basic Radar Operations - 3 - Credits
AV2870 - Commercial Single-Engine Add-On - 1 - Credits
AV2900 - Flight Lab 2 (141 Instrument and Commercial Training) - 3 - Credits
AV2960 - Aircraft Dispatcher Written Exam Preparation - 3 - Credits
AV3000 - Flight Lab 3 (141 Commercial Training) - 3 - Credits
AV3010 - National Airspace, Air Traffic Control, and Airport Administration - 3 - Credits
AV3020 - Electronic Flight Instrument Analysis for Aircraft Technicians - 3 - Credits
AV3100 - Technical Communication for the Global Aviation Industry (CI) - 3 - Credits
AV3120 - Aviation Law - 3 - Credits
AV3140 - Advanced Avionics Systems and Flight Simulation - 3 - Credits
AV3145 - Helicopter Flight Training Device - 3 - Credits
AV3200 - Flight Lab 4 (141 Commercial and CFI Training) - 3 - Credits
AV3280 - Advanced Aircraft Maintenance - 3 - Credits
AV3300 - Flight Lab 5 (141 CFI Training) - 2 - Credits
AV3310 - ROTC Flight 2 - 1 - 3 Credits
AV3410 - Commercial Single Engine Certification - Commercial Stage 3 - 3 - Credits
AV3420 - FAA Regulations, Records, and Certification - 2 - Credits
AV3440 - Accelerated Commercial Certification - 3 - Credits
AV3510 - UAS Fixed Wing Design and Construction - 3 - Credits
AV3515 - UAS Maintenance & Multirotor - 3 - Credits
AV3520 - UAS Guidance and Control - 3 - Credits

Biological Engineering Department

Department Head: Dr. Jixun Zhan
Location: Engineering 402
Phone: (435) 797-1041
Website: engineering.usu.edu/be/

Advising:
Undergraduate: Amber Crook, (435) 797-2705, amber.crook@usu.edu; Nicole Tillmann, (435) 797-2705, nicoletillmann@usu.edu , Engineering Advising Center, ENGR 314

Graduate: Lauren Shanley, (435) 797-1041, lauren.shanley@usu.edu, Biological Engineering Dept. Office, ENGR 402

Degrees offered: Bachelor of Science (BS), Master of Science (MS), Master of Engineering (ME) and Doctor of Philosophy (PhD) in Biological Engineering; Master of Science (MS) in Biomanufacturing

Graduate areas of interest: Bioprocessing; Biofuels; Biomedical; Synthetic Biomanufacturing; Synthetic Biology; Computational Biology; Biophotonics; Sustainable Energy; Biosensing; Metabolic Engineering; Tissue Engineering; Nanotechnology

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at engineering.usu.edu/be/assessment/nwccu/nwccu-undergrad for undergraduate programs and engineering.usu.edu/be/assessment/nwccu/nwccu-graduate for graduate programs.

Mission

The mission of the Biological Engineering Department is to apply fundamental biological science and modern engineering analysis to create new knowledge and to translate that knowledge into novel applications.

- Teach students how to integrate engineering principles and the knowledge of basic biological sciences to the design, control, and analysis of engineered biological systems to meet the needs of society and to improve the quality of life.
- Prepare students with engineering skills for entry into biological-based professions including medicine (MD and MD/PhD), law, and public health programs, and for entry into graduate programs in biological engineering, biomedical engineering, and similar disciplines.
- Provide a curriculum that is relevant to the needs of the region, nation, and world (global) that will attract the most outstanding students.
- Create new research-based biological engineering processes, technologies, and products to address local and global problems and the local and global economy, which will foster growth of spin-off companies in the private sector.
- Develop partnerships with industry and government to stimulate high-technology job creation and economic growth supporting a circular economy.
- Develop leaders in the biological engineering profession, including faculty members and students, who can address technology innovation and bioethics challenges.

Program Educational Objectives

Program Educational Objectives describe what graduates of the Biological Engineering program are expected to attain within a few years of graduation.

The Biological Engineering Program Educational Objectives are:

1. Graduates of the program will advance in careers and opportunities in Biological Engineering and related fields and professions based on a solid educational background in appropriate engineering, mathematics, physical/life sciences, and general studies including communication and ethics.

2. Graduates of the program will pursue advanced degrees in engineering and related professional fields.

Student Outcomes

Student outcomes are statements that describe what students are expected to know and be able to do by the time of graduation. These relate to skills, knowledge, and behaviors that students acquire as they progress through the Biological Engineering program.

The Biological Engineering Program Student Outcomes correspond to the ABET Student Outcomes 1-7:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. An ability to design and conduct experiments, as well as to analyze and interpret data.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

3. An ability to communicate effectively with a range of audiences.

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Assessment and Evaluation

The Biological Engineering Department is committed to an assessment process aimed at evaluating the effectiveness of the biological engineering program in preparing graduates as productive professionals. The foundation of departmental assessment is the undergraduate accreditation by the EAC Accreditation Commission of ABET, www.abet.org.

The continuous improvement processes that are documented and implemented annually as part of the accreditation activities in support of the ABET requirements provide for formal review of the Biological Engineering Bachelor of Science program. The assessment and evaluation are formally conducted annually through department committees including: (1) the Curriculum Committee, (2) the ABET Committee, and (3) the Biological Engineering Industry Review Board. The assessment and evaluation, ensures that the Biological Engineering program meets overall objectives and structure consistent with similar programs in the United States.

Career Opportunities

The Biological Engineering program is broad based and prepares students to pursue opportunities in the biomedical, environmental, energy, bioproducts, food, and bioprocessing sectors as well as government and municipalities. Students receive a firm grounding in biological engineering and also the opportunity to specialize in their chosen area of biological engineering. Biological engineering and related fields are among the highest job growth areas through the next decade. Graduates of the program are also prepared to pursue advanced degrees in research/academia, medicine/dental, law and business. In recent years the College of Engineering has had an excellent job placement rate.

Undergraduate Programs

General biological engineering concepts include the properties of biological materials, electronics and bio-instrumentation, computer use and programming, engineering mechanics, thermodynamics, computer-aided design, biological modeling, including metabolic and biological systems modeling, bio-environmental transport phenomena, and fluid mechanics.

Students gain a strong foundation in engineering, biological, chemical, and physical sciences. Students are then able to choose areas of study tailored to their needs with 14 credits of engineering and technical electives and one-on-one academic advisement with a member of the faculty. Design is a major theme of the student's general coursework and area of interest, with most courses including open-ended design problems. The entire design experience is brought together in a capstone design course.

The Biological Engineering BS program is accredited by the Engineering Accreditation Commission of ABET, (www.abet.org), under the commission's General Criteria and the Program Criteria for Biological Engineering and Similarly Named Programs.

Taking the Fundamentals of Engineering examination, the first step in becoming a licensed professional engineer, is required for graduation. After students have made three credible attempts to pass the national exam, a departmental exam will be administered. When passed, this departmental exam will satisfy the graduation requirement.

Requirements

Admission and Graduation Requirements

The student who is majoring in or planning to major in Biological Engineering needs to be aware of the College of Engineering requirements concerning admission to the college, pre-engineering, admission to the professional engineering program, general education, and other academic requirements. Additional information concerning these items is given in the College of Engineering requirements in this catalog. It is the responsibility of the student to be aware of these rules and regulations.

Additional Information

For more information about the Bachelor of Science requirements and the sequence in which courses should be taken, see Biological Engineering - BS, available from the Biological Engineering Department, the College Advising Center (ENGR 314) or in the online catalog.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the university. In addition, the department employs students to assist in engineering research and development. Cooperative education and industrial employment opportunities for students are coordinated by the university Placement Office and by the Biological Engineering Department.

Concurrent BS/Master's Program

The concurrent BS/Master's program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for *both* the BS degree *and* the master's degree concurrently. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student's senior design project could be applicable to a graduate design project or thesis. The department requires a minimum GPA of 3.2, both overall and during the last 60 semester credits, in order to qualify for acceptance into the concurrent BS/Master's program. (For more information, see Concurrent BS/MS Program.)

Graduate Programs
Admission Requirements

See general admission requirements. Admission committees also consider experience, undergraduate record and curriculum, and formal recommendations. A student without an undergraduate engineering background will be required to complete selected undergraduate courses prior to or concurrently with enrollment in graduate courses.

Prerequisites for Matriculation

Students who are admitted provisionally or who have been changed from matriculated to probationary matriculated status will have their records reviewed by a faculty committee when they have completed 12 credits of coursework (among which must be formal engineering courses) or at the end of their second semester at USU. Those students who have earned a 3.0 GPA at that time and desire to be matriculated may apply to the department to have their status changed. If they meet all other academic requirements of the School of Graduate Studies and the department, they will be matriculated and admitted to the degree program. When a student is admitted as a degree candidate, the committee may allow up to 12 credits taken while on nonmatriculated status to be transferred. Nonmatriculated students may continue to study at USU but without degree candidate status. At the end of their studies, nondegree students are granted a Certificate of Completion.

Prerequisite Requirements

All students must have had **formal** courses in engineering and computer programming, as well as at least one year of calculus. Students without this background can satisfy these requirements by taking the appropriate undergraduate courses at USU.

Research Option

Students wishing to gain experience in research may select the research option, particularly if they have a long-term goal of PhD study. The minimum requirements for this option are 30 credits, of which 6 may be awarded for the thesis.

Technical Practice Option

The technical practice (Plan B) Master's (MS) option is offered for students wishing to gain additional coursework and training beyond a bachelor's (BS) degree without the research requirements for a Plan A MS. The requirements for the degree are similar to those for the Plan A MS research option, with the exception of the thesis. The 6 thesis credits are replaced by 3 credits for a significant engineering report or design project and 3 additional credits of coursework. The minimum course requirement for the technical practice option is 30 approved graduate credits.

Research

Specific research projects in biological engineering include tissue and biomedical engineering related to implant materials, biosensor design and development for biomedical and bioenvironmental applications (rapid diagnostics, genetic probes), microbial fermentations, biorefining (production of biofuels and bioplastics from biological feedstocks), nanobiotechnology (quantum dots; nano-drug delivery), biophotonics (interactions of light with biological materials), land-based bioenvironmental sustainable systems (land application of industrial and municipal residuals for recycling, vegetative growth, soil improvement, and groundwater protection), metabolic engineering, and synthetic biological engineering.

Financial Assistance

The large and diverse departmental research programs make it possible to offer graduate financial support in the form of research assistantships, traineeships, and teaching assistantships for qualified students. Research assistantships are provided by the Biological Engineering Department and by individual research projects. Teaching assistantships are provided by the School of Graduate Studies and by the College of Engineering. It is the goal of the Biological Engineering Department to provide research and/or teaching support for all qualified students.

Additional Information

Two guides are available from the department to assist students: (1) *Report, Thesis, and Dissertation Format Guidelines and Policies*, and (2) P*olicies and Procedures for Graduate Study*.

FACULTY - College of Engineering Faculty

Programs

Biological Engineering - BS
Biological Engineering - ME
Biological Engineering - MS
Biological Engineering - PhD

Courses

BENG1200 - SolidWorks for Biological Engineers - 2 - Credits
BENG1880 - Engineering Quantification of Biological Processes - 3 - Credits
BENG2290 - Biological Engineering Profession Exploration - 1 - Credits
BENG2330 - Engineering Properties of Biological Materials - 3 - Credits
BENG2400 - Biological and Environmental Thermodynamics - 3 - Credits
BENG2620 - Environmental Engineering Microbiology - 3 - Credits
BENG3000 - Instrumentation for Biological Systems - 3 - Credits
BENG3200 - Introduction to Unit Operations in Biological Engineering - 3 - Credits
BENG3500 - Fluid Mechanics in Biological Engineering - 3 - Credits
BENG3670 - Transport Phenomena in Bio-Environmental Systems - 3 - Credits
BENG3870 - Biological Engineering Design I - 1 - Credits
BENG4250 - Cooperative Practice - 3 - Credits
BENG4880 - Biological Engineering Design II (CI) - 3 - Credits
BENG4890 - Biological Engineering Design III (CI) - 3 - Credits
BENG4930 - Special Studies - 1 - 4 Credits
BENG5020 - Biological Modeling and Controls - 3 - Credits
BENG5500 - Systems Biology Modeling - 3 - Credits
BENG5600 - Downstream Processes in Biological Engineering - 3 - Credits
BENG5610 - Food and Bioprocess Engineering - 3 - Credits
BENG5620 - Metabolic Engineering I - 3 - Credits
BENG5630 - Synthetic Biological Engineering - 3 - Credits
BENG5640 - Biofuels - 3 - Credits
BENG5660 - Environmental Quality Analysis - 3 - Credits
BENG5680 - Soil-based Waste Management - 2 - Credits
BENG5700 - Introduction to Microfabrication - 3 - Credits
BENG5710 - Advanced Microfabrication - 3 - Credits
BENG5790 - Protein Structure/Function and Purification - 3 - Credits
BENG5810 - Biochemical Engineering - 3 - Credits
BENG5830 - Management and Utilization of Biological Solids and Wastewater - 3 - Credits
BENG5840 - Introduction to Biophotonics - 3 - Credits
BENG5850 - Biomaterials Engineering - 3 - Credits
BENG5870 - Molecular and Cellular Bioengineering - 3 - Credits
BENG5880 - BioMEMS: Microtechnology for BioMedical Research - 3 - Credits
BENG5890 - Tissue Engineering - 3 - Credits
BENG5910 - Introduction to Biosensors - 3 - Credits
BENG5930 - Special Studies - 1 - 4 Credits
BENG6210 - Upstream Processing in Biomanufacturing - 3 - Credits
BENG6220 - Mammalian Cell Culture - 3 - Credits
BENG6230 - Industrial Biotechnology and Biopharmaceuticals Entrepreneurship - 3 - Credits
BENG6240 - Regulation cGMP & Quality Management Systems - 3 - Credits
BENG6250 - Technical Writing in Life Sciences - 3 - Credits
BENG6260 - Downstream Processing for Biomanufacturing - 3 - Credits
BENG6310 - Microbial Fermentation - 3 - Credits
BENG6320 - Monoclonal Antibody & Vaccine Production - 3 - Credits
BENG6330 - Agro-bioproduct, Biorefining, Biomanufacturing - 3 - Credits
BENG6340 - Nutraceutical and Pharmaceutical Product Manufacturing - 3 - Credits
BENG6350 - Medical Device & In-Vitro Diagnostic Substance Manufacturing - 3 - Credits
BENG6370 - Biomanufacturing Laboratory Practicum - 3 - Credits
BENG6380 - Biomanufacturing Internship - 3 - 6 Credits
BENG6500 - Systems Biology Modeling - 3 - Credits
BENG6510 - Graduate Seminar - 1 - Credits
BENG6540 - Physical and Chemical Environmental Process Engineering - 3 - Credits
BENG6600 - Downstream Processes in Biological Engineering - 3 - Credits
BENG6610 - Food and Bioprocess Engineering - 3 - Credits
BENG6620 - Metabolic Engineering I - 3 - Credits
BENG6630 - Synthetic Biological Engineering - 3 - Credits
BENG6640 - Biofuels - 3 - Credits
BENG6660 - Environmental Quality Analysis - 3 - Credits
BENG6680 - Soil-based Waste Management - 2 - Credits
BENG6790 - Protein Structure/Function and Purfication - 3 - Credits
BENG6810 - Biochemical Engineering - 3 - Credits
BENG6830 - Management and Utilization of Biological Solids and Wastewater - 3 - Credits
BENG6840 - Introduction to Biophotonics - 3 - Credits

BENG6910 - Introduction to Biosensors - 3 - Credits
BENG6930 - Special Problems - 1 - 4 Credits
BENG6970 - Thesis Research - 1 - 10 Credits
BENG6990 - Continuing Graduate Advisement for MS Students - 1 - 9 Credits
BENG7310 - The Secret Life of Biofilms: Engineering Principles and Research - 3 - Credits
BENG7330 - Advanced Transport Phenomena - 3 - Credits
BENG7510 - Graduate Seminar - 1 - Credits
BENG7600 - Advanced Research Topics - 3 - Credits
BENG7860 - Research Orientation and Planning - 2 - Credits
BENG7960 - Supervised Teaching - 1 - 3 Credits
BENG7970 - Dissertation Research - 1 - 10 Credits
BENG7990 - Continuing Graduate Advisement for PhD Students - 1 - 9 Credits

Biology Department

Biology

Department Head: Christopher Smith
Location: Biology-Natural Resources 117C
Phone: (435) 797-2485
E-mail: undergrad_info@biology.usu.edu or grad.info@usu.edu
Website: artsci.usu.edu/biology/

Associate Department Head: Zachariah Gompert, Life Sciences Building 343, (435) 797-9463, zach.gompert@usu.edu

Administrative Assistant: Kendall Christensen, Biology-Natural Resources 117D, (435) 797-2485, kendall.christensen@usu.edu

Co-Directors of Graduate Studies:
Noelle Beckman, Life Sciences Building 334, (435) 797-4115, noelle.beckman@usu.edu
Erin Bobeck, Biology-Natural Resources 237, (435) 797-2489, erin.bobeck@usu.edu

Graduate Programs Coordinator: Anthony Sterenchak, Biology-Natural Resources 117E, (435) 797-1770, anthony.sterenchak@usu.edu

Director of Undergraduate Studies: Thayne Sweeten, Biology-Natural Resources 123, (435) 797-0895, thayne.sweeten@usu.edu

Biology Advisor Coordinator: Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu

Advisor for Biology Programs and Health Professions:
Human Biology Emphasis: Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu
Biology; Cellular/Molecular; Ecology and Evolutionary Biology: Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu
Health Professions: Yvonne Kobe, Exploratory Advising Office, Taggart Student Center 302, (435) 797-3373, yvonne.kobe@usu.edu

Advisor for Biological Sciences Composite Teaching Major: Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu

Advisor for Public Health Major: Carl Farley, Biology-Natural Resources 131, (435) 797-2566, carl.farley@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Biology; BS and BA in Composite Teaching—Biological Science; BS in Public Health; MS and PhD in Ecology, PhD in Neuroscience

Undergraduate emphases: *Biology BS, BA*—Biology, Cellular/Molecular, Composite Teaching - Biological Sciences, Ecology and Evolutionary Biology, Human Biology; *Public Health BS*—Industrial Hygiene, Environmental Health, Public Health Education

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at artsci.usu.edu/biology/ by clicking on the assessment tab.

Undergraduate Programs

Objectives

Biology
The Department of Biology offers programs leading to a Bachelor of Science or Bachelor of Arts degree. Majors will complete a core of courses which provide an understanding of biological principles. Upper-division courses provide integration, in-depth study, and an opportunity for specialization within the different degree emphases. Additional coursework in chemistry, physics, statistics, and mathematics provides knowledge and analytical skills in these important related fields. Biology degrees provide a foundation for graduate work or employment in research, industry, or governmental agencies. Biology majors can add a minor area of study, such as business or chemistry, to enhance their employment opportunities.

Composite Teaching - Biological Science
This major combines content training in biology and related fields (including chemistry, physics, geology, mathematics, and statistics) with education courses. Graduates are qualified to apply for a teaching license through the Utah State Office of Education. **Advisor:** Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu

Public Health
The Department of Biology offers preprofessional training in public health. Individuals completing the BS degree have employment opportunities in such areas as environmental health, industrial hygiene, public health education, administration, nursing, nutrition, mental health, and social work. **Advisor:** Carl Farley, Biology-Natural Resources 131.

Academic Advising
The Department Head, the Director of Undergraduate Studies, and advisors in the Department of Biology are available to provide undergraduate majors with additional information regarding specific programs and career opportunities. The Biology Advising Center is located in Biology-Natural Resources 101. Program requirements, advising information, and scheduling information are on the Department of Biology Advising Team web page at www.biology.usu.edu**.**

Students with majors in the Department of Biology should consult with their advisors regularly as they plan their course of study. Students have the responsibility to keep themselves aware of major requirements and course prerequisites. For additional information, obtain an official Major Requirement Sheet from the Biology Advising Center. General requirements, specific course offerings, and the semesters that courses are taught may change.

Mathematics is an important and required skill to enhance one's success in the sciences. Proper course level placement in mathematics at the beginning of the degree program is essential. Students should consult with an advisor and, if necessary, take the ALEKS Math Placement Exam to determine the appropriate level to begin their mathematics studies for meeting requirements and completion of their major. For more information about the ALEKS Math Placement Exam please visit www.usu.edu/mathprep/aleks-ppl.

Assessment

The primary mission of the Department of Biology is to discover and advance knowledge in the biological sciences, and to make that knowledge available to students through a diverse set of educational experiences. To achieve this, three specific areas are being targeted: (1) A core program in the life sciences is aimed at providing the skills and knowledge base needed for a wide variety of employment and educational opportunities in biological and biotechnology fields; (2) a premedical, predental, and pre-

health program has the specific goal of guiding students with respect to opportunities in the health professions; and (3) a public health program provides pre-professional training in such subjects as environmental health, industrial hygiene, and public health education. For full details about Program Learning Objectives, Undergraduate Program Assessment, Data-based Decisions, and more go to www.usu.edu/biology/.

Undergraduate Research in Biology

The Department of Biology offers a broad array of undergraduate research opportunities. Undergraduate research allows students to have a real-life experience in a faculty research lab. Many students publish their research in scientific journals and present their research at national scientific meetings. Students may do undergraduate research work under the supervision of selected faculty members.

To receive academic credit, a student must enroll in BIOL 5800, Undergraduate Research. Students doing Honors in Biology do undergraduate research and write a bachelor's thesis.

For complete information about undergraduate research, contact Isabel Duersch, Biology-Natural Resources 101A, (435) 797-0431, isabel.duersch@usu.edu.

Requirements

University Requirements

Students are responsible for meeting all university requirements for total credits, upper-division credits, credits of *C-* or better, and the University Studies Depth Requirements.

College of Science Requirements

All college requirements are met by completing the departmental degree requirements; no additional coursework is required.

Admission Requirements for the Biology, Biological Science-Composite Teaching, and Public Health Majors

First-year students admitted to USU in good standing qualify for admission to the Biology major. Transfer students from other institutions need a 2.25 transfer GPA, and students transferring from other USU majors need a 2.25 institution GPA for admission to the Biology major in good standing.

First-year students admitted to USU in good standing qualify for admission to the Biological Science-Composite Teaching major. To qualify for admission to the Secondary Teacher Education Program (STEP), students must acquire an institution 3.0 GPA and 30 credits of coursework. Transfer students from other institutions or other USU majors need an overall 3.0 GPA and 30 credits of coursework to be admitted to the major and the STEP. For information on additional admission criteria, students should contact the School of Teacher Education and Leadership (TEAL).

First-year students admitted to USU in good standing qualify for admission to the Public Health major. Transfer students from other institutions need a 2.5 transfer GPA, and students transferring from other USU majors need a 2.5 institution GPA for admission to the Public Health major in good standing.

GPA Requirement

To graduate, a candidate for any bachelor's degree with a Biology or Public Health major offered by the Department of Biology must maintain a grade point average of 2.25 in all Department of Biology (BIOL or PUBH prefix) courses required for the major and a grade of *C-* or better in BIOL 1610, BIOL 1615, BIOL 1620, and BIOL 1625. The *Pass-Fail* option is not acceptable for any course required for the degree, except where a course is only graded pass/fail, but *D* grades are permitted within the restrictions of the 2.25 GPA. The Biological Science-Composite Teaching major requires an overall GPA of 3.0 and a grade of C or better in all BIOL prefix and STEP Program Courses for graduation. The 2.25 GPA requirement and the *C-* or better grade in BIOL 1610, BIOL 1615, BIOL 1620, and BIOL 1625 requirement apply to the Biology, Public Health, and BioMath minors.

Field Trips and Laboratory Fees

Many biology courses require field trips. Those enrolled are expected to dress appropriately for the conditions and observe any safety precautions issued by instructors. Many courses require modest laboratory fees to purchase and maintain equipment and supplies for use in the laboratories and cover salaries for teaching assistants and student laboratory technicians.

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available from the university. Both the College of Science and the Department of Biology offer scholarships. Applications for departmental and college scholarships should be submitted during early spring semester. Contact the College of Science Office (Eccles Science Learning Center 245) and the Biology Advising Center (Biology-Natural Resources 101) for details. You can also go to usu.scholarshipuniverse.com for more information.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Suggested Four-year Plans

Suggested semester-by-semester four-year plans for students working toward a Bachelor of Science or Bachelor of Arts degree are available in the Department of Biology. Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Additional Information

For more information about requirements for the majors and minors within the Biology Department, see the information provided in the general catalog.

Graduate Programs

Admission Requirements

See Graduate Admissions at rgs.usu.edu/graduateschool/apply for general admission requirements. Complete details about graduate programs, admission requirements and application procedures are available online at www.biology.usu.edu/.

To be recommended for matriculated status, an applicant must have earned a bachelor's degree (or equivalent) from an accredited institution, and a Biology faculty member must agree to serve as the major professor for that applicant. The Department of Biology also considers these guidelines for admission: (1) the transcript should show a minimum GPA of 3.0 (*B*); and (2) the GRE (including the Biology Advanced GRE) is not required, but is welcomed as supplementary information. Applicants for whom

English is not the primary language must have scored at least 575 (paper-based exam) or 233 (computer-based exam) on the TOEFL. The applicant's undergraduate program should be similar to that offered by the Department of Biology at Utah State University, which includes the following and their prerequisites: general biology, genetics, ecology, physiology, and evolution; general and organic chemistry; biochemistry; calculus; statistics; and physics. Other preparatory courses may be specified by the student's supervisory committee.

Degree Programs

For those who have demonstrated strong academic capability as well as research interest, the Department of Biology offers the **Master of Science Degree** and the **Doctor of Philosophy Degree** in either Biology or Ecology. An Interdisciplinary Doctor of Philosophy in **Neuroscience** is available through the Interdepartmental Program in Neuroscience and Biology.

Undergraduate majors in Biology at USU with especially strong backgrounds and interest in research may apply for study of the Master of Science degree as **transitional students**. Acceptance as a transitional student allows undergraduates with advanced standing to integrate up to nine credits of graduate work into the final semesters of their Bachelor of Science study. Acceptance into this program, as into all graduate programs in Biology, is closely regulated. Formal application through the School of Graduate Studies is required.

Research

The Department of Biology provides a dynamic and broad base for research and graduate study through a balanced program of basic and applied studies at ecosystem, population, organismal, cellular, and molecular levels. An outstanding variety of field sites; animal, plant, and microbe growth facilities; and modern well-equipped laboratories are available. Also, the Intermountain Herbarium, an excellent Insect Collection, the USDA/ARS U.S. National Pollinating Insects Collection, the Stable Isotope Laboratory, and the Center for Integrated BioSystems exist as research and support facilities.

Faculty members participate in and are supported by several interdepartmental programs, including the Ecology Center and the program in neuroscience. In addition, many less formal contacts and interactions exist with colleagues in the Colleges of Agriculture, Education and Human Services, Natural Resources, and Science.

Students are encouraged to carefully consider how their career goals match the faculty's research interests. Prospective students are strongly encouraged to contact faculty members with whom they are interested in working. Because of the combination of a diverse interdisciplinary base and excellent focused research programs, students have an opportunity to learn the philosophies and methods of many branches of biology. For further details about the faculty's research interests, students are encouraged to visit the Biology website: www.biology.usu.edu/.

Financial Assistance

Research assistantships are available through graduate faculty seeking to recruit students on grant-supported funds. Teaching assistantships are awarded annually through the Biology Graduate Programs Committee. All awards are made on a competitive basis and specific teaching needs are considered in awarding teaching assistantships. Given satisfactory performance, MS students are supported for at least three years and PhD candidates for at least five years on teaching assistantships. The department may also recommend particularly qualified students for College of Science or university fellowships (see rgs.usu.edu/graduateschool/tuition-financial-aid). Departmental research awards and scholarships are available annually (see biology.usu.edu). Admission to the graduate programs of the Department of Biology does not guarantee financial support; however, applicants will not normally be admitted without financial support.

Career Opportunities

Completion of graduate degrees in Biology prepares students for careers in teaching and research in universities and colleges. Many graduates also find employment with private industry and state and national governmental agencies. Specific employment possibilities will depend on the nature of the graduate program pursued. The extensive background provided by a graduate degree also prepares students for eventual administrative responsibilities.

Research Emphases

Research areas of departmental faculty are diverse. See biology.usu.edu/about/faculty/index for current faculty and their research programs.

Research and Teaching Facilities

Herbarium

Graduate study in plant taxonomy offered in the Department of Biology utilizes the extensive facilities of the Intermountain Herbarium. The collection includes over 280,000 research specimens. About 50 percent are from the Intermountain Region, while most of the remainder are from other regions of North America.

Insect Collection

Comprising more than three million specimens, the Insect Collection is available to scientists and graduate students involved in taxonomic research and to those requiring identification of insects in various research projects. The collection primarily covers the Intermountain Region, but it also contains species from nearly all areas of the world. In addition, Biology became home to the American Entomological Institute in 2016. The institute's holdings include one of the world's largest collections of spider wasps and velvet ants, along with specimens of other species from the Intermountain West and Neotropical countries including Brazil, Ecuador, Costa Rica, Argentina, and Chile. The center is also home to an extensive library of historically significant entomological texts and reprints. The Biology-Natural Resources Building also houses the USDA/ARS U.S. National Pollinating Insect Collection.

Biology Research and Teaching Greenhouse Facilities

Built in the mid-1960s, the Biology Greenhouse serves as an important teaching and research resource for the Department of Biology at Utah State University. The plant specimens are used in numerous teaching labs and offer students an opportunity to study a wide array of plant life. The specimens are divided up into four rooms, each of which serves a different purpose.

Miller Science Garden

The Dr. Gene Miller Life Science Garden Laboratory is an experimental garden for students in USU's Department of Biology courses, as well as citizen scientists. Students analyze changes in the garden over time, and citizens discover biodiversity in the garden and beyond.

Laser Scanning Confocal Microscope

The Department of Biology has a BioRad 1024 Laser Scanning Confocal Microscope. This state-of-the-art technology utilizes highly tuned lasers to give detailed sectional views of the interior of intact structures such as cells and tissues and greatly extends the advantages of fluorescence microscopy. This microscope is utilized by researchers campus-wide and is an indispensable tool for molecular and cellular studies.

Microscopy Core Facility
This research service unit is managed by the Office of Research. The facility maintains a scanning electron microscope equipped with EDS/EBSD system, a dualbeam (FIB/SEM) microscope equipped with Omniprobe/EBSD system, a laser dissection microscope, and several microscopy sample preparation tools. The facility provides microscopy service, project consultation, and user training.

Center for Integrated BioSystems (CIB)
The CIB operates three service laboratories and a variety of research projects. The service laboratories provide essential biological resources for biotechnology research and development including DNA sequencing, peptide synthesis, protein sequencing, antibodies, and fermentation.

Center for Civic Excellence Department

Center for Civic Excellence

Leadership: Matthew Sanders, Interim Associate Vice Provost
Location: Old Main 211
Phone: (435) 797-8409
Website: https://www.usu.edu/provost/about/civic-excellence

Credentials Offered

General Education - Certificate

Program Requirements

All USU students seeking an Associate's or Bachelor's degree must complete all 27 credits in Utah System of Higher Education general education requirements. These include core requirements in communication literacy, quantitative literacy, and American institutions. These also include the courses in the breadth areas: life science, physical science, social science, creative arts, and humanities.

USU Credit and Transfer Credit

Course requirements in the Center for Civic Excellence are fulfilled by any course with the appropriate general education designation, regardless of the institution where it was completed.

Assessment

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for general education will be provided shortly.

Courses

CIVC1000 - Math for Real World Problems (QL) - 3 - Credits
CIVC1010 - Data and the Stories They Tell (QL) - 3 - Credits
CIVC1020 - Financial Foundations for Life and Society (QL) - 3 - Credits
CIVC1100 - Flourishing and the Good Life (CL1) - 3 - Credits
CIVC1110 - Navigating Human Difference (CL1) - 3 - Credits
CIVC1200 - "The Blessings of Liberty": American Government (BAI) - 3 - Credits
CIVC1210 - "A More Perfect Union": American History (BAI) - 3 - Credits
CIVC1220 - "Promote the General Welfare": The American Economy (BAI) - 3 - Credits
CIVC1400 - Planetary Change and Human Futures (BPS) - 3 - Credits
CIVC1410 - Earth's Critical Resources (BPS) - 3 - Credits
CIVC1500 - The Science of You: Health and the Human Body (BLS) - 3 - Credits
CIVC1510 - Our Place in the Natural World (BLS) - 3 - Credits
CIVC1520 - Farm to Future: Sustainable Food Systems (BLS) - 3 - Credits
CIVC1600 - Thinking Through the Arts (BCA) - 3 - Credits
CIVC1610 - Design Thinking (BCA) - 3 - Credits
CIVC1620 - Music and the Creative Life (BCA) - 3 - Credits
CIVC1622 - Visual Arts and the Creative Life (BCA) - 3 - Credits
CIVC1624 - Writing and the Creative Life (BCA) - 3 - Credits
CIVC1800 - Disagree Better (BSS) - 3 - Credits
CIVC1810 - Lead From Where You Are (BSS) - 3 - Credits
CIVC1820 - The Social Science of Happiness (BSS) - 3 - Credits
CIVC1830 - Pathways to Intercultural Understanding (BSS) - 3 - Credits
CIVC2100 - Freedom, Equality, and Justice (CL2) - 3 - Credits

Chemistry & Biochemistry Department

Chemistry and Biochemistry

Department Head: Lance C. Seefeldt
Location: Maeser Laboratory 140
Phone: (435) 797-1619 | **FAX:** (435) 797-3390
E-mail (undergraduate): chem.undergrad@usu.edu
E-mail (graduate): chem.grad@usu.edu
Website: http://www.chem.usu.edu

Undergraduate Advisor: Jordan Truex, Maeser Lab 151, (435) 797-0432, jordan.truex@usu.edu

Graduate Program Coordinator: Cindy Weatbrook, Maeser Lab 140, (435) 797-1618, cindy.weatbrook@usu.edu

Undergraduate Research Coordinator: Joan Hevel, Widtsoe 235, (435) 797-1622, joanie.hevel@usu.edu

Degrees Offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Doctor of Philosophy (PhD) in Chemistry; BS, MS, and PhD in Biochemistry; BS in Chemistry Teaching; BS in Physical Science Composite Teaching (Chemistry)

Undergraduate Emphases: *BS in Chemistry*—Professional Chemistry, Biochemistry, Environmental Chemistry, Chemical Education, Life Science

Graduate Specializations: Biochemistry, *Chemistry*—Analytical Chemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found by clicking on Assessment at www.chem.usu.edu/.

Undergraduate Programs

Objectives

Chemistry is a subject that addresses the properties of materials and the transformations that they undergo. Especially important are aspects of energy and structure related to chemical reactivity. Consequently, students of many disciplines take courses in chemistry to learn about the behavior of the substances they will use or reference. The Department of Chemistry and Biochemistry offers a wide variety of courses for those whose majors and/or anticipated careers require a knowledge of chemistry. These areas of study include nutrition, engineering, biology, agriculture, natural resources, medicine, law, and education, to name a few. Many students also choose chemistry as an elective course to better prepare themselves as citizens in a technological world.

The **Bachelor of Science Degree in Chemistry** entails considerable specialization in chemistry and related areas. The BS emphases require a common core of courses but allow for a different concentration of advanced work according to the interests and career objectives of the student. The **BS with Professional Chemistry Emphasis**, **BS with Environmental Chemistry Emphasis**, and **BS with Biochemistry Emphasis** degrees meet the requirements for certification by the American Chemical Society (ACS). The certified degree emphases provide excellent preparation for immediate entry into the job market or for graduate school in chemistry, biochemistry, chemical engineering, molecular biology, nutrition, food science, materials science, and a wide variety of other fields. The **BS with Life Science Emphasis** degree is popular for students wishing to go on to medical or dental graduate programs. The life science emphasis is particularly appropriate for **premedical** and **predental** students who want a strong base for understanding the nature of chemical reactions in the body and the behavior of the drugs they will prescribe, or who want an attractive alternative should they decide ultimately not to pursue medical or dental school. The **Chemistry Teaching Major** or the **Physical Science Composite Teaching Major** are available to those who want a career in secondary education. The BA degree is an excellent choice for students with an interest in studying **law** or **business** and who have an interest in science.

The core of the program utilizes year-long sequences of classes. The first-year sequence introduces the basic principles of chemistry, as well as most of the major concepts of the science. The second year explores in greater depth the characteristics of carbon-based compounds that serve as the backbone for the chemistry of life; for most drugs and medicines; for petroleum; for most fibers, paints, and plastics; and for many other commercial products. The third year examines in greater depth the models, theories, and mathematical interpretation of the structures, rates of change, energetics, and other properties of chemicals. In addition, one-semester courses examining the chemistry of life processes, the behavior of inorganic substances, and the analysis of the composition of substances are required. Many of the sequences have associated laboratory courses where students get hands-on practice. Here they synthesize compounds, measure physical properties, analyze samples, and determine structural features of compounds, using modern techniques and instrumentation.

The **Bachelor of Science Degree in Biochemistry** encompasses the study of the properties and functions of biological macromolecules, the mechanisms of action of enzymes, gene and protein regulation and expression, bioenergetics, and the metabolic pathways and processes that use and generate chemical and light energy. At its core, biochemistry recognizes and explains the unifying chemical principles that lie at the heart of the diverse expressions of life.

The core courses for the major are built around two-semester course sequences in the areas of general, organic, and biological chemistry; general biology; calculus; and general physics, along with associated laboratory courses. Students may choose from two physics tracks: (1) the life sciences track (typically preferred by students with a more biological inclination) and (2) the science-engineering track (typically preferred by students with a more mathematical/physical inclination). One-semester courses in analytical and biophysical chemistry and statistics round out the core of the program. To complete the additional 18 credits of coursework required for the major, students may choose elective courses from within the disciplines of chemistry, biochemistry, and biology. A wide range of advanced courses are available to meet the advanced electives requirement; students are encouraged to meet with their academic advisor to select courses that provide the best preparation for their intended career path. Representative courses (not all encompassing) include those in biology (e.g., human physiology, genetics, ecology, microbiology, plant physiology, cell biology); biochemistry (e.g., enzymology, structured biology, bioenergetics and metabolism, protein structure/function); and chemistry (e.g., intermediate and advanced inorganic, advanced organic).

The biochemistry major differs from the "chemistry major with biochemistry emphasis," which is an American Chemical Society (ACS) certified degree that emphasizes specialization in biochemistry but has a more chemical and mathematical emphasis than the biochemistry major. The biochemistry major is more biologically inclined (as well as somewhat less physically and mathematically inclined) than the chemistry major and is designed to meet the standards for the curriculum proposed by the American Society for Biochemistry and Molecular Biology (ASBMB). The requirements of the BS and BA degrees in chemistry and the BS degree in biochemistry, along with University and University Studies requirements, are summarized here. The specific requirements for the teaching major and for the composite teaching major in physical science are also included.

Students are urged to study these requirements and to visit with their advisor on a regular basis about progress toward the completion of their degrees or for any questions regarding complementary courses and career goals.

Assessment

The Department of Chemistry and Biochemistry has implemented a multilayered assessment strategy that defines learning objectives at the following levels: individual courses, divisional levels, and at the overall program level for the chemistry major.

General Requirements

Admission Requirements

First-year students admitted to USU in good standing qualify for admission to this major. Transfer students from other institutions need a 2.2 transfer GPA, and students transferring from other USU programs need a 2.0 total GPA for admission to the chemistry or biochemistry major in good standing.

Students interested in studying chemistry or biochemistry should take high school mathematics courses that will enable them to start calculus during their first semester at USU. High school coursework in chemistry, biology, and physics is also desirable. AP credit in chemistry may be counted toward the chemistry or biochemistry degree. For details, contact the departmental advising faculty.

No CHEM prefix course may be applied toward graduation with any major or minor in chemistry or biochemistry with an earned grade of less than *C-*. No CHEM prefix course may be taken on a *Pass/Fail* basis. No CHEM prefix course may be repeated more than one time to improve the grade to a *C-* or better. A student dropped from the chemistry or biochemistry program for failure to meet this standard may appeal to the departmental Curriculum Committee for readmission.

Undergraduate Research Opportunities

The Chemistry and Biochemistry Department encourages students in all departmental majors to engage in undergraduate research. For information about how they can become involved in undergraduate research, students should contact Joan Hevel, the departmental undergraduate research coordinator, (435) 797-1622, joanie.hevel@usu.edu.

Career Opportunities

Chemistry degree holders work in a wide variety of professions, from physicians, lawyers, and professors to research/development, sales, or production in the chemical, oil, pharmaceutical, metals, electronic, and biochemical industries. Government at all levels employs chemists, including the federal Departments of Defense, Health and Human Services, Agriculture, and Interior. A graduate with a bachelor's degree often begins work in chemical analysis or sales or may assist senior chemists in research and development. A graduate with a teaching major or chemistry education emphasis may teach in public schools. A graduate degree is usually needed to direct research or teach at the university level. Degree holders from the Department of Chemistry and Biochemistry have had excellent success in obtaining support for graduate studies, often at very prestigious institutions, and in obtaining employment directly following graduation.

The major in Biochemistry is appropriate both for students who wish to terminate their studies at the bachelor's degree and for those planning to continue their education at the graduate or professional level. For those who terminate at the bachelor's degree, career opportunities are available in research and development, sales, quality control, and analysis within a range of biochemical, pharmaceutical, and biotechnological industries. For those planning to pursue a career in the health professions, the biochemistry major provides an excellent and well-rounded background for medical, dental, and veterinary school admission. The biochemistry major also provides excellent preparation for students planning to pursue graduate work in a range of biological, environmental, and chemical sciences, including biochemistry, molecular biology, genetics, genomics, oncology, and bioinformatics. For those students interested in pursuing a legal career in areas such as patent law, bioethics, and environmental protection and regulation, the major is also excellent preparation for law school.

For further information about career opportunities for chemistry majors and biochemistry majors, students should contact their faculty mentor.

Biochemistry:
Doug Harris, Widtsoe 335, (435) 797-1609, doug.harris@usu.edu
Joan M. Hevel, Widtsoe 235, (435) 797-1622, joanie.hevel@usu.edu

Chemistry:
Robert S. Brown, Widtsoe 026, (435) 797-0545, bob.brown@usu.edu
Steve Scheiner, Maeser Lab 273, (435) 797-7419, steve.scheiner@usu.edu

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For more information about requirements for the majors and minors within the Chemistry and Biochemistry Department, see the major requirement sheets, available from the department.

Graduate Programs
Admissions Requirements

All applicants should have a bachelor's degree or master's degree in chemistry or biochemistry from an accredited institution. Appropriate undergraduate preparation is expected; applicants not fully prepared may be admitted with the condition that appropriate undergraduate courses are taken as necessary. Detailed information about the graduate programs and faculty research activities can be found at: http://www.chem.usu.edu.

Financial Assistance

The department offers financial support to students in the form of teaching assistantships, research assistantships, and fellowships. All applications for admission to the School of Graduate Studies constitute an application for financial assistance; it is not necessary to file a separate request. Teaching assistantships are the principal means of support for first-year students. Research assistantships, funded from individual faculty research grants, support students conducting research related to the grant projects. Although first-year students are not normally supported as research assistants, well-prepared students may be eligible for research support at the discretion of their major professor.

Fellowships are awarded by the university to outstanding students solely on the basis of merit. The department encourages students with strong academic records to apply for the university fellowships and national awards, and will provide assistance in obtaining and submitting the appropriate forms. Additionally, several graduate awards are given each year to honor exemplary performance in research and teaching.

College of Arts and Sciences Faculty

Programs

Biochemistry - BS
Biochemistry - MS
Biochemistry - PhD
Chemistry - Minor
Chemistry - BA
Chemistry: Biochemistry Emphasis - BS
Chemistry - BS

Transportation Systems Engineering: Patrick Singleton, Engineering 231, (435) 797-7109, patrick.singleton@usu.edu

Water Engineering: Brian Crookston, Engineering 222, (435) 797-0247, brian.crookston@usu.edu and Belize Lane, UWRL207, (435)797-4145, belize.lane@usu.edu

Degrees offered: Bachelor of Science (BS) in Civil Engineering; Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) in Civil and Environmental Engineering.

Graduate Emphases: Dams and Levees, Earthquake Engineering, Environmental Management, Geotechnical, Hydraulics, Hydrology and Water Resources, Intelligent Water Systems, Irrigation, River Mechanics and Modeling, Structural, and Transportation.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://engineering.usu.edu/cee/assessment/undergraduate/abet-civil for undergraduate civil programs, https://engineering.usu.edu/cee/assessment/undergraduate/abet-environmental for undergraduate environmental programs, and https://engineering.usu.edu/cee/assessment/graduate/index for graduate programs.

Undergraduate Programs

Admission Requirements
Admission requirements for the Department of Civil and Environmental Engineering are the same as those described for the university and the College of Engineering in this catalog. Students in good standing may apply for admission to the department. In addition, students must maintain the academic requirements outlined for the College of Engineering.

Civil Engineering
Civil Engineering is the oldest branch of the engineering field, offering graduates numerous opportunities to attain important positions which have great influence on many of humankind's endeavors. Civil and Environmental Engineering is concerned with planning, designing, constructing, and operating various physical works; developing and utilizing natural resources in an environmentally sound manner; providing the infrastructure which supports the highest quality of life in the history of the world; and protecting public health and renovating impacted terrestrial and aquatic systems from the mismanagement of toxic and hazardous wastes. This includes designing and supervising the construction of bridges, buildings, dams, aqueducts, sport complexes, energy complexes, and other structures; irrigation and transportation systems (highways, canals, rapid transit lines, etc.); developing water resources for municipal, industrial, and recreational use; land reclamation, soil mechanics, and urban planning; and the control of water quality through water purification and proper waste treatment, as well as solving problems of air pollution and solid and hazardous waste management. Projects of this magnitude require engineers who can understand the relationships of environment, resources, and production, and who are able to design and implement programs and procedures which bring these projects into being.

The Civil Engineering BS Program is accredited by the Engineering Accreditation Commission of ABET, abet.org, under the commission's General Criteria and the Program Criteria for Civil Engineering and Similarly Named Programs.

Students in this program take such courses as engineering drafting, surveying, mechanics, dynamics, mechanics of fluids and solids, hydraulics, hydrology, soils, structural design, technical communication and professional aspects of engineering. Students entering the professional program are required to have a basic knowledge of computer skills in the areas of operating systems, spreadsheets, word processing, and a programming language. Course requirements also include basic understanding of engineering principles, analytical geometry and calculus, linear algebra, principles of chemistry and physics, and physical geology. Students are also provided with a variety of technical electives which can develop areas of specialty and competence. **Passing the Fundamentals of Engineering (FE) examination**, the first step in becoming a licensed professional engineer, is required for graduation. Students should plan to take the exam after their junior year. **Students in this program are recommended to purchase and use a graphing scientific calculator (must be able to do integration, vector mathematics, and have a numerical solver).**

The Civil Engineering Program uses 7 student outcomes to support the program educational objectives (PEOs) and prepare graduates to enter the professional practice of engineering. By the time of graduation, students will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Program Educational Objectives for the Bachelor of Science degree in Civil Engineering are that within five years:

1. Graduates will be successfully employed in civil engineering or related careers and will become independent thinkers and effective communicators, team members, and decision makers.
2. Graduates will incorporate economic, environmental, social, ethical, and sustainability considerations into the practice of civil engineering and will promote public health and safety.
3. Graduates will engage in life-long learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, or participation in professional societies.
4. Graduates will pursue professional licensure or other appropriate certifications.

Annual student enrollment and graduation data for the program are available from the USU Office of Analysis, Assessment, and Accreditation: usu.edu/aaa/

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see Civil Engineering - BS in the online catalog.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog website at honors.usu.edu for more information.

Concurrent BS/Master's Program

The concurrent BS/Master's program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for *both* the BS degree *and* the master's degree concurrently during two years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student's senior design project could be a start for a graduate design project or thesis. After completing their BS degree, students in the program can earn a master's degree in only one additional year. Both the BS and the master's degree can generally be earned with 155-159 total credits, although students should note that a Plan C MS requires 6 extra credits. Finally, students with a master's degree can expect a much higher starting salary following graduation. (For more information, see College of Engineering.)

Graduate Programs

The graduate studies in the Department of Civil and Environmental Engineering are administered through five graduate programs, as described below.

Admission Requirements

See general admission requirements. Admission committees consider GRE scores and experience, undergraduate record and curriculum, and formal recommendations. A student without an undergraduate civil or environmental engineering degree may be required to complete selected undergraduate courses prior to admission as a fully matriculated graduate student.

Environmental Engineering

The Environmental Engineering (EnvE) Program is a multidisciplinary graduate program in the College of Engineering that provides coursework and research experience for engineers and scientists interested in environmental management, one water engineering, and environmental engineering science. The EnvE Program provides an interdisciplinary educational approach to fundamental principles that can be applied to environmental phenomena. Research projects are an integral part of the program and provide the student with appropriate research experiences leading to a thesis or dissertation.

The faculty in the EnvE Program are involved in leading-edge research which reflect the program's broad areas of emphases of:

- Pollution prevention and waste minimization, hazardous material management, natural resources stewardship, environmental quality monitoring and modeling.
- Potable water and wastewater treatment, storm water treatment and management.
- Fate, control and management of organic and inorganic pollutants across all media (air/water/soil/biota).

Geotechnical Engineering

Geotechnical engineers use engineering principles to analyze and design systems that incorporate soil or rock. Such systems include: building and bridge foundations, earth embankments, dams and levees, retaining walls, drainage systems, earthquake motion, and buried structures and pipelines. An important part of all geotechnical engineering projects is characterizing the geology and subsurface conditions in order to define the engineering properties used in analysis and design. Site investigation often consist of exploratory borings and probes, geophysical measurements, and laboratory testing.

Undergraduate and graduate courses offered by the department provide students with a solid background in soil mechanics which is the basis of geotechnical analysis and design. The geotechnical curriculum provides a solid theoretical background balanced with practical applications for analysis and design. This balance prepares students completing a master's degree in geotechnical engineering for entry-level jobs, as well as preparing them to understand future developments in Geotechnical practice.

The geotechnical division has a strong research program. Research areas in the division include: internal erosion in dams and levees, risk assessment of dams and levees, stability of embankments and natural slopes, mechanically stabilized earth embankment reinforcement systems, engineering geophysics for predicting earthquake site response, and laboratory evaluation of dynamic soil properties.

Structural Engineering

The structural engineer is involved in the design, analysis, construction, repair, and retrofit of all types of structures. The two most common structural types are buildings and bridges. Other structural types include towers, dams, tanks, tunnels, industrial facilities, and retaining structures. Because each of the millions of structures in the world is unique, structural engineers face demanding challenges throughout their careers. The safety of the structures we occupy and utilize every day is the responsibility of structural engineers. Structural engineers evaluate the loads placed on a structure, determine their effects, and select the appropriate materials and structural elements, or repair strategy, to withstand these loads. Today's structural engineer is using new materials in the design of new structures or the retrofit of older structures.

Mathematics, physics, and material science constitute a foundation for structural engineering. Structural analysis and design add to this foundation and become the focus of the structural engineering program. Graduate students in the structures program engage in structural mechanics, numerical methods, structural dynamics, geotechnical engineering, and the study of structural materials. Examples of current research in the structures area focus on the dynamic characteristics of structures, their potential

response to earthquakes, new seismic retrofit measures, the use of advanced composite materials for older structures, durability aspects of structural types and materials, and other areas. Materials research focuses on cementitious materials and constitutive modeling. Current structural research also looks at sustainability issues regarding construction and materials in order to lead growth into the future.

Transportation Engineering

The graduate program in Transportation Engineering offers education and research opportunities in transportation systems planning, design, and management. It is designed to enable aspiring planners, engineers, and managers to obtain advanced degrees while specializing in infrastructure management, traffic network analysis, facility design, traffic operations, transportation economics and finance, planning and forecasting, and project appraisal. Up-to-date computer and laboratory facilities, as well as the Transportation Division's close links with local and state transportation agencies, enable students to gain hands-on experience and practical perspectives.

Past and present research undertaken by the Transportation Division faculty and researchers ranges from transportation network modeling, emerging mobility services, microscopic traffic flow simulation, and network reliability to traffic safety modeling, video image processing, and intelligent transportation systems. The focus remains on efficient, effective, and sustainable solutions to transportation problems.

Transportation Division course offerings expose students to the theoretical and practical aspects of goods and passenger transportation. State-of-the-art analytical tools and new research findings are introduced into the courses through periodic revision of notes, examples, problem sets, and computer software. Students are encouraged to design their own programs of study according to their personal and professional goals. Due to the multi-disciplinary nature of transportation, students are encouraged to include in their program of study course offerings from other programs in CEE, as well as from Mathematics and Statistics, Environment and Society, Landscape Architecture and Environmental Planning, Applied Economics, Economics and Finance, Management, Marketing and Strategy, Psychology, and Sociology.

Water Engineering

The Water Engineering Program is a multidisciplinary graduate program in the College of Engineering and is intended to enable engineers and scientists interested in water to obtain graduate degrees in the areas of hydraulics, hydrology and water resources, intelligent water systems, irrigation, river mechanics, modeling, and dams and levees.

Hydrology is a branch of geoscience concerned with the origin, distribution, movement, and properties of waters of the earth. This includes fluid flow and transport of contaminants in the subsurface environment. The Water Engineering Program at USU has strengths in field based, theoretical, and applied aspects of hydrology. Past and present research focuses on a broad spectrum of hydrologic problems. These range from quantifying snow distribution and melt, rainfall and infiltration processes, floods, droughts, terminal lake responses, soil erosion, and groundwater/surface water exchanges. Additionally, modeling tools have been developed and/or applied to investigate stream water quality, groundwater contamination characterization and remediation, and complete watershed responses.

Irrigation has included specific research projects in the irrigation and drainage engineering option such as hydraulics of surface irrigation, consumptive use, return flow quantity and quality of irrigation waters, transient flow in tile drainage systems, drain envelopes, sprinkler irrigation, trickle irrigation, crop production and water requirements, salt movement, regional groundwater modeling for optimizing sustainable yield, conveyance system modeling and control, agriculture water optimization, and remote sensing.

Water Resources Engineering draw principles from hydrology, fluid mechanics, hydraulics, environmental engineering, economics, ecology, political science, and other disciplines in the design and operation of projects and nonstructural methods for water resources planning and management. They need a sound understanding of how water storage, delivery, and other management systems function; of criteria used in evaluating and selecting among alternatives; of the techniques of operations research that can be used in systems design; and of the institutional aspects of decision-making in the public sector. Research in this area focuses on simulation and optimization modeling and hydroinformatics to improve the planning, design, and operation of water systems over different spatial scales (e.g., individual users or transboundary river basins).

Fluid Mechanics and Hydraulic Engineering covers both fundamental principles and theory and their applications in a variety of engineering fields to solve societies' water challenges. This can include theoretical fluid mechanics, hydraulic design, open channel hydraulics, fluvial hydraulics, sedimentation, transients, municipal water systems, numerical methods, and various numerical and physical modeling techniques. Current research in this area includes fundamental and applied research in hydraulic structures including flooding, sedimentation and scour, two-phase flows, failure modes, incidents, public safety, and hydraulic design; advanced instrumentation and experimental techniques; flow meters; gates and valves; energy dissipators; and hydromachinery including pumps and turbines.

Hydroinformatics is the study, design, development, and deployment of hardware and software systems for hydrologic data collection, distribution, interpretation, and analysis to aid in the understanding and management of water in the natural and built environment. Fundamental and advanced hydroinformatics concepts and procedures and current research in this area include automated data collection networks; relational databases, data models, and data management software; data storage formats, metadata, and standards; data transformations and automation of data manipulation tasks to support modeling and analysis; web based data distribution and access using web services; integrated networks of hydro-climate data; and data science techniques for hydrology and water resources engineering.

Interdisciplinary Water Programs - The water engineering and science field encompasses a broad range of interdisciplinary topics related to:

- Fluvial systems, including ecohydraulics, river mechanics, river engineering, surface water quality, physical hydrology, and restoration of aquatic ecosystems (see River Mechanics and Modeling).
- Dams and Levees, including fundamental and applied research topics involving hydrology, hydraulic, structural, and geotechnical engineering and risk assessments to support the planning, assessment, design, removal, and construction services of these structures (see Dams and Levees).

Financial Assistance

Several forms of financial assistance are available to graduate students and are awarded on a competitive basis. Students requesting financial support should apply to the department by January 15 for the coming academic year. Teaching assistantships are available through the department and research assistantships are available through the Utah Water Research Laboratory and departmental faculty members who have ongoing projects or who hold special research grants from the university, private companies, or state and federal agencies.

Acceptance to pursue graduate studies in the Civil and Environmental Engineering Department does not guarantee the student financial assistance. Inasmuch as funds are limited, the assistantships are awarded by the department to cover specific teaching assignments and by the faculty members to provide for research.

FACULTY - College of Engineering

Programs

Civil and Environmental Engineering - ME
Civil and Environmental Engineering - MS
Civil and Environmental Engineering - PhD
Civil Engineering - BS
Irrigation Engineering - MS
Irrigation Engineering - PhD
Precision Agriculture Technology - Post-Bachelor's Certificate

Courses

CEE1400 - Introduction to Computer Programming for Civil and Environmental Engineers - 2 - Credits
CEE1880 - Civil and Environmental Engineering Orientation and Computer Applications - 1 - Credits
CEE2240 - Engineering Surveying - 3 - Credits
CEE2270 - Computer Engineering Drafting - 2 - Credits
CEE2450 - Computer Programming and Numerical Methods for Civil and Environmental Engineers - 3 - Credits
CEE2620 - Environmental Engineering Microbiology - 3 - Credits
CEE2890 - Environmental Engineering Sophomore Seminar - 1 - Credits
CEE3020 - Structural Analysis - 3 - Credits
CEE3080 - Design of Reinforced Concrete Structures - 3 - Credits
CEE3160 - Civil Engineering Materials - 2 - Credits
CEE3165 - Civil Engineering Materials Laboratory - 1 - Credits
CEE3210 - Introduction to Transportation Engineering - 3 - Credits
CEE3300 - Engineering Soil Mechanics - - 3 Credits
CEE3330 - Ancient and Modern Civil Engineering in Italy and France - 3 - Credits
CEE3430 - Engineering Hydrology - 3 - Credits
CEE3500 - Civil and Environmental Engineering Fluid Mechanics - 3 - Credits
CEE3510 - Civil and Environmental Engineering Hydraulics - 3 - Credits
CEE3610 - Environmental Management - 3 - Credits
CEE3640 - Drinking Water Engineering - 3 - Credits
CEE3650 - Wastewater Engineering - 3 - Credits
CEE3670 - Transport Phenomena in Bio-Environmental Systems - 3 - Credits
CEE3780 - Solid and Hazardous Waste Management - 3 - Credits
CEE3880 - Civil and Environmental Design I - 2 - Credits
CEE3890 - Environmental Engineering Design I - 1 - Credits
CEE4000 - Municipal Engineering - 3 - Credits
CEE4200 - Engineering Economics - 3 - Credits
CEE4870 - Civil and Environmental Design II (CI) - 2 - Credits
CEE4880 - Civil and Environmental Design III (CI) - 2 - Credits
CEE5000 - Irrigation and Drainage of Agricultural Lands - 3 - Credits
CEE5001 - Design and Evaluation of Pressurized Irrigation Systems - 3 - Credits
CEE5003 - Remote Sensing of Land Surfaces - 3 - Credits
CEE5005 - Design and Evaluation of Gravity Irrigation Systems - 3 - Credits
CEE5006 - Agricultural Water Management - 3 - Credits
CEE5007 - Field Evaluation of Agricultural Irrigation Systems - 2 - Credits
CEE5008 - Management of Irrigation Systems - 3 - Credits
CEE5009 - Groundwater Systems Engineering I - 3 - Credits
CEE5010 - Matrix Analysis/Finite Element - 3 - Credits
CEE5015 - Structural Design Loads - 3 - Credits
CEE5020 - Finite Element Methods in Solid Mechanics I - 3 - Credits
CEE5050 - Design of Wood and Masonry Structures - 3 - Credits
CEE5060 - Mechanics of Composite Materials - 3 - Credits
CEE5070 - Structural Steel Design - 3 - Credits
CEE5080 - Numerical Methods in Elasticity - 3 - Credits
CEE5100 - Infrastructure Evaluation and Renewal - 3 - Credits
CEE5190 - Geographic Information Systems for Civil Engineers - 3 - Credits
CEE5205 - Transportation Data Analysis and Research Methods - 3 - Credits
CEE5220 - Traffic Operations and Management - 3 - Credits
CEE5230 - Geometric Design of Highways - 3 - Credits

Engineering Education

Department Head: Ning Fang
Location: ENGR 224
Phone: (435) 797-2948 | **E-mail**: ning.fang@usu.edu
Website: eed.usu.edu

Research

The Department of Engineering Education (EED) has six areas of research that define the research direction for the department, including engineering learning and problem-solving, technology-enhanced learning, online engineering education, K-12 STEM education, engineering workplace and training, and broadening participation in engineering.

Degrees offered: Doctor of Philosophy (Ph.D.) in Engineering Education; Master of Science (M.S.) in Engineering Education.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://engineering.usu.edu/eed/assessment/phd/ and https://engineering.usu.edu/eed/assessment/ms/.

Graduate Programs

Engineering Education (EED)
The Engineering Education (EED) graduate programs prepare students to be engineering instructors, engineering education researchers, and specialists with solid knowledge and skills in:

- Designing and assessing engineering curriculum and engineering knowledge (Ph.D. and M.S.).
- Implementing evidence-based instructional approaches in student-centered engineering learning environments (Ph.D. and M.S.).
- Identifying and synthesizing relevant theories to frame the research problem (Ph.D. and M.S.).
- Applying appropriate and creative research methods to studies in engineering education (Ph.D. and M.S.).
- Understanding engineering education foundations and the role of cognition in engineering education (Ph.D.).
- Developing competitive grant proposals for improving engineering education (Ph.D.).

Potential job markets after graduation include:

- University or college faculty member.
- University or college administrator.
- Education or training specialist in government and non-profit organizations.
- Education data specialist in government and non-profit organizations.
- Educational hardware/software developer and specialist in the education industry (companies).

Master's students can also pursue Ph.D. study in engineering education or engineering.

Admission Requirements
Applicants must meet the university's general admission requirements at gradschool.usu.edu/apply/ they must have a:

- Bachelor's degree in engineering, engineering technology, or computer science discipline.
- Minimum GPA (or equivalent) of 3.0 (out of 4.0) during the most recent 60 semesters (or 90 quarter credits) of college instruction.
- International applicants must submit proof of English language proficiency through one of the options specified by the School of Graduate Studies at gradschool.usu.edu/apply/. The requirement for submission of TOEFL or IELTS scores is waived if 1) the applicant's native language is English, or 2) the applicant's undergraduate courses were taught in English.
- The requirement for submission of GRE scores is waived for all Ph.D. and M.S. applications.

To apply for a Ph.D. study, applicants are expected to have earned a master's degree which can be in any discipline. Prior teaching experience and publications are preferred but not required.

Applicants must complete the online application gradschool.usu.edu/apply/ which includes:

1. Online application form.
2. Official transcript of bachelor's courses.
3. Official transcript of master's courses (if applicable).
4. Names and email addresses of three professional references who the USU Graduate School will contact after the online application form is submitted.
5. Resume or curriculum vitae (i.e., detailed form of resume) highlighting your relevant qualifications and achievements, and typed, single-space written response to each of the following prompts (1-2 pages for each prompt).
6. Background: How does your background (work, study, and life experiences) prepare and inspire you to pursue a graduate degree? Why are you passionate about engineering education?
7. Career Goals: What are your career goals? How will a graduate degree further those goals? What do you know about engineering education practices and/or engineering education research?
8. Why USU: Why is USU the place for you to pursue your EED graduate program? How are your interests aligned with the research conducted within EED? Which professors would you like to work with and why?

Admission Deadlines
The Department of Engineering Education admits and funds selected students on a rolling basis. Applicants can submit their applications anytime. They are encouraged to submit thei typically 3-4 months before the spring or fall semester. International students are encouraged to apply much earlier to allow sufficient time for visa applications.

Financial Assistance
The Department of Engineering Education offers a limited number of graduate research assistantships to qualified students. These assistantships are provided by the department and by individual members' research projects. Tuition waivers and 80% health insurance coverage are also available for graduate students. For further information, contact the Department of Engineering Education.

Additional Information
Additional information about the Department of Engineering Education and graduate programs can be found on the department website at eed.usu.edu. For inquires, call (435) 797-7467 or email at eedinfo@usu.edu. Student applicants are also welcome to contact individual faculty members.

FACULTY - College of Engineering

Programs

General Studies - Technology - BA, BS

Courses

ENGR1000 - Introduction to Engineering Design - 2 - Credits
ENGR1005 - Introduction to Engineering Laboratory - 1 - Credits
ENGR1010 - Engineering Exploration - 3 - Credits
ENGR1400 - Computer Programming for Engineers - 4 - Credits
ENGR1500 - Research Experience for Undergraduate Students - 1 - Credits
ENGR1510 - Engineering Success Strategies and Insights - 1 - Credits
ENGR1940 - Women in Engineering Seminar - 1 - Credits
ENGR2010 - Engineering Mechanics Statics - 3 - Credits
ENGR2030 - Engineering Mechanics Dynamics - 3 - Credits
ENGR2140 - Mechanics of Materials - 3 - Credits
ENGR2210 - Fundamental Electronics for Engineers - 3 - Credits
ENGR2450 - Numerical Methods for Engineers - 3 - Credits
ENGR2455 - Numerical Methods for Engineers Laboratory - 1 - Credits
ENGR2930 - Special Problems - 1 - 18 Credits
ENGR2977 - Internship Education Experiences - 1 - 3 Credits
ENGR2999 - Workshop - 1 - 3 Credits
ENGR3020 - Intersecting Systems: How Failures Shape Tech Disasters - 3 - Credits
ENGR3080 - Creativity and Communication in Design (CI) - 3 - Credits
ENGR5600 - Entrepreneurial Mindset for Engineers: An Introduction - 3 - Credits
ENGR5930 - Special Problems - 1 - 3 Credits
ENGR5970 - Introduction to Engineering Research - 3 - Credits

Communication & Media Department

Department of Communication and Media

Undergraduate Programs

Communication Studies

These programs focus on how people communicate to create meanings across a wide range of contexts, including interactions that occur in personal relationships and public interactions, with those from other cultures, and with those in business and other applied settings. Students learn to think critically about the messages they receive and to develop skills promoting the understanding and practice of effective and ethical communication behaviors.

Global Communication

The Global Communication major focuses students on building skills, attitudes, and knowledge as critical global citizens, competent intercultural communicators, and globally minded individuals. The Global Communication degree at USU is unique. This program is the only four-year degree dedicated to a robust understanding of global communication in Utah, and it is one of only a handful of programs nationwide. The program specializes in giving the students tools to understand cultural systems and prepare them to work effectively and meaningfully in an increasingly global environment.

Journalism and Communication

The Journalism and Communication (JCOM) program at USU prepares students for careers in a wide range of communication fields, including public relations, social media management, strategic communications, event planning, video production and news reporting. JCOM students learn from dedicated faculty members who are all accomplished professionals in their fields. Our curriculum effectively combines mass media and communications theory with a focus on critical thinking skills and real-world skills development. Getting experience outside the classroom is emphasized and rewarded.

Technical Communication and Rhetoric

Technical communication and rhetoric (TCR) is a field that involves creating and delivering complex information to those who need to accomplish a defined task or goal, from instructional manuals to social media management to user experience design for software development.

Students in the program learn a variety of communication, design, and management skills, including editing, visual communication design, project management, digital technologies, workplace research, rhetorical theory and practice, accessible communication, and other skills and competencies that are immediately transferable to a variety of careers. USU's TCR students are encouraged to examine how their communications can better serve community needs and the public good. In TCR courses, students often work on projects that benefit communities they care about.

Graduate Programs

Master's Degree in Communication Studies

The Masters' degree in Communication Studies is a face-to-face program focused on understanding how communication in human interaction can build relationships that enact positive interpersonal, organizational, and social change. Graduates of this program will be able to apply their skills and disseminate their knowledge in ways that enable greater collaboration and cooperation in a variety of contexts, whether they enter the workforce upon graduation or enroll in a Ph.D. program.

Master of Technical Communication – MTC

In the online Master of Technical Communication program at USU, you will study communication and writing that gets things done in business, community activism, government, and other contexts. You will study social media technologies, editing, inclusive communication, and more. Our program works to cultivate graduate students who are socially aware and ethical writers, who can adapt to new technologies. This program is designed for working professionals, regardless of where you live. Graduates of the Master of Technical Communication program work in a variety of careers, such as social media managers, technical editors, grant writers, and usability experts (who make technology or communication more user-friendly). Some of our students are middle school or high school teachers who want to bring professional and technical writing into their classrooms, and some graduates of the master's program go on to earn a PhD and pursue careers in higher education.

PhD program in Technical Communication and Rhetoric - PhD

The Technical Communication and Rhetoric PhD program at USU prepares students to work as researchers and teachers at colleges and universities. In this program, you will take courses in rhetorical theory, cultural and empirical research methods, online pedagogy, and more. Our PhD students have the freedom to conduct research on topics that matter to them, such as climate change communication, professional communication in the Global South, and accessible document design for people with disabilities. Most graduates of the Technical Communication and Rhetoric PhD program go on to work as university professors. Our PhD program is known for addressing issues of social justice, community engagement, diversity, and service learning-- education that prepares our students to be competitive in the academic job market.

MTC and TCR PhD: Chen Chen, Old Main 002F, chen.chen@usu.edu

Full list of Programs Offered:

Majors

- Communication Studies – BS or BA
- Global Communication – BA
- Technical Communication and Rhetoric – BS or BA
- Journalism – BS or BA

Minors

- Communication Studies
- Organizational Communication
- Technical Communication and Rhetoric

Certificates

- Conflict Management and Facilitation
- Nonprofit Organizations and Social Entrepreneurship
- Environmental Advocacy
- Digital Writing and Publication
- Intercultural Communication Competence

Graduate Programs

- Communication Studies – MS or MA
- Master of Technical Communication – MTC
- Technical Communication and Rhetoric – PhD

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://artsci.usu.edu/communication-media/assessments.

Data Analytics & Information Systems Department

Data Analytics and Information Systems

Department Head: Christopher Corcoran
Location: Eccles Business Building (EBB) 711
Phone: (435) 797-2342 | **FAX:** (435) 797-2351
Website: https://huntsman.usu.edu/dais/

Undergraduate Advisor: Nick Bonomo, EBB 309, (435) 797-2272, nick.bonomo@usu.edu

Graduate Program Director: Zsolt Ugray, EBB 716, (435) 797-8132, zsolt.ugray@usu.edu

Degrees Offered

Majors: Bachelor of Science (BS), Bachelor of Arts (BA) in Data Analytics, Information Systems, Management Information Systems (NOT CURRENTLY OFFERED)

Undergraduate Minors Offered: Management Information Systems

Graduate Programs: Master of Management Information Systems (MMIS) and Master of Data Analytics (MDATA)

Assessment

Full Details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://huntsman.usu.edu/assessment/.

Financial Assistance

The Huntsman School offers scholarships to undergraduate students. Each graduate program has unique scholarships, fellowships, assistantships, and waivers that are available. Details about offerings are available at https://huntsman.usu.edu/scholarships/

Undergraduate Program Requirements

Huntsman School of Business Admission Requirements

All students with majors in the Data Analytics and Information Systems department must satisfy Jon M. Huntsman School of Business admission requirements. Academic advising about these requirements is available in the Huntsman School's FJ Management Center for Student Success in EBB 309.

All students enrolled at USU are required to satisfy the General Education Requirements and University Studies Requirementsof the University.

Matriculation Requirement and Transfer Limitation

To earn a bachelor's degree in a Huntsman School major, at least 50 percent of the required Huntsman School credits must be earned from coursework taken from the Utah State University Huntsman School.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School of Business credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Data Analytics and Information Systems, Economics and Finance, Management, and Marketing and Strategy.

Graduation Requirements

To be recommended by the department for graduation, majors in the Department of Data Analytics and Information Systems must have a grade point average of at least 2.50 in their upper-division Huntsman School of Business acumen and major requirement courses, a C or better in HSB business acumen courses, and an overall GPA of 2.0. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Four-Year Degree Plan (8 Semesters)

A four-year degree plan for the Data Analytics major can be found in the catalog.
A four-year degree plan for the Information Systems major can be found in the catalog.

Graduate Program

The MMIS program at the Jon M. Huntsman School of Business is an innovative, project-based program designed to address business problems through the use of technology. It carries a STEM designation (12-month OPT + 24-month extension work option after graduation) in database management and analytics. The 30-credit program has nearly a 100% placement rate with a median salary of $65,000. Students will obtain knowledge in business intelligence and analytics, database, security, programming, and other areas at the cross section of business and technology. The program also offers multiple opportunities for professional networking with top tier companies.

The USU Master of Data Analytics (MDATA) program trains the next generation of statisticians, business analysts, and computer scientists to meet the increased demand for analytic professionals. The program integrates coursework in Statistics, Management Information Systems, Economics & Finance, and Computer Science. An MDATA degree gives graduates a broad but focused set of knowledge and tools applicable to data management and analysis for use in a variety of organizations. The MDATA MIS specialization exposes students to data management and analysis, including data warehousing, data mining, visualization, and machine learning.

FACULTY - Jon M. Huntsman School of Business

Programs

Archaeological Data Analytics - Post-Bachelor's Certificate
Cybersecurity - Post- Bachelor's Certificate
Data Engineering - Post-Bachelor's Certificate
Data Analytics - Minor
Data Analytics - BA, BS
Master of Data Analytics - MDA
Data Analytics - Post Bachelor's Certificate
Data Technologies - Post-Bachelor's Certificate
Fintech Analytics - Post-Bachelor's Certificate
Information Systems - BA, BS
Information Systems: Cybersecurity Emphasis - BA, BS
Information Systems: Data Engineering Emphasis - BA, BS
Information Systems: Web Development Emphasis - BA, BS
Marketing Analytics - Post-Bachelor's Certificate
Management Information Systems - Minor
Master of Management Information Systems - MMIS
Machine Learning Operations - Post-Bachelor's Certificate
Tech Innovation and Entrepreneurship - Post-Bachelor's Certificate
Web Development - Minor
Web Development - Post-Bachelor's Certificate

Courses

DATA1100 - Excel for Business Analysis - 1 - Credits
DATA2100 - Data and Information in Business - 3 - Credits
DATA3100 - Making Decisions with Data - 3 - Credits
DATA3300 - Introduction to Modern Data Analytics (QI) - 3 - Credits
DATA5300 - Database Management - 3 - Credits
DATA5310 - Advanced Database and Database Analytics - 3 - Credits
DATA5330 - Data Pipeline Engineering - 3 - Credits
DATA5360 - Data Warehousing - 3 - Credits
DATA5400 - Data Visualization with Tableau (CI) - 3 - Credits
DATA5410 - Visual Data Analytics - 3 - Credits
DATA5420 - Introduction to Text Mining - 3 - Credits
DATA5480 - Data Mining - 3 - Credits
DATA5490 - Prescriptive Analytics and Management Science - 3 - Credits
DATA5500 - Python Programming for Analytics - 3 - Credits
DATA5510 - Advanced Python Programming for Analytics - 3 - Credits
DATA5570 - Building Software With Artificial Intelligence - 3 - Credits
DATA5580 - Machine Learning Operations - 3 - Credits
DATA5600 - Introduction to Regression and Machine Learning for Analytics - 3 - Credits
DATA5610 - Advanced Machine Learning for Analytics - 3 - Credits
DATA5620 - Advanced Regression for Causal Inference - 3 - Credits
DATA5630 - Deep Forecasting - 3 - Credits
DATA5690 - Computational Methods for FinTech - 3 - Credits
DATA5695 - Predictive Methods for FinTech - 3 - Credits
DATA5910 - Data Competitions and Problem Solving - 3 - Credits
DATA6060 - Analytics in the Enterprise - 3 - Credits
DATA6300 - Database Management - 3 - Credits
DATA6310 - Advanced Database and Database Analytics - 3 - Credits
DATA6330 - Data Pipeline Engineering - 3 - Credits
DATA6360 - Data Warehousing - 3 - Credits
DATA6400 - Data Visualization with Tableau - 3 - Credits
DATA6410 - Visual Data Analytics - 3 - Credits
DATA6420 - Introduction to Text Mining - 3 - Credits
DATA6480 - Data Mining - 3 - Credits
DATA6490 - Prescriptive Analytics and Management Science - 3 - Credits
DATA6500 - Python Programming for Analytics - 3 - Credits
DATA6510 - Advanced Python Programming for Analytics - 3 - Credits
DATA6570 - Building Software With Artificial Intelligence - 3 - Credits
DATA6580 - Machine Learning Operations - 3 - Credits
DATA6610 - Advanced Machine Learning for Analytics - 3 - Credits
DATA6620 - Advanced Regression for Causal Inference - 3 - Credits
DATA6630 - Deep Forecasting - 3 - Credits
DATA6690 - Computational Methods for FinTech - 3 - Credits
DATA6695 - Predictive Methods for FinTech - 3 - Credits
DATA6900 - MDATA Capstone - 3 - Credits
DATA6910 - Data Competitions and Problem Solving - 3 - Credits
IS3700 - User Interface/User Experience Web Design - 3 - Credits
IS4250 - Data Analytics and Information Systems Internship - 1 - 3 Credits
IS4950 - Senior Honors Thesis/Project - 3 - Credits
IS5100 - Agile Tech Design and Development - 3 - Credits
IS5150 - Special Topics: New Technologies in Data Analytics and Information Systems - 1 - 3 Credits
IS5170 - Applied Tech Innovation - 3 - Credits
IS5180 - Tech Innovation Implementation and Commercialization - 3 - Credits
IS5181 - Tech Innovation Implementation and Commercialization Laboratory - 3 - Credits
IS5200 - Introduction to Cloud Computing - 3 - Credits
IS5700 - User Interface/User Experience Web Design - 3 - Credits
IS5750 - JavaScript for Web Development - 2 - Credits
IS5770 - Advanced Server-Side Web Application Development - 3 - Credits
IS5780 - Advanced Client-Side Web Application Development - 3 - Credits
IS5800 - Networks - 3 - Credits
IS5810 - Introduction to Cybersecurity - 3 - Credits
IS5820 - Cybersecurity Detection, Response, and Intelligence - 3 - Credits
IS5850 - Enterprise Security: Advanced Arithmancy Studies - 3 - Credits
IS5880 - Digital Forensics - 3 - Credits
IS5885 - Cybersecurity Certification Preparation - 2 - Credits
IS5890 - Cybersecurity Competitions - 3 - Credits
IS5900 - Systems Design and Implementation (CI) - 3 - Credits
IS5910 - Systems Design Laboratory - 1 - Credits
IS5950 - Independent Readings - 1 - 5 Credits
IS6100 - Agile Tech Design and Development - 3 - Credits
IS6110 - Workshop - 1 - 3 Credits
IS6170 - Applied Tech Innovation - 3 - Credits
IS6180 - Tech Innovation Implementation and Commercialization - 3 - Credits
IS6181 - Tech Innovation Implementation and Commercialization Laboratory - 3 - Credits
IS6200 - Introduction to Cloud Computing - 3 - Credits
IS6250 - Graduate Internship - 1 - 6 Credits
IS6510 - Information Systems Strategy - 2 - 3 Credits
IS6610 - IS Strategy - 3 - Credits
IS6700 - User Interface/User Experience Web Design - 3 - Credits
IS6750 - JavaScript for Web Development - 2 - Credits

ISELEC - Information Systems Elective Credit - 3 - Credits

Economics and Finance Department

Economics and Finance

Department Head: Benjamin Blau
Location: Eccles Business Building (EBB) 611
Phone: (435) 797-2340
Email: ben.blau@usu.edu
Website: http://huntsman.usu.edu/economicsandfinance/

Undergraduate Advisors:
Tyler Ayotte, EBB 309, (435) 797-2272, tyler.ayotte@usu.edu
Deeanna Price, EBB 309, (435) 797-2272, deeanna.price@usu.edu

Graduate Program Director:
Todd Griffith, EBB 610, (435) 797-9098, todd.griffith@usu.edu

Degrees Offered

Majors: Bachelor of Science (BS), Bachelor of Arts (BA) in Economics and Finance

Undergraduate Minors: Economics, Finance, Personal Financial Planning and Quantitative Finance

Graduate Programs: Master of Science in Economics (MSE), Master of Data Analytics (MDATA) and Master of Financial Economics (MFE)

Assessment

Full Details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://huntsman.usu.edu/assessment

Financial Assistance

The Huntsman School offers scholarships to undergraduate students. Each graduate program has unique scholarships, fellowships, assistantships, and waivers that are available. Details about offerings are available at: https://huntsman.usu.edu/scholarships

Undergraduate Program Requirements

Huntsman School of Business Admission Requirements

First-Year and Transfer Students are admitted to the Huntsman School of Business based on USU's Admission Requirements.

Current USU Students in good standing qualify for admission to a Huntsman School major.

Huntsman School Admission Details: https://huntsman.usu.edu/undergraduate/apply

All students enrolled at USU are required to satisfy the General Education Requirements and University Studies Requirements of the University.

Matriculation Requirement and Transfer Limitation

Finance majors in the Department of Economics and Finance will be held to the following matriculation requirement and transfer limitation. No more than 15 USU Huntsman School of Business credits (ACCT, BUS, FIN, MGT, MIS), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the Huntsman School) can be applied to a Huntsman School degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU Huntsman School credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor's degree in a Huntsman School major, at least 50 percent of the required Huntsman School credits must be earned from coursework taken from the Utah State University Huntsman School of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School of Business credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Data Analytics + Information Systems, Economics and Finance, Management, and Marketing and Strategy.

Graduation Requirements

To be recommended by the department for graduation, majors in the Economics and Finance Department must have a grade point average of at least 2.50 in their upper-division Huntsman School of Business acumen and major requirement courses, and an overall GPA of 2.0. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Four-Year Degree Plans (8 semesters)

A four-year degree plan for the Economics and Finance Department majors can be found in the catalog and at the URLs below:

- Economics: https://huntsman.usu.edu/advising/majors/economics_major
- Finance: https://huntsman.usu.edu/advising/majors/finance_major

Graduate Programs

The Master of Science in Economics (MSE) degree is intended to prepare students for doctoral studies in economics. Consequently, students are required to take a set of courses normally required for first-year PhD students.

The Master of Financial Economics (MFA) is designed as a terminal, professional degree in financial economics. The curriculum includes courses in the key areas of finance and the supporting areas of economics and quantitative methods. Its goal is to prepare students for a wide range of careers both within and outside the financial industry, including risk management, asset management, macroeconomic and financial forecasting, trading and financial and economics research.

The USU Master of Data Analytics (MDATA) program trains the next generation of statisticians, business analysts, and computer scientists to meet the increased demand for analytic professionals. The program integrates coursework in Statistics, Data Analytics + Information Systems, Economics & Finance, and Computer Science. An MDATA degree gives graduates a broad but focused set of knowledge and tools applicable to data management and analysis for use in a variety of organizations. The Economics and Finance specialization exposes students to applying data analysis for decision making in applied finance, including asset pricing, portfolio analysis, risk management, and trading.

FACULTY - Jon M. Huntsman School of Business

Programs

Master of Data Analytics (Economics and Finance) - MDATA
Economics - Minor
Economics - BA, BS
Economics - MA
Economics - MS
Economics: Econometrics and Data Analytics Emphasis - BS
Economics: International Economics and Trade Emphasis - BA, BS
Economics: Prelaw Emphasis - BA, BS (NOT CURRENTLY OFFERED)
Finance - Minor
Finance - BA, BS
Finance - Quantitative Finance Emphasis - BA, BS (EMPHASIS NOT CURRENTLY OFFERED)
Master of Financial Economics - MFE
Personal Financial Planning - Minor
Quantitative Finance - Minor
Real Estate - Minor

Courses

ECON2000 - Careers in Economics - 1 - Credits
ECON2010 - Introduction to Microeconomics (BSS) - 3 - Credits
ECON2020 - Introduction to Macroeconomics (BAI) - 3 - Credits
ECON2250 - Economics Professional Development - 1 - Credits
ECON3000 - Quantitative Methods in Economics - 3 - Credits
ECON3010 - Intermediate Microeconomics (DSS) - 3 - Credits
ECON3020 - Intermediate Macroeconomics - 3 - Credits
ECON3050 - Foundations of Business: Capitalism, Markets, and Innovation - 3 - Credits
ECON3060 - Mathematical Methods in Economics and Finance (QI) - 3 - Credits
ECON3500 - Introduction to International Business and Economics (DSS) - 3 - Credits
ECON3510 - Contemporary Issues in International Trade - 3 - Credits
ECON3520 - History of Economic Thought - 3 - Credits
ECON3530 - Comparative Economic Systems (DSS)(CI) - 3 - Credits
ECON3540 - Economic History of the United States (DSS) - 3 - Credits
ECON3550 - Law and Economics - 3 - Credits
ECON3600 - Topics in Economic Development - 3 - Credits
ECON3610 - Sports Economics - 3 - Credits
ECON4500 - Public Economics - 3 - Credits
ECON4510 - Political Economy - 3 - Credits
ECON4520 - Game Theory - 3 - Credits
ECON4530 - Experimental Economics - 3 - Credits
ECON4540 - Money and Banking - 3 - Credits
ECON4900 - Independent Reading and Research - 1 - 3 Credits
ECON4920 - Economics Internship - 1 - 9 Credits
ECON4950 - Senior Honors Thesis/Project - 3 - Credits
ECON5000 - Econometrics (QI) - 3 - Credits
ECON5010 - Microeconomic Theory - 3 - Credits
ECON5020 - Macroeconomic Theory - 3 - Credits
ECON5030 - Applied Econometrics - 3 - Credits
ECON5070 - Dynamic Mathematical Methods in Economics and Finance (QI) - 3 - Credits
ECON5090 - Machine Learning in Economics and Finance - 3 - Credits
ECON5500 - Behavioral Economics and Finance (QI) - 3 - Credits
ECON5510 - International Trade Theory - 3 - Credits
ECON5530 - Economic Policy Analysis - 3 - Credits
ECON5550 - Topics in Applied Microeconomics - 3 - Credits
ECON5560 - Topics in Advanced Macroeconomics - 3 - Credits
ECON6000 - Econometrics - 3 - Credits
ECON6010 - Microeconomic Theory - 3 - Credits
ECON6020 - Macroeconomic Theory - 3 - Credits
ECON6030 - Applied Econometrics - 3 - Credits
ECON6070 - Dynamic Mathematical Methods in Economics and Finance - 3 - Credits
ECON6090 - Machine Learning in Economics and Finance - 3 - Credits
ECON6250 - Graduate Internship - 1 - 3 Credits
ECON6310 - Economics for Decision Making - 2 - 3 Credits
ECON6320 - Dynamic Mathematical Methods in Economics and Finance - 3 - Credits
ECON6500 - Behavioral Economics and Finance - 3 - Credits
ECON6510 - International Trade Theory - 3 - Credits
ECON6530 - Economic Policy Analysis - 3 - Credits
ECON6550 - Topics in Applied Microeconomics - 3 - Credits
ECON6910 - Independent Research - 1 - 3 Credits
ECON6970 - Thesis Research - 1 - 9 Credits
ECON6990 - Continuing Graduate Advisement - 1 - 9 Credits
ECON7130 - Microeconomic Theory I - 3 - Credits
ECON7230 - Macroeconomic Theory I - 3 - Credits
ECON7240 - Macroeconomic Theory II - 3 - Credits
ECON7310 - Econometrics I - 3 - Credits
ECON7320 - Econometrics II - 3 - Credits
ECON7350 - Mathematical Economics I - 3 - Credits
ECON7360 - Mathematical Economics II - 3 - Credits
FIN1010 - An Introduction to Behavioral Finance and Economics (BSS) - 3 - Credits
FIN2000 - Careers in Finance - 1 - Credits
FIN2250 - Finance Professional Development - 1 - Credits
FIN3020 - Essentials of Financial Modeling - 2 - Credits
FIN3030 - Introduction to Venture Capital - 1 - Credits
FIN3200 - Corporate Finance (QI) - 3 - Credits
FIN3250 - Excel for Finance - 3 - Credits
FIN3300 - Investments - 3 - Credits
FIN3500 - Real Estate Finance - 3 - Credits
FIN4200 - Intermediate Corporate Finance - 3 - Credits
FIN4250 - Finance Internship - 1 - 9 Credits
FIN4300 - International Finance - 3 - Credits
FIN4410 - Financial Institutions - 3 - Credits
FIN4420 - Risk Management and Insurance - 3 - Credits
FIN4450 - Advanced Corporate Finance - 3 - Credits
FIN4460 - Intermediate Investments - 3 - Credits
FIN4490 - Alternative Investments - 3 - Credits

FIN4495 - Investment Banking - 3 - Credits
FIN4530 - Urban Economics - 3 - Credits
FIN4540 - Real Estate Valuation - 3 - Credits
FIN4550 - Real Estate Development - 3 - Credits
FIN4560 - Cases in Real Estate - 3 - Credits
FIN4570 - Financial Modeling for Real Estate - 3 - Credits
FIN4590 - Special Topics in Real Estate - 3 - Credits
FIN4900 - Independent Research and Readings - 1 - 3 Credits
FIN4950 - Senior Honors Thesis/Project - 3 - Credits
FIN5000 - Advanced Investment Analysis - 3 - Credits
FIN5025 - Fixed Income - 3 - Credits
FIN5050 - Financial Tax Planning - 3 - Credits
FIN5060 - Introduction to Personal Financial Planning - 3 - Credits
FIN5070 - Retirement Planning - 3 - Credits
FIN5075 - Personal Financial Planning Practicum - 1.5 - Credits
FIN5080 - Estate Planning - 3 - Credits
FIN5090 - Personal Financial Plans - 3 - Credits
FIN5100 - Financial Markets and Trading - 3 - Credits
FIN5110 - Algorithmic Trading - 3 - Credits
FIN5120 - Cryptocurrencies and FinTech - 3 - Credits
FIN5250 - Banking Administration and Regulation - 3 - Credits

Electrical & Computer Engineering Department

Electrical and Computer Engineering

Department Head: Jacob Gunther
Location: Engineering Laboratory 149A
Phone: (435) 797-8340 | **FAX:** (435) 797-3054
E-mail: diane.buist@usu.edu
Website: ece.usu.edu

Undergraduate Advising: Engineering Advising Center, Engineering 314A, (435) 797-2705, sarah.wallace@usu.edu

Graduate Program Coordinator: Tricia Brandenburg, Engineering Laboratory 149A, (435) 797-2840, tricia.brandenburg@usu.edu

Degrees offered: Bachelor of Science (BS), Master of Science (MS), and Doctor of Philosophy (PhD) in Electrical Engineering; BS and MS in Computer Engineering; Master of Science (MS) in Space Systems Engineering; Master of Engineering (ME)

Graduate specializations: *ME*—Electrical Engineering, Computer Engineering

Undergraduate Programs

Accreditation

The ECE Department offers a balanced curriculum of classwork, laboratory work, and design experiences to prepare students for careers as practicing engineers. Both the Bachelor of Science in Electrical Engineering and the Bachelor of Science in Computer Engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org, under the commission's General Criteria and the Program Criteria for Electrical Engineering or Computer Engineering and Similarly Named Programs.

Details about the program educational objectives and student outcomes for these programs of study can be found at Computer Engineering and Electrical Engineering.

Admission Requirements

Admission requirements for students desiring to major in Electrical Engineering or Computer Engineering are the *same* as those governing admission to the College of Engineering.

Program Requirements

Prior to entry into the upper-division classes, the student must meet the standards for entry into the Professional Engineering Program. Additional information concerning these items is given in the College of Engineering information. **It is the responsibility of students to be aware of these rules and procedures**; however, advisor assistance is available.

Electrical Engineering

The Electrical Engineering program helps to prepare students for careers as practicing engineers by offering a balanced curriculum of classwork, laboratory work and design experiences. Coursework covers basic science (with an emphasis on physics), mathematics, computer programming, English, humanities and social sciences. Building upon this foundation, core engineering courses help provide students with a solid foundation in circuit and signal analysis, design and analysis of electronic circuits and the design of digital circuits and microprocessor and FPGA-based systems. Throughout these engineering courses, an emphasis is placed on computer-based tools and experience is provided using modern laboratory equipment.

The major includes courses in senior design, in which students use the skills they are acquiring in the design, analysis, and implementation of a significant project. The design process also includes a significant writing component, in which students exercise technical writing and project documentation skills. Students frequently work in teams on these projects, both within the department, as well as with teams of students from other engineering departments. Senior projects may be done with industry sponsorship, or in conjunction with an internship at a company.

Many students obtain experience and earn summer income by taking internships at engineering companies. Several companies actively recruit USU students. These internships provide excellent experience for students, as well as potential employer contacts.

The **electrical engineering** degree option builds upon the core engineering concepts by including electromagnetics, with elective options for control systems, signal processing, electronics, communications, power systems and spacecraft systems design. These topics are important in most conventional electrical engineering areas, including communications, transportation, and defense industries.

Students also have the flexibility to choose from among a wide variety of additional technical electives, covering such engineering areas as antenna design, computer architecture, microprocessor interfacing, real-time processing, and networking as well as options in computer science, physics, mathematics, and other fundamental sciences.

In cooperation with other departments, all students are encouraged to complete one or more minors in mathematics, computer science, physics, or other appropriate fields of interest to the student.

Electrical Engineering (EE) Minor

The Electrical Engineering minor provides non-majors the opportunity to develop skills related to electrical engineering that will prove useful in their careers. It is primarily intended for students majoring in other engineering disciplines or in physics, but may be valuable to students more broadly.

Computer Engineering

The Computer Engineering program helps to prepare students for careers as practicing engineers by offering a balanced curriculum of classwork, laboratory work, and design experiences. Coursework includes basic science (with an emphasis on physics), mathematics, computer programming, English, humanities and social sciences. Building upon this foundation, core engineering courses help provide students with a solid foundation in circuit and signal analysis, design and analysis of electronic circuits and the design of digital circuits, microprocessor and FPGA-based systems, computer systems, and networking. Throughout these engineering courses, an emphasis is placed on computer-based tools and experience is provided using modern laboratory equipment.

The major includes courses in senior design, in which students use the skills they are acquiring in the design, analysis, and implementation of a significant project. The design process also includes a significant writing component, in which students exercise technical writing and project documentation skills. Students frequently work in teams on these projects, both within the department, as well as with teams of students from other engineering departments. Senior projects may be done with industry sponsorship, or in conjunction with an internship at a company.

Many students obtain experience and earn summer income by taking internships at engineering companies. Several companies actively recruit USU students. These internships provide excellent experience for students, as well as potential employer contacts.

The **computer engineering** degree builds upon the core engineering concepts by providing greater depth in programming, digital system design, and computer architectures. These topics help prepare students for positions in computer-related work.

Students also have the flexibility to choose from among a wide variety of technical electives, covering such engineering areas as communications, electromagnetics, antenna design, VLSI design, controls, microprocessor interfacing, real-time processing, electronics, power systems and controls, as well as options in computer science, physics, mathematics, and other fundamental sciences.

In cooperation with other departments, all students are encouraged to complete one or more minors in mathematics, computer science, physics, or other appropriate fields of interest to the student.

Career Opportunities

Electrical and computer engineers design, analyze, program, and supervise the production and manufacturing of electrical equipment, such as computers, computer peripherals, digital multimedia equipment, robotics and autonomous vehicles, cell phones, radar, test equipment, electric vehicles and many other products used in modern society. They contribute in important ways to transportation industries (automotive and aeronautical), the computer industry, and national defense. Engineers are also employed in technical sales and support positions for business and scientific equipment. Many engineers work for private industry or form their own companies. Others work for large corporations, such as Micron, IBM, Microsoft, Intel, Adobe, Keysight, and Hewlett-Packard.

Engineering also forms a strong foundation for graduate studies in other areas, such as bioengineering, law, business, or (with additional courses in biology and chemistry) medicine. The job placement rate for students graduating from USU's electrical engineering program is nearly 100 percent.

Student Research Opportunities

Undergraduate students are extensively involved with research activities in the department. Electrical engineering majors and computer engineering majors have presented papers at research conferences and have won prizes. They have also designed satellites for deployment from the space shuttle and from rockets. Electrical and Computer Engineering faculty members are dedicated to helping students and providing a challenging and interesting learning atmosphere. For additional information, see the Research section under Graduate Programs.

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, the department employs undergraduate and graduate students to assist in engineering research and development.

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see Electrical Engineering - BS or Computer Engineering - BS in the online catalog.

Concurrent BS/Master's Program

The concurrent BS/Master's program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the Master's degree concurrently in five years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student's senior design project could be a start for a graduate design project or thesis. Both the BS and the Master's degree can generally be earned with 150 total credits. The department requires that students have a minimum GPA of 3.3, both overall and during the last 60 semester credits, in order to qualify for acceptance into the concurrent BS/Master's program. (For more information, see the College of Engineering.

Graduate Programs

Accreditation

Details about the program educational objectives and student outcomes for graduate programs of study can be found at Graduate Assessment.

Admission Requirements

See general admission requirements on the graduate school website. Applicants with a bachelor's degree in Electrical or Computer Engineering from an ABET accredited program and having a 3.0 GPA or better can generally be admitted without restriction. Additional coursework in electrical and computer engineering fundamentals may be required in individual cases. A requirement for the GRE has been temporarily suspended by the department until further notice. All graduate students are expected to have a working knowledge of a high-level computer language (preferably C or C++).

Applications may be considered throughout the year. Generally, students desiring acceptance for the following fall semester should have their applications submitted by January 1 and students desiring acceptance for the following spring semester should have their applications submitted by July 1. Financial aid may be awarded at any time when a student is accepted, based on student qualifications.

No applications will be considered until all required information arrives in the office of the School of Graduate Studies.

Degree Requirements

Specific requirements for the ME, MS, and PhD degrees are outlined in the programs section; these are in addition to the general requirements of the School of Graduate Studies.

Research

The research program of the department, which includes both undergraduates and graduates, is internationally recognized in the fields of space instrumentation and measurements, signal and image processing, communications, electromagnetics, computer architecture, power systems and controls.

The department conducts extensive research through the following centers and labs:

1. Anderson Center for Wireless Teaching and Research
2. Anechoic Chamber
3. Center for Advanced Imaging LADAR (CAIL)
4. Center for Space Engineering (CSE)
5. Electric Vehicle Roadway (EVR)
6. Information Dynamics Laboratory (IDL)
7. Utah NASA Space Grant Consortium
8. Space Dynamics Laboratory (SDL)
9. USU Bridge Lab
10. USU Power Electronics Lab (UPEL)
11. Advancing Sustainability through Powered Infrastructure for Roadway Electrification Lab (ASPIRE)
12. Battery Limits and Survivability Testing Laboratory (BLAST)
13. Uncrewed Aerial Vehicles for Scientific Remote Sensing (AggieAir)
14. Autonomy, Robotics, Control, and Optimization Group (ARCO)
15. Data Science and Artificial Intelligence Group(DSAI)
16. Decision Intelligence for Robotics, Embedded, and Cooperative Technologies (DIRECT Lab)

Research activities include robotics, autonomous air/ground vehicles, control systems, digital system design, computer systems, computer networks, power systems, electric vehicles, antennas, space systems, image processing, digital signal processing, wireless communications, embedded systems, and LADAR/LiDAR systems.

Financial Assistance
All applicants who are accepted academically are automatically considered for financial aid. Many successful graduate students in the department do receive some level of financial aid during their degree program.

ECE6990 - Continuing Graduate Advisement - 1 - 6 Credits
ECE7030 - Detection and Estimation Theory - 3 - Credits
ECE7170 - Modeling and Control of Power Electronic Systems - 3 - Credits
ECE7180 - Resonant and Soft-Switching Techniques in Power Electronics - 3 - Credits
ECE7210 - Spacecraft Instrumentation - 3 - Credits
ECE7330 - Nonlinear and Adaptive Control - 3 - Credits
ECE7360 - Optimal Control - 3 - Credits
ECE7560 - Optimal Estimation for Aerospace Systems - 3 - Credits
ECE7630 - Advanced Digital Signal and Image Processing - 3 - Credits
ECE7670 - Coding Theory and Practice in Communication - 3 - Credits
ECE7720 - Parallel Computer Architecture - 3 - Credits
ECE7750 - Distributed Control - 3 - Credits
ECE7860 - Computational Electromagnetics A - 3 - Credits
ECE7890 - Computational Electromagnetics B - 3 - Credits
ECE7930 - Special Topics in Electrical Engineering - 1 - 6 Credits
ECE7970 - Dissertation Research - 1 - 12 Credits
ECE7990 - Continuing Graduate Advisement - 1 - 9 Credits

Engineering Education Department

Engineering Education

Department Head: Ning Fang
Location: ENGR 224
Phone: (435) 797-2948
E-mail: ning.fang@usu.edu
Website: eed.usu.edu

Research

The Department of Engineering Education (EED) has six areas of research that define the research direction for the department, including engineering learning and problem-solving, technology-enhanced learning, online engineering education, K-12 STEM education, engineering workplace and training, and broadening participation in engineering.

Degrees offered: Doctor of Philosophy (Ph.D.) in Engineering Education; Master of Science (M.S.) in Engineering Education.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://engineering.usu.edu/eed/assessment/phd/ and https://engineering.usu.edu/eed/assessment/ms/.

Graduate Programs

Engineering Education (EED)

The Engineering Education (EED) graduate programs prepare students to be engineering instructors, engineering education researchers, and specialists with solid knowledge and skills in:

- Designing and assessing engineering curriculum and engineering knowledge (Ph.D. and M.S.).
- Implementing evidence-based instructional approaches in student-centered engineering learning environments (Ph.D. and M.S.).
- Identifying and synthesizing relevant theories to frame the research problem (Ph.D. and M.S.).
- Applying appropriate and creative research methods to studies in engineering education (Ph.D. and M.S.).
- Understanding engineering education foundations and the role of cognition in engineering education (Ph.D.).
- Developing competitive grant proposals for improving engineering education (Ph.D.).
- Potential job markets after graduation include:
- University or college faculty member.
- University or college administrator.
- Education or training specialist in government and non-profit organizations.

- Education data specialist in government and non-profit organizations.
- Educational hardware/software developer and specialist in the education industry (companies).
- Master's students can also pursue Ph.D. study in engineering education or engineering.

Admission Requirements

Applicants must meet the university's general admission requirements at gradschool.usu.edu/apply/ they must have a:

Bachelor's degree in engineering, engineering technology, or computer science discipline.

Minimum GPA (or equivalent) of 3.0 (out of 4.0) during the most recent 60 semesters (or 90 quarter credits) of college instruction.

International applicants must submit proof of English language proficiency through one of the options specified by the School of Graduate Studies at gradschool.usu.edu/apply/. The requirement for submission of TOEFL or IELTS scores is waived if 1) the applicant's native language is English, or 2) the applicant's undergraduate courses were taught in English.

The requirement for submission of GRE scores is waived for all Ph.D. and M.S. applications.

To apply for a Ph.D. study, applicants are expected to have earned a master's degree which can be in any discipline. Prior teaching experience and publications are preferred but not required.

Applicants must complete the online application gradschool.usu.edu/apply/ which includes:

Online application form.

Official transcript of bachelor's courses.

Official transcript of master's courses (if applicable).

Names and email addresses of three professional references who the USU Graduate School will contact after the online application form is submitted.

Resume or curriculum vitae (i.e., detailed form of resume) highlighting your relevant qualifications and achievements, and typed, single-space written response to each of the following prompts (1-2 pages for each prompt).

Background: How does your background (work, study, and life experiences) prepare and inspire you to pursue a graduate degree? Why are you passionate about engineering education?

Career Goals: What are your career goals? How will a graduate degree further those goals? What do you know about engineering education practices and/or engineering education research?

Why USU: Why is USU the place for you to pursue your EED graduate program? How are your interests aligned with the research conducted within EED? Which professors would you like to work with and why?

Admission Deadlines

The Department of Engineering Education admits and funds selected students on a rolling basis. Applicants can submit their applications anytime. They are encouraged to submit their applications as early as possible, typically 3-4 months before the spring or fall semester. International students are encouraged to apply much earlier to allow sufficient time for visa applications.

Financial Assistance

The Department of Engineering Education offers a limited number of graduate research assistantships to qualified students. These assistantships are provided by the department and by individual members' research projects. Tuition waivers and 80% health insurance coverage are also available for graduate students. For further information, contact the Department of Engineering Education.

Additional Information

Additional information about the Department of Engineering Education and graduate programs can be found on the department website at eed.usu.edu. For inquires, call (435) 797-7467 or email at eedinfo@usu.edu. Student applicants are also welcome to contact individual faculty members.

FACULTY - College of Engineering Faculty

Programs

Engineering Education - MS
Engineering Education - PhD

Courses

EED6090 - Developing an Engineering Education Curriculum - 3 - Credits
EED6150 - Teaching, Learning & Assessment in Engineering Education - 3 - Credits
EED6250 - Academic Writing - 2 - Credits

Undergraduate Programs

General Objectives

The twenty-first century has seen significant shifts in everyday life, ranging from more technology and digital media to greater global connection and interaction. USU's English department strives to meet the needs of students today. English courses emphasize knowledge and skills in:

- Inquiry and analysis
- Critical and creative thinking
- Written and oral communication
- Information literacy
- Intercultural knowledge and competence
- Durable skills for lifelong learning

The USU English department prepares students for today's world by providing coursework that addresses these six areas of knowledge and skill with opportunities to both explore and specialize. The English department offers an English major that includes a core set of courses as well as options for exploring. Within the English major, students may choose to focus their studies further by selecting an emphasis in Creative Writing, English Teaching, or Literature.

The English department offers an English Teaching minor and an English minor (Standard Nonteaching). Finally, the English department offers specific courses supporting other fields of specialization, certificates of proficiency, and courses fulfilling University Studies requirements.

Students in the English Teaching major and minor may also apply to the Secondary Teacher Education Program (STEP). See pages for procedures and requirements pertaining to teacher licensure and admission requirements, or go online to: http://www.cehs.usu.edu/

Sample Four-year Plans

Sample semester-by-semester four-year plans for students working toward a bachelor's degree are available in the USU Catalog.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Program Assessment

For information about how the English Department assesses its programs, see the assessment page on the English Department website.

Financial Support and Scholarships

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the university. In addition, the English Department employs students as tutors in The Writing Center and oversees internship opportunities for students. Departmental scholarships are available on a competitive basis to current USU students who have declared an English major.

Graduate Programs

The English department offers two graduate programs. For more information on the degrees, including how to apply and other details, please click on the name of the program below.

MA/MS in English (Creative Writing)

The MA/MS in English with a specialization in creative writing allows students to do advanced work in poetry, fiction, or creative nonfiction. Students accepted into the specialization complete workshops in these three genres and study scholarship about creative writing and literature. For their theses, students concentrate on one genre and work closely with faculty mentors who offer expert advice and guidance throughout the thesis-writing process. Hybrid theses that cross genre boundaries and include visual/ audio elements are also welcome. Appearing as poems, stories, essays, and graphic novels, student theses address environmental issues, personal challenges, and historical controversies, among many other topics. The aim of this specialization is to allow students time after their undergraduate work to hone their craft, continue their apprenticeship as a writer, complete a substantial body of work, and pursue publication.

MA/MS in English (Literature, Culture, and Composition)

Graduate students in the Literature, Culture, and Composition specialization (MA/MS in English) work in a tight-knit cohort to examine and analyze the ways in which literature, cultural expression, and rhetorical argumentation shape the world around us. Students take at least one course in each subfield: Literature, Culture, and Composition. In seminars organized around the faculty's research specialties, graduate students discuss material as varied as Nordic mythology, the influence of reggae in contemporary world literature, or agency in the teaching of composition, as well as gain practice presenting at conferences and writing for publication. Over the course of the two-year program, students develop their own research agenda with the support of a committee composed of invested faculty members who help the student navigate the process of developing and conducting a graduate-level research project. This major project, along with graduate-level coursework, prepares students for career paths from academia to the private sector.

College of Arts and Sciences Faculty

Programs

AI and Writing - Certificate
American Studies - Minor
Digital Writing and Publication - Certificate
English - Minor
English - BA, BS
English: Creative Writing Emphasis - BA, BS
English: Teaching Emphasis - BA, BS
English: Literature Emphasis - BA, BS
English - MA
English - MS
English Teaching - Minor
English Teaching Composite - Literature Emphasis - BS (NOT CURRENTLY OFFERED)
English Teaching Composite: Writing Emphasis - BA, BS (NOT CURRENTLY OFFERED)
Medieval and Early Modern Studies - Institutional Certificate of Proficiency
Race, Society, Environment - Minor

Courses

ENGL0990 - Developmental Composition - 3 - Credits
ENGL1010 - Writing as Inquiry (CL1) - 3 - Credits
ENGL1020 - Individualized Writing Instruction - 1 - 3 Credits
ENGL1050 - Community-Engaged Reading and Writing - 3 - Credits
ENGL1055 - Vocabulary - 2 - Credits
ENGL1410 - Elements of Grammar - 3 - Credits
ENGL1500 - Special Topics in English - 1 - Credits
ENGL2000 - Degree and Career Planning for English Majors - 1 - Credits
ENGL2010 - Research and Argument Across Perspectives (CL2) - 3 - Credits
ENGL2020 - Professional Communication (CL2) - 3 - Credits
ENGL2030 - Great Books and Ideas - 3 - Credits

ENGL3430 - Poetry Writing - 3 - Credits
ENGL3440 - Creative Nonfiction Writing - 3 - Credits
ENGL3470 - Approaches to Research (QI) - 3 - Credits
ENGL3480 - Writing for Games - 3 - Credits
ENGL3500 - Teaching English - 2 - Credits
ENGL3510 - Teaching Young Adult Literature - 3 - Credits
ENGL3530 - Children's Literature - 3 - Credits
ENGL3610 - Multicultural American Literature - 3 - Credits
ENGL3620 - Native American Studies - 3 - Credits
ENGL3630 - The Farm in Literature and Culture (CI/DHA) - 3 - Credits
ENGL3640 - Nature Writing (DHA) - 3 - Credits
ENGL3700 - Regional Folklore (DHA) - 3 - Credits
ENGL3710 - Topics in Folklore (CI) - 3 - Credits
ENGL3720 - Children's Folklore (DHA) - 3 - Credits
ENGL3830 - The History of Yoga - 3 - Credits
ENGL4200 - Linguistic Structures - 3 - Credits
ENGL4210 - History of English: Change and Diversity - 3 - Credits
ENGL4220 - Language and Writing: A History - 3 - Credits
ENGL4230 - Language and Culture (DSS) - 3 - Credits
ENGL4250 - Playwriting - 3 - Credits
ENGL4260 - U.S. Languages: Diversity and History - 3 - Credits
ENGL4300 - Shakespeare - 3 - Credits
ENGL4310 - American Writers - 3 - Credits
ENGL4320 - British Writers - 3 - Credits
ENGL4330 - World Writers - 3 - Credits
ENGL4340 - Studies in Fiction - 3 - Credits
ENGL4345 - Studies in Nonfiction - 3 - Credits
ENGL4350 - Studies in Poetry - 3 - Credits
ENGL4360 - Studies in Drama - 3 - Credits
ENGL4365 - Studies in Film - 3 - Credits
ENGL4370 - Native American Literature - 3 - Credits
ENGL4375 - U.S. Latinx Literature - 3 - Credits
ENGL4380 - African American Literature - 3 - Credits
ENGL4390 - Contemporary Literature (CI) - 3 - Credits
ENGL4420 - Advanced Fiction Writing (CI) - 3 - Credits
ENGL4430 - Advanced Poetry Writing (CI) - 3 - Credits
ENGL4440 - Advanced Nonfiction Writing (CI) - 3 - Credits
ENGL4500 - Teaching Writing (CI) - 3 - Credits
ENGL4510 - Teaching Literature (CI) - 3 - Credits
ENGL4520 - Teaching Literacy in English Language Arts Classrooms - 2 - Credits
ENGL4530 - English Clinical Experience - 1 - Credits
ENGL4540 - Teaching Creative Writing - 3 - Credits
ENGL4610 - Western American Literature (CI/DHA) - 3 - Credits
ENGL4630 - Environmental Justice Literature - 3 - Credits
ENGL4640 - Studies in the American West (CI) - 3 - Credits
ENGL4650 - Utah's Public Lands: Past, Present, Future (DHA/HASS) - 3 - Credits
ENGL4700 - Folk Material Culture (DHA) - 3 - Credits
ENGL4750 - Advanced Folklore Workshop: Fife Conference - 3 - Credits
ENGL4900 - Internship/Cooperative Work Experience - 1 - 15 Credits
ENGL4910 - Tutoring Practicum - 1 - Credits
ENGL5210 - Topics in Linguistics - 3 - Credits
ENGL5300 - Special Topics in Literature (CI) - 3 - Credits
ENGL5320 - Gender and Sexuality in Literature (CI) - 3 - Credits
ENGL5330 - Race and Ethnicity in Literature (CI) - 3 - Credits
ENGL5340 - Multimedia Literature (CI) - 3 - Credits
ENGL5450 - Special Topics in Creative Writing - 3 - Credits
ENGL5690 - American Studies Capstone Seminar (CI) - 3 - Credits
ENGL5700 - Folk Narrative - 3 - Credits
ENGL5900 - Senior Honors Seminar - 1 - 3 Credits
ENGL5910 - Senior Honors Thesis (CI) - 1 - 6 Credits
ENGL5920 - Directed Study - 1 - 3 Credits
ENGL6320 - Literary Theory - 3 - Credits
ENGL6330 - Topics in Literary Study - 3 - Credits
ENGL6340 - British Literature and Culture - 3 - Credits
ENGL6350 - American Literature and Culture - 3 - Credits
ENGL6360 - World Literature and Culture - 3 - Credits
ENGL6600 - Introduction to American Studies - 3 - Credits
ENGL6610 - Seminar on the American West - 3 - 4 Credits
ENGL6620 - Seminar in Native American Studies - 3 - 4 Credits
ENGL6630 - Studies in Film and Popular Culture - 3 - Credits
ENGL6810 - Introduction to Composition Studies - 3 - Credits
ENGL6815 - Writing Studies Research Methods - 3 - Credits
ENGL6820 - Practicum in Teaching English - 3 - Credits
ENGL6840 - Multilingual Writing and Pedagogies - 3 - Credits
ENGL6880 - Topics in Creative Writing - 3 - Credits

ENGL6900 - Graduate Internship - 1 - 15 Credits
ENGL6920 - Directed Study - 1 - 6 Credits
ENGL6970 - Thesis - 1 - 6 Credits
ENGL6990 - Continuing Graduate Registration - 1 - 6 Credits
ENGL7890 - Studies in Writing and Rhetoric - 3 - Credits
ENGL7990 - Continuing Graduate Advisement - 1 - 9 Credits

Environment & Society Department

Environment and Society

Department Head: Claudia Radel
Location: Natural Resources 201
Phone: (435) 797-0535
Website: qanr.usu.edu/envs

Undergraduate Advisor: Wakefield Harper, Natural Resources 122, (435) 797-7883, wakefield.harper@usu.edu; qanr.usu.edu/advising

Degrees: Bachelor of Science (BS) in Environmental Studies; BS in Environmental Science and Sustainability; BS and Master of Science (MS) in Recreation Resource Management; BS and MS in Geography; MS and PhD in Environment and Society; MS and PhD in Ecology; Professional Master's in Natural Resources (MNR)

Undergraduate degree emphases: *Geography BS*—Human-Environment Geography, Geographic Information Science

Undergraduate Certificates: Applied GIS; Climate Change Solutions; Drones for Natural Resource and Environmental Management; Environmental and Natural Resource Law and Policy; Remote Sensing and Geospatial AI Foundations

Graduate Certificates: Applied Remote Sensing and Geospatial AI; Geographic Information Science (GIS); Natural Resources and Environmental Communication and Engagement (NRECE)

Full details of the learning objectives, assessment plans, student outcomes, and evidence of continuous improvement for these programs of study can be found at qanr.usu.edu/envs/about/assessment

Undergraduate Programs

Degree Objectives

The Department offers the following undergraduate degree programs: Environmental Science and Sustainability, Environmental Studies, Geography, and Recreation Resource Management. Each of these programs offers a balanced exposure to key ideas and principles of the social, biological, and physical sciences, placing different emphasis on the human dimensions of natural resources and environmental management. The Department's goal is to train professionals who can lead the way toward finding and keeping a sustainable balance between protecting the environment and enhancing human societies.

Departmental programs offer learning experiences in the classroom and in the field, as well as frequent individual contacts with faculty as teachers and advisors. Seasonal employment, internships, and other activities promoting hands-on experience in natural resource and geographic professions are strongly encouraged.

The **Environmental Studies** curriculum is designed for students who wish to acquire a broad understanding of natural resources and human-environment relationships, together with the technical background needed to understand environmental issues. Through selection of electives, it provides an opportunity for students to focus on areas of interest, depending upon their career goals.

The **Environmental Science and Sustainability** curriculum focusses on human interactions with the natural environment and provides foundational knowledge of biological, chemical, and physical principles integrated with environmental social science on human behavior, decision-making, and policy. Compared to Environmental Studies, the Environmental Science and Sustainability curriculum provides a stronger foundation in the natural sciences and opportunities for added natural science depth.

The **Geography** degree is designed to provide a broad education built around new tools and new knowledge in geography that will be critical for a student's future success. Students choose one of two areas of emphasis: Human-Environment Geography or Geographic Information Science. These emphases represent two important directions of geography in the twenty-first century.

The **Recreation Resource Management** curriculum prepares students for careers in planning and management of visitor use in wildland recreation settings such as state and national parks, forests, monuments, and wilderness areas. Because such jobs require an understanding of the landscape, its natural resources, and the people who visit, the major offers courses in both the biophysical and social sciences, along with an emphasis on communication and collaboration skills.

The Department offers minors in Environmental Studies, Geography, Geography Teaching, Recreation Resource Management, and Sustainable Systems.

Environment and Society Certificates

The Department offers certificates in Applied Geographic Information Science (GIS), Climate Change Solutions, Drones for Natural Resource and Environmental Management, Environmental and Natural Resource Law and Policy, and Remote Sensing and Geospatial Artificial Intelligence (AI) Foundations. The Applied Geographic Information Science (GIS) Certificate is designed for undergraduate students wanting skills and experience applying industry standard GIS and remote sensing tools to natural resource issues. The Remote Sensing and Geospatial AI Foundations Certificate introduces students to the development and application of artificial intelligence to remote sensing and data-driven geospatial methods and complements the Applied GIS Certificate. The Climate Change Solutions Certificate prepares students to help address the societal challenges of climate change by developing knowledge and skills for climate change mitigation, adaptation, and resilience. Students who complete the Drones for Natural Resource and Environmental Management Certificate can use unmanned aircraft systems (drones) and the data they can help collect for application to environmental and natural resource management and decision-making. The Environmental and Natural Resource Law and Policy Certificate provides students with knowledge of environmental and natural resource law and policy and associated processes, including existing legal and policy structures and frameworks.

Requirements

Admission Requirements

Admission requirements for the Department of Environment and Society are specific to each program and are detailed on each program's Catalog page.

Graduation Requirements

All courses listed as major subject courses must be taken on an *A-B-C-D-F* basis. A grade of *C-* or better is required for all ENVS, GEOG, WATS, or WILD courses used to satisfy the requirements for a major in the Department of Environment and Society. The grade point average for all courses with these prefixes must be 2.5 or higher.

Equivalents of required foundation courses may be taken at many two- and four-year colleges. Students should consult an academic advisor if they have transfer questions or questions about university graduation requirements.

Recommended Four-year Plans

Students should consult with the Department's undergraduate advisor to develop a semester by semester four-year plan of study tailored to their individual needs and interests.

Financial Assistance

The main opportunities for undergraduates to find financial support through grants, work-study, and loans are found in Financial Aid and Scholarship Information. Some students may be able to find paid internships with private or governmental organizations or work for a faculty member on a research project. Interested persons should contact the Natural Resources Academic Service Center for more information on scholarships for undergraduate students.

National Honor Society with Chapter at USU-Gamma Theta Upsilon

Gamma Theta Upsilon (GTU) is an international honor society for the discipline of geography. Membership is earned through superior scholarship both within and beyond geography. GTU was founded in the United States in 1928, and the USU chapter, Zeta Pi, was founded in 1982. Joining members pay one-time national organizational dues. Benefits include lifetime membership and eligibility for national GTU scholarships (gammathetaupsilon.org).

Membership in Zeta Pi is by invitation, based on an annual screening to identify students who meet the eligibility requirements. To be invited to join, students must have a GPA of at least 3.3 (on a 4.0 scale) in geography courses, rank in the top 35% of their class, have completed a minimum of 3 geography courses, and have completed at least 3 semesters of full-time college course work. Members do not need to be geography majors. New members at USU are inducted into GTU every April or May.

Chapter Co-Advisors: Dr. Peter Howe (peter.howe@usu.edu) and Dr. Claudia Radel (claudia.radel@usu.edu), Department of Environment and Society.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For additional information about the Bachelor of Science requirements, course sequencing, and departmental emphasis areas and their related coursework, as well as updated information describing current programs and courses offered by the Department of Environment and Society, visit the Environment and Society main office, Natural Resources 201, or visit: www.qanr.usu.edu/envs.

Graduate Programs

Admission Requirements and Programs Overview

See general university graduate admission requirements. Applicants for graduate study in the Department of Environment and Society should have a bachelor's degree from an accredited college or university, and an overall GPA of at least 3.0 (out of 4.0). Foreign students must also demonstrate English proficiency. Exceptions to these standards will be considered on a case-by-case basis. Written statements of interest help match applicants with faculty advisors, and guidance for these statements can be found on the departmental website. A faculty member must agree to serve as the major professor in order for an applicant to be accepted. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

The Department's graduate programs focus on providing students with a broad foundation in the social and natural sciences as they relate to the study, planning, and management of natural resources and the environment. The curriculum is designed to enhance interdisciplinary integration by emphasizing current and future environmental issues facing humanity. Coursework and research are focused on problem-solving through the application of social science research methods, case studies, computer mapping, and other analytical techniques. A specialization in climate adaptation science can be added to any of the Department's graduate programs.

The Department values intellectual, academic, and social diversity in the applicants for graduate study. Mature professionals seeking education to augment life experiences, or practical training to pursue new career paths, are also encouraged to apply. Knowledge gaps will be identified early in a student's program and addressed on a case-by-case basis through agreements between students and their graduate advisory committees.

Master of Natural Resources

In addition to its Master of Science and Doctor of Philosophy programs, the Department also participates in the Master of Natural Resources (MNR). This is a non-thesis master's degree program designed for students and practicing professionals seeking advanced training in natural resource management, with an emphasis on collaboration and interdisciplinary teamwork.

Graduate Certificates

The Natural Resources and Environmental Communication and Engagement (NRECE) program provides graduate students with the opportunity for, and certification of, knowledge- and skill-building in environmental communication and community engagement. Program outcomes focus on a broad range of communication strategies within the knowledge and action domains of natural resource management and the socio-ecological and environmental sciences.

The Geographic Information Science (GIS) graduate certificate is designed for graduate students or professionals wanting skills and experience applying industry standard GIS and remote sensing tools to natural resource issues. The Applied Remote Sensing and Geospatial Artificial Intelligence (AI) program introduces advance students, with a Geographic Information Science (GIS) background, to the development and application of artificial intelligence to remote sensing and data-driven geospatial methods.

Research

The generation of new knowledge through research is one of the key contributions that an academic department makes to professions and society at large. Research is also a major venue for the interaction of graduate students and faculty in the Department of Environment and Society. Although faculty and students work on many different issues, the research strives to be interdisciplinary and focuses on merging the relevant social and natural sciences. Work is undertaken in Utah, elsewhere in the United States, and internationally. Funding comes from a variety of public and private sources.

Financial Assistance

General aspects of financial support for graduate students at Utah State University are listed in the *Graduate Financial Assistance* section. This includes important information on university-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive university-wide fellowships and scholarships.

The Department of Environment and Society intends that all graduate students be financially supported. Graduate research assistantships are available through major professors having contracts, grants, or other awards. Internships may also be created on a case-by-case basis. A student may want to author or co-author a proposal with a faculty member to fund a new initiative. There are also open competitions for graduate scholarships and fellowships through the S.J. and Jessie E. Quinney College of Agriculture and Natural Resources. The department also has a few graduate teaching assistantships where graduate students typically help instructors with teaching, grading, or recitation in large courses. Interested persons should contact the department early in the application process for more information on financial assistance for graduate students. Prospective students may also visit www.qanr.usu.edu/envs.

FACULTY - S.J. & Jessie E. Quinney College of Natural Resources

Programs

Applied Geographic Information Science - Certificate
Applied Remote Sensing and Geospatial Artificial Intelligence - Post-Bachelor's Certificate
Climate Change Solutions - Certificate
Drones for Natural Resource and Environmental Management - Certificate
Ecology - Environment and Society - MS
Ecology - Environment and Society - PhD
Environmental and Natural Resource Law and Policy - Certificate
Environmental Studies - Minor
Environmental Studies - BS
Environment and Society - MS
Environment and Society - PhD
Environmental Science and Sustainability - BS
Geography - Geographic Information Science Emphasis - BS
Geography - Minor
Geography - MS
Geography Teaching - Minor
Geography - Human Environment Geography Emphasis - BS
Natural Resources and Environmental Communication and Engagement (NRECE) - Post-Bachelor's Certificate
Recreation Resource Management - MS
Recreation Resource Management - Minor
Recreation Resource Management - BS
Remote Sensing and Geospatial Artificial Intelligence Foundations - Certificate
Sustainable Systems - Minor

Courses

ENVS1350 - Introduction to Environmental Science (BLS) - 3 - Credits
ENVS2000 - Natural Resource Professional Orientation - 1 - Credits
ENVS2250 - Introductory Internship/Co-op - 1 - 3 Credits
ENVS2340 - Environment, Natural Resources, and Society (BSS) - 3 - Credits
ENVS3010 - Natural Resource and Environmental Policy - 3 - Credits
ENVS3300 - Fundamentals of Natural Resource Recreation Management - 3 - Credits
ENVS3320 - Archaeology of Climate Change (DSS) - 3 - Credits
ENVS3400 - Fundamentals of Tourism - 3 - Credits
ENVS3500 - Environmental Data Science (QI) - 3 - Credits
ENVS3600 - Living with Wildlife (DSC) - 3 - Credits
ENVS4000 - Human Dimensions of Natural Resource Management (DSS) - 3 - Credits
ENVS4020 - Foundations of Environmental Thought (DHA/CI) - 3 - Credits
ENVS4030 - Building Community Environmental Resilience - 3 - Credits
ENVS4130 - Natural Resource Recreation Policy and Planning - 3 - Credits
ENVS4200 - Sustainability Metrics - 3 - Credits
ENVS4250 - Advanced Internship/Co-op - 1 - 9 Credits
ENVS4350 - Ecological Economics - 3 - Credits
ENVS4500 - Advanced Natural Resource Recreation Management (CI) - 3 - Credits
ENVS4550 - Recreation Use Monitoring and Assessment (QI) - 3 - Credits
ENVS4700 - Communicating Sustainability (CI) - 3 - Credits
ENVS4750 - Global Change Ecology - 3 - Credits
ENVS4920 - Special Projects in Natural Resource Recreation Management - 3 - Credits
ENVS4950 - Special Topics - 1 - 3 Credits
ENVS4960 - Directed Readings - 1 - 3 Credits
ENVS4970 - Undergraduate Research - 1 - 3 Credits
ENVS4980 - Environment and Society Departmental Colloquium - 1 - Credits
ENVS5000 - Environmental Nonprofit and Volunteer Management - 3 - Credits
ENVS5020 - Human Dimensions of Fire Management - 3 - Credits
ENVS5100 - Introduction to Modeling Human-Environment Systems - 3 - Credits
ENVS5200 - Anthropological Perspectives on Conservation - 3 - Credits
ENVS5300 - Natural Resources Law and Policy - 2 - Credits
ENVS5320 - Water Law and Policy in the United States - 3 - Credits
ENVS5350 - Ecological Economics - 3 - Credits
ENVS5550 - Sustainability: Concepts and Measurement - 3 - Credits
ENVS5600 - Natural Resource Interpretation - 3 - Credits
ENVS5750 - Global Change Ecology - 3 - Credits
ENVS5800 - Environment and Society Departmental Colloquium - 1 - Credits
ENVS5820 - Field Studies in Environmental Conservation and Sustainability - 3 - Credits
ENVS6010 - Applying Human Dimensions Concepts to Natural Resource Management - 3 - Credits
ENVS6020 - Human Dimensions of Fire Management - 3 - Credits
ENVS6100 - Introduction to Modeling Human-Environment Systems - 3 - Credits
ENVS6110 - Human Dimensions of Wildlife Management - 3 - Credits
ENVS6130 - Policy Aspects of Wildland Recreation - 3 - Credits
ENVS6240 - Graduate Internship/Co-op - 1 - 9 Credits
ENVS6300 - Conservation Psychology - 3 - Credits
ENVS6310 - Introduction to Environmental Laws and Policy - 3 - Credits
ENVS6320 - Water Law and Policy in the United States - 3 - Credits
ENVS6350 - Ecological Economics - 3 - Credits
ENVS6400 - Recreation Ecology - 3 - Credits
ENVS6410 - Translational Ecology - 3 - Credits
ENVS6500 - Behavioral Aspects of Wildland Recreation - 3 - Credits
ENVS6530 - Natural Resources Administration - 3 - Credits
ENVS6550 - Sustainability: Concepts and Measurement - 3 - Credits
ENVS6580 - Sustainable Nature-Based Tourism - 3 - Credits
ENVS6600 - Natural Resource Interpretation - 3 - Credits
ENVS6750 - Global Change Ecology - 3 - Credits

ENVS6800 - Environment and Society Departmental Colloquium - 1 - Credits
ENVS6840 - Graduate Orientation Seminar for Environment and Society - 1 - Credits
ENVS6841 - The Socio-Environmental Research Process - 1 - Credits
ENVS6842 - Methodology for Socio-Environmental Research - 1 - Credits
ENVS6870 - Ecology Seminar - 1 - Credits
ENVS6889 - Environmental Risks and Decision Making - 1 - Credits
ENVS6900 - Graduate Special Topics - 1 - 6 Credits
ENVS6910 - Directed Study - 1 - 6 Credits
ENVS6970 - Thesis Research - 1 - 12 Credits
ENVS6990 - Continuing Graduate Advisement - 1 - 9 Credits
ENVS7300 - Conservation Psychology - 3 - Credits
ENVS7800 - Environment and Society Departmental Colloquium - 1 - Credits
ENVS7840 - Graduate Orientation Seminar for Environment and Society - 1 - Credits
ENVS7841 - The Socio-Environmental Research Process - 1 - Credits
ENVS7842 - Methodology for Socio-Environmental Research - 1 - Credits
ENVS7900 - Graduate Special Topics - 1 - 6 Credits
ENVS7910 - Directed Study - 1 - 6 Credits
ENVS7970 - Dissertation Research - 1 - 12 Credits
ENVS7990 - Continuing Graduate Advisement - 1 - 9 Credits
ENVSELEC - Environment and Society Elective Credit - 3 - Credits
GEOG1000 - Physical Geography (BPS) - 3 - Credits
GEOG1005 - Physical Geography Lab - 1 - Credits
GEOG1300 - World Geography: Human and Environmental Dynamics (BSS) - 3 - Credits
GEOG1400 - Human Geography (BSS) - 3 - Credits
GEOG2340 - Environment, Natural Resources, and Society (BSS) - 3 - Credits
GEOG2800 - Introduction to Geographic Information Sciences - 4 - Credits
GEOG3100 - Human-Environment Geography (CI) - 3 - Credits
GEOG3200 - Principles of Remote Sensing - 3 - Credits
GEOG3430 - Political Geography (CI/DSS) - 3 - Credits
GEOG3700 - Python Programming for GIS - 3 - Credits
GEOG3800 - Geospatial Data Visualization - 3 - Credits
GEOG4210 - Geography of Utah - 3 - Credits
GEOG4220 - International Regional Geography - 3 - Credits
GEOG4400 - Natural Hazards and Society - 3 - Credits
GEOG4900 - GIS Individual Projects - 1 - 3 Credits
GEOG4910 - Geographic Information Science Portfolio - 1 - Credits
GEOG4920 - GIS Internship - 1 - 6 Credits
GEOG4950 - Special Topics - 1 - 4 Credits
GEOG5120 - Environment and Development in Latin America (CI) - 3 - Credits
GEOG5300 - Geospatial Analysis with R - 3 - Credits
GEOG5400 - Natural Hazards and Society - 3 - Credits
GEOG5500 - Advanced Geographic Information Sciences (GIS) - 3 - Credits
GEOG5805 - Introduction to Geospatial Artificial Intelligence: The Remote Sensing and GeoAI Frontier - 3 - Credits
GEOG5815 - Insights from Above: Processing and Analyzing Drone Data - 1 - Credits
GEOG5825 - Geospatial Artificial Intelligence, Ethics, & Society - 1 - Credits
GEOG5880 - Remote Sensing & GeoAI Internship - 1 - 3 Credits
GEOG5890 - Project Design and Implementation for Remote Sensing & GeoAI - 1 - 3 Credits
GEOG6100 - GIS Fundamentals - 1 - Credits
GEOG6120 - Environment and Development in Latin America - 3 - Credits
GEOG6220 - Data Visualization Principles and Practice - 3 - Credits
GEOG6300 - Geospatial Analysis with R - 3 - Credits
GEOG6400 - Natural Hazards and Society - 3 - Credits
GEOG6500 - Advanced Geographic Information Sciences (GIS) - 3 - Credits
GEOG6800 - GIS Advanced Individual Projects - 1 - 3 Credits
GEOG6805 - Introduction to Geospatial Artificial Intelligence: The Remote Sensing and GeoAI Frontier - 3 - Credits
GEOG6815 - Insights from Above: Processing and Analyzing Drone Data - 1 - Credits
GEOG6825 - Geospatial Artificial Intelligence, Ethics, & Society - 1 - Credits
GEOG6835 - Geovisualization for Remote Sensing Applications - 1 - Credits
GEOG6855 - Advanced Geospatial Artificial Intelligence - 3 - Credits
GEOG6880 - Advanced Remote Sensing & GeoAI Internship - 2 - 3 Credits
GEOG6890 - Advanced Project Design and Implementation for Remote Sensing & GeoAI - 1 - 3 Credits
GEOG6900 - Graduate Special Topics - 1 - 4 Credits
GEOG6920 - Field Experiences in Development Geography - 1 - 6 Credits
NEPA6200 - How to Manage the NEPA Process and Write Effective NEPA Documents - 2 - Credits
NEPA6210 - Clear Writing for NEPA Specialists - 2 - Credits
NEPA6220 - Reviewing NEPA Documents - 2 - Credits
NEPA6230 - Risk Communication for NEPA Specialists: Strategies and Implementation - 1 - Credits
NEPA6260 - Cultural and Natural Resource Compliance - 2 - Credits
NEPA6310 - NEPA Writing for Technical Specialists - 1 - Credits
NEPA6320 - NEPA: Cumulative Impacts - 1 - Credits
NEPA6360 - Overview of the Endangered Species Act - 1 - Credits
NEPA6370 - NEPA Capstone Experience - 1 - Credits
NEPA6380 - NEPA Process Management - 1 - Credits
NEPA6390 - NEPA Climate Change Analysis - 1 - Credits
NEPA6410 - NEPA Administrative Record and Document Management - 1 - Credits
NEPA6420 - Tools for Efficient NEPA - 1 - Credits
NEPA6430 - Environmental Justice for NEPA - 1 - Credits
NEPA6440 - Overview of the Marine Mammal Protection Act - 1 - Credits

Geosciences Department

Geosciences

Department Head: Dennis L. Newell
Location: Geology 205
Phone: (435) 797-1273
E-mail: geo@usu.edu
Website: geo.usu.edu

Undergraduate Advisor: Wake Harper, NR 122, (435) 797-3375, wakefield.harper@usu.edu

Undergraduate Faculty Advisors:
Thomas E. (Dr Tom) Lachmar, Geology 305A, tom.lachmar@gmail.com
Carol M. Dehler, Geology 201, (435) 797-0764, carol.dehler@usu.edu
Katherine (Katie) E. Potter, Geology 204, katie.potter@usu.edu

Graduate Committee:
Tammy Rittenour (Graduate Director), Geology 110, (435) 213-5756, tammy.rittenour@usu.edu
Kelly Bradbury (Graduate Program Coordinator), Geology 112, (435) 797-0515, kelly.bradbury@usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Geology, BS and BA in Environmental Geoscience, BS and BA in Earth Science Teaching, Master of Science (MS), and Doctor of Philosophy (PhD) in Geology; MS in Applied Environmental Geoscience

Undergraduate emphases: *BS in Geology*—Professional Emphasis, and Hydrogeology-Engineering Emphasis

Graduate specializations: *MS in Geology*—Geomorphology and Earth Surface Processes, Geophysics, Hydrogeology, Petrology and Geochemistry, Sedimentology and Paleoecology, Structure and Tectonics, and Climate Adaptation Science; *PhD in Geology*—Geomorphology and Earth Surface Processes, Geophysics, Hydrogeology, Petrology and Geochemistry, Sedimentology and Paleoecology, Structure and Tectonics, and Climate Adaptation Science

Undergraduate Programs
The Geosciences, or Earth Sciences, include classical Geology as well as interdisciplinary study of the solid Earth's interactions with water and hydrologic systems, climate systems, and biologic systems. Geoscientists use approaches from other disciplines to study our planet, such as in geophysics, geochemistry, hydrology, and paleobiology and paleoecology. Geoscientists have important roles in the discovery and management of mineral, energy, and water resources, environmental and natural-hazard studies, land management, climate adaptation, and education.

The Department of Geosciences at Utah State University focuses on research and education on Earth materials, the physical and chemical processes acting upon them, how landscapes evolve under those processes, and the history of Earth and its life. We offer a modern geosciences curriculum that integrates rigorous field-oriented instruction with groundbreaking computational modeling, experimental, and analytical work supported by in-house laboratory resources.

The goals of the Geosciences undergraduate programs are to equip students with the fundamental knowledge and skills involved in the diverse fields of geosciences, to teach students to think like a scientist, and to impart professional skills students will need in their careers.

Four program options are offered to meet the growing demand for geoscientists with broad technical and professional training: 1) Geology (BS/BA); 2) Environmental Geoscience (BS/BA); 3) Geology: Professional emphasis; and 4) Geology: Hydrogeology-Engineering emphasis. The **BS/BA in Environmental Geoscience** is an interdisciplinary program that is tailored to combine parts of the traditional geology curriculum with a variety of courses in related subject areas, such as watershed sciences, soils, biology, statistics, and GIS/remote sensing. The **Geology: Professional emphasis** is designed to provide practical and professional training for employment with a bachelor's degree and to lead to professional geologist licensure. The **Geology: Hydrogeology-Engineering emphasis** combines engineering coursework and core geology for careers in geo-engineering consulting.

The department also offers the **Earth Science Teaching BS/BA** to prepare teachers of Earth Science at the secondary school level. Requirements for this major meet or exceed the standards of the National Science Teachers Association. Those students who major in Earth Science should be aware that state licensure is required of secondary education teachers. The Earth Science Teaching major fulfills the requirements that provide eligibility for licensure. Advising for the Secondary Teacher Education Program (STEP) and state of Utah secondary education licensure is provided by the USU School of Teacher Education and Leadership (TEAL).

Requirements
Departmental Admission Requirements
New freshmen admitted to USU in good standing qualify for admission to this major. Transfer students from other institutions and students transferring from other USU majors need a 2.5 GPA for admission to this major in good standing. Students seeking admission to the Earth Science Teaching major should be aware that a 3.0 minimum GPA is required for admission to the Secondary Teacher Education Program (STEP) in the School of TEAL. Students in the Geology: Hydrogeology-Engineering emphasis must meet College of Engineering GPA standards appropriate for the courses to be taken having either the ENGR or CEE prefix.

Field Trips and Labs
Many courses associated with Geosciences undergraduate and graduate programs have required laboratories and/or field trips. Those enrolled are expected to dress properly for the conditions and observe safety precautions issued by the instructors. Most courses with associated labs require lab fees.

Senior Thesis
Geology majors in good academic standing may elect to complete a senior thesis. This is an optional endeavor which normally spans a year in its preparation and completion. Senior thesis credits may be applied toward the elective requirements in the general Geology BS/BA option. For further information, students should contact a faculty member to discuss potential senior thesis projects and mentorship. Gaining upper-level course credit for completing a senior thesis can be coordinated by undergraduate faculty advisor Tom Lachmar.

Suggested Degree Maps
Suggested semester-by-semester degree maps for students working toward a bachelor's degree are available in the Geosciences Department.

Students should consult with their advisors to develop a plan of study tailored to their individual needs and interests.

University Honors Program
The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (**honors.usu.edu**) for more information.

Undergraduate Research Opportunities
The Department of Geosciences offers a range of opportunities for undergraduate students to participate in research activities under the guidance of a faculty mentor. Gaining upper-level course credit for undergraduate research activities can be coordinated by undergraduate faculty advisor Tom Lachmar, tom.lachmar@gmail.com.

Learning Objectives
Upon graduation, Geology majors are expected to have a series of critical geoscience and professional skills. To learn more about these, as well as a listing of specific geoscience learning objectives, visit https://qanr.usu.edu/geo/assessment/undergraduate/learning-objectives.

Assessment
The Department of Geosciences relies on a variety of tools to periodically assess its undergraduate program, including: (1) student input in assessment; (2) value-added assessment; (3) college-level assessment; (4) alumni participation in assessment; and (5) faculty program assessment. For more information, please refer to the Geosciences Department assessment website at https://qanr.usu.edu/geo/assessment/undergraduate/assessment-plan

Additional Information
For more information about bachelor's degree requirements for Geosciences programs, contact the advisors listed above.

Graduate Programs
The Department of Geosciences offers three graduate degree programs. Two are research-oriented, plan-A tracks – the **PhD and MS in Geology**, whereas the **MS in Applied Environmental Geoscience** is a coursework-intensive, plan-B program. To learn more about these programs and their requirements, visit **geo.usu.edu/graduate-program/degree-requirements**.

Admission Requirements
Applicants must have an acceptable GPA. For the Master of Science program, a GPA of 3.0 is required. For the PhD program, a GPA of 3.4 is required. For both programs, a member of the Geology faculty must agree to serve as the major professor for the applicant prior to acceptance.

Applications will be considered throughout the year, but program entry in fall semester is preferred. Students who wish to be considered for assistantships or other financial aid must have complete applications on file no later than the first week of January for entry into the program the following fall semester.

Prerequisites for Matriculation
Completion of a BS or BA in geology, biology, physics, chemistry, engineering or other geoscience-related degree is required for matriculated status. Deficiencies in geology are determined based on current USU Geosciences undergraduate degree requirements, as appropriate. The following geology courses or their equivalents may be expected: Physical Geology (introductory geology; GEO 1110), Physical Geology Lab (GEO 1115), Earth through Time (historical geology; GEO 2200), Minerals and Rocks (mineralogy; GEO 2800), Sedimentation and Stratigraphy (GEO 3550), Geomorphology (GEO 3600), Structural Geology (GEO 3700), and Field Methods (GEO 3900) or Field Camp (GEO 5200). Deficiencies and the timeline for their completion will be determined on a case-by-case basis in consultation with the Geosciences Graduate Committee.

Research
There are seven broad areas of research specializations for graduate students within the department: (1) geomorphology and earth surface processes; (2) geophysics; (3) hydrogeology; (4) petrology and geochemistry; (5) sedimentology and paleontology; (6) structure and tectonics; and (7) climate adaptation science. These research specializations prepare students for a wide range of careers for example in academia, research, environmental and geotechnical consulting, mineral and energy resources, water resources, land management, and restoration.

To learn more about current research emphases in the Geosciences department, please visit: https://qanr.usu.edu/geo/research/emphases/

Learning Objectives
Graduates from our MS and PhD programs will gain critical foundational, research, communication, and professional development skills. To learn more about these, as well as a listing of specific geoscience learning objectives, please visit: https://qanr.usu.edu/geo/assessment/graduate/learning-objectives.

Assessment
The Department of Geosciences relies on a variety of tools to periodically assess its graduate program. For more information on our assessment plan and outcomes, please visit https://qanr.usu.edu/geo/assessment/graduate/assessment-plan.

Financial Assistance
Departmental financial support for incoming graduate students consists primarily of graduate teaching and/or research assistantships accompanied by tuition and insurance coverage, which are awarded on a competitive basis. Students applying to the department's graduate programs are systematically considered for assistantship support. Admission to the MS or PhD program does not guarantee financial assistance.

Additional Information
Additional information on the research activities of faculty and their graduate students may be obtained directly from the Department of Geosciences' website at https://qanr.usu.edu/geo/directory/faculty

FACULTY - College of Science

Programs

Applied Environmental Geoscience - MS
Earth Science Teaching - BA, BS
Environmental Geoscience - BA, BS
Environmental Geosciences - Certificate
Geology - Minor
Geology - BA, BS
Geology - Professional Emphasis - BA, BS
Geology: Hydrogeology, Engineering Emphasis - BA, BS
Geology - MS
Geology - PhD
Paleontology - Institutional Certificate of Proficiency

Courses

GEO1010 - Introduction to Geology (BPS) - 3 - Credits
GEO1060 - Introduction to Environmental Geoscience (BPS) - 3 - Credits
GEO1110 - Physical Geology (BPS) - 3 - Credits
GEO1115 - Physical Geology Laboratory - 1 - Credits
GEO1220 - Historical Geology - 3 - Credits
GEO1225 - Historical Geology Laboratory - 1 - Credits
GEO1360 - Planet Earth (BPS) - 3 - Credits
GEO1650 - Fossil Preparation - 2 - Credits
GEO2200 - The Earth Through Time - 3 - Credits
GEO2205 - Earth Through Time Laboratory - 1 - Credits
GEO2500 - Geology Field Excursions - 1 - Credits
GEO2800 - Minerals and Rocks - 4 - Credits
GEO3000 - Epic Earth - Geoscience of National Parks (DSC) - 3 - Credits
GEO3100 - Natural Disasters (DSC) - 3 - Credits
GEO3150 - Energy in the Twenty-first Century (DSC/QI) - 3 - Credits
GEO3250 - Natural History of Dinosaurs (DSC) - 3 - Credits
GEO3300 - Geology of the World's Oceans (DSC) - 3 - Credits
GEO3400 - Communicating Geoscience (CI/DSC) - 3 - Credits
GEO3550 - Sedimentation and Stratigraphy - 4 - Credits
GEO3600 - Geomorphology - 4 - Credits
GEO3700 - Structural Geology - 4 - Credits
GEO3800 - Applied Geoscience Techniques - 3 - Credits
GEO3900 - Geologic Field Methods (CI) - 3 - Credits
GEO4500 - Igneous and Metamorphic Petrology - 4 - Credits
GEO4800 - Senior Seminar - 1 - Credits
GEO4850 - Internship/Co-op - 1 - 4 Credits
GEO4900 - Special Problems - 1 - 4 Credits
GEO5150 - Fluvial Geomorphology - 3 - Credits
GEO5200 - Geology Field Camp - 5 - Credits
GEO5210 - GeoProfessional Field Practicum - 3 - Credits
GEO5360 - Volcanology - 3 - Credits
GEO5390 - Sedimentary Petrology - 3 - Credits
GEO5410 - Advanced Stratigraphy - 3 - Credits
GEO5420 - Ore Deposits - 3 - Credits
GEO5430 - Invertebrate Paleontology and Paleobotany - 3 - Credits

Human Development and Family Studies Department

Human Development and Family Studies

The Human Development and Family Studies (HDFS) Department offers comprehensive undergraduate and graduate programs designed to prepare students for impactful careers serving individuals and families across the lifespan. The undergraduate program emphasizes the study of human development and family relationships through coursework and practical experiences, including a required practicum at diverse sites. Students may find themselves working in community youth centers, school-based mentoring programs, organizations serving youth with disabilities, or juvenile rehabilitation programs. Other opportunities include family resource centers, domestic violence shelters, community health clinics, organizations serving immigrant and refugee families, adult day care centers, hospice care facilities, senior community centers, and organizations focused on Alzheimer's and Dementia care. A background check is required prior to participation in any practicum experience. Students gain valuable skills applicable to various professional settings and are well-prepared for graduate studies or direct employment.

The graduate programs, including PhD, MS, and Master of Marriage and Family Therapy (MMFT), provide advanced education and training in research, teaching, therapy, and administration. These programs offer a strong theoretical and research foundation, with opportunities for specialized study, practica, and independent research within state-of-the-art facilities like child development laboratories and therapy clinics. Graduate students are also required to pass a background check prior to participation in a practicum. Admission to graduate programs requires meeting specific criteria and deadlines. The department actively engages in funded research projects and offers financial assistance through teaching and research assistantships, particularly for PhD students. Detailed information about admission, program requirements, and financial aid can be found on the department's website and in the Graduate Student Handbook.

Degrees Offered: The Department offers the Bachelor of Science (BS) and Bachelor of Arts (BA) in Human Development and Family Studies. Graduate offerings include the Master of Science (MS) in Human Development and Family Studies; the Master of Science (MS) in Marriage and Family Therapy; the Master of Human Development and Family Studies (MHDFS); the Master of Marriage and Family Therapy (MMFT); and the Doctor of Philosophy (PhD) in Human Development and Family Studies.

Full Details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://cehs.usu.edu/hdfs/assessment/undergrad-assessment-plan.php.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

Early Childhood - Certificate
Family Finance - Minor (NOT CURRENTLY OFFERED)
Gerontology - Certificate
General Studies - Human Services - BA, BS
Human Development and Family Studies - Minor
Human Development and Family Studies - BA, BS
Human Development and Family Studies - Child Development Emphasis - BA, BS
Human Development and Family Studies - Family and Community Services Emphasis - BA, BS
Human Development and Family Studies - Human Development Emphasis - BA, BS
Human Development and Family Studies - MHDFS
Human Development and Family Studies: Marriage and Family Therapy Specialization - PhD

Human Development and Family Studies - MS
Human Development and Family Studies - PhD
Mental Health Advocacy and Awareness - Minor
Marriage and Family Therapy - MMFT
Marriage and Family Therapy - MS

Courses

HDFS1010 - Balancing Work and Family (BSS) - 3 - Credits
HDFS1500 - Human Development Across the Lifespan (BSS) - 3 - Credits
HDFS2000 - Careers in Human Development and Family Studies (HDFS) - 1 - Credits
HDFS2100 - Family Resource Management (BSS) - 3 - Credits
HDFS2200 - Special Topics in Human Development and Family Studies - 3 - Credits
HDFS2400 - Couple and Family Relationships (BSS) - 3 - Credits
HDFS2450 - Consumer and Family Economic Issues (BSS) - 3 - Credits
HDFS2600 - Seminar in Early Childhood Education - 2 - Credits
HDFS2605 - Early Childhood Education Practicum - 2 - Credits
HDFS2660 - Parenting and Child Guidance - 3 - Credits
HDFS3100 - Abuse and Neglect in Family Context - 3 - Credits
HDFS3110 - Human Sexuality - 3 - Credits
HDFS3130 - Research Methods (QI) - 3 - Credits
HDFS3210 - Families and Cultural Diversity (CI) - 3 - Credits
HDFS3350 - Family Finance (DSS) - 3 - Credits
HDFS3450 - Consumer Credit Problems - 3 - Credits
HDFS3500 - Infancy and Childhood - 3 - Credits
HDFS3540 - Adult Development and Aging - 3 - Credits
HDFS3550 - Infant Lab - 1 - Credits
HDFS3560 - Human Development Lab - 1 - Credits
HDFS3570 - Youth and Adolescence - 3 - Credits
HDFS3700 - Mental Health Advocacy and Awareness - 3 - Credits
HDFS4220 - Family Crises and Interventions - 3 - Credits
HDFS4230 - Family and Social Policy - 3 - Credits
HDFS4240 - Social and Family Gerontology - 3 - Credits
HDFS4250 - Addictions and the Family - 3 - Credits
HDFS4260 - Family Life Education Methods - 3 - Credits
HDFS4270 - Research in Human Development and Family Studies - 1 - 6 Credits
HDFS4350 - Advanced Family Finance - 3 - Credits
HDFS4420 - Motivation and Medication in Addiction Treatment/Recovery - 3 - Credits
HDFS4460 - Financial Counseling and Coaching - 3 - Credits
HDFS4550 - Preschool Methods and Curriculum - 3 - Credits
HDFS4830 - Senior Capstone Project - 1 - 6 Credits
HDFS4900 - Professional Development and Pre-Practicum (CI) - 3 - Credits
HDFS4930 - Practicum in Mental Health - 1 - Credits
HDFS4940 - Gerontology Integration - 1 - Credits
HDFS4950 - Research Practicum in Human Development and Family Studies - 1 - 12 Credits
HDFS4960 - Practice Teaching in Child Development Laboratories - 3 - 6 Credits
HDFS4970 - Gerontology Practicum - 3 - Credits
HDFS4980 - Practicum in Human Development and Family Studies - 1 - 12 Credits
HDFS4990 - Pre-Clinical Practicum in Human Development and Family Studies - 1 - 12 Credits
HDFS5330 - HUD Certification Lab - 1 - Credits
HDFS5340 - Housing Finance and Regulations - 3 - Credits
HDFS5550 - Interdisciplinary Workshop - 1 - 3 Credits
HDFS5950 - Financial Counseling Practicum - 3 - Credits
HDFS6010 - Family Research and Application - 3 - Credits
HDFS6020 - Human Development Research and Application - 3 - Credits
HDFS6031 - Research Methodology - 3 - Credits
HDFS6040 - Economics and Financial Literacy in the Family - 3 - Credits
HDFS6060 - Human Development Theories - 3 - Credits
HDFS6070 - Family Theories - 3 - Credits
HDFS6100 - Meta-Analysis and Literature Review - 3 - Credits
HDFS6210 - Cultural Diversity in Families - 3 - Credits
HDFS6220 - Interpersonal Family Relationships - 3 - Credits
HDFS6230 - Family and Social Policy - 3 - Credits
HDFS6240 - Race, Gender, and Social Justice - 3 - Credits
HDFS6300 - Ethical Systemic Practice Seminar - 1 - Credits
HDFS6305 - Systemic Assessment and Diagnosis Seminar - 1 - Credits
HDFS6310 - Introduction to Systemic Family Theory and Practice - 3 - Credits
HDFS6320 - Theories and Models of Systemic Family Therapy - 3 - Credits
HDFS6325 - Gender and Diversity in Systemic Family Therapy - 3 - Credits
HDFS6330 - Couple and Sex Therapy - 3 - Credits
HDFS6340 - Collaborative Health Care and Psychopharmacology - 3 - Credits
HDFS6350 - Treating Addictions, Trauma, and Violence in Couples and Families - 3 - Credits
HDFS6355 - Child and Family Play Therapy - 3 - Credits
HDFS6360 - Ethical and Professional Development in Systemic Family Therapy - 3 - Credits
HDFS6370 - Psychopathology and Systemic Assessment - 3 - Credits
HDFS6380 - Applying Scholarly Research and Systemic Family Treatment - 3 - Credits
HDFS6390 - Practicum in Systemic Family Therapy - 1 - 8 Credits
HDFS6400 - Readings and Conference - 1 - 6 Credits
HDFS6420 - Housing Policy and Issues - 3 - Credits
HDFS6500 - Master of Human Development and Family Studies Capstone - 3 - Credits
HDFS6510 - Development in Infancy - 3 - Credits
HDFS6520 - Development in Childhood - 3 - Credits
HDFS6530 - Development in Adolescence - 3 - Credits
HDFS6540 - Adulthood and Aging - 3 - Credits
HDFS6900 - Topical Seminar in Human Development and Family Studies - 1 - 3 Credits
HDFS6910 - Parenting - 3 - Credits
HDFS6920 - Aging - 3 - Credits
HDFS6960 - HDFS Graduate Orientation - 1 - Credits
HDFS6961 - HDFS Teaching Assistantship Orientation - 1 - Credits
HDFS6970 - Thesis Research - 1 - 6 Credits
HDFS6980 - Master of Human Development and Family Studies Practicum - 1 - 9 Credits
HDFS6990 - Continuing Graduate Advisement - 1 - 9 Credits
HDFS7010 - Family Research and Application - 3 - Credits
HDFS7020 - Human Development Research and Application - 3 - Credits
HDFS7032 - Multivariate and Dyadic Data Analysis in Human Development and Family Studies - 3 - Credits
HDFS7033 - Dyadic and Longitudinal Data - 3 - Credits
HDFS7034 - Extant/Secondary Data Analysis - 3 - Credits
HDFS7060 - Research/Theory Human Development - 3 - Credits
HDFS7070 - Advanced Research/Theory in Family Relations - 3 - Credits
HDFS7080 - Professional Development - 3 - Credits
HDFS7100 - Meta-Analysis and Literature Review - 3 - Credits
HDFS7210 - Cultural Diversity in Families - 3 - Credits
HDFS7220 - Interpersonal Family Relationships - 3 - Credits

Instructional Technology & Learning Sciences Department

Instructional Technology and Learning Sciences

Department Head: Andrew Walker
Location: Emma Eccles Jones Education 215A
Phone: (435) 797-2614 | **FAX:** (435) 797-2693
E-mail: andy.walker@usu.edu
Website: itls.usu.edu/

Degrees offered: Bachelor of Science (BS), Master of Arts (MA), Master of Education (MEd) Educational Technology and Learning Sciences, Master of Science (MS), Education Specialist (EdS), and Doctor of Philosophy (PhD) in Instructional Technology and Learning Sciences

Graduate specializations: *MEd*—School Library Media Administration

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at itls.usu.edu/about/assessment.

Undergraduate Programs

Objectives and Requirements

The Human Experience Design and Interaction (HEDI) program focuses on instructional design, video game design, product design, or multimedia design, all with an emphasis on being human-centered. HEDI has core classes that include design, product/project management, how people learn, and how to visualize and present data to key stakeholders. Students will also specialize in two emphasis areas of their own choosing. Emphasis options include game studies, marketing, new venture management, multimedia, culturally responsive design, product development, and technical communication.

A GPA requirement of 2.0 and completion of 60 credits are required for admission to the program. Other criteria considered includes prior work experience, aptitude for technology, and experience with multimedia.

The program is geared toward students who have already completed an associate degree, either through USU or another institution. However, students can be accepted into the program before completing an associate degree, even as incoming first-year students. ITLS coursework is only available online.

Two minors are offered, one in **School Library Media Administration** and another in **Multimedia Development.**

Graduate Programs

Instructional technology is a systematic way of analyzing, designing, developing, implementing, and evaluating the processes of learning and teaching with specific objectives based on research in human learning and communication. It employs a combination of human and non-human resources to bring about more effective instruction. Instructional technology includes aspects of instructional design, product development, interactive learning technologies, multimedia, distance education, and library and information literacy. Each aspect of the field has unique contributions to make to the teaching-learning process.

The department offers a specialization in School Library Media Administration. A program emphasis in online learning communities in education and training is also offered.

Graduates are in demand in business and industrial settings, as well as in education, because of their preparation in training and instructional design. Admission to the graduate program is open to all students regardless of their undergraduate preparation.

Admission Requirements

See general admission requirements. The EdS, MS, MA, and MEd admission requirements include a 3.0 GPA for the last 60 semester credits (90 quarter credits) and an MAT score or GRE verbal and quantitative scores at or above the 40th percentile. Those applying for the PhD program must have GRE verbal and quantitative test scores at or above the 40th percentile. Demonstrated writing proficiency is required of all applicants. International students must have a minimum 79 TOEFL or 6 IELTS language proficiency score unless they have completed a Master's degree at a U.S. university.

Applications for PhD and EdS degree programs must be submitted to the School of Graduate Studies by January 6th. Applications for MS, MEd, and MA programs must be submitted to the School of Graduate Studies by April 1st for a Fall start or October 15th for a Spring start. Space permitting, additional qualified candidates will be considered up to two months before the next semester starts. Students who wish to be considered for financial aid must submit applications by January 31st for the coming academic year. A required three-day orientation will be held in August before classes start.

Applicants for the EdS and PhD programs who do not hold a master's degree in Instructional Technology must complete additional course requirements.

No applications will be considered until all required information is received by the School of Graduate Studies.

Course Requirements

Course requirements for all degrees are dependent upon the area of emphasis and are individually planned by the student and the supervisory committee. For planning materials and program details, contact the department.

Financial Assistance

Fellowships, assistantships and other financial support are available and awarded on a competitive basis. Apply through the department.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

General Studies - Human Services - BA, BS
Human Experience Design and Interaction - BS
Instructional Coaching - Post-Bachelor's Certificate
Instructional Technology and Learning Sciences - EdS
Instructional Technology and Learning Sciences - MA
Instructional Technology and Learning Sciences - MEd
Instructional Technology and Learning Sciences - MS
Instructional Technology and Learning Sciences - PhD
Marketing Design - Minor
Multimedia Development - Minor
School Library Media Administration - Post-Bachelor's Certificate
School Library Media Administration - Certificate
School Library Media Administration - Minor

Courses

ITLS1870 - Current Issues Seminar - 1 - 3 Credits
ITLS2000 - HEDI Orientation - 1 - Credits
ITLS2500 - Technology Enabled Instruction - 3 - Credits
ITLS2890 - Work Experience Equivalent - 1 - 12 Credits
ITLS2900 - Independent Study - 1 - 4 Credits

ITLS7900 - Independent Study - 1 - 6 Credits
ITLS7910 - Independent Research - 1 - 6 Credits
ITLS7960 - Practicum, Educational Specialist - 1 - 9 Credits
ITLS7970 - Dissertation - 1 - 18 Credits
ITLS7990 - Continuing Graduate Advisement - 1 - 9 Credits

Kinesiology and Health Science Department

Kinesiology and Health Science

Department Head: David Fukuda
Location: Health, Physical Education and Recreation (HPER) 122A
Phone: (435) 797-1495 | **FAX:** (435) 797-3759
E-mail: khs@usu.edu
Website: cehs.usu.edu/khs

Graduate Program Coordinator: Melissa Johnson, HPER 122J, (435) 797-1495, melissa.johnson@usu.edu

Undergraduate Academic Advisors:
Raquel Friddle, HPER 122D, khsadvising@usu.edu
Zoyee Thomas, HPER 122F, khsadvising@usu.edu
Jana Johnson, HPER 122G, khsadvising@usu.edu
For advising appointments, schedule online here: cehs.usu.edu/advising.

Undergraduate degrees offered: Bachelor of Science (BS) in Health Education and Promotion; BS in Kinesiology; BS in Recreation Administration

Undergraduate emphases/tracks: BS in Kinesiology—Exercise Science and Pre-Physical Therapy; BS in Recreation Administration - Sports Management, Public Recreation, Outdoor Adventure Leadership, and Program and Event Management

Undergraduate minors: Outdoor Adventure Leadership; Parks & Recreation; Yoga Studies

Undergraduate Certificates of Proficiency: Health, Wellness, and Equity; Outdoor Adventure Leadership; Mind Body Wellness

Graduate degrees offered: Master of Science (MS) in Kinesiology; Master of Education (MEd) in Applied Sport Coaching; Master of Public Health (MPH) in Health Education and Promotion; Master of Sports Management (MSM)

Graduate specialization: *MS*—Exercise Science

Full details of the learning objectives, assessment plan, student outcomes and evidence of continuous improvement for these programs of study can be found at http://cehs.usu.edu/khs/assessment.

Academic Programs

Objectives

The Kinesiology and Health Science (KHS) Department at Utah State is committed to educating and serving students and members of both local and extended communities in the fields of kinesiology, health science, and recreation administration sharing the common purpose to promote and enhance human health, well-being, and performance. Our department works toward this goal as we prepare students for careers in these fields through both our undergraduate and graduate programs.

Within our department, there are four main classifications of our programs: kinesiology, health science, recreation administration, and activity.

Kinesiology is the scientific study of human movement, exploring how physical activity and sport impact individual and community well-being, quality of life, and society at large. Students studying in disciplines in this area can pursue careers in exercise science, physical therapy, physical education, sport psychology, fitness centers, and other similar professions.

Health science focuses on the knowledge of health, emphasizing the related behaviors, social, and cultural factors, and the application of that knowledge to improve individual and population health over the life span. Students studying within this discipline can pursue careers in health agencies, health care organizations, international health programs and aid agencies, community social services organizations, and other similar organizations.

Recreation administration focuses on preparing individuals interested in managing meaningful activities and programs, combining elements of business management, event planning, and community engagement to help improve the quality of life for those they serve. This discipline focuses on providing opportunities for people to engage in leisure activities, sports, fitness programs, cultural events, and other forms of recreation. Students studying within this discipline can pursue a variety of careers in federal parks, recreation departments, community agencies, commercial agencies, and other related fields.

Our department also offers an extensive elective **lifetime activity program (LAP)**, with courses available to all USU students. The LAP program offers various physical activities promoting overall well-being, community engagement, and networking. The department and program collaborate with skilled instructors and local businesses to allow students to choose from many activities with multiple sections each semester. Activities provide fun, fitness, and academic credit opportunities. The program is available at different campus locations and aims to enhance students' knowledge of sports, health, and fitness.

Undergraduate Programs
The Kinesiology and Health Science Department offers undergraduate programs of study designed to prepare USU students for successful careers in one of three areas: Health Education and Promotion, Kinesiology, or Recreation Administration. Preparation is accomplished through well-rounded, rigorous course requirements.

Undergraduate Student Advising
Suggested semester-by-semester four-year plans for students working toward a bachelor's degree are available through the Kinesiology and Health Science Department.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests. Appointments to meet with an advisor can be made online through cehs.usu.edu/advising/.

Major requirement sheets, which provide detailed information about requirements for departmental majors, can be obtained from the department and through the KHS website cehs.usu.edu/khs/graduate/student-resources/tracking-sheets.

Activity Courses
USU students are served by an extensive elective lifetime-skill activity course program. The number and diversity of courses encourage students to increase their lifetime participation skills and enjoy opportunities, creativity, and expression. Students may also achieve and maintain a high level of personal fitness and adopt a proactive lifestyle conducive to health and well-being.

University Honors Program
The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Graduate Programs

Students in the Kinesiology and Health Science Department are prepared to enter competitive professional fields by working with mentors to discover knowledge and deliver evidence-based research to rural areas of the state. The KHS department is home to a variety of disciplines and offers the following graduate degrees Master of Education (MEd) in Applied Sport Coaching, Master of Public Health (MPH) in Health Education and Promotion, Master of Science in Kinesiology (MS), and a Master of Sports Management (MSM).

Potential students are encouraged to visit the program pages on the KHS website for the program(s) they are interested in to learn more: cehs.usu.edu/khs/graduate/index.

Admissions
Students desiring to enroll in one of the graduate programs in the KHS department must be admitted to the Utah State University School of Graduate Studies. As students start an application they will create a log-in that will allow them to come back in and complete their applications. The application has two parts, the initial application and the supplemental items. Students must complete the initial application and pay the application fee before they can access the supplemental materials.

Each program has supplemental materials required specific to their program. These are listed in the application, but can also be reviewed through the KHS website: cehs.usu.edu/khs/graduate/index.

Graduate Student Advising
Students in the KHS department are advised by both the department graduate program coordinator (GPC) and their Major Professor (Faculty Advisor/Mentor). Both roles can and will help students to successfully fulfill program and graduation requirements and navigate through the process of getting a degree.

Graduate Assistantships
The KHS Department offers graduate assistantship (GA) opportunities for students based in Logan, Utah who have been accepted into one of the department's graduate programs.

Students interested in these positions complete the GA application, submitted directly to the department. This is separate from the admissions application, submitted to the Graduate School. The deadline for both applications is March 1 to be considered for a GA position. Positions are awarded for the coming Fall and Spring semesters. Details about the GA application requirements can be accessed through the KHS website: https://cehs.usu.edu/khs/graduate/student-resources/grad-assistantships

Financial Support

Scholarship opportunities may be available for both undergraduate and graduate students to apply for depending on your degree or program in Banner. To receive a scholarship, you must be a student with a major housed in the Emma Eccles Jones College of Education and Human Services, pursuing coursework each semester in your major field, and taking between 12-18 credits for an undergraduate and 9 credits for graduate each semester. Limited scholarships are available for part time students.

Scholarship applications typically open for the coming year in mid-December or early January. The application is at the USU General Scholarship Application. A helpful video about the application and common questions and answers are found on the USU scholarship page with the application.

In addition, students are strongly encouraged to apply for financial aid by completing a FAFSA application each year. Many scholarships require the applicant to show financial need. Financial need must be shown through a FAFSA application, which must be on record at the university. The process can often take a week or two, so please apply early. Apply online for the FAFSA.

For additional information, students are encouraged to visit the Emma Eccles Jones College website: cehs.usu.edu/academics/scholarships/index.

Student Research and Engagement Opportunities

Research is the hallmark of a science degree (e.g., Bachelor of Science, Master of Science). Students interested in health, kinesiology, and recreation research are encouraged to assist faculty members with grant writing, data collection, data analysis, and report writing. Additionally, students can assist faculty members with submissions of scholarly presentations and articles.

Research areas include health promotion, health education, exercise science, corporate wellness, sport psychology, sport in society, biomechanics, neuromechanics, pedagogy, and other related fields. Research laboratories in the KHS department include the Biomechanics Lab, the Body Composition Lab, the Exercise Physiology Lab, the Kids in Motion Lab, the Neuromechanics Lab, the Neuromuscular Research Lab, the Perception-Action Lab, the Sensory Motor Behavior Lab, the Sport Psychology Lab, and the John Worley Sport Medicine Clinical Research Center. Students interested in being involved with one of these labs should contact the lab director: cehs.usu.edu/khs/labs/overview.

Research is not the only opportunity for students to participate; students also have the option to engage in internship experiences. The purpose of an internship is for students to have the chance to observe professionals and gain experience in career areas of interest. Internships also provide hands-on, practical experience in which students can apply their knowledge in a real-world work setting, providing a benchmark for future careers.

Beyond the classroom, students can engage in the department through participation in clubs and other activities planned and provided for students, cehs.usu.edu/khs/undergrad/clubs.

Additional Information

Additional information about the department, academic programs, faculty and instructors, and other information may be obtained from the Kinesiology and Health Science Department, or check the departmental home page at cehs.usu.edu/khs/index.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

Applied Sport Coaching - MEd
Brain and Learning - Certificate
Coaching - Certificate (NOT CURRENTLY OFFERED)
Health Education Teaching - Minor
Kinesiology - Exercise Science Emphasis - BS
Kinesiology - MS
Kinesiology: Pre-Physical Therapy Emphasis - BS
Mind-Body Wellness - Certificate
Master of Applied Kinesiology - MFP (NOT CURRENTLY OFFERED)
Outdoor Adventure Leadership - Minor
Outdoor Adventure Leadership - Certificate
Parks and Recreation - Minor
Physical Education Teaching - Minor
Physical Education Teaching - Post-Bachelor's Certificate (NOT CURRENTLY OFFERED)
Public Health - Health Promotion: Health Science Emphasis - BS
Master of Public Health: Health Education and Promotion Specialization - MPH
Recreation Administration: Outdoor Adventure Leadership Emphasis - BS
Recreation Administration: Program and Event Management Emphasis - BS
Recreation Administration: Public Recreation Emphasis - BS
Recreation Administration - Sport Management - BS
Sports Management - MSM
Yoga Studies - Minor

Courses

HEP1200 - Community and Public Health Careers - 3 - Credits
HEP1500 - Introduction to Global Health (BSS) - 3 - Credits
HEP2000 - First Aid and Emergency Care - 2 - Credits
HEP2300 - Cardiopulmonary Resuscitation - 1 - Credits
HEP2500 - Health and Wellness - 2 - Credits
HEP3000 - Drugs and Human Behavior - 3 - Credits
HEP3200 - Consumer Health - 3 - Credits
HEP3400 - Stress Management - 3 - Credits
HEP3600 - Functions of Community & Public Health (CI) - 3 - Credits
HEP3700 - Introduction to Epidemiology for Health Educators - 3 - Credits
HEP3800 - Health Care Systems and Administration - 3 - Credits
HEP3900 - Social Marketing in Health Education - 3 - Credits
HEP4000 - Health Services Administration - 3 - Credits
HEP4100 - Professional Development in Health Promotion - 3 - Credits
HEP4200 - Community-Based Program Planning, Implementation, and Evaluation - 3 - Credits

HEP4250 - Advanced Cooperative Work Experience - 1 - 15 Credits
HEP4400 - Community and Organizational Leadership, Policy, and Advocacy - 3 - Credits
HEP4600 - Health Science Internship - 1 - 3 Credits
HEP4700 - Senior Thesis - 1 - 6 Credits
HEP4800 - Human Diseases - 3 - Credits
HEP5000 - Health Trends Across Communities (CI) - 3 - Credits
HEP5250 - Global Health & Service Learning - 3 - Credits
HEP5400 - Prevention Strategies for Obesity and Disordered Eating - 3 - Credits
HEP5700 - Special Topics in Health - 1 - 6 Credits
HEP5900 - Independent Study - 1 - 3 Credits
HEP5950 - Independent Research - 1 - 3 Credits
HEP6000 - Advanced Program Planning and Evaluation for Public Health - 3 - Credits
HEP6010 - Communication for Public Health - 3 - Credits
HEP6020 - Introduction to Biostatistics and Epidemiology - 3 - Credits
HEP6050 - Foundations of Public Health - 3 - Credits
HEP6120 - Foundations of Global Health - 3 - Credits
HEP6150 - Global Maternal and Child Health - 3 - Credits
HEP6200 - Health Administration, Organizations, and Systems - 3 - Credits
HEP6250 - Graduate Cooperative Work Experience - 1 - 15 Credits
HEP6350 - Social Determinants of Health - 3 - Credits
HEP6400 - Policy, Leadership, and Advocacy in Public Health - 3 - Credits
HEP6450 - Research Methods in Population Health - 3 - Credits
HEP6550 - Qualitative Methods for Public Health - 3 - Credits
HEP6600 - Practicum in Health Promotion - 3 - Credits
HEP6670 - Principles of Grant Writing in Public Health - 3 - Credits
HEP6700 - Special Topics in Health - 1 - 6 Credits
HEP6800 - Health Behavior - 3 - Credits
HEP6850 - Capstone in Public Health - 3 - Credits
HEP6900 - Independent Study - 1 - 3 Credits
HEP6950 - Independent Research - 1 - 3 Credits
HEP6990 - Continuing Graduate Advisement - 1 - 12 Credits
KIN1000 - Designing Your Future in Health, Fitness, and Recreation - 2 - Credits
KIN1500 - Basics of Human Anatomy and Physiology for Applied Sciences - 3 - Credits
KIN2000 - Introduction to Kinesiology - 2 - Credits
KIN2020 - Introduction to Physical Therapy - 2 - Credits
KIN2050 - Sport Rules and Regulations of the Utah High School Athletic Association - 1 - Credits
KIN2100 - Skills 1 (Swimming, Volleyball, Football) - 1 - Credits
KIN2200 - Skills 2 (Lifetime Activities) - 1 - Credits
KIN2300 - Skills 3 (Softball, Basketball, Soccer) - 1 - Credits
KIN2400 - Skills 4 (Tennis, Badminton, Track and Field) - 1 - Credits
KIN2710 - Introduction to Athletic Training - 3 - Credits
KIN3000 - Principles of Health and Fitness - 3 - Credits
KIN3010 - Yoga Technique I - 3 - Credits
KIN3011 - Introduction to Yoga Studies - 1 - Credits

KIN3020 - Yoga Teaching Methodology I - 3 - Credits
KIN3021 - Yoga Technique II - 3 - Credits
KIN3050 - Physical Education in the Elementary School - 3 - Credits
KIN3070 - Yoga Anatomy - 3 - Credits
KIN3100 - Athletic Injuries - 3 - Credits
KIN3200 - Motor Control and Learning (CI) - 3 - Credits
KIN3250 - Anatomical Kinesiology - 3 - Credits
KIN3300 - Clinical Experience I - 1 - Credits
KIN3500 - Adapted Physical Education - 3 - Credits
KIN3700 - Meditation and Mindfulness: History and Practice - 3 - Credits
KIN3830 - The History of Yoga - 3 - Credits
KIN3900 - Fitness Administration - 3 - Credits
KIN4000 - Mental Aspects of Sports Performance - 3 - Credits
KIN4015 - Yoga and Nature - 3 - Credits
KIN4100 - Exercise Physiology - 4 - Credits
KIN4200 - Biomechanics (QI) - 4 - Credits

Department Head: Keith Christensen
Location: Fine Arts Visual 230
Phone: (435) 797-0500 | **FAX:** (435) 797-0503
Website: laep.usu.edu/

Undergraduate Advisement:

College of Agriculture and Applied Sciences Student Services Center, Deandra Harps, AGRS 417, (435) 797-9245, deandra.harps@usu.edu

Graduate Program Director: Carlos Licon, Fine Arts Visual 256, (435) 797-3978, carlos.licon@usu.edu

Graduate Program Questions: Carlos Licon, Fine Arts Visual 256, (435) 797-3978, carlos.licon@usu.edu

Degrees offered: Bachelor of Landscape Architecture (BLA) and Master of Landscape Architecture (MLA), Bachelor of Science in Environmental Planning (BsEP) and Master of Science in Environmental Planning (MsEP), Combined Bachelor and Master of Landscape Architecture (B+MLA), Combined Bachelor and Master of Environmental Planning (BLA+EP), and Ph.D. in Landscape Architecture and Environmental Planning (PhD). BLA and first professional MLA programs are fully accredited by the American Society of Landscape Architects. Certificates in Landscape Architecture, Environmental Planning, and Advanced Design, Geospatial, and Visualization Technologies.

Department Mission Statement

The mission of the Department of Landscape Architecture and Environmental Planning is to prepare and inform exceptional practitioners, scholars, leaders, and citizens to address the challenges of landscapes and communities across the globe. We do so to empower individuals and communities to make aesthetically, ecologically, and socially responsible landscape planning and design decisions in support of people and the environment.

Undergraduate Programs

Admission and Graduation Requirements

The Bachelor of Science in Environmental Planning (BsEP) degree program is an intensive four-year course of study. Any student admitted to USU is eligible for enrollment in the program, but must maintain a 2.5 institutional GPA to remain in good standing.

The Bachelor of Landscape Architecture (BLA) degree program is an intensive four-year studio-based course of study, fully accredited by the American Society of Landscape Architects. Accreditation standards require the department to maintain a reasonable faculty/student ratio. Space in the program is restricted by available facilities and faculty size. Admission to the upper division is limited to students who are determined by the faculty to have the best potential for academic success. Up to 30 students may be matriculated into the upper division of the BLA program.

Matriculation Requirements

Students applying for matriculation must have:

- LAEP 1200 - Introduction to Graphics and Illustration
- LAEP 1300 - Digital Drafting, Illustration, and Modeling
- LAEP 1350 - Theory of Design
- LAEP 2300 - History of Landscape Architecture (BHU)
- LAEP 2500 - Construction Materials and Detailing
- LAEP 2600 - Landscape Construction I (QI)
- LAEP 2700 - Analysis Design I
- LAEP 2720 - Analysis and Design 2
- PSC 2620 - Woody Plant Materials: Trees and Shrubs for the Landscape
- Submission of an application to matriculate consisting of:
    - A letter of intent
    - A portfolio demonstrating evidence of core competencies and visual/graphic communication ability

Portfolios and letters of intent are to be submitted by the last Monday in March. The final selection of students to matriculate to the upper division is a decision of the LAEP faculty. The review of students for matriculation will take place during the week following spring semester final exams, and students will be notified as soon as possible thereafter.

Students who have had LAEP courses waived or covered by articulation from another institution will have their GPA calculated only on the basis of LAEP grades actually earned at USU.

Transfer students from other programs of landscape architecture who have completed the equivalent of the lower-division USU LAEP coursework may apply for admission to the upper division of the program by submitting the following:

- A portfolio
- Letter of intent
- Transcription of grades
- Description of landscape architecture courses taken

Computer Requirements

Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning.

Course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students in the BLA program (beginning with LAEP 1300) must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer, preferably a laptop, which meets the configuration requirements specified by the LAEP Department.

Recommended High School Courses

High school students planning to major in landscape architecture may enhance their preparation with courses in art, natural sciences, social sciences, horticulture, computer applications, and math through college algebra.

Sample Four-year Plan for Landscape Architecture Major

A semester-by-semester four-year plan for students working toward a Landscape Architecture - BLA or an Environmental Planning BsEP degree can be found on the department website and in the online catalog.

Students should consult with the College of Agriculture and Applied Sciences student advisor to develop a plan of study tailored to their individual needs and interests.

Study Abroad

The department supports a longstanding cooperative agreement with the University of Ljubljana, Slovenia where students can study for a semester. Approved courses of study in design and planning programs offered by other institutions may count toward the travel requirement; however, course substitutions are subject to faculty approval. Students can also travel to Germany to study for a semester at the University of Anhalt in Bernburg, Germany.

Faculty-Sponsored Field Study Travel

The department has a long tradition of a professionally oriented, faculty-led "Spring Break" trip, which is required for undergraduate BLA students under LAEP 4350. Recent trips have included San Francisco, Israel, Portugal, Paris, Japan, Los Angeles, Portland, Seattle, Vancouver, Boston, Washington, DC, and New York.

Individual Travel

Undergraduate students desiring to count profesionally oriented individual travel toward their degree will need to enroll in LAEP 4350 - Travel Course. Prior to enrollment, students must submit and have approved a proposal for individual travel/study to the LAEP Travel Coordinator faculty for review. The content, objectives, and outcomes of the proposal will be evaluated for parity with the educational objectives of the travel program. See the LAEP website for details.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For detailed information about requirements for the Bachelor of Landscape Architecture or the Bachelor of Science in Environmental Planning degrees, see the department website.

Internships and Cooperative Education

Many students take advantage of the practical learning opportunities available through internships and cooperative education programs. The student, in cooperation with the department and government agency or private firm, makes the necessary arrangements. Internships and cooperative education experiences are not required for degree completion.

Financial Assistance

The application deadlines for scholarships and financial assistance vary. For current application deadline information, contact the LAEP Department, the USU Financial Aid Office, and the School of Graduate Studies. Acceptance to pursue graduate study does not guarantee the student financial assistance.

Career Opportunities

The Department of Landscape Architecture and Environmental Planning provides education for careers in landscape architectural site planning, design, environmental planning, and management, with special consideration for conditions in the Intermountain West. Graduates are employed by local, state, and federal agencies, as well as by private sector professional firms. LAEP graduates also find employment in academia at both the undergraduate and graduate levels.

Graduate Programs

Landscape Architecture - MLA

The department offers a three-year, first professional degree for students with a bachelor's degree in any area of study. This option allows students having a wide range of undergraduate experience to obtain an accredited degree in landscape architecture that fulfills the educational requirement for professional registration and allows entrance into the field of landscape architecture.

The program for the Master of Landscape Architecture (MLA) emphasizes both traditional site planning and design, as well as broader areas of the profession, such as large-scale regional landscape analysis and planning, open space conservation, historic landscape preservation, and sustainable design. The MLA first professional degree is fully accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects.

The Master of Landscape Architecture program is designed to prepare the student for the landscape architect's challenging role of providing a holistic approach to environmental planning and design. In order for landscape architects to contribute effectively to an interdisciplinary effort, they must be competent in the fundamentals of landscape architecture and also have an understanding of the subject matter of other professions. Landscape architects must master the communication skills necessary to achieve meaningful collaboration. In support of this philosophy, the following are the major objectives of the MLA program.

1. To provide a well-structured curriculum in fundamental professional knowledge and skills.
2. To research, analyze, and resolve land use and design issues related specifically to the Intermountain West. The scope of the program examines national, regional, and local issues; and their impact on the visual, physical, and cultural setting of the Intermountain West.
3. To integrate field experience and research into major graduate studio courses structured around real-world projects.
4. To provide opportunities for each student for exploration and development of an area of concentration as noted elsewhere.
5. To draw upon the regional, national, and international relationships of Utah State University to facilitate a program of academic and professional excellence which will allow the student to achieve eminence in practice, research, or education.

Admission Requirements

The application deadline for consideration in the first round of reviews is March 15. Applications received later than March 15 will be considered as space availability allows.

Computer Requirement

Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning. Therefore, course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students entering the MLA program must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer, preferably a laptop, which meets the configuration requirements specified by the LAEP Department. Consult the departmental website for current specifications.

Course of Study

The graduate program director oversees academic advising of all incoming students until they have selected a thesis topic. A major professor whose interests are closely aligned to those of the student then supervises thesis work. All courses require a minimum grade of C or higher. A total of 80 credits are required for this program.

Landscape Architecture (Advanced Professional Degree) - MLA

The MLA-Advanced Professional degree is a two-year accredited program of study. Applicants must hold baccalaureate degrees in landscape architecture from accredited programs. The advanced degree allows outstanding students to expand their knowledge in areas of special interest under the supervision of a major professor and supervisory committee.

The Graduate Program Director advises all incoming students until they have selected a thesis topic. Once a thesis topic has been identified, it is the students responsibility to seek a major professor and committee members from within the LAEP Department faculty.

Environmental Planning - MS

Informed planning and management of natural resources and systems supersede individual disciplines, requiring an interdisciplinary approach for the successful resolution of environmental issues. The intent of this program's curriculum is to integrate the biophysical disciplines more closely while also addressing the social and political sciences. This degree program is offered by the Department of Landscape Architecture and Environmental Planning in the College of Agriculture and Applied Sciences.

Course of Study

This two-year MS program is comprised of an interdisciplinary core of courses and faculty for addressing complex issues in the areas of bioregional planning and management. Emphasis is placed on four problematic content areas: biophysical, social/demographic, economic, and public policy. The spatial focus is on the planning for large landscape areas with dispersed populations with a primary economic base in agriculture, energy development, tourism/recreation, retirement communities, and natural resources.

The program requires a minimum of 41 graduate-level credits, including 5 credits of work on a thesis or paper/project. Three of the required credits may be in an area of concentration. These credits are to be negotiated with the candidate's major professor and supervisory committee.

Accelerated Master of Landscape Architecture - BLA, MLA

The accelerated Bachelor of Landscape Architecture and Master of Landscape Architecture (BLA+MLA) program allows advanced Landscape Architecture and Environmental Planning (LAEP) undergraduates the opportunity to pursue a combined bachelor's and master's degree program within an accelerated time frame.

The mission of the accelerated BLA+MLA program is to prepare future professionals to address the dynamic issues and scales of landscapes across the Intermountain West and around the world and engage in creative intellectual work that contributes to the theory and practice of landscape architecture.

To be accepted into the combined BLA+MLA program, students must apply for the Master's of Landscape Architecture Degree during their junior year. If accepted, they begin taking graduate-level courses during their senior year. Students only pay graduate-level tuition during their fifth year of study.

Accelerated Bachelor of Landscape Architecture and Master of Science in Environmental Planning - BLA, MsEP

The accelerated Bachelor of Landscape Architecture and Master of Science in Environmental Planning (BLA+EP) program allows advanced Landscape Architecture and Environmental Planning (LAEP) undergraduates the opportunity to pursue a combined bachelor's and master's degree program within an accelerated time frame.

The mission of the accelerated BLA+EP program is to prepare future professionals to recognize the reciprocal relationship between the biophysical attributes of a region and the human dimensions of settlement and culture; build expertise in landscape level analysis and planning, and how to prepare to serve as leaders within a trans-disciplinary environment to develop better alternatives for land-use decisions and policy. This mission will be accomplished through a core set of undergraduate and graduate landscape architecture and environmental planning courses and experiences.

To be accepted into the combined BLA+EP program, students must apply to the Environmental Planning Master's Degree via during their junior year. If accepted, they begin taking graduate level courses during their senior year. Students only pay graduate level tuition during their fifth year of study.

Landscape Architecture and Environmental Planning - PhD

The interdisciplinary Doctor of Landscape Architecture and Environmental Planning prepares leaders and future faculty in landscape architecture by engaging in creative intellectual work that contributes to the theory and practice of landscape architecture. Candidates apply critical theories and methods in landscape architecture to address the dynamic issues and scales of natural and built landscapes in the context of human systems. All courses require a minimum grade of C or higher. A total of 60 credits are required for this program.

FACULTY - College of Agriculture and Applied Sciences

Programs

Advanced Design, Geospatial, and Visualization Technologies - Institutional Certificate of Proficiency
Design Entrepreneurship - Institutional Certificate of Proficiency
Digital Modeling and Visualization - AS
Digital Modeling and Visualization - Institutional Certificate of Proficiency
Environmental Planning - Minor
Environmental Planning - BS

Management Department

Management

Department Head: Konrad Lee

Administrative Assistant : Julie Pond, EBB 306 (435) 797-1789, julie.pond@usu.edu
Location: Eccles Business Building (EBB) 306
Phone: (435) 797-1789
Website: huntsman.usu.edu/management/

Undergraduate Advisor: Kaylee Riggs, EBB 309, (435) 797-2272, kaylee.riggs@usu.edu

Master of Human Resources: Graduate Program Directors:
One-Campus: Chris Hartwell, EBB 302A, (435) 797-5782, chris.hartwell@usu.edu
Professional Program: Bruce Boucher, Salt Lake Center 535, (435) 646-7723, bruce.boucher@usu.edu

Graduate Program Coordinator: Heather Buatte, EBB 315, (435) 797-9753, heather.buatte@usu.edu

Degrees Offered

Majors: Bachelor of Science (BS) and Bachelor of Arts (BA) in Management

Undergraduate Minors Offered: Business, Healthcare Management, Human Resource Management, Operations and Supply Chain Management, People and Organizations

Graduate Programs: Master of Human Resources (MHR)

Assessment

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at huntsman.usu.edu/assessment/.

Financial Assistance

The Huntsman School offers scholarships to undergraduate students. Each graduate program has unique scholarships, fellowships, assistantships, and waivers available. Details about available Huntsman School scholarships can be found at huntsman.usu.edu/scholarships.

Undergraduate Program Requirements

Huntsman School of Business Admission Requirements

First-Year and Transfer Students are admitted to the Huntsman School of Business based on USU's Admission Requirements.

Current USU Students in good standing qualify for admission to a Huntsman School major.

Huntsman School Admission Details: https://huntsman.usu.edu/undergraduate/apply

All students enrolled at USU are required to satisfy the General Education Requirements and the University Studies Requirements of the university.

Matriculation Requirements and Transfer Limitation

To earn a bachelor's degree in a Huntsman School major, at least 50 percent of the required Huntsman School credits must be earned from coursework taken from the Utah State University Huntsman School of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, and of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School of Business credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Data Analytics and Information Systems, Economics and Finance, Management, and Marketing and Strategy.

Graduation Requirements

To be recommended by the department for graduation, majors in the Department of Management must have a grade point average of at least 2.50 in their upper-division Huntsman School of Business acumen and major requirement courses, a C or better in HSB business acumen courses, and an overall GPA of 2.0. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Four-Year Degree Plan (8 Semesters)

A four-year degree plan for the Management major is available in the Huntsman School's FJ Management Center for Student Success, EBB 309, and at https://huntsman.usu.edu/advising/majors/management_major.

Graduate Program

The Master of Human Resources (MHR) program prepares students to be leaders and strategic thinkers in identifying, attracting, and developing talent, putting them on the path towards senior roles managing human capital. Recent graduates have begun their HR careers at Fortune 100 companies including Chevron, Ford Motor Company, General Electric, Honeywell, and TIAA.

At least 50 percent of the Huntsman School of Business credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Economics and Finance, Management, Data Analytics & Information Systems, and Marketing & Strategy.

Graduation Requirements

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School of Business credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Economics and Finance, Management, Data Analytics and Information Systems, and Marketing and Strategy.

An overall GPA of 2.0 and a major GPA of 2.5 is required for graduation.

Four-Year Degree Plan (8 Semesters)

A four-year degree plan for the Marketing major can be found in the catalog and at the URL below:

- **Marketing**: https://huntsman.usu.edu/advising/majors/marketing_major

Graduate Programs

The USU Huntsman MBA prepares students to manage business in a variety of areas, setting them apart in their current career field or once they enter the workforce. Students from all backgrounds and undergraduate degrees can earn an MBA.

USU's Huntsman School of Business started offering degrees in 1894 and employs faculty with real-world experience. The hands-on curriculum delivered by world-renowned faculty gives students the education they need to land the career they want. The school has long held prestigious accreditation from the Association to Advance Collegiate Schools of Business (AACSB) International.

The mission of the MBA program is to provide students with a relevant and rigorous background in business, increase student problem-solving and critical analysis skills, and develop the next generation of business leaders. Students are trained to lead, manage, and improve business performance. Students learn how to commercialize profitable ideas more efficiently, economically, and successfully. They possess the know-how to improve existing businesses and create new businesses, and are armed with cutting-edge intelligence and analytic tools to gain a deeper and clearer understanding of both domestic and global markets, customers, and competition.

FACULTY - Jon M. Huntsman School of Business

Programs

Consulting - Minor (NOT CURRENTLY OFFERED)
Consumer Psychology - Minor
Entrepreneurship - Minor
International Business - Institutional Certificate of Proficiency
International Business - Minor
International Business - BA, BS (NOT CURRENTLY OFFERED)
Leadership and Management - Minor
Marketing Design - Minor
Marketing - Minor
Marketing - BA, BS
Master of Business Administration - MBA
Tech Innovation and Entrepreneurship - Post-Bachelor's Certificate
Technical Sales Management - Minor

Courses

MGT3850 - Sports Management - 2 - Credits
MSLE1800 - Leadership and Human Flourishing - 3 - Credits
MSLE2500 - Business for Good: Making an Impact through Social Entrepreneurship - 2 - Credits
MSLE2550 - Entrepreneur Leadership Series - 1 - Credits
MSLE2600 - Introduction to Entrepreneurship - 3 - Credits
MSLE2650 - Adobe Graphic Design - 3 - Credits
MSLE2700 - 7-Habits of Highly Effective People - 2 - Credits
MSLE2750 - Enhancing Happiness in Your Life and Career - 3 - Credits
MSLE2800 - HMA Consulting - 1 - Credits
MSLE2850 - PhD Prep Seminar - 1 - Credits
MSLE2900 - Pro Sales - 1 - Credits
MSLE3110 - Managing Organizations and People (DSS) - 3 - Credits
MSLE3200 - Adobe Graphic Design - 3 - Credits
MSLE3300 - Contemporary Issues in International Trade - 3 - Credits
MSLE3500 - Fundamentals of Marketing - 3 - Credits
MSLE3510 - New Venture Creation - 3 - Credits
MSLE3530 - New Venture Marketing - 3 - Credits
MSLE3540 - New Venture Finance - 3 - Credits
MSLE3555 - Applied Artificial Intelligence in Entrepreneurship - 3 - Credits
MSLE3580 - New Venture Execution - 3 - Credits
MSLE3585 - New Venture Practicum - 3 - Credits
MSLE3590 - Small Business Consulting - 2 - Credits
MSLE3610 - Strategic Planning for Career and Life (CI) - 2 - Credits
MSLE3620 - Marketing Research and Analytics - 2 - Credits
MSLE3630 - E-Commerce and Internet Marketing - 2 - Credits
MSLE3710 - Leading Teams - 2 - Credits
MSLE3800 - Leadership - 2 - Credits
MSLE3805 - Practical Leadership - 2 - Credits
MSLE3810 - Personal Leadership - 2 - Credits
MSLE3820 - International Business (DSS) - 3 - Credits
MSLE3855 - Sustainability Marketing - 2 - Credits
MSLE3875 - Strategic Advertising Campaigns - 2 - Credits
MSLE3890 - Systems Strategy and Problem Solving - 2 - Credits
MSLE4000 - Leading in Constant Change - 3 - Credits
MSLE4050 - International Marketing - 3 - Credits
MSLE4200 - Strategic Consulting - 3 - Credits
MSLE4250 - Marketing-Strategy-Leadership-Entrepreneurship Internship - 2 - Credits
MSLE4510 - Consumer Behavior - 2 - Credits
MSLE4535 - Promotional Strategy - 2 - Credits
MSLE4541 - Marketing Strategies for Athletes and Influencers - 2 - Credits
MSLE4545 - Digital Marketing - 2 - Credits
MSLE4555 - Pricing & B2B Buyer-Seller Decisions - 2 - Credits
MSLE4560 - Strategic Sales (CI) - 2 - Credits
MSLE4562 - Sales and Marketing Practicum - 2 - Credits
MSLE4565 - Sales Management - 2 - Credits
MSLE4575 - Customer Success Strategy - 2 - Credits
MSLE4580 - Artificial Intelligence in Marketing Experimental Design - 2 - Credits
MSLE4590 - Marketing Strategy - 3 - Credits
MSLE4609 - Special Topics in Marketing - 2 - Credits
MSLE4800 - Independent Research and Readings - 1 - 3 Credits
MSLE4810 - Local Marketing Career Accelerator - 2 - Credits
MSLE4820 - National Marketing Career Accelerator - 2 - Credits
MSLE4895 - Consulting Skills - 3 - Credits
MSLE6000 - Business Fundamentals - 1 - 3 Credits
MSLE6200 - Executive Influence - 3 - Credits
MSLE6250 - Graduate Internship - 1 - 6 Credits
MSLE6310 - Career and Professional Development - 1 - 3 Credits
MSLE6410 - Enterprise and Value Creation - 3 - Credits
MSLE6430 - Enterprise Growth and Management - 2 - 3 Credits
MSLE6470 - Project Planning and Execution - 3 - Credits
MSLE6500 - Marketing Analysis and Decision Making - 3 - Credits
MSLE6520 - Enterprise Brand and Marketing - 3 - Credits
MSLE6530 - Marketing Research and Analytics - 3 - Credits
MSLE6640 - Selected Topics in Business Administration - 0.5 - 3 Credits
MSLE6641 - Special Topics in Marketing - 0.5 - 3 Credits
MSLE6642 - Special Topics in Strategy - 0.5 - 3 Credits
MSLE6643 - Special Topics in Leadership - 0.5 - 3 Credits
MSLE6644 - Special Topics in Entrepreneurship - 0.5 - 3 Credits
MSLE6645 - Innovative and Inclusive Leadership - 3 - Credits
MSLE6650 - Strategic Sales Management - 3 - Credits
MSLE6741 - Leadership Development - 3 - Credits
MSLE6850 - Shingo Global Strategic Thinking - 0.5 - 3 Credits
MSLE6855 - Shingo Workshops - 0.5 - 3 Credits
MSLE6860 - Shingo Project - 0.5 - 3 Credits
MSLE6870 - Global Strategic Thinking - 3 - Credits
MSLE6890 - Advanced Strategy - 3 - Credits
MSLE6891 - Systems Thinking and Advanced Tactics - 2 - Credits
MSLE6892 - Systems Thinking and Advanced Tactics II - 1 - Credits
MSLE6900 - Independent Research and Reading - 1 - 3 Credits
MSLE6970 - Thesis - 1 - 4 Credits
MSLE6990 - Continuing Graduate Advisement - 1 - 3 Credits
MSLEELEC - Marketing and Strategy Elective - 1 - 3 Credits

MSLEEXPE - Marketing and Strategy International Experience - - Credits
MSLEINTLE - Marketing International Language - 2 - 3 Credits
MSLELANG - Marketing and Strategy International Language - 1 - 16 Credits
MSLEMKT - Marketing and Strategy Marketing Elective - 2 - Credits
MSLEMKTRE - Marketing Research - 2 - Credits

Mathematics & Statistics Department

Mathematics & Statistics

Department Head: John Stevens
Location: Animal Science (ANSC) 110
Phone: (435) 797-2810 | **FAX:** (435) 797-1822
Email: john.r.stevens@usu.edu
WWW: math.usu.edu

Assistant Department Head: Luis Gordillo, Animal Science 109, (435) 797-0245, luis.gordillo@usu.edu

Assistant Department Head for Graduate Program Studies: Yan Sun, Animal Science 310, (435) 797-2861, yan.sun@usu.edu

Assistant Department Head for Undergraduate Studies: Kady Schneiter, Animal Science 323, (435) 797-2820, kady.schneiter@usu.edu

Assistant Department Head for Statewide Campuses: Don Busenbark, USU Uintah Basin - Roosevelt, (435) 722-1758, don.busenbark@usu.edu

Actuarial Science Program Coordinator: Daniel C. Coster, Animal Science 219, (435) 797-2815, dan.coster@usu.edu

Undergraduate Advising: Linda Skabelund, Animal Science 117, (435) 797-8311, linda.skabelund@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), and Master of Science (MS) in Mathematics; BS and BA in Mathematics Education; BS in Composite Mathematics-Statistics Education; BS in Composite Mathematics/Statistics; Master of Mathematics (MMath); BS, BA, and MS in Statistics; MS in Industrial Mathematics; Doctor of Philosophy (PhD) in Mathematical Sciences

Graduate specializations: *PhD in Mathematical Sciences*—College Teaching, Interdisciplinary Studies, Pure and Applied Mathematics, and Statistics

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at math.usu.edu by clicking on the assessment tab.

Undergraduate Programs

Objectives

The Department of Mathematics and Statistics offers a variety of programs and courses designed to prepare students for careers in teaching and for positions as mathematicians and statisticians in industry and government. The department also provides service courses for students in many other disciplines and contributes to the University Studies program by providing Quantitative Literacy and Quantitative Intensive classes.

Placement of New Students

Current mathematics ACT/SAT scores, Math Placement Exam scores, and Advanced Placement (AP) calculus and statistics scores are used for placement in 1000-level and 2000-level mathematics and statistics courses. *A current score is defined as a score from an exam taken within the last year (three consecutive semesters, including summer).*

Prerequisites for MATH 995, MATH 1060, MATH 1100, MATH 1210, MATH 2010, MATH 2020 and, STAT 2300 *must* be completed ***on or after*** (*not* before) the following dates, in order to fall within the MPATL for the listed semester: **fall semester**—August 15 of the previous year; **spring semester**—January 1 of the previous year; **summer semester**—June 1 of the previous year.

Students who are registering for a math class at USU for the first time who have a current math ACT score of less than 23 or a math SAT score of less than 540 (whether current or not) are required to take the Math Placement Exam administered by the Department of Mathematics and Statistics. A student's score on the Math Placement Exam will be used to determine his or her placement in appropriate mathematics or statistics course.

For students needing a satisfactory score on the Math Placement Exam (MPE) to meet an enrollment requirement for any course listed below, the deadline for meeting this requirement is the end of the first week of classes. A maximum of three attempts to achieve a satisfactory score on the MPE is allowed each semester.

MATH 950
Satisfactory score on the ALEKS Math Placement Exam.

MATH 995
One of the following within the last year or three consecutive semesters (including summer):

- ACT Math score of 17 or higher or equivalent SAT math score
- MATH 950 with a grade of C- or better
- Satisfactory score on the Math Placement Exam

MATH 1030 ***(not currently offered)***
Math ACT score of at least 23 (Math SAT score of at least 540) **or** Grade of *C* **or** better in MATH 1010 or Satisfactory score on Math Placement Exam

MATH 1050
Math ACT score of at least 23 (Math SAT score of at least 540) **or** Grade of *C* **or** better in MATH 1050 **or** AP Calculus AB exam score of 3 **or** higher or Satisfactory score on Math Placement Exam

MATH 1060
Math ACT score of at least 23 (Math SAT score at least 540) **or** Grade of *C* or better in MATH 1010 (**or** MATH 1050) **or** AP Calculus AB exam score of 3 or higher **or** Satisfactory score on Math Placement Exam

MATH 1100
Math ACT score of at least 25 (**or** Math SAT score of at least 580) **or** Grade of *C-* **or** better in MATH 1050 **or** Satisfactory score on Math Placement Exam

MATH 1210
Math ACT score of at least 27 (Math SAT score of at least 620) **or** Grade of *C-* **or** better in MATH 1050 and MATH 1060 **or** AP Calculus AB exam score of 3 **or** higher or Satisfactory score on Math Placement Exam

MATH 2010
Must be a declared major in Elementary Education, Special Education, Pre-Elementary Education or Pre-Special Education and meet one of the following within the last year or three consecutive semesters (including summer):

- MATH 2020 or equivalent
- MATH 1050 with a grade of C- or better
- ACT Math score of 25 or higher or equivalent SAT math score
- AP Calculus AB score of 3 or higher
- Satisfactory score on the Math Placement Exam

MATH 2020
Math ACT score of at least 25 (Math SAT score of at least 580) **or** Grade of *C-* or better in MATH 1050 **or** Satisfactory score on Math Placement Exam

STAT 1040
Math ACT score of at least 23 (Math SAT score of at least 540) **or** Grade of ***C* or better in MATH 1010 or Satisfactory score on Math Placement Exam**

STAT 1045
One of the following within the last year or three consecutive semesters (including summer):

- ACT Math score of 16 or higher or equivalent SAT math score
- MATH 950 with a grade of C- or better
- Satisfactory score on the Math Placement Exam

STAT 2000
Math ACT score of at least 23 (Math SAT score of at least 540)**or**Grade of*C-*or better in MATH 1050 **or**Satisfactory score on Math Placement Exam

STAT 2300
Math ACT score of at least 25 (Math SAT score of at least 580)**or**Grade of*C-*or better in MATH 1050 **or**Satisfactory score on Math Placement Exam

Entering students with current passing scores on AP calculus or statistics exams will be awarded credits as shown below:

AP Test	Score	Credits	USU Credit Awarded
Calculus AB	3	6	3 (QL) credits + 3 elective credits
	4-5	6	1210 (QL) (4) + 2 elective credits
Calculus BC	3-4	6	MATH 1210 (QL) (4) + 2 elective credits
	5	8	MATH 1210 (QL) (4) + MATH 1220 (QL) (4)
Statistics	3-5	3	STAT 2000 (QI) (3)

Even if not required, students may opt to take the Math Placement Test through the Department of Mathematics and Statistics, strictly for advising purposes.

The calculus courses MATH 1210, MATH 1220, and MATH 2210 are designed for students majoring in mathematics, the sciences, and engineering. MATH 1100 (Calculus Techniques) is designed primarily for students majoring in business. All students in calculus classes need strong backgrounds in the material covered in MATH 1010 and MATH 1050 In addition, the MATH 1210, MATH 1220, MATH 2210 sequence requires a sound understanding of trigonometry (MATH 1060).

Students with outstanding mathematics records in high school and transfer students with some experience in calculus may wish to consult with a departmental advisor prior to registration.

Departmental Admission Requirements

1. New freshmen admitted to USU in good standing qualify for admission to the major.
2. Transfer students from other institutions need a 2.2 transfer GPA, and students transferring from other USU majors need a 2.0 total GPA for admission to this major in good standing.
3. Students may be admitted to the Mathematics Education major by satisfying either of the above conditions. However, in order to be admitted to the Secondary Teacher Education Program (STEP), and to graduate from the Mathematics Education major (and minor), students must have an institution GPA of at least 3.0 in the equivalent of MATH 1210, MATH 1220, and MATH 2210, and an overall GPA of at least 2.75.

University Requirements

All students in the Department of Mathematics and Statistics must satisfy the University Studies Requirements of USU's University Studies program.

Suggested Four-year Plans

Suggested semester-by-semester four-year plans for students working toward a Bachelor of Science or Bachelor of Arts degree within the Department of Mathematics and Statistics are available in the department.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

Students who enter the university with AP credit in Mathematics and/ or Statistics, and about 30 additional AP or CLEP credits, may be able to complete both a BS and an MS degree within five years or less. Interested students should consult with a departmental undergraduate advisor.

For detailed information about requirements for majors and minors within the Mathematics and Statistics Department, see the major requirement sheet, which is available from the department.

Financial Support

The department offers several one-, two-, and four-year scholarships to qualified students who enroll as full-time Mathematics, Mathematics Education, or Statistics majors. The winner of the Hunsaker Scholarship receives a cash award each semester for two years. This award is given in addition to any four-year scholarship or tuition waiver for which the student is eligible. During the final two years, the recipient is expected to work as a grader for the department. The department also offers other scholarships (Elich, Ellis, van Vliet, and departmental). The amount of these scholarships varies from year to year. The Ellis Scholarship is awarded to a junior or senior Mathematics Education major, and the recipient is selected by the department. To apply for any of these scholarships (except for the Ellis Scholarship, for which there is no application) fill out the scholarship application form located at http://www.math.usu.edu/PDF/scholarship%20appl%20Oct08.pdf, and send a statement of qualifications, including high school transcripts and SAT or ACT scores, and three letters of recommendation to:

Scholarship Committee
Department of Mathematics and Statistics
Utah State University
3900 Old Main Hill
Logan UT 84322-3900

Applications must be received by March 15.

Learning Objectives

All students having majors within the Department of Mathematics and Statistics are expected to achieve competency in: (1) pre-calculus algebra; (2) calculus of one and several variables; (3) ordinary differential equations; (4) linear algebra/matrices, eigenvalues/ eigenvectors, determinant, rank; and (5) analysis (introduction to formal proofs/analysis theory).

Students enrolled in specific departmental majors should also have competence in additional areas pertaining to their major. These areas are listed in the following paragraphs.

Mathematics Major

(1) algebraic structures; (2) analysis/advanced calculus; (3) complex variables; (4) topology; (5) algebraic theory; and (6) partial differential equations.

Statistics Major

(1) theory of probability and statistics; (2) linear regression/time series; (3) experiment design; and (4) one or more of sampling, categorical analysis, multivariate analysis, quality control.

Mathematics Education Major (including Composite Mathematics-Statistics Education)

(1) algebraic structures; (2) probability; (3) history of mathematics; (4) methods for secondary school teaching of mathematics and/or statistics; and (5) in-service teaching experiences.

Other Majors and Emphases (e.g., Computational Mathematics Emphasis, Actuarial Science Emphasis, etc.)

Replace general competencies in traditional areas (i.e., algebra, topology, analysis) with specific topics related to the specialized emphasis. For example, students in the Computational Mathematics Emphasis need the ability to write computer code to solve linear, nonlinear, stochastic, and (partial and ordinary) differential equations; and students in the Actuarial Science Emphasis need two semesters of actuarial mathematics.

Assessment

Assessment of General Education Courses (MATH 1050 and STAT 1040)

Beginning with Spring Semester 2004, the department has conducted an annual assessment of student performance in primary General Education courses (including MATH 1050 and STAT 1040). The performance of approximately 100 randomly selected students from each of MATH 1050 and STAT 1040 was evaluated by topic area on the common finals of these courses. Summary results will be available soon. The process was repeated for Spring Semester 2005. Together, these two years of data provide a baseline against which future groups of students will be compared. Weaknesses in topic learning will then be identified, and the Undergraduate Committee and course supervisors will provide feedback to instructors in an effort to bring overall student performance to target levels.

Assessment of Core Courses (MATH 1210, MATH 1220, MATH 2210, MATH 2250, and STAT 1040, STAT 2000, STAT 3000)

Core content of these courses changes infrequently and is primarily addressed through the selection of textbooks at three-year to five-year intervals. Primary assessment of these courses is through semester evaluations and final examination scores and course grade profiles. Competency in these areas is essential for any student majoring in mathematics or statistics.

Assessment of Upper-division Major Courses

These courses are re-evaluated by subcommittees of the Undergraduate Committee in terms of: level and appropriateness of content relative to learning objectives, textbook selection, final examinations, course grades, and student evaluations. At two-year to five-year intervals, courses are redesigned if the subject matter develops beyond traditional norms, or if market demand indicates that an under-utilized course should be replaced by a course having greater demand (e.g., development of a new cryptography course).

Undergraduate Research Opportunities

Students interested in undergraduate research opportunities in the Department of Mathematics and Statistics at Utah State University should begin by contacting the department head and undergraduate research liaison.

Several departmental faculty members have engaged in successful undergraduate research projects. These faculty members, along with their research areas, include: James Powell (mathematical modeling of pine beetle infestations), Ian Anderson (differential geometry applications to theoretical and applied physics), and Richard Cutler (analysis of epidemiological and environmental data). In general, undergraduate research offers students an excellent opportunity to explore mathematical and statistical theory and practice under the guidance of an experienced researcher, to focus their own course selection on particular career paths and research areas (including graduate school), to co-author professional publications, and to actively make presentations at conferences or local seminars.

Graduate Programs

Admission Requirements

In general, students wishing to pursue graduate studies in mathematics or statistics should have a bachelor's degree in mathematics, statistics, or a closely related field, with extensive coursework in one of the departmental disciplines. The department requires a score of 700 on the quantitative section of the GRE. International applicants must have a TOEFL score of 250 on the computer-based test or a score of 100 on the internet-based test.

Students entering the Master of Mathematics (MMath) program must either possess a valid secondary school teaching license or be concurrently enrolled in a secondary school teacher licensure program.

Course Requirements

Departmental requirements change from time to time. Check with the Department of Mathematics and Statistics for the list of requirements currently in effect.

Research

Mathematics research opportunities within the department are many and varied, and students are urged to contact faculty about mutual interests at as early a stage as feasible. The interdisciplinary option permits and encourages study with a broad spectrum of outstanding nationally recognized university research programs.

Financial Assistance

Graduate students in the PhD program, the MMath program, and the Plan A and B options of the MS programs are eligible for teaching assistantships in the department. Duties of graduate teaching assistants may include full responsibility as instructors for introductory mathematics or statistics courses, leading recitations, and (in rare situations) tutoring and paper grading. Stipends are competitive and may include health insurance benefits. All graduate student stipends described here carry with them a waiver of all nonresident tuition. PhD students with stipends also receive a waiver of resident tuition. The department is also allocated a small number of resident tuition waivers for MS students each year. The department is able to support most PhD students and some MS students with summer teaching assignments. Mathematics and Statistics faculty members who have research grants may choose to partially or fully support students they are advising.

College of Arts and Sciences Faculty

Programs

Data Literacy - Minor
Data Modeling Education - Post-Bachelor's Certificate
Data Science - Minor
Data Science - BS
Data Science - Post-Bachelor's Certificate
Data Science: Statistics Specialization - MS
Master of Data Analytics (Statistics) - MDATA
Economics and Statistics - MS
Industrial Mathematics - MS
Mathematics Education - Minor
Mathematics Education - BA, BS
Mathematics/Statistics (Composite) - BA, BS
Mathematics - Minor
Mathematics: Actuarial Science Emphasis - BA, BS
Mathematics: Applied Mathematics Emphasis - BS
Mathematics - BA, BS
Mathematics: Computational - BA, BS
Master of Mathematics - MMath
Mathematics - MS
Machine Learning and Artificial Intelligence - Post-Bachelor's Certificate
Mathematics/Statistics Education (Composite) - BA, BS
Mathematical Sciences - PhD
Statistics and Data Science - PhD
Statistics - Minor
Statistics: Actuarial Science Emphasis - BA, BS
Statistics - BA, BS
Statistics - MS

Courses

DSAI2275 - Linear Algebra for Data Science - 4 - Credits
DSAI5060 - Python for Data Science - 3 - Credits

Mechanical & Aerospace Engineering Department

Mechanical and Aerospace Engineering

Department Head: Zhongquan Charlie Zheng **Location:** ENGR 419D **Phone:** (435) 797-2878 **FAX:** (435) 797-2417 **E-mail**: zzheng@usu.edu **Website:** mae.usu.edu	**Undergraduate Program Director:** Nick Roberts **Location:** EL 134D **Phone:** (435) 797-9455 **FAX:** (435) 797-2417 **E-mail:** nick.roberts@usu.edu	**Graduate Program Director:** Matt Harris **Location:** ENGR 419H **Phone:** (435)797-9149 **FAX:** (435) 797-2417 **E-mail:** matthew.harris@usu.edu

Degrees Offered

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at engineering.usu.edu/mae/assessment/undergraduate/abet-mechanical for undergraduate programs and mae.usu.edu/assessment/graduate for graduate programs.

The Mechanical Engineering BS program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org, under the commission's General Criteria and the Program Criteria for Mechanical Engineering and Similarly Named Programs.

Undergraduate Majors

Mechanical Engineering, BS

Undergraduate Minors

Mechanical Engineering

Undergraduate Emphasis

Aerospace Engineering

Graduate Majors

Mechanical Engineering, MS
Space Systems Engineering, MS
Aerospace Engineering, MS
Composite Materials and Structures, MS
Aerospace Engineering, PhD
Mechanical Engineering, PhD

Graduate Areas of Interest

Advance Materials and Structures
Aeronautics
Astronautics
Composite Materials and Structures
Fluid Dynamics
Guidance, Navigation and Control
Heat Transfer
Material Science
Microscale/Nanoscale Science
Nuclear Energy and Materials
Numerical Methods
Renewable Energy
Solid Mechanics
Thermodynamics

Undergraduate Program

Mission

Mechanical Engineering graduates are prepared to pursue careers in such widely diverse industries as aerospace, agricultural equipment, automotive, biotechnical, chemical processir processing, industrial equipment, manufacturing, materials processing, nuclear, petroleum, robotics, and solar energy. Most Mechanical Engineering graduates are prepared for graduate studies and enhanced career prospects in engineering or other areas, such as consulting, law, medicine, business management, or teaching. In addition, students who are preparing to apply for admission to medical school will find that Mechanical Engineering provides an excellent foundation for the increasingly t oriented field of medicine.

Students may choose to obtain an Aerospace Engineering Emphasis within the Mechanical Engineering BS degree.The Aerospace Emphasis focuses on the mechanics and dynamics of both flight within the atmosphere and space flight. Included within its scope are studies in aerodyamics, aircraft flight dynamics and control, aircraft design, spacecraft orbital mechanics, spacecraft attitude motion and control, and space system design. Graduates who complete the aerospace engineering emphasis are prepared to pursue careers in aircraft design and development, aircraft flight testing, spacecraft and space systems design, and spacecraft trajectory design and analysis. As fully qualified Mechanical Engineers, graduates with aerospace engineering emphasis are also well-prepared to pursue graduate studies or careers in the industries listed above under Mechanical Engineering.

For more information about the Mechanical and Aerospace Engineering department, see the Mechanical and Aerospace Engineering department webpage.

Sample Four-Year Plan and Required Courses

Go to the Mechanical Engineering - BS, Mechanical Engineering: Aerospace Emphasis - BS, and Mechanical Engineering - Minor pages to learn about program sample four-year plans and required courses.

Admission Requirements and Graduation Requirements
Go to the Undergraduate Program section of the College of Engineering's catalog page for information about program admission requirements, and graduation requirements.

Financial Assistance
Scholarships, assistantships, grants-in-aid, and work-study programs are available to undergraduate students through the university. In addition, the MAE department employs undergraduates to assist in engineering research and development. Cooperative education and industrial employment opportunities for students are coordinated by the university Career Services Office.

Accelerated BS/MS Program
The accelerated BS/MS program allows eligible students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master's degree concurrently. Students in this program have a greater selection of graduate courses since many graduate courses are taught during alternate years. Both the BS and MS degrees can generally be earned with 150 total credits, although students should note that a Plan C MS requires 3 extra credits. To be eligible, students must apply at the end of the junior year (completed 90 credits of Mechanical Engineering BS degree requirements) and have at least a 3.5 overall and admission GPA (calculated using all grades from semesters covering last 60 credits) as of the end of their junior year. (For more information, see Accelerated Bachelor's/Master's section of Mechanical and Aerospace Engineering website.)

Graduate Programs

The Department of Mechanical and Aerospace Engineering provides each graduate with a foundation of knowledge and experience upon which to build successful careers in mechanical engineering, aerospace engineering, composite materials and structures, or space systems engineering.

Mechanical Engineering touches nearly every aspect of our modern lives. Mechanical engineers use principles of motion, energy, heat, fluid, controls, vibrations, solids, and material science to design and build mechanical devices that lift enormous loads or move microscopic components. Mechanical Engineers affect technological advancements in nearly every field and component of life today.

Aerospace engineers develop new technologies in the defense, aviation, astronautics, and space industries including modern aircraft, satellites, rockets, and space vehicles. Courses and research focus on aerodynamics, vehicle dynamics, controls, propulsion, guidance and navigation, optimization, and structures.

The MS in Composite Materials and Structures is directed at providing students and industry professionals the opportunity to become familiar with how composite materials are used in several areas of engineering research and design across multiple industries. Graduates will develop the ability to better understand the applicability of these materials in improving and advancing product design. Surveys of the materials, processes and design methods associated with composite materials will be given as well as the scientific principles involved. In-depth understanding of the critical manufacturing processes, the testing of constituent and composite materials, and the structural analyses of these complex systems will be taught.

The Space Systems Engineering MS-C degree is a joint effort between Mechanical and Aerospace Engineering (MAE) and Electrical and Computer Engineering (ECE). The goal of the program is to provide early- and mid-career professionals with post-graduate education and an opportunity to develop an understanding of system engineering from the perspective of the space engineering discipline. Space Systems engineers focus on the systems associated with space flight including propulsion, flight dynamics, navigation, controls, instrumentation and astrodynamics.

Admission Requirements
All students intending to pursue graduate studies at Utah State University must complete an Application for Admission to the School of Graduate Studies. In addition to the general graduate admission requirements, the MAE department requires all graduate applicants to have: a bachelor's degree from an accredited institution in Mechanical Engineering, Aerospace Engineering, or a closely related engineering discipline; a minimum admission GPA of 3.3 (calculated using all grades from last 60 semester or 90 quarter credits earned). All MAE graduate students are expected to be well acquainted with FORTRAN, C, or C++, or MATLAB.

GPA Requirement
All students who complete a graduate degree at USU must maintain a minimum of 3.0 GPA. Consult with your department for additional requirements.

Research
Departmental research projects are funded by both government agencies and private industry. Research topics generally include fluid dynamics, aerodynamics, material science, additive manufacturing, composites, solids and structures, thermodynamics, heat transfer, guidance navigation and controls, optimization, space systems, orbital mechanics, and remote sensing. Please go to the MAE department website at engineering.usu.edu/mae/research/ and specific professors' websites to see their current research.

Financial Assistance
A number of teaching and research assistantships are available to graduate students through the department and are awarded on a competitive basis each year. For information about tuition awards and waivers see the policy at rgs.usu.edu/graduateschool/finances/tuition.

Acceptance to pursue graduate studies in the Department of Mechanical and Aerospace Engineering does not imply a commitment to any type of financial aid. All awards for financial aid are made on a competitive basis after applicants are admitted to graduate school.

Academic Advising
Undergraduate and Graduate advising information can be found on the College of Engineering page.

Undergraduate Programs

Objectives

Military Science (Army ROTC) focuses on leadership development. Students pursue the major of their choice while studying Military Science, and graduate with the ability to function effectively as leaders. Upon completion of Army ROTC and graduation from college, students become commissioned officers in the active Army, Army Reserve, or Army National Guard.

Instructors, textbooks, uniforms, and equipment are provided at no cost to the student or the university. All contracted students receive between $300-500 per month (up to 10 months per academic year). Army ROTC also covers the cost of tuition and fees or room and board for Army ROTC scholarship students and provides a $600-per-semester book allowance. Those cadets with concurrent membership in the Army National Guard or Reserves can also qualify for Federal and State tuition assistance.

The Margin of Difference

Army ROTC cadets learn to be leaders and receive hands-on experience in managing physical, financial, and human resources. They develop self-confidence and superior decision-making skills. Employers value these leadership qualities and recognize the associated potential. Cadets are also required to maintain a level of physical fitness while in the program, a marked difference in other university programs. Cadets are expected to live the Army Values.

Four-Year Program

The traditional Army ROTC program covers four years consistent with normal undergraduate progression (freshman-senior). The four-year program is divided into two parts: the **basic course** and the **advanced course**. The **basic course** is usually taken during the first two years of college. It covers subjects such as mountaineering, land navigation, leadership development, small unit tactics, weapons marksmanship, military history, time management, health, and citizenship. The basic course may be waived for cadets that have prior service experience.

The basic course is designed for high-performing students who wish to try Military Science without obligation, while enhancing their leadership skills and self-confidence. Upon successful completion of the basic course, students are eligible to enter the advanced course.

Advanced course requirements are normally completed during the junior and senior years. The advanced course further develops and refines leadership competencies, and qualifies the student for a commission in the United States Army. Advanced course students receive a $450-500 per month tax-free subsistence allowance (up to 10 months per year), and attend a paid 30 day Leadership Development and Assessment Course between their junior and senior years. This course is called “Warrior Forge” and is a combined program with attendees from ROTC programs across the country conducted at Fort Knox in Kentucky.

Two-Year Program

This is a special program for junior and community college transfer students or for students who did not take Army ROTC during their first two years of college. To enter the two-year program, a student must have completed Basic Training in a military service or participate in five weeks of basic leadership instruction. This instruction usually takes place between the sophomore and junior year. Students are paid, if contracted, for attending this instruction, have the opportunity to compete for two-year scholarships, and may receive academic credit. Students who qualify for the two-year program are enrolled directly in the advanced course.

Scholarships

Army ROTC provides numerous scholarship opportunities. High school seniors may qualify for **the four-year Army ROTC scholarship**. College students may qualify for three- or two-year scholarships. These scholarships pay the cost of tuition and fees, or room and board, $600.00 for textbooks and classroom supplies, and a monthly cash stipend between $300-$500 per semester. The **Green to Gold scholarship** allows Soldiers serving on active duty to leave the Army early and attend college/ROTC full time.

Placement Credit For Veterans

Veterans may qualify for advanced course placement based on prior military experience. They can take full advantage of veteran’s benefits and receive stipend payments from Army ROTC concurrently, if contracted into the program.

Simultaneous Membership Program (SMP)

This program is available to advanced course cadets who wish to serve in the Army Reserve or National Guard while attending college and pursuing a commission through Army ROTC. SMP students are eligible to receive reserve drill pay, tuition assistance up to $4,500 per year, other monetary incentives, and $300-500 per month tax-free subsistence allowance (up to 10 months per academic year), if contracted into the program from Army ROTC. Call or visit the Department of Military Science for details.

Leave of Absence

If students (including scholarship recipients) wish to take a leave of absence for example to serve a mission for their church, they can do so conveniently between their freshman and sophomore years.

Commission Requirements

In order to qualify for a commission as a Second Lieutenant in the United States Army, each student must:

1. Complete all required Military Science instruction while attending college as a full-time student, and obtain a baccalaureate or higher degree prior to age 31 (age waiver can be granted for prior military service or other extenuating circumstances).
2. Meet medical and physical fitness standards.
3. Be a U.S. citizen.
4. Successfully complete the advanced summer camp.

5. Be recommended by the Professor of Military Science and/or Department Head.

Service Obligation

There is no military service obligation for basic course students, unless they have received an Army ROTC scholarship. Advanced course and scholarship students incur an obligation to serve in the active Army, Army Reserve, or Army National Guard.

Additional Information

For more detailed information about course requirements for the Military Science programs, as well as information about career opportunities, see the major requirement sheet, which is available from the Military Science Department or call (435) 797-ROTC (7682).

Undergraduate Advisors: Undergraduate Advisors: Nathan Scott, FAC 127, (435)-797-0447

Degrees offered: Bachelor of Music (BM) in Performance, Bachelor of Music (BM) in Music Education, Bachelor of Music (BM) in Performance and Pedagogy, Bachelor of Science (BS) in Music Therapy, Bachelor of Arts (BA) in Music, Master of Music (MM) in Performance, Master of Music (MM) in Conducting, Master of Music (MM) in Performance and Pedagogy

Undergraduate emphases: *BM degree in Performance* (Brass, Guitar, Harp, Percussion, Strings, Voice, Woodwinds); *BM degree in Music Education* (Band, Choral, Guitar, Orchestra); *BM degree in Performance and Pedagogy* (Piano)

Graduate specialization: *MM in Performance* (Guitar, Voice); *MM in Performance and Pedagogy* (Piano); *MM in Conducting* (Choral)

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at music.usu.edu/summer/assessment.

Undergraduate Programs

Objectives

The Department of Music provides instruction in music by: (1) offering service courses which contribute to the Liberal Arts major in the college containing the humanities and social sciences and to the university Studies Program of the university; (2) offering specific sequences of courses leading to professional preparation in music education, music therapy, and performance/pedagogy; and (3) providing public musical service to the University and the community.

The specific objectives of the programs in music for the music major are fourfold: (1) to prepare licensed music teachers to serve effectively in elementary and secondary schools; (2) to prepare musically talented students for careers as professional performers and/or studio teachers; (3) to prepare board-certified music therapists to serve in educational and therapeutic settings; and (4) to prepare music students for graduate study in their areas of specialization.

Requirements

Admission Requirements

Admissions requirements for the Department of Music include those described for the university in this catalog. In addition, transfer students must have a minimum 3.00 GPA in music courses and a minimum 2.75 GPA overall. All students interested in majoring in Music or Music Therapy will be given undeclared major status until they have completed the required audition/interview process, as verified by their area advisor through the *Change of Matriculation Form*. It is strongly recommended that prospective majors complete their audition/interview during the department's scholarship auditions in February preceding matriculation at USU. To schedule an audition/interview, visit our website: music.usu.edu and click on "future students" to fill out the audition application.

Prospective majors in Music Therapy should complete the audition/interview prior to May 1 of the year of admission.

GPA Requirement

Students majoring in music, music education, or music therapy must maintain a minimum GPA of 3.00 in music courses and a minimum 2.75 GPA overall to maintain their status as a music major and to graduate. All core curriculum classes must be completed with a *C* or higher in order to progress to the next courses in sequence, except for individual instruction courses, which must be passed with a *B-* or higher grade. A student receiving a grade lower than *C* is placed on probation, and may repeat the course once to raise the grade to *C* or higher. If the grade received on the repeat is lower than *C*, the student is no longer a music, music education, or music therapy major.

Sample Four-year Plans

Sample semester-by-semester four-year plans for students working toward a bachelor's degree within the Department of Music can be found in the department or under "Areas of Study" at music.usu.edu.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Recital and Concert Attendance

To graduate, students are required to attend a minimum of 80 concerts or recitals. Recital and concert attendance is monitored and recorded in the Music Student Services office. Students should turn in programs after attending concerts and recitals for documentation of attendance.

Individual Performance and Jury Requirements

Music majors enroll in individual instruction each semester and practice regularly outside of lessons. Jury exams are held at the end of each semester to assess individual progress. Students must pass individual instruction classes with a *B-* or higher grade in order to progress to the next level of instruction, and are expected to pass a barrier jury after their third semester of study in residence to continue as a music major. To determine specific jury requirements for their area, students should contact their music faculty advisor.

Recital Participation

Each music education, performance, and pedagogy major is encouraged to appear in a departmental recital each semester. Since area recital requirements vary, students should consult program advisors and degree requirement sheets for specific information.

Piano Proficiency Requirements

Music, Music Education, and Music Therapy majors must meet a minimum standard of piano proficiency before graduation. The specific requirements are detailed in the department's *Student Handbook*.

Transfer Credits

Transfer music students must take diagnostic exams in Music Theory, Aural Skills (Ear Training) and Music History before earned credit for those courses are applied to music core curriculum requirements (see "Transfer Credit" at Transfer Credit). Music Theory and Aural Skills diagnostic exams are administered twice each year, during the week prior to the first week of classes Fall and Spring semesters. The Music History diagnostic exam is administered once each year, immediately prior to the first week of classes Fall semester. For information about the date, time, and location of diagnostic exams contact the Music Department Student Services Office, (435) 797-3015, Fine Arts 102.

Assessment

Information about the ongoing assessment of the Music Department can be found at: http://music.usu.edu/assessment.aspx

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information and Updates

Degree requirements are listed on the Music Major Requirement Sheet and the Music Therapy Major Requirement Sheet, which can be obtained from the department.

Additional requirements, including appropriate sequencing of courses, are listed in the *Department of Music Student Handbook*. For the most recent information regarding degree requirements and course sequencing, contact advisors over specific programs. Further information can also be obtained by contacting the Music Department Office, Fine Arts 102, or by visiting the department's website.

Financial Support

Scholarships, grants, and work-study programs are available through the university. Information about these programs can be obtained by calling the Admissions Office, (435) 797-1129 or 1-800-488-8108. In addition, the Department of Music offers talent-based scholarships to undergraduate students and employs students as part-time workers. For scholarship information or to arrange an audition, contact the department at (435) 797-3015 or visit the department's website.

Nursing Department

Nursing

Interim Department Head: Pam Anderson
Location: HPER 114D
Phone: (435) 797-0768 | **Email:** nursing@usu.edu
Website: nursing.usu.edu

BSN Programs Director: Pam Anderson, HPER 114-E, (435)-797-0768, pamela.anderson@usu.edu

PN/AAS Programs Director: Laura Dotson, Reeves 206-A, USU Eastern, (435) 797-0768, laura.dotson@usu.edu

Academic Advisors:
Heather Thomas, HPER 114B, (435) 797-9684, heather.thomas@usu.edu
Skyler Toledo, HPER 114C, (435-797-0822, skyler.toledo@usu.edu

Degrees and Certificates offered:

Certificate: Practical Nursing - Certificate of Completion

Undergraduate Associate of Applied Sciences in Nursing: Nursing - AAS

Undergraduate Bachelor of Science in Nursing (pre-licensure): Nursing - BSN

Undergraduate RN to BSN(post-licensure): Nursing - RN to BSN (online program)

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://cehs.usu.edu/nursing/accreditation-and-assessment/index.

Objectives

The programs in the Department of Nursing educate and develop compassionate and competent nurses who can effectively apply nursing principles to enhance patient care in a rapidly changing and diverse practice environment. We take pride in providing students with access to cutting-edge resources and facilities.

Students develop their clinical expertise in the safe and controlled simulation environment to bridge the gap between theory and practice. Immersive simulations provide hands-on experiences that prepare students for the real-world practice they encounter during their professional careers.

One of the strengths of our nursing programs is that we provide students with many opportunities to practice nursing skills in a diverse range of clinical healthcare settings, including hospitals, community clinics, long-term care facilities, and more. Students develop a comprehensive understanding of healthcare delivery and cultivate adaptability in different care environments.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

Practical Nursing - Certificate
Nursing - AAS
Nursing - BSN
Nursing: RN to BSN - BS (Online Program)

NURS3215 - Population Health and Prevention Practicum - 2 - Credits
NURS3220 - Family Nursing through the Lifespan - 4 - Credits
NURS3225 - Family Nursing through the Lifespan Practicum - 2 - Credits
NURS3230 - Evidence-Based Health Care (QI) - 3 - Credits
NURS3240 - Health Information Management and Technology - 2 - Credits
NURS3250 - Emergency Nursing - 3 - Credits
NURS3300 - Advanced Health Assessment and Promotion - 2 - Credits
NURS4010 - Leadership, Management, and Policy in Health Care (CI) - 3 - Credits
NURS4015 - Leadership, Management, and Policy in Health Care Practicum - 2 - Credits
NURS4020 - Nursing Management of Care II - 4 - Credits
NURS4025 - Nursing Management of Care II Practicum - 4 - Credits
NURS4100 - Nursing Care of Aging Adults - 2 - Credits
NURS4210 - Nursing Capstone - 2 - Credits
NURS4215 - Nursing Capstone Practicum - 4 - Credits
NURS4250 - Advanced Internship/Co-op - 1 - 5 Credits
NURS4300 - Issues and Trends in Health Care - 2 - Credits

Nutrition, Dietetics & Food Sciences Department

Nutrition, Dietetics and Food Sciences

Department Head: Heidi Wengreen
Location: Nutrition and Food Sciences 212
Phone: (435) 797-1806 | **FAX:** (435) 797-2379
E-mail: heidi.wengreen@usu.edu
Website: ndfs.usu.edu

Undergraduate Advisor: Dawnetta Mahnken, Agricultural Science Building Room 417 and Nutrition and Food Sciences Room 221, (435) 797-3096, dawnetta.mahnken@usu.edu.

To schedule an appointment, visit https://aggie.link/DawnetttaMahnken.

Minors: Food Science, Hunger and Food Security Studies

Undergraduate Degrees: Bachelor of Science (BS) in Dietetics; BS in Nutrition Science, emphasis areas in Pre-Health and Sports Nutrition; BS in Food Science

Undergraduate Certificates: Food Manufacturing, Food Processing, and Food Security Studies

Post-Baccalaureate Certificates: Advanced Practice in Dietetics (Dietetic Internship), Didactic Program in Dietetics (Verification Statement), Practitioner of Food Safety

Graduate Degrees: Dietetics Administration (MDA), Pre-Registered Dietitian emphasis, post-Registered Dietician emphasis; Master of Food Safety and Quality (FSQ); Master of Public Health (MPH) Nutrition; Master of Science (MS), specializations in dietetics, food biotechnology, food chemistry, food engineering, food microbiology, food processing human nutrition, nutritional epidemiology, and nutrient metabolism; Doctor of Philosophy (PhD), specializations in dietetics, food biotechnology, food chemistry, food engineering, food microbiology, food processing human nutrition, nutritional epidemiology, and nutrient metabolism.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://QANR.usu.edu/ndfs/assessment.

Objectives of Academic Programs

The Department of Nutrition, Dietetics and Food Sciences has the following three objectives:

1. To provide students with the scientific/academic background necessary to function well in further academic pursuits or future work environments.
2. To provide students with the critical thinking and problem-solving skills necessary to enhance further academic pursuits or future work environments.
3. To provide students with practical application and work experience credentials to provide personal and employment satisfaction.

Program Descriptions and Career Opportunities

Food Science
A degree in the Food Science emphasis applies principles of engineering, biology, and physical science to food. Students in this discipline focus on the production, selection, preservation, processing, packaging, distribution, and use of safe, nutritious, and wholesome food. Graduates receive an excellent background in chemistry, engineering, food processing, microbiology, sensory evaluation, and statistics. Students planning to apply to graduate school are encouraged to major in Food Science instead of Food Technology Management. The Food Science program is approved by the Institute of Food Technologists.

Nutrition Science
The Nutrition Science emphasis is for students who are interested in studying the molecular and cellular aspects of human health and disease. This is a multi-disciplinary program in which students learn to apply techniques from the fields of molecular and cellular biology, physiology, genetics, and biochemistry to issues in nutrition. Students will gain experience in laboratory, clinical, and epidemiological methods, and may have the opportunity to gain laboratory research experience in nutrition studies being conducted by faculty members. The undergraduate Bachelor of Science degree qualifies a student with the Nutrition Science emphasis to find employment in industry or academic laboratories, as well as in government agencies. It can also be used as preparation for medical or graduate school.

The Nutrition Science option may also apply to students planning to pursue medical school, dental school, or another professional degree. Because nutrition is an applied science and offers research opportunities, completing a degree in this emphasis area may give students an advantage for admission to medical school, over applicants representing other science majors.

Dietetics
Students in the Dietetics program prepare to become Registered Dietitian Nutritionists (RDN) and receive excellent instruction and hands-on experience in clinical nutrition, community nutrition, and food service management.

Graduates of the Didactic Program in Dietetics are eligible to receive an Accreditation Council for Education in Nutrition and Dietetics (ACEND) Verification Statement. To be eligible to take the national registration exam for Registered Dietitian Nutritionists students need to also complete an ACEND accredited program that provides the required supervised practice and complete a graduate degree. The NDFS program offers two pathways for students to complete the supervised practice necessary to qualify to take the national registration exam to become a Registered Dietitian Nutritionist (RDN); the Post-Baccalaureate Certificate of Advanced Practice in Dietetics (CAPD) and the Pre-RD Master of Dietetic Administration. Students completing the CAPD must also complete a graduate degree to qualify to sit for the registration exam.

Admission into the Dietetics requires formal application when prerequisite coursework is completed. Students with an institution GPA of 3.0 or higher and a grade of C- or better in required prerequisite coursework are eligible to apply.

Students are encouraged to discuss their supervised practice and graduate school plans with their advisor early in their education to ensure they meet all necessary requirements for admission.

Completion of courses required for the Food Science Emphasis, Nutrition Science emphasis, or Dietetics emphasis may be suitable preparation for students planning to apply to medical school. Students need to meet with the departmental undergraduate advisor to develop an individualized plan of study.

Financial Support

The Department of Nutrition, Dietetics and Food Sciences and the College of Agriculture and Applied Sciences award scholarships in addition to those available through the university Financial Aid Office. Information and application forms may be obtained from the department office. Students may also contact the department for assistance in finding employment that will enhance their academic studies. Many students are employed by the department and by private firms near the university.

Assessment of Instruction

Information about assessment within each of the departmental programs can be found at https://QANR.usu.edu/ndfs/assessment.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Nutrition, Dietetics, and Food Sciences Department.

Graduate Programs

Registration Requirements for Graduate Students

Once admitted, students are required to maintain enrollment as follows: at least 3 credits to use university facilities and receive direction (including thesis or dissertation direction) from their major professor; at least 6 credits if on a Graduate Teaching or Research Assistantship (9 credits if employed less than 15 hours per week); at least 9 credits if on a Research Fellowship or unsupported; at least 6 credits if receiving tuition waivers, student loans, or other university-administered financial aid; and no more than 6 credits if employed full time by the university.

Assistantship Policy on Additional Employment

Graduate students in the department receiving a 0.5 FTE assistantship may not accept additional employment without written permission of their major professor and the department head; this policy is to ensure that graduate students have sufficient time available to complete the academic requirements of their degree in a timely fashion.

Financial Assistance

Some teaching assistantships and many research assistantships are available to graduate students in the Department of Nutrition, Dietetics, and Food Sciences. Teaching assistantships are used to cover the teaching needs of the department. Research fellowships and research assistantships are available through individual faculty members. Most research assistantships are tied to specific research projects.

Graduate students in the department receiving a 0.5 FTE assistantship may not accept additional employment without written permission of their major professor and the department head; this policy is to ensure that graduate students have sufficient time available to complete the academic requirements of their degree in a timely fashion.

The Gandhi Scholarship is available, on a competitive basis, to support outstanding students during their graduate education in food science. Each incoming student may select any advisor who fits his or her area of interest in food science. Awards are available for entering master's degree students, as well as for PhD candidates. Applications are due February 1. To obtain an application, visit the Department of Nutrition, Dietetics, and Food Sciences website or contact the departmental staff.

Additional Information

Additional information and updates may be obtained by writing or telephoning the Department of Nutrition, Dietetics, and Food Sciences directly or by checking out the departmental website at ndfs.usu.edu.

Graduation requirements described in this catalog are subject to change. Students should check with the Department of Nutrition, Dietetics, and Food Sciences concerning possible changes.

FACULTY - College of Agriculture and Applied Sciences

Programs

Applied Practice in Dietetics - Post-Bachelor's Certificate
Didactic Program in Dietetics - Post-Bachelor's Certificate
Dietetics - Didactic Program in Dietetics Emphasis - BS
Dietetic Internship - Post-Bachelor's Certificate
Food Science - Minor
Food Science - BS
Food Manufacturing - Certificate
Food Security Studies - Institutional Certificate of Proficiency
Food Processing - Certificate
Hunger and Food Security Studies - Minor
Master of Dietetics Administration - MDA
Food Safety and Quality - MFSQ
Nutrition and Food Sciences - MS
Nutrition and Food Sciences - PhD
Nutrition Science - BS
Nutrition Science - Pre-Health Emphasis - BS
Nutrition Science - Sports Nutrition Emphasis - BS
Practitioner of Food Safety - Post-Bachelor's Certificate
Master of Public Health: Public Health Nutrition Specialization - MPH

Courses

NDFS1000 - Introduction to Food Science and Technology - 3 - Credits
NDFS1010 - Chocolate: Science, History, and Society (BPS) - 3 - Credits
NDFS1020 - Science and Application of Human Nutrition (BLS) - 3 - Credits
NDFS1030 - Introduction to Dietetics and Nutrition Science - 1 - Credits
NDFS1240 - Food Literacy - 3 - Credits
NDFS1250 - Sanitation and Safety - 3 - Credits
NDFS1600 - Medical Terminology for Health Care Professionals - 2 - Credits
NDFS2020 - Nutrition Throughout the Life Cycle - 3 - Credits
NDFS2030 - Nutrition and Physical Performance - 2 - Credits
NDFS2040 - Fundamentals of Food Processing - 3 - Credits
NDFS2500 - Dietetics-Related Experiences I - 1 - 6 Credits
NDFS3010 - Didactic Program in Dietetics Orientation - 1 - Credits
NDFS3040 - Nutrition Assessment - 3 - Credits
NDFS3045 - Nutrition Assessment Lab - 1 - Credits
NDFS3050 - Education and Counseling Methods in Dietetics I (CI) - 3 - Credits
NDFS3060 - Education and Counseling Methods in Dietetics II (CI) - 3 - Credits
NDFS3065 - Education and Counseling Lab - 1 - Credits
NDFS3070 - Science of Food Preparation - 4 - Credits
NDFS3080 - Community Nutrition - 3 - Credits
NDFS3110 - Food, Technology, Sustainability and Health (DSC) - 3 - Credits
NDFS4010 - Preparation for Supervised Practice - 1 - Credits
NDFS4020 - Advanced Nutrition - 3 - Credits
NDFS4440 - Fundamentals of Food Engineering (QI) - 4 - Credits
NDFS4560 - Medical Nutrition Therapy (CI) - 4 - Credits
NDFS4710 - Food Service Systems - 3 - Credits
NDFS4720 - Management in Dietetics (QI) - 3 - Credits
NDFS4780 - Maternal and Child Nutrition (CI) - 3 - Credits
NDFS4900 - Special Problems - 1 - 4 Credits
NDFS5010 - Hunger Issues and Solutions - 3 - Credits
NDFS5020 - Meat Science and Technology - 4 - Credits
NDFS5030 - Dairy Technology and Processing - 3 - Credits
NDFS5040 - Dairy Foods Processing Laboratory - 1 - Credits
NDFS5050 - Clinical Skills I - 1 - Credits
NDFS5060 - Clinical Skills II - 2 - Credits
NDFS5080 - Food Service Skills - 2 - Credits
NDFS5090 - Community Skills I - 1 - Credits
NDFS5100 - Sensory Evaluation of Food (QI) - 3 - Credits
NDFS5110 - Food Microbiology (CI) - 3 - Credits
NDFS5111 - Food Microbiology Laboratory - 1 - Credits
NDFS5210 - Advanced Public Health Nutrition (CI) - 3 - Credits
NDFS5230 - Communication of Current Topics in Nutrition (CI) - 3 - Credits
NDFS5250 - Occupational Experiences in Nutrition and Food Sciences - 1 - 3 Credits
NDFS5300 - Advanced Micronutrient Nutrition - 3 - Credits
NDFS5310 - Fundamentals of Nutrition Research - 3 - Credits
NDFS5320 - Advanced Sports Nutrition - 3 - Credits
NDFS5410 - Nutrient Gene Interactions (CI) - 3 - Credits
NDFS5430 - Nutrition Assessment - 3 - Credits
NDFS5431 - Education and Counseling Methods in Dietetics I - 3 - Credits
NDFS5432 - Community Nutrition - 3 - Credits
NDFS5433 - Advanced Nutrition - 3 - Credits
NDFS5434 - Food Service Systems - 3 - Credits
NDFS5435 - Education and Counseling Methods in Dietetics II - 3 - Credits
NDFS5436 - Science of Food Preparation - 4 - Credits
NDFS5437 - Medical Nutrition Therapy - 4 - Credits
NDFS5438 - Management in Dietetics - 3 - Credits
NDFS5450 - Study Abroad Experience - 1 - 5 Credits
NDFS5500 - Food Analysis (QI) - 4 - Credits
NDFS5510 - Food Laws and Regulations - 3 - Credits
NDFS5560 - Food Chemistry - 4 - Credits
NDFS5610 - Food and Bioprocess Engineering - 3 - Credits
NDFS5710 - Cereal Science and Technology - 3 - Credits
NDFS5750 - Advanced Dietetics Practicum - 2 - Credits
NDFS5800 - Counseling and Motivational Interviewing for Health Professionals - 3 - Credits
NDFS5920 - Food Product Development (CI) - 3 - Credits
NDFS6010 - Hunger Issues and Solutions - 3 - Credits
NDFS6020 - Meat Science and Technology - 4 - Credits
NDFS6030 - Dairy Technology and Processing - 3 - Credits
NDFS6040 - Dairy Foods Processing Laboratory - 1 - Credits
NDFS6050 - Community Nutrition Experience - 3 - Credits
NDFS6051 - Advanced Community Nutrition - 2 - Credits
NDFS6060 - Community Skills II - 2 - Credits
NDFS6100 - Sensory Evaluation of Food - 3 - Credits
NDFS6110 - Food Microbiology - 3 - Credits
NDFS6111 - Food Microbiology Laboratory - 1 - Credits
NDFS6140 - Introduction to Public Health - 3 - Credits
NDFS6150 - Principles of Food Sanitation - 3 - Credits
NDFS6160 - Principles of Food Toxicology - 3 - Credits
NDFS6170 - Food Safety and Quality: Food Safety Management - 1 - Credits
NDFS6171 - Food Safety and Quality: Current Good Manufacturing Practice - 1 - Credits
NDFS6172 - Food Safety and Quality: Hazard Analysis and Critical Control Points - 1 - Credits
NDFS6173 - Food Safety and Quality: Preventive Controls - 1 - Credits
NDFS6174 - Food Safety and Quality: Standards for Produce Safety - 1 - Credits
NDFS6175 - Food Safety and Quality: Acidified Foods - 1 - Credits
NDFS6180 - Food Safety Inspection and Auditing - 1 - 2 Credits
NDFS6200 - Nutritional Epidemiology - 3 - Credits
NDFS6210 - Advanced Public Health Nutrition - 3 - Credits
NDFS6230 - Communicating Current Topics in Public Health - 3 - Credits
NDFS6240 - Program Planning and Evaluation in Public Health - 3 - Credits
NDFS6250 - Clinical Nutrition Experience - 3 - 7 Credits
NDFS6251 - Advanced Clinical Nutrition - 2 - Credits
NDFS6280 - Public Health Administration and Leadership - 3 - Credits
NDFS6300 - Advanced Micronutrient Nutrition - 3 - Credits
NDFS6310 - Fundamentals of Nutrition Research - 3 - Credits
NDFS6320 - Advanced Sports Nutrition - 3 - Credits
NDFS6350 - Food Service Management Experience - 3 - 5 Credits
NDFS6351 - Advanced Food Service Management - 2 - Credits
NDFS6410 - Nutrient Gene Interactions - 3 - Credits
NDFS6440 - Food Composition and Analysis - 3 - Credits
NDFS6450 - Dietetics Career Essentials - 1 - Credits
NDFS6460 - Medical Dietetics (CI) - 4 - Credits
NDFS6470 - Global Public Health - 3 - Credits
NDFS6500 - Food Analysis - - 4 Credits
NDFS6510 - Food Laws and Regulations - 3 - Credits
NDFS6530 - Food Packaging and Labeling - 3 - Credits
NDFS6540 - Introduction to Epidemiology and Biostatistics - 3 - Credits
NDFS6550 - Public Health Policy and Advocacy - 3 - Credits
NDFS6560 - Food Chemistry - 4 - Credits
NDFS6570 - Communication Techniques in Dietetics - 3 - Credits
NDFS6580 - Application of Research Principles in Dietetics - 3 - Credits
NDFS6600 - Current Topics in Obesity - 3 - Credits
NDFS6610 - Food and Bioprocess Engineering - 3 - Credits
NDFS6620 - Microbiology of Fermented Dairy Foods - 3 - Credits
NDFS6640 - Food Proteins and Enzymes - 3 - Credits
NDFS6660 - Cheese Science - 3 - Credits
NDFS6680 - Milk Concentration and Fractionation - 3 - Credits
NDFS6700 - Dairy Chemistry - 2 - Credits
NDFS6710 - Cereal Science and Technology - 3 - Credits
NDFS6760 - Special Topics in Nutrition and Food Science - 1 - 3 Credits
NDFS6770 - Dietetics Leadership and Management I - 3 - Credits
NDFS6780 - Dietetics Leadership and Management II - 3 - Credits
NDFS6790 - Current Issues in Dietetics - 3 - Credits
NDFS6800 - Counseling and Motivational Interviewing for Health Professionals - 3 - Credits
NDFS6810 - Social Determinants of Health - 3 - Credits
NDFS6850 - Applied Practice Experience in Public Health Nutrition - 3 - 6 Credits
NDFS6900 - Special Problems - 1 - 4 Credits
NDFS6910 - Teaching Experiences in Nutrition and Food Sciences - 1 - 2 Credits

NDFS6950 - MFSQ Special Problems - 1 - 4 Credits
NDFS6960 - MFSQ Capstone - 1 - 4 Credits
NDFS6970 - Thesis Research - 1 - 12 Credits
NDFS6980 - MDA Master's Project - 1 - 3 Credits
NDFS6990 - Continuing Graduate Advisement - 1 - 12 Credits
NDFS7800 - Seminar - 1 - Credits
NDFS7970 - Dissertation Research - 1 - 12 Credits
NDFS7990 - Continuing Graduate Advisement - 1 - 12 Credits

Physics Department

Physics

Department Head: Jan J. Sojka
Location: Science Engineering Research 250A
Phone: (435) 797-2857 | **FAX:** (435) 797-2492
E-mail: physics@usu.edu
Website: http://physics.usu.edu

Associate Department Head: Charles G. Torre, Science Engineering Research 232, (435) 797-3426, charles.torre@usu.edu

Academic Advisor: Karalee Ransom, Science Engineering Research 250D, (435) 797-402, karalee.ransom@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Physics; BS in Physics Teaching; BS in Composite Teaching—Physical Science (Physics)

Undergraduate emphases: *BS*—Professional Emphasis or Applied Emphasis

Graduate specializations: Upper Atmospheric Physics (MS only)—Restricted access MS degree that emphasizes upper atmospheric and space physics applied knowledge for space weather operations clientele.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at www.physics.usu.edu/assessment/assessment.htm.

Undergraduate Programs

Objectives

The Physics Department embraces undergraduate students from all quarters of the university—in introductory courses required for majors by various departments, in courses for more general audiences that are part of the University Studies Program, and in upper-level courses designed primarily to fulfill bachelor's degree requirements in Physics. These courses, and the degree programs offered, are strongly impacted by the department's central goals:

1. to communicate the beauty and utility of the fundamental principles of the physical universe and the power of describing nature in quantitative terms,
2. to create new knowledge,
3. to foster critical and creative thinking,
4. to enhance the ability of citizens to participate in a technological democracy,
5. to assist in the preparation of elementary and secondary school teachers,
6. to provide opportunities for students to sharpen their communication and interpersonal skills, and
7. to develop new tools and texts to improve physics pedagogy.

The degree programs of the department are constructed to be rigorous, yet flexible, and are intended to help students prepare for careers in academia, government and industrial laboratories, medicine, law, teaching, and business. Required course and laboratory work in these programs carefully balances theory and experiment. Because the department believes one must participate in discovery to understand science, undergraduates are encouraged to engage in departmental research early in their studies, and a formal research experience is integral to most departmental programs. The department's Microgravity Research Team (MRT) activities provide excellent opportunities for students of all backgrounds to participate in space-related research.

Requirements

Departmental Admission and Graduation Requirements

New freshmen admitted to USU in good standing qualify for admission to the degree programs in Physics. Admission in good standing for students transferring from another institution requires a minimum transfer GPA of 2.2, while students transferring from another USU major are required to have a minimum total GPA of 2.0. Students wishing to complete the Teaching Major in Physics must apply for admission to the Secondary Education program as well. Requirements for admission to the **Secondary Teacher Education Program (STEP)** include a minimum GPA of 3.0 in PHYS 2210, PHYS 2215, PHYS 2220 and PHYS 2225; and at least 60 total credits completed with a minimum GPA of 2.75. A Composite Teaching Major in Physical Science is available through either the Physics or the Chemistry and Biochemistry departments. Students applying for admission to the STEP with the Composite major must satisfy the latter requirements, plus a minimum GPA of 3.0 in CHEM 1210, CHEM 1215, CHEM 1220, and CHEM 1225.

Students may use no more than one course with the P-D-F option to satisfy a major or minor requirement in Physics. All other courses used to satisfy major or minor requirements must be completed with at least a *C-* grade, and the total GPA in all required Physics courses must be at least 2.3. The Teaching Major and Teaching Minor in Physics and the Composite Teaching Major in Physical Science require a 3.0 minimum GPA in Physics courses and a minimum 2.75 overall GPA for graduation.

Suggested Four-year Plans

Suggested semester-by-semester four-year plans for students working toward a Bachelor of Science or Bachelor of Arts degree in majors are available in the Department of Physics.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Undergraduate Research Opportunities

The Physics Department at Utah State University has a long record of successfully involving its undergraduate students in research and extracurricular scholarly activities. Learning what science is, requires more than just doing homework and taking exams; it requires getting involved in the pursuit of knowledge that is not yet in any textbook. Undergraduates can take PHYS 4900 (Research in Physics) for academic credit. However, many students participate in research activities without credit, because they enjoy being immersed in the act of discovery. Having a meaningful research experience and working closely with faculty are useful for applying for employment, admission to graduate schools, and applying for competitive scholarships. For more information, contact Charles Torre at charles.torre@usu.edu, or visit the following website: http://physics.usu.edu/research/undergrad.html

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Learning Objectives

The Physics Department has the following learning objectives. While many of these objectives are applicable to all six departmental programs, some apply only to specific programs. To see which program(s) includes each learning objective, see the footnotes which follow.

1. Capable communication, written and oral 1,2,3,4,5,6
2. Skepticism 1,2,3,4,5,6
3. Ability in critical thinking and problem solving 1,2,3,4,5,6
4. Knowledge of physics subjects to an advanced undergraduate level 1,2,3,4,5,6
5. Wide knowledge of physics subjects to an advanced undergraduate level 2,3
6. Knowledge of focused applied areas of study to the undergraduate level 4
7. Experience in experimental physics 1,2,3,4,5,6
8. Experience in physics research 1,2,3,4,5,6
9. Knowledge of computer methods in physics 1,2,3,4,5,6
10. Knowledge of broadening subjects 1,2,3,4,5,6
11. Knowledge of mathematics to undergraduate calculus level 1,2,3,4,5,6
12. Knowledge of mathematics to undergraduate differential equations level 1,2,3,4,5
13. Knowledge of statistics to undergraduate level 5,6
14. Knowledge of philosophy of science to the undergraduate level 1
15. Knowledge of a foreign language to the undergraduate level 1

Programs

The footnotes following each of the preceding learning objectives indicate which program(s) include that objective. The six undergraduate programs are as follows:

1 BA degree in physics
2 BS degree in physics
3 BS degree in physics with professional emphasis
4 BS degree in physics with applied emphasis
5 BS degree in physics teaching
6 BS in composite teaching physical science

Assessment

The Physics Department supports an ongoing program of assessment based upon input from students, alumni, colleagues, professional organizations, etc. For details, see: http://physics.usu.edu/assessment/assessment.htm

Additional Information

Information concerning degree programs, recommended schedules of courses, career opportunities, and opportunities to participate in the Get Away Special (GAS) or Society of Physics Students (SPS) activities, and in other areas of undergraduate research may be obtained by consulting the Physics advisor in SER 250. Also see the department's website at www.physics.usu.edu/.

Major requirement sheets, which provide details of undergraduate programs in physics, can be obtained from the department.

Graduate Programs

Admission Requirements

In addition to the general requirements for admission established by the School of Graduate Studies, the department admission committee bases its decisions for offering admission on the following criteria: review of applicants' undergraduate records, letters of recommendation, performance in graduate courses (if any), performance in research (if any), and scores on the Graduate Record Examination. Students whose native language is not English are strongly encouraged to submit to the School of Graduate Studies results of the Test of Spoken English (TSE). Regardless, nonnative English speakers must submit a score for the Test of English as a Foreign Language (TOEFL). If a satisfactory score on the TSE is not provided, such students will be required to take a test given by the Intensive English Language Institute (IELI) at USU. The purpose of this test is to guide the selection of remedial language courses, if needed, to help with physics coursework comprehension.

Placement

Prior to registering for graduate courses for the first time, each student will consult with the Graduate Student Tracking Committee and the departmental advisor. Based on these discussions, the student will be advised to register for courses in either the Physics Department standard curriculum or advanced curriculum. Continuing advisement concerning courses will be provided by the Graduate Student Tracking Committee, the departmental advisor, and the student's graduate supervisory committee.

Qualification Requirements

Each student enrolled in the PhD program will be evaluated for qualification for PhD work. Consideration of qualification will occur no later than the end of the second semester after the student has been admitted for study in the PhD program and has taken a first graduate course in physics. Evaluation will be based on whatever relevant information the student wishes to have presented on his or her behalf (coursework, research, TA performance, subject GRE, etc.), but must include a faculty evaluation of coursework in physics for courses taken at USU. Normally, the student should present the results of at least four physics courses. Based on the various pieces of information presented on behalf of the student, the department will judge whether or not the student is qualified to continue in the PhD program. If not, a student already having an MS in physics from USU will be asked to leave. A student without an MS in physics from USU will be invited to finish his or her MS degree. Upon completion, the student can reapply to the PhD program, but acceptance will be contingent on the evaluation of the student's graduate work to that point.

Research

Space Science

The Physics Department is active in the field of atmospheric and space science, in close association with the interdisciplinary Center for Atmospheric and Space Sciences and the Space Dynamics Laboratory. Atmospheric and space science involves many areas of physics, in addition to such disciplines as engineering, chemistry, and meteorology. At USU, these groups enjoy a strong cooperative relationship and, as a result, the atmospheric and space science program has flourished for many years. Once the departmental requirements have been met, students may select courses from the offerings of the associated departments suited for their particular interests and needs while they gain research experience on challenging problems in atmospheric and space science. Opportunities are available for students in both experimental and theoretical projects. These include participation in instrument development and data analysis related to rocket, satellite, and space shuttle projects and projects in experimental design and data analysis related to incoherent-scatter and coherent radars, ground-based magnetometer, and ground-based optical instruments including a LIDAR system. Opportunities also exist in theoretical modeling of physical processes occurring in both the neutral atmosphere and in the plasma in the solar-terrestrial environment.

Plasma Theory and Confinement

Research in the field of magnetic confinement fusion at Utah State University includes the theoretical development of improved hybrid fluid/kinetic models for terrestrial and astrophysical plasmas. This work provides theoretical support for next-step fusion experiments such as the International Thermonuclear Experimental Reactor (ITER).

Surface Physics

The surface physics group has an active experimental research program studying the structure, growth, dynamics, electronic properties, and optical properties of surfaces, interfaces, and adsorbed layers. The group has expertise in the interactions of electrons, ions, and photons with materials. Experimental techniques used within the group include atomic force microscopy (AFM), Auger electron spectroscopy (AES), infrared spectroscopy, ion scattering spectroscopy, ion implantation, low-energy electron diffraction (LEED), photo emission spectroscopy, scanning electron microscopy (SEM), scanning tunneling microscopy (STM), secondary ion mass spectroscopy (SIMS), thermal deflection spectroscopy, ultra fast femtosecond laser spectroscopy, vapor pressure adsorption isotherms, and x-ray diffraction. This interdisciplinary research brings together the fields of solid-state physics, surface physics and chemistry, optics, physical chemistry, and electrochemistry through active collaborations between Physics, Chemistry and Biochemistry, Mechanical and Aerospace Engineering, and other departments. It includes both basic and applied research.

Physics of Quantum Devices

The rapid advance of technology has made quantum physics an indispensable foundation of the nanoscale devices. The Physics Department is positioned to explore this new field with two complementary research themes. The first theme is to study the growth of novel electronic/photonic materials involving group III-V elements using a commercial, state-of-the-art molecular beam epitaxy machine. Also, novel semiconductor quantum nanostructures are studied using an in-situ scanning tunneling microscope directly attached to the machine. The second theme is to use the most advanced surface science techniques to fabricate nanoscale structures on semiconductor surfaces. The interdisciplinary nature of this field provides a stimulating research environment for faculty and students with backgrounds in physics, electrical engineering, material sciences, and chemistry.

Fields, Astrophysics, and Spacetime Theory

The fundamental theoretical physics group at USU engages in research in selected areas of: general relativity and gravitation, supergravity, string theory, unified field theories, black hole astrophysics, mathematical physics, computer algebra. The research group benefits from a strong collaborative connection with the researchers from the Department of Mathematics and Statistics.

Physics Education

The USU Physics Department is engaged in the study of how to improve the teaching and learning of physics. The program currently emphasizes introductory and general education courses and involves the development of hands-on, inquiry-based curricula for lecture and laboratory, development of associated laboratory and multimedia equipment and modules, preparation of new texts and workbooks, sponsorship of undergraduate research, and outreach to the precollege community.

Complex Materials and Dynamics

Current work at USU in the interdisciplinary area of complex systems includes development of new data analysis techniques for uncovering evidence for determinism and computation in biological systems.

Financial Assistance

Financial assistance in the form of teaching assistantships and fellowships is awarded by the department. Research assistantships are available from research groups or individuals. Some support for teaching laboratory sections or grading papers is available. To be eligible for a teaching assistantship (TA), a student must successfully complete a graduate TA workshop. Nonnative English-speaking students must pass a test of spoken English (or submit a satisfactory TSE score) administered by the Intensive English Language Institute before being admitted to the TA workshop. The MS specialization in Upper Atmospheric Physics is a Western Regional Graduate Program, see School of Graduate Studies.

Career Opportunities

Master's degree holders in physics are generally employed by industrial or government laboratories as either physicists or engineers. Some are hired as teachers by high schools and by two-year colleges. Holders of the PhD in physics will generally be hired as research and development physicists by industrial or government laboratories and as professors in universities (though this may require additional postdoctoral research experience).

Additional Information

Regularly updated information about Physics Department activities and programs may be obtained via the Web at www.physics.usu.edu/.

Plants, Soils and Climate Department

Plants, Soils and Climate

Department Head: Matt Yost
Location: Agricultural Science 344A
Phone: (435) 797-4210 | **FAX:** (435) 797-3376
E-mail: matt.yost@usu.edu
Website: psc.usu.edu/

Undergraduate Advisor: Abby Macbeth, Agricultural Science 411B, (435) 797-0454, abby.macbeth@usu.edu

Undergraduate Off-Campus Advisor: Tayler Mountford, Salt Lake Center, (435) 797-4230, tayler.mountford@usu.edu

Graduate Program Director: Jeanette Norton, Agricultural Science 340, (435) 797-2166, jeanette.norton@usu.edu

Degrees Offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Soils and Sustainable Land Systems; BS in Residential Landscape Design and Construction, and Plant Science; Master of Science (MS), and Doctor of Philosophy (PhD) in Climate Science, Plant Science, Soil Science and Ecology.

Undergraduate emphases: Soils and Sustainable Land Systems BS, BA - Environmental Soil Science; Sustainable Food Production; Applied Climatology; Plant Science BS-Horticulture and Cropping Systems; Plant Science, BS-Research; Residential Landscape Design and Construction

Graduate specialization: Bioinformatics and Computational Biology

One Year Certificate and Associate of Applied Science Degree: Ornamental Horticulture - AAS
Full Details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at psc.usu.edu/assessment.

Undergraduate Programs

Objectives

The departmental curricula emphasize understanding the physical, chemical, and biological mechanisms that operate in the continuum of the soil, plants, and the atmosphere; and how they affect management of a wide range of agricultural and natural systems.

The undergraduate teaching program facilitates the acquisition and application of knowledge, understanding, and skills by students within their chosen field of study. The program also prepares students to develop lifelong learning skills, understand and appreciate diversity, be productive citizens of the world, and be professionals in their vocations.

The department also provides training of undergraduates for graduate school and maintains a strong graduate program in biometeorology, plant science, and soil science. The research that underlies the graduate program is conducted in biometeorology (micro- and meso-scale), crop biotechnology, crop ecology, crop physiology, crop science, horticulture (general and ornamental), plant breeding, soil microbiology, pedology, soil chemistry, soil physics, soil fertility, environmental soil and water science, and arid landscaping.

A major effort is directed at extending research and teaching programs to all citizens of the State of Utah.

Departmental Facilities

To support these objectives, departmental facilities include well equipped laboratories and greenhouses on campus. The University has significant acreage for field research at strategic locations throughout the state. In addition, the USU Botanical Center in Kaysville offers opportunities to a broad spectra of clientele. The department maintains state-of-the-art analytical equipment for the measurement of critical soil, plant, and climatic variables.

Requirements

Departmental Admission Requirements
Persons meeting the admission requirements for the university are admitted to the Department of Plants, Soils, and Climate by listing the department major code on the university admission application form. A change of major form is used when students in good standing wish to transfer from another department to the Department of Plants, Soils and Climate.

ARCPACS Certification
Students who meet specific requirements are eligible, after five years of work experience, for professional certification as an Agronomist, Crop Scientist, Crop Specialist, Horticulturist, Soil Scientist, Soil Specialist, or Soil Classifier through the American Registry of Certified Professionals in Agronomy, Crops, and Soils (ARCPACS). General information about ARCPACS certifications can be found at agronomy.org/certifications/. Students interested in becoming certified should inform their advisor of their intent. This certification is granted in addition to the bachelor's degree.

Sample Four-year Plans
Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests. Due to the many changes and new major options, degree plans are not published in this catalog. To obtain current information, students should visit the College of Agriculture and Applied Sciences Student Services Center.

Undergraduate Research Opportunities
The Plants, Soils, and Climate Department is dedicated to providing undergraduate students with opportunities to participate with faculty members in research and creative activities. Examples of recent research include seed germination requirements, plant growth regulators, salt cedar control, pasture growth dynamics, soil-less media characteristics, gene sequencing, and essential oils from native plants. In addition to faculty mentorship of such activities, students may obtain grants of up to $1,000 for support of their projects. For further information, students may contact any departmental faculty member, or view the research website at: research.usu.edu/.

Departmental Assessment
Review and assessment of departmental programs is a commitment of the Plants, Soils, and Climate Department. In 2010, the department completed a USDA-National Institute for Food and Agriculture (NIFA) review. On an ongoing basis, the department evaluates all academic programs. More information about departmental assessment can be found at: psc.usu.edu/htm/about/assessment/.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For more information about requirements for undergraduate programs and the sequence in which courses should be taken, see major requirement sheets available from the advisor for the Plants, Soils, and Climate Department.

Graduate Programs

Admission Requirements

Admission requirements for the Plant, Soils and Climate department are similar to those of the USU School of Graduate Studies. Students without an undergraduate or graduate degree in plant science, soil science, climate, or other biological or physical science discipline may be required to complete selected coursework prior to full matriculation into the graduate program. Qualified applicants are sometimes denied admission because faculty members do not have funding or time to advise additional students. Therefore, it is highly recommended that applicants discuss his or her goals with appropriate members of the graduate faculty prior to preparing an application.

Degree Programs and Specializations

Research projects associated with the following degrees will vary over time so students are encouraged to visit the home page websites of the graduate faculty to determine research interests and lists of recent publications https://qanr.usu.edu/psc/directory/#faculty. The Master of Science and Doctor of Philosophy degrees are offered as follows:

Plant Science: This degree includes research in the areas of environmental plant physiology, genetics, molecular biology, plant breeding, crop production, sustainable and organic crop and forage production systems, weed science, bioinformatics and computational biology, urban landscape management, and water management in agricultural and horticultural crops, including turf and other ornamentals.

Soil Science: This degree includes research soil and water chemistry/biogeochemistry, soil biology and ecology, soils and nutrient bioavailability, soil physics, soil and water management, soil genesis, morphology and classification, and sustainable agroecosystems.

Climate Science: This degree includes research of climate dynamics and variability, regional climate modeling, modeling of hydrological processes, spatial variation in surface fluxes of heat and water vapor, micrometeorology, and remote sensing.

Ecology: This is an interdepartmental program in cooperation with the Ecology Center.

Climate Adaptation Science Specialization: This is offered as an interdepartmental program.

Course Requirements

Students upon admission are expected to have courses or knowledge equivalent to an undergraduate BS degree in the program or a closely related field. Course requirements leading to MS or PhD degrees are developed jointly by the student and the student's supervisory committee. Each student must have a Program of Study approved by their supervisory committee. Course selections reflect areas of specialization. Designation of a specialization is optional. Official specializations will appear on transcript. There are additional specific departmental requirements regarding physical sciences, biological sciences, and mathematics courses, which differ depending on the program and area of specialization.

All graduate students are required to complete two credits of PSC graduate seminar (PSC 6890 /7890).

Financial Assistance and Assistantships

The financial awards provided by the School of Graduate Studies are listed in this site. Most monies used to assist students in the department come from research grants controlled by individual faculty members. Negotiations for financial assistance (research assistantships or part time employment) are made between faculty members and students. The MS and PhD in Biometeorology is a Western Regional Graduate Program.

Additional Information and Updates

Additional information and updates concerning graduate faculty and graduate student opportunities can be obtained from the Web at: psc.usu.edu/.

Psychology Department

Psychology Department

The Department of Psychology aims to improve human flourishing by training students, conducting research, and collaborating with and serving its community. It is home to 29 tenured/tenure-track faculty, two instructional faculty, one research faculty, one clinical faculty, seven core staff, research staff, postdocs, teaching, and research assistants. We work to educate more than 800 undergraduate majors in Psychology and over 200 graduate students, delivering courses that fill more than 5,000 seats annually.

Degrees offered include a Bachelor of Science (BS) and Bachelor of Arts (BA) degree in Psychology, a Master of Education (M.Ed.) in School Counseling, an Education Specialist Degree (Ed.S.) in Psychology, a Doctor of Philosophy (Ph.D.) in Neuroscience, and a Doctor of Philosophy (Ph.D.) in Psychology. Doctoral specializations include Behavior Analysis, Brain and Cognition, Combined Clinical/Counseling, and School Psychology.

The faculty of the psychology department conducts research on various topics, including impulsivity, self-control, addictions, relapse, treatment of severe problem behavior among individuals with disabilities, cognitive development, multisensory processing, neuropsychiatric disorders, evidence-based intervention, behavioral health, culture and inclusivity, self-regulated learning, child behavior problems, school mental health, and youth and caregiver mental health.

School of Accounting Department

School of Accountancy

Department Head: Christopher Skousen
Location: Eccles Business Building (EBB) 815
Phone: (435) 797-2429 | **FAX:** (435) 797-1475
Website: huntsman.usu.edu/acct/

Undergraduate Advisors:
Myra Durrant, EBB 309, (435) 797-2272, myra.durrant@usu.edu
Oakley Ransom, EBB 309, 435-797-2272, oakley.ransom@usu.edu

Director of Graduate Accounting Programs:
Devon Erickson, EBB 808, (435) 797-2993, devon.erickson@usu.edu

Degrees Offered:
Majors: Bachelor of Science (BS), Bachelor of Arts (BA) in Accounting
Undergraduate Minors: Accounting
Graduate Programs: Master of Accounting (MAcc)

Assessment
Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at huntsman.usu.edu/soaassessment/index.

Department Mission Statement
"We achieve excellence in accounting education by providing an engaged learning experience, enabling our students to distinguish themselves as ethical, dedicated, and successful business professionals."

Guiding Principles
The following eight values guide us in accomplishing our mission:

- **Integrity:** We expect adherence to the highest standards of honesty, personal accountability, and ethical behavior from our faculty and our students.
- **Respect:** We promote the fair treatment of individuals and aspire to an increased global vision by respecting, experiencing, and learning from diverse points of view.
- **Teaching:** We seek to disseminate accounting, information technology, and business knowledge in dynamic and creative ways to our students and business community.
- **Discovery:** We are committed to producing new and relevant educational and business ideas and to a process of lifelong learning for ourselves and our students.
- **Stakeholders:** We value the diverse contributions received from our students, faculty, alumni, employers, and business community.
- **Rigor:** We seek to create rigorous learning activities that challenge our students to be well-rounded critical thinkers and communicators, capable of undertaking leadership roles.
- **Global Vision:** We embrace the opportunities resulting from an increasingly dynamic and interconnected global business environment.
- **Resources:** We seek continual improvement in our financial strength and national prominence.

Financial Assistance
The Huntsman School offers scholarships to undergraduate students. Each graduate program has unique scholarships, fellowships, assistantships, and waivers available. Details about Huntsman School scholarships can be found at huntsman.usu.edu/scholarships.

Undergraduate Program Requirements

Huntsman School of Business Admission Requirements

First-Year and Transfer Students are admitted to the Huntsman School of Business based on USU's Admission Requirements. **Current USU Students** in good standing qualify for admission to a Huntsman School major.
Huntsman School Admission Details: https://huntsman.usu.edu/undergraduate/apply

All students enrolled at USU are required to satisfy the General Education Requirements and University Studies Requirements of the University.

Matriculation Requirement and Transfer Limitation
To earn a bachelor's degree in a Huntsman School major, at least 50 percent of the required Huntsman School credits must be earned from coursework taken from the Utah State University Huntsman School of Business.

USU Credits and Business Credits
At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student's major. At least 50 percent of the Huntsman School credits required for a Huntsman School degree must be taken from the Utah State University Huntsman School or its departments, which include: School of Accountancy, Economics and Finance, Management, Marketing and Strategy, and Data Analytics and Information Systems. At least 12 credits of 3000-level or above accounting courses must be completed through the USU School of Accountancy.

Accounting Admission Requirements
In addition to meeting the Huntsman School of Business requirements, students must have achieved an overall GPA of 2.0 or higher.

General Instructions for all Accounting Majors
Since some accounting courses are not offered every semester and many have prerequisites, students should plan their program at least a year ahead.

Internships
All Accounting majors are required to complete an experiential learning experience. Accounting students are strongly encouraged to consider obtaining this experience via formal internships. Increasingly, professional placement opportunities upon graduation are found through participation in the internship program options. Some of the internship opportunities may require absence from campus for a semester, oftentimes during the January to April time period. Therefore, students should consult with their academic advisor and internship coordinator early in their academic career, in order to establish a proper curriculum plan enabling them to take full advantage of internship opportunities with the least disruption to their academic schedule and progress.

Graduation Requirements
To be recommended by the department for graduation, majors in the School of Accountancy must have a grade point average of at least 2.50 in their upper-division Huntsman School of Business acumen and major requirement courses, a C or better in HSB business acumen courses, at least a 2.50 GPA in ACCT courses, and an overall GPA of 2.0. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Four-Year Degree Plan (8 Semesters)
A four-year degree plan for the Accounting major can be found in the catalog and at huntsman.usu.edu/advising/majors/accounting_major.

Second Bachelor's Degree in Accounting
Students seeking a second bachelor's degree in accounting must be approved by the School of Accountancy, must achieve an accounting and overall grade point average of 2.5, and must complete the course of study listed above for an accounting major. For further information, refer to the *Second Bachelor's Degree*, in the Bachelor's Degree Requirements section.

Graduate Program

The Master of Accounting (MAcc) program provides greater breadth and depth in accounting, auditing, and taxation to develop the level of understanding, skill, and leadership ability necessary to enter professional accountancy and related business careers.

Admission Requirements
Candidates are considered based on their demonstrated excellence in their undergraduate degree program. A GPA of 3.0 or better for the last 60 semester credits of undergraduate work is strongly recommended. The recommended undergraduate accounting core GPA is 3.0 or better. Official GMAT scores (not required) may be provided for consideration for merit-based tuition waivers such as the Excellence waiver. Letters of recommendation, professional experience, professional certification, and leadership are also considered in admission decisions. Students may apply for admission during their junior year of baccalaureate study. USU accounting students may take graduate courses during their last year of undergraduate study, provided prerequisite courses have been completed, they have been admitted into a graduate program, they have approval from the MAcc advisor, and a split registration form is approved by the dean of the School of Graduate Studies.

Students with the equivalent of a USU undergraduate degree in Accounting have completed all of the preparatory work for graduate study. Students with less than the equivalent of the undergraduate program are expected to make up the deficiencies. The director of Graduate Accounting Programs will assist in necessary program scheduling.

Graduate students are expected to maintain an overall GPA of 3.0 to remain in the program.

Complete information relative to the details of the program and course scheduling is available from the School of Accountancy.

Financial Assistance
Financial assistance is available in the form of President's Fellowships, Graduate School Fellowships, graduate assistantships, and special School of Accountancy scholarships. Applications for assistance should be made after the application for admission to the School of Graduate Studies is filed but before March 1 of each year. Application forms are available from the School of Accountancy, and the awards are normally announced by April 15.

FACULTY - Jon M. Huntsman School of Business Faculty

Programs

Accounting - Minor
Accounting - BA, BS
Executive Master of Accounting - EMAcc (NOT CURRENTLY OFFERED)
Accounting - MAcc

Courses

ACCT2010 - Financial Accounting Principles - 3 - Credits

Robin Reid (last name S-Z) ENGR 314, (435)797-2705, robin.reid@usu.edu

Graduate Program Coordinator: Taryn Sommers, SER 301D, (435) 797-2209 taryn.sommers@usu.edu
Schedule appointment: https://studentappts.usu.edu/ramonline/BookAppt?AG=1404

Undergraduate Degrees and Programs Offered: Computer Science - BS

Graduate Degrees Offered: Master of Science (MS) in Computer Science, Master of Science (MS) in Data Science, and Doctor of Philosophy (PhD) in Computer Science; Master of Computer Science (MCS)

Graduate Specializations: *MS*—Artificial Intelligence, Information Systems, Parallel Systems, Software Engineering

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at cs.usu.edu/assessment/undergraduate/index for undergraduate programs and cs.usu.edu/assessment/graduate/index for graduate programs.

Accreditation: The Computer Science undergraduate program is accredited by the Computing Accreditation Commission of ABET, www.abet.org, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; telephone (410) 347-7700.

Program Educational Objectives

As defined by ABET, program educational objectives are broad statements that describe what graduates are expected to attain within a few years of graduation. The School of Computing at Utah State University has the following program educational objectives. The Computer Science program of study is designed to provide undergraduates with the knowledge, skills, and tools to reach these educational objectives.

Program Educational Objective I: Our graduates will be successfully employed in the computing profession and/or obtain advanced degrees in computing or a related discipline.

Program Educational Objective II: Our graduates will adapt and innovate in a rapidly changing field, engage in lifelong learning and engagement through continued professional development, contribute to professional societies and organizations, promote growth and prosperity of the regional economy at the state and national level, and foster personal and organizational growth.

Program Educational Objective III: Our graduates will participate in professional societies, engage in service to the community, and contribute to efforts to comply with software licensing, privacy protection, and quality and safety assurance.

Student Outcomes

The School of Computing Bachelor of Science degree program is designed in accordance with the ABET accreditation criteria for Computer Science degrees. The program is ABET-accredited.

The student outcomes of the School of Computing are governed by ABET, which has established the following student outcomes:

- Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Assessment

The School of Computing has an ongoing assessment process. Faculty members devote time and resources to frequent assessment of the level or degree to which stated objectives are being met, the objectives themselves, and the departmental mission statement. The department then uses these results to establish priorities and guide the program. For further information, go to cs.usu.edu/ and click on **assessment**.

Computer Science

Computer Science is one of the fastest growing fields of study in our society. Excellent employment opportunities are available to computer science graduates. Graduates in Computer Science work for numerous Utah-based corporations, as well as companies such as Google, Amazon.com, Microsoft, IBM, and Hewlett-Packard.

The Computer Science bachelor's degree is a four-year degree. By working with a departmental advisor, students may develop a plan of study tailored to their own unique career objectives.

Undergraduate Research

The School of Computing provides opportunities for undergraduates to participate in research projects. A student may register for CS 4950 to receive credit for their research. Students may work on a project of their own under faculty supervision, or they may do research as part of a faculty member's research team. To learn about research opportunities, students should contact a Computer Science faculty member.

General Requirements

Minimum Utah State University Requirements

In addition to meeting the requirements for the Computer Science major, all students graduating with a bachelor's degree in Computer Science must meet the minimum Utah State University requirements.

General Education/University Studies Requirements

In addition to meeting the requirements for the Computer Science major, all students graduating with a bachelor's degree in Computer Science must meet all Utah State University general education and university studies requirements. These requirements can be found in the General Catalog at the following links:

General Education Requirements
University Studies Depth Requirements

Additionally, students are strongly urged to work with their advisor in selecting courses that fill general education requirements. In several cases, there are courses that can simultaneously fill a general education/university studies requirement and a major requirement.

Changes in Graduation/Catalog Requirements

Students who complete a baccalaureate degree within seven years of enrollment at USU qualify for graduation by meeting (1) the General Education/University Studies requirements in effect when they initially enrolled and (2) the major requirements in effect when they officially declared their major (meaning they have achieved advanced standing in the Computer Science program), even though there may have been changes in General Education/University Studies and major requirements since that time.

Students who have not completed the baccalaureate requirements within seven years of their initial enrollment at USU must have their General Education/University Studies and major requirements evaluated and approved by their department head and dean.

Course Expiration Policy

Coursework (including transfer credit) that is more than 10 years old and is required by the major may be disallowed by the student's department. Students will have an opportunity to revalidate coursework that is disallowed.

Summary of Departmental Admission and Retention Requirements

Admission requirements of the School of Computing for freshmen and transfer students must satisfy the admission policies and entrance requirements of the university (General Education Requirements), the College of Engineering, and the department. Transfer students with a 2.5 GPA and who are "calculus ready" (1. achieve a score of 27 or higher on the math ACT test; 2. complete MATH 1050 and MATH 1060; or 3. achieve an AP score of at least 3 on the AB Calculus or BC Calculus test) may apply for admission to the department.

Before students can register for a Computer Science course, they must earn a grade of C- or better in all prerequisite courses. Students must earn a grade of C- or better in all classes that fill a Computer Science major, regardless of the subject, and regardless of whether the class is also used to fill a general education/university studies requirement. For example, PHYS 2220 may be used to fill part of the science-plus-breadth requirement described below. It also fills the breadth physical science (BPS) requirement. Because it fills a major requirement, students must earn at least a C- in the course. Computer Science majors must be in the professional program or have authorization to register for Computer Science courses at the 3000-level or above.

In addition to completing the required courses, students must comply with the following regulations, in order to graduate with a bachelor's degree in Computer Science.

- Once students are admitted to the professional program, they must maintain a minimum overall GPA of 2.0 and a minimum major GPA of 2.5.
- Students must attain a minimum grade of C- in all courses fulfilling Computer Science major requirements.
- At most, students may have three repeats among the preprofessional classes.

Professional Program

In order to enter the professional program, students must achieve a minimum institution GPA of 2.0. They must also achieve a minimum GPA of 2.5, as well as a grade of C- or better, among courses in the following core sequence. Further, students are allowed a total of three repeats in the required courses in the preprofessional program. Note that these requirements are built into the **Major Requirements.**

Core Sequence: CS 1400, CS 1410, CS 1440, CS 2410, CS 2420, and CS 2610; MATH 1210 and MATH 3310.

Suggested Four-year Plans

A suggested semester-by-semester four-year plan for students working towards a Bachelor of Science in Computer Science is available in the School of Computing and the College of Engineering Advising Center. Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For more information about requirements for the Computer Science major and minor, contact the School of Computing.

Graduate Program

The School of Computing offers MS, PhD, and MCS degrees in Computer Science, as well as an MS degree in Data Science.

Admission Requirements

Applicants for admission to the graduate program should have a bachelor's degree in Computer Science **or** extensive experience in computing. The minimum requirement for computing experience is a grade of B- or better in a course equivalent to CS 2420 - Algorithms and Data Structures–CS 3 (QI). The GRE is optional for admission to the MS and PhD programs. The GRE is not required for admission to the MCS program. Decisions on financial aid are made on or near April 1st for the following fall semester. These are in addition to the graduate school's requirements.

Course Requirements

In addition to the specific departmental admission and degree requirements described in the Computer Science-MS, Data Science-MS, Computer Science-MCS, and the Computer Science PhD section of the catalog, students are advised that they must also meet all Graduate School requirements as described in the Graduate School section of the catalog. Please note that departmental requirements change from time to time, so students should work closely with their advisor in designing their graduate program.

Financial Assistance

Applicants for admission in fall semesters who meet the priority application deadline may choose to apply for financial aid in the form of Graduate Teaching Assistantships (GTA). Acceptance into the program does not guarantee financial assistance.

School of Social Sciences Department

Undergraduate Programs

Anthropology

Anthropology at Utah State University educates and trains a new generation of citizen-scholars to understand the complex human dimensions of environment, community, and well-being, past and present. The faculty strives to build a premier student-centered program through research excellence, transformative and challenging student experiences. Areas of emphasis include archaeology in cultural resource management, biological anthropology, cultural (medical) anthropology, and museum studies

Criminal Justice

Utah State University offers a comprehensive **Criminal Justice program** that provides a broad interdisciplinary foundation drawing from sociology, social work, and political science. Core topics include law enforcement, courts and the legal system, corrections, criminal law and procedure, and forensic investigations. The program prepares the next generation of Criminal Justice professionals while serving current career professionals in transitioning to new careers in adjacent fields.

Political Science

The Utah State University Political Science program is dedicated to engaging with the fundamentals of political science, law and constitutional studies, and international studies to a broad community through innovative teaching, respected research, and committed service. Our faculty and students address pressing questions to improve the community, the state, the nation, and beyond. Political Science at USU emphasizes contextual knowledge, empirical analysis, and applied learning with available internships in local, state, and federal government, lobbying firms, and NGOs.

Sociology

Sociology at Utah State University strives to advance our collective understanding of critical social issues, particularly within the areas of social inequality, health equity, rural communities, natural resources, and environmental justice. Sociology has a strong basis in survey research methods and social data analysis that informs social impacts of policy decisions across many institutions. The program emphasizes internships, service learning, and research across the core areas.

Graduate Programs

Archaeology in Cultural Resource Management (MS and PhD)

Utah State University offers both the Master's (MS) and Doctoral (PhD) degrees in archaeology with an emphasis in cultural resource management. Students can pursue a traditional academic degree plan or organize their coursework into three post-baccalaureate certificates (18 credits each) in Cultural Resource Management Policy, Advocacy, and Administration, Archaeology Data Analytics, and/or Museum Administration and Collections Management Policy. Graduate research involving original data or synthetic analysis of legacy datasets is encouraged. Graduates in the program are prepared for leadership positions in public and private sector cultural resource management, museum administration, and careers in academia.

Political Science (MA and MS)

Utah State University (USU) offers two graduate degrees in Political Science: a **Master of Science (MS)** and a **Master of Arts (MA)**. Both programs are designed to prepare students for careers in government, policy analysis, international affairs, and academia. Core areas include American politics, comparative politics, international relations, and political theory. The MS in Political Science focuses on quantitative research methods and is ideal for students interested in data-driven policy analysis or preparing for PhD programs. The MA in Political Science requires foreign language proficiency and is suited for students pursuing international careers or further academic study.

Sociology (MS and PhD)

Utah State University (USU) offers both **Master's (MS)** and **Doctoral (PhD)** degrees in Sociology. The program is known for its strong emphasis on research, mentoring, and community engagement. Graduate students choose from three primary areas. Students in *Demography* study population change, migration, fertility, mortality, and health through the Yun Kim Population Research Lab. Students in the *Environment and Community* area study environmental sociology, natural resources, and community development often collaborating with natural sciences and engineering. Students in the *Social Inequality* area study race, gender, class disparities and conduct comparative and cross-national research. Program graduates pursue careers in academia and research, government and policy analysis, community development and environmental planning, and nonprofit organization leadership.

College of Arts and Sciences Faculty

Programs

Criminal Justice - AS
Anthropology and Cultural Resource Management - PhD
Anthropology - Minor
Anthropology - BA, BS
Anthropology - MS
Archaeological Data Analytics - Post-Bachelor's Certificate
Criminal Justice - Minor
Criminal Justice - BA, BS
Courtroom Assistance - Certificate
Corrections Leadership Development - Certificate
Corrections - Certificate
Cultural Resource Management Policy, Advocacy and Business Administration - Post-Bachelor's Certificate
Environmental Advocacy - Certificate
Environmental Equity - Post-Bachelor's Certificate
Environmental Justice - Institutional Certificate of Proficiency
Foundations of Criminal Justice - Certificate
Forensic Testimony - Minor
Forensic Specialist and Crime Scene Investigation - Certificate
Global Peacebuilding - Certificate
Health Equity - Post-Bachelor's Certificate
Intersectional Gender Studies - Minor
Inclusive Leadership - Certificate
Interfaith Leadership Certificate - Certificate
International Studies - Minor
International Studies - BA
Juvenile Justice - Certificate
Law and Constitutional Studies - BA, BS
Law and Society Area Studies - Institutional Certificate of Proficiency
Leadership & Diplomacy - Certificate
Museum Administration and Collections Management - Post-Bachelor's Certificate
Middle East Studies - Minor
Museum Studies - Institutional Certificate of Proficiency
Native American Studies - Minor
Police Officers and Policing - Certificate
Political Communication - Certificate
Political Science - Minor
Political Science - BA, BS
Political Science - MA
Political Science - MS
Political Science Teaching - Minor
Police Officer Standards Training (POST) Academy - Certificate
Philosophy, Politics and Economics - Certificate
School Resource Officers - Certificate
Social Dimensions of Climate Change and Environmental Justice - Minor
Social Dimensions of Climate Change - Institutional Certificate of Proficiency
Social Determinants of Crime - Certificate
Sexuality Studies - Minor
Social Analytics - Post-Bachelor's Certificate
Social Analytics - Certificate
Sociology - Minor
Sociology - BA, BS
Sociology - MS
Sociology - PhD
Sociology Teaching - Minor
Survey Methods - Post Bachelor's Certificate

Courses

School of Teacher Education & Leadership Department

School of Teacher Education and Leadership

Department Head of School of Teacher Education and Leadership: Steven Camicia
Location: Emma Eccles Jones Education 385A
Phone: (435) 797-0389
E-mail: teal@usu.edu
Website: teal.usu.edu

Graduate Program Director: Dr. Nicole Pyle, Emma Eccles Jones Education 392, (435) 797-0392, nicole.pyle@usu.edu

Master's Program Director: Dr. Max Longhurst, Emma Eccles Jones Education 382, (435) 797-7093, max.longhurst@usu.edu

Undergraduate Elementary Teacher Preparation: Dr. Marla Robertson, (435) 722-1752, marla.robertson@usu.edu

Director of Undergraduate Secondary Teacher Preparation: Marilyn Cuch, USU-Uintah Basin, (435) 722-1709 marilyn.cuch@usu.edu

Director of Field Experiences: Sharla Hart, Education 330E, (435) 797-0958, sharla.hart@usu.edu

Asst. Director: Anita Shuman, Education 330F, (435) 797-0371, anita.shuman@usu.edu

TEAL Undergraduate Advisors (Elementary and Secondary Education):
Shannon M. Burgin, Coordinator of Recruitment, Education 379, (435) 797-0377, shannon.burgin@usu.edu
Jennifer Caines, Education 381, (435) 797-2224, jennifer.caines@usu.edu
Ashley Fluegel, Education 378, (435) 797-0375, ashley.fluegel@usu.edu

Associate's Degrees offered: Elementary Education

Elementary Education Degrees offered: Elementary Education, Early Childhood Education, Early Childhood/Elementary Education

Special Education Composite Degrees offered (housed on their department page): Special Education: Birth to 5 Emphasis/Early Childhood Education Composite, Special Education: Birth to 5 Emphasis/Elementary Education Composite, Special Education: Mild/Moderate Emphasis/Elementary Education Composite, Special Education: Severe Emphasis/Elementary Education Composite

Secondary Education Degrees offered: BS and BA in Composite Teaching-Social Studies; Second Bachelor of Science (BS), Second Bachelor of Arts (BA) in Secondary Education.

Graduate Certificates offered: Elementary Mathematics Specialist (EMS)

Graduate Degrees and Specializations: MEd and MS in Curriculum and Instruction with specializations in Early Childhood Education, ESL Education, Literacy Education, Math Education, Science Education and Social Studies Education; Master in Elementary Education (MET); Master in Secondary Education (MST); MEd in School Leadership; EdS and EdD in Curriculum and Instruction, and PhD in Education with specialization in Curriculum and Instruction. PhD students also select a concentration among Cultural Studies, School Leadership, Literacy Education and Leadership, Mathematics Education and Leadership, and Science Education.

Full Details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at cehs.usu.edu/teal/assessment/index.

Undergraduate Programs

Elementary Education Program-AS

An Associate of Science (AS) degree in Elementary Education prepares a student interested in a career in education to obtain a degree as they determine the role that best suits their career goals.

This degree can stack into a BA or BS in a chosen teaching major (e.g. Elementary Education or Early Childhood education), transfer into another major, or allow movement into the workforce. The future BA or BS degree leads to a recommendation for Professional License from the Utah State Board of Education to teach in the grade-level or content of the chosen degree.

Elementary Education Program- BA/BS

Objectives
The purposes of the Elementary Education Program are:

1. To develop professional educators.
2. To advance knowledge in the field of education.

These purposes are realized through teaching, scholarly activities, and service. The program provides leadership in the preparation of teachers, supervisors, curriculum specialists, and other professional personnel for careers in elementary education, early childhood education, and middle level education.

The Elementary Education Program at Utah State University offers multiple programs leading to licensure as a teacher. In the following list, each program name is followed by the grades that can be taught with the licensure obtained (shown in parentheses).

- Elementary Education (kindergarten through grade 8)
- Early Childhood Education (preschool through grade 3)
- Early Childhood/Elementary Education (preschool through grade 8)
- *Special Education*: Birth to 5 Emphasis/Early Childhood Education Composite (preschool through grade 3, and Special Education birth through age 5)
- *Special Education*: Birth to 5 Emphasis/Elementary Education Composite (kindergarten through grade 8/kindergarten through grade 12)
- *Special Education*: Mild/Moderate Emphasis/Elementary Education Composite (kindergarten through grade 8/kindergarten through grade 12)
- *Special Education*: Mild/Moderate Emphasis/Elementary Education Composite (kindergarten through grade 8/kindergarten through grade 12)
- Elementary Education General Studies: For people interested in becoming a teacher or teacher's aide. **Does not lead to a recommendation for licensure.**

Minimum Application Requirements

Given the shortage of teachers in the nation, as well as demands for high quality teachers, and reflecting the multiple routes to licensure approved by the Utah State Board of Education, the School of Teacher Education and Leadership provides degrees by which a student may procure teacher licensure.

Admission to the Elementary and Early Childhood Education Programs requires: (1) an overall GPA 2.0 minimum to apply, (2) minimum grades in a set of core courses, (3) the number of credits a student has taken. In addition, applicants must have a cleared FBI/BCI background check through the Utah State Board of Education. Applications are accepted each semester.

Students who have completed the requirements may complete an application available on eGrad. Application instructions can be found at cehs.usu.edu/teal/undergraduate/eled-ece-majors. At the time of application, students should schedule a time to meet with an advisor for assistance at cehs.usu.edu/advising.

Continuing Licensure Lane Designation Requirements

A minimum GPA of 3.0 is required to graduate from the program. Major subject courses passed with less than a B- grade may be repeated once. A student who fails to maintain a 3.0 GPA will be referred to their advisor.

Students complete a professional semester of student teaching. An application for student teaching must be made at least one semester in advance, and credentials are reevaluated at that time. Since not all student teachers can be accommodated by the schools located within Cache Valley, placements are made on a first-come, first-served basis. Students should be financially prepared to spend that time off-campus in the event such an arrangement is necessary. Students must be responsible for their own transportation and housing.

Students will have the opportunity to complete coursework leading to various teaching endorsements. Students should meet with their advisors for further information.

Students may also get an early start on a master's degree through the EMPowerment program. More information on this option is available from the TEAL advisors. Contact Shannon Burgin for more information (shannon.burgin@usu.edu).

Students who have teaching licenses in areas other than elementary education may obtain the elementary license by meeting the same or equivalent requirements for licensure expected of an elementary education major. Those desiring to acquire a dual license should work with an advisor from the Elementary Education Program.

For a complete description of the program and requirements for graduation and licensure, students should visit the Elementary Education Program website at https://cehs.usu.edu/teal/undergraduate/eled-and-ece/. At the time of graduation, students in the Licensure Lane may apply for their teaching license through the Emma Eccles Jones College of Education and Human Services.

Suggested Four-year Plans

Suggested semester-by-semester four-year plans for students working toward bachelor's degrees within the Elementary Education Program of the School of TEAL can be found on the university catalog department degree maps page.

Each plan provides a model of the requirements and a possible sequence of courses. However, students may progress through their program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Students should consult with their advisor to develop a plan of study tailored to their individual circumstances.

Secondary Education Program

Objectives

The Secondary Education Program coordinates state-approved programs for secondary teacher licensure across campus. The program offers the Secondary Teacher Education Program (STEP), a set of courses and field experiences designed to prepare students for teaching careers in secondary schools. STEP is approved by the Utah State Board of Education and fully accredited by the Association for Advancing Quality Educator Preparation (AAQEP). Students who successfully complete the program are recommended for secondary licensure in the State of Utah, enabling them to teach in grades 6-12.

Program Entrance Requirements

In addition to meeting the admission requirements for the university, students in good standing must have a minimum entrance GPA of 2.0 and maintain a major GPA of 3.0 in order to student teach. Students must complete all requirements of the pre-major prior to being admitted to the full major. Students must complete all requirements of the pre-major prior to being admitted to the full major. All students must be admitted to the teacher education program. See details below.

Admission to the Secondary Teacher Education Program (STEP)

Prior to enrolling in STEP courses, students must be admitted to the teacher education program. Criteria for admission include completion of a minimum of 12 semester credits, and (1) University Studies requirements, (2) recommendations from an advisor in a single-subject major, (3) have a GPA of at least 3.00 and a minimum C grade in all STEP Courses and teaching major or teaching minor courses, and (4) a cleared USBE background check. STEP applications are completed online through eGrad. Instructions are available here: https://cehs.usu.edu/teal/undergraduate/secondary-ed/step-admissions.

Composite Majors, Teaching Majors, and Teaching Minors

Secondary Teacher Licensure requires that students complete a composite teaching major or a single-subject teaching major, but students may also elect to complete a teaching minor. Students are strongly encouraged to meet as soon as possible with advisors in their declared teaching major to determine teaching minor requirements and options. The following composite teaching majors, single-subject teaching majors, and teaching minors are approved for Utah State University.

Composite Teaching Majors (46 credits minimum)
Agricultural Education, Art Education, Biological Science, Business Education, Earth Science, English Teaching, Family and Consumer Sciences Education, Mathematics and Statistics Education, Music Education, Physical Science, Social Studies Education, and Technology and Engineering Education.

Teaching Majors (30 credits minimum)
Chemistry, Computer Science, English, Geography, History, Mathematics, Physical Education Coaching, Physics, Political Science, Psychology, School Library Media, Sociology, Special Education, Theatre Arts, and World Languages.

Teaching Minors (16 credits minimum)
Chemistry, Computer Science Education, English, Geography, History, Mathematics, World Languages, Physical Education Coaching, Physics, Political Science, Psychology, School Library Media, Sociology, Special Education, and Theatre Arts.

Social Studies Composite Teaching Major
The Social Studies Composite Teaching Major is housed in the School of Teacher Education and Leadership. All other teaching composite majors, single subject majors, and teaching minors are completed within partner departments in colleges throughout the university. Suggested semester-by-semester four-year plans for students working toward bachelor's degrees leading to a secondary teaching license can be found on the university catalog department degree maps page. Students should meet with their content area advisors in their respective colleges and their STEP advisor in the Advisement Center of the School of Teacher Education and Leadership for guidance on completing their programs.

Students may also complete coursework leading to a teaching endorsement in Dual Immersion and English as a Second Language (ESL).

Additional Undergraduate Information

Major Requirement Sheets
For more information concerning requirements for university graduation and for basic professional teaching licensure in secondary education, elementary education and early childhood education, see major requirement sheets available from the TEAL Advisement Center, Emma Eccles Jones Education Building, 3rd floor or on the department web page at this link: https://cehs.usu.edu/teal/.

Financial Support
Students in the School of Teacher Education and Leadership are supported by as many as 55 separate scholarships provided by kind donors who support the mission of TEAL. Applications are available from the TEAL Advisement Center and are due by February 28th.

Honors Program
The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least two years remaining are encouraged to apply. See the University Honors Program catalog website for more information.

Undergraduate Research
Undergraduate research opportunities are available with many departmental faculty members. Interested students should contact Dr. Sylvia Read, Associate Dean in the Emma Eccles Jones College of Education and Human Services, (435) 797-2714, sylvia.read@usu.edu.

Graduate Programs

Admission Requirements
To apply to the doctoral (Ph.D. and Ed.D.) and Education Specialist (EdS) degree programs, please refer to the TEAL Admissions for Doctoral Program website. At least two years of teaching experience are required. Admission committees consider relevant experience, previous coursework, degrees completed, formal recommendations, Statement of Purpose, and research interests with faculty expertise.

Degree Programs
Three avenues exist for both Logan and Statewide Campus students wishing to pursue a master's degree in the School of Teacher Education and Leadership at Utah State University. They are as follows:

- Master of Science—Plan A
- Master of Education—Plan C

Doctoral Programs (PhD and EdD)
TEAL administers a doctoral program in Education, which includes the Doctor of Philosophy (PhD) and the Doctor of Education (EdD). For information about the Doctor of Philosophy (Ph.D.), please refer to the TEAL Ph.D. in Education website. For information about the Doctor of Education (Ed.D.), please refer to the TEAL Doctor of Education website.

Additional Information
The Program of Study for the MEd should be approved by the program advisor at the beginning of the semester of graduation. The Program of Study form for the MS degree should be approved by the student's committee and submitted to the School of Graduate Studies *at least two months prior to the oral exam, oral review, or presentation appropriate to that degree.* For the EdS, EdD or PhD, the Program of Study form must be submitted to the School of Graduate Studies by the end of their third semester of coursework.

After matriculation into the program, a master's degree must be completed within a six-year time period. Pass/fail grades will be accepted only for seminars, special problems, interdisciplinary workshops, thesis or dissertation research, and continuing graduate advisement. Transfer credit accepted toward a degree is normally limited to 6 credits; however, with prior approval, 12 transfer credits may be accepted. A maximum of 12 credits taken before admission to the program may be counted toward the degree if the credits were not counted towards another earned degree. Transfer of coursework in the student's area of specialization is limited to 1/2 of the specialization credits required at USU and may include 5000-level courses. All subsequent coursework in a student's area of specialization must be taken at the 6000 level or above, in order to be applied toward a graduate degree in the School of TEAL. Coursework expires after eight years.

Admission applications for master's degrees are accepted 3 times a year. Their deadlines are November 1st, March 1st, and June 1st.

Research
Cooperation with other departments and research centers at the university, as well as with public school and Utah State Board of Education collaborators, permits strong graduate programs. Research opportunities are available with the Edith Bowen Laboratory School, cooperating school districts in Utah and surrounding states, the Utah State Board of Education, and the United States Department of Education.

Financial Assistance
Both departmental and School of Graduate Studies support may be available for the regular academic program and is awarded on a competitive basis.

Assistantships
Teaching assistantships may be available through TEAL. Some research assistantships are available through faculty members who have ongoing projects with off-campus funding agencies. Acceptance to pursue graduate study does not guarantee student financial assistance. To apply for a TEAL Graduate Assistantship, please refer to the TEAL Graduate Assistantship Application form.

Career Opportunities
Positions in Higher Education—Master Teachers
Many school districts support and encourage teachers to further their education and expertise by obtaining a master's degree. Added financial remuneration generally accompanies the completion of such a degree. Supervisors, curriculum specialists, and other professional careers are enhanced by completion of a master's degree.

Completion of a doctoral degree qualifies the graduate for a wide variety of careers, including positions in higher education, curriculum specialist positions in school districts and state offices of education, positions in educational agencies of the United States government, and education specialist positions in business and industry.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

Curriculum and Instruction - MEd
Curriculum and Instruction - MS
Curriculum and Instruction - EdS
Dual Language Immersion - Institutional Certificate of Proficiency
Dual Language Immersion - Post-Bachelor's Certificate

Social Work Department

Social Work

Department Head: Jessica Lucero, Ph.D., MSW
Location: Main 239D
Phone: (435) 797-9122 | **FAX:** (435) 797-1240
E-mail: socialwork@usu.edu
Website: socialwork.usu.edu

Master of Social Work (MSW) Program Director (Logan): J.C. Sheen, Ph.D., MSW, 435-797-8113, jeff.sheen@usu.edu

Master of Social Work (MSW) Program Director (Statewide): Susan Cutler Egbert, Ph.D., MSW, 801-518-1115, susan.egbert@usu.edu

Master of Social Work (MSW) Graduate Program Coordinator (Logan): Morgan Walton, MSW, morgan.walton@usu.edu

Master of Social Work (MSW) Graduate Program Coordinator (Statewide): Chelsey Spears, MSW, chelsey.spears@usu.edu

Social Work Undergraduate (BSW) Program Director: Jen Evers, (435) 797-5104, jenifer.evers@usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Social Work; Master of Social Work (MSW)

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at socialwork.usu.edu. (For assessment specifically, see socialwork.usu.edu/assessment.)

Bachelor of Social Work Program (BSW) Objectives

The BSW program serves the public by preparing its graduates for employment as generalist social workers who are committed to enhancing human well-being and meeting basic human needs of all people, particularly vulnerable populations. As a community-engaged department, we take pride in serving Utah communities through our research and student learning opportunities ranging from mentored research to field placements. Students learn from seasoned social work practitioners and scholars in the classroom and connect their classroom learning to the field during their culminating field placement. The program trains students to engage, assess, intervene, and evaluate with individuals, groups, and communities. Students have access to highly engaged faculty who are committed to supporting their success and connecting them with individualized opportunities for their professional development. Graduates are in high demand in the human service sector and are eligible for the social service worker (SSW) license in the State of Utah.

Master of Social Work Program (MSW) Objectives

The MSW program prepares its graduates as professionals in advanced generalist practice and equips them with skills necessary for leadership roles within the Social Work profession. The MSW program emphasizes the advanced generalist practice knowledge and skills essential to the tasks of promoting social welfare, especially among vulnerable populations, in a wide range of settings ranging from behavioral health agencies to schools, to criminal justice contexts and more. The program is dedicated to the development of social workers who understand the need to advocate for vulnerable populations, and to work toward the establishment of societies free from poverty, violence, oppression, and discrimination.

The MSW program's curriculum is grounded in the strength's perspective, the empowerment approach, and a social justice philosophy. Students have access to highly engaged faculty who are deeply committed their success and unique professional development. Faculty empower students to be part of meaningful community-based change, serving each student nested in their own community and context. Students receive training to engage a multidimensional, multisystem problem-solving process and apply their classroom-based learning in their field internship where they further refine their skills to engage, assess, intervene, and evaluate with clients and client-systems. Graduates leave our program with excellent preparation to enter clinical career paths (e.g., mental health therapy) and other practice areas such as social administration. Graduates are eligible for the Certified Social Worker (CSW) license which permits them to practice clinical social work under the supervision of another licensed mental health professional. Once required hours and supervision requirements are met, graduates are eligible to sit for the Licensed Clinical Social Work (LCSW) exam.

Rehabilitation Counseling Program: Trent Landon, Education 322, (435) 797-3269, trent.landon@usu.edu
Doctoral Program: Brian Phillips, Education 318 , (435) 797-2381, brian.philips@usu.edu

Online Program Coordinator: Kristen Rolf, kristen.rolf@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Education (MEd), and Educational Specialist (EdS) in Special Education; Master of Rehabilitation Counseling (MRC); Doctor of Philosophy (PhD) in Disability Disciplines. The Special Education and Rehabilitation Counseling department participates in the Doctorate of Education (EdD) administered by the School of Teacher Education and Leadership (TEAL).

Undergraduate emphases: *BS*, *BA*—Mild/Moderate Disabilities, Severe Disabilities, Early Childhood (Birth to age 5) Special Education, Visual Impairments, Mild/Moderate Disabilities OPTT (Online Practical Teacher Training), Severe Disabilities OPTT, Early Childhood (Birth to Age 5) OPTT.

Graduate concentrations: *MEd*, *MS*, —General Special Education, Applied Behavior Analysis, School Leadership Certificate.(Note: Graduate concentrations will not appear on student transcripts or diplomas.)

PhD specializations: Special Education, Applied Behavior Analysis, Rehabilitation Counseling, Speech-Language Pathology, Pathokinesiology and Audiology

Licensure is available for teachers in early childhood (birth to age 5) special education, mild/moderate disabilities, severe disabilities, and visual impairments. A Special Education composite licensure program is available with the Elementary Education Program in the School of Teacher Education and Leadership (TEAL) for Logan Main Campus students. A dual licensure program is available with secondary education content majors in the School of TEAL and with early childhood students pursuing a master's in Deaf Education for Logan Main Campus students. See website for more information https://cehs.usu.edu/shs/.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at sperc.usu.edu/assessment/index.

Undergraduate Programs

Objectives

The undergraduate programs in the Department of Special Education and Rehabilitation Counseling offer educational and training opportunities for teachers and support personnel working with exceptional children and adults with disabilities. The programs prepare individuals to work with individuals with mild/moderate and severe disabilities, visual impairments, and with early childhood (birth to age 5) special education. Students who are majoring in other teaching fields (i.e., elementary education, secondary education) are encouraged to pursue a second certification by taking those courses which lead to a special education license. Teacher education programs in the department are accredited by the State of Utah. These programs are also fully accredited through the Association for Advancing Quality in Educator Preparation (AAQEP).

Areas of Emphasis

The Department of Special Education and Rehabilitation Counseling offers training programs for individuals who want to work with children and adults with disabilities. A student fulfilling the undergraduate course requirements will qualify for a BS or BA degree in special education and be eligible for a license to teach students with mild/moderate disabilities, students with severe disabilities, students with visual impairments, or young children with disabilities. The severe, mild/moderate, and visual impairment licenses allow graduates to teach pupils with disabilities from kindergarten through 12th grades. The birth to age 5 special education license allows graduates to teach young children with disabilities.

The special education degree is offered on the Logan Main Campus as a traditional teacher preparation program. The special education degree is also offered online across the state of Utah for teacher candidates who are working as a para-professional or teacher of record in Utah (OPTT - Online Teacher Preparation Program). The OPTT emphases can be taken as a first or a second bachelor's degree. When taken as a 2nd BS, some of the credits can be applied towards a master's degree.

In addition, the department offers composite and dual teaching majors with the Elementary Education Program and dual teaching majors with the Secondary Education Program, both of which are part of the School of Teacher Education and Leadership. These composite/dual degrees are only available on the Logan Main Campus. Students completing the dual major requirements in secondary education will be eligible for teacher licensure in one of the special education areas and the secondary education content major. Students completing the composite or dual major requirements in elementary education will be eligible for teacher licensure in one of the special education areas and elementary education. Students interested in teaching preschool children with disabilities may receive a birth to age 5 special education license for ages 0-5, in addition to a K-12 special education license in visual impairments, severe, or mild/moderate disabilities. A Birth to Age 3 minor is available for Human Development and Family Studies majors.

Requirements

Admission Requirements
Students are admitted to the Department of Special Education and Rehabilitation Counseling as Pre-Special Education majors by meeting the Utah State University minimum requirements. To become a Special Education major, a student must make written application to the department after meeting the following prerequisites:

1. Completion of at least 40 attempted semester credits with an institution GPA of 2.00 or higher; and
2. Completion of admission requirements to the Emma Eccles Jones College of Education and Human Services Teacher Education Program.

- Visual impairment, mild/moderate and severe students must also complete Quantitative Literacy (QL) and MATH 2020 and MATH 2010.
- Birth to age five students must complete one of the following: Quantitative Literacy (QL)

Students should apply to the department during spring semester of their sophomore year (February 1 deadline). Admission to the department is competitive based on several factors. These include:

1. The student's current GPA.
2. The number of credit hours completed by the end of fall semester.

3. Completion of pre-major classes (such as Math and HDFS 1500).
4. Experience working with people with disabilities.
5. The student's career goals and experiences.

GPA Requirement
A minimum GPA of 2.00 is required to apply for admission, to remain in good standing, and to graduate from the program from the undergraduate programs. All graduate programs require a minimum GPA of 3.0 for admission. All required special education classes must be completed with a grade of *B-* or better.

Advising Plans

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For more information concerning Bachelor of Science or Bachelor of Arts requirements and the sequence in which courses should be taken, see major planning guides available on the department webpage or degree maps in the USU Catalog.

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the university. In addition, there are some endowed scholarships available through the department and, sometimes, there are stipends available from federal grants.

Graduate Programs

Admission Requirements
Admission decisions are made by the department's Graduate Program Committees: Disability Disciplines Doctoral Committee, Special Education Master's Committee, and Rehabilitation Counseling Master's Committee. Admission Requirements are based upon those of the School of Graduate Studies. In addition, the committees consider experience, academic record and curriculum, and formal recommendations. The Special Education master's program, Rehabilitation Counseling master's program and Disability Disciplines Doctoral program do not require GRE scores for admission.

Deadlines for application to the Special Education Master's program are March 1, June 1, and October 1. Applications for the Rehabilitation Counseling Master's program are March 15th and October 15. Applications for the School Leadership Certificate program are due by March 1st for summer, June 1st for fall, and November 1st for spring. The deadline for application to the Disabilities Disciplines Doctoral program is January 15th. Only complete files will be reviewed. Applications received after these dates will be considered, but opportunities for financial assistance may be limited. No applications will be considered until all required information arrives at the School of Graduate Studies office.

Teaching Licenses

The department prepares students for licensure as teachers of students with mild/moderate disabilities, students with severe disabilities, and preschool-age students with disabilities. Licensure may also be obtained in visual and/or hearing impairments through a multi university consortium program. Licensure may be obtained as part of the graduate degree program or without a graduate degree.

Financial Assistance

Scholarships, teaching assistantships, and research assistantships are available for qualified doctoral students. Scholarships are also available to qualified students in the Master of Rehabilitation Counseling program.

Additional Information

For additional information regarding the Special Education and Rehabilitation Counseling graduate programs, check the departmental website at sperc.usu.edu/.

Speech and Hearing Sciences Department

Speech and Hearing Sciences

Department Head: Karen Muñoz
Location: Lillywhite 105
Phone: (435) 797-3701 | **FAX:** (435) 797-0221
E-mail: karen.munoz@usu.edu
Website: https://cehs.usu.edu/shs/

Assistant Department Head: Teresa Ukrainetz, Lillywhite 103, (435) 797-1384, teresa.ukrainetz@usu.edu

Undergraduate Advisors:
Campus Bachelors, Victor Blocher, Lillywhite 150, (435) 797-9271, victor.blocher@usu.edu
Online 1st Bachelors - Kristy Meeks, Lillywhite 146, (435) 797-2469, kristy.meeks@usu.edu
Online 2nd Bachelors - Brynne Davies, Lillywhite 144, (435) 797-2460, brynne.davies@usu.edu

American Sign Language Minor - Mason Hayes, Lillywhite 148, (435) 797-9094, mason.hayes@usu.edu

Graduate Advisor:
Mason Hayes, Lillywhite 148, (435) 797-9094, mason.hayes@usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Speech and Hearing Sciences, 2nd Bachelor of Science (BS) in Speech and Hearing Sciences, Master of Science (MS) and Master of Arts (MA) in Speech-Language Pathology, Master of Science (MS) in Communication Sciences, and Master of Education (MEd) in Deaf Education with a specialization in Listening and Spoken Language; Doctor of Audiology (AuD); interdisciplinary Doctor of Philosophy in Disabilities Disciplines (PhD) *(Interdisciplinary)*, and Doctor of Philosophy in Neuroscience (PhD) *(Interdisciplinary)* with emphasis in Speech-Language Pathology or Audiology.

Certificates offered: Hearing Foundations Certificate, Speech-Language Pathology Assistant Certificate.

Objectives

Three main objectives of the Department of Speech and Hearing Sciences are (1) to train competent audiologists, educators of the deaf and hard of hearing, speech-language pathologists, and speech-language pathologist assistants who will be qualified to receive state licensure and national certification; (2) to provide clinical services to individuals with hearing, balance, speech, language and swallowing deficits in the university population or in the community at large; and (3) to provide research opportunities for students related to the fields of speech and hearing sciences.

Suggested Four-year Plans

Suggested semester-by-semester four-year plans for students working toward bachelor's degrees are available in the Department of Speech and Hearing Sciences.

These plans are models of the requirements and possible sequences of courses. However, students may progress through their program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Students should consult with their advisor to develop a plan of study tailored to their individual circumstances.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information or contact the Department of Speech and Hearing Sciences Honors representative, Annalise Fletcher (annalise.fletcher@usu.edu).

Graduate Programs

Admission Requirements

A bachelor's degree in communication disorders or equivalent must be completed before the student enters the graduate program. For speech-language pathology, students with a bachelor's degree in another area must complete a second bachelor's degree in speech and hearing sciences or equivalent. For those seeking a doctorate of audiology, students with a bachelor's degree in another area must complete the following courses (or an equivalent) prior to beginning their graduate program: *Anatomy and Physiology of Speech and Hearing* and *Basic Audiology*.

Applications for the graduate degrees are considered once a year during spring semester. Admission is on a competitive basis. Students applying to the audiology and speech-language pathology programs must have completed the application process to the School of Graduate Studies by January 15th. The application deadline for the Deaf Education program is March 1. Deaf Education applications received after March 1 will be reviewed on a space-available basis. For further information see individual graduate program application and admission requirements at https://comdde.usu.edu/.

Research and Practicum Opportunities

Research experiences are available at both the undergraduate and graduate level. Students may choose to complete a thesis project or assist in faculty research with specific opportunities depending on the degree and specialization.

Practicum experience at the graduate level is available in a variety of settings. The department houses clinics specializing in hearing, balance, cochlear implants, tinnitus, speech, language, cognitive rehabilitation, assistive communication devices (AAC) and feeding and swallowing. These clinics offer a full range of care including diagnostic and treatment services to individuals across the lifespan. The department also houses the Sound Beginnings Early Intervention Pre-School and Kindergarten Program to support families of children who are deaf or hard of hearing who use hearing technology to develop listening and spoken language. Finally, our department has a close relationship with the Institute for Disability Research, Policy, and Practice and their care providers.

Students have opportunities to participate in practicum off the Logan campus. These off-campus sites throughout Utah include hospitals, schools for the deaf, long-term and rehabilitation care centers, physician's offices, public schools, private clinical practices, and early intervention programs. Placement at out-of-state practicum sites may be offered depending on availability.

Licensure

The programs in audiology, speech-language pathology, and deaf education meet requirements for Utah State Office of Education licensure, American Speech-Language-Hearing Association certification, and Utah State Professional Licensure.

Financial Assistance

Departmental and federal grant support is available to graduate students and is awarded on a competitive basis. Students should contact the graduate advisor to identify financial support submission deadlines.

Career Opportunities

Graduates from the clinical doctorate of **audiology** program are prepared to work in diverse hearing healthcare settings, such as hospitals, private practice, industry, U.S. military, research labs, and school districts. MEd graduates in **deaf education** are prepared to work in early intervention, general education, and special education programs that serve children with hearing loss who use listening and spoken language. Graduates with the MS/MA in **speech-language pathology** are prepared to work across the lifespan in medical, rehabilitation, educational, and early intervention settings. Graduates from the bachelor's degrees in **speech and hearing sciences** and the certificate in **speech-language pathology assistant** are prepared to work in educational settings under the supervision of a master's degree speech-language pathologist, with specific requirements depending on state and employer.

Additional Information

For more information concerning graduation requirements and course sequencing, students should meet with their departmental advisors prior to beginning classes in any COMDDE program. Information on the department programs, policies, faculty, research, and services can be found at https://comdde.usu.edu/ and at the individual undergraduate and graduate degree catalog pages.

Learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://cehs.usu.edu/comdde/assessment/.

FACULTY - Emma Eccles Jones College of Education and Human Services

Programs

American Sign Language - Minor
Audiology - AuD
Communication Sciences - MS
Deaf Education - Listening and Spoken Language Specialization - MEd
Hearing Foundations - Certificate
Interdisciplinary Studies (Education) - BA, BS
Listening and Spoken Language Deaf Education - Post-Master's Certificate
Speech and Hearing Sciences (Online) 2nd Bachelor of Science Degree - BS
Speech and Hearing Sciences - BA, BS
Speech-Language Pathology - MA, MS
Speech-Language Pathology Assistant - Certificate

Blanding - Marla Palmares Ruiz, (435) 678-8221, marla.palomaresruiz@usuruiz@usu.edu, appointments: caas.usu.edu/advising or call (435) 797-2282

Overview

The Department of Technology, Design, and Technical Education Department provides instruction to students seeking a certificate, an associate, and/or a baccalaureate degree. Our programs are career-focused and allow students to gain expertise in the fields of business skills, health professions, outdoor product design and development, and trades and technology.

The Department of Technology, Design, and Technical Education has faculty members located in Logan, Brigham City, and the USU-Eastern campuses in Price, Moab, and Blanding. Students are encouraged to enhance their education through hands-on applications using specialized classrooms and laboratories throughout the state. The department embraces technology and accessibility and offers many classes and several programs with some online options. Additionally, various industries and communities are served by career and technical certifications offered through Workforce Education programs.

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at caas.usu.edu/tdte/assessment.

Undergraduate Programs

Mission Statement

Our mission is to provide introduction, discovery, and mastery of skills as they relate to business skills, health professions, outdoor product design and development, and trades and technology. Working together, we cultivate the professionals of tomorrow by using proven educational processes, which include formal and informal instruction, experiential learning, leadership, and personal development at the certificate, associate degree, bachelor's degree, and community-based levels, including stackable credentials.

The department brings enthusiasm to the mission of Utah State University in supporting student-centered instruction. We believe in teaching students to be contributing members of their communities and societies.

Requirements

Admission Requirements

Admission requirements for the Department of Technology, Design, and Technical Education are the same as those described for the university for incoming freshmen and most transfer students. Technical Education programs in the Southeast are recognized as open enrollment and do not require a minimum high school GPA or ACT/SAT score for admission. See individual program listings and advisors for additional information and requirements.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High-achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For further information about undergraduate programs and requirements, visit the following website: tdte.usu.edu

For further information about stackable credential options, visit the following website: caas.usu.edu/tdte/programs/cte

FACULTY - College of Agriculture and Applied Sciences

Programs

Additive and Advanced Manufacturing Process - Certificate
Automotive Technology - AAS
Diesel and Heavy Equipment Mechanics - AAS
Welding Technology - AAS
Accounting Practices - Technical Certificate
Additive Manufacturing - Technical Certificate

Agricultural Science - AS
Airframe Maintenance - Technical Certificate
Apprentice Electrician - Technical Certificate
Automated Manufacturing - Technical Certificate
Automotive Technology - Technical Certificate
Basic Corrections Officer - Technical Certificate
Business - AB
Business - Technical Certificate
Construction Technology and Management - Technical Certificate
Commercial Driver's License (CDL) - Class A - Technical Certificate
Medical Assistant - Technical Certificate
Construction Fundamentals - Technical Certificate
Cosmetology - AAS
Cosmetology - Technical Certificate
Cybersecurity - Certificate
Diesel Technology - Technical Certificate
Digital Design - Technical Certificate
Drafting Design - Technical Certificate
Engineering Drafting and Design Technology - Technical Certificate
Emergency Medical Technician - Technical Certificate
Engineering Technology - AAS
Engineering Technology - BAS
Food Production Management - Certificate
Heavy Equipment Operator - Technical Certificate
Heating, Ventilation, Air Conditioning, and Refrigeration Technician - Technical Certificate
Information and Computer Technology - Certificate
Instruments and Controls (for Powerplant) - Technical Certificate
Industrial Mechanics/Maintenance - Technical Certificate
Information Technology - Technical Certificate
IT Support and Web Development - AAS
Law Enforcement Officer - Technical Certificate
Manufacturing and Design Technology - Certificate
Machining Technology - Technical Certificate
Nail Technician - Technical Certificate
Networking and Cybersecurity - Technical Certificate
Nursing Assistant - Technical Certificate
Outdoor Product Design and Development - BS
Phlebotomy Technician - Technical Certificate
Product Development - Certificate
Pharmacy Technician - Technical Certificate
Plumbing Apprenticeship - Technical Certificate
Powerplant Maintenance - Technical Certificate
Peace Officer Standards Training (POST) - Technical Certificate
Professional Bookkeeping - Technical Certificate
Welding Technology - Technical Certificate (formerly Certificate of Proficiency)
Quality and Reliability - Institutional Certificate of Proficiency
Software Development - Technical Certificate
Special Function Officer - Technical Certificate
Surgical Technology - AAS
Technology and Design - AAS
Technology and Design: Health Sciences Emphasis - AAS
Technology and Design: Design and Creative Arts Emphasis - AAS
Technology and Design: General Business Emphasis - AAS
Technology and Design: Technology Systems Emphasis - AAS
Technology Systems - BS
Technology Systems: Computer Technology Emphasis - BS
Technology Systems: Manufacturing Emphasis - BS
Technology Systems: Technical Management Emphasis - BS
Unmanned Aircraft Systems - Technical Certificate
Veterinary Assisting - Technical Certificate
Web Business - Technical Certificate
Welding Technology - Technical Certificate

Courses

APPR2301 - Electrical Apprentice 1-A - 5 - Credits
APPR2302 - Electrical Apprentice 1-B - 5 - Credits
APPR2303 - Electrical Apprentice 2-A - 5 - Credits
APPR2304 - Electrical Apprentice 2-B - 5 - Credits

APPR2310 - Electrical Apprentice 3-A - 5 - Credits
APPR2320 - Electrical Apprentice 3-B - 5 - Credits
APPR2410 - Electrical Apprentice 4-A - 5 - Credits
APPR2420 - Electrical Apprentice 4-B - 5 - Credits
APPR2988 - Special Problems - 1 - 3 Credits
AUTO1000 - Introduction to Transportation Technology I - 2 - Credits
AUTO1010 - Introduction to Transportation Technology II - 5 - Credits
AUTO1020 - Vehicle Maintenance - 3 - Credits
AUTO1030 - Small Engine Repair - 3 - Credits
AUTO1100 - Engine Repair Theory - 3 - Credits
AUTO1105 - Engine Repair Lab - 3 - Credits
AUTO1200 - Automatic Transmission/Transaxle Theory - 3 - Credits
AUTO1205 - Automatic Transmission/Transaxle Lab - 2 - Credits
AUTO1300 - Manual Drive Train and Axle Theory - 3 - Credits
AUTO1305 - Manual Drive Train and Axle Lab - 2 - Credits
AUTO1400 - Suspension and Steering Theory - 3 - Credits
AUTO1405 - Suspension and Steering Lab - 3 - Credits
AUTO1500 - Brakes - Theory - 3 - Credits
AUTO1505 - Brakes - Lab - 2 - Credits
AUTO1550 - Professional Vocational Leadership (VICA) - 1 - Credits
AUTO1600 - Electrical and Electronics I Theory - 3 - Credits
AUTO1605 - Electrical and Electronics I Lab - 3 - Credits
AUTO1800 - Engine Performance I Theory - 3 - Credits
AUTO1805 - Engine Performance I Lab - 3 - Credits
AUTO2600 - Electrical and Electronics II Theory - 3 - Credits
AUTO2605 - Electrical and Electronics II Lab - 2 - Credits
AUTO2700 - Heating and Air Conditioning Theory - 3 - Credits
AUTO2705 - Heating and Air Conditioning Lab - 2 - Credits
AUTO2800 - Engine Performance II Theory - 3 - Credits
AUTO2805 - Engine Performance II Lab - 2 - Credits
AUTO2977 - Internship Education Experiences - 1 - 3 Credits
AUTO2988 - Special Problems - 1 - 3 Credits
BCCM1010 - Building Construction Safety - 1 - Credits
BCCM1150 - Basic Print Reading - 2 - Credits
BCCM1250 - Carpentry Concepts - 4 - Credits
BCCM2010 - Framing I - 2 - Credits
BCCM2015 - Masonry I - 2 - Credits
BCCM2020 - Interior Masonry I - 2 - Credits

WELD2500 - Weld Inspection - 3 - Credits
WELD2600 - Metallurgy - 3 - Credits
WELD2977 - Internship Experience - 3 - Credits
WELD2988 - Special Problems - 1 - 3 Credits

Theatre Arts Department

Theatre Arts

Department Head: Richie Call
Location: Chase Fine Arts Center 232
Phone: (435) 797-3050 | **FAX:** (435) 797-0086
Email: http://richie.call@usu.edu
General Department Inquiries: theatre@usu.edu
Website: http://theatre.usu.edu/

Undergraduate Advisors: Angela Neff, (435) 797-9751, angela.neff@usu.edu

BA and General Theatre Studies Minor: Jayne Gold, University Reserve 113, (435) 797-1855, jayne.gold@usu.edu

BFA Degree Acting Emphasis: Leslie Brott, Fine Arts Center 139C, (435) 797-3139, leslie.brott@usu.edu

BFA Degree Theatre Design and Technology Emphasis: Brent Innes, Fine Arts Center, 151D, brent.innes@usu.edu

BFA Degree Theatre Education Emphasis: Amanda Dawson, University Reserve 125, (435) 797-3103, amanda.dawson@usu.edu

MFA Degree: Joshua Legate, Program Director,Fine Arts Center, 151C, joshua.legate@usu.edu

Graduate Program Coordinator (GPC): Amy Critchfield, Fine Arts Center 152C, (435) 797-3049, amy.critchfield@usu.edu

Degrees offered: Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Master of Fine Arts (MFA)

Undergraduate programs: *BA*—General Theatre Arts Studies; *BFA*—Students choose an emphasis in Acting; Theatre Design and Technology, which offers options in costume design, lighting design, technical production or scenic design; or Theatre Education.

Graduate specializations: *MFA*—Design (scenery, costume, lighting)

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at theatre.usu.edu/assessment.

Mission

The Department of Theatre Arts supports the missions of Utah State University and the Caine School of the Arts by cultivating artistic and academic excellence, by contributing to the cultural enrichment of the university and surrounding communities through live theatre production, and by fostering respect for the arts through advocacy and professionalism.

We assist undergraduate and graduate theatre students in acquiring and developing the tools they need in order to succeed in their future pursuits by:

- Giving them a foundation based on a broad theoretical and working knowledge of the theatre.
- Providing advanced training in their chosen area of concentration.
- Offering performance and production activities that provide students with practical experience in their chosen field while challenging them to engage in a complex and diverse world.

Talented, well-trained students who are committed to the art of theatre and its potential to heighten intellectual, cultural, and humane sensibilities are essential to the fulfillment of our mission.

Production Groups and Theatres

The Department of Theatre Arts sponsors the following production groups and divisions: Utah State Theatre (UST) and the Lyric Repertory Company (Lyric Rep), a professional summer repertory theatre company. Facilities used for performances by these groups include the 700-seat thrust stage Morgan Theatre in the Chase Fine Arts Center, the 360-seat proscenium Caine Lyric Theatre in downtown Logan, and a flexible 90-seat Black Box. Facilities also include a costume shop, scene shop, design studio, dance and movement laboratory, and prop and costume storage areas.

Admission Requirements

Admission into the Department of Theatre Arts is limited and requires a minimum 2.75 overall GPA, application to USU, an audition or portfolio review, and interview with department program area faculty. Acceptance is competitive and not guaranteed. Audition and interview dates for new students are not automatic and will be scheduled by faculty (as needed) upon receipt of all require supporting materials and USU application referral from the Admissions Office. Auditions and interviews can be either in person or virtual, and are also held at regional theatre conferences and festivals. Students are encouraged to apply by December 1 for admission consideration for the following year. Contact the Department of Theatre Arts for more information or visit our website (www.theatre.usu.edu) for more information.

Retention Requirements

Most programs of study require theatre students to maintain an overall minimum 2.75 GPA. Courses within the required theatre programs must have a B- grade or better to count towards graduation. Theatre Education students must maintain an overall minimum 3.0 GPA. With the exception of practicum, theatre courses may not be taken on a pass/fail basis. All theatre students are required to enroll in practicum and attend required production strikes each semester. Other departmental and program retention requirements are outlined in the Theatre Student Handbook located on the Department website: http://theatre.usu.edu.

Degree Roadmaps

Advising sheets, which provide detailed information about requirements for the undergraduate degree programs within the Department of Theatre Arts, including sample semester-by-semester four-year plans, are available in the department office.

Students should consult with their advisor before registering for classes each semester to ensure they are following their program of study and meeting requirements.

Production Responsibilities

Production and practicum assignments provide students with a variety of opportunities to gain practical experience in the various theatre disciplines. They are not voluntary, nor in any sense extra-curricular. Practical production work is required and an essential part of a well-rounded professional theatre training. Successful completion of production assignments is a requirement for graduation.

Financial Support

Scholarships, grants, and work-study opportunities are available through the university. Contact Financial Aid for information. The department offers a small number of scholarship opportunities to full time theatre majors who have completed their first year of study through yearly departmental application. Visit USU's scholarship page for more information on applying for scholarships.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Graduate Programs

Admission Requirements

Students applying to the MFA program are encouraged to have their applications in by December 1. Students who cannot interview with a member of the theatre arts faculty must submit a resume and a portfolio with renderings, designs, photographs appropriate to the specialization, and any special letters of reference not included with the formal application to the School of Graduate Studies, to the Department of Theatre Arts.

Students who have received their undergraduate training at other institutions, or in a discipline other than theatre, will be expected to meet a proficiency equivalent to that of USU Theatre Arts graduates. This may require the student to complete undergraduate level courses as deemed appropriate by the graduate student's committee, with a minimum accepted grade of B-, which will not count toward the graduate degree, and is not covered by assistantships. The student will be given credit for any equivalent courses taken within seven years prior to the date of admission.

Students accepted into the program must begin during the fall semester. The nature of the discipline and the program require that students maintain a continuous residence at the campus during the first two years of study.

Financial Assistance

Graduate Students are not guaranteed financial assistance during their initial year of residence. Teaching and general assistantships are awarded by the department, and are renewable for up to three years.

Additional Information

For more detailed information about individual MFA design specializations, contact the Department of Theatre Arts Graduate Advisor: joshua.legate@usu.edu

College of Arts and Sciences Faculty

Programs

General Theatre Studies - Minor

Veterinary Clinical & Life Sciences Department

Veterinary Clinical and Life Sciences

Website: Department of Veterinary Clinical and Life Sciences (VCLS)

Department Head: Ralph G. Meyer
Location: Veterinary Medical Education (VME) 386
Phone: 435-797-1774
Email: ralph.meyer@usu.edu

Administrative Assistant: Rebekah Pratt
Graduate Program Coordinator: Rebekah Pratt
Location: Veterinary Medical Education (VME) 390
Phone: 435-797-1762
Email: rebekah.pratt@usu.edu

Degrees Offered

- Master of Science (Biomedical Sciences - MS)
- Doctor of Philosophy (Biomedical Sciences - PhD)
- Master of Public Health: (Veterinary Public Health Specialization - MPH)

NOTE: Students who are seeking a Doctor of Veterinary Medicine (DVM) should visit Doctor of Veterinary Medicine - DVM for more information.

Objectives
The Veterinary Clinical and Life Sciences Department (VCLS) is currently the only department in the College of Veterinary Medicine (CVM). The VCLS department houses the graduate program MS and PhD degrees in Biomedical Sciences, whereas the Doctor of Veterinary Medicine (DVM) is conferred by the College of Veterinary Medicine (CVM), not the VCLS department.

Biomedical Sciences Degrees
The Biomedical Sciences Program is a graduate program within the College of Veterinary Medicine (CVM) in which both Master of Science (MS) and Doctor of Philosophy (PhD) degrees are offered. Students in this program engage in coursework and interdisciplinary basic and clinical research focused on human and animal health and disease. Research areas are determined by individual faculty members and are listed on the VCLS research website.

Currently, undergraduate coursework is not available in the CVM, but undergraduate students who are interested in engaging in biomedical research are encouraged to visit the VCLS department research website. Research opportunities, including a limited number of summer research stipends, are available on a competitive basis to undergraduate students, dependent on funding.

Admission to the Biomedical Sciences MS and PhD Graduate Program
Prior to applying to either an MS or PhD degree in Biomedical Sciences, a student must identify and contact a graduate faculty member within the Department of Veterinary Clinical and Life Sciences who is willing to act as their major (supervisory) professor for the desired program. Finding a professor does not guarantee acceptance into the Biomedical Sciences Program.

To find a major professor, interested students are encouraged to view the CVM faculty directory to learn more about their research areas. The individual faculty members will need the following information from the interested student:

- Cover Letter stating the student's interest in their research and how it would be consistent with the student's career goals.
- Current CV/Resume
- Most Recent Unofficial Transcript

For general admission requirements, see Graduate School Admissions. All prospective graduate students must apply through the School of Graduate Studies and comply with the requirements set forth by USU. The School of Graduate Studies admission and program requirements can be found in the School of Graduate Studies catalog page.

Required Credits for Completion

- BS to MS: Total Minimum 30 Credits
- BS to PhD: Total Minimum 70 Credits
- MS to PhD: Total Minimum 42 Credits
- DVM to PhD: Total Minimum 42 Credits

For full details of admission, program requirements and policies, please visit:

- Biomedical Sciences - MS - MS
- Biomedical Sciences - PhD-PhD

Financial Assistance
Several forms of financial assistance are available to graduate students and are awarded on a competitive basis. Students requesting financial support should have completed their application to the School of Graduate Studies by March 1st and then have submitted an application for a Teaching Assistantship to the VCLS department by March 15th for the coming academic year. Graduate teaching assistantships may be available through the VCLS department. Research assistantships may be available through funds provided by individual faculty members.

Acceptance in the Biomedical Sciences graduate program per se does not guarantee any financial assistance. Continuous funding is contingent upon availability and may change during a student's program.

Residency

Domestic matriculated graduate students are required to obtain residency at the soonest possible date upon beginning their program. A student is eligible to apply for residency upon having proof of having resided in Utah for 12 continuous months, prior to the term for which the student is seeking resident student status.

It is the student's responsibility to provide evidence that they are eligible for resident student status prior to the first day of classes for the term for which the student seeks resident tuition. See the Utah System of Higher Education website to view residency status requirements.

Note: International matriculated graduate students are not eligible to obtain residency but are eligible for the Research Nonresident Tuition Waiver. See the School of Graduate Studies website for more information on all financial aid opportunities.

FACULTY - College of Veterinary Medicine

Watershed Sciences Department

Watershed Sciences

Interim Department Head: Edd Hammill
Location: Natural Resources 210
Phone: (435) 797-2213
Website: www.qcnr.usu.edu/wats

Undergraduate Advisor: Wake Harper, Natural Resources 122, (435) 797-3375, qcnr.usu.edu/advising/

Degrees offered: Bachelor of Science (BS) in Fisheries and Aquatic Sciences; BS in Management and Restoration of Aquatic Ecosystems; Master of Ecological Restoration (MoER); Master of Science (MS) and Doctor of Philosophy (PhD) in Watershed Science; MS and PhD in Ecology; MS in Fisheries Biology

Minors offered: Fisheries Science, Marine Science, Geographic Information Science, Watershed Science

Certificates offered: Certified Ecological Restoration Practitioner-in-Training (CERPIT) through Society for Ecological Restoration, Graduate Certificate in Aquatic Ecosystem Restoration, River Studies and Leadership Certificate

Graduate specializations: MS, PhD in Ecology—Aquatic Ecology; MS in Fisheries Biology—Conservation Biology, Fisheries Management; MS, PhD in Watershed Science—Geomorphology and Earth Surface Processes, Climate Adaptation Science

Full details of the learning objectives, assessment plans, student outcomes, and evidence of continuous improvement for these programs of study can be found at https://qcnr.usu.edu/wats/assessment/.

Undergraduate Programs

Objectives

Watershed science is the study of the physical, chemical, and biological processes associated with the movement of water across the landscape. Clean and adequate water supplies are essential elements of human societies. Understanding the interaction among water, earth materials, plants, and animals is essential to the management of wildland, agricultural, and urban ecosystems. The Department of Watershed Sciences offers comprehensive educational opportunities for undergraduate and graduate students interested in fisheries science, aquatic ecology, and the understanding of watershed ecosystems. Departmental faculty provide expertise in fish biology, the management and conservation of aquatic ecosystems, geographic information systems, and the analysis of the water cycle. Degree programs within the Watershed Sciences Department help students learn how water links the physical, biological, and geographic aspects of watersheds. Knowledge of this linkage process is necessary for understanding and managing water supply, water quality, and ecosystem health.

Career Opportunities

Watershed scientists work throughout the United States, as well as in the developed and developing world, performing the tasks of understanding, managing, and restoring water supplies, water quality, and ecosystem health. Graduates of programs within the Watershed Sciences Department become scientists and managers for natural resources agencies, professionals with consulting and nonprofit environmental firms, and teachers and researchers at major universities. Degree holders often work as environmental scientists, hydrologists, fisheries biologists, or specialists in geographic information analysis and remote sensing. With experience and/ or advanced degrees, graduates of programs within the Watershed Sciences Department may do natural resource assessment, management planning, and resource impact analysis.

Federal agencies, such as the Forest Service, Fish and Wildlife Service, Geological Survey, Bureau of Land Management, Environmental Protection Agency, National Park Service, Bureau of Reclamation, and National Marine Fisheries Service, hire graduates of the Department of Watershed Sciences academic programs. Graduates also find employment with state natural resource agencies, nongovernmental conservation organizations, and private consulting firms.

Requirements

Departmental Admission Requirements

Admission requirements for the department are the same as those described for the S.J. and Jessie E. Quinney College of Natural Resources.

Academic Advisement

Students are encouraged to meet with their advisor each semester prior to enrolling for courses. Students should contact the Department of Watershed Sciences (NR 210) or the S.J. and Jessie E. Quinney College of Natural Resources Academic Service Center (NR 120) to be assigned an advisor.

Recommended Four-Year Plans

Recommended semester-by-semester four-year plans for students working toward bachelor's degrees are available in the Academic Advising Office.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Financial Assistance

The main sources of undergraduate financial assistance include university scholarships, grants-in-aid, work-study, and loans. In addition, more than 65 scholarships are offered for eligible students in the S.J. and Jessie E. Quinney College of Natural Resources.

Scholarships are awarded for scholastic and professional achievements at the department, S.J. and Jessie E. Quinney College of Natural Resources, and university level. For more information, contact S.J. and Jessie E. Quinney College of Natural Resources academic advisors. Grants-in-aid and work-study are available from the Financial Aid Office. In addition, departmental faculty often employ undergraduate students to assist in research, extension, and outreach projects. These projects often involve field and laboratory data collection, data management and analysis, and report preparation.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For additional information about the Bachelor of Science requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Watershed Sciences, visit the Watershed Sciences main office, Natural Resources 210, or visit qcnr.usu.edu/wats. Major requirement sheets may be obtained at the Academic Advising Office.

Graduate Programs

Admission Requirements

General admission requirements apply, in addition to the requirements which follow. Although admission to the graduate program is treated on an application-by-application basis, the following are usually required:

1. A bachelor's degree from an accredited college or university.
2. A GPA of 3.2 or better (out of 4.0) for the most recent 60 credits of academic coursework.
3. A letter of "interest and purpose" detailing the applicant's reasons for seeking an advanced degree.
    - The written statement of interest helps match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.
4. Foreign students should have a TOEFL score of at least 550.

Previous training in the field is not a prerequisite for admission, although a sound background in the physical and biological sciences is recommended. Successful applicants without the necessary background will be expected to obtain it in the course of their studies for the advanced degree.

Master of Ecological Restoration

The Master of Ecological Restoration (MoER) enables WATS undergraduates to obtain a professional master's degree in one year following completion of the MRAE or FAS degree. The degree is designed to prepare graduates for a career as a restoration practitioner. The MoER degree combines coursework, an internship, and design exercises.

The mission of the MoER program is to prepare future restoration professionals with the perspective and skillsets needed to assess the condition of wetland, lake and stream ecosystems; identify causes of degradation; and develop and implement plans for restoration of ecosystem health.

Master of Natural Resources

In addition to its MoER,Master of Science, and doctoral programs, the department participates in the Master of Natural Resources - MNR. This is a nonthesis master's degree program designed for students and practicing professionals seeking advanced training in natural resource management, with an emphasis on collaboration and interdisciplinary teamwork.

Financial Assistance

General aspects of financial support for graduate students at Utah State University are listed in the School of Graduate Studies in the *Graduate Financial Assistance* section. This includes important information on the university-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive university-wide fellowships and scholarships.

Assistantships

Research assistantships are available through individual faculty members who hold research grants or contracts. Occasionally, teaching assistantships are available through the department. Recipients of teaching assistantships are usually selected from among PhD students.

Western Regional Graduate Programs

The MS and PhD in Watershed Science are Western Regional Graduate Programs. For more information, see the School of Graduate Studies.

FACULTY - S.J. & Jessie E. Quinney College of Natural Resources

Programs

Ecology - Watershed Sciences - MS
Ecology - Watershed Sciences - PhD
Aquatic Ecosystem Restoration - Post-Bachelor's Certificate
Fisheries and Aquatic Sciences - BS
Fisheries Science - Minor
Fisheries Biology - MS
Freshwater and Marine Ecology - BS
Geographic Information Science - Minor
Marine Science - Minor
Master of Ecological Restoration - MOER (NOT CURRENTLY OFFERED)
Management and Restoration of Aquatic Ecosystems - BS
Watershed Science - Minor
Watershed Science - MS
Watershed Science - PhD

Courses

WATS1200 - The Natural World and Our Place Within It (BLS) - 3 - Credits
WATS2000 - Natural Resource Professional Orientation - 1 - Credits
WATS2050 - Data Management for Natural Resources – Cleaning and Shaping Data - 1 - Credits
WATS2060 - Data Management for Natural Resources – Data Display and Analysis - 1 - Credits
WATS2220 - General Ecology - 3 - Credits
WATS2500 - Introduction to Marine Biology (BLS) - 3 - Credits
WATS2800 - Introduction to Geographic Information Sciences - 4 - Credits
WATS3000 - Oceanography (DSC) - 3 - Credits
WATS3100 - Fish Ecology, Conservation, and Management (CI/DSC) - 3 - Credits
WATS3110 - Fish Ecology, Conservation, and Management Lab - 1 - Credits

WATS3200 - Marine Ecology: Expedition Sea of Cortez (DSC) - 3 - Credits
WATS3450 - Introduction to Coral Reefs-Field Course (DSC) - 3 - Credits
WATS3500 - Water and Power - 3 - Credits
WATS3700 - Fundamentals of Watershed Science (CI) - 3 - Credits
WATS4050 - Marine Global Change: Impacts and Conservation Strategies - 3 - Credits
WATS4100 - Climate Adaptation Intern Program - 3 - Credits
WATS4250 - Advanced Internship/Co-op - 1 - 9 Credits
WATS4300 - Principles of Ecosystem Restoration - 3 - Credits
WATS4490 - Small Watershed Hydrology (QI) - 4 - Credits
WATS4500 - Limnology: Ecology of Inland Waters - 3 - Credits
WATS4510 - Aquatic Ecology Methods - 2 - Credits
WATS4520 - Aquatic Ecology Practicum II: Analysis - 2 - Credits
WATS4530 - Water Quality and Pollution - 3 - Credits
WATS4540 - Ichthyology - 4 - Credits
WATS4600 - Environmental Water Management - 3 - Credits
WATS4720 - Drone Data Analysis for Environmental Restoration - 2 - Credits
WATS4950 - Special Topics - 1 - 3 Credits
WATS4960 - Directed Readings - 1 - 3 Credits
WATS4970 - Undergraduate Research - 1 - 3 Credits
WATS4980 - Watershed Sciences Departmental Seminar - 1 - Credits
WATS4990 - Senior Thesis - 2 - 3 Credits
WATS5003 - Remote Sensing of Land Surfaces - 4 - Credits
WATS5055 - American Academy of Underwater Sciences Scientific Diver Certification Course - 2 - Credits
WATS5110 - Environmental Biogeochemistry - 3 - Credits
WATS5150 - Fluvial Geomorphology - 3 - Credits
WATS5200 - Fish Habitats - 2 - Credits
WATS5210 - The Secret Life of Elements on Earth - 2 - Credits
WATS5305 - Ecology and Restoration of Plants - 3 - Credits
WATS5311 - Field Botany: Wetland and Riparian Plants - 1 - Credits
WATS5312 - Wetland Delineation - 1 - Credits
WATS5350 - Capstone and Professional Practice - 2 - Credits
WATS5360 - Wetland Ecology and Management - 3 - Credits
WATS5490 - Small Watershed Hydrology (QI) - 4 - Credits
WATS5500 - Limnology: Ecology of Inland Waters - 3 - Credits
WATS5530 - Water Quality and Pollution - 3 - Credits
WATS5540 - Ichthyology - 4 - Credits
WATS5550 - Freshwater Invertebrates - 3 - Credits
WATS5600 - Environmental Water Management - 3 - Credits
WATS5610 - Field Introduction to Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5620 - Intro to Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5621 - Science and Case Studies of Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5622 - Planning Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5623 - Designing Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5624 - Implementation of Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5625 - Adaptive Management and Monitoring of Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS5630 - Beaver Translocation for Restoration - 1 - Credits
WATS5640 - Riparian Ecology and Management - 3 - Credits
WATS5650 - Analysis of Fisheries Data with R - 2 - Credits
WATS5655 - Principles in Fishery Management - 3 - Credits
WATS5660 - Watershed and Stream Restoration - 2 - Credits
WATS5670 - Watersheds and Stream Restoration Practicum - 2 - Credits
WATS5680 - Paleoclimatology - 3 - Credits
WATS5690 - Climate Data-Driven Resource Management - 3 - Credits
WATS5720 - Drone Data Analysis for Environmental Restoration - 2 - Credits
WATS5790 - Small Watershed Hydrology (QI) - 4 - Credits
WATS5800 - Watershed Sciences Departmental Seminar - 1 - Credits
WATS6003 - Remote Sensing of Land Surfaces - 4 - Credits
WATS6050 - Aquatic Ecosystems and Water Resources Systems Modeling - 2 - 4 Credits
WATS6110 - Environmental Biogeochemistry - 3 - Credits
WATS6120 - Aquatic Production Biology - 2 - Credits
WATS6150 - Fluvial Geomorphology - 3 - Credits
WATS6155 - Fluvial Geomorphology - Reading Riverscapes - 3 - Credits
WATS6210 - The Secret Life of Elements on Earth - 2 - Credits
WATS6220 - Advanced Limnology - 2 - Credits
WATS6230 - Fish Ecology - 2 - Credits
WATS6240 - Graduate Internship/Co-op - 1 - 9 Credits
WATS6260 - Watershed Sciences Graduate Student Induction Course - 1 - Credits
WATS6270 - Big Ideas in Watershed Science - 2 - Credits
WATS6305 - Ecology and Restoration of Plants - 3 - Credits
WATS6311 - Field Botany: Wetland and Riparian Plants - 1 - Credits
WATS6312 - Wetland Delineation - 1 - Credits
WATS6340 - Prioritizing Conservation and Management Actions With Marxan - 3 - Credits
WATS6350 - Capstone Mentoring - 1 - Credits
WATS6360 - Wetland Ecology and Management - 3 - Credits
WATS6400 - Communicating Science: A Short Course for Graduate Students - 1 - Credits
WATS6450 - Ecological Analysis with Mixed Effects Models - 3 - Credits
WATS6460 - Dynamic Models for Natural Resources Management Decisions - 3 - Credits
WATS6490 - Small Watershed Hydrology - 4 - Credits
WATS6491 - Streamflow Analysis - 1 - Credits
WATS6500 - Limnology: Ecology of Inland Waters - 3 - Credits
WATS6530 - Water Quality and Pollution - 3 - Credits
WATS6540 - Ichthyology - 4 - Credits
WATS6600 - Environmental Water Management - 3 - Credits
WATS6626 - Advanced Project Planning of Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS6627 - Advanced Project Design of Low-Tech Process-Based Restoration of Riverscapes - 1 - Credits
WATS6628 - Intro to Action-Effectiveness Monitoring of Riverscape Restoration Projects - 1 - Credits
WATS6629 - Screening & Prioritization of Riverscape Restoration - 1 - Credits
WATS6655 - Principles in Fishery Management - 3 - Credits
WATS6680 - Paleoclimatology - 3 - Credits
WATS6690 - Climate Data-Driven Resource Management - 3 - Credits
WATS6700 - Restoration Ecology - 4 - Credits
WATS6720 - Drone Data Analysis for Environmental Restoration - 2 - Credits
WATS6750 - Prioritizing conservation and management actions with Marxan - 3 - Credits
WATS6800 - Watershed Sciences Departmental Seminar - 1 - Credits
WATS6840 - Ecohydraulics - 3 - Credits
WATS6850 - Geomorphic Change Detection: Restoration Monitoring - 1 - Credits
WATS6860 - Partnering with Beaver in Restoration Design - 1 - Credits
WATS6870 - Ecology Seminar - 1 - Credits
WATS6900 - Graduate Special Topics - 1 - 6 Credits
WATS6910 - Directed Study - 1 - 6 Credits
WATS6915 - GIS Fundamentals - 1 - Credits
WATS6940 - Snow Hydrology - 3 - Credits
WATS6970 - Thesis Research - 1 - 12 Credits
WATS6990 - Continuing Graduate Advisement - 1 - 9 Credits
WATS7120 - Aquatic Production Biology - 2 - Credits
WATS7230 - Fish Ecology - 2 - Credits
WATS7460 - Dynamic Models for Natural Resources Management Decisions - 3 - Credits
WATS7640 - Riparian Ecology and Management - 3 - Credits
WATS7800 - Watershed Sciences Departmental Seminar - 1 - Credits
WATS7900 - Graduate Special Topics - 1 - 6 Credits
WATS7910 - Directed Study - 1 - 6 Credits
WATS7970 - Dissertation Research - 1 - 12 Credits
WATS7990 - Continuing Graduate Advisement - 1 - 9 Credits

WILD3200 - Marine Ecology: Expedition Sea of Cortez (DSC) - 3 - Credits

Wildland Resources Department

Wildland Resources

Department Head: Christopher Keyes
Location: Natural Resources 206
Phone: (435) 797-2503
E-mail: stacey.brummer@usu.edu
Website: https://qanr.usu.edu/wild/

Undergraduate Advisor: Stephanie Myers, Natural Resources 116, (435) 797-2695, stephanie.myers@usu.edu

Degrees offered: Bachelor of Science (BS) in Conservation and Restoration Ecology, Forest Ecology and Management, Rangeland Ecology and Management, and Wildlife Ecology and Management; Master of Science (MS) and Doctor of Philosophy (PhD) in Ecology, Forestry, Range Science, and Wildlife Biology

Graduate specializations: *MS, PhD in Ecology*—Conservation Biology, Forest Ecology, Wildlife Ecology; *MS, PhD in Range Science*—Range Animal Nutrition, Range Management; *MS, PhD in Wildlife Biology*—Wildlife Management

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement can be found at https://qanr.usu.edu/wild/about/assessment/undergraduate for Wildland Resources undergraduate programs of study and at https://qanr.usu.edu/wild/about/assessment/graduate for graduate programs of study.

Undergraduate Programs

Objectives

The Department of Wildland Resources offers four undergraduate degrees: Conservation and Restoration Ecology, Forest Ecology and Management, Rangeland Ecology and Management, and Wildlife Ecology and Management. These degree programs offer broad educational opportunities for students interested in the analysis and management of forest and rangeland ecosystems and their associated wildlife populations. The department's philosophy of education is to promote a broad interdisciplinary approach to natural resources analysis, management, and science.

The first two years of study in the Department of Wildland Resources are designed to provide students with a sound background in the natural sciences, an introduction to the field of natural resources management, and an introduction to their respective major. The last two years are designed to provide an advanced understanding of natural resource management and science, depth concentration in the major, and experience with the integration of scientific and management concepts across a diversity of disciplines and management scenarios. To maintain correct course sequencing and to stay on track for graduation, students are encouraged to enroll for 15 or more credits of coursework per semester.

Career Opportunities

Graduates in all degree programs receive a solid background in biological and quantitative sciences, as well as the communication skills needed to succeed in many career paths. Our Forest Ecology and Management and Rangeland Ecology and Management degrees are accredited by the Society of American Foresters and Society for Range Management, respectively.

Requirements

Admission Requirements

Admission requirements for the Department of Wildland Resources are the same as those described for the S.J. and Jessie E. Quinney College of Natural Resources.

Recommended Four-year Plans

Recommended semester-by-semester four-year plans for students working toward bachelor's degrees are available on the program page and in the Department of Wildland Resources.

Students should consult with their advisor to develop a plan of study tailored to their individual needs and interests.

Financial Assistance

The main opportunities for undergraduates to find financial support through grants, work-study, and loans are listed in the Financial Aid and Scholarship information section. In addition, more than 30 scholarships are available for eligible students in the S.J. and Jessie E. Quinney College of Natural Resources. Some students may be able to find paid internships with private or governmental organizations or work for a faculty member on a research project. Interested persons should contact the college's Academic Service Center for more information on financial assistance for undergraduate students.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

The undergraduate program may be tailored to individual student needs with the help of the QCNR undergraduate advisor. For additional information about the degree requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit https://qanr.usu.edu/wild/.

Major requirement sheets, which outline career opportunities and required courses for departmental majors, can be obtained from the department.

Graduate Programs

Admission Requirements

The Department of Wildland Resources offers opportunities for graduate study through MS and PhD degree programs in Ecology, Forestry, Range Science, and Wildlife Biology. The programs of instruction and research leading to graduate degrees in the department are available only to students meeting high scholastic standards who are accepted for study by the departmental faculty. Students desiring entrance to these graduate programs should contact the department for information concerning eligibility.

USU School of Graduate Studies general admission requirements are listed in the Graduate Admissions section. Applicants for graduate study in the department should have a bachelor's degree from an accredited college or university, an overall GPA of at least 3.0 (out of 4.0), and GRE scores (quantitative and verbal) above the 40th percentile. Foreign students should submit a TOEFL score of at least 550. Exceptions to these standards will be considered on a case-by-case basis. Written statements of interest help match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted for study. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

A natural resources baccalaureate degree is not required for admission to the department's graduate programs although a sound background in the natural sciences is strongly recommended. Students lacking the requisite background will work with their supervisory committee to address deficiencies.

Research

Cooperation with other departments and research centers of the university, as well as with government collaborators, permits strong graduate programs in all aspects of forest, range, and wildlife-related sciences. Department faculty affiliate closely with the USU Ecology Center, the Utah Agricultural Experiment Station, the Utah Cooperative Fisheries and Wildlife Research Unit, the Predator Ecology and Behavior Field Station, the Jack H. Berryman Institute, the U. S. Forest Service, the Rocky Mountain Research Station, and the USDA Agricultural Research Service.

Financial Assistance

General aspects of financial support for graduate students at Utah State University are listed in the *Graduate Financial Assistance* section in the School of Graduate Studies. This includes important information on the university-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive university-wide fellowships and scholarships. The S.J. and Jessie E. Quinney College of Natural Resources also offers a limited number of Quinney Doctoral Fellowships for incoming doctoral students.

Graduate research assistantships may be available on a competitive basis to both MS and PhD students through major professors having contracts, grants, or other awards from the university, private sector, or government agencies. These assistantships vary in the amount of support offered, but they commonly offer a stipend to help cover living expenses and operating funds to carry out the research. Other benefits may include assistance with tuition and student health insurance, as well as opportunities to travel.

The department also has a few graduate teaching assistantships for MS and PhD students who help with teaching or grading. These typically pay only a modest supplement on a semester basis, however, and are not sufficient to cover living expenses. Acceptance to pursue graduate study does not guarantee the student financial assistance.

Master of Natural Resources

In addition to its Master of Science and doctoral programs, the department also participates in the Master of Natural Resources - MNR. This is a non-thesis master's degree program designed for students and practicing professionals seeking advanced training in natural resource management, with an emphasis on collaboration and interdisciplinary teamwork.

Additional Information

For more information about graduate programs and departmental faculty and their research emphasis areas, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit https://qanr.usu.edu/wild/

FACULTY - S.J. & Jessie E. Quinney College of Natural Resources

Spanish: David Richter, Main 202H, (435) 797-9167, david.richter@usu.edu

Degrees offered: Bachelor of Arts (BA) in Asian Studies, Chinese, French, French Teaching, German, German Teaching, Portuguese, Spanish, Spanish Teaching, Master of Second Language Teaching (MSLT).

Full details of the learning objectives, assessment plan, student outcomes, and evidence of continuous improvement for these programs of study can be found at lpcs.usu.edu/about/assessment/index.

Programs

Mission Statement

The Department of World Languages and Cultures offers programs in modern languages and literature, and intensive English education. The mission of the department is to explore thought, expression, and values in a global context. Thus, the department plays an important role in the "internationalization" of the university. The department seeks to increase its students' abilities to communicate with others, to critically and sensitively investigate multiple means of understanding the human experience. The department helps students achieve the language and cultural proficiency necessary to become active members of the global community. By doing so, the department prepares its students to meet both career and life goals.

The undergraduate language programs help students develop a greater knowledge about and love of specific world languages. These programs encourage students to be responsible members of the global community by increasing their understanding of the literature, culture, and history of the people who share these diverse languages. There are specific programs available for students interested in language teaching careers. The language majors and minors provide background for success in a wide variety of careers.

The Master of Second Language Teaching (MSLT) program is an innovative program with a multi-disciplinary approach to culture, language, literacy, and pedagogy. Students choose their own areas of focus depending on their language specialty and career objectives. The department's mission is to prepare students to be effective cross-cultural communicators and language teachers in a wide variety of professional settings.

The majors in the department are: Asian Studies (BA), Chinese (BA), French (BA), French with Teaching Emphasis (BA), German (BA), German with Teaching Emphasis (BA), Portuguese (BA), Spanish (BA), Spanish with Teaching Emphasis (BA), Second Language Teaching (MSLT).

The minors in the department are: Arabic Studies, Asian Studies, Chinese, Chinese with Teaching Emphasis, French, French with Teaching Emphasis, German, German with Teaching Emphasis, Japanese, Linguistics, Portuguese, Russian, Spanish, Spanish with Teaching Emphasis.

Courses offered by the department provide majors and minors with opportunities to achieve this understanding by increasing their communicative, interpretive, linguistic and research skills; their ability to function within an increasingly globalized society; and their awareness of ethical, aesthetic, and other values. Courses offered by the department also give students in the teaching emphasis and teaching minors the opportunity to serve the needs of the education professions.

The department furthers the education of both traditional and nontraditional students through faculty participation in interdisciplinary programs such as Honors, Latin American Studies, Medieval and Early Modern Studies, Asian Studies, and Women and Gender Studies; and in cooperative education, distance learning, extension, and study-abroad programs.

Admission Requirements

Admissions requirements for first-year students desiring entrance to major programs offered by the Department of World Languages and Cultures are the same as those for Utah State University. Transfer students from other institutions and from other majors within Utah State University must have an overall minimum GPA of 2.5 to be admitted to the department's major programs, except the Spanish and Spanish with Teaching Emphasis programs, which require a 3.00 GPA.

All students majoring in programs offered by this department must maintain a minimum GPA of 2.5 in their major (3.0 in Spanish) to be in good standing in the department and to obtain official approval for graduation.

Career Information

For career and graduate school information, students should contact undergraduate advisors in the department.

Scholarship Information

The following are scholarships offered through the Department of World Languages and Cultures.

Carl T. Degener Memorial Scholarship is awarded to an outstanding language major at the junior level.
The Edgar R. Lewandowski Memorial Scholarship Endowment is awarded to a major in German with a demonstrated financial need. Preferential consideration will be given to students from Logan High or another Cache Valley high school.
Gene W. and Ruth Miller Family Scholarship is for an academic major in languages.
Jaime Cantarovici Memorial Scholarship is awarded to an outstanding undergraduate senior majoring in Spanish.
Jean Inness Scholarship is awarded to outstanding upper-division student in French (and under some circumstances Spanish).
Thain Scholarship is given to an outstanding high school senior enrolling in a language or philosophy course at USU.

The **Mehdi Heravi Middle East Scholarship Endowment** is used to support scholarships for students studying Middle Eastern languages. Qualifying languages, in order of the donor's priority, are Farsi (Persian), Arabic and then Turkish.

University Honors Program

The University Honors Program offers students in all colleges and majors the unique opportunity to deepen their educational experience with hands-on practical applications of their academic knowledge. The Honors Program admits incoming, transfer, and existing USU students based on application. High achieving students with at least one year remaining are encouraged to apply. See the University Honors Program catalog entry and website (honors.usu.edu) for more information.

Additional Information

For detailed information about requirements for majors and minors within the World Languages and Cultures Department, see the major requirement sheets, which are available from the department.

Languages

Language Program Learning Objectives

The learning objectives for the various language programs reflects the ACTFL Standards of Foreign Language Learning (i.e., the 5 C's: Communication, Cultures, Connections, Comparisons, Communities) in the classroom.

1. Students will be proficient in speaking, listening, reading, and writing in their language of study.
2. Students will be able to interpret a variety of cultural products (texts, films, music, art, photography, etc.).
3. Students will be exposed to methods of inquiry and research appropriate to the humanities.
4. To prepare students for a broad selection of professional activities appropriate to the 21st century job market in which knowledge of a foreign language is important, including primary/secondary language instruction, as well as graduate or other professional studies.
5. The students with modern language teaching majors and minors will be able to apply theories and research about second language learning and current teaching methodologies that promote communicative competence to practical language teaching situations

Language faculty members in the Department of World Languages and Cultures teach courses leading to undergraduate degrees in Asian Studies, Chinese, French, German, Portuguese and Spanish, as well as to undergraduate minors in Arabic Studies, Chinese, French, German, Japanese, Portuguese, Russian, and Spanish. Teaching emphases and minors are also offered in Chinese, French, German, and Spanish. The department also offers a minor program in Linguistics. Other languages taught through the department include Arabic (with on-campus classes), as well as Korean. Italian is taught through Distance Education (see http://distance.usu.edu).

Sample Four-year Plans

Sample semester-by-semester four-year plans for students working toward a Bachelor of Arts degree in French, German, or Spanish can be found in the department. Students should consult with the academic advisor to develop a plan of study tailored to their individual needs and interests.

Proficiency Tests, Placement in Language Courses, and Obtaining Credit by Special Examination

Students who have completed one or more years of language study in French, German, Russian, or Spanish may take the CAPE proficiency tests offered by the Department of World Languages and Cultures to determine proximate placement in language courses. After taking the test and if they are a currently enrolled USU student, French, German, Russian, and Spanish testers have the option of buying 4-16 language credits and may get help with authorization and placement in a language course.

(**Note:** In order to purchase these language credits, a student must be an active student, have a USU "A" number, and be a current student enrolled in one or more courses at Utah State University.)

Students with skills beyond the basic level in Chinese or Japanese should take a departmental placement test for those languages. If someone taking these tests places at a 3000 proficiency level, they still need to take the 3010/3020 course in the language. After they complete the class with at least an A or B, they can purchase lower-division Chinese or Japanese credits that aren't showing on their transcript as classes. Students who are placed at the 1000 or 2000 proficiency level after testing must also take one 4-5 credit course that they place into. If that student gets at least an "A" or "B" range grade in that course, then they can come to the LPCS office and get a form to purchase the lower-division credits. The Chinese or Japanese class needs to be at a higher level than the credits to be acquired.

Students with skills beyond the basic level in Portuguese, Italian, or Korean need to contact the departmental office to obtain authorization and help getting into the Portuguese, Italian, or Korean course available. Portuguese and Korean are available as regular classes. Italian is available as a Distance Education class. After taking the higher-level class that is available and getting an A or B in that class, students can purchase 4-16 lower-division credits in Portuguese and Italian. With Korean, students can purchase 5-20 lower-division credits. These credits are a grade for each class and will affect the overall GPA.

The testing credits will not count toward a certain semester or the institution GPA, but will be counted into the overall GPA. For further details, students should email the department at lpsc@usu.edu or call (435) 797-1209.

Students who are proficient in a language not offered at USU (the list is available in Main 204) may receive up to 16 semester credits by taking the FLATS foreign language proficiency test. Students will need to have the USU language department proctor this test for them. There is a $25 proctor fee. Students interested in taking this test should register online at flats.byu.edu/. Before registering, students will pay online for the $50 FLATS test fee. Students will also need to provide the USU proctor information and where to have the test results sent to. This information may be obtained at Main 204, 435-797-1209 or lpcs@usu.edu.

(**Note:** In order to purchase these language credits, a student must have a USU "A" number and be a current student enrolled in and attending one or more courses at Utah State University.)

Technology Assisted Language Center

The department operates a technology assisted language center, located in Main 004, for instructional use associated with language classes, and for students desiring additional language practice outside of the classroom. The center includes computer workstations capable of running multimedia applications, as well as audio equipment.

Exchange Programs, Semester Abroad Programs, and Summer Study Abroad Programs

The World Languages and Cultures Department assists students with academic advising for study abroad exchange programs, semester abroad programs, and summer study abroad programs. Students must be in good standing at the university, and it is recommended that the students have some language preparation in order to participate in these programs. Students desiring to count study abroad credits toward a major or minor in this department must obtain approval for these courses prior to their participation in the study abroad program. For more information, contact the departmental office at (435) 797-1211 or visit the Department Study Abroad Programs website at lpcs.usu.edu/programs/languages/study-abroad/index.

For other study abroad program information, contact the USU Study Abroad Office, Taggart Student Center 311, or visit the Study Abroad Programs website at: http://www.usu.edu/studyabroad/.

National Honor Societies

Sigma Delta Pi (SDP) is the National Collegiate Hispanic Honor Society of the American Association of Teachers of Spanish and Portuguese for students studying Spanish. Among the goals of SDP are to honor those who attain excellence in the study of the Spanish language and of the literature and culture of the Spanish-speaking peoples, and to encourage college and university students to acquire a greater interest in and a deeper understanding of Hispanic culture.

Phi Sigma Iota (PSI) is an international language honor society for juniors, seniors, and graduate students who excel in foreign language. PSI promotes international communication and understanding, as well as a sentiment of unity among nations. Phi Sigma Iota helps members further their training through scholarship and graduation honors. The society also promotes trips abroad.

Intensive English Language Institute

Objectives

The Intensive English Language Institute (IELI) is an academic program contained in the College of Humanities and Social Sciences and the World Languages and Cultures Department. IELI teaches international students, residents, and refugees the English skills and cultural knowledge they need to be successful university students. IELI also trains international teaching assistants (ITAs) for USU. Information about the ITA training is available through the School of Graduate Studies.

The IELI program accepts students seeking a degree at Utah State University, as well as students who want to study English for personal or professional reasons. Students may enroll to study only English.

To be admitted to USU as an undergraduate, international applicants must present:

- a TOEFL score of 71 iBT (internet-based test) or 525 paper/pencil test, or
- an IELTS score of 6.0 (with a minimum of 5.0 on each subscale)

To be admitted to USU as a graduate student, international applicants must present:

- a TOEFL score of 79-80 iBT (internet-based test) or 550 paper-pencil test
- an IELTS score of 6.0

International applicants with less than the above scores on either the TOEFL or IELTS, or not presenting TOEFL or IELTS scores, must take the IELI Placement Test, given at the beginning of each semester (fall, spring, and summer), or be exempted from study in IELI and permitted to take classes in their major fields.

U.S. residents must present an SAT score or an ACT score for admission to USU. Residents who are still learning English and who do not have an ACT score of at least 17-22 (or a SAT score of at least 900-1100) may be admitted to USU on a provisional basis if they have graduated from a U.S. high school with a GPA of a least 2.5. They may take the IELI Placement Test and study in IELI until they have successfully completed the program, after which they may be eligible to continue in an academic major.

Curriculum

Four levels of study are offered each semester. The ability levels of classes range from high-beginning through advanced. Students entering IELI must have a basic knowledge of English in listening, speaking, reading and writing. Several of the level 1 and 2 classes are combined into multilevel classes. Classes focus on listening, speaking, reading, writing, and cultural skills. In addition, there are topics courses, covering topics ranging from current events and the environment to academic literacy and the cultures of the U.S. Students must complete one topics course for every level they study in the IELI program.

Students advance from one level of a class to the next higher level by obtaining a grade of C- or higher in the lower-level class. Students who do not obtain a C- or higher in a class must repeat the class. Students who complete all level 4 classes with a C- or higher may begin taking courses outside of IELI. Students at level 4, who have less than a full course load remaining in IELI, must take other university credits sufficient to stay in status with visa requirements. Exceptions to this policy must be approved by the director of IELI in consultation with students' major field advisors and the Office of International Students and Scholars.

Credit for Intensive English Study

Classes in IELI carry academic credit. Full-time students at each level take 18 credits per semester. A student who begins IELI at level 1 and progresses to level 4 may earn a total of 72 undergraduate elective credits. While all the credits will appear on a student's transcript, a maximum of 18 can be counted toward graduation. Application of the 18 credits will be determined by the student's college and major department. Students must, therefore, meet with their departmental advisors to determine the role of IELI credits in their graduation requirements. IELI 2470 and IELI 2475 count toward the General Education Breadth Social Science (BSS) requirement.

Services

New students in IELI take the Placement Examination and attend an orientation meeting prior to the beginning of each semester. All students are assigned an advisor in IELI who helps them with various difficulties they may encounter. In addition, all the services and privileges offered to students on campus are available to IELI students. These services include healthcare, clubs, recreational opportunities, and numerous special programs for international students.

Additive and Advanced Manufacturing Process - Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

The Additive and Advanced Manufacturing Process Academic Certificate is a comprehensive program that provides students with the essential skills and knowledge required to excel in additive and advanced manufacturing. Through a carefully designed curriculum, students will gain expertise in computer-aided drafting, computer-integrated manufacturing systems, design optimization for additive manufacturing, and cutting-edge additive manufacturing techniques.

Upon successfully completing the 15 required credits in the Additive and Advanced Manufacturing Process Academic Certificate, students will be well-equipped to contribute to the rapidly growing field of additive and advanced manufacturing.

Simple Requisites

Program Requirements

The Post-Bachelor's Certificate in Archiving and Public Programming provides professionalization and skills for those seeking employment in public, state, and non-profit institutions. It is open to any student already in enrolled in a graduate program at Utah State University. Please contact Lisa Gabbert, the Certificate advisor, for more information: lisa.gabbert@usu.edu.

Requires 12 total credits with a minimum 3.0 GPA in all coursework taken to fulfill certificate requirements.

Archiving and Public Programming - Post Bachelor's Certificate

Type
Completion Requirement

Required Courses (6 credits)

Fulfill ALL of the following requirements:

Required Course

Complete ALL of the following Courses:

- HIST6840 - Archives Management/Archives Internship - 1cr.

AND

Required Course

Complete at least 1 of the following courses:

- HIST6500 - Archiving Internship - 2cr.
- HIST6540 - Museum Internship - 2cr.
- ENGL6900 - Graduate Internship - 1cr.

Note: With permission of the certificate advisor, students may also substitute the internship course from their own department.

Elective Courses (6 credits)

Students should check with the certificate advisor, graduate program director, and with the instructor as they plan electives. Courses taken at the undergraduate level must be given graduate credit so students should work with instructor and advisor towards that goal.

Earn at least 6 credits from the following:

- ANTH6400 - Collections Management - 1cr.
- ARTH6270 - Graduate Native North American Art - 3cr.
- CCA3060 - Quantitative Methods for the Arts (QI) - 3cr.
- CMST3280 - Organizations and Social Change - 3cr.
- DATA6230 - Management of Database Systems - 3cr.
- HIST6720 - Oral History and Fieldwork Methods - 3cr.
- HIST6730 - Public Folklore - 3cr.
- ENGL6920 - Directed Study - 1cr.
- ENVS3400 - Fundamentals of Tourism - 3cr.
- HIST6880 - Special Topics: Advanced History Workshop - 1cr.
- ITLS6215 - Video and Audio Design and Production I - 3cr.
- ITLS6245 - eLearning Authoring Tools - 3cr.
- ITLS6265 - Internet Design and Development - 3cr.
- ITLS6760 - Grant and Proposal Writing - 3cr.
- JCOM4040 - Social Media Content Development - 3cr.
- JCOM5230 - Advanced Video Documentary Production - 3cr.
- JCOM6320 - Public Relations Agency - 3cr.
- MSLE6470 - Project Planning and Execution - 3cr.
- MUSC3970 - Non-Profit Arts Management - 3cr.
- NEPA6260 - Cultural and Natural Resource Compliance - 2cr.
- TCR3230 - Community Grant Writing - 3cr.
- TCR6240 - Communication Design - 3cr.

Applied Animal Reproduction - Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Animal, Dairy & Veterinary Sciences

Program Level
Undergraduate

About this Degree

The Applied Animal Reproduction Certificate is a 15- to 16-credit program designed to provide students with specialized knowledge and hands-on experience in reproductive technologies and management practices for various animal species. The program includes courses allowing students to apply reproductive techniques in real-world settings. Students can also choose from focused electives and are required to complete a research project or internship in applied animal reproduction. This certificate is ideal for students seeking careers in animal management, veterinary sciences, or livestock reproduction, providing them with the critical skills and knowledge to excel in these fields.

Admission Requirements for this Program

Students must be declared in a major in the Animal, Dairy and Veterinary Sciences or Biology departments.

Program Requirements

Total Credits Required In Program Coursework
15

Total Credits Required To Earn This Credential

Simple Requisites

Program Requirements

1. Attain a grade point average of at least 2.50 across all courses applied toward this certificate.
2. Courses required for the certificate may *not* be taken for a *pass/fail* grade except for courses that are only offered as pass/fail.
3. A minimum grade of C is required in all courses applied toward this certificate.

Required Courses

Type
Completion Requirement

Complete all required courses

Complete ALL of the following Courses:

- ADVS2200 - Anatomy and Physiology of Animals - 3cr.
  AND ADVS2203 - Anatomy and Physiology of Animals: Exploratory Laboratory - 1cr.
- ADVS3930 - Sheep Day - 1cr.
- ADVS4200 - Physiology of Reproduction and Lactation (CI) - 4cr.

NOTE:

1. 2 credits are required for ADVS3930 SHEEP DAY (fall term is required).
2. Some of these courses have prerequisites, which may in turn have further prerequisites, etc. We encourage you to plan accordingly and/or speak with an advisor.

Required Course

Type
Completion Requirement

Choose one of the following courses:

Complete at least 1 of the following courses:

- ADVS4210 - Applied Reproduction and Artificial Insemination - 2cr.
  OR ADVS4220 - Applied Equine Reproduction I - 3cr.

Required Course

Type
Completion Requirement

Choose one of the following courses:

Complete at least 1 of the following courses:

- ADVS4250 - Internship in Animal Industry - 1cr.
- ADVS4800 - Undergraduate Research or Creative Opportunity - 1cr.

Student must identify a research or internship opportunity that provides substantial work experience in applied animal reproduction.

NOTE:

1. A minimum of 3 credits is required in ADVS4250 INTERN ANIMAL INDUSTRY if selected
2. A minimum of 3 credits is required in ADVS4800 UNDERGRADUATE RESEARCH if selected

Diesel and Heavy Equipment Mechanics - AAS

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

The Diesel and Heavy Equipment Mechanics program empowers students with the advanced, industry-ready skills needed to excel as diesel technicians. It's designed to be a continuation of the Diesel Technology Technical Certificate. Through immersive, hands-on training, students master diesel engine systems, electrical and electronic diagnostics, steering and suspension, braking systems, drivetrains, HVAC, hydraulics, and preventative maintenance. Alongside technical excellence, the program emphasizes safety, professionalism, and strong workplace communication—preparing graduates to thrive in diverse and dynamic career environments.

Minimum University Requirements

Minimum University Requirements

Minimum University Requirements (Bachelor's Degree)

Program Learning Outcomes

Program Learning Outcomes

- Demonstrate applied technical proficiency in diagnosing, servicing, and overhauling diesel engine systems using industry-standard tools and procedures.
- Apply foundational and advanced principles of hydraulic, pneumatic, electrical, and electronic systems to troubleshoot and repair heavy-duty equipment safely and effectively.
- Interpret and utilize technical documentation, mathematical reasoning, and precision measurement tools to support accurate diagnostics and informed repair decisions.
- Demonstrate competency in chassis, powertrain, and HVAC systems, including inspection, fault identification, and corrective maintenance.
- Communicate professionally and collaborate effectively in industrial environments, demonstrating workplace ethics, clear written communication, and human-relations skills essential to technical practice.

Welding Technology - AAS

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

The Associate of Applied Science (AAS) degree is offered through the Professional and Applied Technology Education Division and is intended for students who wish to finish their education in two years and then pursue employment in the welding industry. Alternatively, about 1/3 of the welding AAS program completers transfer into a 4-year welding engineering technology type of program. Students obtaining the AAS degree in welding must complete 46 credits of welding courses plus a minimum of 18 hours of general education for a total of 64 credit hours. General education requirements shall include specific courses in communication, math, human relations, machine shop, computer aided drafting, and an elective of the student's choosing.

Admission Requirements for this Program

1. New freshman admitted to USU-Eastern in good standing qualify for admission to this program

2. Transfer students from other institutions need a 2.5 GPA for admission to this major

3. Students transferring from other USU-Eastern majors need an overall GPA of 2.5 for admission to this major

4. No welding courses below a C- may be applied toward meeting graduation requirements

5. Visual acuity requirements: 20/40 vision and Jaeger J-2 at 12 inches, with or without corrective lenses. If corrective lenses are required to attain this level of visual acuity, the corrective lenses must be worn during class periods.

Program Requirements

Required Welding AAS Courses

Type
Completion Requirement

Required Welding Technical Certificate Courses (23 Credits):

Complete ALL of the following Courses:

- TEWT1000 - Introduction to Welding and Cutting - 2cr.
- TEWT1111 - Shielded Metal Arc Welding (SMAW) I - 2cr.
- TEWT1140 - Shielded Metal Arc Welding (SMAW) Theory - 2cr.
- TEWT1112 - Shielded Metal Arc Welding (SMAW) II - 2cr.
- TEWT1211 - Gas Tungsten Arc Welding (GTAW) I - 2cr.
- TEWT1240 - Gas Tungsten Arc Welding (GTAW) Theory - 2cr.
- TEWT1212 - Gas Tungsten Arc Welding (GTAW) II - 2cr.
- TEWT1311 - Gas Metal Arc Welding (GMAW) I - 2cr.
- TEWT1340 - Gas Metal Arc Welding (GMAW) and Flux-Cored Arc Welding (FCAW) Theory - 2cr.
- TEWT1411 - Flux Cored Arc Welding (FCAW) I - 2cr.
- WELD2400 - Print Reading for Welders - 3cr.

Welding Electives

Earn at least 20 credits from the following:

- WELD1110 - Advanced Shielded Metal Arc Welding (SMAW) - 5cr.
- WELD1130 - Advanced Gas Metal Arc Welding (GMAW) and Flux Cored Arc Welding (FCAW) - 5cr.
- WELD1140 - Related Welding Processes - 5cr.
- WELD1160 - Advanced Gas Tungsten Arc Welding (GTAW) - 5cr.
- WELD1170 - Advanced Pipe Welding - 7cr.
- TEWT1650 - Practical Fabrication and Layout - 5cr.

Additional Course Requirement

Earn at least 3 credits from the following:

- WELD2500 - Weld Inspection - 3cr.
- WELD2600 - Metallurgy - 3cr.

General Education

Complete ALL of the following Courses:

- ENGL1010 - Writing as Inquiry (CL1) - 3cr.
- MATH1020 - Trade Mathematics - 3cr.
  OR ELET1110 - Technical Mathematics - 3cr.

A higher QL math course may substitute ELET 1110/MATH 1020. See advisor for details.

Machining

Earn at least 3 credits from the following:

- MACH1010 - Machine Tool Technology I - 3cr.
  OR TEMT1600 - Introduction to Manual Machining - 3cr.

Drafting and Design

Earn at least 3 credits from the following:

- EDDT1040 - CAD Level I: Intro to CAD - 3cr.
  OR TEDR1010 - Advanced Technical Drafting - 3cr.
- EDDT1200 - 3D Modeling - 3cr.
  OR TEDR1200 - Parametric Solid Modeling - 3cr.
- EDDT2620 - 3-D Modeling Advanced - 3cr.
  OR TEDR2200 - Advanced Solid Modeling - 3cr.

Human Relations/Business

Earn at least 3 credits from the following:

- BUSN1010 - Business Principles (BSS) - 3cr.
  OR TEBP1650 - Management Principles - 2cr.
- BUSN1021 - Personal Finance - 3cr.
  OR TEBP1000 - Basic Financial Principles - 3cr.
- BUSN2200 - Professional Communications - 3cr.
  AND TEBP1550 - Business Communications - 3cr.
- BUSN2320 - Small Business Management - CTE - 3cr.
  OR TEBP2000 - Introduction to Entrepreneurship - 3cr.
- CMST2110 - Interpersonal Communication (BHU) - 3cr.

Additional Elective

Earn at least 3 credits
Students may choose any General Education course, or satisfy this requirement with additional WELD or TEWT courses/credits.

Accounting - BA, BS

Program Overview

College
Jon M. Huntsman School of Business

Department
School of Accounting

Program Level
Undergraduate

About this Degree

Skilled accounting graduates are in high demand as they play the vital role of communicating financial information about a business to shareholders, managers, and other decision makers.

For this reason, the Utah State University School of Accountancy has developed a student-oriented teaching style in which accounting students will become experienced in financial management, business transaction tracking, financial reporting, audit, tax strategy, and information systems development.

- For more information about Accounting, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

First-Year and Transfer Students may be admitted to the Huntsman School of Business based on USU's Admission Requirements.

Current USU Students in good standing qualify for admission into the Huntsman School of Business and to a major within the Huntsman School.

Huntsman School Admission Details: https://huntsman.usu.edu/undergraduate/apply

Program Requirements

Total Credits Required To Earn This Credential

120

Simple Requisites

Program Requirements

- To be recommended for graduation, Accounting - BA, BS students must have an overall 2.0 GPA as well as a 2.5 GPA in all major requirements and in all ACCT-prefix courses.
- Elective credits needed will be determined on an individual basis (a student with continuing education, AP credits, and Language credits may not require additional elective credits)
- Completing a minor is recommended to fulfill elective credits
- An experiential learning experience is required

A 2.5 GPA for all ACCT prefixes is required for graduation.

Accounting - BA, BS Course Requirements

Type
Completion Requirement

Major Requirements (24 credits)

Fulfill ALL of the following requirements:

Required

Complete ALL of the following Courses:

- ACCT3110 - Intermediate Financial Accounting and Reporting I - 3cr.
- ACCT3130 - Business Taxation - 3cr.
- ACCT5010 - Intermediate Financial Accounting and Reporting II - 3cr.

AND

Electives

Complete at least 3 of the following courses:

- ACCT3140 - Auditing Principles and Techniques - 3cr.
- ACCT5020 - Intermediate Managerial Accounting - 3cr.
- ACCT5040 - Accounting Information Systems - 3cr.
- ACCT5030 - Individual Taxation - 3cr.
- Any ACCT 5000-6999 courses, except ACCT6300 ACCOUNTING INTERNSHIP

These courses are prerequisites for the Accounting - MAcc program. If not counted toward the undergraduate degree, up to 2 of these courses could be taken as electives in the MAcc program.

AND

Required

Complete the following

- **Complete 3 credits from the following list:**
  - Any additional ACCT 3000-5999 course (*excluding* ACCT4250 ACCOUNTING INTERNSHIP)

Any FIN 3000-5999 course not already completed as part of the Business Acumen (*excluding FIN4250)*

- **Complete 3 credits from the following list:*****
  - Any additional ACCT 3000-5999 course
  - Any FIN 3000-5999 courses not already completed as part of the Business Acumen
  - Any 3000-5999 course in DATA, ECON, MGT or MSLE not already completed as part of the Business Acumen

****A maximum of 3 credits may be taken from internship courses*

***Note**: For students double majoring in Accounting and Finance, any FIN classes taken to satisfy the ACCT major requirements will also count toward the FIN major requirements. Likewise, any ACCT classes taken to satisfy the FIN major requirements will also count toward the ACCT major requirements.*

AND

Experiential Learning Experience

Fulfill ANY of the following requirements:

Option 1

Complete one of the following courses as approved by the Experiential Learning Advisor

Complete at least 1 of the following courses:

- ACCT4250 - Accounting Internship - 3cr.
- ACCT5850 - Strategic Accounting Consulting - 3cr.
- BUS2000 - Foundations for Global Learning Experiences - 0.5cr.

OR

Option 2

Complete the following:
Other non-credit activity approved by the Experiential Learning Advisor

Business Acumen (46-47 credits)

All acumen courses must have a minimum grade of C unless otherwise stated.

Complete ALL of the following Courses:

- ACCT2010 - Financial Accounting Principles - 3cr.
- ACCT2020 - Managerial Accounting Principles - 3cr.
- BUS3200 - Professional Communication with AI (CI) - 3cr.
- DATA1100 - Excel for Business Analysis - 1cr.
- DATA2100 - Data and Information in Business - 3cr.
- DATA3100 - Making Decisions with Data - 3cr.
- DATA3300 - Introduction to Modern Data Analytics (QI) - 3cr.
- ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- ECON2020 - Introduction to Macroeconomics (BAI) - 3cr.
- ECON3050 - Foundations of Business: Capitalism, Markets, and Innovation - 3cr.
- FIN3200 - Corporate Finance (QI) - 3cr.
- FIN3300 - Investments - 3cr.
- MGT3350 - Legal and Ethical Environment of Business - 3cr.
- MGT3700 - Operations Management - 3cr.
- MSLE3500 - Fundamentals of Marketing - 3cr.
- MSLE3800 - Leadership - 2cr.
- MSLE3890 - Systems Strategy and Problem Solving - 2cr.

Accounting majors require a B grade or higher in ACCT2010 FINANCIAL ACCT PRINCIPLES

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Students who have not attended any school beyond high school and have a declared major in the Huntsman School of Business are expected to enroll in BUS 1000 during their first year at USU. The course is intended to acculturate students to college life, and is therefore not relevant for internal or external transfer students. Thus, transfer students are *not* expected to enroll in BUS 1000. BUS 1000 is an in-person course on the Logan campus for now, so those at statewide campuses or online are not able to enroll, and thus *not* expected to enroll.

Students should apply for graduation at http://www.usu.edu/registrar/htm/graduation/apply-online fall semester of their final year

Executive Master of Accounting - EMAcc (NOT CURRENTLY OFFERED)

Program Overview

College	Department	Program Level
Jon M. Huntsman School of Business	School of Accounting	Graduate

About this Degree

The Executive Master of Accounting (EMAcc) at the Huntsman School of Accountancy is a pioneering effort in which both the content and delivery are tailored to aspiring financial executives in need of a graduate degree in accounting. Similar to executive MBA programs, this EMAcc program will build upon participants' experience in the business world by providing course content tailored to this group of individuals. As such, this degree is designed for individuals with substantial work experience (5+ years) in the accounting or finance professions. Students matriculated in the Executive Master of Accounting degree must complete the full program of study outlined below.

Admission Requirements for this Program

Students admitted to the EMAcc program will have met the following requirements:

- Obtained a bachelor's degree (not topic specific) from an accredited university
- Have five or more years of post-graduate work experience
- Have taken the following courses, or have work experience in the following areas sufficient to justify waiver of the course requirement:
  - Intermediate Financial Accounting
  - Corporate Tax
  - Auditing

Accounting - MAcc

Program Overview

College	Department	Program Level
Jon M. Huntsman School of Business	School of Accounting	Graduate

About this Degree

The MAcc degree in the School of Accountancy at the Huntsman School of Business helps students accelerate their professional opportunities and personal development by exposing them to richer, real-world problem-solving, critical thinking, and oral and written communication applications, while developing a deeper technical understanding of graduate-level accounting concepts. Beginning July 1, 2026, the MAcc degree reduces the accounting experience required in Utah for CPA licensure (from two years to one year).

The MAcc program enjoys strong recruiting relationships with dozens of employers, including the Big Four, regional, and local accounting firms as well as companies and government agencies.

More information about the program is available at the link below.

https://huntsman.usu.edu/macc/

Admission Requirements for this Program

Degree Verification

A bachelor's degree from an accredited U.S. institution or an internationally recognized equivalent is required for admission to and completion of the graduate program. Applicants must hold a bachelor's degree in accounting. Those with a degree in another field must complete all prerequisite coursework as determined by the MAcc Director.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
30	30

Simple Requisites

Program Requirements

MAcc requirements for students who have completed all of the preparatory work for graduate study.

Students matriculated in the Master of Accounting degree must complete a Plan C approved program of study consisting of at least 30 credits. This program must include completion of the MAcc Core Requirements and one of the Focus Areas. Details for each requirement type are provided below.

- **Overall Graduate GPA at least 3.0 and no grades of C- or lower:** Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.
- **Course Number Acceptability:** The Program of Study for a master's degree must include at least 18 semester credits at the level of 6000 or above. A maximum of 12 semester credits at the 5000 level are allowed. Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000.

- **Matriculation Start Semester:** A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.
- **Coursework Validity:** Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.
- **Program of Study:** Approval of the Program of Study is required by the School of Graduate Studies.
- **Split Form:** If graduate level courses were taken concurrently with undergraduate courses, a split form must be submitted to 'split' out courses to the correct degree. A split form cannot be processed after the bachelor's degree has been completed and posted on the transcript.

MAcc Core Requirements (15 credits)

Type
Completion Requirement

MAcc Core Requirements

Complete ALL of the following Courses:

- ACCT5104 - Accounting Analytics - 3cr.
  OR ACCT6104 - Accounting Analytics - 3cr.
- ACCT5105 - Taxes and Business Strategy - 3cr.
  OR ACCT6105 - Taxes and Business Strategy - 3cr.

  OR ACCT6620 - Financial Statement Analysis and Valuation - 3cr.

Focus Area

Type
Completion Requirement

Master of Accounting Focus Areas:

In addition to meeting the MAcc Core Requirements, students must complete requirements for **one** of the following focus areas, which includes two elective courses.

Fulfill ANY of the following requirements:

Professional Accountancy

Complete ALL of the following Courses:

- ACCT5250 - Accounting Research - 3cr.
  OR ACCT6250 - Accounting Research - 3cr.
- ACCT5310 - Advanced Managerial Accounting Topics - 3cr.
  OR ACCT6310 - Advanced Managerial Accounting Topics - 3cr.
- ACCT5540 - Fraud Examination and Forensic Accounting - 3cr.
  OR ACCT6540 - Fraud Examination and Forensic Accounting - 3cr.
- ***Two additional approved elective courses (6 credits)***

OR

Taxation

Complete ALL of the following Courses:

- ACCT5420 - Corporate Taxation - 3cr.
  OR ACCT6420 - Corporate Taxation - 3cr.
- ACCT5440 - Partnership Taxation - 3cr.
  OR ACCT6440 - Partnership Taxation - 3cr.
- ACCT5460 - Advanced Tax Topics - 3cr.
  OR ACCT6460 - Advanced Tax Topics - 3cr.
- ***Two additional approved elective courses (6 credits)***

OR

Fin/Tech

Complete 9 credit hours of DATA-designated classes at the 5000 or 6000 level. Recommended courses for this focus area are:

Earn at least 9 credits from the following:

- DATA5570 - Building Software With Artificial Intelligence - 3cr.
- DATA5600 - Introduction to Regression and Machine Learning for Analytics - 3cr.
- DATA6330 - Data Pipeline Engineering - 3cr.
- DATA6360 - Data Warehousing - 3cr.
- DATA6500 - Python Programming for Analytics - 3cr.
- DATA6610 - Advanced Machine Learning for Analytics - 3cr.
- DATA6690 - Computational Methods for FinTech - 3cr.
- ***Two additional approved accounting elective courses (6 credits)***

OR

Personal Financial Planning

Complete ALL of the following Courses:

- FIN5060 - Introduction to Personal Financial Planning - 3cr.
  OR FIN6060 - Introduction to Personal Financial Planning - 3cr.
- FIN5070 - Retirement Planning - 3cr.
  OR FIN6070 - Retirement Planning - 3cr.
- FIN5080 - Estate Planning - 3cr.
  OR FIN6080 - Estate Planning - 3cr.
- ***Two additional approved elective courses (6 credits)***
- ***In addition to the required PFP specialization courses, students must also complete, or have previously completed, FIN 4460 and FIN 6090 or their equivalents, to qualify to sit for the Certified Financial Planner (CFP) examination.***

Approved Electives

Type
Completion Requirement

Electives

Complete ANY of the following Courses:

- ACCT5850 - Strategic Accounting Consulting - 3cr.
  OR ACCT6850 - Strategic Accounting Consulting - 3cr.
- ACCT5300 - Advanced Accounting Internship - 3cr.
  OR ACCT6300 - Advanced Accounting Internship - 3cr.

Or courses chosen from the other focus area. Students may also select elective courses from other departments within the Huntsman School of Business based on student experience, interests, and career path choices, subject to advisor approval. Common elective courses come from DATA or FIN-prefix courses.

Additional Comments:

MAcc Application by Non-Accounting/Non-Business Degree Holders

Prerequisites for the Master of Accounting degree include courses in the Huntsman School of Business Acumen Requirements and the Undergraduate Accounting Major Requirements (21 credits). Before applying, it is recommended that applicants consult with the School of Accountancy MAcc director/graduate advisor.

Accounting Practices - Technical Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

Federal Gainful Employment Information

What if a student could master the principles of accounting and financial management so that they could build a successful career in auditing or taxation?

For example, students gain hands-on experience with industry-standard accounting software, learn to analyze financial data, and understand the regulations that shape business decisions.

This program equips students with the critical thinking and problem-solving skills needed to navigate the financial landscape and drive business success.

Criminal Justice - AS

Program Overview

College
College of Arts & Sciences

Department
School of Social Sciences

Program Level
Undergraduate

About this Degree

The degree requires students have a substantial understanding of the criminal justice system in general. It reflects the realities and concerns of society and draws from a wide variety of academic disciplines such as political science, psychology, history and sociology.

- For more information about the Criminal Justice Associate Degree see the USU Criminal Justice page.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing.
- Transfer students from other institutions or other programs at USU must have a 2.50 GPA.

Program Requirements

Total Credits Required In Program Coursework
60

Total Credits Required To Earn This Credential
60

Simple Requisites

Program Requirements

Criminal Justice courses over 10 years old do not count toward the major requirement. 50% of classes need to be taken at USU.

Students must have a GPA of 2.5 or higher in Criminal Justice courses and an overall GPA of 2.0 or higher and overall USU GPA of 2.0 in order to graduate. Classes taken P/F and earning a "P" grade cannot be counted toward the major without special permission. You must earn a grade of "C" or better in CJ 1010, and a "C-" or better in all other courses to be counted toward the degree

Criminal Justice - AS

Type
Completion Requirement

Required Criminal Justice Courses (12 credits)

Complete ALL of the following Courses:

- CJ1010 - Introduction to Criminal Justice (BSS) - 3cr.
- CJ1300 - Introduction to Corrections - 3cr.
- CJ1330 - Criminal Law - 3cr.
- CJ1390 - Introduction to Policing - 3cr.

Criminal Justice Electives (9 credits)

Complete at least 3 of the following courses:

- CJ1060 - POST Certification: Special Function Officer (SFO) - 8cr.
- CJ1070 - POST Certification: Basic Corrections Officer (BCO) - 5cr.
- CJ1080 - POST Certification: Law Enforcement Officer (LEO) - 12cr.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Additive Manufacturing - Technical Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

What if students could turn their ideas into real, high-tech products using the power of 3D printing?

So that they can create everything from custom medical implants to next-gen aerospace parts—faster, lighter, and more efficiently than ever before.

Students can picture themselves designing a cutting-edge prototype, printing it, testing it, and seeing it come to life—all with the latest technology at their fingertips.

This program gives students hands-on experience, industry connections, and the skills to launch an exciting career in advanced manufacturing.

Animal, Dairy and Veterinary Sciences - MS

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Animal, Dairy & Veterinary Sciences	Graduate

About this Degree

The ADVS department conducts a broad range of basic and applied research in the areas of animal reproduction, animal growth and nutrition, livestock and dairy management, animal health and disease, virology, toxicology, animal biotechnology, and molecular genetics. Department facilities include over 30 research laboratories on campus and at local and regional animal research facilities. There are research herds and flocks of beef and dairy cattle, swine, and sheep housed close to the university. Research in the department is funded by a multi-million dollar budget derived from support by the Utah Agricultural Experiment Station and by substantial outside contracts and grants. Cooperation with other departments and research centers of the university, and with federal collaborators, enhances the ADVS research and graduate programs. Significant in this regard are the university Center for Integrated BioSystems, the Utah State Animal Disease Diagnostic Laboratories, the Laboratory Animal Research Center, the Institute for Antiviral Research, and the on-campus USDA Poisonous Plant Laboratory.

Graduate Programs Director: Dr. Lee Rickords
Location: Agricultural Science 248B
Phone: (435) 797-2195
E-mail: lee.rickords@usu.edu

Financial Assistance

Both departmental and research grant support are available to matriculated graduate students on a competitive basis.

The department funds graduate assistantships, which are available on a competitive basis to matriculated graduate students. Completion of the Graduate Record Examination (GRE) is required to be considered for a departmental assistantship. Applications for graduate assistantships for the following academic year must be submitted by March 15. Students interested in departmental assistantships may contact the graduate programs director.

Acceptance to graduate study in the ADVS department does not constitute a guarantee of financial assistance.

Admission Requirements for this Program

Prior to applying, the potential applicant must have a qualified ADVS faculty member agree to accept them into their laboratory and be their major (supervisory) professor. Contact Dr. Lee Rickords with questions.

Applications are processed as received and are reviewed on an ongoing basis. It is highly recommended that applicants submit all materials early in the year if they will also be applying for a departmental assistantship, the separate application for which is due March 15. Accepted students may begin their program in fall, spring, or summer semester.

General Requirements

All prospective graduate students must apply through the School of Graduate Studies. Refer to the School of Graduate Studies website for admission requirements. Please note that all applicants must meet the following general admission requirements:

- A bachelor's degree from an accredited college
- A 3.0 GPA as calculated by the School of Graduate Studies. An official transcript must be sent directly to the School of Graduate Studies from each college or university previously attended (except USU).
- Student recommendation request forms (included in application materials) should be used to request three people to submit letters of recommendation directly to the graduate school. At least one letter of recommendation should be from a faculty member from whom the applicant has taken course work.
- International Students: Please visit the School of Graduate Studies website for requirements.

Department Requirements

Applicants must secure an ADVS faculty member to be their major professor before being accepted into a graduate program. The department also strongly recommends the following:

- Applicants for a graduate program in ADVS should have completed a BS undergraduate program with courses similar to the science core of the USU Animal and Dairy Science BS degree. This background includes the following courses and their prerequisites:
  - BIOL1610 BIOLOGY I and BIOL1620 BIOLOGY II (BLS) or their equivalents
  - CHEM1210 PRIN OF CHEMISTRY I and CHEM1220 PRIN OF CHEMISTRY II (BPS) or their equivalents
  - MATH1050 COLLEGE ALGEBRA (QL) and STAT2000 STATISTICAL METHODS (QI) or their equivalents
- Applicants with deficiencies in these areas may be admitted to the graduate program subject to the completion of remedial course work specified by the department. Other preparatory courses may be specified by the student's supervisory committee.

30	30

Simple Requisites

Program Requirements

Specializations

All MS specializations are offered as Plan A programs. Animal Management may be taken as a Plan A or Plan B program.

- Animal Health and Disease
- Animal Management
- Animal Molecular Genetics
- Animal Nutrition
- Reproduction and Development

General Requirements for Plan A and Plan B

- A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.
- Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.
- The Program of Study for a master's degree must include at least 18 semester credits at the level of 6000 or above.
- Coursework below the 5000 level may not be used toward a graduate degree. Undergraduate prerequisites for graduate programs may not be included on a Program of Study.

- Courses numbered 5000-5990 are advanced, upper-division courses and a maximum of 12 credits may be used on an approved program of study.
- Credits in the following areas are not acceptable in a degree program: foreign languages (unless included on an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000.
- Audited courses may not be used for a degree program or toward status as a full-time student.
- A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.
- Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated by the Vice Provost of Graduate Studies.
- A student may transfer up to 12 graduate credits earned at another accredited institution, including credits with earned P grades, if approved by the department and the School of Graduate Studies. Credits cannot be from a previous degree.
- All graduate students are expected to have a statistics course included in their program of study.

Further MS Plan A Requirements

- The Plan A option requires the preparation and defense of a thesis and is best suited for students desiring research experience.
- A minimum of 30 credits applied toward a program of study approved by the student's supervisory committee, including:
    - 15 credits minimum of graduate-level coursework (this does not include thesis credits). Under exceptional circumstances, a student may petition for a waiver of the minimum 15-credit requirement of graduate-level coursework
    - 6-15 credits of ADVS6970 RESEARCH AND THESIS
    - 1 credit of ADVS6800 GRAD STUDENT SEMINAR
- ADVS6900 SPECIAL PROBLEMS credits shall not exceed 3 credits unless approved by the supervisory committee.
- Approved thesis proposal
- Approval of academic forms required by the School of Graduate Studies:
    - Supervisory committee approval form
    - Program of Study form
    - Thesis Proposal/Project Approval form
    - Appointment for Examination
    - Record of Examination
- Successful defense of a thesis based on original research
- Submission of thesis to the School of Graduate Studies and library for review and approval
- Annual ADVS Student Research Symposium participation
- Annual meetings with the student and his/her supervisory committee
- Submitted Annual Progress Report
- Annual lab safety training
- RCR training (two parts):
    - CITI online training
    - 8-hour in-person workshop
- Any additional trainings as specified by the student's major advisor

Further MS Plan B Requirements

- The Plan B option requires the preparation and defense of a paper and is best suited for animal science professionals not pursuing a research career path.
- A minimum of 30 credits applied toward a program of study approved by the student's supervisory committee, including:
    - 15 credits minimum of graduate-level coursework (this does not include thesis credits)
    - 2-3 credits of ADVS6970 RESEARCH AND THESIS
    - 1 credit of ADVS6800 GRAD STUDENT SEMINAR
- ADVS6900 SPECIAL PROBLEMS credits shall not exceed 3 credits unless approved by the supervisory committee.
- Approval of academic forms required by the School of Graduate Studies:
    - Supervisory committee approval form
    - Program of Study form
    - Thesis Proposal/Project Approval form (required by the ADVS department)
    - Appointment for Examination
    - Record of Examination
- Successful defense of a Plan B paper
- Plan B papers must be submitted directly to the Merrill-Cazier Library and uploaded to DigitalCommons
- Annual ADVS Student Research Symposium participation
- Annual meetings with the student and his/her supervisory committee
- Submitted Annual Progress Report
- Annual lab safety training
- RCR training (two parts):
    - CITI online training
    - 8-hour in-person workshop
- Any additional trainings as specified by the student's major advisor

Animal, Dairy and Veterinary Sciences - PhD

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Animal, Dairy & Veterinary Sciences	Graduate

About this Degree
The ADVS department conducts a broad range of basic and applied research in the areas of animal reproduction, animal growth and nutrition, livestock and dairy management, animal health and disease, virology, toxicology, animal biotechnology, and molecular genetics. Department facilities include over 30 research laboratories on campus and at local and regional animal research facilities. There are research herds and flocks of beef and dairy cattle, swine, and sheep housed close to the university. Research in the department is funded by a multi-million dollar budget derived from support by the Utah Agricultural Experiment Station and by substantial outside contracts and grants. Cooperation with other departments and research centers of the university, and with federal collaborators, enhances the ADVS research and graduate programs. Significant in this regard are the university Center for Integrated BioSystems, the Utah State Animal Disease Diagnostic Laboratories, the Laboratory Animal Research Center, the Institute for Antiviral Research, and the on-campus USDA Poisonous Plant Laboratory.

Graduate Programs Director: Dr. Lee Rickords
Location: Agricultural Science 248B
Phone: (435) 797-2195
E-mail: lee.rickords@usu.edu

Financial Assistance
Both departmental and research grant support are available to matriculated graduate students on a competitive basis.

The department funds graduate assistantships, which are available on a competitive basis to matriculated graduate students. Completion of the Graduate Record Examination (GRE) is required to be considered for a departmental assistantship. Applications for graduate assistantships for the following academic year must be submitted by March 15th. Students interested in departmental assistantships may contact the graduate programs director.

Acceptance to graduate study in the ADVS department does not constitute a guarantee of financial assistance.

Admission Requirements for this Program
Prior to applying, the potential applicant must have a qualified ADVS faculty member agree to accept them into their laboratory and be their major (supervisory) professor. Contact Dr. Lee Rickords with questions.

Applications are processed as received and are reviewed on an ongoing basis. It is highly recommended that applicants submit all materials early in the year if they will also be applying for a departmental assistantship, the separate application for which is due March 15. Accepted students may begin their program in fall, spring, or summer semester.

- All graduate students are expected to have a statistics course included in their program of study.

Further Requirements for a PhD with a Bachelor's Degree

- A minimum of 70 credits applied toward a program of study approved by the student's supervisory committee, including:
  - 30 credits minimum of graduate-level coursework (this does not include dissertation credits). Under exceptional circumstances, a student may petition for a waiver of the minimum 30-credit requirement of graduate-level coursework
  - 18 credits minimum of ADVS7970 DISSERTATION RESEARCH
  - 3 credits of ADVS6800 GRAD STUDENT SEMINAR
- ADVS6900 SPECIAL PROBLEMS shall not exceed 6 credits unless approved by the supervisory committee.
- Approval of academic forms required by the School of Graduate Studies:
  - Supervisory committee approval form
  - Program of Study form
  - Application for Candidacy
  - Appointment for Examination
  - Record of Examination
- Successful completion of doctorate candidacy exams
- Successful defense of a dissertation based on original research
- Submission of dissertation to the School of Graduate Studies and library for review and approval
- Annual ADVS Student Research Symposium participation
- Annual meetings with the student and his/her supervisory committee
- Submitted Annual Progress Report

- Annual lab safety training
- RCR training (two parts):
    - CITI online training
    - 8-hour in-person workshop
- Any additional trainings as specified by the student's major advisor

Further Requirements for a PhD with a Master's or DVM Degree

- A minimum of 42 credits applied toward a program of study approved by the student's supervisory committee, including:
    - 15 credits minimum of graduate-level coursework (this does not include dissertation credits). Under exceptional circumstances, a student may petition for a waiver of the minimum 15-credit requirement of graduate-level coursework.
    - 12 credits minimum of ADVS7970 DISSERTATION RESEARCH
    - 2 credits of ADVS6800 GRAD STUDENT SEMINAR
- ADVS6900 SPECIAL PROBLEMS shall not exceed 6 credits unless approved by the supervisory committee.

Aerospace Engineering - MS

Program Overview

College
College of Engineering

Department
Mechanical & Aerospace Engineering

Program Level
Graduate

About this Degree

The Department of Mechanical and Aerospace Engineering provides each graduate with a foundation of knowledge and experience upon which to build successful careers in mechanical engineering, aerospace engineering, composite materials and structures, or space systems engineering.

Aerospace engineers develop new technologies in the defense, aviation, astronautics, and space industries including modern aircraft, satellites, rockets, and space vehicles. Courses and research focus on aerodynamics, vehicle dynamics, controls, propulsion, guidance and navigation, optimization, and structures.

Our graduate programs emphasize research with faculty by focusing on high levels of student involvement providing enhanced preparation for engineering practice, research and education.

Admission Requirements for this Program

- Official transcript indicating a bachelor's degree in an accredited U.S. college or university or a similarly recognized international university in mechanical or aerospace engineering, or closely related engineering discipline
- GPA of 3.3
- GRE Scores are used by some faculty in choosing students and in funding decisions and are therefore strongly encouraged
- 3 letters of recommendation
- Statement of purpose
- International students - proof of English proficiency (TOEFL or (IELTS))

Program Requirements

Total Credits Required In Program Coursework
30

Total Credits Required To Earn This Credential
30

Simple Requisites

Program Requirements

- Must maintain a minimum 3.0 GPA
- A cumulative GPA of 3.0 is required for graduation
- Grades of C- or lower are not permitted on the program of study
- All graduate students must submit School of Graduate Studies forms and requirements for their chosen path
- A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review
- Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated
- Credits in the following areas are not acceptable: foreign languages, continuing graduate advisement, individual home study, military science, thesis research, and courses numbered below 6000.
- No more than 12 credits of approved 5000-level courses.

Three program plans are available for the Aerospace Engineering MS degree.

The **Plan A Thesis** requires 30 credits (minimum):

- 6 credits of Aerospace Engineering core courses
- 15 credits of approved MAE technical electives
- 3 credits of an approved 5000-level (or above) math course
- Only 12 credits of 5000-level courses allowed
- Minimum of 6 credits of thesis research
    - A maximum of 15 thesis research credits applied toward a Program of Study
- A thesis proposal and formal thesis defense are required. The thesis must meet School of Graduate Studies and MAE Department requirements
    - Successful defense and submission of the thesis to the library
- In-person attendance at 6 MAE Research Seminar Series presentations before graduating
- Approval of academic forms required for master's students by the School of Graduate Studies
    - Supervisory Committee
    - Program of Study
    - Thesis Proposal Approval
    - Appointment for Examination
    - Record of Examination
    - SGS and library review and approval

The **Plan B Report** requires 30 credits (minimum):

- 6 credits of Aerospace Engineering core courses
- 18 credits of approved MAE technical electives
- 3 credits of an approved 5000-level (or above) math course
- Only 12 credits of approved 5000-level courses are allowed
- 3 credits of project research
- A thesis project proposal and formal report defense are required. The report must meet School of Graduate Studies and MAE Department requirements
    - Successful defense and submission of the project to the library
- In-person attendance at 6 MAE Research Seminar Series presentations before graduating
- Approval of academic forms required for master's students by the School of Graduate Studies
    - Supervisory Committee
    - Program of Study
    - Thesis Project Approval

- Appointment for Examination
- Record of Examination
- Library review and approval

The **Plan C Coursework Only** requires 33 credits (minimum):

- 6 credits of Aerospace Engineering core courses
- 24 credits of approved MAE technical electives
- 3 credits of an approved 5000-level (or above) math course
- Only 12 credits of approved 5000-level courses are allowed
- Approval of academic forms required for master's students by the School of Graduate Studies
  - Program of Study

Section 1

Type
Completion Requirement

Required Core Courses:

Complete ALL of the following Courses:

- MAE5500 - Aerodynamics - 3cr.
- MAE5560 - Dynamics of Space Flight - 3cr.

Section 2

Type
Completion Requirement

Approved Courses:

Choose 15 credits (MS Plan A),18 credits (MS Plan B), or 24 credits (MS Plan C)

Complete ANY of the following Courses:

- ECE5230 - Spacecraft Systems Engineering - 3cr.
- ECE6240 - Space Environment and Engineering - 3cr.
- MAE5020 - Finite Element Methods in Solid Mechanics I - 3cr.
- MAE5040 - Experimental Solid Mechanics - 3cr.
- MAE5050 - Material Science of Composites - 3cr.
- MAE5060 - Mechanics of Composite Materials I - 3cr.
- MAE5300 - Vibrations - 3cr.
- MAE5310 - Control Systems - 4cr.
- MAE5320 - Mechatronics - 4cr.
- MAE5330 - Small Unmanned Aircraft Systems - 3cr.
- MAE5360 - Advanced Dynamics - 3cr.
- MAE5370 - Optimization for Engineers - 3cr.
- MAE5420 - Compressible Fluid Flow - 3cr.
- MAE5440 - Computational Fluid Dynamics - 3cr.
- MAE5510 - Dynamics of Atmospheric Flight - 3cr.
- MAE5540 - Propulsion Systems - 3cr.
- MAE5550 - Introduction to Aircraft Structures - 3cr.
- MAE5930 - Special Problems - 1cr.
- MAE6010 - Finite Element Methods in Solid Mechanics II - 3cr.
- MAE6040 - Continuum Mechanics and Elasticity - 3cr.
- MAE6050 - Manufacturing of Composite Materials and Structures - 3cr.
- MAE6055 - Testing of Composite Materials - 3cr.
- MAE6060 - Micro-Mechanics of Deformation - 3cr.
- MAE6061 - Micro-Mechanisms of Failure - 3cr.
- MAE6070 - Mechanics of Composite Materials II - 3cr.
- MAE6180 - Dynamics and Vibrations - 3cr.
- MAE6320 - Linear Multivariable Control - 3cr.
- MAE6330 - Robust Control - 3cr.
- MAE6340 - Spacecraft Attitude Control Theory - 3cr.
- MAE6440 - Advanced Computational Fluid Dynamics - 3cr.
- MAE6450 - Thermodynamics - 3cr.
- MAE6490 - Turbulence - 3cr.
- MAE6500 - Potential Flow - 3cr.
- MAE6510 - Aircraft Dynamics and Flight Simulation - 3cr.
- MAE6530 - Propulsion Systems - 3cr.
- MAE6540 - Cislunar Astrodynamics and Distributed Space Systems - 3cr.
- MAE6560 - Spacecraft Navigation - 3cr.
- MAE6570 - Optimal Spacecraft Guidance - 3cr.
- MAE6670 - Fracture Mechanics - 3cr.
- MAE6930 - Special Problems - 1cr.
- MAE7330 - Nonlinear and Adaptive Control - 3cr.
- MAE7360 - Optimal Control - 3cr.
- MAE7540 - Astrodynamic Perturbations and Propagation - 3cr.
- MAE7570 - Monte Carlo and Linear Covariance Techniques for Closed-Loop GN&C System Analysis - 3cr.
- MAE7560 - Optimal Estimation for Aerospace Systems - 3cr. **OR** ECE7560 - Optimal Estimation for Aerospace Systems - 3cr.

Section 3

Type
Completion Requirement

Approved Advanced Math Courses

Earn at least 3 credits from the following:

- MATH5270 - Complex Variables - 3cr.
- MATH5410 - Methods of Applied Mathematics - 3cr.
- MATH5420 - Partial Differential Equations - 3cr.
- MATH5460 - Nonlinear Dynamics - 3cr.
- MAE6200 - Mathematical Methods in Aerospace Engineering - 3cr.
- STAT5200 - Analysis of Designed Experiments - 3cr.

Total Credits Required To Earn This Credential
42-72

Simple Requisites

Program Requirements

- Must maintain a minimum 3.0 GPA
- A cumulative GPA of 3.0 is required for graduation
- Grades of C- or lower are not permitted on the program of study
- All graduate students must submit School of Graduate Studies forms and requirements for their chosen plan
- A doctorate must be completed within eight years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review
- Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated
- Three PhD qualifying exams must be passed
- A proposal defense and a formal final defense are required for the dissertation. The dissertation must meet School of Graduate Studies and MAE Department requirements
    - Successful defense and submission of the dissertation to the library
- A paper related to the dissertation, with the student as the first author, must be submitted for publication in a refereed journal prior to scheduling the final defense
- Students may choose to earn a Plan C Aerospace Engineering or Mechanical Engineering MS degree while completing their PhD. This option increases the PhD minimum requirement to 81 credits
- Credits in the following areas are not acceptable: foreign languages, continuing graduate advisement, individual home study, military science, and courses numbered below 5000
- In-person attendance at 12 MAE Research Seminar Series presentations before graduating
- Approval of academic forms required for doctoral students by the School of Graduate Studies
    - Supervisory Committee
    - Program of Study
    - Application for Candidacy
    - Appointment for Examination
    - Record of Examination
    - SGS and library review and approval

Two program plans are available for the Aerospace Engineering PhD degree.

The **PhD Degree beyond a Bachelor's** requires 72 credits (minimum):

- 6 credits of Aerospace Engineering core courses
- 24 credits of approved MAE technical electives
- Only 12 credits of 5000-level courses allowed
- 6 credits of approved 5000-level (or above) math courses
- 36 credits of dissertation research

The **PhD Degree beyond a Master's** requires 42 credits (minimum):

- 6 credits of Aerospace Engineering core courses
- 3 credits of an approved 6000-level (or above) MAE technical elective
- 3 credits of an approved 5000-level (or above) math course
- 30 credits of dissertation research

Required Core Courses

Type
Completion Requirement

Required core courses:

Complete ALL of the following Courses:

- MAE5500 - Aerodynamics - 3cr.
- MAE5560 - Dynamics of Space Flight - 3cr.

Approved Courses

Type
Completion Requirement

Approved Courses:

Choose 24 credits (**PhD beyond a Bachelor's**)

Earn at least 24 credits from the following:

- ECE5230 - Spacecraft Systems Engineering - 3cr.
- ECE6240 - Space Environment and Engineering - 3cr.
- MAE5020 - Finite Element Methods in Solid Mechanics I - 3cr.
- MAE5040 - Experimental Solid Mechanics - 3cr.
- MAE5050 - Material Science of Composites - 3cr.

Applied Environmental Geoscience - MS

Program Overview

College
College of Agriculture & Natural Resources

Department
Geosciences

Program Level
Graduate

About this Degree

Program Contacts:

Tammy Rittenour, PhD

Professor, Graduate Director

Tammy.rittenour@usu.edu

Kelly Bradbury, PhD, PEG

Professional Practice Associate Professor, Graduate Program Coordinator

Kelly.bradbury@usu.edu

The department offers advanced study leading to the MS-B degree in Applied Environmental Geoscience. This terminal degree program requires a combination of advanced courses selected from Geology offerings, as well as additional courses from other units on campus, such as Civil and Environmental Engineering; Plants, Soils, and Climate; Biology; Chemistry and Biochemistry; Mathematics and Statistics; and other departments in the Quinney College of Agriculture and Natural Resources.

Admission Requirements for this Program

Only the Plan B non-thesis option is allowed for the MS degree in Applied Environmental Geoscience.

The Plan B option requires the production of a report. At least 2 credits of thesis research are required, but no more than 3 credits of thesis credit can be included on the Program of Study. Exceptions to this policy may be based on recommendations by the Graduate Director and GPC to the Department Head.

The Plan B report is usually a review of literature, with conclusions drawn after conceptualizing an area of inquiry, planning a systematic search, and analyzing and critiquing the acquired information. The summary and conclusions developed should enhance knowledge in the discipline. Plan B reports should follow the same format specifications as theses and dissertations.

Plan B reports are defended but are not reviewed by the School of Graduate Studies and a Title Page is not required.

Plan B reports must be submitted to the Merrill-Cazier Library to be uploaded to Digital Commons.

Students may need to complete specific undergraduate coursework to prepare them for their graduate program. Seven preparatory core undergraduate courses are *recommended* by the Department of Geosciences: Physical Geology, Minerals and Rocks (Earth Materials, Mineralogy), Earth through Time (Historical Geology), Sedimentation and Stratigraphy, Geomorphology, Structural Geology, and Field Methods or experience. Graduate students are *generally expected* to have taken a minimum of four of the seven core courses, including a field course; however, this depends on each student's background and planned research topic.

Decisions about any exceptions to these potential prerequisites in a student's graduate program are made by a student's Advisory Committee in their first meeting, and in consultation with the Graduate Director.

Students are expected to be admitted to the Graduate program as matriculated students before taking coursework leading to the degree.

Admission requirements can be found on the USU School of Graduate Studies website (gradschool.usu.edu/admissions/policies) and the Department of Geosciences 'Apply to our Program' page: https://qanr.usu.edu/geo/graduate-program/future-graduates

Additional information about the MS-AEG Geoscience graduate program may be obtained by contacting the Department of Geosciences or by visiting the program website at https://qanr.usu.edu/geo/graduate-program/degree-and-information.

Program Requirements

Total Credits Required To Earn This Credential
32

Simple Requisites

Program Requirements

- **Degree Verification:** A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program. An official transcript must be sent directly to the School of Graduate Studies.
- **Overall Graduate GPA at least 3.0 and no grades of C- or lower:** Graduate students are required to maintain at least a 3.0 GPA for Degree Plan courses. Grades of C- or lower will not be accepted for a graduate degree.
- **Course Number Acceptability:** The program of study for an MS-AEG Degree Plan cannot include more than 12 semester credits of courses at the 5000 level. Credits in courses numbered below 5000-level are not accepted for this Degree Plan.
- **Matriculation Start Semester:** A MS-AEG degree must be completed within six years of entering the degree program. Additional time may be requested by the student's advisor and submitted to the Vice Provost of Graduate Studies for review.
- **Coursework Validity:** Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.
- **Master's of Applied Environmental Science form approvals:**
  - Supervisory Committee submitted by the end of the second semester
  - Program of Study submitted by the end of the second semester
  - Thesis/Project Approval
  - Appointment for Examination (submitted 10 days before date of defense)
  - Record of Examination
  - Plan B Report/Creative Project Submission
  - Graduation application

Students in the MS-AEG Geosciences Degree Plan program are required to take 32 credits beyond a BS degree.

Advanced Fashion Studies - Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The Advanced Fashion Studies Certificate will further students knowldege the apparel and fashion industry through textile science, apparel design, patternmaking, sustainability, product development, and managment. Students will be able to learn design and development skills and processes related to soft goods apparel production. Courses include textile science, sustainable systems, relationships of fashion with a sociocultural context, fashion fundamentals, and business related to fashion marketing. This certificate enhances various career paths in fashion, design, costuming, anthropology, and business, strengthens resumes and empowers students through education and experience in fashion studies.

It is recommended that the Fashion Studies Certificate be completed before enrolling in the Advanced Fashion Studies Certificate.

Students must earn a C- or higher to receive the certificate.

Agribusiness - Minor

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agribusiness minor at Utah State University prepares students to understand and manage agricultural business operations.

Students will gain foundational knowledge in microeconomics, agricultural economics, and agribusiness, along with various electives to enhance their understanding of the industry.

Students will learn about microeconomics, agricultural economics, agribusiness, and various topics like small firm management, commodity futures, and options trading and analysis, agribusiness sales and marketing, and agricultural machinery systems management.

Agribusiness - Agricultural Finance Emphasis - BS

Program Overview

College
Agriculture & Applied Sciences

Department
Applied Economics

About this Degree

The Agribusiness major provides a foundation for employment in the agricultural sector and in businesses and institutions serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

The Agribusiness major with the Agricultural Finance emphasis is designed for students who are seeking employment in the financial sector of agriculture. Students who want to pursue a career in the banking industry, or in management, or with a large agribusiness corporation take additional coursework from the Huntsman School of Business where they can obtain a business minor and additional training in finance and management. Great opportunities abound for students with Bachelor of Science in Agribusiness with an Agricultural Finance emphasis from USU.

- For more information about Agribusiness, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Simple Requisites

Program Requirements

To graduate with a bachelor's degree in Agribusiness with an Agricultural Finance emphasis, a student must have a GPA of 2.5 or higher in all major and emphasis courses, as well as a grade of ***C* or better in each course required for the major**. Agribusiness majors with a dual major must satisfy the admission and graduation requirements of both majors. All required courses must be taken for a letter grade.

Several of the required courses listed for this major will meet general education and university studies requirements. For more detailed information about courses, the recommended sequence for taking them, and the selection of electives, see the APEC academic advisor in the College of Agriculture and Applied Sciences Student Services Center, Abby Macbeth, http://abby.macbeth@usu.edu, 435-797-0454.

Agribusiness Program Requirements (53-55 credits)

Type
Completion Requirement

Required Courses

Students must have a GPA of 2.5 or higher in all major and emphasis courses, as well as a grade of C or better in each major and emphasis course. All required courses must be taken for a letter grade.

Complete ALL of the following Courses:

- ACCT2010 - Financial Accounting Principles - 3cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC2500 - Commodity Futures and Options Trading and Analysis - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- APEC3012 - Introduction to Natural Resource Economics (DSS) - 3cr.
- APEC4310 - Agribusiness Finance - 3cr.
- DATA1100 - Excel for Business Analysis - 1cr.
- MATH1050 - College Algebra (QL) - 4cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
  OR BUSN1111 - Accounting Principles - 3cr.
- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
  OR STAT2000 - Statistical Methods (QI) - 4cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
  OR GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR LAEP5300 - GIS for Environmental Planning - 4cr.
- APEC5940 - U.S. Agricultural Policy Analysis - 3cr.

  OR BUS3200 - Professional Communication with AI (CI) - 3cr.
- APEC2900 - Agricultural and Natural Resource Law - 3cr.
  OR BUSN2050 - Business Law - 3cr.

CL2

Complete at least 1 course in the following course sets:

- Communications Literacy (CL2) Course

Agricultural Finance Emphasis Requirements (6 credits)

Complete ALL of the following Courses:

- APEC5015 - Applied Economics for Decision Making (QI) - 3cr.
  OR APEC5150 - Advanced Agricultural Credit Analysis - 3cr.
- FIN3200 - Corporate Finance (QI) - 3cr.

Agricultural Finance Emphasis Electives (9 credits)

Earn at least 9 credits from the following:

- FIN3400 - Corporate Finance (QI) - 3cr. (Inactive)
- FIN3500 - Real Estate Finance - 3cr.
- FIN4410 - Financial Institutions - 3cr.
- FIN4420 - Risk Management and Insurance - 3cr.
- FIN4540 - Real Estate Valuation - 3cr.

APEC Agribusiness Elective Requirement (8-9 credits)

Students must select 8-9 credits from the following courses. For additional options, contact the program's academic advisor. APEC4250 APPLIED ECONOMICS INTERNSHIP is strongly recommended.

Earn at least 8 credits from the following:

- APEC4010 - Intermediate Microeconomics - 3cr.
- APEC4250 - Applied Economics Internship - 1cr.
- APEC4900 - Directed Readings, Research, or Seminar Series - 1cr.
- APEC5000 - International Trade and Finance - 3cr.
- APEC5010 - Firm Marketing and Price Analysis (QI) - 3cr.
- APEC5020 - Strategic Firm Management (CI) - 3cr.
- APEC5040 - Rural Economic Development and Agriculture (CI) - 3cr.
- APEC5330 - Applied Econometrics (QI) - 3cr.
- APEC5560 - Natural Resource and Environmental Economics - 3cr.
- APEC5700 - Regional and Community Economic Development - 3cr.
- APEC5710 - Frontiers in Agribusiness - 3cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Agribusiness - Agricultural Finance Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agribusiness major provides a foundation for employment in the agricultural sector and in businesses and institutions serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

The Agribusiness major with the Agricultural Finance emphasis is designed for students who are seeking employment in the financial sector of agriculture. Students who want to pursue a career in the banking industry, or in management, or with a large agribusiness corporation take additional coursework from the Huntsman School of Business where they can obtain a business minor and additional training in finance and management. Great opportunities abound for students with Bachelor of Science in Agribusiness with an Agricultural Finance emphasis from USU.

- For more information about Agribusiness, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Agribusiness - Agricultural Marketing Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agribusiness major with an Agricultural Marketing emphasis provides a foundation for employment in the agricultural sector and in businesses and institutions serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

The Agribusiness major with Agricultural Marketing emphasis can be very versatile and, with careful selection of elective credits, students can be well trained for a wide variety of agribusiness careers. Students who want to pursue a career with a large agribusiness corporation could take additional coursework from the Huntsman School of Business where they can obtain a Business Minor or a Marketing Minor. Great opportunities abound for students with Bachelor of Science in Agribusiness with an Agricultural Marketing emphasis from USU.

- For more information about Agribusiness, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI)

Admission Requirements for this Program

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Agribusiness - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agribusiness major provides a foundation for employment in the agricultural sector and in businesses and institutions serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

There are three emphasis areas that a student can major in under the Agribusiness degree: 1) Farm and Ranch Management, 2) Agricultural Finance, 3) Agricultural Marketing. However, you can also obtain the major without an emphasis area. This makes for a very versatile major and, with careful selection of elective credits, students can be well trained for a wide variety of agribusiness careers. For example, students who graduate and plan to work in production agriculture on a farm or ranch can obtain a minor in either Animal and Dairy Science or in Agronomy to complement the Agribusiness-Farm and Ranch Management major. Students seeking a career path in the food manufacturing, processing or retailing industries should take elective coursework from the Nutrition, Dietetics and Food Science department, which will give them great training for careers in those sectors. Students who want to pursue a career in the banking industry, or in management, or a large agribusiness corporation could take the Agribusiness-Agricultural Finance major and get additional coursework from the Huntsman School of Business where they could obtain a Business minor. Great opportunities abound for students with Bachelor of Science in Agribusiness from USU.

- For more information about Agribusiness, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI) .

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Program Requirements

Total Credits Required In Program Coursework
73-75

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

To graduate with a bachelor's degree in Agribusiness, a student must have a GPA of 2.5 or higher in all major and emphasis courses, as well as a grade of *C* or better in each course required for the major. Agribusiness majors with a dual major must satisfy the admission and graduation requirements of both majors. All required courses must be taken for a letter grade.

Several of the required courses listed for this major will meet general education and university studies requirements. For more detailed information about courses, the recommended sequence for taking them and the selection of QANR electives, see the APEC academic advisor in the College of Agriculture and Applied Sciences Student Services Center, Abby Macbeth, http://abby.macbeth@usu.edu, 435-797-0454.

Students interested in a Agribusiness and Agricultural Systems Technology dual major should visit aste.usu.edu for more information.

Agribusiness - BS Course Requirements

Type
Completion Requirement

Agribusiness Program Requirements (53-55 credits)

Complete ALL of the following Courses:

- ACCT2010 - Financial Accounting Principles - 3cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC2500 - Commodity Futures and Options Trading and Analysis - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- APEC3012 - Introduction to Natural Resource Economics (DSS) - 3cr.
- APEC4310 - Agribusiness Finance - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
  OR BUSN1111 - Accounting Principles - 3cr.
- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
  OR STAT2000 - Statistical Methods (QI) - 4cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
  OR GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR LAEP5300 - GIS for Environmental Planning - 4cr.
- APEC5940 - U.S. Agricultural Policy Analysis - 3cr.
  OR APEC5950 - Applied Economics Policy Analysis - 3cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.
  OR BUS3200 - Professional Communication with AI (CI) - 3cr.
- APEC2900 - Agricultural and Natural Resource Law - 3cr.
  OR BUSN2050 - Business Law - 3cr.

- ***Students must also fulfill the Communications Literacy (CL1, CL2) requirement***

APEC upper division requirements

Students must complete at least 8 additional credits of 4000 or 5000 level APEC classes. APEC 4250 is strongly recommended.

College of Agriculture and Natural Resources Elective Requirement (12 credits)

Complete the following:

Students must complete 6 credits of lower-division and 6 credits of upper-division courses with the following prefixes: ADVS, ASTE, LAEP, NDFS, and PSC. Contact the program's academic advisor for recommendations or additional options.

College of Agriculture and Natural Resource Elective Requirement (12 credits)

Complete the following:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Agribusiness: Farm and Ranch Management Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agribusiness major with Farm and Ranch Management emphasis provides a foundation for employment in the agricultural sector and in businesses and institutions serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

The Agribusiness Major with Farm and Ranch Management emphasis can be very versatile, and with careful selection of elective credits, students can be well trained for a wide variety of agribusiness careers. For example, students who graduate in the AgSystems Option of the degree will be well trained to work in the agribusiness equipment sector of the economy or to work in production agriculture. Students who plan to work in production agriculture on a farm or ranch can obtain a minor in either Animal and Dairy Science or in Agronomy to complement the Agribusiness Major with Farm and Ranch Management emphasis. Great opportunities abound for students with Bachelor of Science in Agribusiness with Farm and Ranch Management emphasis from USU.

- For more information about Agribusiness, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Simple Requisites

Program Requirements

To graduate with a bachelor's degree in Agribusiness with a Farm and Ranch Management emphasis, a student must have a **GPA of 2.5 or higher in all major and emphasis courses, as well as a grade of C or better in each course required for the major.** Agribusiness majors with a dual major must satisfy the admission and graduation requirements of both majors. All required courses must be taken for a letter grade.

Several of the required courses listed for this major will meet general education and university studies requirements. For more detailed information about courses, the recommended sequence for taking them and the selection of QANR electives, see the APEC academic advisor, Abby Macbeth, http://abby.macbeth@usu.edu, 435-797-0454.

Agribusiness Program Requirements (53-55 credits)

Type
Completion Requirement

Required Courses

Students must have a GPA of 2.5 or higher in all major and emphasis courses, as well as a grade of C or better in each major and emphasis course. All required courses must be taken for a letter grade.

Complete ALL of the following Courses:

- ACCT2010 - Financial Accounting Principles - 3cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- APEC3012 - Introduction to Natural Resource Economics (DSS) - 3cr.
- APEC4310 - Agribusiness Finance - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
  OR BUSN1111 - Accounting Principles - 3cr.
- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
  OR STAT2000 - Statistical Methods (QI) - 4cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
  OR ECN2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
  OR GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR LAEP5300 - GIS for Environmental Planning - 4cr.
- APEC5940 - U.S. Agricultural Policy Analysis - 3cr.
  OR APEC5950 - Applied Economics Policy Analysis - 3cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.
  OR BUS3200 - Professional Communication with AI (CI) - 3cr.
- APEC2900 - Agricultural and Natural Resource Law - 3cr.
  OR BUSN2050 - Business Law - 3cr.

Communications Literacy

Complete at least 1 course in the following course sets:

- Communications Literacy (CL1) Course
- Communications Literacy (CL2) Course

Farm and Ranch Management Emphasis Requirements (6 credits)

Complete ALL of the following Courses:

- APEC2500 - Commodity Futures and Options Trading and Analysis - 3cr.
- APEC5015 - Applied Economics for Decision Making (QI) - 3cr.

Farm and Ranch Management Emphasis Electives (6 credits)

Complete at least 2 of the following courses:

- APEC4250 - Applied Economics Internship - 1cr.
- APEC5010 - Firm Marketing and Price Analysis (QI) - 3cr.
- APEC5020 - Strategic Firm Management (CI) - 3cr.
- APEC5040 - Rural Economic Development and Agriculture (CI) - 3cr.

- APEC5150 - Advanced Agricultural Credit Analysis - 3cr.

College of Agriculture and Natural Resources Elective Requirement (12 credits)

Students must complete 6 credits of lower-division and 6 credits of upper-division courses with the following prefixes: ADVS, ASTE, LAEP, NDFS, and PSC. Contact the program's academic advisor for recommendations or additional options.

Complete the following:

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Agribusiness - MS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Graduate

About this Degree

The degree focuses on the competitive environment in the food production and agribusiness industries. The program emphasizes the use of various economic and business analytical methods applied quantitatively to aid in the agribusiness decision-making process. Students are given opportunities to learn problem-solving skills in depth and apply them to real world cases through both internship and applied research experiences.

Program Requirements

Total Credits Required In Program Coursework
-

Total Credits Required To Earn This Credential
30

Simple Requisites

Program Requirements

Degree Verification

A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.

Overall Graduate GPA at least 3.0 and no grades of C- or lower; Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.

Course Number Acceptability

The Program of Study for a master's degree must include at least 15 semester credits at the level of 6000 or above.

Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 3000.

Matriculation Start Semester

A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.

Coursework Validity

Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.

USU Residency Requirement

At least 24-semester credits for a master's degree must be from a committee-approved and a School of Graduate Studies-approved Program of Study from Utah State University

Thesis Research Credits 6970

Master's Plan A students:

The Plan A option requires the preparation and defense of a thesis. Students are required to complete a minimum of 6 credits of thesis research (APEC6970 THESIS RESEARCH) for a Program of Study.

Master's Plan B students:

A Plan B option requires the production and defense of a paper or project. Students are required to complete a minimum of 2 credits of thesis research (APEC6970 THESIS RESEARCH) with a maximum of 3 thesis research credits applied toward a Program of Study.

Master's forms: Approval of the following academic forms is required for master's students by the School of Graduate Studies (SGS):

- Supervisory Committee
- Program of Study
- Thesis/Project Approval
- Appointment for Examination
- Record of Examination
- SGS and library review and approval (Plan A)
- Library review and approval (Plan B)

Section 1

Type
Completion Requirement

Plan B

This is a non-thesis MS degree. It is designed to be a terminal Master of Science degree.

Fulfill ALL of the following requirements:

Fall Semester (12 credits)

Complete ALL of the following Courses:

- APEC6040 - Production Economics, Applied Risk Analysis and Simulation - 3cr.
- APEC6330 - Applied Econometrics - 3cr.
- APEC6120 - Economics and Strategy - 3cr.
- Approved Elective (3 credits; see list below)

AND

Spring Semester (12 credits)

Complete ALL of the following Courses:

- APEC5710 - Frontiers in Agribusiness - 3cr.
- APEC6030 - Agricultural Marketing - 3cr.
- APEC6140 - Decision Making and Strategy - 3cr.
- Approved Electives (3 credits; see list below)

AND

Summer or Fall Semester (6 credits)

Complete ALL of the following Courses:

- APEC6970 - Thesis Research - 1cr.
- APEC6250 - Graduate Internship - 1cr.

AND

Approved Electives

Complete ANY of the following Courses:

- APEC5000 - International Trade and Finance - 3cr.
- APEC5940 - U.S. Agricultural Policy Analysis - 3cr.
- APEC5950 - Applied Economics Policy Analysis - 3cr.
- APEC6300 - Quantitative Analysis for Business and Policy Decisions - 3cr.
- APEC6910 - Independent Research - 1cr.
- ASTE6260 - Environmental Impacts of Agricultural Systems - 3cr.
- NDFS6510 - Food Laws and Regulations - 3cr.

Approved elective courses in Finance (FIN), Management (MGT) or Management Information Systems (MIS) may also be used for electives.

Agricultural Education - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The Agricultural Education major prepares students to become teachers and FFA advisors in high schools and technical education centers. Ag teachers can teach a wide variety of subjects, including animal science, horticulture, welding and metals, woodshop, leadership courses, and other elective classes. They receive high-quality training at USU and job placement for agriculture teachers is extremely high across the state and the nation.

In addition to courses in agricultural education, the curriculum includes courses in technical agriculture areas, including: agricultural economics; agricultural mechanization; animal, dairy, and veterinary sciences; plant and soil science; and natural resources.

- For more information about Agricultural Education, see the website.
- Admitted and current students must meet with an advisor. Contact Caisa Shoop, caisa.shoop@usu.edu for advising.
- Log on to Degree Works to check student-specific program progress.
- For admission into the Secondary Teacher Education Program, students will need to meet minimum grade requirements, found at teal.usu.edu/htm/undergraduate-programs/seced/adstep.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL).

Students must choose one of the following emphases:

- Agricultural Education - Community-Based Emphasis - BS
- Agricultural Education - School-Based Emphasis - BS

Agricultural Education - Community-Based Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The Agricultural Education, Community-Based major opens the door for students to instruct and lead community outreach programs, work in agricultural extension programs and provide other public and private organizations with expertise as a youth and adult educator. Students in community-based education develop a diverse background in nonformal education techniques, agriculture, leadership, human relationships, communication, analytical reasoning, critical thinking, effective writing, and teamwork. In addition to courses in agricultural education, the curriculum includes agricultural economics, animal, dairy, and veterinary sciences, plant and soil sciences, and natural resources. Classes in nonformal education provide skills in teaching methods for diverse audiences, volunteer program development and management, community programming, outreach development, program evaluation, and youth program development.

Students may engage in a community-based internship beginning in their junior year with an agricultural business, public or private organization, commodity group program, nonprofit organization, or Extension office. Through coursework and hands-on learning opportunities, students in community-based agricultural education will prepare to improve communities and teach global populations using their agricultural content knowledge and experience. This is a major for students who want to share their passion for agriculture through educating broad global populations.

- For more information about Agricultural Education, see the website.
- Admitted and current students must meet with an advisor.
- Contact Caisa Shoop, caisa.shoop@usu.edu, 435-797-8434 for advising.
- Contact Dr. Brian Warnick for internship information: brian.warnick@usu.edu.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

- GEO1380 - Where Science and Society Meet (BPS) - 3cr.
- STAT1040 - Introduction to Statistics (QL) - 3cr.
- STAT1045 - Introduction to Statistics with Elements with Algebra (QL) - 5cr.
- STAT2000 - Statistical Methods (QI) - 4cr.
- USU1350 - Integrated Life Science (BLS) - 3cr.

Technical Agriculture Courses (25-28 credits)

Choose 25-28 credits from courses in Animal Science, Plant Science, Environmental Science or Agricultural Systems. See list below.

Fulfill ANY of the following requirements:

Animal Science Courses

Complete ANY of the following Courses:

- ADVS1110 - Introduction to Animal Science (BLS) - 3cr.
- ADVS2080 - Beef Production Practices - 3cr.
- ADVS2090 - Sheep Production Practices - 3cr.
- ADVS2120 - Swine Production and Management - 3cr.
- ADVS2190 - Horse Production Practices - 3cr.
- ADVS2300 - Horse Health Care - 2cr.
- ADVS2500 - Feeds and Feeding - 3cr.
- ADVS3500 - Principles of Animal Nutrition - 3cr.
- ADVS3650 - Live Animal and Carcass Evaluation - 3cr.
- NDFS5020 - Meat Science and Technology - 4cr.

OR

Agricultural Systems Courses

Complete ANY of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.

OR

Plant Science Courses

Complete ANY of the following Courses:

- PSC1800 - Introduction to Horticulture (BLS) - 3cr.
- PSC2200 - Pesticide Certification - 2cr.
- PSC2600 - Herbaceous Plant Materials - 3cr.
- PSC2620 - Woody Plant Materials: Trees and Shrubs for the Landscape - 3cr.
- PSC2700 - Climate Change Impacts (BPS) - 3cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.
- PSC3400 - Arboriculture - 3cr.
- PSC3700 - Plant Propagation - 4cr.
- PSC3800 - Fundamentals of Organic Agriculture - 3cr.
- PSC3810 - Turfgrass Management - 3cr.
- PSC4050 - Greenhouse Management and Crop Production - 4cr.
- PSC4280 - Field and Food Cropping Systems - 3cr.
- PSC4310 - World Food Crops and Cropping Systems: The Plants That Feed Us (INACTIVATED FALL 2025) - 3cr. (Inactive)
- PSC4320 - Forage Production and Pasture Management - 3cr.
- PSC4400 - Modern Vegetable Production - 3cr.
- PSC5222 - Temperate Zone Fruit Production - 3cr.

OR

Environmental Science Courses

Complete ANY of the following Courses:

- ASTE5260 - Environmental Impacts of Agricultural Systems (CI) - 3cr.
- BIOL3220 - Field Ecology (QI) - 2cr.

- ENVS2340 - Environment, Natural Resources, and Society (BSS) - 3cr.
- ENVS3010 - Natural Resource and Environmental Policy - 3cr.
- ENVS4000 - Human Dimensions of Natural Resource Management (DSS) - 3cr.
- LAEP2039 - Foundations of Sustainable Systems - 3cr.
- WATS1200 - The Natural World and Our Place Within It (BLS) - 3cr.
- WILD2200 - Ecology of Our Changing World (BLS) - 3cr.
- WILD4000 - Principles of Rangeland Management - 3cr.

Communications and Leadership Courses (3 credits)

Complete ALL of the following Courses:

- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

Communications and Leadership Electives (8 credits)

Select remaining 8 credits from courses listed below.

Earn at least 8 credits from the following:

- ASTE3090 - Graphic Design in Agriculture and Media Industries - 3cr.
- CMST1020 - Public Speaking (BHU) - 3cr.
- CMST2110 - Interpersonal Communication (BHU) - 3cr.
- CMST3250 - Organizational Communication (CI) - 3cr.
- ENVS4700 - Communicating Sustainability (CI) - 3cr.
- ITLS5215 - Video and Audio Design and Production I - 3cr.
- ITLS5240 - Graphic Design and Production II - 3cr.
- ITLS5270 - Digital Making and Learning - 3cr.
- MSLE3110 - Managing Organizations and People (DSS) - 3cr.
- MSLE3710 - Leading Teams - 2cr.
- MSLE3800 - Leadership - 2cr.
- MSLE3830 - Women's Leadership Development - 2cr. (Inactive)
- SOC4640 - Managing Community Conflict (CI) - 3cr.
- TCR2100 - Introduction to Technical Communication - 3cr.
- TCR3230 - Community Grant Writing - 3cr.
- USU2400 - Career Series 2: Networking and Preparing for Internships - 1cr.

CBE Electives (10 credits)

Select a minimum of 10 credits from courses in a Foreign Language, Societal Issues, Nonformal Education Enrichment, or Economics and Business.

Fulfill ANY of the following requirements:

Societal Issues Electives

Complete ANY of the following Courses:

- ASTE2900 - Food Matters: Ethics, Economics, and the Environment (BSS) - 3cr.
- ASTE3440 - Science, Technology, and Modern Society (DSC) - 3cr.
- HDFS2450 - Consumer and Family Economic Issues (BSS) - 3cr.
- HDFS3700 - Mental Health Advocacy and Awareness - 3cr.
- HEP5250 - Global Health & Service Learning - 3cr.
- NDFS1240 - Food Literacy - 3cr.
- NDFS3110 - Food, Technology, Sustainability and Health (DSC) - 3cr.
- NDFS5010 - Hunger Issues and Solutions - 3cr.

OR

Nonformal Education Enrichment Electives

Complete ANY of the following Courses:

- ADVS3150 - Principles of Equine-Assisted Services - 3cr.
- ADVS3400 - Equine Specialist in Equine-Assisted Interventions - 3cr.
- ENVS3400 - Fundamentals of Tourism - 3cr.
- ENVS4610 - Foundations of Environmental Education - 3cr. (Inactive)
- RAM1000 - Introduction to Recreation Services - 2cr.
- RAM3000 - Recreation Experience Design I - 3cr.
- SOC3010 - Social Inequality (DSS) - 3cr.
- USU1340 - Social Systems and Issues (BSS) - 3cr.

OR

Economics and Business Electives

Complete ANY of the following Courses:

- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- APEC3012 - Introduction to Natural Resource Economics (DSS) - 3cr.
- CMST3280 - Organizations and Social Change - 3cr.
- ECN1500 - Introduction to Macroeconomics - 3cr.
- HDFS3350 - Family Finance (DSS) - 3cr.
- MGT3100 - Organizational Behavior - 2cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.

- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Agricultural Education - School-Based Emphasis - BS

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Applied Sciences, Technology and Education	Undergraduate

About this Degree

The Agricultural Education major prepares students to become teachers and FFA advisors in high schools and technical education centers. Ag teachers can teach a wide variety of subjects, including animal science, horticulture, welding and metals, woodshop, leadership courses, and other elective classes. They receive high-quality training at USU and job placement for agriculture teachers is extremely high across the state and the nation.

In addition to courses in agricultural education, the curriculum includes courses in technical agriculture areas, including: agricultural economics; agricultural mechanization; animal, dairy, and veterinary sciences; plant and soil science; and natural resources.

- For more information about Agricultural Education, see the website.
- Admitted and current students must meet with an advisor. Contact Caisa Shoop, caisa.shoop@usu.edu for advising.
- Log on to Degree Works to check student-specific program progress.
- For admission into the Secondary Teacher Education Program, students will need to meet minimum grade requirements, found at teal.usu.edu/htm/undergraduate-programs/seced/adstep.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
105	120

Simple Requisites

Program Requirements

In order to obtain a secondary teaching license for grades 6-12, students must complete the 30-credit Secondary Teacher Education Program (STEP), which includes one semester of student teaching in a public school. This program is administered by USU's School of Teacher Education and Leadership (TEAL) within the Emma Eccles Jones College of Education and Human Services. Student must apply to the School of TEAL the semester before taking STEP courses. This is usually the fall of their junior year. Students learn subject content through the School of Applied Sciences, Technology, and Education and spend the last year or two studying education techniques through the STEP program.

Students in the Agricultural Education, School-Based program do not need to have a minor because the program provides students with knowledge in several subject areas, therefore expanding their career options.

Students must earn a C or better in all major required courses and have a minimum of a 3.0 major GPA and a 2.0 overall GPA in order to graduate.

For admission into the Secondary Teacher Education Program, students will need to meet minimum grade requirements, found at teal.usu.edu/htm/undergraduate-programs/seced/adstep. Contact Caisa Shoop, caisa.shoop@usu.edu for advising.

Agricultural Education - BS, School-Based Requirements

Type
Completion Requirement

Mathematics Requirement (4 credits)

Complete ALL of the following Courses:
- MATH1050 - College Algebra (QL) - 4cr.

Professional Education (15 credits)

Complete ALL of the following Courses:
- ITLS2500 - Technology Enabled Instruction - 3cr.
- SCED3210 - Educational and Multicultural Foundations (DSS/CI) - 3cr.
- SCED5100 - Motivation and Classroom Management - 3cr.
- SCED5200 - Language, Literacy, and Learning in the Content Areas (CI) - 3cr.
- SPED4000 - Education of Students with Disabilities - 3cr.

Agricultural Education (27 credits)

Complete ALL of the following Courses:
- ASTE2710 - Orientation to Agriculture Education - 2cr.
- ASTE3240 - Teaching in Laboratory Settings (CI) - 3cr.
- ASTE3300 - Clinical Experience in Agricultural Education - 1cr.
- ASTE3620 - Managing the FFA and SAE Programs - 2cr.
- ASTE4150 - Methods of Teaching Agriculture (CI) - 3cr.
- ASTE4210 - Cognition and Evaluation of Student Learning in Career and Technical Education - 3cr.
  OR SCED5210 - Learning Theory, Curriculum, and Assessment - 3cr.
- ASTE4300 - Clinical Experience II in Agricultural Education - 1cr.
- ASTE5500 - Agricultural Education Secondary Curriculum Seminar - 2cr.
- ASTE5630 - Agricultural Education Student Teaching in Secondary Schools - 10cr.

Technical Agriculture Courses (53 credits)

Fulfill ALL of the following requirements:

Core Science & Literacy (10 credits)

Complete ALL of the following Courses:
- ASTE2900 - Food Matters: Ethics, Economics, and the Environment (BSS) - 3cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- USU1350 - Integrated Life Science (BLS) - 3cr.
  OR BIOL1610 - Biology I - 3cr.

AND

Animal Science Courses (3 credits)

Complete ALL of the following Courses:
- ADVS1110 - Introduction to Animal Science (BLS) - 3cr.

AND

Animal Production Course

Complete at least 1 of the following courses:
- ADVS2020 - Companion Animal Nursing - 2cr.
- ADVS2030 - Exotic and Laboratory Animal Health and Care - 1cr.
- ADVS2080 - Beef Production Practices - 3cr.
- ADVS2090 - Sheep Production Practices - 3cr.
- ADVS2120 - Swine Production and Management - 3cr.
- ADVS2190 - Horse Production Practices - 3cr.

AND

Animal Science Course

Complete at least 1 of the following courses:
- ADVS2200 - Anatomy and Physiology of Animals - 3cr.
- ADVS2500 - Feeds and Feeding - 3cr.
- ADVS3100 - Equine Evaluation and Judging - 3cr.
- ADVS3500 - Principles of Animal Nutrition - 3cr.
- ADVS3650 - Live Animal and Carcass Evaluation - 3cr.
- ADVS3710 - Advanced Livestock Judging - 2cr.
- ADVS4560 - Principles of Animal Genetics and Breeding (QI) - 3cr.

AND

Agricultural Systems Courses (9 credits)

Complete ALL of the following Courses:
- ASTE1640 - Introduction to Welding - 3cr.
  OR ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.
- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
  OR ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
  OR ASTE2200 - Electricity in Agricultural Systems - 3cr.
  OR ASTE4100 - Agricultural Structures and Environment (QI) - 3cr.
  OR ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.

AND

Plant and Soil Science Required Courses (11 credits)

Complete ALL of the following Courses:
- PSC1800 - Introduction to Horticulture (BLS) - 3cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.
- PSC4050 - Greenhouse Management and Crop Production - 4cr.

AND

Plant and Soil Science Elective Courses (2-4 credits)

Complete at least 1 of the following courses:
- PSC2030 - Basic Flower Arranging - 2cr.
- PSC2200 - Pesticide Certification - 2cr.
- PSC2600 - Herbaceous Plant Materials - 3cr.
- PSC2620 - Woody Plant Materials: Trees and Shrubs for

the Landscape - 3cr.
- PSC3500 - Structure and Function of Plants - 3cr.
- PSC3600 - An Introduction to Plant Breeding and Heredity - 3cr.
- PSC3700 - Plant Propagation - 4cr.
- PSC3800 - Fundamentals of Organic Agriculture - 3cr.
- PSC3810 - Turfgrass Management - 3cr.
- PSC4280 - Field and Food Cropping Systems - 3cr.
- PSC4310 - World Food Crops and Cropping Systems: The Plants That Feed Us (INACTIVATED FALL 2025) - 3cr. (Inactive)
- PSC4320 - Forage Production and Pasture Management - 3cr.
- PSC4400 - Modern Vegetable Production - 3cr.
- PSC4550 - Integrated Weed Management - 3cr.
- PSC5222 - Temperate Zone Fruit Production - 3cr.

AND

Natural Resources Course (2-3 credits)

Complete at least 1 of the following courses:
- BIOL3220 - Field Ecology (QI) - 2cr.
- ENVS1350 - Introduction to Environmental Science (BLS) - 3cr.
- WILD2200 - Ecology of Our Changing World (BLS) - 3cr.
- WILD3500 - Introduction to Rangeland Management - 3cr.
- WILD4000 - Principles of Rangeland Management - 3cr.

AND

Communications & Leadership (6 credits)

Complete ALL of the following Courses:
- ASTE2100 - Personal and Team Leadership - 3cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

AND

AG Economics/Business Courses (3 credits)

Complete ALL of the following Courses:
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.

Elective Courses (6 credits)

Take 6 credits from the following course options. See advisor to choose from animal science, plant science, ag systems, natural resources, ag business or other recommended courses.

Earn at least 6 credits from the following:
- ADVS4560 - Principles of Animal Genetics and Breeding (QI) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE2250 - Occupational Experience in Agriculture - 1cr.
- ASTE2450 - Domestic Study Experience - 1cr.
- ASTE3440 - Science, Technology, and Modern Society (DSC) - 3cr.
- ASTE4250 - Occupational Experiences in Agriculture - 1cr.
- ASTE5450 - Study Abroad Experience - 1cr.
- BIOL3060 - Principles of Genetics (QI) - 3cr.
- CMST1020 - Public Speaking (BHU) - 3cr.
- USU1350 - Integrated Life Science (BLS) - 3cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Additional Comments:

Licensure Notification

This program typically leads to licensure and was designed to meet licensing qualifications in the state of Utah. If students wish to work in another state within the United States, they should review the qualifications for that state and the Education Licensure Compliance Table provided by School of Teacher Education and Leadership.

For more information, please contact the School of Teacher Education and Leadership at https://cehs.usu.edu/teal/

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Students must have a background check, submit their application to STEP (by Oct 1), and register for Level I classes in fall semester of their third year. (Must have a 3.0 GPA to be admitted to STEP)

Students must apply for graduation and register for Level II classes in spring semester of their third year

Students must apply for student teaching in fall semester of their fourth year

Agricultural Extension and Education - MS

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Applied Sciences, Technology and Education	Graduate

About this Degree

Website: https://caas.usu.edu/aste/

This degree emphasizes research, leadership, and teaching. Students are provided with coursework to gain research skills, engage in mentoring and organizational management, and improve their pedagogical approaches to teaching and learning in formal or nonformal educational settings. This degree program requires a thesis. The completion of a thesis prepares students with the skills and experiences needed to read, interpret, and conduct research. This degree program also prepares students for a future Ph.D. program. The program can be completed on campus or at a distance as all coursework (30 credits) is available online. Seven courses are required (24 credits). Most students in the program take two classes (6 credits) per semester. Students who follow this will be able complete the program in approximately 2 years (5 semesters).

Admission Requirements for this Program

The required documentation for the application package and admissions requirements are noted on the ASTE Graduate Admission and Application webpage, https://caas.usu.edu/aste/graduate/graduate-program-admission.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
30	30

Simple Requisites

Program Requirements

School of Graduate Studies Requirements:

Degree Verification

- A bachelor's degree from an accredited U. S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.

Overall Graduate GPA

- At least 3. 0 and no grades of C- or lower. Graduate students are required to maintain at least a 3. 0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.

Course Number Acceptability

- The Program of Study for a master's degree must include at least 18 semester credits at the level of 6000 or above. A maximum of 12 credits from courses at the level of 5000 may be used on an approved program of study.

Matriculation Start Semester

- A master's degree must be completed within six years of entering the degree program. Additional time may be requested and submitted to the Vice Provost of Graduate Studies for review.

Coursework Validity

- Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.

Plan Type

Plan A - The Plan A option for a master's degree requires preparation and defense of a thesis.

Required School of Graduate Studies Forms

Approval of the following academic forms are required for Plan A master's students by the School of Graduate Studies

- Supervisory Committee Approval by the end of the second semester.
- Program of Study Approval by the end of the second semester after the Supervisory Committee Approval form
- Thesis/Project Approval Form
- Appointment for examination form submitted 10 days before defense and during defense semester. Students must be registered for 3 credit hours of thesis
- Authorship and Copyright form
- Thesis/Dissertation Format and Style (F&S) and Electronic Publication Form
- Title Page
- Graduation application

Section 1

Type
Completion Requirement

Foundation Research Core (15 credits)

Complete ALL of the following Courses:

- ASTE6750 - Research Methods and Design - 3cr.
- ASTE6800 - Analysis of Social Research Data - 3cr.
  OR STAT5200 - Analysis of Designed Experiments - 3cr.
- ASTE6100 - Research and Academic Writing - 3cr.
- ASTE6970 - Research and Thesis - 1cr.

a minimum of 6 credits is required for ASTE6970 RESEARCH AND THESIS

Foundation Core (6 credits)

Complete ALL of the following Courses:

- ASTE6160 - Foundations of Adult Education - 3cr.
- ASTE6170 - Program Planning and Evaluation - 3cr.

Section 2

Type
Completion Requirement

Elective Courses (9 credits)

Select 9 credits

Fulfill ANY of the following requirements:

Suggested Electives for Extension

Complete ANY of the following Courses:

- ASTE6200 - Principles and Practices of Extension Education - 3cr.
- ASTE6220 - Volunteer Programs and Partnerships - 3cr.
- ASTE6260 - Environmental Impacts of Agricultural Systems - 3cr.
- ASTE6370 - Grant Writing and Management - 3cr.
- ASTE6920 - Communication Tools for Extension - 3cr.
- ASTE7500 - Diffusion of Innovations - 3cr.
- ASTE6900 - Graduate Independent Study in Career and Technical Education - 1cr.
- ASTE6950 - Graduate Internship - 1cr.

OR

Suggested Electives for Education

Complete ANY of the following Courses:

- ASTE6090 - Curriculum Design - 3cr.
- ASTE6150 - Evaluation and Assessment - 3cr.
- ASTE6180 - Administration and Leadership - 3cr.
- ASTE6300 - Advanced Teaching Strategies - 3cr.
- ASTE6315 - Career and Technical Student Organization Development - 3cr.
- ASTE6320 - Classroom Management, Student Motivation, and Guidance - 3cr.
- ASTE6380 - Mentoring and Supervision - 3cr.
- ASTE6460 - Integrating Career and Tech Educ Curriculum with Science, Technology, Engineering, and Mathematics - 3cr.
- ASTE6910 - Design Thinking for Career and Technical Education - 3cr.
- ASTE6900 - Graduate Independent Study in Career and Technical Education - 1cr.
- ASTE6950 - Graduate Internship - 1cr.

Applied Geographic Information Science - Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Environment & Society

Program Level
Undergraduate

About this Degree

Utah State University's Applied GIS certificate enables undergraduate students to approach complex natural resource issues with the experience and confidence to inform research and data-driven decision-making using database linked maps and geospatial analysis. The Applied GIS Certificate is customizable to meet students' disciplinary interests by offering a wide range of geospatial electives. In addition to foundational and advanced courses in GIS analysis utilizing the latest industry standard tools and software packages, courses include programming in R and Python, geovisualization, remote sensing, drone data collection and processing, database management, and a professional portfolio course designed to showcase geospatial proficiency and skillsets, giving students a competitive advantage when seeking job or research opportunities.

The certificate is designed to be easily completed alongside a variety of majors. Required coursework includes courses in introductory and advanced geospatial analysis and one of two programming courses.

Students choose an additional two 3- to 5-credit elective courses.

The certificate is designed to be easily completed alongside a variety of majors.

Admission Requirements for this Program

Students should make an appointment with an academic advisor in the S.J. and Jessie E. Quinney College of Agriculture and Natural Resources to add this certificate: qanr.usu.edu/advising/.

Program Requirements

16

Total Credits Required To Earn This Credential
16

Simple Requisites

Program Requirements

To receive the certificate, a student must complete the following set of requirements:

- Register for and successfully complete at least 16 credits
- Maintain a minimum 3.0 GPA for program courses (grades below C- will not be accepted)
- Abide by the Code of Policies and Procedures for Students at Utah State University

Course Requirements

Type
Completion Requirement

Required GIS Core Courses

Complete ALL of the following Courses:

- GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR WILD2800 - Introduction to Geographic Information Sciences - 4cr.
- GEOG5500 - Advanced Geographic Information Sciences (GIS) - 3cr.
- GEOG4910 - Geographic Information Science Portfolio - 1cr.

GIS Programming Course Requirement

Complete at least 1 of the following courses:

- GEOG3700 - Python Programming for GIS - 3cr.
- GEOG5300 - Geospatial Analysis with R - 3cr.
- WILD5750 - Applied Remote Sensing - 3cr.

Elective Courses

Earn at least 5 credits from the following:

- CEE2240 - Engineering Surveying - 3cr.
- DATA5300 - Database Management - 3cr.
- GEOG3200 - Principles of Remote Sensing - 3cr.
- GEOG3700 - Python Programming for GIS - 3cr.
- GEOG3800 - Geospatial Data Visualization - 3cr.
- GEOG4900 - GIS Individual Projects - 1cr.
- GEOG4920 - GIS Internship - 1cr.
- GEOG5300 - Geospatial Analysis with R - 3cr.
- GEOG5805 - Introduction to Geospatial Artificial Intelligence: The Remote Sensing and GeoAI Frontier - 3cr.
- LAEP5400 - Advanced Geospatial Analysis and Visualization for Environmental Planning - 4cr.
- STAT1080 - Foundations of Data Science (QL) - 3cr.
- STAT5410 - Applied Spatial Statistics - 2cr.
- CEE5003 - Remote Sensing of Land Surfaces - 3cr.
  OR PSC5003 - Remote Sensing of Land Surfaces - 3cr.
- UAS3010 - Unmanned Aircraft System Introduction to Remote Pilot Certification - 3cr.
- WILD5750 - Applied Remote Sensing - 3cr.

Students may not take the same course to fulfill both elective and required courses.

Agricultural Machinery Technology - AAS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The Agricultural Machinery Technology - AAS degree is a second-year continuation of the Agricultural Machinery Technology certificate program. The one-year certificate coursework stacks into the associates of applied science in agricultural machinery technology. The associate degree also transitions very easily into a bachelor's program in agricultural systems technology or agricultural education.

In addition to coursework training, machinery dealerships and companies hold in-service training at USU where students can receive training and certification for repairs and operations of the latest agricultural equipment. Upon completion of these programs, employers often seek after students from USU's program, resulting in extremely high job placement.

The program is designed to deepen students preparation for a career in the agricultural equipment industry. Coursework requirements include technical hands-on training on engines, power trains, hydraulics, DC electrical, and specialized forage, harvesting, tillage, planting, and spraying equipment. Core skill development focuses on testing, diagnosis, and repair of equipment. Because it is an associate degree program, a minimum of six credits of general education courses are required.

- For more information about Agricultural Machinery Technology, see the department website.
- Agricultural Machinery Technology Academic Advisor, Allie East: allie.east@usu.edu or 435-797-2194.
- Current and admitted students must meet with an advisor.

Admission Requirements for this Program

- New freshmen: Admited to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.0 GPA

Program Requirements

Total Credits Required In Program Coursework

Program Requirements

Log on to Degree Works to check student-specific program progress.

Major Requirements (63 credits)

Type
Completion Requirement

General Education Requirements

Complete ALL of the following Courses:

- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- ENGL1010 - Writing as Inquiry (CL1) - 3cr.
- PSC2000 - The Atmosphere and Weather (BPS) - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.

Breadth Education Requirements

Complete at least 1 course in the following course sets:

- Breadth Life Sciences (BLS) Course
- Breadth Creative Arts (BCA) Course
  OR Breadth Humanities (BHU) Course
  OR Breadth Social Sciences (BSS) Course

USU1350 INTEGRATED LIFE SCI (BLS), PHIL1320 THE GOOD LIFE (BHU) are recommended to fulfill the BLS and BHU requirements, respectively

Core Classes (28 credits)

The following 28 credits are required.

Complete ALL of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE2250 - Occupational Experience in Agriculture - 1cr.
- ASTE2930 - Individualized Projects in Agriculture Mechanics - 1cr.
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- ASTE2100 - Personal and Team Leadership - 3cr.

A minimum of 3 credits for ASTE 2250 is required. A minimum of 3 credits for ASTE 2930 is required.

Agricultural Machinery Technology AAS Directed Electives (17 credits)

Select 17 credits from the courses below

Earn at least 17 credits from the following:

- ADVS1110 - Introduction to Animal Science (BLS) - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- ASTE2900 - Food Matters: Ethics, Economics, and the Environment (BSS) - 3cr.
- ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.

Agricultural Machinery Technology - Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The one-year certificate program is designed to familiarize students with the agricultural equipment industry. Certificate requirements include technical hands-on training on engines, power trains, hydraulics, DC electrical, and specialized forage, harvesting, tillage, planting, and spraying equipment.

- For more information about Agricultural Machinery Technology, see the department website.
- Admitted and current students must meet with an advisor.

In addition to coursework training, machinery dealerships and companies hold in-service training at USU where students can receive training and certification for repairs and operations of the latest agricultural equipment. Upon completion of these programs, employers are always seeking after students from USU's program, resulting in extremely high job placement.

Core curriculum includes equipment testing, diagnosis, and retailing of parts and equipment.

For more information, visit aste.usu.edu/agmachinery or contact the Agricultural Machinery Technology Academic Advisor, Allie East: allie.east@usu.edu or 435-797-2194.

Agricultural Science - AS

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree

Students completing the Associate of Science degree are required to earn a minimum of 60 credits. Twenty credits must be earned at USU (Logan campus or USU statewide campuses). The agricultural science core will include 20 credits. The General Education requirements are the same as for other USU students earning the General Associate of Science degree.

A minimum 2.0 GPA is required for graduation.

- For more information about the Associate of Science Degree in Agricultural Science see the Department of Technology, Design and Technical Education or contact Tami Spackman, tami.spackman@usu.edu, 435-797-2282.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.

AI Ethics - Certificate

Program Overview

College
College of Arts & Sciences

Department
History, Cultures & Ideas

Program Level
Undergraduate

About this Degree
The AI Ethics Certificate encourages students to raise hard questions about the influence of artificial intelligence in our politics, our culture, and our lives. The certificate can add value to any students' degree in technology, and also help all students think through AI-related questions that have become urgent in our lives.

Admission Requirements for this Program

Completion Requirement

Required Courses (9 credits)

Complete ALL of the following Courses:

- PHIL1130 - Living in a Brave New World: Philosophy and Technology (BHU) - 3cr.
- DATA3300 - Introduction to Modern Data Analytics (QI) - 3cr.
- CAI5400 - Ethics and Emerging Technology - 3cr.
  OR PHIL5400 - Ethics and Emerging Technology (DHA) - 3cr.

Minimum University Requirements

Minimum University Requirements
Minimum University Requirements (Undergraduate Academic or Technical Certificates)

Program Learning Outcomes

Program Learning Outcomes
Students will learn how questions regarding AI connect with other moral questions, as well as how various powerful moral theories regard the challenges posed by AI. They will also gain a thorough understanding of the ways in which data is gathered and employed by AI-augmented systems. The program is housed in the Department of History, Cultures, and Ideas, but it is also supported by the Department of Data Analytics + Information Systems.

Airframe Maintenance - Technical Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree
The Airframe Maintenance program equips students with the necessary skills for a career in aviation maintenance. After completing this certificate, students will meet the Federal Aviation Administration requirements to take the General and Airframe tests required to earn their FAA Airframe license.

This technical certificate will provide independent, statewide-developed certification and a stackable credential toward a two-year Associate of Applied Science in Aircraft Maintenance Technician. Credits earned in the certificate program(s) will meet requirements for existing Certificate and BS program requirements:

• AAS, Aircraft Maintenance Technician

• AAS, General Technology

• AAS, Small Business Operations

• BS, Technology Systems, Technical Management

- TEAV2170 - Aircraft Systems - 3cr.
- TEAV2180 - Aircraft Hydraulic and Pneumatic Systems - 3cr.
- TEAV2200 - Composite Manufacturing and Repair - 3cr.
- TEAV2420 - FAA Regulations, Records, and Certification - 2cr.
- TEAV2430 - Aircraft Electrical Systems and Components - 2cr.
- TEAV2440 - Aircraft Electrical Systems and Components Lab - 2cr.

Minimum University Requirements

Minimum University Requirements

Minimum University Requirements (Undergraduate Academic or Technical Certificates)

Program Learning Outcomes

Program Learning Outcomes

- Perform aviation engine maintenance in alignment with FAA Standards.
- Prepare for FAA Licensing by fulfilling all prerequisites to sit for the Federal Aviation Administration General and Airframe licensing exams, qualifying for certification and practice in the field.
- Interpret diagnostic material for aviation maintenance and repair.
- Record maintenance logs and certify the airworthiness of aircraft.

AI and Writing - Certificate

Program Overview

College
College of Arts & Sciences

Department
English

Program Level
Undergraduate

About this Degree

The three-course certificate in AI and rhetoric offers a structured approach to help students develop both technical proficiency and critical insight into the role of AI in writing and communication. This certificate addresses an urgent need for students across disciplines to understand not only how to use AI tools but also how to analyze and critique the ways AI is represented and applied within various professional and public contexts.

- ENGL3175 - Healthcare and Medical Writing - 3cr.
- ENGL3190 - Data Storytelling (CI) - 3cr.
- ENGL3470 - Approaches to Research (QI) - 3cr.

Program Learning Outcomes

Program Learning Outcomes

1. Career and Self-Development: Students will gain knowledge and experience with a wide range of emerging AI technologies, while also learning how to network and build relationships within and across different disciplines.
2. Communication: Students will communicate information, ideas, facts, and perspectives clearly and effectively with individuals and groups inside and outside of organizations and communities.
3. Critical Thinking: Students will think critically about the concept of AI across genres, professions, and contexts. Additionally, students will learn to identify and respond to issues based on an understanding of situational context and careful analysis of relevant information.

4. Professionalism: Students will understand and demonstrate effective work habits and act in the interests of their larger professional communities. In addition to coursework which explicitly examines professional dynamics through the study of AI, this certificate will require students to develop and complete projects in which they apply and expand on the knowledge and skills gained in the three courses.
5. Teamwork: The certificate fosters teamwork by enabling students to find connections and avenues for collaboration across different disciplinary skillsets, knowledges, and methods to establish shared understandings of how AI operates in society and develop effective strategies for using AI in the workplace.

Ancient Languages and Cultures - MA, MS

Program Overview

College
College of Arts & Sciences

Department
History, Cultures & Ideas

Program Level
Graduate

About this Degree

The MA and MS in Ancient Languages and Cultures (ALC) focus on the historical methods and ancient languages necessary to prepare students for admission to and success at doctoral programs in fields that require those skills. These fields include classics; ancient, medieval, and early modern history; religious studies; and related disciplines in literature, theology, divinity, philosophy, and art history. For students who wish to build on their undergraduate education in ancient languages and cultures, this degree offers a chance to gain access to premier universities and lay the foundation for a successful academic career.

Our classics faculty have specialties in ancient history, intellectual history and classical drama. Other faculty members participating in the program have specialties in Hinduism, Buddhism, Islam, early modern Europe, as well as African, Latin American, and environmental history. Professors work with students individually to design a course of study tailored to the students' needs.

This is an in-person, terminal Master's program normally conducted over the course of two years. Options for part-time students are also available. For more information on the program and admission requirements, visit https://www.usu.edu/degrees-majors/ancient-languages-and-cultures_ms_ma.

Admission Requirements for this Program

https://www.usu.edu/degrees-majors/ancient-languages-and-cultures_ms_ma

Program Requirements

Total Credits Required In Program Coursework
30

Total Credits Required To Earn This Credential
30

Simple Requisites

Program Requirements

To receive a Master's degree in Ancient Languages and Cultures, students must demonstrate reading competency by successfully completing six or more credits of graduate coursework in Latin, Greek, or another approved historical language.

Additional Requirements

- A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.
- Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of B- or lower will not be accepted for a graduate degree.
- The Program of Study for a master's degree must include at least 15 semester credits at the level of 6000 or above.
- Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000. Students are not allowed more than 12 credits of coursework at the 5000 level.

- The ALC MA/MS degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.
- Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.
- At least 24-semester credits for the ALC MA/MS degree must be from a committee-approved and a School of Graduate Studies-approved Program of Study from Utah State University.
- Successful defense and submission of the thesis or dissertation to the library.
- Approval of academic forms required for master's students by the School of Graduate Studies:

  o Supervisory Committee Approval Form
  o Program of Study

  o Responsible Conduct of Research training, a brief online training on ethical conduct in research that the university requires
  o Thesis Proposal Defense/Approval
  o Appointment for Examination
  o Record of Examination
  o Successful defense and submission of the thesis to the library.
  o Other forms may be required; for details refer to the Graduate Student Handbook.

Plan A Thesis

Type
Completion Requirement

Coursework

The Plan A option for a master's degree requires the preparation and defense of a thesis. The program consists of 30 semester credits beyond the bachelor's degree. Students are required to take the following courses:

Fulfill ALL of the following requirements:

Required HIST Courses (9 credits)

Complete ALL of the following Courses:

- HIST6000 - Historical Methods and Research - 3cr.
- HIST6970 - Thesis Research - 1cr.

NOTE:

1. HIST6970 THESIS RESEARCH (6 credits required)

AND

Required Theory/Methods Course

Complete at least 1 of the following courses:

- HIST6010 - History and Theory - 3cr.
- HIST6020 - Public History - 3cr.
- HIST6030 - Research Seminar - 3cr.
- HIST6420 - Special Topics in Religious History - 3cr.

AND

Electives in History (HIST) or Ancient Languages and Cultures (ALC)

Complete the following:
The remainder (18 credits) of the 30 credits may be taken as electives in History (HIST) or Ancient Languages and Cultures (ALC). Students may complete one course relevant to the degree outside the department. Students may apply a maximum of 4 internship credits earned toward the total credits required for the program. No more than 3 credits of HIST6900 DIRECTED STUDIES Directed Studies may be applied to the degree.

Additional Comments:

Additional Information

Upon arrival at USU, students are urged to meet with the departmental graduate advisor, who will direct them to one or more faculty members with similar interests. Through consultations with the graduate and faculty advisor, the first-year student will form a thesis committee and formulate a course of study. By the end of the first year, students will have submitted to their committees a proposal for the thesis, which they will write under the close supervision of the committee members. The oral defense usually takes place in the spring semester of the second year.

Total Credits Required In Program Coursework
12

Total Credits Required To Earn This Credential
12

Simple Requisites

Program Requirements

American Studies minors must meet and maintain a 2.5 GPA admissions and graduation standard. Courses counted toward the student's major cannot double count toward the American Studies - Minor

Required Courses

Type
Completion Requirement

A. Required Core Courses (3 credits)

Complete ALL of the following Courses:

- ENGL2640 - Race and Ethnicity in the United States (BHU) - 3cr.

B. Disciplinary Area Exploration Courses (6 credits)

Type
Completion Requirement

Disciplinary Area Exploration Courses (6 credits)

Earn at least 6 credits
Students must take **one** course from **two** of the following disciplinary areas **(2 courses total)**:

- American History and Government
- American Literature and Folklore
- American Social Sciences
- American Environmental Studies
- American Art, Media, and Communication Studies

NOTE:
Some classes listed do not specifically note American content in the class title and the content must be approved by the program advisor for the class to be used toward the requirements. Please see advisor for courses that fall under this category.

American History and Government

Complete ANY of the following Courses:

- HIST2700 - United States to 1877 (BAI) - 3cr.
- HIST2710 - United States 1877-Present (BAI) - 3cr.
- HIST2730 - Writing about Indigenous Histories and Cultures (CL2) - 3cr.
- HIST3615 - Latinx History - 3cr.
- HIST3620 - History of Colonial Latin America (DHA) - 3cr.
- HIST3630 - History of Modern Latin America - 3cr.
- HIST3650 - Caribbean History - 3cr. (Inactive)
- HIST3660 - History of Mexico (DHA) - 3cr.
- HIST3670 - Slavery in the Atlantic World (CI) - 3cr.
- HIST3720 - Colonial America - 3cr.
- HIST3730 - American Revolutionary Era - 3cr.
- HIST3740 - Young Empire: United States, 1790s to 1840s - 3cr.
- HIST3750 - Civil War and Reconstruction - 3cr.
- HIST3751 - Trials of Gilded Age America 1877-1900 (DHA/CI) - 3cr.
- HIST3760 - The United States, 1900-1945 (DHA/CI) - 3cr.
- HIST3770 - Contemporary America: World War II to the Cold War - 3cr.
- HIST3840 - The Modern American West (DHA) - 3cr.
- HIST3850 - History of Utah (DHA/CI) - 3cr.
- HIST3910 - Health, Disease, and Medicine in North America (DHA) - 3cr.
- HIST4310 - History of Nationalism - 3cr.
- HIST4510 - American Metropolis: Cities and Suburbs in United States History (DHA) - 3cr.

- JCOM4010 - Mass Communication Ethics (DSS) - 3cr.
- JCOM4020 - Mass Media and Society (DSS) - 3cr.
- JCOM4030 - Mass Media Law (DSS) - 3cr.
- JCOM5420 - The Mass Media and Politics - 3cr.
- MUSC3020 - History of Jazz (DHA) - 3cr.
- MUSC3030 - Rock and Roll-Catalyst for Social Change (DSS) - 3cr.
- PORT3400 - Popular Music in the Portuguese-Speaking World - 3cr.
- PORT4200 - Brazilian Media in Global Context - 3cr.

C. Upper-Division Focus Requirements (6 credits)

Type

Completion Requirement

Upper-Division Focus Requirements (6 credits)

Students must choose two additional courses from any of the disciplinary areas listed above, with strong encouragement to focus these courses in a single disciplinary area. Any of the courses listed above can satisfy this requirement as long as they are at the 3000 level or higher.

Double-counting: Courses cannot be double-counted within the minor. For instance, a student may use ENGL3700 REGIONAL FOLKLORE (DHA)/HIST3700 REGIONAL FOLKLORE (DHA) (Regional Folklore) to count for their "American Literature and Folklore" category requirement, but they cannot also use it to count towards their requirement for two upper-division courses.

Students also have the option of choosing from the following additional courses:

Complete ANY of the following Courses:

- ENGL3020 - Perspectives in Linguistics (DHA) - 3cr.
- ENGL3420 - Fiction Writing - 3cr.
- ENGL3430 - Poetry Writing - 3cr.
- ENGL3440 - Creative Nonfiction Writing - 3cr.
- PHIL2400 - Ethics (BHU) - 3cr.
- PHIL3500 - Healthcare Ethics (DHA) - 3cr.
- PHIL3520 - Business Ethics (DHA) - 3cr.
- ENGL3530 - Children's Literature - 3cr.
- PHIL3550 - Philosophy in the Public Square - 3cr.
- PHIL3580 - Ethics and Economic Life (DHA) - 3cr.
- PHIL3600 - Philosophy of Religion (DHA) - 3cr.
- PHIL3820 - Theories of Sex and Gender (DHA) - 3cr.
- PHIL3990 - Philosophy and Pop Culture (DHA) - 3cr.
- PHIL4310 - Philosophy of Science (DHA) - 3cr.
- PHIL4600 - Philosophy of Law - 3cr.
- PHIL4900 - Philosophy Seminar - 3cr.
- RELS1010 - Introduction to Religious Studies (BHU) - 3cr.
- RELS3010 - Introduction to Buddhism (DHA) - 3cr.
- RELS3020 - Introduction to Hinduism (DHA) - 3cr.
- RELS3030 - Introduction to Islam (DHA) - 3cr.
- RELS3050 - Introduction to Christianity (DHA) - 3cr.
- RELS3060 - Introduction to Judaism (DHA) - 3cr.
- RELS3080 - Mormonism and the American Religious Experience (DHA) - 3cr.
- RELS4790 - American Religious History - 3cr.
- RELS4910 - Special Topics in Religious Studies - 1cr.
- TCR3100 - Workplace Research - 3cr.
- TCR3220 - Technical Editing (CI) - 3cr.
- TCR4220 - Technology and Activism - 3cr.

Aircraft Maintenance Technician - Airframe & Powerplant - AAS

Program Overview

College
College of Agriculture & Natural Resources

Department
Aviation Technology

Program Level
Undergraduate

About this Degree
This two-year technical program, leading to an Associate of Applied Science (AAS) degree, emphasizes aircraft repair and maintenance. FAA regulations require students to earn a 70% or higher score to pass each course.

In addition, students must complete General Education requirements for the AAS degree. Federal Aviation Administration airframe and powerplant certification is available without General Education requirements.

- For more information about Aircraft Maintenance Technician - Airframe & Powerplant, see the department website.
- Current and admitted students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.

Admission Requirements for this Program
- New freshmen must be admitted to USU in Good Standing.
- Transfer students from other institutions or other programs at USU must have a 2.0 GPA.

Animal Biotechnology - Minor

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Animal, Dairy & Veterinary Sciences	Undergraduate

About this Degree
The Animal Biotechnology Minor at Utah State University provides students with knowledge and training in areas that are important for careers in the life science industry. This minor provides basic knowledge and hands-on learning of critical biotechnology techniques and procedures.

Admission Requirements for this Program
Students must maintain a 2.5 GPA in ADVS courses. Transfer students must have a minimum of one 3-credit upper-division course in residency with the approval of the ADVS academic advisor.

Program Requirements

Total Credits Required To Earn This Credential
15

Simple Requisites

Program Requirements

The following is a listing of courses for the minor emphasis are. A specific course may not be used to fulfill the requirements of more than one ADVS minor.

A minimum grade of *C* is required in all courses applied toward this minor.

Section 1

Type
Completion Requirement

Requirements

Complete ALL of the following Courses:
- ADVS3200 - Ethical Issues in Genetic Engineering and Biotechnology (DSC) - 3cr. (Inactive)
- ADVS5160 - Methods in Biotechnology: Cell Culture - 3cr. (Inactive)
- ADVS5260 - Methods in Biotechnology: Molecular Cloning - 3cr. (Inactive)
- ADVS5280 - Animal Molecular Biology - 3cr. (Inactive)
- ADVS5650 - Science Communication - 3cr.

Anthropology and Cultural Resource Management - PhD

Program Overview

College
College of Arts & Sciences

Department
School of Social Sciences

Program Level
Graduate

About this Degree

The PhD program in Anthropology and Cultural Resource Management trains a new generation of scholars to engage with and manage cultural resources and their derivative data in a time of rapidly changing political and biophysical environments. The program design meets the logistical, intellectual, and economic needs of 21st-century students by providing access to a blended post-graduate education built around skill-based certifications and the advanced degrees required by academia and for professional practice in government and private-sector cultural resource management (CRM).

Students who complete a doctoral program in Anthropology and Cultural Resource Management will have the skills necessary to identify, interpret, and conserve cultural resources; analyze the interplay between humans and their environment; and communicate the importance of cultural resources and long-term population data to various stakeholders. The program leverages USU faculty strengths in social-ecological and evolutionary theory, data analytics, cultural resource management, and museum studies to create student-centered outcomes focused on transferable skills and competencies in theory, data analytics, and communication.

Contacts

Graduate Program Directors: Dr. Judson Finley and Dr. Jacob Freeman
Graduate Program Coordinator: Megan Sills

Admission Requirements for this Program

The PhD program in Anthropology admits students in Fall semesters only, with an application deadline of December 20 of the previous year. Admission requirements include:

- Official transcripts from all previous higher educational institutions attended. A bachelor's degree in an accredited U.S. college or university or a similarly recognized international university is required for admission to the PhD program, and a master's degree is preferred.
- A degree in anthropology is not required but preference is given to students who demonstrate a background in anthropology or another social science.
- Three letters of recommendation from individuals familiar with the applicant's accomplishments and potential for success in graduate school.
- An example of the applicant's written work.
- A statement of purpose (1-2 pages)
- A CV or resume
- Completion of Archaeological Field School (this may be indicated in Resume/CV)
- GRE scores may be provided but are not required
- International students must provide TOEFL or IELTS scores as proof of English proficiency

For additional information on admissions, please visit the School of Graduate Studies https://gradschool.usu.edu/admissions/

Simple Requisites

Program Requirements

SCHOOL OF GRADUATE STUDIES REQUIREMENTS

Degree Verification: A bachelor's and/or master's degree from an accredited U. S. college or university or a similarly recognized international university is required for admission to and completion of the PhD in Sociology.

Course Number Acceptability: All courses applied to a graduate degree should be 6000-level or higher, but the sociology program will accept up to 6 credits of 5000-level courses.

Overall Graduate GPA at least 3.0 and no grades of C- or lower: All PhD coursework must be completed with a grade of B or higher. Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree. Exceptions for grades below a B can be offered for a maximum of 6 credits, at the discretion of the supervisory committee.

Matriculation Start Semester: A doctoral degree must be completed within eight years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost for Graduate Studies for review.

Coursework Validity: Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated by the School of Graduate Studies.

Transfer Credits: We generally do not accept courses transferred from other graduate programs to count towards required credits in the PhD program. However, with approval of the supervisory committee and graduate program director, a maximum of 6 transfer credits may be accepted.

Dissertation Research Credits 6970: Students entering with a master's degree must complete a minimum of 12 credits of Dissertation Research. Students entering with a bachelor's degree must complete a minimum of 18 credits of Dissertation Research. A maximum of 21 Dissertation Research credits may be applied to the PhD.

Academic Forms: Completion of the PhD requires the approval of the following forms by the School of Graduate Studies:

- Supervisory Committee
- Program of Study
- Application for Candidacy
- Appointment for Examination
- Authorship & Copyright
- Format and Style
- Title Page
- Graduation Application

Additionally, all PhD degree students must complete Responsible Conduct of Research training prior to forming their supervisory committees.

PHD IN ANTHROPOLOGY REQUIREMENTS

All PhD students, regardless of track, will complete written comprehensive examinations, successfully defend a dissertation proposal, and defend and complete a PhD dissertation.

The PhD program has two separate tracks:

1. For students who hold a master's degree from an accredited U.S. college or university or a similarly recognized international university.
2. For students who hold a bachelor's degree but no master's at the time of admission.

The separate tracks include customizable curricular pathways made up of a Traditional required core or Certificate-Based required cores. Students may select the pathway (Traditional or Certificate-based) and tailor elective coursework in a manner that best suits their research interests. Pathway selection and elective coursework must approved by the supervisory committee and added to a Program of Study.

Section 1: Requirements for Students Entering With a Master's Degree

Type
Completion Requirement

Requirements (68-72)

Earn at least 68 credits
PhD students who have already earned a master's degree in Anthropology or a closely related field are required to earn a minimum 33 credits from USU to complete their doctoral degree (30 credits if the student received their MS in Anthropology from USU).

Students can follow one of several tracks as they earn a PhD. These include a traditional PhD consisting of a suite of core and elective courses, or a student can combine two certificates with a set of core courses. Students can also base their degrees on a single certificate, but in such cases, will need to choose an additional six elective courses to round out their degree. Regardless of the format, a Doctoral degree consists of 68-72 credit hours of coursework, comprehensive exams, internship, and dissertation. A minimum of 12 dissertation credits is required if the student has a master's degree and a minimum of 18 dissertation credits is required if the student is entering the program with only a bachelor's degree. The semesters during which a student registers for dissertation credit should correspond as closely as possible to the semesters in which the dissertation work is done and faculty supervision is provided.

Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 6000.

1. Traditional Track

Fulfill ALL of the following requirements:

Required Core Courses

Complete ALL of the following Courses:

- ANTH6200 - Anthropological Perspectives on Conservation - 3cr.
- ANTH6340 - Archaeology of the Desert West - 3cr.
- ANTH6350 - Archaeological Theory - 3cr.
- ANTH6390 - Cultural Resources Management Policy - 3cr.
- ANTH6410 - Writing for Archaeologists - 3cr.
- ANTH6700 - Archaeology Internship - 2cr.

AND

Methods Electives (27 credits)

Earn at least 27 credits from the following:

- ANTH6250 - Problems in Bioarchaeology - 3cr.
- ANTH6320 - Zooarchaeology - 3cr.
- ANTH6330 - Geoarchaeology - 3cr.
- ANTH6370 - GIS in Archaeology - 3cr.
- ANTH6400 - Collections Management - 1cr.
- ANTH6420 - Lithic Analysis - 1cr.
- ANTH6430 - Archaeometry - 3cr.
- ANTH6460 - Engaging Communities in Archaeology - 3cr.

2. Certificate Concentration Track

Students can can combine two certificates (18 credits each for a total of 36 credits) with a set of core courses to be determined in consultation with supervisory committee. Students can also base their degrees on a single certificate (18 credits), but in such cases, will need to choose an additional six elective courses to round out their degree.

Complete at least 2 of the following programs:

- CRMP_PBC - Cultural Resource Management Policy, Advocacy and Business Administration - Post-Bachelor's Certificate
- ARDA_PBC - Archaeological Data Analytics - Post-Bachelor's Certificate
- MACM_PBC - Museum Administration and Collections Management - Post-Bachelor's Certificate

3. Dissertation Research (12 credits)

Earn at least 12 credits from the following:

- ANTH6970 - Thesis Research - 1cr.

4. Archaeology Field School

Please note: an approved field school or equivalent experience is required for admission as a matriculated student. Field school credits do not count toward the MS degree.

Complete ALL of the following Courses:

- ANTH6300 - Archaeology Field School - 6cr.

Section 2: Requirements for Students Entering with a Bachelor's Degree

Type
Completion Requirement

Program Requirements

Earn at least 59 credits
Exceptionally well-qualified applicants who have completed an undergraduate degree in Anthropology or a closely related discipline and who demonstrate outstanding potential for success in the pursuit of doctoral-level training may be considered for admission directly into the PhD program. A minimum of 59 credits beyond the Bachelor's degree are required for the doctoral degree for students who enter the program without first completing a master's degree.

Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 6000.

Specific minimum requirements include the following:

1. Traditional Track

Fulfill ALL of the following requirements:

Core Required Courses

Complete ALL of the following Courses:

- ANTH6200 - Anthropological Perspectives on

Conservation - 3cr.
- ANTH6340 - Archaeology of the Desert West - 3cr.
- ANTH6350 - Archaeological Theory - 3cr.
- ANTH6360 - Research Design and Quantitative Methods in Archaeology - 3cr.
- ANTH6390 - Cultural Resources Management Policy - 3cr.
- ANTH6410 - Writing for Archaeologists - 3cr.
- ANTH6700 - Archaeology Internship - 2cr.

AND

Methods Electives (27 credits)

Earn at least 27 credits from the following:
- ANTH6250 - Problems in Bioarchaeology - 3cr.
- ANTH6320 - Zooarchaeology - 3cr.
- ANTH6330 - Geoarchaeology - 3cr.
- ANTH6370 - GIS in Archaeology - 3cr.
- ANTH6400 - Collections Management - 1cr.
- ANTH6420 - Lithic Analysis - 1cr.
- ANTH6430 - Archaeometry - 3cr.
- ANTH6460 - Engaging Communities in Archaeology - 3cr.

2. Certificate Concentration Track

Students have the option to customize their certificate curriculum with the permission of the Graduate Program Director(s) and/or Major professor. Courses not included in any of the listed certificates or Methods Electives must be added to an approved Program of Study.

Complete at least 2 of the following programs:
- ANCR_PHD - Anthropology and Cultural Resource Management - PhD
- ARDA_PBC - Archaeological Data Analytics - Post-Bachelor's Certificate
- MACM_PBC - Museum Administration and Collections Management - Post-Bachelor's Certificate

3. Dissertation Research (18 hours)

Earn at least 18 credits from the following:
- ANTH6970 - Thesis Research - 1cr.

Comprehensive Exams

Complete the following:
Master's degree granted upon completion of comprehensive examinations.

5. Archaeology Field School

Please note: an approved field school or equivalent experience is required for admission as a matriculated student. Field school credits do not count toward the MS degree.

Complete ALL of the following Courses:
- ANTH6300 - Archaeology Field School - 6cr.

Animal and Dairy Sciences - Minor

Program Overview

College
College of Agriculture & Natural Resources

Department
Animal, Dairy & Veterinary Sciences

Program Level
Undergraduate

About this Degree
A minor can be valuable when associated with a major in agricultural education, agricultural economics, plant science, nutrition and food science, business, economics, computer science, rangeland resources, and in other disciplines where the animal industry has direct or indirect involvement.

The Animal and Dairy Sciences Minor offers courses that cover basic principles of livestock production practices, systems and physiology, health and welfare, and topics related to current industry issues. This minor is designed to enrich students' general knowledge in the small animal and/or livestock industries and provide hands-on learning experiences throughout their education. This minor is appropriate for students who are interested in becoming agriculture teachers, working in production agriculture, or broadening their knowledge of animal sciences.

Program Requirements

Total Credits Required In Program Coursework
15

Total Credits Required To Earn This Credential
15

Simple Requisites

Program Requirements

1. Attain a grade point average of at least 2.50 across all ADVS courses.
2. Courses required for the minor may *not* be taken for a *pass/fail* grade except for courses that are only offered as pass/fail.
3. A minimum grade of C is required in all courses applied toward this minor.

The following is a listing of courses for the minor. A specific course may not be used to fulfill the requirements of more than one ADVS minor.

Section 1

Type
Completion Requirement

Required

Complete ALL of the following Courses:
- ADVS1110 - Introduction to Animal Science (BLS) - 3cr.

Choose one Production Course from the following:

Complete at least 1 of the following courses:
- ADVS2010 - Companion Animal Science and Management - 2cr.
  AND ADVS2015 - Companion Animal Science and Management Laboratory - 1cr.
- ADVS2080 - Beef Production Practices - 3cr.
- ADVS2090 - Sheep Production Practices - 3cr.
- ADVS2110 - Poultry Production and Management - 3cr.
- ADVS2120 - Swine Production and Management - 3cr.
- ADVS2130 - Dairy Cattle Production - 3cr.

- ADVS2160 - Introduction to Exotic Animals - 3cr.
- ADVS2190 - Horse Production Practices - 3cr.

NOTE:

1. ***ADVS2010 COMPANION ANIMAL SCI/MGT and ADVS2015 COMP ANIMAL SCI MGMT LAB together count as one course toward this requirement.***

Section 2

Type
Completion Requirement

Choose 9 credits from the following list of ADVS-prefix courses:

The production courses above may also be used to fulfill the 9-credit requirement if not used to fulfill the production course requirement.

Earn at least 9 credits from the following:

- ADVS1050 - Animal, Dairy and Veterinary Science Academic and Career Orientation I - 1cr.
- ADVS1060 - Animal, Dairy, and Veterinary Science Academic and Career Orientation II - 1cr.
- ADVS1100 - Small-Scale and Specialty Animal Production - 3cr.
- ADVS2020 - Companion Animal Nursing - 2cr.
  AND ADVS2025 - Companion Animal Nursing Laboratory - 1cr.
- ADVS2200 - Anatomy and Physiology of Animals - 3cr.
- ADVS2250 - Cooperative Work Experience - 1cr.
- ADVS2500 - Feeds and Feeding - 3cr.
- ADVS3000 - Animal Health and Hygiene - 3cr.
- ADVS3150 - Principles of Equine-Assisted Services - 3cr.
- ADVS3300 - Equine Lower Limb Form and Function - 3cr.
- ADVS3500 - Principles of Animal Nutrition - 3cr.
- ADVS3520 - Equine Nutrition and Exercise Physiology - 3cr.
- ADVS3650 - Live Animal and Carcass Evaluation - 3cr.
- ADVS3910 - Special Topics - 1cr.
- ADVS3920 - Ag Animal Extension Field Experience - 1cr.
- ADVS3930 - Sheep Day - 1cr.
- ADVS3980 - Beef Cattle Handling Practices - 1cr.
- ADVS4200 - Physiology of Reproduction and Lactation (CI) - 4cr.
- ADVS4210 - Applied Reproduction and Artificial Insemination - 2cr.
- ADVS4220 - Applied Equine Reproduction I - 3cr.
- ADVS4250 - Internship in Animal Industry - 1cr.
- ADVS4560 - Principles of Animal Genetics and Breeding (QI) - 3cr.
- ADVS5860 - Poisonous Range Plants Affecting Livestock - 3cr.

NOTE:

1. ***The combined maximum credit for ADVS2250 COOPERATIVE WORK EXPERIENCE and/or ADVS4250 INTERN ANIMAL INDUSTRY is 3 credits.***
2. ***The ADVS3910 SPECIAL TOPICS section accepted for credit toward the minor is titled Dairy Challenge.***
3. ***The following courses from the list above have prerequisites: ADVS2200 ANATOMY AND PHYSIOLOGY ANIMALS, ADVS3000 ANIMAL HEALTH AND HYGIENE, ADVS3300 EQUINE LOWER LIMB, ADVS3500 PRINCIPLES OF ANIMAL NUTRITION, ADVS3520 EQUINE NUTRITION/EXERCISE PHYS, ADVS4200 PHYSIOLOGY REPROD/LACTATN (CI), ADVS4210 APPLIED REPRODUCTION AND A.I., ADVS4220 APPLIED EQUINE REPRODUCTION I, ADVS4560 ANIMAL GENETICS AND BREED (QI)***

Additional Comments:
NOTE:

1. A maximum of 3 credits counted towards the minor may be experiential learning courses (currently ADVS3910 SPECIAL TOPICS Dairy Challenge, ADVS3920 AG ANIMAL FIELD EXP, ADVS3930 SHEEP DAY, and ADVS3980 BEEF CATTLE HANDLING).

Animal and Dairy Sciences - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Animal, Dairy & Veterinary Sciences

Program Level
Undergraduate

About this Degree

The Animal and Dairy Sciences BS degree includes all disciplines of the animal production industry, current scientific applications associated with animal science, and biotechnology associated with the animal science industry.

Students in this program will not only be exposed to multiple disciplines in the classroom but will also have the opportunity for applied experiences in the fields of animal nutrition, reproduction and physiology, breeding and genetics, livestock production management, and animal biotechnology.

The Animal and Dairy Science program offers students hands-on experiences with beef cattle, dairy cattle, horses, sheep, goats, and pigs.

- For more information about the Department of Animal, Dairy & Veterinary Sciences, see the website.
- If you are a new/entering student, we strongly recommend reviewing the suggested degree map.
- Admitted and current students must meet with an advisor (see below).
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL).

Students with last names A-L: Contact Allie East at allie.east@usu.edu, 435-797-2194, or here for advising.
Students with last names M-Z: Contact Tami Spackman at tami.spackman@usu.edu, 435-797-2150, or here for advising.

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

- CHEM1215 - Chemical Principles Laboratory I - 1cr.
- CHEM1220 - Principles of Chemistry II (BPS) - 4cr.
- CHEM1225 - Chemical Principles Laboratory II - 1cr.
- MATH1050 - College Algebra (QL) - 4cr.
- STAT1040 - Introduction to Statistics (QL) - 3cr.
  OR STAT2000 - Statistical Methods (QI) - 4cr.

NOTE:

1. 3 credits are required for either ADVS 4250 or ADVS 4800.

Management Courses

Complete ANY of the following Courses:

- ADVS5080 - Beef Cattle Management - 3cr.
- ADVS5090 - Sheep Management and Wool Technology - 3cr.
- ADVS5130 - Dairy Cattle Management - 3cr.
- ADVS5190 - Equine Business Management - 2cr.

Production Courses

Complete at least 2 of the following courses:

- ADVS2010 - Companion Animal Science and Management - 2cr.
  AND ADVS2015 - Companion Animal Science and Management Laboratory - 1cr.
- ADVS2080 - Beef Production Practices - 3cr.
- ADVS2090 - Sheep Production Practices - 3cr.
- ADVS2110 - Poultry Production and Management - 3cr.
- ADVS2120 - Swine Production and Management - 3cr.
- ADVS2130 - Dairy Cattle Production - 3cr.
- ADVS2190 - Horse Production Practices - 3cr.

NOTE:

1. ADVS2010 COMPANION ANIMAL SCI/MGT and ADVS2015 COMP ANIMAL SCI MGMT LAB together count as one course toward this requirement.

Elective Course Requirements

Type
Completion Requirement

Directed Electives (24 credits)

Earn at least 24 credits from the following:

- ACCT2010 - Financial Accounting Principles - 3cr.
- ADVS2020 - Companion Animal Nursing - 2cr.
  AND ADVS2025 - Companion Animal Nursing Laboratory - 1cr.
- ADVS2160 - Introduction to Exotic Animals - 3cr.
- ADVS3280 - Applied Animal Molecular & Cellular Biology - 4cr.
- ADVS3300 - Equine Lower Limb Form and Function - 3cr.
- ADVS3520 - Equine Nutrition and Exercise Physiology - 3cr.
- ADVS3650 - Live Animal and Carcass Evaluation - 3cr.
- ADVS3920 - Ag Animal Extension Field Experience - 1cr.
- ADVS3930 - Sheep Day - 1cr.
- ADVS3980 - Beef Cattle Handling Practices - 1cr.
- ADVS4210 - Applied Reproduction and Artificial Insemination - 2cr.
- ADVS4220 - Applied Equine Reproduction I - 3cr.
- ADVS4310 - Animal Growth and Development - 3cr.
- ADVS5020 - One Health: People, Animals, and the Environment - 3cr.
- ADVS5080 - Beef Cattle Management - 3cr.
  OR ADVS5090 - Sheep Management and Wool Technology - 3cr.
  OR ADVS5130 - Dairy Cattle Management - 3cr.
  OR ADVS5190 - Equine Business Management - 2cr.
- ADVS5500 - Applied Animal Nutrition - 2cr.
- ADVS5530 - Nutrient Metabolization & Utilization - 3cr.
- ADVS5620 - Advanced Animal Physiology - 3cr.
- ADVS5630 - Endocrinology (CI) - 3cr.
- ADVS5650 - Science Communication - 3cr.
- ADVS5710 - Conceptualizing the Human-Animal Bond - 3cr.
- ADVS5720 - Animal-Assisted Interventions and Special Populations - 3cr.
- ADVS5730 - Welfare and Behavior of Animals in Animal-Assisted Interventions - 3cr.
- ADVS5860 - Poisonous Range Plants Affecting Livestock - 3cr.
- APEC1400 - Introduction to Agriculture Policy (BSS) - 3cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC2500 - Commodity Futures and Options Trading and Analysis - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- ASTE3600 - Data Management of Agricultural Systems (QI) - 3cr.
- BIOL3060 - Principles of Genetics (QI) - 3cr.
- BIOL3300 - General Microbiology - 3cr.
- BUSN2050 - Business Law - 3cr.
- BUSN2320 - Small Business Management - CTE - 3cr.
- CHEM2310 - Organic Chemistry I - 4cr.
- CHEM2315 - Organic Chemistry Laboratory I - 1cr.
- CHEM2320 - Organic Chemistry II - 4cr.
- CHEM3700 - Introductory Biochemistry - 3cr.
- DATA2100 - Data and Information in Business - 3cr.
- MATH1100 - Calculus Techniques (QL) - 3cr.
  OR MATH1210 - Calculus I (QL) - 4cr.
- MSLE3110 - Managing Organizations and People (DSS) - 3cr.
- MSLE3500 - Fundamentals of Marketing - 3cr.
- MSLE3510 - New Venture Creation - 3cr.
- MSLE3530 - New Venture Marketing - 3cr.
- MSLE3540 - New Venture Finance - 3cr.
- MSLE3580 - New Venture Execution - 3cr.
- NDFS5020 - Meat Science and Technology - 4cr.
- PHYS2110 - General Physics—Life Sciences I - 4cr.
- PHYS2120 - General Physics - Life Sciences II (BPS) - 4cr.
- PSC2010 - Soils, Waters, and the Environment (BPS) - 3cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.
- PSC4320 - Forage Production and Pasture Management - 3cr.
- STAT3000 - Statistics for Scientists (QI) - 3cr.
- WILD4000 - Principles of Rangeland Management - 3cr.
- WILD5340 - Range Ruminant Nutrition and Management - 3cr.

NOTE:

1. ADVS3930 SHEEP DAY may be taken for 1 or 2 credits.
2. A maximum of 6 directed elective credits may be experiential learning courses (currently ADVS3920 AG ANIMAL FIELD EXP, ADVS3930 SHEEP DAY, and ADVS3980 BEEF CATTLE HANDLING).

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your academic advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.

- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Agriculture and Natural Resources Pre-Law - Minor

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree

The Agriculture and Natural Resources Pre Law minor at Utah State University provides students with a foundation in agriculture, natural resources, and law.

The program equips students with the knowledge and skills necessary to pursue careers or further education in law and policy related to agriculture and natural resources.

Students will gain an understanding of agricultural and natural resource law, policy analysis, legal and ethical environment of business, and United States government and politics. They can also choose electives from a range of topics, such as law and economics, environmental policy, natural resources law, employment law, and constitutional theory.

Program Requirements

17

Total Credits Required To Earn This Credential
17

Simple Requisites

Program Requirements

To graduate with a minor in Agriculture and Natural Resources Pre Law, students must have an overall GPA of 2.5 or higher.

Agriculture and Natural Resources Pre Law Minor Requirements (17 credits)

Type
Completion Requirement

Required Courses

The following courses are required for all students in this program:

Complete ALL of the following Courses:

- APEC2900 - Agricultural and Natural Resource Law - 3cr.
- APEC5950 - Applied Economics Policy Analysis - 3cr.
  OR APEC5940 - U.S. Agricultural Policy Analysis - 3cr.
- MGT3350 - Legal and Ethical Environment of Business - 3cr.
- POLS1100 - United States Government and Politics (BAI) - 3cr.

Elective Options

Students may select the balance of their 17 required credits from the following courses:

Complete ANY of the following Courses:

- APEC4250 - Applied Economics Internship - 1cr.
- ECON3550 - Law and Economics - 3cr.
- ENVS3010 - Natural Resource and Environmental Policy - 3cr.
- ENVS5300 - Natural Resources Law and Policy - 2cr.
- IOGP5910 - Campaign Internship - 1cr.
- MGT3810 - Employment Law (DSS) - 3cr.
- NDFS5510 - Food Laws and Regulations - 3cr.
- POLS4130 - Constitutional Theory - 3cr.
- POLS4160 - The First Amendment - 3cr.
- POLS5130 - Law and Policy - 3cr.

Anthropology - Minor

Program Overview

College	Department	Program Level
College of Arts & Sciences	School of Social Sciences	Undergraduate

Program Requirements

Total Credits Required To Earn This Credential
18

Simple Requisites

Program Requirements

A minimum of 18 credits is required for the anthropology minor. A minimum of 12 anthropology credits counting toward the minor must be Utah State University courses. Credits from distance and residence center courses are subject to departmental approval for application toward the anthropology minor. Students must maintain a minimum 2.5 overall GPA in anthropology courses. A grade of C or better must be attained in all courses counting toward the minor.

Section 1

Type
Completion Requirement

Required Courses (9 credits)

Complete ALL of the following Courses:

- ANTH1010 - Cultural Anthropology (BSS) - 3cr.
- ANTH1020 - Biological Anthropology (BLS) - 3cr.
- ANTH1030 - World Archaeology (BSS) - 3cr.

Section 2

Type
Completion Requirement

Breadth-in-Anthropology Structured Track Electives; Groups 1, 2, or 3 (9 credits minimum)

Earn at least 9 credits
In addition to the required courses, students must complete a minimum of 9 credits (ANTH2010 PEOPLES OF THE WORLD (BSS), 3000-5000 level courses) in anthropology from the ***Structured Track Courses*** in: (1) Cultural/Applied Anthropology; (2) Biological Anthropology; and/or (3) Archaeology/Cultural Resource Management. ***Departmental electives do not count toward minor requirements.***

Anthropology - BA, BS

Program Overview

College	Department	Program Level
College of Arts & Sciences	School of Social Sciences	Undergraduate

About this Degree
Anthropology is the study of all cultures across time and space. Through comparative studies, anthropologists determine how people of the world are similar and different. They engage in issues relating to modern society, such as health care, human rights, law, urban development, and global population. The program focuses on the subdiscipline areas of cultural anthropology, biological anthropology, linguistics, and archaeology.

Students studying anthropology at Utah State University are prepared for careers in numerous fields through the skills and knowledge they gain in both the liberal arts and natural sciences. Graduates of USU's anthropology program are in-depth thinkers with effective reading and writing skills and the ability to solve problems across the humanities and natural sciences.

The program is cross-disciplinary and gives students the chance to participate in state-of-the-art research and hands-on learning through high-tech labs and real-world fieldwork experience. Class sizes are generally small, which enables students to receive extensive individualized attention. Designed to give students a full range of experience, this unique program helps undergraduates gain skills and expertise usually available to graduate students.

- For more information about Anthropology, see the Department of Sociology, Anthropology and Criminal Justice website.
- Admitted and current students must meet with an academic advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT1040 INTRO TO STATISTICS (QL) or STAT1045 INTRO STAT WITH ALGEBRA (QL) or STAT1080 FOUNDATIONS OF DATA SCI (QL).

Bachelor of Arts Degree
In addition to completing the Bachelor of Science (BS) degree requirements, students desiring a (BA) Bachelor of Arts degree must complete the language proficiency requirements in one of the following ways:

- Demonstration of proficiency in *one* foreign language by successful completion of one course at the 2020-level or higher (or its equivalent) **OR**
- Demonstration of proficiency in American Sign Language by successful completion of American Sign Language IV (ASL4920 AMERICAN SIGN LANGUAGE IV) and Socio-Cultural Aspects of Deafness (ASL4780 DEAF CULTURE), and by passing an exit interview **OR**
- Demonstration of proficiency in *two* foreign languages by successful completion of the 1020 course level in one language ***and*** the 2010 course level in the second language (or its equivalent) **OR**
- Completion of an upper-division (3000-level or higher) foreign language grammar or literature course requiring the 2020 course level (or its equivalent) as a prerequisite. Conversation courses *cannot* be considered for satisfying this requirement.

For nonnative English-speaking students *only*, the following options are available:

- Successful completion of the Intensive English Language Institute (IELI) program for international students **OR**
- TOEFL, Michigan, or IELI placement scores high enough to meet the University admission criteria.

Bachelor of Science Degree

Students desiring a (BS) Bachelor of Science degree must complete all requirements listed in the core requirements below.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing.
- Transfer students from other institutions or other programs at USU must have a 2.50 GPA.

Program Requirements

Total Credits Required In Program Coursework
40-43

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

Minimum GPA for Graduation: 2.5 for major requirements, including BS and BA required courses; 2.0 USU GPA, 2.0 Career GPA
Minimum Grade Accepted: C in major requirements, including BS and BA required courses
Number of Required Credits: 40-43
Students majoring in Anthropology must maintain a minimum 2.5 overall GPA in Anthropology courses.

- A **Bachelor of Arts** degree requires foreign language training or demonstration of proficiency in one language, which may be satisfied in a number of ways, including successful completion of one course at the 2020-level or higher (or its equivalent) or demonstration of proficiency in American Sign Language or demonstration of proficiency in two foreign languages by successful completion of the 1020 course level in one language and the 2010 course level in the second language (or its equivalent). For further information, see the General Catalog discussion of Undergraduate Academic Credential Requirements.
- Students planning to receive a **Bachelor of Science** degree must complete STAT1040 INTRO TO STATISTICS (QL), STAT1045 INTRO STAT WITH ALGEBRA (QL), STAT1080 FOUNDATIONS OF DATA SCI (QL), or another approved statistics course; and two courses selected from a list of courses approved by the Anthropology program (see below).
- A total of 40 credits are required for General Anthropology majors as well as for majors choosing the Biological; Cultural; or Environmental Change, Community Engagement, and Wellness Anthropology tracks. A total of 43 credits are required for majors choosing the Archaeology/CRM track. See below for details.
- **Residence**: A minimum of 21 credits of the Anthropology course credits counting toward the major must be Utah State University courses. Credits from distance and residence center courses are subject to departmental approval for application toward the Anthropology major, with the exception of those listed below.
- **Methods Component**: Majors must complete one "Methods" course (3 credits) in Anthropology. The course chosen to meet this requirement may also count toward other Anthropology major requirements.
- **Credit Totals and Distribution**: A minimum of 40 credits is required for the Anthropology major (43 credits for the archaeology track). All students are required to take the five core courses below (see required courses section) for a total of 12 credits. Additionally, students take 27-30 credits of structured electives as outlined in the "Anthropology Tracks and General Anthropology Options" section below.

Anthropology - BA, BS

Type
Completion Requirement

Courses Required of All Anthropology Majors (12 credits)

Each student is required to take a set of four core courses, which introduce them to USU's Anthropology program resources, the subfields of Anthropology, and the history and theories of Anthropology.

Complete ALL of the following Courses:

- ANTH1010 - Cultural Anthropology (BSS) - 3cr.
- ANTH1020 - Biological Anthropology (BLS) - 3cr.
- ANTH1030 - World Archaeology (BSS) - 3cr.
- ANTH4980 - History and Theories of Anthropology - 3cr.

Anthropology Tracks and General Anthropology Options (27-30 credits)

Type
Completion Requirement

General Anthropology

Complete the following:
Students are encouraged (but not required) to select a track from among the four subspecialties in Anthropology (Cultural/Applied Anthropology; Biological Anthropology; Environmental Change, Community Engagement, and Wellness Anthropology; or Archaeology/CRM—listed below). Students who choose the "General Anthropology" option (e.g., those students who do not wish to specialize in any of the four listed tracks) complete 27 credits from any of the courses listed in 1-4 below.

Cultural Track

Complete the following:
Students who choose to complete the track option in Cultural Anthropology are required to obtain broad knowledge outside their track as well as a depth of knowledge within their track. To do this, they must successfully complete a minimum of six courses equally distributed from the Archaeology, Biological Anthropology, and Cultural Anthropology tracks (listed in 1-3 below for a total of 18 credits) as well as three additional courses from the Cultural Track (listed in 1 below, for a total of 9 credits).

Cultural Track (27 credits)

Type
Completion Requirement

1. Cultural/Applied Track

Earn at least 27 credits from the following:

- ANTH1090 - Introduction to Interfaith Leadership (BHU) - 3cr.
- ANTH2010 - Peoples of the Contemporary World (BSS) - 3cr.
- ANTH3090 - Introduction to Shamanism: Shamanic Healing for Personal and Planetary Transformation - 3cr.
- ANTH3110 - North American Indian Cultures (DSS) - 3cr.
- ANTH3130 - Peoples of Latin America (CI) - 3cr.
- ANTH3140 - Anthropology of Sex and Gender (DSS) - 3cr.
- ANTH3150 - Applied Anthropology Survey: History, Uses,

Methods, and Careers - 3cr.
- ANTH3160 - Anthropology of Religion (DSS) - 3cr.
- ANTH3165 - Bridging Religious Difference in Theory and Practice: an Introduction to Interfaith Leadership - 3cr.
- ANTH3180 - Peoples of the Middle East (DSS) - 3cr.
- ANTH4120 - Anthropology of Childhood (DSS/CI) - 3cr.
- ANTH4130 - Introduction to Medical Anthropology (DSS) - 3cr.
- ANTH4150 - Cognition, Stress, and Health - 3cr.
- ANTH4160 - Evolution of Religion: The Cognitive Science of Religion and Faith - 3cr.
- ANTH4250 - Behavioral Ecology - 3cr.
- ANTH4800 - Topics in Anthropology - 1cr.
- ANTH4990 - Contemporary Issues in Anthropology (CI) - 3cr.
- ANTH5110 - Southwest Indian Cultures, Past and Present (DSS) - 3cr.
- ANTH5130 - Ethnographic Field School - 3cr.
- ANTH5170 - Ethnographic Methods in Anthropology - 3cr.
- ANTH5190 - Applied Anthropology Practicum - 1cr.
- ANTH5200 - Anthropological Perspectives on Conservation - 3cr.
- ANTH5650 - Developing Societies (DSS) - 3cr.
- ANTH5900 - Independent Studies - 1cr.

NOTE:

1. ANTH3150 APPLIED ANTHROPOLOGY SURVEY, ANTH4120 ANTH OF CHILDHOOD (DSS)(CI), ANTH5170 ETHNOGRAPHIC METHODS, ANTH5130 ETHNOGRAPHIC FIELD SCHOOL, ANTH5190 APPLIED ANTHROPOLOGY PRACTICUM - Are methods courses.
2. ANTH4800 TOPICS ANTHROPOLOGY - Topics: Peoples of Africa, Anthropology of Tourism & Development, Nomads, Tourists & Refugees.

Biological Track (27 credits)

Type
Completion Requirement

2. Biological Anthropology

Students who choose to complete the track option in Biological Anthropology are required to obtain broad knowledge outside their track as well as a depth of knowledge within their track. To do this, they must successfully complete a minimum of six courses equally distributed from the Archaeology, Biological Anthropology, and Cultural Anthropology tracks (listed in 1-3 below for a total of 18 credits) as well as two additional courses from the Biological Track (listed in 2 below, for a total of 6 credits). Also recommended: BIOL 1610, BIOL 1620, BIOL 2320, BIOL 2420. A Biological track-specific capstone (3 credits) completes the required 27 credits. Capstone courses may not be offered every year, so students should schedule their coursework accordingly.

Earn at least 27 credits from the following:
- ANTH3200 - Perspectives on Race (DSS/CI) - 3cr.
- ANTH3225 - Sex, Evolution, and Health (DSC) - 3cr.
- ANTH3240 - Anthropology of Disease (DSC) - 3cr.
- ANTH3250 - Osteology - 3cr.
- ANTH4200 - The Anthropology of War - 3cr.
- ANTH5200 - Anthropological Perspectives on Conservation - 3cr.
- ANTH4240 - Primates of the World - 3cr.
- ANTH4250 - Behavioral Ecology - 3cr.
- ANTH5210 - Women's Reproductive Health Research - 3cr.
- ANTH5250 - Problems in Bioarchaeology (QI) - 3cr.
- BIOL2320 - Human Anatomy - 4cr.

NOTE:

1. ANTH3250 OSTEOLOGY - Is a methods course.
2. ANTH5250 PROBLEMS BIOARCHAEOLOGY (QI) - Is a methods course, and counts as a track course, capstone, or BS requirement.
3. BIOL2320 HUMAN ANATOMY - Cannot double count as BS requirement.

Biological Anthropology Capstone

Complete ALL of the following Courses:
- ANTH5250 - Problems in Bioarchaeology (QI) - 3cr.
  OR ANTH5210 - Women's Reproductive Health Research - 3cr.

Archaeology Track (30 credits)

Type
Completion Requirement

3. Archaeology/Cultural Resource Managemen

Students who choose to complete the track option in Archaeology are required to obtain broad knowledge outside their track as well as a depth of knowledge within their track. To do this, they must successfully complete a minimum of two courses each from Biological and Cultural Anthropology (12 credits), plus a required Archaeology core (12 credits). Additionally, students complete Archaeology-Structured Electives (6 credits) for a total of 30 credits.

Complete the following requirements:

Archaeology Track Required Core (12 credits)

Complete ALL of the following Courses:
- ANTH2030 - Principles of Archaeology (BSS) - 3cr.
- ANTH5300 - Archaeology Field School - 6cr.
- ANTH5340 - Archaeology of the Desert West - 3cr.

NOTE:

1. ANTH5300 ARCHAEOLOGY FIELD SCHOOL is a methods course.

Archaeology Track Required Electives (6 credits)

Earn at least 6 credits from the following:
- ANTH3340 - Geographic Information Science for Anthropology (QI) - 3cr.
- ANTH5320 - Zooarchaeology - 3cr.
- ANTH5330 - Geoarchaeology - 3cr.
- ANTH5420 - Lithic Analysis - 1cr.

NOTE:

1. All courses listed above are methods courses.

Archaeology Electives for Non-Archaeology Tracks

Applied as archaeology elective for General, Biological or Cultural track students.

Complete ALL of the following Courses:
- ANTH3300 - Archaeology in North America (DSS) - 3cr.
- ANTH3310 - Introduction to Museum Studies (CI) - 3cr.

- ANTH3320 - Archaeology of Climate Change (DSS) - 3cr.
- ANTH3330 - Geophysical Survey Systems for Archaeology - 3cr.
- ANTH3350 - Archaeology of Ancient Civilizations (DSS) - 3cr.
- ANTH3360 - Utah Archaeology (DSS) - 3cr.
- ANTH3370 - Archaeology of Prehistoric Europe (DSS) - 3cr.
- ANTH3380 - Archaeology Field Trip - 1cr.
- ANTH4330 - Archaeology of Latin America (DSS) - 3cr.

Environmental Change, Community Engagement, and Wellness Track (27 credits)

Type
Completion Requirement

4. Anthropology of Environmental Change, Community Engagement, and Wellness

Students who choose to complete the track option in Environmental Change, Community Engagement, and Wellness are required to obtain broad knowledge of multiple disciplines. To do this, they must successfully complete a minimum of two courses from all three course categories included in the track (for a total of 18 credits) as well as 9 additional credits of track electives. Students must complete all required courses, six credits in each area, and nine credits of track electives.

Complete the following:

Environmental Change (6 credits)

Earn at least 6 credits from the following:

- ANTH3320 - Archaeology of Climate Change (DSS) - 3cr.
- ANTH3340 - Geographic Information Science for Anthropology (QI) - 3cr.
- ANTH5200 - Anthropological Perspectives on Conservation - 3cr.

Heritage Studies and Community Engagement (6 credits)

Earn at least 6 credits from the following:

- ANTH1090 - Introduction to Interfaith Leadership (BHU) - 3cr.
- ANTH3150 - Applied Anthropology Survey: History, Uses, Methods, and Careers - 3cr.
- ANTH3310 - Introduction to Museum Studies (CI) - 3cr.
- ANTH5800 - Museum Development - 1cr.

Wellness (6 credits)

Earn at least 6 credits from the following:

- ANTH3240 - Anthropology of Disease (DSC) - 3cr.
- ANTH4130 - Introduction to Medical Anthropology (DSS) - 3cr.

Track Electives (9 credits)

Earn at least 9 credits from the following:

- ANTH2010 - Peoples of the Contemporary World (BSS) - 3cr.
- ANTH3110 - North American Indian Cultures (DSS) - 3cr.
- ANTH3140 - Anthropology of Sex and Gender (DSS) - 3cr.
- ANTH3160 - Anthropology of Religion (DSS) - 3cr.
- ANTH3200 - Perspectives on Race (DSS/CI) - 3cr.
- ANTH3300 - Archaeology in North America (DSS) - 3cr.
- ANTH3330 - Geophysical Survey Systems for Archaeology - 3cr.
- ANTH3360 - Utah Archaeology (DSS) - 3cr.

• Additional courses approved on a case-by-case basis.

Non-Track Specific Electives

Type
Completion Requirement

Electives

These do not count toward minor requirements. Some ANTH4800 TOPICS ANTHROPOLOGY courses count toward track credits as noted above. Some methods courses require permission of instructor.

Complete ANY of the following Courses:

- ANTH2210 - Introduction to Folklore (BHU) - 3cr.
- ANTH2720 - Survey of American Folklore - 3cr.
- ANTH3180 - Peoples of the Middle East (DSS) - 3cr.
- ANTH3310 - Introduction to Museum Studies (CI) - 3cr.
- ANTH3550 - Culture of East Asia (DHA) - 3cr.
- ANTH4100 - The Study of Language - 3cr.
- ANTH5700 - Folk Narrative - 3cr.
- ANTH5800 - Museum Development - 1cr.
- ANTH5900 - Independent Studies - 1cr.
- ANTH5980 - Senior Project - 1cr.

NOTE:

1. ANTH2210 INTRO TO FOLKLORE (BHU), ANTH2720 AMERICAN FOLKLORE, ANTH3550 CULTURE OF EAST ASIA (DHA), ANTH4100 STUDY OF LANGUAGE, ANTH5700 FOLK NARRATIVE, and ANTH5900 INDEPENDENT STUDIES - Are not counted toward the major.

Approved Science Courses for Anthropology BS

In addition to STAT 1040 or STAT 1045 or STAT 1080, select two courses from the following list:

Complete ANY of the following Courses:

- ANTH3340 - Geographic Information Science for Anthropology (QI) - 3cr.
- ANTH5250 - Problems in Bioarchaeology (QI) - 3cr.
- BIOL1610 - Biology I - 3cr.
- BIOL1620 - Biology II (BLS) - 3cr.
- BIOL2320 - Human Anatomy - 4cr.
- BIOL2420 - Human Physiology - 4cr.
- BIOL3300 - General Microbiology - 3cr.
- BIOL4000 - Human Dissection - 1cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- CHEM1120 - General Chemistry II (BPS) - 4cr.
- CHEM1210 - Principles of Chemistry I - 4cr.
- CHEM1220 - Principles of Chemistry II (BPS) - 4cr.
- ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- ECON2020 - Introduction to Macroeconomics (BAI) - 3cr.
- ECON3500 - Introduction to International Business and Economics (DSS) - 3cr.
- ECON3530 - Comparative Economic Systems (DSS)(CI) - 3cr.
- ENVS3010 - Natural Resource and Environmental Policy - 3cr.
- ENVS3500 - Environmental Data Science (QI) - 3cr.
- GEO1010 - Introduction to Geology (BPS) - 3cr.
- GEO1110 - Physical Geology (BPS) - 3cr.
- GEO3100 - Natural Disasters (DSC) - 3cr.
- GEO3600 - Geomorphology - 4cr.
- GEOG1000 - Physical Geography (BPS) - 3cr.
- MGT3700 - Operations Management - 3cr.
- MGT3830 - International Law - 2cr.
- MSLE3500 - Fundamentals of Marketing - 3cr.

- MSLE3820 - International Business (DSS) - 3cr.
- MSLE4050 - International Marketing - 3cr.
- PSC2010 - Soils, Waters, and the Environment (BPS) - 3cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.
- PSY3010 - Psychological Statistics (QI) - 3cr.
- PUBH3120 - Family and Community Health - 3cr.
- PUBH3610 - Environmental Management - 3cr.
- PUBH4030 - Communicable Disease Control - 3cr.
- PUBH4040 - Fundamentals of Epidemiology - 3cr.
- SOC3110 - Methods of Social Research (CI) - 3cr.
- SOC3120 - Social Statistics I (QI) - 3cr.
- SOC3200 - Population and Society (DSS) - 3cr.
- SOC3610 - Rural People and Places (DSS) - 3cr.
- SOC4720 - Effective Community Engagement - 3cr.
- SOC5640 - Managing Community Conflict (CI) - 3cr.
- STAT2000 - Statistical Methods (QI) - 4cr.
- STAT3000 - Statistics for Scientists (QI) - 3cr.
- STAT5100 - Modern Regression Methods (CI/QI) - 3cr.
- STAT5200 - Analysis of Designed Experiments - 3cr.
- WILD2200 - Ecology of Our Changing World (BLS) - 3cr.
- WILD5750 - Applied Remote Sensing - 3cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Additional Comments:

Certificates

For students interested in pursuing a certificate in conjunction with their bachelor's program, please see the requirements for the Interfaith Leadership Certificate - Certificate or Museum Studies - Institutional Certificate of Proficiency.

Additional Information

- The University Honors Program offers an unparalleled opportunity to enrich and deepen undergraduate education. Space is limited, and admission is competitive. Honors students enjoy many benefits, including personalized advising, exclusive access to research and study abroad funding, enhanced classroom experiences that also satisfy USU's General Education requirements, priority registration, and membership in a vibrant campus community of students and faculty. For more information about application requirements and deadlines, please visit the Honors website at honors.usu.edu, or speak with the Anthropology Honors Advisor, Professor Jacob Freeman.
- The course subdiscipline within Anthropology is identified by the second digit in the four-digit course number. Cultural Anthropology courses use a 1 (e.g., ANTH3160 ANTH OF RELIGION (DSS)), Biological Anthropology courses use a 2 (e.g., ANTH3200 PERSPECTIVES ON RACE (DSS)(CI)), and Archaeology courses use a 3 (e.g., ANTH3300 ARCHAEOLOGY NORTH AMER (DSS)).

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student
- Check your Degree Works for requirements and completion.

Anthropology - MS

Program Overview

College	Department	Program Level
College of Arts & Sciences	School of Social Sciences	Graduate

About this Degree

USU offers a Master of Science (MS) degree in Archaeology and Cultural Resource Management. Our graduate students gain a personalized education focused on archaeological theory, quantitative methods and Cultural Resource Management (CRM) policy while gaining practical experience which leads directly to successful careers in CRM or further education in PhD programs.

The program is known for its explicitly scientific approach to archaeology. Theoretical perspectives trend toward those offering explanatory potential, such as human behavioral ecology, and faculty topical expertise includes paleoecology/climates, zooarchaeology, geoarchaeology, lithic analysis, and geospatial analysis/remote sensing. Our Archaeology and CRM geographic emphasis includes the mountains and deserts of the American West: southern Idaho, western Wyoming, western Colorado, Utah, Nevada and Montana.

Utah State University's Master of Science in Anthropology is an applied program enabling career advancement in the primary area of employment for archaeologists, Archaeology and Cultural Resource Management. CRM Archaeologists work for private, environmental consulting firms and government agencies, and our students consistently advance into these jobs from the USU graduate program. Our Anthropology MS degree also prepares students for research-based doctoral programs in Anthropology.

We educate and train graduate students who meet the standards of the Register of Professional Archaeologists and who will become project directors and principal investigators. Our core curriculum targets these goals and is supported by elective courses in various archaeological methods and geographic areas that reflect faculty expertise and facilitates student research. Students are mentored to become independent scholars who can design and conduct original research, qualities the CRM industry finds increasingly attractive.

Contacts

Graduate Program Directors: Dr. Judson Finley and Dr. Jacob Freeman

Graduate Program Coordinator: Megan Sills

Admission Requirements for this Program

The MS program in Anthropology admits students in Fall semesters only, with an application deadline of December 20 of the previous year. Admission Requirements include:

- Official transcript indicating a bachelor's degree in an accredited U.S. college or university or a similarly recognized international university.
- Three letters of recommendation from individuals familiar with the applicant's accomplishments and potential for success in graduate school.
- A statement of purpose (1-2 pages)
- A resume or CV
- Completion of Archaeological Field School (this may be indicated in Resume/CV)
- GRE scores may be provided but are not required
- International students must provide TOEFL or IELTS scores as proof of English proficiency

For additional information on admissions, please visit the School of Graduate Studies https://gradschool.usu.edu/admissions/

Simple Requisites

Program Requirements

SCHOOL OF GRADUATE STUDIES REQUIREMENTS

Degree Verification: A bachelor's degree from an accredited U. S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.

Course Number Acceptability: All courses applied to a graduate degree should be 6000-level or higher, but the sociology program will accept up to 6 credits of 5000-level courses.

Overall Graduate GPA at least 3.0 and no grades of C- or lower: Graduate students are required to maintain at least a 3. 0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree. Exceptions for grades below a B can be offered for a maximum of 6 credits, at the discretion of the supervisory committee.

Matriculation Start Semester: A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost for Graduate Studies for review.

Coursework Validity: Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated by the School of Graduate Studies.

Transfer Credits: We generally do not accept courses transferred from other graduate programs to count towards required credits in the MS program. However, with approval of the supervisory committee and graduate program director, a maximum of 6 transfer credits may be accepted.

Thesis Research Credits 6970: Plan A Students must complete a minimum of 6 credits of Thesis Research. Plan B Students must complete a minimum of 2 credits of Thesis Research.

Academic Forms: Completion of the MS degree requires the approval of the following forms by the School of Graduate Studies:

PLAN A

- Supervisory Committee
- Program of Study
- Thesis Proposal Approval
- Appointment for Exam
- Authorship & Copyright
- Format and Style
- Title Page
- Graduation Application

PLAN B

- Supervisory Committee
- Program of Study
- Thesis Proposal Approval
- Appointment for Exam
- Plan B Report/Creative Project Submission

- Graduation Application

Additionally, all MS degree students must complete Responsible Conduct of Research training prior to forming their supervisory committees.

MASTER OF SCIENCE IN ANTHROPOLOGY REQUIREMENTS

Completion of the degree requires 31-35 total credits (including a minimum of 6 credits of thesis research hours Plan A students and a minimum of 2-3 credits of thesis research hours for Plan B students) with a grade of B or higher.

All MS students write a Plan A thesis or prepare a Plan B project under the guidance of their advisor and supervisory committee. The master's thesis must be successfully defended before the supervisory committee and submitted to the library.

Section 1

Type
Completion Requirement

Core Courses (20 credits)

The core courses for the MS degree in Anthropology with a specialization in Archaeology and Cultural Resource Management include:

Complete ALL of the following Courses:

- ANTH6200 - Anthropological Perspectives on Conservation - 3cr.
- ANTH6340 - Archaeology of the Desert West - 3cr.
- ANTH6350 - Archaeological Theory - 3cr.
- ANTH6360 - Research Design and Quantitative Methods in Archaeology - 3cr.
- ANTH6370 - GIS in Archaeology - 3cr.
- ANTH6390 - Cultural Resources Management Policy - 3cr.
- ANTH6700 - Archaeology Internship - 2cr.

NOTE:

1. ANTH6370 GIS IN ARCHAEOLOGY - online

Section 2

Type
Completion Requirement

Method and Area (9 credits)

Earn at least 9 credits from the following:

- ANTH6110 - Southwest Indian Cultures, Past and Present - 3cr.
- ANTH6250 - Problems in Bioarchaeology - 3cr.
- ANTH6310 - Archaeology Lab - 1cr. (Inactive)
- ANTH6320 - Zooarchaeology - 3cr.
- ANTH6330 - Geoarchaeology - 3cr.
- ANTH6400 - Collections Management - 1cr.
- ANTH6410 - Writing for Archaeologists - 3cr.
- ANTH6420 - Lithic Analysis - 1cr.
- ANTH6430 - Archaeometry - 3cr.
- ANTH6900 - Independent Studies - 1cr.
- ANTH6950 - Archaeology Special Topics/Seminar - 1cr.
- GEO6120 - Advanced Geomorphology - 3cr. (Inactive)
- GEO6680 - Paleoclimatology - 3cr.

NOTE:

1. ANTH6420 LITHIC ANALYSIS - 3 credits required.

Section 3

Type
Completion Requirement

Thesis Preparation (3-6 credits)

Plan A students:

The Plan A option for a master's degree requires the preparation and defense of a thesis. Students are required to complete a minimum of 6 semester credits of thesis research (6970) with a maximum of 15 thesis credits applied toward a Program of Study.

Plan B students:

A Plan B option requires the production and defense of a paper or project, depending on the department and program. A minimum of two credits of thesis research (6970) are required, but no more than three thesis research credits can be included in an approved Program of Study. Some degree programs require creative project credits in addition to or in place of research.

Successful defense and submission of the thesis or dissertation to the library.

Required for all defense degrees:

Complete ALL of the following Courses:

- ANTH6970 - Thesis Research - 1cr.

Section 4

Type
Completion Requirement

Archaeology Field School

Complete ALL of the following Courses:

- ANTH6300 - Archaeology Field School - 6cr.

Please note: an approved field school or equivalent experience is required for admission as a matriculated student. Field school credits do not count toward the MS degree.

Additional Comments:

Certificate Options

Students can earn a certificate in the process of getting their master's degree. Below are the Post-Baccalaureate Certificate options that can be earned:

- Museum Administration and Collections Management - Post-Bachelor's Certificate
- Archaeological Data Analytics - Post-Bachelor's Certificate
- Cultural Resource Management Policy, Advocacy and Business Administration - Post-Bachelor's Certificate

Anticipatory Intelligence - Minor

Program Overview

College
College of Arts & Sciences

Department
College of Arts & Sciences

Program Level
Undergraduate

About this Degree

The Minor in Anticipatory Intelligence at Utah State University is the nation's first undergraduate program in the field of Anticipatory Intelligence. This 12-credit minor is designed to be completed in the junior and/or senior year and is built to complement majors across STEM disciplines, social sciences, humanities, and the arts. The Minor in Anticipatory Intelligence is structured to equip undergraduates with actionable hard and soft skills that have direct application into a wide range of professional tracks. Courses are taught at the 5000-level to prepare undergraduates to excel in graduate study and the professional workforce.

Undergraduates pursuing the Minor in Anticipatory Intelligence have the opportunity to gain a working understanding of the international, governmental, private sector, and individual security issues emerging across an expansive disciplinary spectrum that are affecting and will impact their major field of study and future profession. Anticipatory Intelligence courses train students to be active participants in cross-disciplinary and cross-domain collaboration and equip them to connect their primary disciplinary expertise to real-world problem solving on emergent security issues. The Minor in Anticipatory Intelligence offers strong value-added benefits for undergraduates interested in a wide range of future professions in the private sector, public service, nonprofit work, and academia.

Admission Requirements for this Program

In order to apply, applicants must:

- Be Juniors or Seniors by the start of the program
- Have a strong academic record (GPA 3.0+)
- The application package is available on the program website, https://www.usu.edu/cai/, and includes an application form with the name and contact information of a professor who can refer the student (a formal letter of recommendation is not required), a resume/CV, and cover letter.

Program Requirements

Total Credits Required In Program Coursework
12

Total Credits Required To Earn This Credential
12

Simple Requisites

Program Requirements

- Completion of 6 credits of required core courses
- Completion of 6 credits of elective courses in anticipatory intelligence
- A "C" grade or better in all courses
- Students seeking to pursue the Minor in Anticipatory Intelligence must apply for and be accepted into the program

Required Courses

Type
Completion Requirement

Required Foundations Course (3 credits)

Complete ALL of the following Courses:

- CAI5000 - Foundations of Anticipatory Intelligence - 3cr.

Required Methodologies Course (3 Credits)

Complete at least 1 of the following courses:

- CAI5010 - Dynamics of Disruptive Technology - 3cr.
- CAI5200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI5300 - Art and Science of Anticipation - 3cr.
- CAI5310 - Strategic Culture and Analytics - 3cr.

Elective Courses

Type
Completion Requirement

Elective Courses (6 credits)

Students must complete **6 credits** of approved elective courses. Any CAI-prefix course qualifies as an accepted elective. Courses from other departments that are offered in partnership with the Anticipatory Intelligence program may be individually approved as electives by a CAI academic advisor. In exceptional circumstances, a student may petition to use up to 3-6 credits of upper-division major courses directly relevant to the Anticipatory Intelligence curriculum as elective credits (petition must be approved by a CAI academic advisor).

Earn at least 6 credits from the following:

- CAI5010 - Dynamics of Disruptive Technology - 3cr.
- CAI5200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI5300 - Art and Science of Anticipation - 3cr.
- CAI5310 - Strategic Culture and Analytics - 3cr.
- CAI5400 - Ethics and Emerging Technology - 3cr.
- CAI5500 - Strategic Intelligence - 3cr.
- CAI5510 - Russian Security Affairs - 3cr.
- CAI5520 - Chinese Security Affairs - 3cr.
- CAI5530 - Weapons of Mass Destruction - 3cr.
- CAI5540 - Future Space Security - 3cr.
- CAI5600 - Biosecurity I - 3cr.
- CAI5620 - Food Security and Solutions - 3cr.
- CAI5630 - Water Security and Solutions - 3cr.
- CAI5880 - Critical Soft Skills - 3cr.
- CAI5890 - Special Topics in Anticipatory Intelligence - 1cr.
- CAI5900 - Directed Readings and Research - 1cr.
- CAI5910 - Public Sector Internship - 1cr.
- CAI5920 - Private Sector Internship - 1cr.
- CAI5940 - CAI Field Experience - 1cr.

Master of Anticipatory Intelligence - MAI

Program Overview

College	Department	Program Level
College of Arts & Sciences	College of Arts & Sciences	Graduate

About this Degree

USU's Center for Anticipatory Intelligence has led the pioneering effort in the US to establish the academic field of Anticipatory Intelligence: a multidomain approach to anticipating threats and opportunities emerging from the world's increasingly complex security environment, oriented around the goal of reducing uncertainty and designing resilience across future scenarios. The MAI operationalizes this academic field through an interdisciplinary, cross-college degree that integrates core coursework in Anticipatory Intelligence with one of four applied emphasis tracks: International Security, Cyber & Security Analytics, Biosecurity, or Geographic Information Sciences to equip graduates with a potent combination of analytic and applied skills, cross-trained competencies, and an actionable professional education fit for the security challenges of the twenty-first century. The design of this professional master's degree offers students significant curricular choice in order to deliver a tailored graduate experience.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
33	33

Simple Requisites

Program Requirements

The Master of Anticipatory Intelligence program is a 33-credit professional degree with:

- a 12-credit required curriculum core
- 6 credits of elective courses in Anticipatory Intelligence
- a 3-credit graduate capstone project
- a 12-credit, hard-skill emphasis track facilitated in conjunction with partner departments.

Completion of the Master of Anticipatory Intelligence program is contingent on fulfillment of the following criteria:

· Completion of all required courses

· A "C" or higher passing grade in all courses,

· 21 of the total 33 credits completed at the 6000 level. The program of study for a master's degree cannot include more than 12 semester credits of courses at the 5000 level. Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000.

· A School of Graduate Studies-approved program of study from Utah State University.

Interested individuals from all programs of study and professional backgrounds are encouraged to apply. In order to apply, applicants must:

- have (or be about to graduate with) a bachelor's degree from an accredited university,
- have a strong academic record (minimum GPA of 3.0) – work experience of professional applicants will be weighed when reviewing application.
- Degree Verification: A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program. An official transcript must be sent directly to the School of Graduate Studies.

A graduate program **must be completed within six years of entering** the degree program. Additional time may be requested by the department and submitted to the Vice Provost of Graduate Studies for review.

Detailed information on the Master of Anticipatory Intelligence, including application requirements, dates regarding the annual application window, and guidance for prospective students is provided on the program website, cai.usu.edu. Applications require a personal statement, resume/CV, writing sample, official undergraduate transcripts, two (2) letters of recommendation, and payment of the USU SGS application fee.

Master of Anticipatory Intelligence - MAI

Type

Completion Requirement

Anticipatory Intelligence Required Courses (12 credits)

All MAI students must complete a **12 credit** required curriculum core that lays a strong foundation in the central principles and toolkits of Anticipatory Intelligence. The required core curriculum includes one foundations course (3 credits) , two methodologies courses (6 credits), and a soft skills course (3 credits).

Students who can demonstrate direct equivalency in undergraduate or previous graduate study may be able to petition to apply other MAI elective or emphasis courses to satisfy some curriculum core credits. Other course substitutions for the elective and emphasis requirements may be approved by an Anticipatory Intelligence academic advisor on an individual basis.

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- CAI6000 - Foundations of Anticipatory Intelligence - 3cr.

AND

Required Courses

Complete at least 2 of the following courses:

- CAI6010 - Dynamics of Disruptive Technology - 3cr.
- CAI6200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI6300 - Art and Science of Anticipation - 3cr.
- CAI6310 - Strategic Culture and Analytics - 3cr.

AND

Durable Skills Course Requirement

Students must complete either CAI 5880: Critical Soft Skills or CAI 6890: (Special Topics) Durable Skills: Career Readiness

Complete ANY of the following Courses:

- CAI5880 - Critical Soft Skills - 3cr.
- CAI6890 - Special Topics in Anticipatory Intelligence - 1cr.

Anticipatory Intelligence Electives (6 credits)

MAI students must complete **6 credits** (at least two courses) of elective coursework which may include any CAI prefix courses or approved internships.

Important Note: Internship and directed readings courses are listed as variable credit (1-6), however only **3 credits of internship** and **3 credits of faculty-approved directed readings** may be applied toward the MAI. All internship or directed readings and research courses must be approved by a faculty advisor before registration.

Earn at least 6 credits from the following:

- CAI5880 - Critical Soft Skills - 3cr.
- CAI6010 - Dynamics of Disruptive Technology - 3cr.
- CAI6200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI6310 - Strategic Culture and Analytics - 3cr.
- CAI6900 - Directed Readings and Research - 1cr.
- CAI6910 - Public Sector Internship - 1cr.
- CAI6920 - Private Sector Internship - 1cr.
- CAI6940 - CAI Field Experience - 1cr.
- CAI6510 - Russian Security Affairs - 3cr.
- CAI6520 - Chinese Security Affairs - 3cr.
- CAI6530 - Weapons of Mass Destruction - 3cr.
- CAI6540 - Future Space Security - 3cr.
- CAI6600 - Biosecurity I - 3cr.
- CAI6620 - Food Security and Solutions - 3cr.
- CAI6630 - Water Security and Solutions - 3cr.
- CAI5500 - Strategic Intelligence - 3cr.
- CAI6890 - Special Topics in Anticipatory Intelligence - 1cr.

Graduate Capstone Project (3 credits)

All MAI students must complete a tailored **3 credit** capstone project building on their core coursework.

Wide parameters of creativity, innovation, and flexibility are built into the capstone project, but two requirements must be met: 1) the project must leverage at least one key tool or substantive issue area in the Anticipatory Intelligence domain, and 2) the project must be designed and conducted by the student in partnership with an external public sector or industry partner. MAI students should not begin their capstone project until they have completed both CAI 6000 and one of the CAI methods courses (CAI 6010, CAI 6200, CAI 6300, or CAI 6310).

Complete ALL of the following Courses:

- CAI6990 - Graduate Capstone Experience - 3cr.

International Security Emphasis

Type
Completion Requirement

International Security Emphasis (12 credits)

Students electing to complete the International Security track may select any **12 credits** from the courses listed to complete this emphasis (co-facilitated with the Department of Political Science). Other relevant 5/6000-level POLS electives may be approved on an individual basis by an Anticipatory Intelligence academic advisor.

Earn at least 12 credits from the following:

- CAI5500 - Strategic Intelligence - 3cr.
- CAI6310 - Strategic Culture and Analytics - 3cr.
- CAI6510 - Russian Security Affairs - 3cr.
- CAI6520 - Chinese Security Affairs - 3cr.
- CAI6530 - Weapons of Mass Destruction - 3cr.
- CAI6540 - Future Space Security - 3cr.
- CAI6890 - Special Topics in Anticipatory Intelligence - 1cr.
- POLS5140 - Law, Politics, and War - 3cr.
- POLS6210 - International Security - 3cr.
- POLS6230 - Terrorism and Counter-Terrorism - 3cr.
- POLS6400 - United States Foreign Policy - 3cr.

Cyber & Security Analytics Emphasis

Type
Completion Requirement

Cyber & Security Analytics Emphasis (12 credits)

Students electing to complete the Cyber & Security Analytics track may select any one of the three **12 credit** certificate block options listed below (facilitated by the Department of Data Analytics and Information Systems) to complete the emphasis: the Data Technologies certificate, the Cybersecurity certificate, or the Data Analytics certificate. In accordance with USU Registrar's Office policy, a post-baccalaureate certificate may be earned concurrently with this MAI emphasis.

Complete at least 1 of the following programs:

- DATE_PBC - Data Technologies - Post-Bachelor's Certificate
- CYSE_PBC - Cybersecurity - Post- Bachelor's Certificate
- ARDA_PBC - Archaeological Data Analytics - Post-Bachelor's Certificate

Biosecurity Emphasis

Type
Completion Requirement

Biosecurity Emphasis (12 credits)

Students electing to complete the Biosecurity track must take **3 credits** of required coursework and may select any further **9 credits** from the courses listed to complete the emphasis. Other relevant electives offered through the Center for Anticipatory Intelligence or other partner departments may be approved on an individual basis by an Anticipatory Intelligence academic advisor.

Fulfill ALL of the following requirements:

Required Courses (3 credits)

Complete ALL of the following Courses:

- CAI6600 - Biosecurity I - 3cr.

AND

Biosecurity Emphasis Elective Courses

Earn at least 9 credits from the following:

- CAI6620 - Food Security and Solutions - 3cr.
- CAI6630 - Water Security and Solutions - 3cr.
- ASTE4215 - Community Programming and Evaluation - 3cr.
- CAI6890 - Special Topics in Anticipatory Intelligence - 1cr.

GIS Natural Resources Emphasis

Type
Completion Requirement

GIS Natural Resources Emphasis (12 credits)

Students electing to complete the Geographic Information Science track may select any **12 credits** from the courses listed to complete the emphasis (facilitated by partner departments in the S.J. and Jessie E. Quinney College of Natural Resources). In accordance with USU Registrar's Office policy, a post-baccalaureate certificate may be earned concurrently with this MAI emphasis. Note that NR-prefix courses are offered as online courses, while all other prefixes are taught as in-person courses on the USU Logan campus.

Fulfill ANY of the following requirements:

Required Courses

Earn at least 12 credits from the following:

- NR6910 - Geographic Information Systems for Natural Resource Applications - 3cr.
- NR6930 - Advanced GIS for Natural Resource Applications - 3cr.
- NR6940 - Principles of Remote Sensing of Natural Resources - 3cr.
- NR6950 - Geospatial Analysis for Natural Resource Management - 3cr.
- NR6960 - Python Programming for GIS - 3cr.

OR

In-person Variants

Earn at least 12 credits from the following:

- GEOG6300 - Geospatial Analysis with R - 3cr.
- GEOG6500 - Advanced Geographic Information Sciences (GIS) - 3cr.
- WILD6750 - Applied Remote Sensing - 3cr.
- WILD6920 - Python Programming For GIS - 3cr.

Anticipatory Intelligence - Post-Bachelor's Certificate

Program Overview

College	Department	Program Level
College of Arts & Sciences	College of Arts & Sciences	Graduate

About this Degree

The Post-Bachelor's Certificate in Anticipatory Intelligence at Utah State University is part of the nation's first graduate program in Anticipatory Intelligence. This compact 15-credit certificate is designed to be completed with part-time study across one or two years and is built to complement career tracks or other graduate degrees across a wide range of STEM disciplines, social sciences, humanities, and arts. Its purpose is to equip graduate students and professionals with a sophisticated grasp of how the world's fast-evolving forces in cyber, big data, artificial intelligence, bioengineering, climate change, information metastasis, societal cohesion, and other domains are converging into transformative threats and opportunities for the twenty-first century.

The Post-Bachelor's Certificate in Anticipatory Intelligence prepares graduate students and professionals with actionable hard and soft skills in systems-level thinking and emergent security challenges, as well as sophistication in interdisciplinary analysis, synthesis, and cross-domain collaboration relating to the complex security issues affecting their own professional field. This curriculum offers strong value-added benefit for individuals pursuing a wide range of professions in the private sector, public service, nonprofit work, and academia.

Admission Requirements for this Program

Detailed information on the Post-Bachelor's Certificate in Anticipatory Intelligence, including application requirements, annual application window, and guidance for prospective students is provided on the program website, cai.usu.edu. Applications require a personal statement, resume/CV, writing sample, official undergraduate transcripts, two (2) letters of recommendation, and payment of the USU SGS application fee. This certificate must be completed within six years of entering the degree program. Additional time may be requested by the department and submitted to the Vice Provost of Graduate Studies for review.

Interested individuals from all programs of study and professional backgrounds are encouraged to apply. In order to **apply**, applicants must:

- have (or be about to graduate with) a bachelor's degree from an accredited university,
- have a strong academic record (minimum GPA of 3.0) – work experience of professional applicants will be weighed during application review.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
15	15

Simple Requisites

Program Requirements

Completion of the CAI Post-Bachelor's is contingent on fulfillment of the following criteria:

- completion of 9 credits of required courses,
- completion of 6 credits of approved elective courses,
- a "C" grade or better in all classes.

This certificate must be **completed within six years of entering** the degree program. Additional time may be requested by the department and submitted to the Vice Provost of Graduate Studies for review.

Additional Information

A grade of C or better is required in all coursework taken to fulfill certificate requirements.

Anticipatory Intelligence - Post-Bachelor's Certificate

Type
Completion Requirement

Required Courses (9 credits)

All students must complete 9 credits of required core coursework: two foundations courses and a graduate capstone project:

Fulfill ALL of the following requirements:

Required Courses

Earn a minimum grade of C in the following:

- CAI6000 - Foundations of Anticipatory Intelligence - 3cr.
- CAI6990 - Graduate Capstone Experience - 3cr.

AND

Required Courses

Minimum C grade is required.

Complete at least 1 of the following courses:

- CAI6010 - Dynamics of Disruptive Technology - 3cr.
- CAI6200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI6300 - Art and Science of Anticipation - 3cr.
- CAI6310 - Strategic Culture and Analytics - 3cr.

Elective Courses (6 credits)

Students must complete 6 credits of approved elective coursework with a minimum C grade. Any CAI-prefix course qualifies as an accepted elective. Courses from other departments that are offered in partnership with the Anticipatory Intelligence program can be approved as electives by a CAI academic advisor. In exceptional circumstances, a student also enrolled in a USU graduate degree program may petition to use a program course directly relevant to the Anticipatory Intelligence curriculum as an elective (petition must be approved by a CAI academic advisor).

Earn at least 6 credits from the following:

- CAI5500 - Strategic Intelligence - 3cr.
- CAI5880 - Critical Soft Skills - 3cr.
- CAI6010 - Dynamics of Disruptive Technology - 3cr.
- CAI6200 - Threats and Resilience in the Knowledge Century - 3cr.
- CAI6300 - Art and Science of Anticipation - 3cr.
- CAI6310 - Strategic Culture and Analytics - 3cr.
- CAI6400 - Ethics and Emerging Technology - 3cr.

Agricultural Production and Automated Processing Technology - AAS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

Students may bring up to 30 credits from applicable technical certificate courses taken after July 1, 2023 toward an Associate of Applied Science (AAS) degree in Agricultural Production and Automated Processing. Certificates from the Utah System of Technical Colleges which include Automation Technology, Diesel Technology, Electronics Technology, Machining Technology, and Welding Technology are recommended.

To learn more students should consult with the program's academic advisor.

The Associate of Applied Science degree (AAS) in Agricultural Production and Automated Processing degree offers a solid foundation for establishing a rewarding career within the agricultural production and processing industry through hands-on practical training in equipment management, testing, diagnosis, and retailing of agricultural production and automation processing technologies. Course work encompasses applied engineering, troubleshooting, operation and maintenance of agricultural production and processing equipment. As an integral part of their training, students may complete an occupational experience or an internship in the industry. Students completing the AAS in Agricultural Production and Automated Processing Technology may stack credits into a Bachelor of Science degree in Agricultural Systems Technology.

Admission Requirements for this Program

Students are admitted into this program through the university's regular admission process.

1. New freshmen admitted to USU in good standing qualify for admission to this major.

2. Transfer students from other institutions and from other USU majors need a 2.20 overall GPA for admission to this major in good standing.

3. Students who have completed a 900+ hour certificate or a credit-based program at a Utah Technical College may apply to USU for admission to this program.

For additional information, or to complete an online application, visit: usu.edu/admissions/applyonline/.

Program Requirements

Total Credits Required In Program Coursework
63

Total Credits Required To Earn This Credential
63

Simple Requisites

Program Requirements

A student will complete 15-17 credits of general education, including one course in English composition, a math course, and nine credits of breadth area courses (humanities or social science, physical science or life science, and American Institutions). There are two business core classes that all students will take. In addition, the student will complete an emphasis area (usually 11-12 credits). The remainder of the student's credits will be made up of transfer credits from a Utah Technical College or accumulated 30 technical credits from an accredited institution or a combination of both. The minimum number of credits needed for the AAS degree is 63.

Students should work closely with an advisor to select courses to complete the requirements for this degree. The basic requirements are listed below. Students should not apply for graduation if they have never met with the advisor or their application may be denied.

A student must have an overall GPA of at least 2.0 in order to graduate.

Required Courses

Type
Completion Requirement

Breadth Requirement

Complete ALL of the following Courses:
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- PSC2010 - Soils, Waters, and the Environment (BPS) - 3cr.

Required Courses

Complete ALL of the following Courses:
- ENGL1010 - Writing as Inquiry (CL1) - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.

Students must complete MATH1050 COLLEGE ALGEBRA (QL) or any Quantitative Literacy course of their choice.

Students must complete ENGL1010 WRITING AS INQUIRY (CL1) or any Communications Literacy I course of their choice.

Professional Communication Core Requirements

Complete ALL of the following Courses:
- ASTE2900 - Food Matters: Ethics, Economics, and the Environment (BSS) - 3cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

Emphasis Area Requirements

Students must complete ASTE 1010 (3 credits) and chose 6 additional credits from the following courses for a total of 9 credits:

Earn at least 9 credits from the following:
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE2250 - Occupational Experience in Agriculture - 1cr.
- ASTE2930 - Individualized Projects in Agriculture Mechanics - 1cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Emphasis Area Electives

Students must take a minimum of 3 credits from the following courses:

Earn at least 3 credits from the following:
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- ADVS1110 - Introduction to Animal Science (BLS) - 3cr.
- ADVS2080 - Beef Production Practices - 3cr.
- PSC1800 - Introduction to Horticulture (BLS) - 3cr.
- PSC2200 - Pesticide Certification - 2cr.
- NDFS1250 - Sanitation and Safety - 3cr.

- NDFS2040 - Fundamentals of Food Processing - 3cr.
- NDFS1063 - Product Development in Chocolate - 3cr.

Technical Specialty and Institution (30 credits)

The remainder of the student's credits will be made up of transfer credits from a Utah Technical College or accumulated 30 technical credits from an accredited institution or a combination of both. New freshman admitted to the program may fulfill the 30 technical credits with USU certificates and minors relevant to the degree, please work with your academic advisor in selecting electives.

Applied Economics - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Undergraduate

About this Degree
The Applied Economics major emphasizes the development of quantitative skills in and a deeper understanding of economic theory, with practical applications to societal problems. The degree is designed with flexibility for students to specialize in energy, law and policy, water and natural resources, environmental management, or quantitative analysis. While this program provides a solid base for individuals desirous of careers in the public or private sector, it is also an excellent preparation for graduate studies in economics, agricultural economics, natural resources, business, or law. The Applied Economics degree provides an excellent background for work in federal, state, and local government, as well as in the private sector. Graduates of this program are now working in positions involving the analysis of prices and markets, preparation of economic feasibility studies, and preparing economic forecasts.

- For more information about Applied Economics, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is STAT2000 STATISTICAL METHODS (QI)

Admission Requirements for this Program
- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Program Requirements

Simple Requisites

Program Requirements

To graduate with a major in Applied Economics, a student must have an major GPA of 2.5 or higher.

Note: The regular calculus series (MATH1210 CALCULUS I (QL) and MATH1220 CALCULUS II (QL)) is recommended for students contemplating graduate studies in economics.

Several of the required courses listed for this major will meet general education and university studies requirements. For more detailed information about courses and the recommended sequence for taking them, see the APEC academic advisor, Abby Macbeth abby.macbeth@usu.edu 435-797-0454.

Applied Economics - BS Required Courses

Type
Completion Requirement

Required Courses (63-64 credits)

All courses required for the Applied Economics major should be taken for a letter grade. Students must earn a grade of C or better in each course. A minimum GPA of 2.5 is required for all courses taken to complete major requirements.

Complete ALL of the following Courses:

- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2900 - Agricultural and Natural Resource Law - 3cr.
  OR BUSN2050 - Business Law - 3cr.
- ACCT2010 - Financial Accounting Principles - 3cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
- APEC2500 - Commodity Futures and Options Trading and Analysis - 3cr.
- APEC3012 - Introduction to Natural Resource Economics (DSS) - 3cr.
- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
- APEC4010 - Intermediate Microeconomics - 3cr.
- APEC5015 - Applied Economics for Decision Making (QI) - 3cr.
- APEC5330 - Applied Econometrics (QI) - 3cr.
- APEC5560 - Natural Resource and Environmental Economics - 3cr.
- APEC5950 - Applied Economics Policy Analysis - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- STAT2000 - Statistical Methods (QI) - 4cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.
  OR BUS3200 - Professional Communication with AI (CI) - 3cr.
  OR ENGR3080 - Creativity and Communication in Design (CI) - 3cr.
- GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
- LAEP5300 - GIS for Environmental Planning - 4cr.
- MATH1100 - Calculus Techniques (QL) - 3cr.
  OR MATH1210 - Calculus I (QL) - 4cr.

- **And 9 additional credits of courses with the APEC, ECON, or FIN prefix in the 3000-5000 level.**

Suggested Areas of Specialization

The B.S. Applied Economics degree is designed with several free elective courses. Below are some suggested areas of specialization that would complement the degree and give students some very marketable skill sets. It is suggested that students take a minimum of four courses from an area to achieve an adequate level of competency. There are also minors that can be obtained in most of these areas. Students should check with their advisor for a list of minors that would also be complementary to the Applied Economics degree and to these areas of specializations.

Fulfill ANY of the following requirements:

Community Development Economics

Complete ALL of the following Courses:

- LAEP1040 - Introduction to Environmental Planning and Sustainable Development (BLS) - 3cr.
- LAEP5300 - GIS for Environmental Planning - 4cr.
- LAEP5370 - City and Regional Planning (CI) - 3cr.

OR

Law and Policy

Complete ALL of the following Courses:

- APEC2900 - Agricultural and Natural Resource Law - 3cr.
- ECON3550 - Law and Economics - 3cr.
- ENVS5300 - Natural Resources Law and Policy - 2cr.
- POLS5130 - Law and Policy - 3cr.
- WILD4550 - Wildlife Law Enforcement - 3cr.

OR

Environmental Management

Complete ALL of the following Courses:

- ENVS4000 - Human Dimensions of Natural Resource Management (DSS) - 3cr.
- ENVS4130 - Natural Resource Recreation Policy and Planning - 3cr.
- ENVS4500 - Advanced Natural Resource Recreation Management (CI) - 3cr.
- ENVS5550 - Sustainability: Concepts and Measurement - 3cr.
- WILD4000 - Principles of Rangeland Management - 3cr.
- WILD4600 - Conservation Biology - 3cr.
- WILD4700 - Ecological Foundations of Restoration - 3cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Type
Completion Requirement

Required Core Courses (12 credits)

Earn at least 12 credits from the following:

- APEC5000 - International Trade and Finance - 3cr.
  OR ECON5560 - Topics in Advanced Macroeconomics - 3cr.
- APEC6100 - Microeconomic Theory I - 3cr.
  OR APEC7130 - Microeconomic Theory I - 3cr.
- APEC6300 - Quantitative Analysis for Business and Policy Decisions - 3cr.
  OR APEC7350 - Mathematical Economics I - 3cr.
- APEC6330 - Applied Econometrics - 3cr.
  OR APEC7310 - Econometrics I - 3cr.

Elective Courses (21 credits)

Students select a minimum of 9 credits from the following courses:

Earn at least 9 credits from the following:

- APEC6030 - Agricultural Marketing - 3cr.
- APEC6040 - Production Economics, Applied Risk Analysis and Simulation - 3cr.
- APEC6500 - Introduction to Natural Resource Economics - 3cr.
- APEC6510 - Introduction to Environmental Economics - 3cr.
- APEC6700 - Regional and Community Economic Development - 3cr.
- APEC6710 - Frontiers in Agribusiness - 3cr.
- APEC7140 - Microeconomic Theory II - 3cr.
- APEC7320 - Econometrics II - 3cr.
- APEC7360 - Mathematical Economics II - 3cr.

Other Elective Courses

Students select a maximum of 12 credits of courses from other departments. These must be approved by the students committee.

Applied Economics - MS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Economics

Program Level
Graduate

About this Degree
The master's degree in applied economics is a preparatory degree for students wishing to do applied work in areas where economics is the focus of the career.

This is an applied degree as opposed to a research degree, meaning students receive the education necessary to enter the workforce in economic programs, or work as consultants in government areas, nonprofits, and private sectors.

Admission Requirements for this Program
B.S./B.A. in Agribusiness, Agricultural Economics, Applied Economics, Economics, Environmental/Natural Resource Economics, or a closely related degree.

Or at a minimum evidence of the following coursework:

- Microeconomic principles
- Calculus
- Basic Statistics
- Intermediate/Managerial Microeconomics or comparable course

Program Requirements

Total Credits Required In Program Coursework
30

Total Credits Required To Earn This Credential
30

Simple Requisites

Program Requirements

Degree Verification

A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.

Overall Graduate GPA at least 3.0 and no grades of C- or lower; Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.

Course Number Acceptability
The Program of Study for a master's degree must include at least 18 semester credits at the level of 6000 or above.

Courses numbered 5000-5990 are advanced, upper-division courses and a maximum of 12 credits can be used towards a master's degree.

Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, courses numbered below 5000.

Matriculation Start Semester
A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.

Coursework Validity
Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated by the Vice Provost of Graduate Studies.

Master's Plan A students:
The Plan A option requires the preparation and defense of a thesis. Students are required to complete a minimum of 6 credits of thesis research (APEC 6970) for a Program of Study.

Master's Plan B students:
The Plan B option requires the production and defense of a paper or project. Students are required to complete a minimum of 2 credits of thesis research (APEC 6970) with a maximum of 3 thesis research credits applied toward a Program of Study.

Master's forms: Approval of the following academic forms is required for master's students by the School of Graduate Studies (SGS):

- Supervisory Committee form
- Program of Study
- Thesis/Project Approval
- Appointment for Examination
- Record of Examination
- SGS and library review and approval (Plan A)
- Library review and approval (Plan B)

Applied Economics - MS Course Requirements

Type
Completion Requirement

Applied Core:

These courses are required to earn the MS in Applied Economics

Complete ALL of the following Courses:

- APEC6100 - Microeconomic Theory I - 3cr.
- APEC6300 - Quantitative Analysis for Business and Policy Decisions - 3cr.
- APEC6330 - Applied Econometrics - 3cr.

(2) Complete a Specialization in: Agricultural Economics, Natural Resource Economics, or Regional Economic Development. Climate Adaptation Science is also available (https://www.usu.edu/climate-adaptation/)

Fulfill ANY of the following requirements:

(a) Agricultural Economics Specialization

Fulfill ALL of the following requirements:

(a) Agricultural Economics:

Complete ALL of the following Courses:

- APEC6030 - Agricultural Marketing - 3cr.
- APEC6040 - Production Economics, Applied Risk Analysis and Simulation - 3cr.

AND

Choose 9 (Plan A) or 12 (Plan B) credits from the following:

Complete ANY of the following Courses:

- ASTE6200 - Principles and Practices of Extension Education - 3cr.
- ASTE6260 - Environmental Impacts of Agricultural Systems - 3cr.
- ECON6310 - Economics for Decision Making - 2cr.
- MSLE6410 - Enterprise and Value Creation - 3cr.
- MSLE6430 - Enterprise Growth and Management - 2cr.
- MSLE6520 - Enterprise Brand and Marketing - 3cr.
- NDFS6510 - Food Laws and Regulations - 3cr.
- Any APEC 5000-7000 level courses as approved by your committee (**3-12 credits)**

OR

(b) Natural Resource Economics Specialization

Fulfill ALL of the following requirements:

(b) Natural Resource Economics:

Complete ALL of the following Courses:

- APEC6500 - Introduction to Natural Resource Economics - 3cr.
- APEC6510 - Introduction to Environmental Economics - 3cr.

AND

Choose 9 (Plan A) or 12 (Plan B) credits from the following:

Complete ANY of the following Courses:

- ENVS5300 - Natural Resources Law and Policy - 2cr.
- ENVS6320 - Water Law and Policy in the United States - 3cr.
- ENVS6530 - Natural Resources Administration - 3cr.
- SOC6620 - Environment, Technology, and Social Change - 3cr.
- SOC6630 - Social and Community Dimensions of Natural Resources - 3cr.

OR

(c) Regional Economic Development Specialization

Fulfill ALL of the following requirements:

(c) Regional Economic Development:

Complete ALL of the following Courses:

- APEC6700 - Regional and Community Economic Development - 3cr.
- APEC6710 - Frontiers in Agribusiness - 3cr.

AND

Choose 9 (Plan A) or 12 (Plan B) credits from the following:

Complete ANY of the following Courses:

- POLS6020 - Public Policy Analysis - 3cr.
- POLS6040 - Public Choice - 3cr.
- SOC6450 - Theories and Methods in Medical Sociology - 3cr.
- SOC6650 - Developing Societies - 3cr.
- SOC6700 - Advanced Rural Sociology - 3cr.
- SOC6720 - Applied Community Development - 3cr.

(3) Submit and orally defend a thesis (Plan A) or research report (Plan B)

Complete (6 credits-Plan A) or (3 credits-Plan B)

Complete ALL of the following Courses:

- APEC6970 - Thesis Research - 1cr.

Apprentice Electrician - Technical Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Technology, Design & Technical Ed

Program Level
Undergraduate

About this Degree
Federal Gainful Employment Information

The Electrical Apprenticeship program provides a solid understanding of the National Electrical Code (NEC), its layout, the requirements for different electrical systems, and the components of those systems. This program discusses the risks involved with electricity and electrical systems as well as the safety equipment and measures that are in place to protect electricians and the general public alike.

This program connects students with mentors, job opportunities, and the training they need to build a solid, rewarding career to go from apprentice to journeyman in four years.

Fall Entry

Spring Entry Option - must discuss with advisor first.

Required Courses (40 credits)

Complete ALL of the following Courses:

- APPR2301 - Electrical Apprentice 1-A - 5cr.
- APPR2302 - Electrical Apprentice 1-B - 5cr.
- APPR2303 - Electrical Apprentice 2-A - 5cr.
- APPR2304 - Electrical Apprentice 2-B - 5cr.
- APPR2310 - Electrical Apprentice 3-A - 5cr.
- APPR2320 - Electrical Apprentice 3-B - 5cr.
- APPR2410 - Electrical Apprentice 4-A - 5cr.
- APPR2420 - Electrical Apprentice 4-B - 5cr.

Section 2

Type
Completion Requirement

USHE Aligned Courses (24 credits)

Complete ALL of the following Courses:

- TEEL1110 - Electrician Apprentice IA - 3cr.
- TEEL1120 - Electrician Apprenticeship IB - 3cr.
- TEEL1210 - Electrician Apprentice IIA - 3cr.
- TEEL1220 - Electrician Apprentice IIB - 3cr.

- TEEL1310 - Electrician Apprentice IIIA - 3cr.
- TEEL1320 - Electrician Apprentice IIIB - 3cr.
- TEEL1410 - Electrician Apprentice IVA - 3cr.
- TEEL1420 - Electrician Apprentice IVB - 3cr.

Additional Comments:
This program meets licensure requirements in the following states:

- AK, AZ, AR, CA, CO, DE, ID, KS, LA, MI, MT, NE, NV, NH, ND, OR, SC, SD, TX, UT, WI

This program does not meet licensure requirements in the following states:

- AL, CT, FL, GA, HI, IL, IN, IA, KY, ME, MD, MA, MN, MS, MO, NJ, NM, NY, NC, OH, OK, PA, RI, TN, VT, VA, WA, WV, WY

Program Learning Outcomes

Program Learning Outcomes

- Apply of the National Electrical Code (NEC).
- Navigate the National Electrical Code (NEC).
- Calculate the sizes of different electrical system parts.
- Explain the application of A/C and D/C electrical theory.
- Explain Electrical Safety procedures, processes, and equipment.
- Wire electrical circuits per national codes and safety regulations.

Airport Management - Post-Bachelor's Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Aviation Technology

Program Level
Graduate

About this Degree

The Airport Management Post-Bachelor's Certificate is designed for professionals who want focused preparation for careers in airport operations, administration, and airport-related leadership roles. This 100% online certificate requires **12 credits** and builds applied knowledge in airport management practices, regulatory considerations, operational planning, and safety-focused decision-making in the airport environment. The program supports learners who are already working in aviation or who want to transition into airport careers, and it can be completed alongside full-time employment. Graduates are prepared for roles such as airport operations specialist, airport duty manager support, airport administration or tenant relations coordinator, airport planning/program support, compliance or training support roles, or other positions within airports, municipalities, airport authorities, and airport service providers.

Applied Practice in Dietetics - Post-Bachelor's Certificate

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Nutrition, Dietetics & Food Sciences	Graduate

About this Degree

A registered dietitian nutritionist (RDN) is an expert in food and nutrition who works in various settings to advance health in clients and their families. RDN registration requires a graduate Debye (master's or doctorate), completion of supervised practice through an accredited program, and passage of the registration exam for dietitians. This exam is required for licensing in most states, including the state of Utah. Additional information on licensing and certification programs can be found at https://www.cdrnet.org/state-licensure.

The Post-Bachelor's Certificate of Applied Practice in Dietetics (CAPD) will integrate with existing graduate degrees in the NDFS department including the Master's of Publish Health (MPH) Nutrition degree and the Master of Science (MS) in Nutrition and Food Science to provide supervised practice in preparation for the Dietitian registration exam. Upon successful completion of the CAPD and the affiliated graduate degree, students will be prepared to sit the registration exam for dietitians administered by the Commission of Dietetics Registration and to practice as a Registered Dietitian Nutritionist (RDN) at the entry level.

The CAPD will be offered as a traditional face-to-face program on Logan Campus. Admission into the program requires a formal application in February of the year prior to desired entry. Supervised practice occurs in numerous facilities on and off campus. Some travel may be required. Students should anticipate working at dietetics-related facilities 10-32 hours per week during the program.

Please see the website for the updated handbook.

Career Opportunities

With a degree in dietetics, students may be qualified for the following careers:

- Registered Nutritionist
- Clinical nutrition (hospitals, long-term care facilities, health care, etc.)
- Community nutrition and education
- Public health
- Food service management: schools, clinical facilities
- Private consulting
- Sports nutrition

For more information on dietetics practice, see: https://www.eatrightpro.org/practice.

Admission Requirements for this Program

There are two pathways for admission into the CAPD. Student may obtain a bachelor's degree from an accredited undergraduate dietetics program. Students who have not completed a dietetics program may apply after completing the noted prerequisites.

- Graduate from an accredited nutrition/dietetics program and have a DPD Verification Statement OR be in the process of completing an accredited nutrition/dietetics program and will receive a DPD Verification Statement or Foreign Dietitian Education program (FDE) upon completion.
    - Applicants with a DPD Verification Statement more than 3 years old at the time of application may have to meet additional requirements.
    - Applicants who have received a BS degree in a closely related field but who do not have a DPD Verification Statement may inquire about eligibility.
    - Minimum pre-requisite GPA of 3.0.
- Obtain Food Manager or ServeSafe Certification.
- Complete 300 hours of dietetics-related experience.

Applicants should apply to graduate school in addition with the application for the CAPD. The applicant's major professor or program advisor should be willing to submit a letter of support for the candidate if the student is already enrolled in a graduate program at time of application.

Official transcripts will be required. Unofficial transcripts will not be accepted. Transcripts must be submitted in English. Foreign transcripts will need to be evaluated by an outside agency. The program cannot provide this service. Two recommended foreign credential evaluation agencies, include Academic and Professional International Evaluations, Inc (http://www.apie.org/) and Academic Credentials Evaluation Institute, Inc. (http://www.acei1.com/).

- NDFS6060 - Community Skills II - 2cr.

Licensure

Licensure Requirements
This program typically leads to licensure and was designed to meet licensing qualifications in the state of Utah. If students wish to work in another state within the United States, they should review the qualifications for that state per the information provided by The Academy of Nutrition and Dietetics.

According to the most recent information from the sponsoring department, this program:

Meets licensure requirements in the following states: OR, WA, CA, ID, NV, AZ, UT, AK, MT, WY, CO, HI, ND, SD, NE, KS, OK, TX, MN, IO, MS, AR, MS, TN, KY, OH, WV, PA, NH, VT,MA, RI, CT, NJ, DE, MD, VA, NC, SC, GA, FL

Does not meet licensure requirements in: ME

Has not determined if the program meets licensure requirements in the remaining states.

A detailed spreadsheet on states and requirements can be found on this spreadsheet.

Additional Comments:

Licensure Notification

This program typically leads to licensure and was designed to meet licensing qualifications in the state of Utah. If students wish to work in another state within the United States, they should review the qualifications for that state and the Education Licensure Compliance Table provided by School of Teacher Education and Leadership.

For more information, please contact the School of Teacher Education and Leadership at https://cehs.usu.edu/teal/

Applied Sport Coaching - MEd

Program Overview

College
College of Education & Human Services

Department
Kinesiology and Health Science

Program Level
Graduate

About this Degree

The Applied Sport Coaching Master of Education (APSC MEd) is designed for professionals looking to deepen both their knowledge and practical expertise in sport coaching. This program offers an innovative curriculum that incorporates the latest trends and prepares students for leadership roles in sport settings. It is well-suited for current and aspiring coaches, teachers, athletic administrators, and other related professionals.

The APSC MEd is a 30-credit, fully online degree program that provides students the flexibility to complete their coursework at their own pace. While the program is typically completed in two years, students can choose to finish in one year or extend their studies over a period of up to six years. This structure accommodates both full-time and part-time students, ensuring that they can balance their academic and professional commitments.

With its flexible structure and focus on practical application, the APSC MEd provides students with the necessary tools and competencies to advance their careers in sport coaching and related fields.

For more information, including admission requirements and deadlines, please contact the Kinesiology and Health Science Department or visit the Applied Sport Coaching page on the department's website at https://cehs.usu.edu/khs/graduate/med-applied-sport-coaching.

School of Graduate Studies Requirements

- **Degree Verification:** A bachelor's degree from an accredited U.S. college or university or a similarly recognized international university is required for admission to and completion of a graduate program.
- **Overall Graduate GPA at least 3.0 and no grades of C- or lower:** Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree.
- **Course Number Acceptability:** The Program of Study for a master's degree must include at least 18 semester credits at the level of 6000 or above. Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 6000. The program of study for a master's degree cannot include more than 12 semester credits of courses at the 5000 level. Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000.

- **Matriculation Start Semester:** A master's degree must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review.
- **Coursework Validity:** Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated by the School of Graduate Studies.
- **Thesis Research Credits:** Professional/Plan C students cannot use any thesis credits.
- **Master's forms:** Approval of academic forms required for master's students by the School of Graduate Studies. This includes the Supervisory Committee Approval Form (SCAF), Program of Study (POS), and USU Graduation Application.

Applied Sport Coaching - MEd (30 credits)

Type
Completion Requirement

Applied Sport Coaching MEd students must complete the following courses:

Fulfill ALL of the following requirements:

Required Courses (24 credits)

Complete ALL of the following Courses:

- KIN6000 - Administration of Athletics - 3cr.
- KIN6050 - Psychological Aspects of Sports Performance - 3cr.
- KIN6070 - Social Dimensions of Sport - 3cr.
- KIN6075 - Sport Ethics - 3cr.
- KIN6120 - Leadership and Organizational Behavior in Sport - 3cr.
- KIN6130 - Data Analytics and Data Driven Decision Making in Sports - 3cr.
- KIN6210 - Biophysical Aspects of Sport and Exercise - 3cr.
- KIN6270 - Injury Prevention and Risk Management - 3cr.

AND

Electives (3 credits)

Complete the following:
Students are required to complete 3 credits of electives for this program. Elective courses should be selected in consultation with a student's faculty advisor/major professor.

AND

Internship Requirement (3 credits)

Students are required to complete 3 credits of internship to fulfill the program requirements.

Complete ALL of the following Courses:

- KIN7550 - Internship in Sport Coaching - 1cr.

Archaeological Data Analytics - Post-Bachelor's Certificate

Program Overview

College
College of Arts & Sciences

Department
School of Social Sciences, Data Analytics & Information Systems

Program Level
Graduate

About this Degree
The Post-Bachelor's Certificate in Archaeological Data Analytics is designed to prepare both fully matriculated graduate students as well as current professionals in the field wishing to enhance their portfolios to understand and implement data analytics within the context of cultural resource management activities. The certificate combines graduate level anthropology courses with courses offered as part of the Masters in Data Analytics program. This certificate may be earned as a stand-alone certification or as part of the USU Anthropology Graduate Program.

Students who complete the program will receive a Post-Bachelor's Certificate in Archaeological Data Analytics. Their USU transcript will list the courses and grades received to complete the program.

Graduate Program Director: Dr. Judson Finley and Dr. Jacob Freeman

Admission Requirements for this Program
To apply for admittance to the program, a person must complete and submit an application to the School of Graduate Studies. Academic credits obtained from the program may be applied toward a graduate degree.

To apply, the School of Graduate Studies requires:

- A bachelor's degree that is or will be completed before the student matriculates in the degree program.
- A 3.0 or higher grade-point average for terms that include the student's last 60 semester credits or 90 quarter credits.
- Resume/CV
- International applicants are required to submit proof of proficiency in English.

For additional information on admissions and application procedure, please see:

https://gradschool.usu.edu/admissions/

Program Requirements

The Archaeological Data Analytics Post-Bachelor's Certificate consists of 18 hours chosen from among the courses listed below. The certificate provides a dual foundation in understanding the unique properties and methodological challenges of archaeological data and inference within the foundations of modern data science. The certificate is designed to meet students where they reside physically and intellectually, from just beginning data science to building on a 10 year career at the interface of archaeology and data science. To this end, the certificate combines courses from Anthropology (ANTH) and Data Science (DATA). The pathway chosen by students to complete their 18 credit hours will depend upon their goals, prior experience and course work in database

management, python programming, archaeological data analysis, and archaeological inference. Thus, students may tailor the certificate to their career needs and goals.

Students must maintain a minimum 3.0 GPA for program courses. Course grades less than a B (B- and below) do not count toward the certificate.

Archaeological Data Analytics - Post-Bachelor's Certificate

Type
Completion Requirement

Core Courses (15 credits)

Complete ALL of the following Courses:

- ANTH6430 - Archaeometry - 3cr.
- ANTH6360 - Research Design and Quantitative Methods in Archaeology - 3cr.
- ANTH6370 - GIS in Archaeology - 3cr.
- DATA6330 - Data Pipeline Engineering - 3cr.
- DATA6500 - Python Programming for Analytics - 3cr.

Methods Elective (3 credits)

Complete at least 1 of the following courses:

- ANTH6200 - Anthropological Perspectives on Conservation - 3cr.
- ANTH6320 - Zooarchaeology - 3cr.

Applied Remote Sensing and Geospatial Artificial Intelligence - Post-Bachelor's Certificate

Program Overview

College
College of Agriculture & Natural Resources

Department
Environment & Society

Program Level
Graduate

About this Degree

The Applied Remote Sensing and Geospatial Artificial Intelligence (GeoAI) Post-Bachelor's Certificate introduces advanced students, with a Geographic Information Science (GIS) background, to the development and application of artificial intelligence to remote sensing and data-driven geospatial methods. Remote sensing via satellites and drones and advanced geospatial science tools that harness GeoAI allow for analyzing large amounts of data to understand and address a variety of complex social, economic, and environmental challenges facing society. Over the past few decades, technological advancements, the democratization of geospatial information, and the proliferation of consumer-grade drones have made high-resolution imagery and data more accessible than ever before, generating new demand for individuals skilled in gathering, analyzing, and delivering geospatial products. As automation through machine learning increases efficiency, the role humans play is transforming, moving from lower-level data management tasks to higher-level tasks of problem definition, inquiry, and innovation. Humans must engage with, troubleshoot, and guide GeoAI efforts, drawing upon critical thinking, creative problem-solving, complex reasoning, the application of emotional intelligence, and other distinctively human capabilities.

The Applied Remote Sensing and GeoAI Post-Bachelor's Certificate will prepare post-baccalaureate students at the convergence of geospatial analysis, remote sensing, and artificial intelligence for opportunities for innovation across various industry and government sectors, including for example environmental monitoring, urban planning, agriculture, disaster planning and response, and natural resource management. Students can pair the certificate with the Master of Natural Resources or another graduate degree program, or they can pursue it as a standalone certificate. Students also can pursue both the Geographic Information Science Post-Baccalaureate Certificate and the Applied Remote Sensing and GeoAI Post-Baccalaureate Certificate for simultaneously broad and deep skillsets in emerging geospatial technologies. **Participants may complete the certificate in one year.**

Program requirements consist of 12-13 credits of coursework including a capstone experience that consists of a one-credit project design and implementation experience under supervision of program faculty. The certificate can be completed fully online, or with a combination of online and in-person courses for enrolled graduate students at the Logan campus.

Program website: https://qanr.usu.edu/mnr/geo-ai-certificate

Admission Requirements for this Program

For admission to the program please follow the instructions below:

- Experience in Geographic Information Science (GIS) is required for admission. Students without such a background should first complete coursework through the offered GIS Certificate.
- Applicants go to applynow.usu.edu. Choose the graduate application and then choose Applied Remote Sensing and GeoAI Post-Bachelor's Certificate application.
- Applicant must provide an official transcript showing that they have been awarded a bachelor's degree or higher. Please send official transcripts to the following address: 0900 Old Main Hill, Logan UT 84322-0900. Official electronic transcripts may be sent to graduateschool@usu.edu from the institution. (If you've attended USU we will obtain your transcripts.)

- Email the Program Coordinator for a promo code to waive $30.00 of the application fee (the resulting application fee is $25.00).

Students pursuing the Applied Remote Sensing and GeoAI Post-Bachelor's Certificate are not required to be enrolled in a graduate degree program. However, credits obtained from the certificate may be applied toward a graduate degree. Please contact the Program Coordinator if you have any questions.

Type
Completion Requirement

Remote Sensing and GeoAI Core (9 credits)

Complete ALL of the following Courses:

- NR6805 - Introduction to Geospatial Artificial Intelligence: The Remote Sensing and GeoAI Frontier - 3cr.
- NR6815 - Insights from Above: Processing and Analyzing Drone Data - 1cr.
- NR6825 - Geospatial Artificial Intelligence, Ethics, & Society - 1cr.
- NR6835 - Geovisualization for Remote Sensing Applications - 1cr.
- NR6855 - Advanced Geospatial Artificial Intelligence - 3cr.

Certificate Elective (2-3 credits)

Complete 2-3 credits from the following list of courses. With advance approval, a different course, including from the Natural Resources Distance Learning Consortium (NRDLC), can be used to meet this elective requirement. Elective selection should address any gaps in GIS or remote sensing knowledge or skills.

Earn at least 2 credits from the following:

- GEOG6220 - Data Visualization Principles and Practice - 3cr.
- NR6880 - Advanced Remote Sensing & GeoAI Internship - 2cr.
- NR6930 - Advanced GIS for Natural Resource Applications - 3cr.
- NR6940 - Principles of Remote Sensing of Natural Resources - 3cr.
- NR6950 - Geospatial Analysis for Natural Resource Management - 3cr.
- NR6960 - Python Programming for GIS - 3cr.

Capstone Project Course (1 credit)

Complete at least one credit of the capstone experience.

Earn at least 1 credits from the following:

- NR6890 - Advanced Project Design and Implementation for Remote Sensing & GeoAI - 1cr.

Logan Campus Student Options

Students also enrolled in a Logan Campus graduate program may substitute the following courses for the certificate. Please contact the program advisor for details of these substitutions.

Complete ANY of the following Courses:

- GEOG6300 - Geospatial Analysis with R - 3cr.
- GEOG6500 - Advanced Geographic Information Sciences (GIS) - 3cr.
- GEOG6800 - GIS Advanced Individual Projects - 1cr.
- GEOG6805 - Introduction to Geospatial Artificial Intelligence: The Remote Sensing and GeoAI Frontier - 3cr.
- GEOG6815 - Insights from Above: Processing and Analyzing Drone Data - 1cr.
- GEOG6825 - Geospatial Artificial Intelligence, Ethics, & Society - 1cr.
- GEOG6835 - Geovisualization for Remote Sensing Applications - 1cr.
- GEOG6855 - Advanced Geospatial Artificial Intelligence - 3cr.
- GEOG6880 - Advanced Remote Sensing & GeoAI Internship - 2cr.
- GEOG6890 - Advanced Project Design and Implementation for Remote Sensing & GeoAI - 1cr.

Program Learning Outcomes

Program Learning Outcomes

Upon successful completion, graduate students will possess in-depth knowledge of advanced GeoAI algorithms and applications. Key objectives include advanced skills in geospatial machine and deep learning techniques, data ethics, and advanced geovisualization. Certificate earners will be prepared to contribute to advancements in the field.

Arabic Studies - Minor

Program Overview

College
College of Arts & Sciences

Department
World Languages and Cultures

Program Level
Undergraduate

About this Degree

Students will develop Arabic language proficiency and communications skills, critical thinking skills, analysis skills, and intercultural competence skills, all valuable for today's global workplace. The Arabic minor familiarizes learners with Arabic-speaking cultures and regions. Students with prior language experience should take the Language Proficiency and Placement test through USU Department of World Languages & Cultures, to potentially "test out of" some prerequisites and to be placed in the appropriate proficiency level. An Arabic Major emphasis is also available.

Admission Requirements for this Program

2.0 GPA minimum

Program Requirements

Total Credits Required In Program Coursework
15

Total Credits Required To Earn This Credential
15

Simple Requisites

Program Requirements

Must complete a minimum of at least 6 Arabic language credits at the second-year intermediate level of ARBC2010 ARABIC SECOND YR I and/or above, plus must complete choice of 9 credits from the list of electives below.

Section 1

Type
Completion Requirement

Required Courses

Must complete a minimum of at least 6 language credits at the second-year intermediate level (2010) or above. Must complete 6 additional credits selected from the list of electives, in addition to the minimum of 6 credits in Arabic language courses; students may choose courses taught in Arabic or courses taught in English for these credits.

Fulfill ALL of the following requirements:

Arabic Language Courses (6 credits)

Students must complete at least 6 language credits at the intermediate level (2010) or above.

Earn at least 6 credits from the following:

- ARBC2010 - Intermediate Standard Arabic Second Year I - 4cr.
- ARBC2020 - Intermediate Standard Arabic Second Year II - 4cr.
- ARBC3010 - Advanced Arabic I - 3cr.
- ARBC3020 - Advanced Arabic II - 3cr.

AND

Culture and Linguistics Courses (9 credits)

Must complete a minimum of 9 additional credits selected from any courses on this list of electives or additional ARBC language courses.

Earn at least 9 credits from the following:

- ARBC2800 - Study-Abroad Arabic Language and Society II - 1cr.
- ARBC3030 - Introduction to Islam (DHA) - 3cr.
- ARBC4040 - Language and Culture of the Arab World (DHA) - 3cr.
- ARBC3800 - Study Abroad in Jordan - 3cr.
- ARBC4920 - Arabic Language Tutoring - 1cr.
- ARTH3510 - Islamic Visual Cultures (CI/DHA) - 3cr.
- HIST3410 - The Modern Middle East - 3cr.
- HIST3030 - Introduction to Islam (DHA) - 3cr.
- HIST4560 - Women in Islam (DHA) - 3cr.
- HIST4565 - Medieval Islam (DHA) - 3cr.
- HIST4566 - Global Faces of Islam (DHA) - 3cr.
- LANG3990 - Special Topics - 1cr.
- LING3100 - Language in Social Context - 3cr.
- LING4100 - The Study of Language - 3cr.
- LING3200 - Introduction to Linguistics (DSS) - 3cr.
- POLS3230 - Middle Eastern Government and Politics - 3cr.
- POLS4230 - Issues in Middle East Politics - 3cr.
- RELS3030 - Introduction to Islam (DHA) - 3cr.

Art - Minor

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

Program Requirements

Total Credits Required To Earn This Credential
18

Simple Requisites

Program Requirements

- To plan a minor in Art, students should meet with an advisor.
- One half of the credits taken for the Art Minor must be taken at Utah State University.
- Minimum ART GPA: 2.75
- Minimum grade in ART and ARTH courses: C-
- No "P" grade accepted

Section 1

Type
Completion Requirement

Generally, the minimum requirements inlcude:

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

• Any ART class (3 credits)

Program Requirements

Total Credits Required To Earn This Credential
18

Simple Requisites

Program Requirements

- Minimum ARTH GPA: 2.75
- Minimum grade in ARTH courses: C-
- No "P" grades accepted.

Section 1

Type
Completion Requirement

Program Requirements (6 credits)

Earn a minimum grade of C- in the following:

- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

Section 2

Type
Completion Requirement

Plus 12 credits from the Art History Group

Art History Group Example:
Example of course selection:

- ARTH3820 THE HISTORY OF PHOTOGRAPHY
- ARTH3720 RENAISSANCE ART (CI)
- ARTH3740 ART OF A-G: 1872-1945 (CI)
- ARTH3750 MOD TO PO-MO:1945 - 1989(CI)
- ARTH4790 ART HIST SEMINAR/SPEC PROBLEMS

Additional Comments:
NOTE:

USU does not offer an art teaching minor for secondary teachers. Students choosing to train for teaching art in secondary schools must complete the art education major listed under art specialties and must comply with all requirements listed by the Secondary Education Program of the School of Teacher Education and Leadership (TEAL).

Art History - BA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree

The Bachelor of Arts in Art History offers undergraduates the opportunity to build a strong, interdisciplinary foundation for careers in art-related fields and other fields in which in-depth critical understanding of visual communication plays a central role.

The Bachelor of Arts in Art History, as defined by NASAD (the National Association of Schools of Art and Design), "requires a thorough grounding in the liberal arts with a concentration of coursework in art and art history," including "a general knowledge of the monuments and principal artists of all major art periods of the past…augmented by study in greater depth and precision of several cultures and periods…[and] study at the advanced level…including theory, analysis and criticism."

- For more information about Art History, see the department website.
- Admitted and current students must meet with an advisor.
- NOTE: Courses must be decided upon in consultation with a member of the Art History faculty.
- There are two different tracks available (see Track 1 suggested degree map or Track 2 suggested degree map).
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) of the General Education Requirements.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing.
- Transfer students from other institutions or other programs at USU are admitted with a 3.0 GPA.

Program Requirements

Total Credits Required In Program Coursework
45

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

Additional Requirements

A GPA of 3.0 is required for the BA degree in Art History. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Major requirements may *not* be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR.

Upon completion of the program, students are asked to assemble a portfolio of their work documenting their progress and demonstrating the development of their research and writing skills.

Art History - BA

Type
Completion Requirement

Art History Foundation Requirements (7 credits)

Complete ALL of the following Courses:

- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation requirement.

Art History Creative Elective (3 credits)

Complete at least 1 of the following courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.

History Elective (6 credits)

Complete at least 2 of the following courses:

- HIST1100 - European History to 1500 (BHU) - 3cr.
- HIST1110 - European History from 1500 (BHU) - 3cr.
- HIST1500 - Pre-Modern World (BHU) - 3cr.
- HIST1510 - The Modern World (BHU) - 3cr.
- HIST1700 - American History (BAI) - 3cr.

Requirements - Track 1 (29 credits)

Complete ALL of the following Courses:

- ART2700 - Fine Art Seminar - 0.5cr.
- ART4900 - Advanced Internship/Coop - 1cr.

• ARTH 3000 Level or Higher (Upper-Division Art History) (24 credits)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.

Requirements - Track 2 (29 credits)

Complete ALL of the following Courses:

- ART2700 - Fine Art Seminar - 0.5cr.
- ART4900 - Advanced Internship/Coop - 1cr.

• ARTH 3000 Level or Higher (Upper-Division Art History) (take 24 credits in related fields as designated by area advisor)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Art - AA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree
An Associate of Arts degree in Art will allow Utah State University Eastern (USUE) students interested in art a practical credential for their coursework. Students will follow the current USU Department of Art and Design core curriculum, completing this degree track in a two-year time span. The USU Associate of Arts degree in Art aims to give students the technical and academic knowledge and transferable skills they need to go on to employment or as a stackable credential for further study in a BS, BA, or BFA program.

- For more information about Art and Design, please see the department website at art.usu.edu/.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.

Admission Requirements for this Program
- New freshmen must be admitted to USU in Good Standing.
- Transfer students from other institutions or other programs at USU must have a 2.0 GPA.

Program Requirements

Total Credits Required In Program Coursework

Total Credits Required To Earn This Credential
60

Simple Requisites

Program Requirements

Utah State University (USU) Associate of Arts degree in Art for its Eastern campus requires a minimum of 60 total credits, with 13 credits of required Art courses, 6 credits of Art History courses, 12 credits of elective Art courses, and 21 required General Education credits, and meeting the foreign language requirement for the Associate of Arts.

- The Utah State University Associate of Arts degree in Art requires a minimum of 60 total credits:
  - 13 credits of required Art courses
  - 6 credits of Art History courses
  - 12 credits of elective Art courses
  - 21 required General Education credits
  - Associate of Arts foreign language requirement
- All courses taken to satisfy the requirements for the Utah State University Associate of Arts degree in Art must be taken for a letter grade and must be passed with a grade of C- or better.
- To remain in good standing and graduate with an Associate of Arts degree in Art, a student must maintain a minimum overall grade point average of 2.0, and a GPA of 2.75 in Art and Art History courses.

Art: Art Education - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree

The **BFA** in Art Education is a professional degree requiring above-average accomplishment in art. Students must first apply and be accepted to a specific emphasis area. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program. This degree fulfills the requirements for entrance into graduate schools of art.

Upon successful completion of all degree requirements, students will be eligible to apply for a Utah Educator License. The following links provide information about licensure:

- Earning a Utah Educator License: https://www.schools.utah.gov/curr/licensing/earning?mid=2465&aid=8
- Information about Licensure in Other States (Education Compliance Table): https://cehs.usu.edu/files/teacher-education/EducationLicensureComplianceTableApril2022.pdf
- For more information about Art Education, see the department website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the General Education Requirements of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 3.0 GPA. Students must also pass a competitive portfolio review. Space is limited. See department website for more information.

Program Requirements

Total Credits Required In Program Coursework
80

Total Credits Required To Earn This Credential
122

Simple Requisites

Program Requirements

This degree requires 80 semester credits in Art, leaving 42 credits to fulfill all other General Education, University Studies and Secondary Education requirements.

Additional Requirements

A GPA of 3.00 is required for the BFA degree. A grade of B- or better is required in all art (ART), art history (ARTH) and secondary education classes. Major requirements may *not* be taken for a pass/fail grade, except for courses only taught pass/fail.

Art: Art Education - BFA

Type
Completion Requirement

Art Major: Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Major: Art Education Requirements (64 credits)

Complete ALL of the following Courses:

- ART2200 - Painting I - 3cr.

Art - BA

Program Overview

College	Department	Program Level
College of Arts & Sciences	Art and Design	Undergraduate

About this Degree

The BA degree is a general art degree for the student who is not interested in specializing in one area of art. Students who desire to receive a BA degree in Art must meet the university language requirements and must earn a minimum of 50 semester credits in Art, leaving approximately 54 credits to fulfill all other General Education and University Studies requirements. This degree does not fulfill the requirements for entrance into the graduate schools of art.

- For more information about Art, see the department website here.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited.
- See department website for more information.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
	120

Simple Requisites

Program Requirements

Additional Requirements

A cumulative GPA of 2.75 is required for the BA degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Major requirements may *not* be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR.

Art Major

Type

Completion Requirement

Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation requirement.

Major Requirements (21 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2400 - Introduction to Graphic Design - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.
- ART2810 - Photography I - 3cr.

Major Remaining Requirements (13 credits)

Complete ALL of the following Courses:

- ART2700 - Fine Art Seminar - 0.5cr.

• ART 3000- or 4000-level Art Electives (11 credits)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Art - BS

Program Overview

College	Department	Program Level
College of Arts & Sciences	Art and Design	Undergraduate

About this Degree
The BS degree is a general art degree for the student who is not interested in specializing in one area of art. This degree requires 50 semester credits in Art courses, leaving 70 credits to fulfill all other General Education and University Studies requirements. This degree does not fulfill the requirements for entrance into graduate schools of art.

- For more information about Art, see the department website here.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program
- New freshmen must be admitted to USU in Good Standing as Pre-Art, or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited.
- See department website for more information.

50	120

Simple Requisites

Program Requirements

Additional Requirements

A cumulative GPA of 2.75 is required for the BS degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Major requirements may not be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR.

Art Major

Type
Completion Requirement

Foundations Requirements (16 credits)

Complete ALL of the following Courses:
- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation requirement.

Major Requirements (21 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2400 - Introduction to Graphic Design - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.
- ART2810 - Photography I - 3cr.

Major Remaining Requirements (13 credits)

Complete ALL of the following Courses:

- ART2700 - Fine Art Seminar - 0.5cr.

• ART 3000- or 4000-level Art Electives (11 credits)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Art: Ceramics - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree

The **BFA** is a professional degree requiring above-average accomplishment in art. Students must first apply and be accepted to a specific emphasis area.

Only students demonstrating considerable promise will be accepted for this more demanding professional degree program.

This degree fulfills the requirements for entrance into graduate schools of art.

- For more information about Ceramics, see the Department of Art and Design website.
- Admitted and current students should also meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the General Education Requirements of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited. See department website for more information.

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

This degree requires 78 semester credits in Art courses, leaving 42 credits to fulfill all other General Education and University Studies requirements.

Additional Requirements
A cumulative GPA of 2.75 is required for the BFA degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. A grade of C or better is required in CHEM1010 INTRO TO CHEMISTRY (BPS) or CHEM1110 GENERAL CHEMISTRY I (BPS) and GEO1010 INTRO TO GEOLOGY (BPS) or GEO1110 PHYSICAL GEOLOGY (BPS) classes. Courses for the major may *not* be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR and ART4915 BFA EXHIBITION.

Art - Ceramics Emphasis - BFA

Type
Completion Requirement

Art Major: Foundations Courses (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Major: Art Ceramics Core Requirements (9 credits)

Complete at least 3 of the following courses:

- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2400 - Introduction to Graphic Design - 3cr.
- ART2810 - Photography I - 3cr.

Art Major: Ceramics Requirements (59-60 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ART3650 - Intermediate Ceramics: Handbuilding - 3cr.
- ART3660 - Intermediate Ceramics: Throwing on the Potter's Wheel - 3cr.
- ART4640 - Technology of Ceramic Art - 3cr.
- ART4650 - Advanced Ceramic Studio - 3cr.
- ART4910 - BFA Professional Practice - 1cr.
- ART4915 - Senior BFA Exhibition - 1cr.
- CHEM1010 - Introduction to Chemistry (BPS) - 3cr. **OR** CHEM1110 - General Chemistry I (BPS) - 4cr.
- GEO1010 - Introduction to Geology (BPS) - 3cr. **OR** GEO1110 - Physical Geology (BPS) - 3cr.

● ART 3XXX or 4XXX - Art Elective (**4 credits**)
● ARTH 3000 Level or Higher (Upper-Division Art History) (**6 credits**)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.
2. ART4640 TECHNOLOGY OF CERAMIC ART - Take 12 credits.
3. ART4650 ADV CERAMIC STUDIO - Take 12 credits.

Art: Drawing and Painting - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree

The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program.

Students majoring in Art at USU have a world of options at their disposal. Each emphasis features in-depth coursework that encourages students to develop their own artistic ideas and style, in addition to solid foundation knowledge of artistic traditions throughout history. Professors are extremely talented artists as well as effective teachers, and they are dedicated to giving students individual attention and mentoring. The Department of Art has a competitive portfolio admission, which allows it to offer smaller classes where students receive individual time with professors. Students also have the opportunity to participate in faculty-supervised group and solo exhibitions.

Drawing and Painting: This emphasis includes the two-dimensional study of form and space, as well as the exploration of drawing and painting media, graphic elements, and visual dynamics.

This degree fulfills the requirements for entrance into graduate schools of art.

- For more information about The Department of Art and Design, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the General Education Requirements for the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited. See department website for more information.

Program Requirements

Total Credits Required In Program Coursework
78

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

This degree requires 78 semester credits in Art courses, leaving 42 credits to fulfill all other General Education and University Studies requirements.

Additional Requirements
A cumulative GPA of 2.75 is required for the BFA degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Courses may *not* be taken for a pass/fail grade, except ART2700 FINE ART SEMINAR and ART4915 BFA EXHIBITION.

Major Requirements (78 credits)

Type
Completion Requirement

Art Major: Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Major Drawing and Painting Requirements (6 credits)

Complete at least 2 of the following courses:

- ART2400 - Introduction to Graphic Design - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.

Art Major Drawing and Painting Printmaking Courses (3 credits)

Complete at least 1 of the following courses:

- ART3220 - Screen Printing - 3cr.
- ART3230 - Lithography - 3cr.
- ART3240 - Intaglio - 3cr.
- ART3250 - Relief Prints - 3cr.

Art Major: Drawing and Painting Courses (53 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ART2810 - Photography I - 3cr.
- ART3200 - Painting II - 3cr.
- ART3270 - Color: Theory and Practice - 3cr.
- ART4200 - Advanced Drawing and Painting Studio - 3cr.
- ART4210 - Figure Drawing & Painting - 3cr.
- ART4220 - Landscape Drawing and Painting - 3cr.
- ART4270 - Special Topics: Drawing and Painting - 3cr.
- ART4910 - BFA Professional Practice - 1cr.
- ART4915 - Senior BFA Exhibition - 1cr.
- ARTH3750 - High-Modernism To Post - Modernism: 1945-1989 (CI) - 3cr.

• ART 3000 Level or Higher - Art Electives (7 credits)
• ARTH 3000 Level or Higher (Upper-Division Art History) (3 credits)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.
2. ART4200 ADV DRAWING/PAINTING STUDIO - Take 6 credits
3. ART4270 ST: DRAWING AND PAINTING - Take 6 credits

Open Electives

Complete the following as needed:

Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student
- Check your Degree Works for requirements and completion.

Art: Graphic Design - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree
Students majoring in art at USU have a world of options at their disposal. Each emphasis features in-depth coursework that encourages students to develop their own artistic ideas and style, in addition to solid foundation knowledge of artistic traditions throughout history. Professors are extremely talented artists as well as effective teachers, and they are dedicated to giving students individual attention and mentoring. The Department of Art has a competitive portfolio admission, which allows it to offer smaller classes where students receive individual time with professors. Students also have the opportunity to participate in faculty-supervised group and solo exhibitions.

The **BFA** is a professional degree requiring above-average accomplishment in art. Students must first apply and be accepted to a specific emphasis area. Students receiving a **BS** do not have an emphasis, and instead have a non-specific, general art degree. To receive a **BA**, students must also gain proficiency in one or more foreign languages.

Graphic Design Emphasis:
Students in graphic design complete a variety of courses that involve working with symbols, trademarks, typography, layout, and all formats of print and publication design. Illustration, digital imaging, motion graphics, animation, and interactive media are also part of the graphic design curriculum.

- For more information about Graphic Design, see our website.
- Admitted and current students should also meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program
- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited.
- See department website for more information.

Simple Requisites

Program Requirements

The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program. This degree requires 78 semester credits in Art courses, leaving 42 credits to fulfill all other General Education and University Studies requirements. A cumulative GPA of 2.75 is required for the BFA degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Courses may not be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR and ART4915 BFA EXHIBITION. This degree fulfills the requirements for entrance into graduate schools of art.

Students must complete the General Education Requirements.

Students must also complete the University Studies Requirements.

- For most students, courses taken for the major will fulfill the Communications Intensive (CI) requirement.
- Students must take one course having a QI designation to fulfill the Quantitative Intensive (QI) requirement.
- Complete at least 2 credits in approved 3000-level or above courses from each of the following two categories: Depth Life and Physical Sciences (DSC) and Depth Social Sciences (DSS).

Art - Graphic Design Emphasis - BFA

Type

Completion Requirement

Art Major: Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Major: Graphic Design Requirements (18 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.
- ART2810 - Photography I - 3cr.

Art Major: Graphic Design Elective Courses (11 credits)

Earn at least 11 credits from the following:

- ART3370 - Illustration Concepts - 3cr.
- ART4425 - Advanced Branding/Packaging Design - 3cr.
- ART4430 - Graphic Interface Design II - 3cr.
- ART4445 - Book Cover Design - 3cr.
- ART4455 - Advanced Typography - 3cr.

Art Major: Graphic Design Courses (33 credits)

Complete ALL of the following Courses:

- ART2400 - Introduction to Graphic Design - 3cr.
- ART3400 - Typography - 3cr.
- ART3410 - History of Graphic Design Studio - 3cr.
- ART3420 - Hashimoto Communication Arts Seminar - 1cr.
- ART4410 - Graphic Interface Design I - 3cr.
- ART4420 - Brand Identity Design - 3cr.
- ART4440 - Type, Image, and Visual Continuity - 3cr.
- ART4450 - Senior Capstone - 3cr.

• ARTH 3000 Level or Higher (Upper-Division Art History) (**6 credits**)

NOTE:

1. ART3420 HASHIMOTO COMM ARTS SEMINAR - Take 6 credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Art - MFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Graduate

About this Degree
The Master of Fine Arts degree is the terminal degree in the visual arts field. The MFA program is designed to allow students to mature to a level of professional competence in the making of art. Related studies augment a rigorous studio program. The prospective student must exhibit both academic excellence and a well-developed personal artistic vision.

Specializations are available in Ceramics, Drawing and Painting, Graphic Design, Interior Architecture and Design, Photography, Printmaking, and Sculpture.

Admission Requirements for this Program
All applicants are required to have earned a BFA or BS degree in Art or BID degree in Interior Design, or its equivalent, including a minimum of 12 credits of art history from an accredited U.S. college or university or a similarly recognized international university. GPA in art courses must have been at least 3.0 on a 4-point scale

Program Requirements

Total Credits Required In Program Coursework
60

Total Credits Required To Earn This Credential
60

Simple Requisites

Program Requirements

Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades of C- or lower will not be accepted for a graduate degree. The Program of Study must include at least 15 semester credits at the level of 6000 or above.

Credits in the following areas are not acceptable in a degree program: foreign languages (unless included in an approved Program of Study), continuing graduate advisement, individual home study, military science, and courses numbered below 5000. A maximum of 12 credits in 5000-level courses may be accepted for a graduate degree.

Students must pass a first-year review at the end of the first year of completion of study (12-24 credits). The MFA thesis is a visual presentation, the equivalent of a written dissertation in other disciplines. The thesis exhibition is the single most important feature of the MFA program; the culmination of three or more years, of intensive study in a single discipline. Students earning a master's degree in other fields are required to write a written Master's Thesis. In the MFA, the Thesis Exhibition takes the place of the written thesis. This exhibition takes place during the student's final semester. In addition, students must pass an oral examination during the final semester of the graduate program. The "orals" are usually held during the time that the MFA thesis exhibition is on display. The student must also submit visual documentation of the thesis, in the form of a digital image portfolio to the library.

The MFA program is a resident program; it is not possible to complete the requirements for graduation by correspondence. Students must complete a minimum of four semesters in residence as full-time students. At least 24-semester credits for a master's degree must be from a committee-approved and a School of Graduate Studies-approved Program of Study from Utah State University.

For students not serving as graduate assistants who are otherwise employed on campus, 9 credits per semester is the minimum for full-time status. (12 credits is considered a maximum.) For students employed on campus, full-time status is

dependent upon the number of hours per week that the student works. For instance, for a graduate student who is employed on campus for 20 hours per week (.50 FTE), 6 credits is considered full time. Students in their last semester who require fewer credits to complete their Program of Study may also be considered full-time. A minimum of five semesters is thus required to complete the 60-credit program; most students require three years.

The MFA must be completed within six years of entering the degree program. Additional time may be requested by the student's committee and submitted to the Vice Provost of Graduate Studies for review. Coursework over eight years old at the time of degree completion may not be used for a graduate degree unless it is revalidated.

Form Requirements

- Supervisory Committee
- Program of Study
- Appointment for Examination
- Record of Examination
- SGS and library review and approval

Art - MFA

Type
Completion Requirement

Required Credit (60 credits)

Students must earn 60 credits, to include the following courses and designated course credit.

Earn at least 60 credits from the following:

- ART6900 - Professional Practices - 3cr.
- ARTH6755 - Contemporary Art: 1989 to the present - 3cr.
- ART6910 - Graduate Interdisciplinary Critique - 3cr.
- ART6970 - Research and Thesis - 3cr.

• 42 credits of graduate level studio, including 6 credits outside of the declared emphasis area (consult professor before registering)
• 3 credits of additional Art History (6000 level), area specific theory, or theory-related credits outside the department as advised by the Thesis Advisory Committee
• 3 credits outside the Department of Art and Design as specified by the supervisory committee

NOTE:

1. ART6900 PROFESSIONAL PRACTICES - Graduate Seminar: Professional Practices (required for studio arts disciplines; optional for graphic design and interior design students in the case that a related course, more specific to their area of study, be taken in its place at the recommendation of the students Thesis Advisory Committee)
2. ARTH6755 CONTEMPORARY ART - Or other graduate level Art History class at the recommendation of your thesis supervisory committee

Art: Photography - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree
Students majoring in art at USU have a world of options at their disposal. Each emphasis features in-depth coursework that encourages students to develop their own artistic ideas and style, in addition to solid foundation knowledge of artistic traditions throughout history. Professors are extremely talented artists as well as effective teachers, and they are dedicated to giving students individual attention and mentoring. The Department of Art has a competitive portfolio admission, which allows it to offer smaller classes where students receive individual time with professors. Students also have the opportunity to participate in faculty-supervised group and solo exhibition.

The **BFA** is a professional degree requiring above-average accomplishment in art. Students must first apply and be accepted to a specific emphasis area. Students receiving a **BS** do not have an emphasis, and instead have a non-specific, general art degree. To receive a **BA**, students must also gain proficiency in one or more foreign languages.

Photography Emphasis:
Rooted in fine art and documentary traditions and guided in our belief in photography's critical role in contemporary culture, USU Photo guides students in developing thoughtful visual practices marked by rigor, empathy, and community engagement. Led by renowned faculty mentors, students incorporate a range of techniques–from 19th-cen. and darkroom processes to digital technologies–and are supported through generous resources and state-of-the-art equipment.

- For more information about Photography, see the Department of Art and Design website.
- Admitted and current students should also meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) requirement.

Admission Requirements for this Program
- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited.
- See department website for more information.

Simple Requisites

Program Requirements

The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program. This degree requires 78 semester credits in Art courses, leaving 42 credits to fulfill all other General Education and University Studies requirements. A cumulative GPA of 2.75 is required for the BFA degree. A grade of B- or better is required in all art (ART)

and art history (ARTH) classes. Courses may *not* be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR and ART4915 BFA EXHIBITION. This degree fulfills the requirements for entrance into graduate schools of art.

- Students must complete the General Education Requirements.

  Students must also complete the University Studies Requirements.

  - For most students, courses taken for the major will fulfill the Communications Intensive (CI) requirement.
  - Students must take one course having a QI designation to fulfill the Quantitative Intensive (QI) requirement.

  Complete at least 2 credits in approved 3000-level or above courses from each of the following two categories: Depth Life and Physical Sciences (DSC) and Depth Social Sciences (DSS).

Art - Photography Emphasis - BFA

Type
Completion Requirement

Art Major: Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Photography Requirements (12 credits)

Complete at least 4 of the following courses:

- ART2110 - Drawing II - 3cr.
- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.

Art Major: Photography Courses (47 credits)

Complete ALL of the following Courses:

- ART2400 - Introduction to Graphic Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ART2810 - Photography I - 3cr.
- ART3810 - Photography II - 3cr.
- ART4810 - Digital Imaging - 3cr. (Inactive)
- ART3825 - Analog Photography - 3cr.
- ART4835 - Theory of Photography - 3cr.
- ART4875 - Studio Lighting - 3cr.
- ART4885 - Advanced Photography Studio - 3cr.
- ART4910 - BFA Professional Practice - 1cr.
- ART4915 - Senior BFA Exhibition - 1cr.
- ARTH3820 - The History of Photography - 3cr.

- ART 3000 Level or Higher - Art Electives (**7 credits**)
- ARTH 3000 Level or Higher (Upper-Division Art History) (**3 credits**)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.
2. ART4885 ADVANCED PHOTOGRAPHY STUDIO - Take 12 credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Art: Printmaking - BFA

Program Overview

College
College of Arts & Sciences

Department
Art and Design

Program Level
Undergraduate

About this Degree
The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program.

Students majoring in art at USU have a world of options at their disposal. Each emphasis features in-depth coursework that encourages students to develop their own artistic ideas and style, in addition to solid foundation knowledge of artistic traditions throughout history. Professors are extremely talented artists as well as effective teachers, and they are dedicated to giving students individual attention and mentoring. The Department of Art has a competitive portfolio admission, which allows it to offer smaller classes where students receive individual time with professors. Students also have the opportunity to participate in faculty-supervised group and solo exhibitions.

Printmaking: Printmaking covers the process of creating prints with an element of originality, rather than just a photographic reproduction of the painting. It can be done by etching, woodcut, silk screen, lino cut, etc.

Admission Requirements for this Program
- New freshmen: Admitted to USU in Good Standing as Pre-Art or Pre-ID
- Transfer students from other institutions or other programs at USU: 2.75 GPA.
- Students must pass a competitive portfolio review. Space is limited. See department website for more information.

Art: Sculpture - BFA

Program Overview

College	Department	Program Level
College of Arts & Sciences	Art and Design	Undergraduate

About this Degree

The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program.

Students majoring in art at USU have a world of options at their disposal. Each emphasis features in-depth coursework that encourages students to develop their own artistic ideas and style, in addition to solid foundation knowledge of artistic traditions throughout history. Professors are extremely talented artists as well as effective teachers, and they are dedicated to giving students individual attention and mentoring. The Department of Art has a competitive portfolio admission, which allows it to offer smaller classes where students receive individual time with professors. Students also have the opportunity to participate in faculty-supervised group and solo exhibitions.

Sculpture: Students in the sculpture emphasis investigate specific problems involving technical, aesthetic, and conceptual considerations of sculptures. Students will also develop their own direction based on their experience with form, materials, and techniques, and their understanding of traditional concerns and contemporary issues.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing as Pre-Art or Pre-ID.
- Transfer students from other institutions or other programs at USU are admitted with a 2.75 GPA. Students must also pass a competitive portfolio review. Space is limited. See department website for more information.

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
78	120

Simple Requisites

Program Requirements

This degree requires 78 semester credits in Art courses, leaving 42 credits to fulfill all other General Education and University Studies requirements. This degree fulfills the requirements for entrance into graduate schools of art.

- For more information about Sculpture, see the Department of Art and Design website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is the fulfillment of the Quantitative Literacy (QL) requirement.

Additional Requirements

A cumulative GPA of 2.75 is required for the BFA degree. A grade of B- or better is required in all art (ART) and art history (ARTH) classes. Courses may *not* be taken on a pass/fail basis, except ART2700 FINE ART SEMINAR and ART4915 BFA EXHIBITION.

Art - Sculpture Emphasis - BFA

Type
Completion Requirement

Art Major: Foundations Requirements (16 credits)

Complete ALL of the following Courses:

- ART1020 - Drawing I (BCA) - 3cr.
- ART1120 - Two-Dimensional Design - 3cr.
- ART1130 - Three-Dimensional Design - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ARTH2710 - Survey of Western Art: Prehistoric to Medieval (BHU) - 3cr.
- ARTH2720 - Survey of Western Art: Renaissance to Post-Modern (BHU) - 3cr.

NOTE:

1. ART2700 FINE ART SEMINAR - Take 1 credit for Foundation Requirement.

Art Major: Art Sculpture Core Requirements (6 credits)

Complete at least 2 of the following courses:

- ART2200 - Painting I - 3cr.
- ART2230 - Basic Printmaking - 3cr.
- ART2400 - Introduction to Graphic Design - 3cr.
- ART2810 - Photography I - 3cr.

Art Major: Sculpture Requirements (56 credits)

Complete ALL of the following Courses:

- ART2110 - Drawing II - 3cr.
- ART2600 - Basic Sculpture - 3cr.
- ART2650 - Introduction to Ceramics - 3cr.
- ART2700 - Fine Art Seminar - 0.5cr.
- ART3610 - Intermediate Sculpture - 3cr.
- ART3650 - Intermediate Ceramics: Handbuilding - 3cr.
- ART4260 - Life Drawing - 3cr.
- ART4610 - Sculpture Projects - 3cr.
- ART4630 - Figure Study for Sculpture - 3cr.
- ART4660 - Advanced Sculpture Studio - 1cr.
- ART4910 - BFA Professional Practice - 1cr.
- ART4915 - Senior BFA Exhibition - 1cr.

• ART 3000 Level or Higher - Art Electives (**6 credits**)
• ARTH 3000 Level or Higher (Upper-Division Art History) (**6 credits**)

NOTE:

1. ART2700 FINE ART SEMINAR - Take 2 additional credits.
2. ART4630 FIGURE STUDY FOR SCULPTURE - Take 6 credits.
3. ART4660 ADV SCULPTURE STUDIO - Take 13 credits.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Asian Studies - Minor

Program Overview

College	Department	Program Level
College of Arts & Sciences	World Languages and Cultures	Undergraduate

Program Requirements

Total Credits Required To Earn This Credential
20

Simple Requisites

Program Requirements
- **Total Credits:** 20
- **Grade Point Average to Declare Minor:** 2.5 Overall GPA
- **Grade Point Average to Graduate with Minor:** 2.5 GPA within minor coursework
- **USU Credit Requirement:** At least half (50 percent) of the credits earned for this minor must be earned at USU.
- **Minimum Grade Requirement:** All courses taken for the minor require a minimum grade of C- or better. Courses for the minor may not be taken on a pass/fail basis.
- **Note:** As many as 10 credits completed at other colleges or universities may be used to partially satisfy these requirements. For more information, students should contact the World Languages and Cultures advisor.

- ECON3530 - Comparative Economic Systems (DSS)(CI) - 3cr.
- FIN4300 - International Finance - 3cr.
- GEOG1300 - World Geography: Human and Environmental Dynamics (BSS) - 3cr.
- LANG4330 - Advanced Perspectives in Global Communication - 3cr.
- LING2100 - Languages in Global and Historical Context (BSS) - 3cr.
- LING3100 - Language in Social Context - 3cr.
- MSLE4590 - Marketing Strategy - 3cr.
- POLS2100 - Introduction to International Relations (BSS) - 3cr.
- POLS2200 - Comparative Politics (BSS) - 3cr.
- SOC3200 - Population and Society (DSS) - 3cr.
- SOC3600 - Finding Community in Today's Society (DSS) - 3cr.

Language Course Options

Complete 8 credits in any of the following:

Arabic

Complete ANY of the following Courses:
- ARBC1010 - Arabic First Year I - 4cr.
- ARBC1020 - Arabic First Year II - 4cr.
- ARBC2010 - Intermediate Standard Arabic Second Year I - 4cr.
- ARBC2020 - Intermediate Standard Arabic Second Year II - 4cr.
- ARBC3010 - Advanced Arabic I - 3cr.
- ARBC3020 - Advanced Arabic II - 3cr.

Chinese

Complete ANY of the following Courses:
- CHIN1010 - Chinese First Year I - 4cr.
- CHIN1020 - Chinese First Year II - 4cr.
- CHIN2010 - Chinese Second Year I - 4cr.
- CHIN2020 - Chinese Second Year II - 4cr.
- CHIN2050 - Chinese Conversation - 3cr.
- CHIN3010 - Chinese Third Year I - 4cr.
- CHIN3020 - Chinese Third Year II - 4cr.

Japanese

Complete ANY of the following Courses:
- JAPN1010 - Japanese First Year I - 4cr.
- JAPN1020 - Japanese First Year II - 4cr.
- JAPN2010 - Japanese Second Year I - 4cr.
- JAPN2020 - Japanese Second Year II - 4cr.
- JAPN3010 - Japanese Third Year I - 4cr.
- JAPN3020 - Japanese Third Year II - 4cr.
- JAPN4250 - Internship/Coop - 3cr.

Korean

Complete ANY of the following Courses:
- KOR1010 - Korean First Year I - 5cr.
- KOR1020 - Korean First Year II - 5cr.
- KOR2010 - Korean Second Year I - 5cr.
- KOR2020 - Korean Second Year II - 5cr.
- KOR3010 - Korean Third Year I - 4cr.

- KOR3020 - Korean Third Year II - 4cr.

Asian Studies - BA

Program Overview

College	Department	Program Level
College of Arts & Sciences	World Languages and Cultures	Undergraduate

About this Degree

The Asian studies program focuses on the study of peoples, cultures, and institutions of Asia. Coursework is multidisciplinary, consisting of history, geography, and Asian language classes. Through the program, students obtain an understanding of the foundation and functioning of political, economic, and social institutions of Asia. They also gain proficiency in at least one Asian language and develop an understanding of similarities and differences among Asian nations with respect to ethnicity, history, culture, religion, and institutions.

It is highly recommended, but not required, that students spend at least one term of their education participating in a study abroad program. Living and studying in Asia provides students with a greater depth of knowledge and experience that cannot be gained in a classroom setting.

- For more information about Asian Studies, please see the World Languages and Cultures website.
- Admitted and current students must meet with an academic advisor. Please make sure to consult regularly with your departmental advisor to confirm what courses will be available and to work out your plan of study.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is Quantitative Literacy (QL) course of the student's choice.

Admission Requirements for this Program

- New freshmen must be admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU must have a 2.50 GPA
- Grade Point Average to Declare Major: 2.5 Career GPA

Program Requirements

Total Credits Required In Program Coursework	Total Credits Required To Earn This Credential
33-34	120

Simple Requisites

Program Requirements

Additional Information

- **Grade Point Average to Graduate with Major**: 2.50 GPA within major coursework.
- **USU Credit Requirement:** At least half (50 percent) of the credits earned for this major must be earned at USU.
- **Minimum Grade Requirement**: All courses for the major require a minimum grade of **C-** or better. Courses for the major may not be taken on a pass/fail basis.
- ***Total Credits for Asian Studies Minor****: 20*

Students desiring to apply study abroad credits (CHIN1800 CHINESE I STUDY ABROAD, CHIN2800 CHINESE II STUDY ABROAD, CHIN3800 CHINESE III STUDY ABROAD, CHIN4800 CHINESE IV STUDY ABROAD) toward these degrees must obtain approval from the World Languages and Cultures office prior to participating.

CHIN2050 CHINESE CONVERSATION is a required transition course that is intended for students who have not had extensive experience living in a Chinese community. CHIN2050 CHINESE CONVERSATION is required after CHIN2010 CHINESE SECOND YR I and before CHIN3010 CHINESE THIRD YR I and does not count towards the Chinese minor. For students with at least one year of extensive experience speaking Mandarin Chinese in a Mandarin-speaking environment (e.g., returned missionaries), CHIN2050 CHINESE CONVERSATION is waived and the student should take CHIN3010 CHINESE THIRD YR I after they have tested in the World Languages and Cultures Department (Cantonese speakers should take CHIN2050 CHINESE CONVERSATION).

Bachelor of Arts Degree Language Requirement

A Bachelor of Arts (BA) degree signifies proficiency in one or more foreign languages. Specifically, the BA requirement may be completed in one of the following ways:

- Demonstration of proficiency in *one* foreign language by successful completion of one course at the 2020-level or higher (or its equivalent).
  OR
- Demonstration of proficiency in American Sign Language by successful completion of ASL4920 AMERICAN SIGN LANGUAGE IV and ASL4780 DEAF CULTURE, and by passing an exit interview.
  OR
- Demonstration of proficiency in *two* foreign languages by successful completion of the 1020 course level in one language ***and*** the 2010 course level in the second language (or its equivalent).
  OR
- Completion of an upper-division (3000-level or higher) foreign language grammar or literature course requiring the 2020 course level (or its equivalent) as a prerequisite. Conversation courses *cannot* be considered for satisfying this requirement.

For nonnative English-speaking students only:

- To meet the requirement of Asian studies major, non-native English speakers who are skipping third year language courses in Arabic, Chinese, Japanese, and Korean need to take the same amounts of credits (3-4 credits) from courses in Section A Core Requirements or Section B General Elective Requirements.
- Non-native English-speaking students may also consider the following options:
- Successful completion of the Intensive English Language Institute (IELI) program for international students.

OR

- TOEFL, Michigan, or IELI placement scores high enough to meet the University admission criteria.

Asian Studies - BA

Type
Completion Requirement

Major Requirements (33-34 credits)

See the following:

To graduate with a BA degree in Asian Studies, students must complete a minimum of 33-34 credits approved by the Asian Studies program director. The program must include a minimum of 18 credits selected from the Core Requirements, 12 credits from the General Electives, and 3-4 credits of one upper-division grammar course from the language of the student's choice. Course selections may need consultation with the Asian Studies program advisor.

A. Core Requirements (18 credits)

Earn at least 18 credits from the following:

- ARBC3030 - Introduction to Islam (DHA) - 3cr.
  OR RELS3030 - Introduction to Islam (DHA) - 3cr.
- ARBC4040 - Language and Culture of the Arab World (DHA) - 3cr.
- CHIN3090 - Introduction to Modern Chinese Literature and Film - 3cr.
- CHIN3100 - Readings in Contemporary Chinese Culture (DHA) - 3cr.
- CHIN3510 - Chinese Business Presentations - 3cr.
- CHIN3520 - Chinese Business Strategies - 3cr.
- CHIN3540 - Translating into and from Chinese (CI) - 3cr.
- CHIN3600 - Contemporary Children's Literature in Chinese - 3cr.
- CHIN4010 - Chinese Multimedia - 3cr.
- CHIN4030 - Love and Death in Chinese Film - 3cr.
- CHIN4090 - Readings in Masterworks of Classical Chinese Fiction - 3cr.
- CHIN4210 - Chinese/Sinophone Theatre and Performance - 3cr.
- ECON5510 - International Trade Theory - 3cr.
- HIST3410 - The Modern Middle East - 3cr.
- HIST3460 - Comparative Asian History (DHA) - 3cr.
- HIST3482 - Ancient China to 1800 (DHA) - 3cr.
- HIST3483 - Modern China 1800 to present (DHA) - 3cr.
- HIST3560 - Modern East Asia (DHA) - 3cr.
- HIST4150 - Japan, Europe, and the Early Modern World - 3cr.
- HIST4821 - World War II in Asia (DHA) - 3cr.
- JAPN3050 - Japanese Calligraphy - 1cr.
  OR ART3050 - Japanese Calligraphy - 1cr.
- JAPN3090 - Introduction to Japanese Literature - 3cr.
- JAPN3100 - Readings in Contemporary Japanese Culture - 3cr.
- JAPN3510 - Japanese for the Business Environment - 3cr.
- JAPN3560 - Studies in Japanese Film - 3cr.

- RELS4566 - Global Faces of Islam (DHA) - 3cr.
  OR HIST4566 - Global Faces of Islam (DHA) - 3cr.

● Or other topics courses that are focused on Asia

NOTE:

1. LANG3990 SPECIAL TOPICS - 3 credits required.

B. General Elective Requirements (12 credits)

CHIN3800 CHINESE III STUDY ABROAD and CHIN4800 CHINESE IV STUDY ABROAD are repeatable for credit.

Earn at least 12 credits from the following:
- ANTH1010 - Cultural Anthropology (BSS) - 3cr.
- ANTH2010 - Peoples of the Contemporary World (BSS) - 3cr.
- ANTH3160 - Anthropology of Religion (DSS) - 3cr.
- ANTH4100 - The Study of Language - 3cr.
  OR LING4100 - The Study of Language - 3cr.
- APEC5700 - Regional and Community Economic Development - 3cr.
- CMST1330 - Introduction to Global Communication (BSS) - 3cr.
- CMST3330 - Intercultural Communication (DSS) - 3cr.
- CMST4330 - Advanced Perspectives in Global Communication (CI) - 3cr.
- ECON3500 - Introduction to International Business and Economics (DSS) - 3cr.
- ECON3530 - Comparative Economic Systems (DSS)(CI) - 3cr.
- FIN4300 - International Finance - 3cr.
- GEOG1300 - World Geography: Human and Environmental Dynamics (BSS) - 3cr.
- LANG4330 - Advanced Perspectives in Global Communication - 3cr.
- LING2100 - Languages in Global and Historical Context (BSS) - 3cr.
- LING3100 - Language in Social Context - 3cr.
- MSLE4590 - Marketing Strategy - 3cr.
- POLS2100 - Introduction to International Relations (BSS) - 3cr.
- POLS2200 - Comparative Politics (BSS) - 3cr.
- CHIN3800 - Chinese III Study Abroad - 1cr.
- SOC3200 - Population and Society (DSS) - 3cr.
- SOC3600 - Finding Community in Today's Society (DSS) - 3cr.

C. Language Requirements (3-4 credits)

Students must have completed the equivalent of one of the 3010/3020 third year language courses from an Asian language, including Arabic, Chinese, Japanese and Korean (see the department for questions regarding other languages). The following are languages courses that will help fulfill that requirement:

Fulfill ANY of the following requirements:

Arabic

Complete ALL of the following Courses:
- ARBC3010 - Advanced Arabic I - 3cr.

OR

Chinese

Complete ALL of the following Courses:
- CHIN3010 - Chinese Third Year I - 4cr.
  OR CHIN3020 - Chinese Third Year II - 4cr.

OR

Japanese

Complete ALL of the following Courses:
- JAPN3010 - Japanese Third Year I - 4cr.
  OR JAPN3020 - Japanese Third Year II - 4cr.

OR

Korean

Complete ALL of the following Courses:
- KOR3010 - Korean Third Year I - 4cr.
  OR KOR3020 - Korean Third Year II - 4cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

American Sign Language - Minor

Program Overview

College
College of Education & Human Services

Department
Speech and Hearing Sciences

Program Level
Undergraduate

About this Degree

Students must complete the following requirements to receive a minor in American Sign Language. Learning American Sign Language can benefit students of any major as they will be able to communicate with deaf people/clients/personnel within their chosen professions. The minor in ASL provides an excellent background for students who wish to further their education by getting into the field of Deaf Education or Interpreting or related professions.

Program Requirements

Total Credits Required In Program Coursework
18

Total Credits Required To Earn This Credential
18

Simple Requisites

Program Requirements

Students must earn a grade of C or better in all of the courses required for the minor. Residency requirement: Students must complete at least two of the required courses through USU.

American Sign Language - Minor

Type
Completion Requirement

ASL Minor (18 credits)

Complete ALL of the following Courses:

- ASL1010 - American Sign Language I - 4cr.
- ASL1020 - American Sign Language II - 4cr.
- ASL2010 - American Sign Language III - 4cr.
- ASL2020 - American Sign Language IV - 4cr.
- ASL4780 - Deaf Culture - 3cr.

Agricultural Systems Technology and Agribusiness (Composite) - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

This degree is a combination of courses required for the agricultural systems technology degree and the agribusiness degree. USU is the only university in the state with this program. Students gain an understanding of agricultural, biological, and physical sciences, as well as technical and business managerial skills.

The composite program prepares graduates for managerial careers within the agriculture industry, including running a family farm or ranch. Graduates may also pursue other agricultural careers, such as working for an agricultural equipment corporation, managing a machinery dealership, serving as a sales representative for an equipment company, or serving as a farm or ranch manager.

A dual degree option (meaning students graduate with two separate degrees) is also available through the Applied Economics Department. The difference is that students in the composite program are not required to take as many higher-level math classes and theoretical economics classes.

- For more information about Agricultural Systems Technology, see the website.
- Admitted and current students must meet with an advisor. Contact Allie East, allie.east@usu.edu, 435-797-2194 for advising.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Agricultural Systems Technology and Agribusiness (Composite) - BS Required Courses

Type
Completion Requirement

Applied Economics and Economics Courses (36 credits)

Complete ALL of the following Courses:

- ACCT2010 - Financial Accounting Principles - 3cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.

- APEC2120 - Small Firm Accounting Basics - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
- APEC5010 - Firm Marketing and Price Analysis (QI) - 3cr.
- APEC5015 - Applied Economics for Decision Making (QI) - 3cr.
- APEC5020 - Strategic Firm Management (CI) - 3cr.
- APEC5940 - U.S. Agricultural Policy Analysis - 3cr.
  OR APEC5950 - Applied Economics Policy Analysis - 3cr.

Agricultural Systems Courses (24 credits)

Complete ALL of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE3600 - Data Management of Agricultural Systems (QI) - 3cr.
- ASTE4100 - Agricultural Structures and Environment (QI) - 3cr.
- ASTE5260 - Environmental Impacts of Agricultural Systems (CI) - 3cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Technical Requirements (28 credits)

Complete ALL of the following Courses:

- ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.
- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- MATH1050 - College Algebra (QL) - 4cr.
- MGT3350 - Legal and Ethical Environment of Business - 3cr.
  OR BUSN2050 - Business Law - 3cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.

Required

Earn at least 3 credits from the following:

- ASTE4250 - Occupational Experiences in Agriculture - 1cr.

Open Electives

Complete the Following as Needed:

Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Agricultural Systems Technology - Minor

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

The agricultural systems technology minor provides a foundation in applying technical skills related to power and machine systems used in agriculture and food systems. Coursework focuses on management, use, and troubleshooting of technology.

For more information on this minor, contact the academic advisor:

Allie East, allie.east@usu.edu, 435-797-2194

Agricultural Systems Technology - Agribusiness Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

A degree in Agricultural Systems Technology prepares individuals to manage agricultural systems and agribusinesses with the application of sound technical, economical, and environmental practices. The focal point of the program is on the management, use, and troubleshooting of agricultural technology.

Students' coursework typically involves a broad foundation through real-world instruction in power and machine systems, natural resources conservation, electricity and electronics, precision agriculture technologies, and agricultural structural systems.

Students have the option to take electives to focus their studies in one of three emphases: **Agribusiness**, **Agricultural Machinery and Technology, or Agricultural Operations.**

An **Agribusiness** emphasis provides in-depth, technical education in agricultural economics and business management. It is designed to provide basic knowledge of business concepts and approaches, as well as an understanding of current agricultural changes. This emphasis is for students who wish to become managers in the ag industry. Students take courses in agricultural economics, agricultural business, and agricultural mechanics.

An **Agricultural Machinery and Technology** emphasis provides a broad understanding of agriculture with a depth of understanding related to using machinery and technology used in production practices. Students take courses in agricultural machinery, unmanned aerial systems, hydraulics, and electrical systems.

An **Agricultural Operations** emphasis provides a systems approach for students who wish to efficiently manage a crop or livestock production operation, or make a positive contribution on a multi-generational farm and/or ranch. Students in this 24-credit emphasis strengthen their knowledge and ability in animal and plant science to meet the variety of challenges that face agriculture today.

- For more information about Agricultural Systems Technology, see the website.
- Admitted and current students must meet with an advisor.
- For more information, click on this link or contact the academic advisor, Allie East at allie.east@usu.edu or 435-797-2194.
- Choose to emphasize in Agricultural Machinery and Technology, Agribusiness or Agricultural Operations. 24 credits are required.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Agricultural Systems Technology - Agribusiness Emphasis - BS Course Requirements

Type
Completion Requirement

Technical Requirements (27 credits)

Complete ALL of the following Courses:

- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
  OR ECN1500 - Introduction to Macroeconomics - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.

Required Communications Course (3 credits)

Complete ALL of the following Courses:

- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

Agricultural Systems Courses (24 credits)

Complete ALL of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE3600 - Data Management of Agricultural Systems (QI) - 3cr.
- ASTE4100 - Agricultural Structures and Environment (QI) - 3cr.
- ASTE5260 - Environmental Impacts of Agricultural Systems (CI) - 3cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Agribusiness Emphasis (24 credits)

Agricultural Systems Technology students may elect to concentrate their coursework within one of the three major emphases: Agribusiness, Agricultural Mechanization, or Farm and Ranch Operations.

Complete ALL of the following Courses:

- APEC3310 - Analytical Methods in Applied Economics (QI) - 3cr.
- APEC4310 - Agribusiness Finance - 3cr.
- APEC5000 - International Trade and Finance - 3cr.
- APEC5015 - Applied Economics for Decision Making (QI) - 3cr.
  OR APEC5020 - Strategic Firm Management (CI) - 3cr.

Agribusiness Emphasis Elective Credits (12 credits)

A minimum of 3 credits for ASTE 4250 are required.

Earn at least 12 credits from the following:

- APEC2830 - Agribusiness Sales and Marketing - 3cr.
- ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3cr.
- ASTE2100 - Personal and Team Leadership - 3cr.
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.
- ASTE4250 - Occupational Experiences in Agriculture - 1cr.
- ASTE5300 - Emergency Preparedness for Agricultural Enterprises - 1cr.
- ASTE5999 - Precision Agriculture Practicum - 3cr.

Open Electives

Complete the following as needed:
Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Agricultural Systems Technology - Agricultural Operations Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree

A degree in Agricultural Systems Technology prepares individuals to manage agricultural systems and agribusinesses with the application of sound technical, economical, and environmental practices. The focal point of the program is on the management, use, and troubleshooting of agricultural technology.

Students' coursework typically involves a broad foundation through real-world instruction in power and machine systems, natural resources conservation, electricity and electronics, precision agriculture technologies, and agricultural structural systems.

Students have the option to take electives to focus their studies in one of three emphases: **Agribusiness**, **Agricultural Machinery and Technology, or Agricultural Operations.**

An **Agribusiness** emphasis provides in-depth, technical education in agricultural economics and business management. It is designed to provide basic knowledge of business concepts and approaches, as well as an understanding of current agricultural changes. This emphasis is for students who wish to become managers in the ag industry. Students take courses in agricultural economics, agricultural business, and agricultural mechanics.

An **Agricultural Machinery and Technology** emphasis provides a broad understanding of agriculture with a depth of understanding related to using machinery and technology used in production practices. Students take courses in agricultural machinery, unmanned aerial systems, hydraulics, and electrical systems.

An **Agricultural Operations** emphasis provides a systems approach for students who wish to efficiently manage a crop or livestock production operation, or make a positive contribution on a multi-generational farm and/or ranch. Students in this 24-credit emphasis strengthen their knowledge and ability in animal and plant science to meet the variety of challenges that face agriculture today.

- For more information about Agricultural Systems Technology, see the website.
- Admitted and current students must meet with an advisor.
- For more information, click on this link or contact the academic advisor, Allie East at allie.east@usu.edu or 435-797-2194.
- Choose to emphasize in Agricultural Machinery and Technology, Agribusiness or Agricultural Operations. 24 credits are required.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program

- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Agricultural Systems Technology - Agricultural Operations Emphasis - BS Course Requirements

Type
Completion Requirement

Technical Requirements (27 credits)

Complete ALL of the following Courses:

- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
  AND ECN1500 - Introduction to Macroeconomics - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.

Required Communications Course (3 credits)

Complete ALL of the following Courses:

- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

Agricultural Systems Courses (24 credits)

Complete ALL of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE3600 - Data Management of Agricultural Systems (QI) - 3cr.
- ASTE4100 - Agricultural Structures and Environment (QI) - 3cr.
- ASTE5260 - Environmental Impacts of Agricultural Systems (CI) - 3cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Agricultural Operations Emphasis (24 credits)

Select 3 credits from each systems area (Animal Systems, Natural Resource Systems, Pest Management, and Plant Systems) for a total of 12 credits of required systems courses.

Students must select an additional 12 credits from the agricultural technology area for a total of 24 credits to complete the agricultural operations emphasis.

Fulfill ALL of the following requirements:

Animal Systems (3 credits)

Earn at least 3 credits from the following:

- ADVS2080 - Beef Production Practices - 3cr.
- ADVS2090 - Sheep Production Practices - 3cr.
- ADVS2120 - Swine Production and Management - 3cr.
- ADVS2130 - Dairy Cattle Production - 3cr.

- ADVS2190 - Horse Production Practices - 3cr.
- ADVS3150 - Principles of Equine-Assisted Services - 3cr.
- ADVS3650 - Live Animal and Carcass Evaluation - 3cr.
- ADVS3910 - Special Topics - 1cr.
- ADVS3930 - Sheep Day - 1cr.
- ADVS5860 - Poisonous Range Plants Affecting Livestock - 3cr.

AND

Natural Resource Systems (3 credits)

Earn at least 3 credits from the following:

- ENVS4000 - Human Dimensions of Natural Resource Management (DSS) - 3cr.
- PSC5350 - Wildland Soils - 3cr.
- PSC5710 - Irrigated Soils - 3cr.
- WATS3700 - Fundamentals of Watershed Science (CI) - 3cr.
- WILD4000 - Principles of Rangeland Management - 3cr.

AND

Pest Management (3 credits)

Earn at least 3 credits from the following:

- PSC4550 - Integrated Weed Management - 3cr.
- BIOL4500 - Applied Entomology - 3cr.
- PSC5550 - Fundamentals of Integrated Weed Management - 4cr.

AND

Plant Systems (3 credits)

Earn at least 3 credits from the following:

- PSC3500 - Structure and Function of Plants - 3cr.
- PSC3600 - An Introduction to Plant Breeding and Heredity - 3cr.
- PSC3800 - Fundamentals of Organic Agriculture - 3cr.
- PSC4280 - Field and Food Cropping Systems - 3cr.
- PSC4320 - Forage Production and Pasture Management - 3cr.

Agricultural Technology Elective Credits (12 credits)

Students must complete ASTE 1130 (3 credits) and 9 additional agricultural technology elective credits from the following courses.

Earn at least 12 credits from the following:

- ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3cr.
- ASTE2100 - Personal and Team Leadership - 3cr.
- ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- ASTE3900 - Special Problems in Agricultural Systems Technology and Education - 1cr.
- ASTE4250 - Occupational Experiences in Agriculture - 1cr.
- ASTE5300 - Emergency Preparedness for Agricultural Enterprises - 1cr.
- ASTE5999 - Precision Agriculture Practicum - 3cr.

- GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR WILD2800 - Introduction to Geographic Information Sciences - 4cr.
  OR WATS2800 - Introduction to Geographic Information Sciences - 4cr.

Open Electives

Agricultural Systems Technology - Agricultural Machinery and Technology Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Applied Sciences, Technology and Education

Program Level
Undergraduate

About this Degree
A degree in Agricultural Systems Technology prepares individuals to manage agricultural systems and agribusinesses with the application of sound technical, economical, and environmental practices. The focal point of the program is on the management, use, and troubleshooting of agricultural technology.

Students' coursework typically involves a broad foundation through real-world instruction in power and machine systems, natural resources conservation, electricity and electronics, precision agriculture technologies, and agricultural structural systems.

Students have the option to take electives to focus their studies in one of three emphases: **Agribusiness**, **Agricultural Machinery and Technology, or Agricultural Operations.**

An **Agribusiness** emphasis provides in-depth, technical education in agricultural economics and business management. It is designed to provide basic knowledge of business concepts and approaches, as well as an understanding of current agricultural changes. This emphasis is for students who wish to become managers in the ag industry. Students take courses in agricultural economics, agricultural business, and agricultural mechanics.

An **Agricultural Machinery and Technology** emphasis provides a broad understanding of agriculture with a depth of understanding related to using machinery and technology used in production practices. Students take courses in agricultural machinery, unmanned aerial systems, hydraulics, and electrical systems.

An **Agricultural Operations** emphasis provides a systems approach for students who wish to efficiently manage a crop or livestock production operation, or make a positive contribution on a multi-generational farm and/or ranch. Students in this 24-credit emphasis strengthen their knowledge and ability in animal and plant science to meet the variety of challenges that face agriculture today.

- For more information about Agricultural Systems Technology, see the website.
- Admitted and current students must meet with an advisor.
- For more information, click on this link or contact the academic advisor, Allie East at allie.east@usu.edu or 435-797-2194.
- Choose to emphasize in Agricultural Machinery and Technology, Agribusiness or Agricultural Operations. 24 credits are required.
- The highest math requirement for this degree is MATH1050 COLLEGE ALGEBRA (QL)

Admission Requirements for this Program
- New freshmen: Admitted to USU in Good Standing
- Transfer students from other institutions or other programs at USU: 2.75 GPA

Agricultural Systems Technology - Agricultural Machinery and Technology Emphasis - BS Course Requirements

Type

Completion Requirement

Technical Requirements (27 credits)

Complete ALL of the following Courses:

- APEC2010 - Introduction to Microeconomics (BSS) - 3cr.
- APEC2120 - Small Firm Accounting Basics - 3cr.
- APEC2310 - Small Firm Management - 3cr.
- APEC3010 - Agricultural Economics (DSS) - 3cr.
- CHEM1110 - General Chemistry I (BPS) - 4cr.
- APEC1600 - Natural Resources and American Economic Institutions (BAI) - 3cr.
  OR ECON2010 - Introduction to Microeconomics (BSS) - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- PSC3000 - Fundamentals of Soil Science - 4cr.

Required Communications Course (3 credits)

Complete ALL of the following Courses:

- ASTE3050 - Technical and Professional Communication Principles (CI) - 3cr.

Agricultural Systems Courses (24 credits)

Complete ALL of the following Courses:

- ASTE1010 - Introduction to Agricultural Systems Technology - 3cr.
- ASTE1110 - Equipment Safety for Agriculture and Natural Resources - 2cr.
- ASTE1610 - Agricultural and Construction Machinery Power - 4cr.
- ASTE1640 - Introduction to Welding - 3cr.
- ASTE3600 - Data Management of Agricultural Systems (QI) - 3cr.
- ASTE4100 - Agricultural Structures and Environment (QI) - 3cr.
- ASTE5260 - Environmental Impacts of Agricultural Systems (CI) - 3cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Agricultural Machinery and Technology Emphasis (16 credits)

A minimum of 6 credits of ASTE 4250 are required.

Complete ALL of the following Courses:

- ASTE3030 - Metal Fabrication for Agriculture and Natural Resource Industries - 3cr.
- ASTE3080 - Compact Power Units for Agricultural and Turfgrass Applications - 3cr.
- ASTE3720 - Electrical Power Systems for Agricultural Applications - 4cr.
- ASTE4250 - Occupational Experiences in Agriculture - 1cr.

Agricultural Machinery and Technology Emphasis Elective Credits (12 credits)

Earn at least 12 credits from the following:

- ASTE1130 - Agricultural Machinery Systems: Planting, Tillage, and Harvest Technologies - 3cr.
- ASTE2100 - Personal and Team Leadership - 3cr.
- ASTE3900 - Special Problems in Agricultural Systems Technology and Education - 1cr.
- ASTE5999 - Precision Agriculture Practicum - 3cr.
- ASTE5300 - Emergency Preparedness for Agricultural Enterprises - 1cr.
- AV1905 - Intro to Unmanned Aerial Systems (without FAA Exam) - 2cr.
- GEOG2800 - Introduction to Geographic Information Sciences - 4cr.
  OR WILD2800 - Introduction to Geographic Information Sciences - 4cr.
  OR WATS2800 - Introduction to Geographic Information Sciences - 4cr.

Open Electives

Complete the following as needed:

Total elective credit is determined by General Education courses taken, degree type selected, additional credits earned, and any additional math or other prerequisite courses needed. Please consult your Academic Advisor for details.

Degree Map Narrative

- Following is a sample four-year plan. Please note that student-specific plans may differ.
- Meet with an academic advisor to create a specific plan that best fits your academic needs.
- The student is ultimately responsible for knowing and completing all degree requirements.
- Make sure you meet the registration requirements for each class by clicking the course link and checking any prerequisites or corequisites.
- Consultation with an advisor may result in an altered plan customized for an individual student.
- Check your Degree Works for requirements and completion.

Aviation Technology - Maintenance Management - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Aviation Technology

Program Level
Undergraduate

About this Degree

The Aviation Technology - Maintenance Management major prepares students for entry-level positions in management and maintenance programs within the airline industry, corporate aviation, and general aviation.

Students acquire skills in flight principles and aircraft structures, aircraft maintenance, and aircraft systems through hands-on experience while working closely with professional instructors.

Students complete all of the courses required for the Federal Aviation Administration (FAA) Airframe and Powerplant (A&P) licenses, so when they graduate they have a bachelor's degree as well as meeting the FAA requirements to test for the A& P licenses, which qualifies them to work on certain aircraft and engines. Students take classes in advanced turbine engines, and composite structures. Computer literacy, management, and communications courses are incorporated into the program to provide essential business skills, and students also take courses in science, statistics, and electronics to further enhance their technical knowledge.

- For more information about Aviation Technology Maintenance Management, see the website
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The math requirement for this degree is any Quantitative Literacy (QL) course

Admission Requirements for this Program

- New freshmen: 2.5 GPA
- Transfer students from other institutions or other programs at USU: 2.5 GPA

Program Requirements

Total Credits Required In Program Coursework

Total Credits Required To Earn This Credential
120

Simple Requisites

Program Requirements

For all aviation technology majors, the following academic regulations apply in addition to university regulations:

1. A minimum GPA of 2.5 must be maintained in major required classes. University Studies courses are not included in this GPA calculation.

2. No more than 6 credits of *D or D+* credit may be applied toward meeting graduation requirements in major required classes.

3. The *P-D-F* grading option may not be used in required courses. (The *P-D-F* grading option is approved for University Studies courses.)

4. The academic regulations listed above (1-3) apply to required coursework and any technology/math/science/business course which could be used to satisfy graduation requirements for the chosen degree. That is, once a student completes a particular technical elective, it becomes a required course for that student.

5. Students in violation of departmental or college academic regulations, no longer eligible for graduation, or not making satisfactory progress toward a degree will have a registration hold placed on their record.

a. Students will be placed on probation (registration hold) if they

i. have more than 6 credits of *D* credit (see item 2 above), or

ii. have a major GPA of less than 2.5 (see item 1 above)

b. The hold remains until they improve their standing by repeating classes to reduce the number of *D* credits to 6 or less, and/or by raising their GPA above 2.5. Students must meet with their advisor to have the hold removed.

6. FAA regulations require students to earn a 70% or higher score to pass each course. To obtain the certification to test for Airframe and Powerplant licenses, students must meet that standard in each FAA part 147 required course.

Students are required to furnish their own basic set of tools and toolbox. With special discounts available through USU, prices range from $500 to $1,500. Contact Randy Chesley, randy.chesley@usu.edu or (435) 797-2748, for required tool list.

Required Courses

Type
Completion Requirement

Aviation Courses (74 credits)

Complete ALL of the following Courses:

- AV1100 - The Aviation Profession - 1cr.
- AV1130 - Flight Principles - 3cr.
- AV1140 - Aircraft Components and Principles - 3cr.
- AV1150 - Aircraft Components and Principles II - 3cr.
- AV1170 - Aircraft Structures - 3cr.
- AV1240 - Aircraft Maintenance - 3cr.
- AV2100 - Aircraft Reciprocating Powerplants and Accessories - 3cr.

  OR AV2300 - Fundamentals of Electricity and Aircraft Electronics - 4cr.
- TESY1030 - Material Processing Systems - 3cr.
- TESY1200 - Computer-Aided Drafting and Design - 3cr.

Students are also required to fulfill the Quantitative Literacy (QL) requirement

Upper-Division Directed Electives (12 credits)

Students must take 12 credits of upper-division directed electives to be chosen from the following list:

Earn at least 12 credits from the following:

- AV3010 - National Airspace, Air Traffic Control, and Airport Administration - 3cr.
- AV3100 - Technical Communication for the Global Aviation Industry (CI) - 3cr.
- AV4150 - AOG (Aircraft On Ground) Aircraft Maintenance - 1cr.
- AV4250 - Internship - 1cr.
- AV4300 - History of Aviation in America - 3cr.
- AV4720 - Aviation Safety and Security (CI) - 3cr.
- AV4750 - Aviation Symposium - 1cr.
- CMST3250 - Organizational Communication (CI) - 3cr.
- CMST3330 - Intercultural Communication (DSS) - 3cr.
- CMST4200 - Language, Thought, and Action (CI/DSS) - 3cr.
- CMST5500 - Communication and Leadership - 3cr.
- HDFS3350 - Family Finance (DSS) - 3cr.
- MGT3250 - Managing Human Capital - 3cr.
- MGT4600 - Negotiations - 2cr.
- MSLE3500 - Fundamentals of Marketing - 3cr.
- MSLE3510 - New Venture Creation - 3cr.
- MSLE3530 - New Venture Marketing - 3cr.
- MSLE3540 - New Venture Finance - 3cr.
- MSLE3580 - New Venture Execution - 3cr.
- MSLE3710 - Leading Teams - 2cr.
- MSLE3800 - Leadership - 2cr.
- MSLE3820 - International Business (DSS) - 3cr.
- UAS3010 - Unmanned Aircraft System Introduction to Remote Pilot Certification - 3cr.
- UAS3050 - Unmanned Aircraft Systems Pilot in Command Introduction - 3cr.

Aviation Technology - Professional Pilot: Accelerated Fixed Wing Emphasis - BS

Program Overview

College	Department	Program Level
College of Agriculture & Natural Resources	Aviation Technology	Undergraduate

About this Degree

The Aviation Technology – Professional Pilot: Accelerated Fixed Wing Emphasis prepares students to become professional pilots in the fixed wing industry. This emphasis allows students to complete their flight training in fewer semesters, providing greater flexibility and efficiency in their education. Upon graduation, students will have acquired the necessary flight hours and FAA licenses, including private, instrument, commercial single-engine with multi-engine add-on, and CFI.

- For more information about Aviation Technology Professional Pilot, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1060 TRIGONOMETRY

Flight Training

Once students commence flight training at USU, all flight training must be completed in USU approved aircraft. Exceptions include courses not offered by USU such as glider ratings, seaplanes, etc. Students who hold a FAA instrument and/or commercial license(s) are not admissible to this degree and should seek an alternate degree. Students should adhere to expected standards of flight training and complete each flight course in the semester. Students should work closely with their assigned flight instructor and the chief flight instructor to ensure standards are met. Failure to progress because of noncompliance with the expectations could result in a flight hold. Failing three FAA check exams can result in dismissal from the program. Further details and expectations can be found in the program handbook.

Medical Certificates

In accordance with the *Code of Federal Regulations*, *Title 14*, *Part 61.3*, all professional pilot students are required to obtain an FAA Medical Certificate. There are three classes of medical certificates which students may obtain: First Class, Second Class, and Third Class. Although *only* a Third Class Medical Certificate is required for student pilot operations at Utah State University, it is highly recommended that students obtain a First Class Certificate, in order to ensure that no medical conditions exist which would disqualify them from obtaining one at a later date. **Many pilot jobs *require* a First Class Medical Certificate.** Students using VA education benefits must maintain at least a Second Class Medical Certificate. A medical certificate may be obtained from a certified Aviation Medical Examiner (AME). Detailed requirements for each medical class and durations are explained in CFR Title 14, part 67, and part 61.23.

Fees

In addition to regular tuition and fees, a special class fee will be assessed to all flight certification classes. When a student enrolls in each flight certification, the fee is due with tuition payment. Course costs are based on average costs of training, and include stage check and FAA check ride fees. **All fees are subject to change**. Please visit the program website for a list of current flight fees.

Restricted ATP

Students who graduate with this degree can qualify for the Restricted Airline Transport Pilot (RATP) certificate. To be eligible for the RATP certifying document you must meet the following criteria: 1) Received a Bachelors degree in Aviation Technology – Professional Pilot from Utah State University; 2) Earn a minimum of 60 credits of approved aviation courses (see advisor for list); 3) Complete instrument rating and commercial pilot certificate from Utah State University.

All students please note that the 1000 hour R-ATP will only be awarded to students who meet all FAA requirements AND graduate in the Aviation Technology Professional Pilot degree.

Students who meet FAA requirements for the R-ATP, but graduate in an Aviation Management major will only qualify for the 1250 hour R-ATP.

Admission Requirements for this Program

- New freshmen: 3.0 GPA
- Transfer students from other institutions or other programs at USU: 3.0 GPA

120

Simple Requisites

Program Requirements

Students should work closely with their advisor when choosing electives and filling out the necessary matriculation forms. The advisor can be a useful source of information and assistance, but it is the student's responsibility to seek an advisor's aid and meet the necessary graduation requirements. Find advisor contact here.

Graduation Requirements for Aviation Technology:

For all aviation technology majors, the following academic regulations apply in addition to University regulations:

1. A minimum GPA of 3.0 must be maintained in major required classes. University Studies courses are not included in this GPA calculation.

2. No more than 5 credits of *D+* or lower credit may be applied toward meeting graduation requirements in major required classes.

3. The *P-D-F* grading option may not be used in required courses. (The *P-D-F* grading option is approved for University Studies courses.)

4. The academic regulations listed above (1-3) apply to required coursework and any technology/math/science/business course which could be used to satisfy graduation requirements for the chosen degree. That is, once a student completes a particular technical elective, it becomes a required course for that student.

5. Students in violation of departmental or college academic regulations, no longer eligible for graduation, or not making satisfactory progress toward a degree will have a registration hold placed on their record.

Aviation Technology - Professional Pilot: Accelerated Fixed Wing Emphasis - BS Course Requirements

Type

Completion Requirement

Professional Pilot Core Courses (25 credits)

Complete ALL of the following Courses:

- AV1100 - The Aviation Profession - 1cr.
- AV2040 - Aviation Weather - 3cr.
- AV3010 - National Airspace, Air Traffic Control, and Airport Administration - 3cr.
- AV3120 - Aviation Law - 3cr.
- AV4490 - Human Factors in Aviation Safety - 3cr.
- AV4660 - Aviation Senior Project (CI) - 3cr.
- MATH1050 - College Algebra (QL) - 4cr.
- MATH1060 - Trigonometry - 2cr.
- MSLE3110 - Managing Organizations and People (DSS) - 3cr.

Accelerated Flight Emphasis Courses (37 credits)

Complete ALL of the following Courses:

- AV2000 - Aerodynamics for Aviators - 3cr.
- AV2160 - Aircraft Systems for the Professional Pilot - 3cr.
- AV2330 - Private Pilot Ground School - 4cr.
- AV2350 - Private Pilot Certification - 3cr.
- AV2520 - Instrument Pilot Ground School - 4cr.
- AV2620 - Commercial Pilot Ground School - 3cr.
- AV2800 - Flight Lab 1 (141 Instrument and Commercial Training) - 3cr.
- AV2900 - Flight Lab 2 (141 Instrument and Commercial Training) - 3cr.
- AV3200 - Flight Lab 4 (141 Commercial and CFI Training) - 3cr.
- AV3720 - CFI Ground School (CI) - 3cr.
- AV3880 - Commercial Multi-Engine Add-On - 2cr.
- AV5500 - Airline Transport Pilot (ATP) Standards (QI) - 4cr.

Accelerated Flight Emphasis Electives (12 credits)

Earn at least 12 credits from the following:

- AV3000 - Flight Lab 3 (141 Commercial Training) - 3cr.
- AV3140 - Advanced Avionics Systems and Flight Simulation - 3cr.
- AV3300 - Flight Lab 5 (141 CFI Training) - 2cr.
- AV3900 - Aviation Independent Study - 1cr.
- AV4250 - Internship - 1cr.
- AV4280 - Aviation Management - 3cr.
- AV4710 - Crew Resource Management (CI) - 3cr.
- AV4720 - Aviation Safety and Security (CI) - 3cr.
- AV4750 - Aviation Symposium - 1cr.
- AV5300 - Advanced Twin Systems - 3cr.
- AV5400 - Boeing 737 NG Systems and Procedures - 4cr.
- AV5420 - Boeing 737 NG Advanced Flight Maneuvers - 3cr.

Aviation Technology - Professional Pilot: Fixed Wing Emphasis - BS

Program Overview

College
College of Agriculture & Natural Resources

Department
Aviation Technology

Program Level
Undergraduate

About this Degree

The Aviation Technology – Professional Pilot major prepares students to become professional pilots in the fixed wing industries. Upon graduation from this program, students will have acquired approximately 250-300 hours of flight time. The degree requirements include completion of the following FAA licenses: private, instrument, commercial single-engine with multi-engine add-on, and CFI.

- For more information about Aviation Technology Professional Pilot, see the website.
- Admitted and current students must meet with an advisor.
- Log on to Degree Works to check student-specific program progress.
- The highest math requirement for this degree is MATH1060 TRIGONOMETRY

Flight Training

Once students commence flight training at USU, all flight training must be completed in USU approved aircraft. Exceptions include courses not offered by USU such as glider ratings, seaplanes, etc. Students who hold a FAA instrument and/or commercial license(s) are not admissible to this degree and should seek an alternate degree. Students should adhere to expected standards of flight training and complete each flight course in the semester. Students should work closely with their assigned flight instructor and the chief flight instructor to ensure standards are met. Failure to progress because of noncompliance with the expectations could result in a flight hold. Failing three FAA check exams can result in dismissal from the program. Further details and expectations can be found in the program handbook.

Garmin Pilot App

Students will need a device that can operate the Garmin Pilot App in order to engage in flight training. Please see compatibility requirements here: Garmin Pilot App Compatibility Requirements | Garmin Customer Support

Medical Certificates
